KILDARE (E. Ireland). The celebrated Curragh or race-course here was once a forest of oaks; and here was the famous nunnery of St. Bridget, founded by her in the fifth century. The insurrection in Kildare, which swelled into the rebellion, commenced in Kildare, May 23, 1798. On that night, lieut. Gifford of Dublin, and a number of other gentlemen, were murdered by insurgents. This rebellion was quelled in 1799. The see of Kildare was one of the earliest episcopal foundations in Ireland; St. Conlath, who died A.D. 519, the first prelate. The first Protestant bishop was Thomas Lancaster, in 1550. In this diocese was a small old building called the fire-house, where, it is supposed, the nuns of St. Bridget kept the inextinguishable fire which existed till the reformation. The see is valued in the king's books, by an extent returned, 30 Hen. VIII., at 69*l.* 11*s.* 4*d.* Irish per year. Kildare was united to Dublin on the decease of Dr. Lindsay, the last prelate (conformably with the Church Temporalities act), in 1846. See *Dublin*.

KILFENORA (Clare), a bishopric, said to have been founded by St. Fachnan. Cardinal Paparo, in 1152, rendered it a suffragan see to Cashel; but in 1660 it was annexed to Tuam, and afterwards united to Killaloe.

KILKENNY (S.E. Ireland), an English settlement about 1071. The Statutes of Kilkenny enacted, among other things, "that the alliance of the English by marriage with any Irish, the nurture of infants, and gossiping with the Irish, be deemed high treason." And again, "if anie man of English race use an Irish name, Irish apparell, or anie other guise or fashion of the Irish, his lands shall be seized, and his body imprisoned, till he shall conform to English modes and customs."

KILLALA (Mayo) was invaded by a French force landing from three frigates, under general Humbert, Aug. 22, 1798. The invaders were joined by the Irish insurgents, and the battles of Castlebar, Colooney, and Ballynamuck, followed, but the French were ultimately subdued, Sept. 8, same year.

KILLALA (Sligo), a see of early foundation. The author of the tripartite life of St. Patrick, in giving an account of that saint's progress through Connaught, in 434, says, "that he came to a pleasant place where the river Muadas (Moy) empties itself into the ocean; and on the south banks of the said river he built a noble church, called Kil-Aladh, of which he made one of his disciples, Muredach, the first bishop." The see of Achonry was united to Killala in the seventeenth century; and both became united to Tuam in 1839. See *Tuam* and *Bishops*.

KILLALOE (Clare), a see supposed to have been founded by St. Molua, whose disciple, St. Flannan, son to king Theodoric, consecrated at Rome by pope John IV. in 639, was also bishop. The church was esteemed of great sanctity, and was anciently resorted to in pilgrimage, of which there are many instances; among others, Conor Mac Dermot O'Brien, king of Thomond and Desmond, died here in pilgrimage, in 1142. At the close of the twelfth century the see of Roscrea was annexed to Killaloe, and that of Kilfenora has been held *in commendam* with it. Clonfert and Kilmacduach were united to this joint see in 1836.

KILLNECRANKIE (a defile in Perthshire). Here the forces of William III. commanded by general Mackay were defeated by the adherents of James II. under Graham of Claverhouse, viscount Dundee, who fell in the moment of victory, July 27, 1689.

KILMACDUACH (Galway). This see was held *in commendam* with Clonfert, from 1602. St. Coleman, its first bishop, in the seventh century, lived in a wilderness in the south part of Connaught, seven years previous to his being made bishop of this see. The see was valued, 29 Eliz. 1586, at 13*l.* 6*s.* 8*d.* *per annum*. It is now united to Killaloe (*which see*).

KILMAINHAM HOSPITAL (Dublin), the noble asylum of aged and disabled soldiers in Ireland, was built by Wren. It was founded by Arthur, earl of Granard, then marshal-general of the army in Ireland, 1675; and the duke of Ormond perfected the plan, in 1679. Kilmainham was the seat of government before the castle of Dublin.

KILMALLOCK (Limerick). An abbey was founded here by St. Mochoallog or Molach about the year 645, and an abbey of Dominicans was built in the thirteenth century. *Ware*. A charter was granted to Kilmallock by Edward VI., and another by Elizabeth in 1584. The town was invested by the Irish forces in 1598, but the siege was raised by the duke of Ormond. There was much fighting here in 1641 and 1642.

KILMORE (Armagh), an ancient town, whose bishops were sometimes called Brefnienses from Brefney, and sometimes Triburnenses, bishops of Triburna, from a village of that name; but in 1454, the bishop of Triburna, by assent of pope Nicholas V., erected the parish church of St. Fedlemid into a cathedral, as a more commodious situation. Florence O'Connacty, the first bishop, died in 1231. Valued, 15 Jas. I. with Ardagh, at 100*l. per annum*. The joint see of Elphin and Ardagh was united to it in 1841. See *Bishops*.

KINBURN, a fort, on a tongue of land at the confluence of the rivers Bug and Dnieper, taken by the English and French, October 17th, 1855. It contained a garrison of 1500 men and 21 cannon. Three floating French batteries, said to be the invention of the emperor, on the principle of horizontal shell-firing, were very effective. On the 18th the Russians blew up Oczakoff, a fort opposite.

KINDRED, TABLE OF, in the Book of Common Prayer, was set forth in 1563.

KINDER-GARTEN (children's garden), a system of education for young children devised by Froebel, but practically carried out by Mr. and Mrs. Ronge; first in Germany in 1849, and in England in 1851. The system, which is founded mainly on self-tuition, and makes use of toys, games, &c., and is enlivened by singing, is set forth in Ronge's "Kinder-Garten," published in 1858.

KING. The Latin *Rex*, the Scythian *Reis*, the Spanish *Rey*, Italian *Rè*, and French *Roy*, all come from the Hebrew *Rosch*, chief or head. Nimrod was the first founder of a kingdom 2245 B.C. *Dufresnoy*. Misraim built cities in Egypt, and was the first who assumed the title of king in that division of the earth, 2188 B.C. The "manner of the king" is set forth in 1 *Samuel* viii., 1112 B.C. Saul was the first king of Israel, 1095 B.C. Most of the Grecian states were governed by kings; and kings were the first rulers in Rome.

KING OF ENGLAND.

The style "king of England" was first used by Egbert, A.D. 828; but the title *Rex gentis Anglorum*, king of the English nation, existed during the Heptarchy. See *Britain*.
The plural phraseology, *we, us, our*, was first adopted among our English kings by king John . . . 1199
The title "king of France" assumed, and the French arms quartered, by Edward III., in right of his mother . . . 1340
Pope Leo X. conferred the title of "Defender of the Faith" on Henry VIII. . . Oct. 11, 1521
Henry VIII. changed *lord* of Ireland into king, 1542
The style "Great Britain" was adopted at the union of England and Scotland, 6 Anne . . . 1707
That of the "United Kingdom of Great Britain and Ireland" at the union, when the royal style and title was appointed to run thus:—"*Georgius Tertius, Dei Gratia, Britanniarum Rex, Fidei Defensor*," "George the Third, by the Grace of God, of the United Kingdom of Great Britain and Ireland King, Defender of the Faith" (France being omitted) Jan. 1, 1801
Hanover was omitted in the queen's style, June 27, 1837
The queen was proclaimed in all the important places in India, as "Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, and the colonies and dependen-

cies thereof in Europe, Asia, Africa, America, and Australia, queen," &c. . . Nov. 1, 1858

KING OF THE FRENCH.

The National Assembly decreed that the title of "king of France," should be changed in the person of Louis XVI. to that of "king of the French" . . . Oct. 16, 1789
The royal title abolished . . . 1792
Louis XVIII. styled "by the grace of God king of France and Navarre" . . . 1814
Louis-Philippe I., the late sovereign, was invited to the monarchy under the style of the "king of the French" (see *France*) . . . Aug. 9, 1830

KING OF THE ROMANS.

The emperors of Germany, in order that their eldest sons might be chosen their successors, in their own life-time politically obtained them the title of "king of the Romans." The first emperor so elected was Henry IV. . . 1055
Richard, brother of Henry III. of England, was induced to go to Germany, where he disbursed vast sums under the promise of being elected next emperor; he was elected "king of the Romans" (but failed in succeeding to the Imperial crown) . . . 1126
The style "king of Rome" was revived by Napoleon I. who conferred it on his son, upon his birth . . . March 20, 1811

KING-OF-ARMS. There are three for England,—Garter, Clarencieux, and Norroy; and Lyon king-at-arms for Scotland, and Ulster for Ireland. These offices are very ancient: Clarencieux is so named from Lionel, third son of Edw. III., the sovereign who founded the order of the Garter. See *Garter*. Lionel having by his wife the honour of Clare, was made duke of Clarence; which dukedom afterwards escheating to Edward IV., he revived the office of Clarence king-at-arms. Ulster was substituted, it is said, in lieu of Ireland king-at-arms, by Edward VI., 1552; but the monarch himself named it as a new institution.

KING'S BENCH, or **QUEEN'S BENCH**, COURT OF, obtained its name from the king sometimes sitting here on a high bench, and the judges, to whom the judicature belongs in

his absence, on a low bench at his feet. This court in ancient times was called *Curia Domini Regis*; and in the reign of king Edward I. a statute passed by which it was enacted that the judges should attend the king, and follow him, so that he might have at all times near him men learned in the laws, to dispense justice. "The judges used to ride to Westminster Hall on mules; sir John Whyddon, in the reign of queen Elizabeth, first introduced horses; but of late years they go in coaches."—*Beatson*.

CHIEF JUSTICES OF THE KING'S OR QUEEN'S BENCH IN ENGLAND.

1526. John Fitz James.	1660. Sir Robert Foster.	lord Hardwicke and lord chancellor.
1539. Sir Edward Montagu.	1663. Sir Robert Hyde.	1737. Sir William Lee.
1540. Sir Richard Lyster.	1665. Sir John Kelyng.	1754. Sir Dudley Ryder.
1552. Sir Roger Cholmely.	1671. Sir Matthew Hale.	1756. William Murray, lord Mansfield, afterwards earl of Mansfield.
1553. Sir Thomas Bromley.	1676. Sir Richard Raynsford.	1788. Lloyd, lord Kenyon, June 9.
1554. Sir William Portman.	1678. Sir William Scroggs.	1802. Sir Edward Law, April 12; created lord Ellenborough.
1556. Sir Edward Saunders.	1681. Sir Francis Pemberton.	1818. Sir Charles Abbott, Nov. 4; afterwards lord Tenterden.
1559. Sir Robert Catlyn.	1683. Sir Edmund Saunders.	1832. Sir Thomas Denman, Nov. 7; created lord Denman: resigned.
1573. Sir Christopher Wray.	— Sir George Jefferies, afterwards lord Jefferies and lord chancellor.	1850. John, lord Campbell, March 5; afterwards lord chancellor.
1591. Sir John Popham.	1685. Sir Edward Herbert.	1859. Sir Alexander Cockburn, June. The PRESENT (1862) lord chief justice of England.
1607. Sir Thomas Fleming.	1687. Sir Robert Wright.	
1613. Sir Edward Coke.	1689. Sir John Holt.	
1616. Sir Henry Montagu.	1709. Sir Thomas Parker, afterwards lord Parker and earl of Macclesfield and lord chancellor.	
1620. Sir James Ley.	1718. Sir John Pratt.	
1624. Sir Ranulph Crewe.	1725. Sir Robert Raymond, afterwards lord Raymond.	
1626. Sir Nicholas Hyde.	1733. Sir Philip Yorke, afterwards	
1631. Sir Thomas Richardson.		
1635. Sir John Brampton.		
1643. Sir Robert Heath.		
1648. Henry Rolle.		
1655. John Glyn.		
1659. Sir Richard Newdigate		
1659. Robert Nicholas.		

CHIEF JUSTICES OF THE KING'S OR QUEEN'S BENCH IN IRELAND.

1690. Sir Richard Reynell. Dec. 6.	1764. John Gore; Aug. 24: afterwards earl Annaly.	• afterwards lord Downes.
1695. Sir Richard Pyne. June 7.	1784. John Scott; April 29: afterwards earl of Clonmel.	1822. Charles Kendal Bushe. Feb. 14.
1699. Alan Brodrick. Dec. 24.	1798. Arthur Wolfe; June 13: afterwards lord Kilwarden (killed in Emmett's insurrection, July 23, 1803).	1841. Edward Pennefather. Nov. 10.
1711. Sir Richard Cox. July 5.	1803. William Downes; Sept. 12:	1846. Francis Blackburne. Jan. 23.
1714. William Whitshed. Oct. 14.		1852. Thomas Lefroy, March. The PRESENT chief justice (1862).
1727. John Rogerson. April 3.		
1741. Thomas Marlay. Dec. 29.		
1751. St. George Caulfield. Aug. 27.		
1760. Warden Flood. July 31.		

KING'S BENCH PRISON, Southwark, near the site of one of the oldest prisons of London, used for the confinement of debtors. Here, it is said, prince Henry (afterwards Henry V.) was committed by justice Gascoigne. The prison was burnt down by the London rioters, June 3, 1780. See *Gordon's No-popery Mob*. The present edifice was built in 1781, and contains about 230 rooms. Formerly, besides this accommodation, the debtors were allowed to purchase the liberties, to enable them to have houses or lodgings without the walls, or to purchase day-rules, to go out of the prison under certain regulations. The rules included the whole of St. George's Fields, on one side of Blackman-street, and part of High-street. This privilege, however, has been discontinued. A consequence of the Bankruptcy Act, 1861, was the release of many insolvent debtors; and an act was passed in 1862 "for discontinuing the Queen's prison and removal of the prisoners to Whitecross-street prison."

KING'S COLLEGES. That of Aberdeen was founded in 1500, that of Cambridge, the pride of that university, was founded by Hen. VI. in 1441. King's College, Halifax, chartered in May 1802. King's College, London, incorporated Aug. 14, 1829, and opened Oct. 8, 1831. It was incorporated with the university of London in 1837.

KING'S COUNSEL. The first king's counsel under the degree of serjeant was sir Francis Bacon, made so, *honoris causâ*, without patent or fee, in 1604, when James I. bestowed upon him knighthood and a pension. The first king's counsel of the modern order was sir Francis North, afterwards lord-keeper to Charles II. in 1663.

KING'S COUNTY, Ireland. This county was so named from Philip, king of Spain, the husband of queen Mary-of England, in 1556.

KING'S EVIL, supposed to be cured by the touch of the kings of England. The first who touched for it was Edward the Confessor, in 1058. In the reign of Charles II. in fourteen years, 92,107 persons were touched; and, according to Wiseman, the king's physician, they were nearly all cured! Queen Anne officially announced in the *London Gazette*, March 12, 1712, her royal intention to touch publicly for the cure of the evil. The custom was discouraged, and dropped by George I. 1714.

KING'S SPEECH. The first royal speech from the throne is said to have been delivered by Henry I. in 1107. The king's speeches are printed in the Journals of Parliament.*

KINGDOMS. See *King*.

KINGSTON, DUCHESS OF, TRIAL OF THE. The most celebrated trial of a peeress upon record; she was arraigned before the Lords in Westminster-hall, on a charge of bigamy, having married captain Hervey, afterwards earl of Bristol, and during his lifetime, Evelyn Pierrepont, duke of Kingston; she was found guilty, but, on her pleading the privilege of peerage, the usual punishment of burning in the hand was remitted, and she was discharged on paying the fees of office. The trial lasted from April 15 to 22, 1776.

KINGSTON, JAMAICA. Founded in 1693, after the great earthquake in 1692 which destroyed Port Royal, since when it has continued to increase in size and opulence; constituted a city, 1802. An awful fire here ravaged a vast portion of the town, and consumed 500,000*l.* of property, Feb. 8, 1782, and another in 1843. See *Jamaica*.

KINGSTOWN, DUBLIN. The fine harbour here was commenced in June 1817. The place was originally called Dunleary, but the name was changed in compliment to George IV. who here embarked for England at the close of his visit to Ireland, Sept. 3, 1821. The opposite harbour of Howth was commenced in Sept. 1807. The Kingstown railway from Dublin was opened Dec. 17, 1834.

KISSING. Kissing the hands of great men was a Grecian custom. Kissing was a mode of salutation among the Jews, as we may collect from Judas approaching his Master with a kiss; it was also customary in Rome. The "kiss of charity," or "holy kiss," commanded in the Scriptures (*Rom. xvi. 16, &c.*), was observed by the early Christians, and is still recognised by the Greek church and some others. Kissing the pope's foot began with Adrian I. or Leo III. at the close of the eighth century.

KIT-CAT CLUB, consisting of about thirty noblemen and gentlemen, was instituted in 1703, to promote the Protestant succession in the House of Hanover. Addison, Steele, and Dr. Garth were members, and made several epigrams upon the toasts of the club. It took its name from Christopher Kat, a pastry-cook, who lived near the tavern in King-street, Westminster, and who served them with pastry. *Bouyer*.

KITTS. See *Christopher's, St.*

KNEELING. The knee was ordered to be bent at the name of Jesus (see *Philippians ii. 2*), about the year 1275, either by the order of pope Gregory X. or Innocent V. This custom is observed not only in divine worship, but on all occasions, in Roman Catholic countries, where the host in passing through the streets, in the hands of the clergy to the chambers of the sick, has adoration paid to it in a kneeling posture by the people. They also kneel at the vesper bell. *Ashe*. The ceremony of a vassal kneeling to his lord is said to have begun in the eighth century.

KNIGHT ERRANTRY took its rise in the combats of the Celtic nations, particularly the judicial combats, and much prevailed in Spain, France, and Germany. Tilts and tournaments commenced with the return of the crusaders from the crusades, and for about 300 years they were the chief amusements of courts, and the successful combatants acquired knighthood, and the favour of the ladies. The novel of Don Quixote by Cervantes, written to satirize knight-errantry, was published in 1605.

KNIGHTHOOD. The word knight is derived from the Saxon *Cniht*, a servant (*i. e.* servant to the king, &c.). The institution of the Roman knights (*Equites* or horsemen, from *equus*, a horse), is ascribed to Romulus, about 750 B.C. Knighthood was conferred in England by the priest at the altar, after confession and consecration of the sword, during the Saxon Heptarchy. The first knight made by the sovereign with the sword of state was Athelstane, on whom Alfred bestowed this new dignity, A.D. 900. *Spelman*. The custom of ecclesiastics conferring the honour of knighthood was suppressed in a synod held at Westminster in 1100. *Ashmole's Institutes*. All persons having ten pounds yearly income were obliged to be knighted, or pay a fine, 38 Hen. III. 1254. *Salmon*. As a system, under the denomination of chivalry, knighthood is to be dated from the eleventh century. On the decline of the empire of Charlemagne, all Europe being reduced to a state of anarchy, the proprietor of every manor became a petty sovereign; his mansion was fortified by a moat, and defended by a guard, and called a castle. Excursions were made by one petty lord

* These speeches have been continually censured for grammatical inaccuracies. William Cobbett said, "Canning being now (April, 1827) minister—of one thing, and one thing only, we are certain; we shall have no more grammatical blunders in king's speeches: these things will still be written in the same meagre way, in point of matter, as before, but we shall have them in a perspicuous and pure style."

against another, and the women and treasure were carried off by the conqueror. At length the owners of rich fiefs associated to repress these marauders, to make property secure, and to protect the ladies; binding themselves to these duties by a solemn vow, and the sanction of a religious ceremony. The first knights being men of the highest rank and largest possessions, admission into the order was deemed a great honour.

MILITARY, RELIGIOUS, AND HONORARY ORDERS OF KNIGHTHOOD.*

Alcantara, instituted abt. A.D.	1160	Golden Shield and Thistle, France	1370	St. Andrew, Scotland. "See Thistle"	809, 1540, 1687
Amaranta, Sweden (female)	1645	Golden Spur, by Pius IV.	1559	St. Anne, Holstein, now Russia, 1738 or 1735	1738 or 1735
Angelic Knights, Greece	1191	Golden Stole, Venice, before	737	St. Anthony, Hainault	1382
Annunciada, Mantua	1618	Guelphic, Hanover	1815	St. Anthony, in Ethiopia	370
Annunciation, Savoy	1335	Henry the Lion, Brunswick	1834	St. Bento d'Avis. See <i>Avis</i> above.	
Arís, Portugal	about 1147	Holy Ghost, France	1579	St. Blaise, Armenia, twelfth century.	
Bannerets, England, 1360. Renewed. See <i>Bannerets</i>	1485	Holy Vial (St. Remi), France	499	St. Bridget, Sweden	1366

		St. Andrew, Russia	1698		

* Enlarged and corrected from Edmondson and Carlisle; the early dates are doubtful. Many orders were instituted after the settlement of Europe in 1815. ●

KNIGHTHOOD, *continued.*

St. Sepulchre, Palestine . . . 1099	Star of the Cross (Ladies), Austria . . . 1668	Tower and Sword, Portugal, 1459. Revived . . . 1808
St. Stanislas, Poland . . . 1765	Star of India . . . 1861	Tasim, Austria . . . about 1562
St. Stephen, Hungary . . . 1764	Swan, Flanders . . . 500	Vasa, Sweden . . . 1772
St. Stephen, Tuscany . . . 1561	Sword (or Silence), Cyprus, about 1192	Virgin of Mount Carmel, France . . . 1607
St. Thomas of Acon . . . after 1377	Sword, Sweden, 1525. Revived . . . 1748	White Cross, Tuscany . . . 1814
Saviour, Aragon . . . 1118	Templars. See <i>Templars</i> . . . 1119	White Eagle, Poland, about 1325. Revived . . . 1705
Saviour, Greece . . . 1833	Teste Morte (Death's Head), Würtemberg . . . 1652	White Falcon, Saxe Weimar . . . 1732
Saviour of the World, Sweden . . . 1561	Teutonic, Prussia, about 1190. Renewed . . . 1522	Wilhelm, Holland . . . 1815
Scale, Castile . . . about 1316	Thistle of Bourbon . . . 1370	Wing of St. Michael, Portugal . . . 1172
Scarf, Castile, 1330. Revived 1700	Thistle, Scotland, 809. Revived . . . 1540, 1687	Wladimir, Russia . . . 1782
Seraphim, Sweden . . . 1334		
Ship and Crescent, France . . . 1269		
Slaves of Virtue, Germany (Ladies) . . . 1662		
Star, France . . . 1351		
Star, Sicily . . . 1351		

KNIGHTS, FEMALE. The title of knight was sometimes given to women also. It is said to have been first conferred on the women who preserved Tortosa from falling into the hands of the Moors in 1149, by their stout resistance to the besiegers. Large immunities and favours were granted to the women and their descendants. Several female orders of knighthood have been established in Germany and Sweden. *See above.*

KNIGHTS OF GLYN AND KERRY, IN IRELAND. The heads of two branches of the family of Fitzgerald, to whom are still permitted the distinctions bestowed on their ancestors by the ancient sovereigns of their country; these titles are of remote date. The late knight of Kerry, the right hon. Maurice Fitzgerald, was a lord of the treasury in 1827.

KNIGHTS OF THE ROUND TABLE, said to have been instituted by king Arthur about A.D. 528. *Asser.* The proposed revival of this order, by Edw. III. at Windsor, led to the establishment of the order of the Garter (*which see*) in 1349.

KNIGHTS OF THE SHIRE, or Knights of Parliament; chosen on the king's writ by the freeholders of every county. They are said to have been first summoned by Simon de Montfort, in 1254. There are writs extant as far back as 11 Edward I. 1283. The knights are still girded with a sword when elected, as the writ prescribes.

KNIGHTS HOSPITALLERS, AND TEMPLARS. *See Malta and Templars.*

KNIVES. In England, Hallamshire has been renowned for its cutlery for five centuries: Chaucer speaks of the "Sheffield thuytel." Stow says that Richard Mathews on the Fleet-bridge was the first Englishman who made *fine* knives, &c.; and that he obtained a prohibition of the importation of foreign ones, 5 Eliz. 1563. Clasp or spring knives became common about 1650; coming originally from Flanders. *Knife-cleaning machines* were patented by Mr. George Kent in 1844 and 1852; others have been invented by Mr. Masters and Mr. Price. *See article Forks.*

KNOW-NOTHINGS, a society which arose in 1853, in the United States of N. America. Their principles were embodied in the following propositions (at New York, 1855):—They then possessed several newspapers and had much political influence over the elections, and held secret meetings. A society was formed in 1855 in opposition to the above, called *Know Somethings*. Both these bodies are said to have been absorbed into the two great parties of Democrats and Republicans at the presidential election in Nov. 1856.

- | | |
|--|---|
| 1. The Americans shall rule America. | 6. Hostility to the assumptions of the Pope, through the bishops, &c., in a republic sanctified by Protestant blood. |
| 2. The Union of these States. | 7. Thorough reform in the neutralisation laws. |
| 3. No North, no South, no East, no West. | 8. Free and liberal educational institutions for all sects and classes, with the Bible, God's holy word, as an universal text-book. |
| 4. The United States of America—as they are—and inseparable. | |
| 5. No sectarian interferences in our legislation or in the administration of American law. | |

KOH-I-NOOR, or "Mountain of Light." The East India Diamond. *See Diamonds.*

KOLIN or KOLLIN (Bohemia). Here the Austrian general Daun gained a signal victory over Frederick the Great of Prussia, June 18, 1757. In commemoration, the military order of Maria Theresa was instituted by the empress-queen. Marshal Daun, the next year, obliged the king of Prussia to raise the siege of Olmütz, and to retreat from Moravia. *Aspin.*

KONIEH (formerly Iconium). Here the army of the Turkish sultan was defeated by that of the pacha of Egypt, after a sanguinary fight that continued all the day, Dec. 21, 1832. The grand vizier was wounded and taken prisoner.

KÖNIGSBERG, the capital of East Prussia, was founded by the Teutonic knights in 1255, and became the residence of the grand master in 1457. It joined the Hanseatic league in 1365. It was ceded to the elector of Brandenburg in 1657, and here Frederick III. was crowned the first king of Prussia in 1701. It was held by the Russians 1758-64, and by the French in 1807. Here the present king and queen were crowned, Oct. 18, 1861.

KONIGSTEIN TUN (Nassau, Germany), most capacious, was built by Frederick Augustus, king of Poland, in 1725. It was made to hold 233,667 gallons of wine; and on the top, which was railed in, was accommodation for twenty persons to regale themselves. The famous tun of St. Bernard's holds eight hundred tuns. See *Heidelberg Tun*.

KORAN or **ALCORAN** (AL-KURAN), the sacred book of the Mahometans, was written about A.D. 610, by Mahomet (who died 632) and published by Abubeker about 635. Its general aim was to unite the professors of idolatry and the Jews and Christians in the worship of one God (whose unity was the chief point inculcated), under certain laws and ceremonies, exacting obedience to Mahomet as the prophet.* The leading article of faith preached is compounded of an eternal truth and a necessary fiction, namely, that there is only one God, and that Mahomet is the apostle of God. *Gibbon*. The Koran was translated into Latin in 1643; into French 1647; into English, by Sale, 1734; and into other European languages 1763, *et seq*. It is a rhapsody of 3000 verses, divided into 114 sections. See *Mahometanism*, &c.

KOSZTA AFFAIR. Martin Koszta, a Hungarian refugee, when in the United States in 1850, declared his intention of becoming an American citizen, and went through the preliminary forms. In 1853 he visited Smyrna, and on June 21 was seized by a boat's crew from the Austrian brig *Huzzar*. By direction of the American minister at Constantinople, Captain Ingraham of the American sloop *St. Louis* demanded his release; but having heard that the prisoner was to be clandestinely transferred to Trieste, on July 2 he demanded his surrender by a certain time and prepared to attack the Austrian vessel; Koszta was then given up. On August 1, the Austrian government protested against these proceedings in a circular addressed to the European courts, but eventually a compromise was effected, and Koszta returned to the United States.

KRASNOI (in central Russia), **BATTLE OF**, Nov. 17, 1812, between the French army under marshal Davoust, prince of Eckmühl, and the Russian army commanded by the celebrated warrior and prince Kutusoff (who died in 1813). Davoust was entirely overthrown, and his army wholly dispersed, leaving many thousands slain upon the field.

KREASOTE. See *Creasote*.

KREMLIN, a palace at Moscow, built by Demetri, grand-duke of Russia, in 1376. It was burnt down in 1812, and re-built in 1816.

KUNNERSDORF, BATTLE OF. See *Cunnersdorf*.

KUNOBITZA, in the Balkan. Here John Hunniades, the Hungarian, defeated the Turks, Dec. 24, 1443.

L.

LABRADOR, N. America, discovered by Sebastian Cabot 1497, and visited by Corte Real in 1500.

LABUAN, an Asiatic island N.W. of Borneo: occupied by the British in 1846. See *Borneo*.

LABURNUM, called also the Golden chain and *Cytisus Laburnum*, was brought to these countries from Hungary, Austria, &c. about 1576. *Ashc*.

LABYRINTH. There were four most famous in mythology and history: the first, said to have been built by Dædalus, in the island of Crete, to secure the Minotaur, about 1210 B.C.; the second in Egypt, in the Isle of Meris, by Psammetichus, king of that place, about 683 B.C.; the other, the third, at Lemnos, remarkable for its sumptuous pillars, which seems to have been a stalactite grotto; and the fourth at Clusium, in Italy, erected by Porsenna, king of Etruria, about 520 B.C. *Pliny*. The beauty and art of the labyrinths of Mendes

* It was written in the Koreish Arabic, and this language, which certainly possesses every fine quality, was said to be that of paradise. Mahomet asserted that the Koran was revealed to him during a period of twenty-three years, by the angel Gabriel. The style of this volume is beautiful, fluent, and concise, and where the majesty and attributes of God are described, it is sublime and magnificent. Mahomet admitted the divine mission both of Moses and Jesus Christ. *Dr. Jortin*.

were almost beyond belief; it had 12 halls and 3000 chambers, with pillars, was encrusted with marble, and adorned with sculpture. *Herodotus*. The labyrinth of Woodstock is famous from its connection with the story of Fair Rosamond, mistress of Henry II.; see *Rosamond*. There is a curious Maze (of the time of William III.) at Hampton Court.

LACE. Mention is made of it as being of very delicate texture in France and Flanders in 1320; and fine laces were much in use for ruffles and frills for the men, and head-dresses for the women in the fifteenth century. Its importation into England was prohibited in 1483. Lace was general in the court costume of Elizabeth's reign. Dresden, Valenciennes, Mechlin, and Brussels, have long been famous for their fine lace. An ounce weight of Flanders thread has been frequently sold for four pounds in London, and its value when manufactured has been increased to forty pounds, ten times the price of standard gold. A dissipated framework knitter of Nottingham named Hammond is said to have invented a mode of applying his stocking-frame to the manufacture of lace, from studying the lace on his wife's cap, about 1768. *Macculloch*. So many improvements have been made in this manufacture, particularly by Heathcote (1809, 1817, &c.), Morley and Leaver (1811, &c.), that a piece of lace which about 1809 cost 17*l.* may now be had for 7*s.* (1853). *Ure*.

LACEDÆMON. See *Sparta*.

LACONIA, S.E. Peloponnesus, the ancient name of the Spartan territories. See *Sparta*. In the eighth century the country was called *Trakonia*. It was included in the Ottoman empire in 1460, and in the modern kingdom of Greece in 1829.

LACTEAL VEINS. These were discovered by chance by Jasper Asellius of Cremona, in opening a dog, 1622. They were discovered in birds, fish, and other animals, by Mr. Hewson, of London, about 1770, and subsequently by other eminent professional men. In the human form the lacteal vessels convey the chyle.

LADIES. The masters and mistresses of manor-houses, in former times, served out to the poor weekly, with their own hands, certain quantities of bread, and were therefore called *Lafords*, and *Lef-days*—signifying *bread-givers*, (from *hlaf*, a loaf,) and the words were at length shortened to Lords and Ladies. Tooke considers *Lord* to signify *high-born*. The introduction of ladies to court was first to that of Louis XII. of France in 1499. As a title of honour, the title of Lady properly belongs only to the daughters of earls, and all of higher rank.

LADRONE ISLES (N. Pacific), belong to Spain. Discovered by Magellan, in 1520; they are eleven in number. He first touched at the island of Guam. Here some of the natives having stolen some of his goods, and showing a great disposition to theft, he named the islands the *Ladrones*, or Islands of Thieves, which they are called to this day. In the seventeenth century they obtained the name of Marianne's islands, from the queen of Spain.

LADY-DAY. This festival, on the 25th of March, was instituted about A.D. 350, according to some authorities, and not before the seventh century according to others. See *Annunciation*. In England, before the alteration of the style, Sept. 3, 1752, our new year began on the 25th of March; and in some ecclesiastical computations, that order is still preserved. In Scotland, the 1st of January was ordered by proclamation (Dec. 17, 1599) to be the beginning of the year there, instead of the 25th of March.

LAGOS-BAY (Portugal). Off this bay was fought the battle between admiral Boscawen and the French admiral De la Clue, who lost both legs in the engagement, and died next day, August 17, 18, 1759. The *Centaur* and *Modeste*, two capital ships, were taken, and two others, the *Redoubtable* and *Ocean*, run on shore and burnt: the scattered remains of the French fleet got into Cadiz.

LAGOS, in the Bight of Benin (Africa). This place was gallantly assaulted and taken by the boats of a British squadron, under commodore Bruce, Dec. 26 and 27, 1851; the *Penelope*, *Bloodhound*, *Sampson*, and *Teazer* were engaged; the *Teazer* grounded on a sandbank within range of a heavy battery. Of 400 British 16 were killed and 71 wounded; the force of the enemy was estimated at between ten and twenty thousand. This affair arose out of breaches of a treaty for the suppression of the slave-trade. In Aug., 1862, the place was ceded to the British government, and created a settlement in March, 1862: Mr. Freeman to be the first governor. It is hoped that it will be a means of checking the slave-trade.

LA HOGUE (N. W. France), **BATTLE OF**, May 19, 1692, between the English and Dutch combined fleets, under admirals Russell and Rooke, and the French fleet commanded by admiral Tourville. The English attacked the French near La Hogue, gaining a splendid victory, burning thirteen of the enemy's ships, destroying eight more, forcing the rest to fly, and thus preventing a threatened descent upon England.

LAHORE, a city in N. W. India, was taken by Baber in 1524, and was long the capital of the Mongol empire. It fell into the power of the Sikhs in 1798. It was occupied by sir Hugh Gough Feb. 22, 1846, who in March concluded a treaty of peace with them.

LAKE REGILLUS, Italy, where the Romans defeated the Latin auxiliaries of the expelled Tarquins, 499 B.C.

LAKES CHAMPLAIN, ERIE, AND ONTARIO. These lakes were the scenes of many actions between the British and Americans in the War of Independence (about 1776 and 1777), and in the war of 1813-14.

LAMBETH PALACE. A considerable portion was built in the twelfth and thirteenth centuries, by Hubert Walter, archbishop of Canterbury. The chapel was erected in 1196. *Northouck*. The tower of the church was erected about 1375; and other parts of the edifice in the fifteenth century. Simon of Sudbury, archbishop of Canterbury, was barbarously put to death here by the followers of Wat Tyler, who attacked the palace, burnt all the furniture and books, and destroyed all the registers and public papers, June 14, 1381. Through the munificence and taste of abb. Howley (who died 1848), the domestic portion of the palace was greatly enlarged; a new Gothic wing of considerable beauty having been constructed from designs by Mr. Blore, at an expense of 52,000*l*. *Leigh*. See *Canterbury and Articles*.

LAMIAN WAR, B.C. 323, between Athens and her allies (excited by Demosthenes the orator), and Antipater, governor of Macedon after the death of Alexander. Antipater fled to Lamia, in Thessaly, and was there besieged. He escaped thence and defeated his adversaries at Cranon, 322 B.C.

LAMMAS-DAY. The 1st of August, one of our four cross quarter-days of the year, as they are now denominated. Whitsuntide was formerly the first of these quarters, Lammas the second, Martinmas the third, and Candlemas the last; and such partition of the year was once equally common with the present divisions of Lady-day, Midsummer, Michaelmas, and Christmas. Some rents are yet payable at each of these quarterly days in England, and very generally in Scotland. *Lammas* comes from the Saxon, *hlammesse*, loaf-mass, because formerly upon that day our ancestors offered bread made of new wheat; anciently those tenants that held lands of the cathedral church of York were by tenure to bring a lamb alive into church at high mass.

LAMPETER COLLEGE, Cardiganshire, was founded by bishop Burgess in 1822, and incorporated 1828.

LAMPS. See *Lanterns*. Lamps are mentioned in all the early ages; they were in use in Egypt, Greece, and Rome. The earthen lamp which Epictetus the philosopher had in his study sold after his death for 3000 drachmas, A.D. 161. Lamps with horn sides were the invention of Alfred. Lamps were in general use through the streets of London up to the close of the eighteenth century, as were flambeaux, which were carried by link-boys. London streets were first lighted by oil-lamps in 1681; and with gas-lamps in 1814. The domestic lamp is now of elegant manufacture. A lamp "constructed to produce neither smoke nor smell, and to give considerably more light than any lamp hitherto known," was patented by M. Aimé Argand, in 1784, and was brought into general use in England early in the present century. On Argand's principle are founded the lamp invented by Carcel about 1803; and, since 1825, the *Moderateur* Lamps of Levavasseur, Hadrot, and Neuburger. Lamps have since been the subject of much mechanical ingenuity. See *Safety Lamp*.

LANARK (W. Scotland). At his factory here Robert Owen tried his social system in 1815.

LANCASHIRE was created a county palatine by Edward III. in favour of his son John of Gaunt, who had married the daughter of Henry, first duke of Lancaster, in 1359, and succeeded him in 1361. The court of the Duchy Chamber of Lancaster was instituted in 1359. On the accession of Henry IV. in 1399 the duchy merged into the crown. See under article *Cotton*.

LANCASTER, supposed to have been the *Ad Alaunam* of the Romans. Lancaster was granted by William I. or II. to Roger de Poitou, who erected a castle upon its hill.

LANCASTERIAN SCHOOLS, on a system of education by means of mutual instruction, devised by Joseph Lancaster, were not much patronised till about 1808, when they attracted general attention, notwithstanding the prejudices that existed against the founder, who had been labouring to introduce his plan from 1796. The development of the system led to the formation of the British and Foreign School Society in 1805, whose schools are unsectarian, and use the Bible as the only means of religious instruction. Lancaster was accidentally killed at New York in 1838.

LAND was let generally in England for 1s. per acre, 36 Hen. VIII. 1544. The whole rental of the kingdom was about 6,000,000*l.* in 1600; about 14,000,000*l.* in 1688. In 1798 Mr. Pitt proposed his Income Tax of 10 *per cent.* on an estimate of 100 millions, taking the rent of land at 50 millions, that of houses at 10 millions, and the profits of trade at 40 millions; but in this estimate were exempted much land, and the inferior class of houses. The rental of the United Kingdom was estimated at 59,500,000*l.* in 1851.* An Act for rendering more easy the transfer of land was passed in 1862. See *Agriculture*.

LANDED ESTATES COURT, established in 1858, to "facilitate the sale and transfer of land in Ireland." See *Encumbered Estates Act*.

LANDEN (Belgium), OR NEERWINDEN, BATTLE OF. Between the allies and French, in which William III. of England commanded. Owing chiefly to the cowardice of the Dutch horse, this bloody battle ended in favour of the French, who were commanded by marshal Luxembourg, July 19 (N.S. 29), 1693. The duke of Berwick, illegitimate son of James II., fighting on the side of France, was taken prisoner.

LANDGRAVE. This title is from *land* and *grave*, a count, a German title of dominion, which appears to have commenced in 1130, when Louis III. of Thuringia assumed the title. It became the title of the house of Hesse about 1263.

LANDSHUT (Silesia), where the Prussians were defeated by the Austrians under marshal Laudohn, June 23, 1760.

LAND-TAX. A species of land-tax was exacted in England in the tenth century, which produced 82,000*l.* in 1018. See *Danegelt*. A land-tax was levied in one shape or another, at various periods. The tax under this name was imposed 11 Will. & Mary 1699; it grew out of a subsidy scheme of 4*s.* in the pound, which produced 500,000*l.* in 1692. From the Revolution to the year 1800, the land-tax had yielded 227,000,000*l.* Ministers were left in a minority in the House of Commons on the land-tax bill of 1767; it being the first instance of the kind on a money bill since the Revolution. Its rate varied in different years from 1*s.* to 4*s.* in the pound. Mr. Pitt made the tax perpetual at 4*s.* in the pound, but introduced his plan for its redemption April 2, 1798. The tax in 1810 produced 1,418,337*l.*; in 1820, 1,338,420*l.*; in 1830, 1,423,618*l.*; in 1840, 1,298,622*l.*; and in 1852, 1,151,613*l.*

LANGSIDE, BATTLE OF, between the forces of the regent of Scotland, the earl of Murray, and the army of Mary queen of Scots, in which the latter suffered a complete defeat, May 13, 1568. Immediately after this last fatal battle, the unfortunate Mary fled to England. She crossed the Solway Firth from the abbey of Dundradon, and landed at Workington, in Cumberland, May 16. Soon afterwards she was imprisoned by Elizabeth.

LANGUAGE. Language must either have been revealed originally from heaven, or it is the fruit of human invention. The latter opinion is embraced by Horace, Lucretius, Cicero, and most of the Greek and Roman writers; the former by the Jews and Christians, and the profoundest philosophers of France and England. It has been affirmed that Hebrew was the language spoken by Adam; but others deny this, and say that the Hebrew, Chaldee, and Arabic, are only *dialects* of the original, long lost and unknown.† "And the whole earth was of one language and of one speech," *Genesis* xi. 1. Of the Hebrew, the Chaldee and Syriac are *dialects*. The original European languages were thirteen, viz.: Greek, Latin, German, Slavonian, spoken in the east; Welsh; Biscayan, spoken in Spain; Irish; Albanian, in the mountains of Epirus; Tartarian, the old Illyrian, the Jazygian, remaining yet in Liburnia; the Chaucian, in the north of Hungary; and the Finnic in East Friesland.

* The allotment of land to cottagers began with the experiment of lord Braybrooke, in Essex, of allotting small portions of land to poor families, with a view to assist them and relieve parishes of the burden of poor rates: it was very successfully adopted in 1819; when the parish officers took a piece of land consisting of twelve acres, which they divided into twenty equal parts, and sub-let to as many poor villagers of good character, with large families, receiving parochial relief, at a rental of 2*s.* a-week, each. Fifteen or sixteen of them were enabled in a few years to build cottages by their own exertions, aided by benevolent persons who had marked their orderly conduct and efforts to become independent. By the culture of fruit and vegetables for the market, many of them realised 20*l.* a-year; most of them became owners of cows and pigs, and, in the end, all of them had comfortable homes; while their children, instead of being abandoned to ignorance, and perhaps crime, were morally benefited by the improved condition of their parents. This little colony was first called *Pauper Gardens*, but afterwards *New Village*, and it is calculated that 200*l.* *per annum* were saved to the parish by a system which invites a more extensive and general adoption.

† Psammetichus the Powerful, desiring to know the most ancient people and language on the earth, caused two children to be kept from all knowledge of the use of speech until they were two years old; they were then brought into his presence, and they both pronounced the sound *becos*, the Phœnician term for bread. He therefore gave the Phœnician the precedence, in point of antiquity, to all other nations 647 B.C. *Herodotus*.

—Arabic is the mother tongue of Africa. From the Latin sprang the Italian, French, and Spanish; and from the Spanish the Portuguese. The Turkish is a mixed dialect of the Tartarian. From the Teutonic sprang the present German, Danish, Swedish, Norwegian, English, Scotch, &c. There are 3664 known languages, or rather dialects in the world. Of these, 937 are Asiatic; 587 European; 276 African; and 1624 American languages and dialects. *Adelung*. George I. in 1724, and George II. in 1736, appointed regius professors of modern languages and of history to each of the universities of England, a department which had been previously most strangely and imprudently overlooked, although such professors had been long before appointed in all other universities of Europe. These professorships are now general in all our collegiate institutions. In 1861, professor Max Müller lectured on the "Science of Language" at the Royal Institution, London.* He divides languages into three families:—

I. **ARYAN** (in Sanskrit, *noble*).
Southern Division. India (Prakrit, and Pali; Sanskrit; dialects of India: Gipsy)
 Iranic (Persi; Armenian, &c.)
Northern Division.
 Celtic (Cymric: Cornish, Welsh, Manx, Gaelic, Breton, &c.)
 Italic (Oscan; Latin; Umbrian;—Italian, Spanish, Portuguese, French, &c.)
 Illyric (Albanian).
 Hellenic (Greek, and its dialects).
 Windic (Lettic: Old Prussian; *Slavonic dialects*,—Bohemian, Russian, Polish, Lithuanian, &c.)
 Teutonic (*High German*: Modern German; *Low German*: Gothic; Anglo-Saxon; Dutch; Frisian; English.

Scandinavian: Old Norse, Danish, Swedish, Norwegian, Icelandic.

II. **SEMITIC**: *Southern*. Arabic (including Ethiopic and Amharic.) *Middle*. Hebrew (Hebrew, Samaritan, Phœnician inscriptions). *Northern*. Aramaic (Chaldee, Syriac, Cuneiform inscriptions of Babylon and Nineveh).

III. **TURANIAN** (from *Tura*, swiftness).
Northern Division. Tungusic (Chinese, &c.); Mongolic; Turkic; Samoyedic, and Finnic.
Southern Division. Taic (Siamese, &c.); (Himalayas); Malayic; (Polynesia, &c.); Gangetic; Lonitic (Burmese, &c.); Munda; Tamulic.

LANGUE D'OC. See *Troubadours*.

LANSDOWN (Somersetshire). The parliamentary army under sir Wm. Waller were here defeated, July 5, 1643.

LANTERNS must be of very early date. Those of scraped horn were invented in England, it is said, by Alfred; and it is supposed that horn was used for window-lights also, as glass was not known in Alfred's reign, A.D. 872-901. *Stow's Chron.* London was lighted by suspended lanterns with glass sides, A.D. 1415. The pellucid laminae of the ox horn have served for ages for the sides of lanterns instead of glass, and for many uses are preferred.

LANTHANUM, a rare metal discovered in the oxide of cerium, by Mosander, in 1839.

LAOCOÖN. This exquisite Grecian work of art, executed in marble, was modelled by Agesander, Athenodorus, and Polydorus, all of Rhodes, and of great eminence as statuary; it represents the death of the Trojan hero, Laocoön, priest of Neptune, and his two sons, as described by Virgil, *Aeneis* ii. 200. It was discovered in 1506 in the Sette Sale near Rome, and purchased by pope Julius II. It is now in the Vatican.

LAON (N. France). Here a succession of actions between the allies (chiefly the Prussians) and the French, was fought under the walls of the town, which ended in the defeat of the latter with great loss, March 9, 10, 1814.

LA PEROUSE'S VOYAGE. In 1785, La Perouse sailed from France for the Pacific, with the *Boussole* and *Astrolabe* under his command. The last direct intelligence received from him was from Botany Bay, in March, 1788. Several expeditions were subsequently despatched in search of Perouse; but no certain information was had until captain Dillon, of the East India ship *Research*, ascertained that the French ships had been cast away on two different islands of the New Hebrides—a fate authenticated by various articles of the wreck of the vessels, which captain Dillon brought with him to Calcutta, April 9, 1828, forty years afterwards.

LARCENY. (French, *larcen*; Latin, *latrocinium*.) See *Theft*.

LA ROTHIERE (France), BATTLE OF, between the French, commanded by Napoleon, and the Prussian and Russian armies, which were defeated after a desperate engagement, with the loss of some thousands slain, 3000 prisoners, and 30 pieces of cannon, Feb. 1, 1814. This was one of the last victories which Napoleon achieved.

LARYNGOSCOPE, an instrument consisting of a concave mirror, by which light is thrown upon a small plane mirror placed in the posterior part of the cavity of the mouth. By

* It is said that cardinal Giuseppe Mezzofanti (1774-1848) knew 114 languages or dialects.

its means the vocal chords of the interior of the larynx, &c., are exhibited, and have been photographed. One, constructed by Dr. Turck, in 1857, was modified and improved by Dr. Czermak, who exhibited it in action in 1862, in London. A somewhat similar apparatus is said to have been constructed by Mr. John Avery, a surgeon in London, in 1846.

LATERAN, a church at Rome, dedicated to St. John. It was originally a palace belonging to the Roman family Laterani, and was given to the bishops of Rome by Constantine, and inhabited by them till their removal to the Vatican in 1377. Eleven councils have been held here. See *Councils*.

LATHAM-HOUSE, Lancashire, was heroically defended for three months against the parliamentarians, by Charlotte, countess of Derby. She was relieved by prince Rupert, March 25, 1644. The house was however surrendered Dec. 4, 1645, and dismantled.

LATHE. An instrument or engine for turning ivory, wood, iron, and other substances, so as to shape them to the views of the artist, was originally an instrument of rude construction, ascribed to Talus, a grandson of Dædalus, about 1240 B.C. Pliny ascribes the invention to Theodore of Samos.

LATIN KINGDOM, &c. See *Latium*, *Eastern Empire*, and *Jerusalem*.

LATIN LANGUAGE (founded on the Oscan, Etruscan, and Greek), one of the thirteen original languages of Europe, and from which sprang the Italian, French, and Spanish. See *Latium*. A vast portion of our most beautiful and expressive words are derived from the Latin. It ceased to be spoken in Italy about A.D. 581; and was first taught in England by Adelmus, brother of Ina, in the seventh century. During six or seven hundred years, the Latin tongue prevailed in all public proceedings from the Tweed to the Euphrates, and from the Danube to Mount Atlas, and has been more or less retained even to this day. In England it was finally discontinued in religious worship in 1558, and in conveyancing and in courts of law in 1731 (by 4 Geo. II. c. 25). A corrupt Latin is still spoken in Roumelia.

PRINCIPAL LATIN WRITERS.

	<i>Died</i>		<i>Died</i>		<i>Died</i>
Plautus	B.C. 184	Tibullus	B.C. 18	Statius	(about) A.D. 100

Propertius	26	Valerius Flaccus	81	Boethius	524
Virgil	19	Pliny the Younger	100	(See <i>Fathers of the Church</i> .)	

LATITAT. The writ by which persons are usually called to the King's Bench court; and it has this name from its being supposed that the defendant is lurking, or lying hid, and cannot be found in the county to be taken by bill, and the writ is directed to the sheriff to apprehend him. This process of law is of old and undefined date. *Cowel*. The writ was abolished in England, in all actions where it was not intended to hold the defendant to special bail, by the Uniformity of Process act, 2 Will. IV. c. 39, passed May 23, 1832.

LATITUDE. First determined by Hipparchus of Nice, about 162 B.C. It is the extent of the earth, or of the heavens, reckoned from the equator to either pole. Maupertuis, in latitude 66°20, measured a degree of latitude, and made it 69'493 miles; he measured it in 1737. Swanberg, in 1803, made it 69'292. At the equator, in 1744, four astronomers made it 68'732; and Lambton, in latitude 12, made it 61'743. Mudge, in England, made it 69'148. Cassini, in France, in 1718 and 1740, made it 69'12; and Biot, 68'769; while a recent measure in Spain makes it but 68'63—less than at the equator, and contradicts all others, proving the earth to be a prolate spheroid, which was the opinion of Cassini, Bernoulli, Euler, and others, while it has more generally been regarded as an oblate spheroid.

LATIUM, now **CAMPANIA** (Italy), the country of Latinus, king of Janiculum, who gave his name to the country, calling his subjects Latins, about 1240 B.C. Laurentum was the capital of the country in the reign of Latinus, Lavinium under Æneas, and Alba under Ascanius. See *Italy*.

LA TRAPPE. See *Trappists*.

LATTER-DAY SAINTS. See *Mormonites*.

LAUREATE. See *Poet Laureate*.

LAUREL. It was sacred to Apollo, god of poetry; and from the earliest times the poets and generals of armies, when victors, were crowned with laurel. The Roman victors sent home their accounts of successful enterprises to the senate, wrapped up in the leaves of this tree. Petrarch was crowned with laurel, April 8, 1341.—The laurel called *Prunus lauro-cerasus* was brought to Britain from the Levant, before A.D. 1629. The Portugal laurel was brought from that country, and is known as the *Prunus lusitanica*, before 1648. The royal bay, *Laurus indica*, was brought from Madeira in 1665. The Alexandrian laurel, *Ruscus racemosus*, was brought from Spain before 1713. The glaucous laurel, *Laurus aggregata*, was brought hither from China, in 1806 or 1821.

LAURENTIALIA were festivals celebrated at Rome in honour of Acca Laurentia, who is said to have been either the nurse of Romulus or Remus, or a rich dissolute woman, who bequeathed her property to the Roman people. They commenced about 621 B.C., and were held on the last day of April and the 23rd of December. They, in process of time, extended to other places, and ultimately formed part of the Saturnalia. *Ovid.*

LAURESTINE, *Viburnum Tinus*. The evergreen shrub which blooms about Michaelmas, and holds its flowers and foliage through the winter. It was brought to England from the south of Europe, before 1596. There are other varieties of this favourite shrub.

LAVALETTE'S ESCAPE. Count Lavalette was a devoted friend and aide-de-camp of Napoleon I. For aiding the emperor on his return in 1815, he was condemned to death at Paris for high treason, but escaped from prison in the clothes of his wife; their dresses being changed on the eve of the execution, during an interview afforded them for a last farewell, Dec. 20, 1815. In this generous enterprise three Britons assisted, sir Robert Wilson, Michael Bruce, esq., and captain J. H. Hutchinson, who were convicted of aiding the escape, and sentenced to three months' imprisonment in the French capital, April 24, 1816. These gentlemen procured for Lavalette the uniform of a general officer in the British service; he then got into a cabriolet with sir Robert Wilson, passed the barriers without being recognised, and arrived at Mons, where his generous guide took leave of him. He then took the road to Munich, where he found an asylum among powerful friends. He was permitted to return to France in 1820, and died in retirement in 1830.

LA VENDÉE (W. France), WAR OF. The French Royalists of La Vendée took to arms, and were successful in a number of hard-fought battles with the Republican armies, between July 12, 1793, and Jan. 1, 1794, when they experienced a severe reverse. Numerous other engagements were fought with various success, until the war was terminated by general Hoche, in 1796. A treaty of peace was signed at Luçon, Jan. 17, 1800. See *Chouans*.

LAVENDER, *Lavendula spica*. Brought from the south of Europe, before 1568.

LAW. See *Codes*.

LAW AMENDMENT SOCIETY, was founded in 1843. It holds meetings during the session of parliament, and publishes a journal and reports. Its first chairman was lord Brougham.

LAW-COURTS. Commissioners appointed in 1859 reported in favour of the concentration of the law-courts in London, on a site near Carey-street, Chancery-lane. The estimated expense was about 1,500,000*l.*, which it was recommended to take from the accumulated Chancery fund termed "Suitors' fund." The proposition was brought before parliament in 1862, but not adopted.

LAW'S BUBBLE. The most ruinous speculation of modern times. The projector, John Law, of Edinburgh (born 1681), raised himself to the dignity of comptroller-general of the finances of France, in 1720, upon the strength of a scheme for establishing a bank, and an East India and a Mississippi company, by the profits of which the national debt of France was to be paid off. He first offered his plan to Victor Amadeus, king of Sardinia, who told him he was not powerful enough to ruin himself. The French ministry accepted it in 1710; and in 1716, he opened a bank in his own name, under the protection of the duke of Orleans, regent of France; and most of the people of property of every rank in that kingdom, seduced by the prospect of immense gains, subscribed for shares both in the bank and the companies. In 1718 Law's was declared a royal bank, and the shares rose to upwards of twenty-fold the original value; so that, in 1719, they were worth more than eighty times the amount of all the current specie in France. But the following year this great fabric of false credit fell to the ground, and almost overthrew the French government, ruining tens of thousands of families. Law died in poverty in 1729 at Venice.—The South Sea Bubble in England occurred in the fatal year 1720. See *South Sea*.

LAWS. See *Codes* and *Civil Law*. The Jewish law was given by God, and promulgated by Moses, 1491 B.C.

The laws of Phoroneus, in the kingdom of Argos (1807 B.C.) were the first Attic laws; they were reduced to a system by Draco, for the Athenians, 623 B.C.; whose code was superseded by that of Solon, 594 B.C.

The Spartan laws of Lycurgus were made about 844 B.C.; they remained in full force for 700 years, and formed a race, totally different from all others living in civilised society.

The Roman laws, the Twelve Tables, were published 449 B.C., and remained in force till Justinian, nearly a thousand years.

BRITISH LAWS.

The British Laws of earliest date were translated into the Saxon in . . . A.D. 590

Saxon laws of Ina published about . . . A.D. 700
 Alfred's code of laws, the foundation of the common law of England, is said to have been arranged about (see *Common Law*) . . . 886
 Edward the Confessor collected the laws in . . . 1065
 Stephen's charter of general liberties . . . 1136
 Henry II.'s confirmation of it . . . 1154 and 1175
 The maritime laws of Richard I. (see *Oleron*) . . . 1194
 Magna Charta, by king John, 1215; confirmed by Henry III. 1216 *et seq.* See *Magna Charta*, and *Forests' Charter*.
 Lord Mansfield, lord chief justice of the king's bench, declared, "That no action of law shall ever so far prevail against the real truth of the fact, as to prevent the execution of justice." . . . May 21, 1784

LAWYERS. Pleaders of the bar, or barristers, are said to have been first appointed by Edward I., 1291. Serjeants, the highest members of the bar, were alone permitted to plead in the court of Common Pleas. The first king's counsel under the degree of serjeant was sir Francis Bacon, in 1604.—The Law Association charity was founded in 1817. The Law Society was formed in 1823. The plan was enlarged in 1825; a charter, obtained in 1831, was renewed in 1845. The building in Chancery-lane, from the designs of Vulliamy, was commenced in 1829. The Juridical Society was established in 1855. See *Barristers*, *Counsel*, and the *several Courts of Law*.

LAYBACH (near Trieste, in Illyria). The CONGRESS here was attended for some time by the sovereigns of Austria, Russia, Prussia, and Naples, and finally broke up after having issued two circulars, stating it to be their resolution to occupy Naples with Austrian troops, and put down popular insurrections, May, 1821.

LAYER'S CONSPIRACY. Mr. Layer, a barrister, conspired with a number of other persons, to seize George I., the prince of Wales, lord Cadogan, and most of the principal officers of state, to take the Tower by surprise, to plunder the Bank, and finally to bring in the Pretender. He was hanged May 17, 1723.

LAZZARONI (from *lazzáro*, Spanish for a pauper or leper), the term first applied by the Spaniards and their viceroys to the vast number of degraded beings in Naples, who lived like cattle, being half-clothed and houseless. No man was born a *lazzáro*; and he who turned to a trade ceased to be one. The viceroy permitted the *lazzaroni* to elect a chief with whom he conferred respecting the imposts on the goods brought to the markets. In 1647, Masaniello held the office. See *Naples*. In 1793, Ferdinand IV. enrolled several thousands of *lazzaroni* as pikemen (spontoneers), who generally favoured the court party. On May 15, 1848, they, on the king's behalf, committed fearful ravages on the ill-fated city. *Colletta*.

LEAD is found in various countries, and is abundant in various parts of Britain, and in some places richly mixed with silver ore. The famous Clydesdale mines were discovered in 1513. The lead-mines of Cumberland and Derbyshire yield about 15,000 tons *per annum*. British mines produced 65,529 tons of lead in 1855; and 69,266 tons in 1857. Leaden pipes for the conveyance of water were brought into use in 1236. In 1859, 23,690 tons of pig and sheet lead were imported, and 18,414 tons exported.

LEAGUES. Four kings combined to make war against five, about 1913 B.C. (*Gen. xiv.*) The kings of Canaan combined against the invasion of the Israelites, 1451 B.C. The more eminent Greek leagues were the Ætolian, powerful about 320 B.C., which lasted till 189 B.C., and the Achæan, revived 280 B.C., which was broken up by the conquest of Greece by the Romans, 146 B.C. The fall of these leagues was hastened by dissension.

Lombard leagues against emperors (see *Lombards*) . . . A.D. 1176 & 1225
 League of the Public Good was between the dukes of Burgundy, Brittany, and Bourbon, and other princes against Louis XI. of France, 1465-72
 League of Cambray against Venice . . . 1508
 Holy League (the pope, Venice, &c.), against Louis XII. . . 1510
 League of Smalcald . . . 1529
 League of the Beggars (*Gueux*; the Protestants so called, though Roman Catholics joined the league) to oppose the institution of the Inquisition in Flanders . . . 1566

The LEAGUE, so denominated by way of eminence, to prevent the accession of Henry IV. of France, who was then of the reformed religion, was commenced in 1576 and lasted till 1593, when Henry embraced Romanism.
 League of Wurtzburg, by Catholics; of Halle, by Protestants . . . A.D. 1610
 League against the Emperor . . . 1628
 Solemn League and Covenant in Scotland, against the episcopal government of the Church, and the regal authority (see *Covenant*) . . . 1638
 League of Augsburg, against France . . . 1686

LEAP-YEAR or BISSEXTILE, originated with the astronomers of Julius Cæsar, 45 B.C. They fixed the solar years at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another; the six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called intercalary, and was placed a day before the 24th of February, the sixth of the calends, which was reckoned *twice*, hence called *bissextile* or *twice sixth*. This added day with us is Feb. 29th. See *Calendar*. The difference between 365 days 6 hours and 365 days 5 hours, 48 minutes, 51 seconds, and 6 decimals, which last is the true date of the astronomical year, in the course of years causes 1700, 1800, and 1900 not to be leap-years (*vide act 24 Geo. II. c. 23*, passed 1751); but the year 2000 will be one. See *Julian Year*, *Gregorian Calendar*, &c.

LEARNING and the ARTS flourished among the Greeks, especially under Pisistratus, 537 B.C., and Pericles, 444 B.C.; and with the Romans at the commencement of the Christian era. On the death of Augustus they gradually declined. The refugees from Greece caused them to revive in Italy, particularly after the taking of Constantinople by the Turks in 1453; and the invention of printing shortly before. Leo X. and his family (the *Medici*) greatly promoted learning in Italy, in the sixteenth century; and about this time literature began to revive in France, Germany, and England. See *Literature*, and lists of authors under *Greek*, *Latin*, *English*, and other languages.

LEASE. This kind of conveyance was invented by s^rjeant Moore, soon after the *Statute of Uses*, which law was enacted 27 Hen. VIII., 1535. A question at law which had been held doubtful by the lawyers for 200 years, was determined by the court of King's Bench, who agreed that the words in a lease, *of and from the date*, and *from the date*, had the same meaning, Nov. 21, 1777. *Phillips*. Acts relating to leases were passed in 1856 and 1858.

LEATHER was very early known in Egypt and Greece, and the thongs of manufactured hides were used for ropes, harness, &c., by all ancient nations. The Gordian knot was made of leather thongs, 330 B.C. The ancients understood the art of tanning leather, and it was practised early in England, and great improvements made in it up to 1795. Leather is converted into many uses; a leather cannon was proved at Edinburgh, fired three times, and found to answer, Oct. 23, 1778. *Phillips*. The duty on leather produced annually in England, 450,000*l.*, and in Ireland about 50,000*l.* It was abolished in both countries, May 29, 1830. Many bankruptcies were declared in the leather trade, in the autumn of 1860 in England. In the case of Lawrence, Mortimore, & Co., enormous fraudulent dealings in bills were disclosed. A plan for making artificial leather out of cuttings, &c., was made known in 1860.

LEATHER-CLOTH is unbleached cotton coated with a composition of boiled linseed oil and turpentine, coloured with various pigments. Messrs. Crockell, of Newark, U.S. (the inventors and patentees in 1849), established manufactories in 1853.

LÊCH, a river in S. Germany, near which the cruel Bavarian general Tilly was defeated by the Swedes, under Gustavus Adolphus, April 30, 1632. Tilly died of his wounds a few days after.

LECTURES. Those on physic were instituted by Dr. Thomas Linacre, the projector of the College of Physicians (founded by Henry VIII.) about 1502. *Freind's Hist. of Physic*. Medical and other lectures became general in private theatres, in different parts of the realm shortly after, and are now held in the theatres of most of the hospitals and medical schools. *Clinical* lectures or discourses made by the bed-side of the patient, combining practice with the theory of physic, have materially advanced this branch of human knowledge. Lectures have since become general in colleges, churches, and public halls. See *Gresham College*, *Boyle's Lectures*, *Royal and London Institutions*, &c. Among the most remarkable political lectures were those of the celebrated Thelwall, which were commenced in January, 1795. They continued to draw large audiences, till they were interdicted by an act of parliament, passed for the purpose. In the autumn of 1857 and since, many distinguished noblemen and gentlemen lectured at mechanics' institutes.

LEEDS (Yorkshire), an ancient town, renowned since the sixteenth century for its woollen manufactures. It was first enfranchised by the Reform bill of 1832, and sends two members to parliament. On Sept. 7, 1858, the queen opened the new magnificent town hall, and knighted the mayor, Peter Fairbairn; she rested a night at his house.

LEEKs. The Welsh emblem of the leek is in consequence of a command from Dewi, or David, afterwards canonised archbishop of St. David's in the year 519. This prelate, on the day that king Arthur won a great victory over the Saxons, is said to have ordered every one

of his soldiers to place a leek in his cap, for the sake of distinction; in memory of which the Welsh wear the leek on the first of March.

LEESBURG HEIGHTS, OR BALL'S BLUFF, on the banks of the Potomac, on the Virginia side, North America. On October 21, 1861, the Federal general C. P. Stone crossed the river to reconnoitre. Unauthorised by the commander in chief, he attacked the Confederate camp at Leesburg, and was thoroughly defeated with great loss. The heroic Federal colonel Baker was killed. The disaster was attributed to great mismanagement. In February, 1862, general Stone was arrested on suspicion of treason.

LEGACIES. The bequests or gifts made, by a last will and testament were taxed by parliament in 1780. The impost was increased several times subsequently, particularly in 1796, 1805, and 1808. The revenue derived from it varies considerably in amount in consecutive years; but it may be said to average about one and a half to two millions annually. In 1853, by 16 and 17 Vict. c. 51, the legacy duty was extended to landed property. See *Succession Duty Act*.

LEGATE, COURT OF THE. This was an ecclesiastical court in England. It was erected in 1516 by cardinal Wolsey, to prove wills, and for the trial of offences against the spiritual laws. *Law Dict.* It was soon discontinued.

LEGATIONS, the name given to the twenty administrative divisions in the States of the Church, from their having been governed by legates. The inhabitants rebelled in 1859 and 1860, and nearly all the legations are now included in the kingdom of Italy. See *Rome*.

LEGHORN, *Livorno*, in Tuscany, a mere village in the fifteenth century, owes all its prosperity to the Medici family and their successors. This city suffered dreadfully by an earthquake in 1741. It was entered by the French army in the revolutionary war, July 27, 1796, but the immense amount of British property there had been previously removed. Leghorn was evacuated by the French in 1799, and was retaken the following year. It was unsuccessfully attacked by the British and Italian allied forces in Dec. 1813. The Austrians attacked and took this city from the insurgents, May 12 and 13, 1849. A slight insurrection here was quelled July, 1857. In June, 1857, above 60 persons were killed at the theatre, through an alarm of fire.

LEGION. The *Legio* was a corps of soldiers in the Roman armies, and was first formed by Romulus, under whom it consisted of 3000 foot and 300 horse, about 750 B.C. When Hannibal was in Italy, 216 B.C., the legion consisted of 5200 soldiers; and under Marius, in 88 B.C., it was 6200 soldiers, besides 700 horse. There were ten, and sometimes as many as eighteen, legions kept at Rome. Augustus had a standing army of 45 legions, together with 25,000 horse and 37,000 light-armed troops, about 5 B.C.; and the peace establishment of Adrian was thirty of these formidable brigades. The peace of Britain was protected by three legions. A legion was divided into 10 cohorts, and every cohort into 6 centuries, with a vexillum, or standard, guarded by 10 men. The French army has been divided into legions since Francis I.

LEGION OF HONOUR. An order in France, embracing all distinctions in the army, and including in its incorporation civil officers, and all such individuals as have eminently distinguished themselves for services to the state, military deeds, and for public virtue; instituted by Napoleon Bonaparte, when First Consul, May 19, 1802. On the restoration of the Bourbon family, Louis XVIII. confirmed this order in April, 1814. The honour was conferred on many British subjects who distinguished themselves in the Russian war, 1854-6, and in the Paris exhibition of 1855.

LEGITIMISTS, a term (since 1814) applied to those who support the claims of the elder branch of the Bourbon family to the throne of France: whose representative is Henry, duc de Bordeaux, called comte de Chambord, born Sept. 29, 1820. They held a congress at Lucerne on June 24-29, 1862: when about 3850 persons were present, including the duchess of Parma. They agreed to continue a pacific policy.

LEGNANO (in Lombardy), where the emperor Frederick Barbarossa was defeated by the Milanese, and their allies, May 29, 1176, which victory led to the treaty of Constance in 1183.

LEIGHLIN (W. Carlow), SEE OF. Founded by St. Laserian, about A.D. 628. Burchard, the Norwegian, the son of Garmond, founded or endowed the priory of St. Stephen of Leighlin. Bishop Doran, a worthy prelate, appointed in 1523, was murdered by his archdeacon, Maurice Cavenagh, who was hanged for the crime on the spot where he had committed the murder. *Beaton*. In 1600 Leighlin was united to Ferns; the combined see united to Ossory, in 1835. See *Ferns* and *Bishops*.

LEINSTER, a kingdom in 1167, now one of the four provinces of Ireland, divided into four archbishoprics by pope Eugenius III., at a national synod, held at Kells, March 9, 1151-2, and in which his holiness was represented by cardinal Paparo. The abduction of Devorgilla, wife of O'Ruave, a lord of Connaught, by Dermot king of Leinster in 1152, is asserted to have led to the landing of the English and the subsequent conquest. The province of Leinster gave the title of duke to Schomberg's son, in 1690; the title became extinct in 1719; and it was conferred on the family of Fitzgerald in 1766.

LEIPSIC (Saxony). Famous for its university (founded 1409) and its fair. Here Gustavus Adolphus, king of Sweden, defeated the Imperialists, under Tilly, Sept. 7, 1631. Leipsic was taken by the Prussian army, 1756. It has frequently fallen into adverse hands. Here took place one of the most sanguinary contests of modern times, termed "*the battle of the nations*," Oct. 16-19, 1813, between the French army and its allies, commanded by Napoleon (160,000), and the Austrian, Russian, and Prussian armies (240,000 strong). The French were beaten, chiefly owing to 17 Saxon battalions, their allies, turning upon them in the heat of the engagement. 80,000 men perished on the field, of whom more than 40,000 were French, who also lost 65 pieces of artillery, and many standards. The victory of the allies was followed by the capture of Leipsic next day, and of the rear-guard of the French army. The king of Saxony and his family were made prisoners; and the emperors of Austria and Russia, the king of Prussia, and crown prince of Sweden, entered Leipsic immediately after.

LELEGES, a Pelasgic tribe which inhabited Laconia about 1490 B.C., after many contests merged into the Hellenes.

LEMURES. The ancients supposed that the soul, after death, wandered all over the world, and disturbed the peace of the living. The happy spirits were called *Lares familiares*, and the unhappy *Lemures*. The Romans celebrated festivals called *Lemuralia*, in the month of May; instituted by Romulus about 747 B.C., it is said to propitiate the spirit of the slaughtered Remus.

LENT (from the Saxon, *lencen*, spring). The 40 days' fast observed in the Roman Catholic church, from Ash-Wednesday to Easter-day, said to have been instituted by pope Telesphorus, A.D. 130.—The primitive Christians did not commence their Lent until the Sunday which is now called the first Sunday in Lent; and the four days beginning with Ash-Wednesday were added by pope Felix III., in the year 487, in order that the number of fasting days should amount to forty.—Lent was first observed in England by command of Ercombert, king of Kent, in 640 or 641. *Baker's Chron.* Flesh was prohibited early during Lent; but Henry VIII. permitted the use of *white meats* by proclamation in 1543, and it continued in force until, by proclamation of James I. in 1619 and 1625, and by Charles I. in 1627 and 1631, flesh was again wholly forbidden. See *Quadragesima*.

LEON, KINGDOM OF. See *Spain*.

LEPANTO (near Corinth), **BATTLE OF**, Oct. 7, 1571: the great naval engagement between the combined fleets of Spain, Venice, Genoa, Malta, and Pius V., and the whole maritime force of the Turks. Don John of Austria commanded the Christian fleet, which consisted of 206 galleys, and 30,000 men, while the Turks had 250 galleys, of which, after a dreadful conflict, they saved but 100, losing 30,000 men in killed and prisoners; and thus was prostrated for a time the naval power of Turkey.

LEPROSY, a contagious skin disease described in *Leviticus*, chap. xiii. (B.C. 1490), which prevailed in ancient times throughout Asia, and in Europe about the time of the Crusades. There are various kinds. It has now almost disappeared from Europe, except in the South and in Norway. The malady chiefly affected the poorly fed and clothed of the lower classes, yet occasionally has proved fatal to the very highest personages. Robert Bruce of Scotland died of leprosy in 1329. A hospital for lepers was founded at Granada, by queen Isabella of Castile, about 1504, and a large number of leper houses was founded in Britain. Dr. Edmondson met with a case in Edinburgh in 1809.

LETTERS. See *Alphabet*, *Belles Lettres*, and *Marque*.

LETTRES DE CÂCHET, sealed letters from the king of France, by virtue of which those persons against whom they were directed were thrown into prison, or sent into exile. They were introduced about 1670, and became a grievous abuse. The National Assembly decreed their abolition, Nov. 1, 1789. Proceedings very similar to the *lettres de cachet* were adopted in the Federal government of N. America at New York and other places in 1861, and 1862.

LETTUCE. Introduced into England from Flanders, in 1520. A salad was a rare treat in Henry VIIIth's reign; in the earlier part of which, when queen Catherine, this king's first consort, wished for a salad, she despatched a messenger for lettuce to Holland or Flanders.

LEUCTRA, a village between Plataea and Thespia, in Boeotia, N. Greece, the site of a battle between the Thebans; under Epaminondas, and the superior force of Cleombrotus, king of Sparta, the victory being with the former; July 8, 371 B.C. 4000 Spartans, with their king, were slain, and not more than 300 Thebans. From this day, the Spartans gradually lost their preponderance in Greece.

LEVELLERS. There were various associations of this kind. The most extraordinary was that of which Muncer and Storeck were the chiefs. They began by pulling down all the images in the churches which Luther had left standing; and then, finding an army in their followers, they openly taught that all distinctions of rank were usurpations on the rights of mankind. At the head of 40,000 men, Muncer commanded the sovereign princes of Germany and the magistrates of cities to resign their authority; and on his march to enforce these principles of equality and reformation, his followers ravaged the country. The landgrave of Hesse at length defeated him; 7000 of the enthusiasts fell in battle, and the rest, with their leader, fled: he was taken, and beheaded at Mulhausen, in 1525. The "Levellers," powerful in Parliament in 1647, were put down by Cromwell in 1649, and their leader Lilburn imprisoned. At the period of the French Revolution some knots of persons, styled Levellers, appeared in England. A "Loyal Association" was formed against them and republicans, by Mr. John Reeves, Nov. 1792; and similar conservative associations followed with much benefit.

LEVELS. The Great Level of the Fens is a low-lying district of about 2000 square miles, in Lincolnshire, Huntingdonshire, Cambridgeshire, and Norfolk, said to have been overflowed by the sea during an earthquake, A.D. 368. It was long afterwards an inland sea in winter, and a noxious swamp in summer, and was gradually drained by the Romans, the Saxons, and especially by the monks during the reigns of the Plantagenet kings. One of the first works on a large scale was carried out by Morton, bishop of Ely, in the reign of Henry VII. A general drainage act was passed by the advice of lord Burghley, in 1601, but little work was done till the reign of James I., who, in 1621, invited over the great Dutch engineer, Cornelius Vermuyden, to assist in the general drainage of the country. After completing several great works Vermuyden agreed (in 1629) to drain the "Great Level." He was at first prevented from proceeding with his undertaking through a popular outcry against foreigners; but eventually, aided by Francis, earl of Bedford, in spite of the great opposition of the people, for whose benefit he was labouring, he declared his great work complete in 1652. Much, however, still remained to be done; and the drainage of the Great Level has employed the talents of Rennie (about 1807), and of Telford (1822), and other eminent engineers since. In 1844 the Middle Level commission cut through certain barrier banks, and replaced them by other works. These latter were reported unsound in March, 1862; and on May 4, the outfall sluice at St. Germain's, near King's Lynn, gave way. High tides ensuing, about 20,000 acres of fertile land were inundated, causing a loss of about 25,000*l.* After unwearied, and, for awhile, unsuccessful efforts, a new coffer dam was constructed under the superintendence of Mr. Hawkshaw, which was reported sound in July. Another inundation, begun through the bursting of a marshland sluice, near Lynn, Oct. 4, was checked. The Levels are distinguished as the Middle, Bedford, South, and North Levels.

LEVERIAN MUSEUM, formed by sir Ashton Lever, exhibited to the public at Leicest. house, London. It was offered to the public by the chance of a guinea lottery, in 1785; but only 8000 tickets out of 36,000 were sold; and this almost unparalleled collection fell into the possession of the holder of two tickets, Mr. Parkinson, by whom it was in the end sold by auction, in lots, Sept. 20, *et seq.*, 1806.

LEVIATHAN. See *Steam Navigation*.

LEWES (Sussex), where Henry III., king of England, was defeated by Montfort, earl of Gloucester, and the rebellious barons, May 14, 1264. *Blaauw.* The king, his brother Richard, and his son Edward, afterwards Edward I., were taken prisoners. A division of Montfort's army, a body of Londoners, gave way to the furious attack of Edward, who, pursuing the fugitives too far, caused the battle to be lost. See *Evesham*.

LEXINGTON (Massachusetts), **BATTLE OF,** between Great Britain and the United States of America, in the war of independence. The British obtained the advantage, and destroyed the stores of the revolted colonists, but lost in the battle 273 men, killed and wounded. April 19, 1775.—The hostilities thus commenced continued to 1783.—**LEXINGTON,** a town in Missouri, U.S. fortified by the Federals, was attacked by the Confederate general Price

Aug. 29; and after a gallant resistance by Col. Mulligan, surrendered on Sept. 21, 1861. See *United States*.

LEYDEN (Holland), became important in the thirteenth century. Its siege, sustained against the armies of Spain, during which 6000 of the inhabitants died of famine and pestilence, A.D. 1574. In commemoration of this long siege, a university was founded, celebrated for its colleges, medicinal garden, and valuable library, 1575. In 1699 two-thirds of the population perished by a fever, which it is said, was aggravated by the improper treatment of professor De la Boe. The university was almost destroyed by a vessel laden with 10,000 lbs. weight of gunpowder blowing up, and demolishing a large part of the town, and killing numbers of people, Jan. 1807. The electrical *Leyden* jar was invented about 1746, by Kleist, Muschenbroek, and others.

LIBEL. By the laws of Rome (those of the Twelve Tables), libels which affected the reputation of another were made capital offences. In the British law, whatever renders a man ridiculous, or lowers a man in the opinion and esteem of the world, is deemed a libel. "The greater the truth, the greater the libel," the well-known law maxim of a high authority, is now disputed. Act against blasphemous and seditious libels, punishing the offender by banishment for the second offence, 60 Geo. III. 1820.* Lord Campbell's act, 6 & 7 Vict. c. 96 (1843), greatly softened the stringency of the law of libel respecting newspapers. Among the most remarkable cases of libel were, lord George Gordon's libel on the queen of France, for which he was sentenced to imprisonment for five years, and fined 500*l.*, Jan. 28, 1788. Dr. Wither's libel on Mrs. Fitzherbert, July 14, 1789. The *Times*' libel on the prince of Wales, afterwards Geo. IV., Feb. 1790. The *Morning Post*'s libel on lady Elizabeth Lambert, damages 4000*l.*, July 9, 1792. Peltier's libel on Napoleon Bonaparte, in *L'Ambigu*, of which he was found guilty, Feb. 21, 1803.

LIBERTINES (signifying freedmen and their sons), was the name of an extraordinary sect headed by Quintin and Corin, about 1525. They maintained that whatever was done by men was done by the Spirit of God, and that there was no sin but to those who thought so; that to live without any doubt or scruple was to return to the state of innocence; that the soul died with the body; that heaven was a dream and hell a phantom, and religion a mere state trick; with many other monstrous opinions.

LIBRARY. The first public library of which we have any certain account in history was founded at Athens by Pisistratus, about 544 B.C. The second of any note was founded by Ptolemy Philadelphus, 284 B.C. It was partially destroyed when Julius Caesar set fire to Alexandria, 47 B.C. 400,000 valuable books in MS. are said to have been lost by this catastrophe. *Blair*. According to Plutarch, the library at Pergamos contained 200,000 books. It came into the possession of the Romans at the death of Attalus III. (133 B.C.), who bequeathed his kingdom and wealth to the Roman people. It was added to that of Alexandria by Marc Antony. The first private library was the property of Aristotle, 334 B.C. *Strabo*. The first library at Rome was instituted 167 B.C.; it was brought from Macedonia. The library of Apellicon was sent to Rome by Sylla, from Athens, 86 B.C. This library was enriched by the original manuscripts of Aristotle's works. A library was founded at Constantinople by Constantine the Great, about A.D. 335; it was destroyed A.D. 477. A second library was formed from the remains of the first, at Alexandria, by Ptolemy's successors, consisting of 700,000 volumes, which was totally destroyed by the Saracens, who heated the water of their baths for six months, by burning books instead of wood, by command of Omar, caliph of the Saracens, A.D. 642.† Pope Gregory I. ordered that the library of the Palatine Apollo should be committed to the flames, under the notion of confining the attention of the clergy to the Scriptures. The early Chinese literature is said to have suffered a similar misfortune to that of the west in the destruction of the Alexandrian library; their emperor, Che-whang-tee, ordered all writings to be destroyed, that everything might begin anew as from his reign; and books and records were afterwards recovered by succeeding emperors with great difficulty.

LIBRARIES OF EUROPE.

The first public library in Italy was founded at Florence by Nicholas Niccoli, one of the great

restorers of learning. At his death, he left his library to the public, A.D. 1436. Cosmo de' Medici enriched it with the invaluable

* An action for libel was brought in the Court of King's Bench by a bookseller, named Stockdale, against Messrs. Hansard, the printers to the House of Commons. This action related to an opinion expressed in a parliamentary report of a book published by Stockdale. Lord Denman, in giving judgment, said he was not aware that the authority of the House of Commons could justify the publication of a libel, — an opinion which led to some proceedings on the part of the House, and to other actions by Stockdale; and in the session of 1840 (April 14) a law was passed giving summary protection to persons employed by parliament in the publication of its reports and papers.

† This statement has been disputed. Theophilus, abp. of Alexandria, is said to have destroyed many books when he demolished the temple of Serapis, 250 years previously.

LIBRARY, *continued.*

Greek, Hebrew, Arabic, Chaldaic, and Indian MSS.
 The Vatican Library at Rome, founded by pope Nicholas V. in 1446, and improved by Sixtus V., 1588; contains 150,000 volumes and 40,000 manuscripts.
 Imperial Library of Vienna, founded by Frederick III. in 1440, and by Maximilian I. 1500
 Royal (now Imperial) Library of Paris, by John (1350-1353), and by Francis I. about 1520. It was said to contain 815,000 volumes, and 84,000 manuscripts in 1860. A new reading-room is now constructing, 1862.
 Escorial at Madrid, commenced with the foundation of that sumptuous palace, by Philip II. 1557
 Library of Florence, by Cosmo de' Medici, 1560; very rich in illustrated and illuminated works.
 Library of the University of Munich is said to contain 400,000 volumes and 10,000 manuscripts; and that of Göttingen, 300,000 volumes and 6000 manuscripts.
 Imperial Library at St. Petersburg (consisting principally of the spoils of Poland) was founded in 1714

LIBRARIES IN GREAT BRITAIN.

Richard de Bury, chancellor and high treasurer of England, so early as 1347, raised the first

private library in Europe. He purchased thirty or forty volumes of the abbot of St. Alban's for fifty pounds' weight of silver.
 Bodleian Library at Oxford, founded 40 Eliz. 1598; opened in 1602; contains nearly 400,000 volumes, and upwards of 30,000 manuscripts.
 Cottonian Library, founded by sir Robert Cotton, about 1600; appropriated to the public, 1701; partly destroyed by fire, 1731; removed to the British Museum 1753
 Sion College 1623
 Royal Society in 1667
 Radcliffean, at Oxford, founded by the will of Dr. Radcliffe, who left 40,000*l.* to the university, 1714; opened 1740
 University Library, Cambridge, 1720, when George I. gave 5000*l.* to purchase Dr. Moore's collection.
 British Museum (*which see*) 1753
 The Libraries of the Royal Institution (1803), the London Institution (1805), and the Royal College of Surgeons (1786), have useful classified catalogues.
 Library of the University of Dublin (1601), and the Advocates' Library in Edinburgh (1630), are extensive and valuable *
 See *Circulating Libraries.*

LIBRARIES, FREE, have been successfully established since 1850 at Manchester, Liverpool, Salford, &c. Many others are being formed under 8 & 9 Vict. c. 43 (1845), and 13 & 14 Vict. c. 65 (1850), and 18 & 19 Vict. c. 20 (1856).†

LIBYA (Africa), was conquered by the Persians, 524 B.C., and by Ptolemy Soter, 320.

LICENCES. This mode of levying money on the subject was introduced in the reign of our first Richard, about the year 1190; but it was then confined to such of the nobility as desired to enter the lists at tilts and tournaments, who were many at this time. *Sinclair's Hist. of the Brit. Revenue.* Licences for public-houses were first granted in 1551, and for refreshment-houses, with wine licences, in 1860. The present general licensing act is 9 Geo. IV. c. 61 (1828). Games and gaming-houses were licensed in London in 1620. The licence system for various exciseable articles was enforced in various reigns, from the 12th Charles II. 1660. The act which obliged lottery office-keepers to take out licences, and pay 50*l.* for each, at once reduced the number of those offices from 400 to 51, Aug. 1778. *Phillips.* In 1859 the licensing system was applied to India as a kind of income-tax; but ceased in 1861. Plays were ordered to be licensed in 1737.

LICHFIELD (Staffordshire). The see of Mercia, afterwards Lichfield, was founded in A.D. 656. In 1075 the see was removed to Chester; in 1102 it was removed to Coventry, and afterwards back to Lichfield, but with much opposition from the monks of Coventry (*see Coventry*). Dr. Samuel Butler, in 1840, was the first bishop of Lichfield only. This see has given three saints to the Romish church; and to the British nation one lord chancellor and three lord treasurers. It is valued in the king's books at 559*l.* 18*s.* 2*d.* Lichfield cathedral was first built about A.D. 656. The present structure was built by Roger de Clinton, the 37th bishop, in 1148.‡ In Lichfield castle, king Richard II. kept his sumptuous Christmas festival, 1397, when were consumed 200 tons of wine and 2000 oxen. A charter was granted to Lichfield, constituting it a city, by Edward VI., 1549. Present income, 4500*l.*

RECENT BISHOPS OF LICHFIELD AND COVENTRY.

1781. James, earl of Cornwallis, died 1824.
 1824. Hon. Henry Ryder, died March 31, 1836.
 1836. Samuel Butler, died Dec. 4, 1839.

1839. James Bowstead, died Oct. 11, 1843.
 1843. John Lonsdale, PRESENT (1862) bishop.

* In 1609 the Stationers' Company agreed to give a copy of every book published to the Bodleian Library, Oxford. By 14 Charles II. c. 33 (1662), three copies were required to be given to certain public libraries; by 8 Anne, c. 19 (1709), the number was increased to nine; by 41 Geo. III. c. 107, to eleven; which number was reduced to five by 5 & 6 Will. IV. c. 110 (1835): viz., the British Museum, the Bodleian, Oxford, the Public Library, Cambridge, the Advocate's Library, Edinburgh, and Trinity College, Dublin.
 † On Nov. 5, 1835, a proposal to establish a Free Library in the city of London was negatived, and in 1857 that in Marylebone was closed for want of support.

‡ Walter de Langton (bishop in 1296) built the chapel of St. Mary, now taken into the choir, and under bishop Heyworth (1400) the cathedral was perfected. The building was despoiled at the Reformation, and was scandalously injured in the parliamentary war (when its monuments, its fine sculptures, and beautifully painted windows were demolished); but it was repaired at the restoration, and again thoroughly in 1788.

LICINIAN LAW, *Licina Lex* (375 B.C.), forbade any person to possess more than 500 acres of land, or more than 100 head of large cattle, or 500 of small, in the Roman states; another law, 56 B.C. of this name, imposed a severe penalty on party clubs, or societies assembled for election purposes; and another, about 103 B.C., limited the expenses of the table.

LIECHTENSTEIN, a constitutional principality, S. Germany. Population, in 1858, 7150. Prince John, born Oct. 5, 1840, succeeded his father Alois-Joseph, Nov. 12, 1858.

LIEGE (Belgium). An independent bishopric, under the German empire from the eleventh century till 1795. Liege frequently revolted against its prince-bishops. In 1467, after a severe contest, the citizens were beaten at Brusthem, and their city taken by Charles the Bold, duke of Burgundy, who treated them with great severity. In 1482 Liege fell into the power of De la Marek, the Boar of Ardenne, who killed the bishop, Louis of Bourbon, and was himself beheaded two years after. Liege was taken by the duke of Marlborough, Oct. 23, 1702; and by the French and others, at various times, up to 1796, when it was annexed to France. It was incorporated with the Netherlands in 1814, and with Belgium in 1830.

LIEUTENANTS, LORD, for counties, were instituted in England, 3 Edw. VI., 1549, and in Ireland in 1831. See *Ireland* for the lords lieutenants of that kingdom.

LIFE-BOAT. A patent was granted to Mr. Lukin for a life-boat in 1785; and in 1788 a reward was offered by a committee of gentlemen in South Shields for a more perfect model, which was obtained by Mr. Henry Greathead of that town in 1789. It was first put to sea, January 30, 1790: and Mr. Greathead received 1200*l.* from parliament for this great means of saving life in cases of shipwreck. Thirty-one boats were built, and 300 lives saved up to 1804. Several contrivances have been since brought forward; and in 1850 the duke of Northumberland offered a reward of 105*l.* for a life-boat fulfilling certain conditions. The prize was obtained by Mr. James Beeching, of Yarmouth, in 1851; but his boats have not been found completely efficacious. The tubular life-boat of Mr. H. Richardson was patented Jan. 1852, in which year a cruise was made by him from Liverpool to London in his life-boat, *The Challenger*. A model by Mr. R. Peake is now employed. The *National Life-boat Institution* was founded in 1824; it began publishing a journal called "*The Life-boat*" in 1852. In 1856 its funds were enlarged by a bequest of 10,000*l.* from Hamilton Fitzgerald, esq. Since its establishment its boats are said to have saved above 10,000 lives.* Life-boats are now distributed along the coasts.

LIFE-GUARDS. See *Guards*.

LIFE INSURANCE. See *Insurance*.

LIGHT. The law of refraction discovered by Snellius, about A.D. 1624. The motion and velocity of light discovered by Reaumur, and after him by Cassini, and calculated by Roemer and Bradley. Its velocity ascertained to be about 190,000,000 of miles in sixteen minutes or nearly 200,000 miles in a second, which is a million of times swifter than the

* **LIFE-PRESERVER**. The apparatus of captain Manby, to mitigate the horrors of shipwreck, is of a construction equally simple and admirable. It effects a communication with the distressed vessel by a rope, by which it is afterwards easy to send on board, or from the ship, anything else. The rope is thrown by a shot from a mortar, with a line attached to it. For the night, a night-ball is provided with a hollow case of thick pasteboard, and a fuze and quick match, and charged with fifty balls, and a sufficiency of powder to inflame them. The fuze is so graduated that the shell shall explode at the height of 300 yards. The balls spread a brilliant light for nearly a minute, and give a clear view of every surrounding object. This apparatus was brought into use in Feb. 1803; and in twenty years it had been the means of saving fifty-eight vessels and 470 of their crews and passengers. Captain Manby died Nov. 18, 1854, aged 89.

BOAT LOWERING APPARATUS. Great loss of life arises from inability to lower the boats safely and quickly in case of accident to the ship or of any one falling over board. In 1851 a Parliamentary Committee officially reported on the occasion of the burning of the steam mail ship "*Amazon*," that, "the means of lowering boats evenly, and readily disengaging the tackle, were *desiderata* wanted throughout the naval service, and that it was to be hoped that some useful means for supplying these defects would be devised." Many plans were brought out in consequence; but it was not till 1856 that any was deemed worthy of public notice, when the Government first ordered an apparatus of the kind, invented by Mr. Charles Clifford, of London, to be fitted in two of the boats of every ship chartered by them for the conveyance of troops, emigrants, or convicts. In 1857 a committee of naval officers ordered to report on it by the Admiralty, recommended, "That no captain of any vessel in the queen's service, or the mercantile marine, should be permitted to put to sea without being provided with the means of lowering their life-boats by Mr. Clifford's process." Unhappily this recommendation was never acted upon, and in 1858 and 1859, by the loss of six large passenger ships—the *Indian*, *Austria*, *Pomona*, *Royal Charter*, *Hungarian*, and *Nimrod*—1484 lives were lost. In none of these ships was this apparatus in use, or many would undoubtedly have been saved. During the next four years more than 300 boats of the Royal Navy and 1200 of the merchant service were fitted with it, and a great saving of life was the result—in some cases of the entire crews of ships. In 1858 the Steam Navigation Board of Melbourne compelled all their colonial steamers to carry it as a security for the lives of passengers. By this apparatus it is asserted one man, or even a boy, is enabled with perfect safety to lower and cast off quite free from the ship, either in a gale of wind or a calm, and in a few seconds, a boat laden with any number of people, no matter whether the ship was at anchor, or sailing, or steaming at full speed. Clifford.

velocity of a cannon ball, about 1667. The light of the sun is eight minutes and eight seconds in its transmission through the space from that orb to the earth. The undulatory theory of light, its polarisation, and its chemical action have all been made known in the present century by Drs. Thos. Young, Fresnel, Malus, Arago, Biot, Brewster, Wheatstone, Ritter, Niepce, Daguerre, Talbot, &c. See *Photography*.

LIGHT-HOUSES, anciently called Pharos (and now *phare*, French; *faro*, Italian), from one erected at Pharos, near Alexandria, Egypt, 550 feet high, said to have been visible forty-two miles, about 285 B.C. There was one at Messina, at Rhodes, &c. The light was obtained by fires. The first true light-house erected in England was the Eddystone light-house in 1758-60.

BRITISH LIGHTHOUSES.

By the Report of the Commissioners on Lights, &c. (1867), we learn that there were then 171 shore-lights in England, 113 in Scotland, and 73 in Ireland (total 357); and 47 floating-lights.

The French have 224 lighthouses on shore.

The source of light in our lighthouses is principally oil; but in harbour-lights gas has been successfully used. Glass-reflectors were used in 1780 and copper ones, in 1807. A common coal fire-light was discontinued at St. Bees so recently as 1822. Fresnel's Dioptric* system (devised about 1810) was adopted for the first time in England by Messrs. Chance, in the Lundy island lighthouse, N.W. Devon, 1834.

The most brilliant artificial light ever produced—derived from magneto-electricity by a machine devised by professor Holmes—was employed at the South Foreland lighthouse near Dover, in 1858-60; and at Dengeness (or Dungeness) in 1862. Mr. Holmes' arrangement, and a similar one constructed by M. Sorin, were shown at the International Exhibition, London, in 1862.

The cost of erecting the three great British light-houses—viz. the Skerry-Vore (west coast), 158 feet high, was 83,126*l.*; the Bishop Rock, Scilly Isles, 145 feet high, 36,550*l.*; and the Bell Rock, Scotland, 117 feet high, 61,332*l.*

LIGHTNING-CONDUCTORS were first set up for the protection of buildings by Franklin shortly after 1752, when he brought down electricity from a thunder-cloud. The first in England was set up at Payne's Hill, by Dr. Watson. In 1766 one was placed on the tower of St. Mark, at Venice, which has since escaped injury, although frequently consumed by lightning previously. A powder magazine at Glogau, in Silesia, was saved by a conductor in 1782; and, from the want of one, a quantity of gunpowder was ignited at Brescia in 1767, and above 3000 persons perished. In 1762, Dr. Watson recommended conductors to be used in the navy; and they were employed for a short time, but soon fell into disuse from want of skill and attention. Mr. (now sir William) Snow Harris devoted his attention to the subject from 1820 to 1854, and published a work in 1843, detailing his experiments. In 1830, above thirty ships were fitted up with his conductors, which were found perfectly efficacious; and in 1842 his plans were adopted, and his conductors are now manufactured in the royal dockyards. In 1854 parliament granted 5000*l.* to him as an acknowledgment of his invaluable exertions.

LIGNY (Belgium), where a battle was fought, June 16, 1815, just previously to that of Waterloo, between the Prussian army under Blücher, and the French army commanded by Napoleon, in which the former was defeated. Blücher, however, arrived on the field of Waterloo in the evening at a most critical moment.

LIGURIANS, a Celtic tribe, N. Italy, invaded the Roman territory, and were defeated 238 B.C. They were not subjected till 172 B.C. The **LIGURIAN REPUBLIC** was founded in May, 1797, upon the ruin of the republic of Genoa. It was incorporated with France in 1805, and then merged into the kingdom of Italy.

LILAC TREE. *Syringa*. The Persian lilac from Persia was cultivated in England about 1638; the common lilac by Mr. John Gerard about 1597.

LILLE. See *Lisle*.

LILY, is of Persian origin; it also is a native of Syria and Italy, and some varieties of it were brought to England before 1460. The Martagon from Germany, 1596. The Guernsey lily came from Japan; the red-coloured from South America.

LILYBÆUM, a strong maritime fortress of Sicily, was besieged by Pyrrhus, king of Epirus, 276 B.C., and was relieved by the Carthaginians, 275 B.C.; it was taken by the Romans, 241 B.C., after a siege of nine years, which led to the end of the second Punic war.

LIMA (Peru). In 1534, Pizarro, marching through Peru, was struck with the beauty of the valley of Rimac, and there he founded a city, and gave it the name of *Ciudad de los Reyes*, or City of the Kings, 1535. This Spanish name it retains in all its legal deeds, but it is better known as Lima. Awful earthquakes occurred here, A.D. 1586, 1630, 1687, and

* From the Greek *dia*, through, and *optomai*, I see: the light being condensed by and transmitted through lenses. The system is an adaptation of the discoveries of Buffon, Condorcet, Brewster and others.

Oct. 28, 1746, since solemnly commemorated by annual festivals. In 1854-5 thousands perished by yellow fever. Mr. Sullivan, the British consul, was assassinated at Lima, Aug. 11, 1857.

LIME or LINDEN TREE, a tall upright tree with fragrant flowers, at one time much cultivated in this country. It is uncertain when it was introduced, but one is mentioned in 1562. The lime trees in St. James's park are said to have been planted at the suggestion of Evelyn, who recommended multiplying odoriferous trees, in his work, "*Fumifugium*" (1661). One of these trees was planted in Switzerland in 1410, and existed in 1720, the trunk of which was thirty-six feet in circumference.

LIME-LIGHT, is the light produced by the combustion of oxygen and hydrogen or carburetted hydrogen upon a surface of lime. Coal gas is now used. This light evolves little heat and does not vitiate the air. It is also called Drummond Light, after lieut. Drummond, who first successfully produced it as a first class light about 1826. It is said to have been seen at a distance of 112 miles.

LIMERICK, anciently *Lumneach* (S.W. Ireland). About 550, St. Munchin is said to have founded a bishopric and built a church here, which latter was destroyed by the Danes in 853. Donald O'Brian, king of Limerick, founded the cathedral about 1200. Limerick obtained its charter in 1195, when John Stafford was made first provost; and its first mayor was Adam Servant, in 1198. It was taken by Ireton after six months' siege in 1655. In August 1691, it was invested by the English and Dutch, and surrendered on most honourable terms, Oct. 3, same year.* An awful explosion of 218 barrels of gunpowder greatly shattered the town, killing 100 persons, Feb. 1, 1694. Another explosion of gunpowder here killed many persons, Jan. 2, 1837. Awful and destructive tempest, Jan. 6-7, 1839.

LIMITED LIABILITY. An act for limiting the liability of joint stock companies, 18 & 19 Vict. c. 133 (passed 1855), was amended 1856-7-8.

LINCELLES (N. France), where the allied English and Dutch armies defeated the French, Aug. 18, 1793. General Lake commanded the three battalions of Foot Guards, who so much distinguished themselves. Colonel Bosville of the Coldstreams was killed. The French lost eleven pieces of cannon.

LINCOLN, once a Roman colony (*Lincoln Colonia*), and at the period of the Conquest one of the richest and most populous cities in England. Architectural antiquities still abound. The town was taken several times by Saxons and Danes. The castle was built by William I. in 1086. Without Newport-gate was fought upon Lincoln plain the memorable battle between the partisans of the empress Maud, commanded by the earl of Gloucester, and the army of Stephen, commanded by himself, in which the king was overthrown and taken prisoner, Feb. 2, 1141. Louis, dauphin of France, having been invited over by the discontented barons in the last year of king John's reign was acknowledged by them as king of England here; but the nobility in general were summoned by the earl of Pembroke to Gloucester to crown Henry III., and they afterwards marched against the dauphin's and barons' army. A most sanguinary fight (called the Fair of Lincoln) ended in the defeat of Louis, who withdrew his pretensions to the English crown, May 20, 1217.

LINCOLN, BISHOPRIC OF. Sidnacester or Lindesse and Dorchester were anciently two distinct sees in Mercia; they were united about A.D. 1078, and were removed to Lincoln by bishop Remigius de Feschamp, who built a cathedral (1086), afterwards destroyed by fire, but rebuilt by bishop Alexander (1127) and bishop Hugh of Burgundy. It was dedicated to the Virgin Mary and All Saints. The diocese is the largest in the kingdom, notwithstanding that the dioceses of Ely, Oxford, and Peterborough, formerly parts of it, and now distinct sees, were further enlarged from Lincoln in 1837. The see was valued at the dissolution of monasteries at 2065*l. per annum*; and after many of its manors had been seized upon, it was rated in the king's books at 894*l. 10s. 1d.* Present income, 5000*l.* It has given three saints to the church of Rome, and to the civil state of England six lord chancellors. The great bell of the cathedral, called *Great Tom of Lincoln*, weighs four tons eight pounds.

RECENT BISHOPS OF LINCOLN.

1787. George Pretyman (afterwards Tomline), translated to Winchester, 1820.	1827. John Kaye, died Feb. 19, 1852.
1820. Hon. George Pelham, died Feb. 1, 1827.	1852. John Jackson, PRESENT (1862) bishop.

* It was agreed that all arms, property, and estates should be restored; all attainders annulled, and all outlawries reversed; and that no oath but that of allegiance should be required of high or low: the freedom of the Catholic religion was secured; relief from pecuniary claims incurred by hostilities was guaranteed; permission to leave the kingdom was extended to all who desired it; and a general pardon proclaimed to all then in arms. *Burns.*

LINCOLN'S-INN (London), derives its name from Henry de Lacy, earl of Lincoln, who erected a mansion on this spot in the reign of Edward I., which had been the bishop of Chichester's palace. It became an inn of court, 1310. The gardens of Lincoln's-inn Fields were laid out by Inigo Jones, about 1620, and erroneously said to occupy the same space as the largest pyramid of Egypt, which is 764 feet square; Lincoln's-inn square being 821 feet by 625 feet 6 inches. Lord W. Russell was beheaded in Lincoln's-inn Fields, July 21, 1683. The square (formed in 1618) was inclosed with iron railings about 1737. The New Buildings were opened, Oct. 30, 1845, and the square planted. The theatre in Lincoln's-inn Fields was built in 1695; and from it sprung the Theatre Royal, Covent Garden.

LINDISFARNE, or **HOLY ISLAND**, on the coast of Northumberland, became a bishop's see A.D. 635. It was ravaged by the Danes under Regnar Lodbrok in 793, and the monastery was destroyed by them in 875; the see was removed to Chester-le-street in 900, and finally to Durham in 995 (or 990).

LINEN, a fabric of very remote antiquity. Pharaoh arrayed Joseph in vestures of fine linen, 1716 B.C. (*Gen.* xli. 42). It was first manufactured in England by Flemish weavers, under the protection of Henry III. 1253. Before this period woollen shirts were generally worn. A company of linen-weavers established itself in London in 1368; and the art of staining linen became known in 1579. A colony of Scots in the reign of James I., and other Presbyterians who fled from persecution in that country in succeeding reigns, planted themselves in the north-east part of Ireland, and there established the linen manufacture. It was liberally encouraged by the lord deputy Wentworth in 1634, by William III. in 1698 (to the discouragement of the woollen manufactures), and by succeeding governments. The hemp, flax, linen, thread, and yarn from Ireland, were permitted to be exported duty free, 1696. The Irish linen board was established in 1711; the Linen-hall, Dublin, was opened 1728; the board was abolished in 1828. A board of trustees to superintend the Scotch linen manufacture was established in 1727. Dunfermline, in Fifeshire, Dundee in Angusshire, and Barnsley, in Yorkshire, are chief seats of our linen manufacture. Duty on linen was taken off in 1860.

LINLITHGOW-BRIDGE (near Edinburgh), **BATTLE OF**, between the forces of the earl of Angus, whose party during the minority of James V. held that prince in their power, and the forces of the earl of Lennox, who fought to obtain possession of his person and to deliver him from their arbitrary control. The earl of Lennox, after receiving promise of quarter, was killed by sir James Hamilton, 1526. Mary, queen of Scots, was born in the palace of Linlithgow, James V., her father, dying of a broken heart, the same year, 1542.

LINNÆAN SYSTEM. The system of botany of the eminent Linné, a Swede, or, as his name is Latinised, Linnæus, was commenced about 1725-30; and his first great work was a dictionary of 7300 plants arranged in classes, orders, and genera; he classed the plants according to the number and situation of the sexual parts, and made the flower and fruit the test of his various genera. Linnæus lived from 1707 to 1778. His library and herbarium were purchased by sir James E. (then Dr.) Smith, and given to the Linnæan Society in London, which was instituted in 1788, and incorporated March 26, 1802.

LION AND UNICORN, the former English, the latter Scottish, became the supporters of the royal arms on the accession of James I. in 1603.

LIPPE, a constitutional principality, N.W. Germany. Population in 1858, 106,086. Reigning prince Leopold, born Sept. 1, 1821; succeeded his father, Leopold, Jan. 1, 1851.

LIPPSTADT (Lutzen or Lutzengen, N. Germany), **BATTLE OF**. One of the most bloody to be found in history, fought between the Spanish and Austrian armies, in which Gustavus Adolphus, king of Sweden, and the Austrian general were both killed; the former foully, and in the moment of victory. Nov. 6 (16 N.S.), 1632. The king had previously distinguished himself in several battles against the Imperialists.

LISBON (Olisippo, and Felicitas Julia, of the ancients) was taken by the Arabs in 716, and became important under the Moorish kings, from whom it was captured by Alfonso I. of Portugal in 1147. Was made the capital of Portugal by Emanuel, 1506. Lisbon has suffered much by earthquakes, and was almost destroyed by one Nov. 1, 1755. See *Earthquakes*. The court fled to the Brazils, Nov. 1807, in which month (the 30th) the French army under Junot entered Lisbon, and held possession of it until the battle of Vimeira, in which they were defeated by the British, under sir Arthur Wellesley, Aug. 21, 1808. Military insurrection at Lisbon, Aug. 21, 1831. It was soon suppressed; many soldiers were executed. Massacre at Lisbon, June 9, 1834. See *Portugal*.

LISLE (now Lille, N. France) has a strong citadel by Vauban. It was besieged by the duke of Marlborough and the allies; and, though deemed impregnable, was taken after a

three months' siege in 1708. It was restored by the treaty of Utrecht, in 1713, in consideration of the demolition of the fortifications of Dunkirk. Lisle sustained a severe bombardment from the Austrians, who were obliged to raise the siege, Oct. 7, 1792.

LISMORE (S. Ireland). Of the ancient fame of this town, an olden writer of the life of St. Carthage says: "Lismore is a famous and holy city, of which nearly one half is an asylum where no woman dare enter; it is full of cells and holy monasteries, and religious men in great number abide here: hither holy men flock from every part of Ireland, and from England, and Britain, being desirous to live in Christ." The celebrated castle of Lismore (built by king John when earl of Moreton, 1185) was burnt in the Irish war, 1645; but was rebuilt with great magnificence by the duke of Devonshire. St. Carthage, promoted in A.D. 636, was its first bishop, and the first cathedral was then built. It was repaired by Cormac, son of Muretus, king of Munster, about 1130; and the bishopric was united to that of Waterford, about 1363; and both to Cashel in 1839.

LISSA (or Leuthen, Silesia), **BATTLE OF**, in which the king of Prussia vanquished prince Charles of Lorraine; 6000 Austrians were slain, Dec. 5, 1757.—**LISSA**, in Poland, was laid in ruins by the Russian army in the campaign of 1707.

LITANIES (Greek *litaneia*, supplication), were first used in processions, it is said, about A.D. 469; others say about 400. Litanies to the Virgin Mary were first introduced by pope Gregory I. about 595. The first English litany was commanded to be used in the Reformed churches by Henry VIII. in 1543.

LITERARY FUND, ROYAL, was founded in 1790, to relieve literary men of all nations; who have published works of merit, and who by age or infirmities are reduced to poverty. The founder was David Williams,* the friend of Benjamin Franklin. It had its origin in this way: Floyer Sydenham, an eminent Greek scholar, of Wadham college, Oxford, and translator of some of the works of Plato, having no patronage, was involved in embarrassment, and arrested and thrown into prison for a trifling debt due for his frugal meals, and there, in 1788, died of a broken heart in want and misery, when nearly eighty years of age. The sympathy excited gave rise to this institution, since bountifully supported. It was incorporated in 1818. Since 1855 various alterations in its management have been annually proposed and negatived.

LITERARY PROPERTY. See *Copyright*. **LITERARY SOCIETIES, &c.** See *Societies*.

LITERATURE, called also **LETTERS** and *Belles Lettres*, is held to comprehend Eloquence, Poetry, History, Language, and their subordinates. See *Bible*, and also *Greek, Latin, England, France, Italy, Spain, and Germany*.

LITHIUM, a metal, the lightest substance in nature except the gases (its specific gravity being 0.59), is obtained from an alkaline substance termed *lithia*; discovered by M. Arfwedson, a Swede, in 1817.

LITHOGRAPHY (engraving on stone). The invention of it is ascribed to Alois Sennefelder, whose first essays were executed about 1796; and shortly afterwards the art was announced in Germany, and was known as *polyautography*. It became partially known in England in 1801 *et seq.*, but its general introduction may be referred to Mr. Ackermann, of London, about 1817. Sennefelder died in 1841. Improvements in the art have been made by Engelmann and many others. See *Printing in Colours*.

LITHOTOMY. The surgical operation of cutting for the stone was performed by the ancients. The "small apparatus," so called from the few instruments used in the operation, was practised by Celsus, about A.D. 17. The operation called the "high apparatus" is said to have been invented by De Franco, and it is thought to be the most ancient. The "great apparatus" was invented by John de Romanis, about 1500.

LITHOTRITY (or bruising the stone). The apparatus used for this purpose, produced by M. Leroy d'Etiolles in 1822, has since been improved.

LITHUANIA, formerly a grand-duchy, N.E. of Prussia. The natives belong to the Slavonic race. They long maintained their independence against the Russians and Poles. In 1381, their grand-duke Jagellon became king of Poland and was baptized: Lithuania was not incorporated with Poland till 1501, when another duke Casimir became king of that country. The larger part of Lithuania now belongs to Russia, the remainder to Prussia.

* Mr. Williams was in early life a dissenting minister; he produced, among other fruits of a comprehensive mind, several treatises on education. He afterwards turned his mind to politics, and was consulted by the early revolutionary party in France, as to the form of a constitution for that country. He, Dr. Priestley, sir James Mackintosh, and other distinguished Englishmen, had previously been declared French citizens by the Legislative Assembly. He died July 29, 1816.

LITURGIES (from the Greek *lilai*, prayers, and *ergon*, work). The Greek and Roman liturgies are very ancient, having been committed to writing about the fourth and fifth centuries. The Romish church recognises four, the Roman or Georgian, the Ambrosian, the Gallican, and the Spanish or Mosarabic.—The Greek church has two principal liturgies: St. Chrysostom's and St. Basil's, and several smaller ones. Parts of these liturgies are attributed to the Apostles, to St. Ignatius, A.D. 250, and to St. Ambrose (died 397), and to St. Jerome (died 420). The present ENGLISH LITURGY was first composed, and was approved and confirmed by parliament, in 1547-8. The offices for morning and evening prayer were then put into nearly the same form in which we now have them, but other parts were different. Upon the solicitation of Calvin and others, the liturgy was reviewed and altered to very nearly its present state, 1551. It was first read in Ireland, in the English language, in 1550, and in Scotland, where it occasioned a tumult, in 1637, and was withdrawn, 1638. The Liturgy was revised by Whitehead, formerly chaplain to Anna Boleyn, and by bishops Parker, Grindall, Cox, and Pilkington, dean May, and secretary Smith. See *Common Prayer*.

LIVERIES. The term is derived from the custom of the retainers of the lord mayor and sheriffs of London bearing habiliments of the form and colour displayed by those functionaries. It was usual for the wardens of companies to deliver a purse containing 20s. to the lord mayor on the first of Dec. to obtain for individuals, so desiring, sufficient cloth to make a suit, and the privilege of wearing the livery. This added to the splendour of the mayor's train when the civic court went forth. *Ashe*.

LIVERPOOL (W. Lancashire), within the last century has by a progressive increase in extent, population, and commercial importance, obtained the first rank after the metropolis. It is supposed to be noticed in Domesday-book under the name *Esmedune*, or *Smedune*; in other ancient records its various appellations are *Litherpul*, and *Lyrpul*, signifying probably, in the ancient dialect of the county, the lower pool; though some have deduced its etymology from a pool frequented by an aquatic fowl, called the "Liver," or from a sea-weed of that name; and others, from its having belonged to a family of the name of Lever, whose antiquity is not sufficiently established to justify their conclusion. Soon after the Conquest, William granted that part of the country situated between the rivers Mersey and Ribble to Roger of Poitiers, who, according to Camden, built a castle here, about the year 1089. To this circumstance is attributed the origin of the town. It afterwards was held by the earls of Chester and dukes of Lancaster.

Liverpool made a free burgh by King Henry III.	A.D. 1229	The Athenæum opened	Jan. 1, 1799
Made an independent port	1335	Union Newsroom erected	1800
Liverpool "a paved town" (<i>Leland</i>)	1558	The Lyceum erected	1802
"The people of Her Majesty's decayed town of Liverpool" petition Elizabeth to be relieved from a subsidy	1571	Awful fire, whose ravages exceeded 1,000,000l. sterling	Sept. 14, —
Separated from the duchy of Lancaster	1628	Corn Exchange opened	Aug. 4, 1808
Town rated for ship-money in only 26 <i>l.</i> by Charles I.	1630	Royal Exchange completed	1809
Besieged by prince Rupert, and surrendered, June 26, ...	1644	Statue of Geo. III. commenced	Oct. 25, —
Made a separate parish	1698	Fall of St. Nicholas' Tower, which killed 20 persons	Feb. 11, 1810
The old dock, the first in England, constructed, and opened	1699	Royal Institution founded	1814
Blue-coat hospital founded	1709	Wellington-rooms built	1815
The town opposes the Young Pretender, and raises several regiments	1745	Royal Institution opened by a speech from Mr. Roscoe	Nov. 2, 1818
Infirmary established	1749	American Seaman's Hospital	1820
Seamen's Hospital founded	1752	Prince's dock opened	July 19, 1821
A most destructive fire	1762	St. John's Market-place	Feb. 1822
House of Industry founded	1770	Royal Institution incorporated	—
Theatre licensed, 1771; opened	1772	Marine Humane Society formed	1823
Liverpool equips, at the commencement of the war against France, 120 privateers, carrying 1086 guns, and 8754 seamen	1778	New House of Industry erected	1824
King's dock constructed	1785	Liver theatre opened	1825
[The Queen's dock was also constructed about the same time.]	—	Old dock closed	1826
Memorable storm raged	1789	Foundation of new Custom-house laid, Aug. 12, 1828	1828
The Exchange burnt	1795	Blackrock lighthouse built, and light first shown	March 7, 1830
The Town-hall (since restored) destroyed by fire	—	Lunatic Asylum founded, 1792; new buildings erected	—
		Clarence dock completed	Sept. —
		Liverpool and Manchester Railway opened,* shown	Sept. 15, —
		Zoological Gardens opened	1833
		Great fire; property valued at 300,000 <i>l.</i> destroyed	Jan. 1, —

* The first grand work of the kind, about thirty-one miles long. The first shaft was commenced in Oct. 1826, and the excavation of the tunnel, one mile and a quarter long, Jan. 1827; the tunnel was completed in Sept. 1828, and opened July 30, 1829. At the opening of the railroad, the duke of Wellington and other illustrious persons were present; and Mr. Huskisson, who alighted during a stoppage of the engines, was knocked down by one of them, which went over his thigh and caused his death, Sept. 15, 1830.

LIVERPOOL, *continued.*

Lock Hospital and Waterloo dock opened . . .	1834	Procession of Orangemen at Liverpool, and fatal riot . . .	July 14, 1851
Victoria and Trafalgar docks opened . . .	Sept. 8, 1836	The queen visits Liverpool . . .	Oct. 9, —
Mechanics' Institute opened . . .	1837	St. George's Hall opened . . .	Sept. 1854
New Fishmarket opened . . .	Feb. 8, —	Bread riots (150,000 persons out of employ through the frost) . . .	Feb. 19, 1855
Apothecaries' Company formed . . .	—	Gigantic landing-stage for large steamers completed . . .	1857
Liverpool and Birmingham Railway opened, its entire length, as the Grand Junction, July 4, . . .	—	Many commercial failures . . .	Sept to Nov. —
Railway to London (now the North-Western) was opened its entire length . . .	Sept. 17, 1838	Association for Social Science meets . . .	Oct. 1858
Statistical Society founded . . .	—	Free Library, &c., founded by W. Brown, M.P. for S. Lancashire, April 5, 1857; opened, Oct. 18, 1860	—
The <i>Liverpool</i> steamer of 461-horse power sails for New York . . .	Oct. 28, —	Sailors' Home (cost 30,000 <i>l.</i>) burnt . . .	April 29, —
Awful storm raged . . .	Jan. 6, 1839	The Free Museum opened . . .	Oct. 17, 1861
Foundation of the Collegiate Institution laid by lord Stanley . . .	1840	Brownlow Hill church and workhouse-school burnt, and 23 lives lost (20 children) . . .	Sept. 8, 1862
Foundation of St. George's Hall and Courts laid, Immense fire, property worth more than half a million sterling destroyed . . .	Sept. 25, 1842	The dock space in 1810 was 26 acres for ships to the amount of 704,000 tons; in 1857, 209 acres, tonnage 4,320,000.	—
Mr. Huskisson's statue erected . . .	Oct. 1847		

LIVERPOOL ADMINISTRATION. Shortly after the assassination of Mr. Perceval, (May, 1812), the earl of Liverpool became first minister of the crown.* His administration terminated in 1827, when he was attacked by a fit of apoplexy, and Mr. Canning succeeded as prime minister, April. In fifteen years there had been many changes.

Lord Eldon, *lord chancellor*.
 Earl of Harrowby, *lord president of the council*.
 Earl of Westmoreland, *lord privy seal*.
 Mr. Vansittart, *chancellor of the exchequer*.
 Earl of Mulgrave, *master general of the ordnance*.

Lord Melville, *first lord of the admiralty*.
 Viscount Sidmouth, viscount Castlereagh, and earl Bathurst, *home, foreign, and colonial secretaries*.
 Lord Palmerston, marquess of Camden, earl of Clan-carty, earl of Buckinghamshire, &c.

LIVONIA, a Russian province on the Baltic sea, first visited by some Bremen merchants about 1158. It has belonged successively to Denmark, Sweden, Poland, and Russia. It was finally ceded to Peter the Great in 1721.

LLANDAFF (Wales), **BISHOPRIC** OF. Very ancient; first known prelate was St. Dubritius, who is said to have died in A.D. 612. The church takes its name from its situation; *Lan*, in Welsh, signifying a church, and it having been erected close to the river *Taffe*, in Glamorganshire. *Dugdale*. The see is valued in the king's books at 154*l.* 14*s.* 1*d.* *per annum*. Present income, 4200*l.*

RECENT BISHOPS OF LLANDAFF.

1782. Richard Watson; died July 4, 1816.	1826. Charles Richard Sumner; translated to Winchester 1827.
1816. Herbert Marsh; translated to Peterborough, 1819.	1827. Edward Copleston; died Oct. 14, 1849.
1819. Wm. Van Mildert; translated to Durham 1826.	1849. Alfred Ollivant, PRESENT (1862) bishop.

LLOYDS (London). The coffee-house was kept by one Lloyd, in Abchurch-lane, in 1710. It was afterwards removed; finally to the Royal Exchange in 1774, and remained there till the fire in 1838. Here resort eminent merchants, underwriters, insurance brokers, &c.; and here are effected insurances for all the world on ships and merchandise. It is supported by subscribers, who pay annually 4*l.* 4*s.* The books kept here contain an account of the arrival and sailing of vessels, and are remarkable for their early intelligence of maritime affairs. In 1803, the subscribers instituted the *Patriotic Fund*, which see.

LOADSTONE. See *Magnetism*.

LOANS. Those for the service of the crown of England were generally borrowed at Antwerp until after the reign of Elizabeth. In 1559, that queen borrowed 200,000*l.* of the city of Antwerp, to enable her to reform her own coin, and sir Thomas Gresham and the city of London joined in the security. *Rapin*. The amount of the English loans, during four late memorable periods, was, viz. :

Seven years' war . . . 1755 to 1763 . . .	£52,100,000	French revolutionary war 1793 to 1802 . . .	£168,500,000
American war . . . 1776 to 1784 . . .	75,500,000	War against Bonaparte . . . 1803 to 1814 . . .	206,300,000

Besides the property-tax, in 1813 were raised two loans of twenty-one millions and twenty-two millions; and it deserves to be recorded, that a subscription loan to carry on the war against France was filled up in London in 15 hours and 20 minutes, to the amount of eighteen

* Robert Jenkinson, born Jan. 7, 1770, entered the house of commons under Mr. Pitt; opposed the abolition of the slave trade in 1792; in 1796 became lord Hawkesbury; became foreign minister under Mr. Addington in 1801; succeeded his father as earl of Liverpool in 1808; died Dec. 4, 1828.

millions, Dec. 5, 1796. See *Loyalty Loans*. To meet the expenses of the Russian war, sir G. C. Lewis, the chancellor of the exchequer, in his budget of April 20, 1855, proposed a loan of sixteen millions, which was agreed to, and taken up by Rothschilds alone.* In 1858 the East India company raised a loan of 8,000,000*l*.

LOCAL GOVERNMENT ACT passed in 1858 was amended in 1861.

LOCHLEVEN CASTLE (Kinross), built on an island in the celebrated lake of Loch Leven, it is said by the Picts, was a royal residence when Alexander III. and his queen were forcibly taken from it to Stirling. It was besieged by the English in 1301, and again in 1334. Patrick Graham, first archbishop of St. Andrew's, was imprisoned for attempting to reform the church, and died within its walls, about 1478. The earl of Northumberland was confined in it 1569. It is, however, chiefly remarkable as the place of the unfortunate queen Mary's imprisonment in 1567, and of her escape, on Sunday, May 2, 1568.

LOCKS. Those of the Egyptians, Greeks, and Romans, were clumsy contrivances. Denon has engraved an Egyptian lock of wood. Du Cange mentions locks and padlocks as early as A.D. 1381. Bramah's celebrated patent locks were registered in 1784. Locks have been made at Wolverhampton in suits of eight, ten, or more, of exquisite workmanship, all with different keys, so that none of them can open any but its own lock, yet a master key will open all. Mr. Hobbs, the American, exhibited his own locks in the Crystal Palace in 1851, and astonished the public by his skill in picking others. Since then there has been very great improvement in lock-making. See *Keys*.

LOCOMOTIVES. See *Railways*. The use of locomotives on ordinary roads is regulated by an act passed in 1861.

LOCRI, a people of Northern Greece. They resisted Philip of Macedon and were aided by the Athenians and Thebans, and defeated by him at Cheronea, 338 B.C.

LOCUSTS. The visits of these animals in Eastern countries have frequently superinduced pestilence and death, and many instances are recorded of these consequences. They formed one of the plagues of Egypt, 1491 B.C. (*Exod. x.*). Owing to the putrefaction of vast swarms in Egypt and Libya, upwards of 800,000 persons are said to have perished, 128 B.C. The country of Palestine was infested with such swarms, that they darkened the air; and after devouring the fruits of the earth, they died, and their intolerable stench caused a pestilential fever, A.D. 406. A similar catastrophe occurred in France in 837. A remarkable swarm of locusts settled upon the ground about London, and consumed the vegetables; great numbers fell in the streets, and were preserved by the curious; they resembled grasshoppers, but were three times the size, and their colours more variegated, Aug. 4, 1748. They infested Germany in 1749, Poland in 1750, and Warsaw in June, 1816. They are said to have been seen in London in 1857. Russia was infested by them in July, 1860.

LODI (N. Italy), BATTLE OF THE BRIDGE OF, one of the early achievements of Bonaparte. He commanded the French army, opposed to the Austrians commanded by general Beaulieu, and obtained a decisive victory, after a bloody engagement, in which several thousands of the Imperialists perished on the field, and many thousands were made prisoners, May 10, 1796. After this battle, all Lombardy lay open to his army, and the republican flag floated in Milan a few days afterwards.

LOG-LINE, used in navigation, A.D. 1570; and first mentioned by Bourne in 1577. The log-line is divided into spaces of 50 feet, and the way which the ship makes is measured by a half-minute sand-glass, which bears nearly the same proportion to an hour, that 50 feet bear to a mile: the line used in the royal navy is 48 feet.

LOGARITHMS, so useful in mathematics, are the indexes of the ratio of numbers one to another. They were invented by baron Napier of Merchiston, an eminent Scotchman, who published his work in 1614. The invention was afterwards completed by Mr. Henry Briggs, at Oxford, in 1624. The method of computing by means of marked pieces of ivory was discovered about the same time, and hence called *Napier's Bones*.

* *French Loan* on July 9, 1855, on account of the war with Russia. The French legislature passed a bill for raising by loan 750 million francs (30,000,000*l*. sterling). On the 30th the total subscribed amounted to 3,652,591,985 francs (about 145,103,679*l*.), nearly five times the amount required. About 600 millions came from foreign countries; 2,532,889,450 from Paris; from the departments, 1,118,703,535. The number of subscribers was 316,864. No less than 231,920,135 francs was made up by subscription of 50 francs and under. The English subscription of 150,000,000 francs was returned, as double the amount required had been proffered. In May 1859, the French government raised a loan of 20,000,000*l*. for the Italian war from its own people without difficulty. A *Turkish* loan of 5,000,000*l*. on the security of England and France, was taken up by Rothschild in Aug. 1855, and was well received; the stock rose to a small premium.

LOGIC, "the science of reasoning." Eminent works on it are by Aristotle; Bacon, *Novum Organon*; Locke, on the Understanding; and the modern treatises on Logic by archbishop Whately, Sir William Hamilton, and Mr. John Stuart Mill.

LOGIERIAN SYSTEM. A system of musical education commenced by J. B. Logier in Jan. 1815, and by him introduced into the chief towns of the United Kingdom, the Prussian states, &c. First taught in Dublin with eminent success by Mr. Logier and Mr. E. C. Allen, and in London by many musical professors.

LOGOGRAPHIC PRINTING, in which the commoner words were cast in one mass, instead of being composed of single letters, was patented by Henry Johnson and Mr. Walter of the *Times* in 1783. Anderson's History of Commerce, vol. iv., was printed by these types in 1789.

LOGWOOD, a species of wood of a dense and firm texture, and deep strong red colour; it is the heart only of the tree that produces it. It was first cut by the English in the bays of Honduras and Campeachy, in 1662. Its use in dyeing shortly afterwards became general, and was encouraged by a law. *Burns's Annals*.

LOI DES SUSPECTS was enacted by the French convention, Sep. 17, 1793, during the reign of terror (*which see*). It filled the prisons of Paris. The Public Safety bill, of a somewhat similar character, was passed, Feb. 18, 1853, shortly after Orsini's attempt on the life of the emperor.

LOLLARDS (by some derived from the German *lollen*, to sing in a low tone), the name given to the first reformers of the Roman Catholic religion in England, and a reproachful appellation of the followers of Wykliffe. *Chaucer*. The original sect is said to have been founded by Walter Lollard in 1315: he was burned for heresy at Cologne in 1322. The Lollards are also said to have devoted themselves to acts of mercy. After his death, the disciples of Wykliffe were called Lollards. The first martyr in England on account of religious opinions was William Sawtree, the parish priest of St. Osith, London, Feb. 12, 1401, when the Lollards were proscribed by the English parliament; about 1414, numbers of them, or persons to whom the name was given, were burnt alive.*

LOMBARD MERCHANTS. In England they were understood to be composed of natives of some one of the four republics of Genoa, Lucca, Florence, or Venice. *Anderson on Commerce*. Lombard usurers were sent to England by pope Gregory IX. to lend money to convents, communities, and private persons, who were not able to pay down the tenths which were collected throughout the kingdom with great rigour that year, 13 Hen. III. 1229. They had offices in Lombard-street, which street is called after them to this day. Their usurious transactions caused their expulsion from the kingdom in the reign of Elizabeth.

LOMBARDY (North Italy) derived its name from the Langobardi, a German tribe from Brandenburg, said (doubtfully) to have been invited into Italy by Justinian to serve against the Goths. Their chief, Alboin, established a kingdom which lasted from A.D. 568 to 774. The last king Desiderius, was dethroned by Charlemagne. (For a list of the Lombard kings, see *Italy*.) About the end of the ninth century, the chief towns of Lombardy fortified themselves, and became republics. The first Lombard League, consisting of Milan, Venice, Pavia, Modena, &c., was formed to restrain the power of the German emperors, in 1167. On May 29, 1176, they defeated the emperor Frederick Barbarossa at Legnano, and eventually compelled him to sign the peace of Constance in 1183. In 1225 another league was formed against Frederick II., which was also successful. After this, petty tyrants rose in most of the cities; and foreign influence quickly followed. The Guelf and Ghibelline factions afterwards distracted Lombardy; and from the fifteenth century to the present time, it has been contended for by the German and French sovereigns. The house of Austria obtained it in 1748, and held it till 1797, when it was conquered by the French who incorporated it into the Cisalpine republic, and in 1805 into the kingdom of Italy. On the breaking up of the French empire in 1815, the LOMBARDO-VENETIAN KINGDOM was established by the allied sovereigns and given to Austria, who had lost her Flemish possessions. In March 1848 Lombardy and Venice revolted, and joined the king of Sardinia: they did not support him well, and after his defeat at Novara (March 23, 1849), were again subjected to Austria. An amnesty for political offences was granted in 1856. Great jealousy of Sardinia was felt by Austria since 1849. In 1857 diplomatic relations were suspended; and in April, 1859, war

* Among others, sir John Oldcastle, baron Cobham, was cruelly put to death in St. Giles'-in-the-Fields. His crime was his adoption of the tenets of the great reformer Wykliffe. He was misrepresented to our Henry V. by the bigoted clergy, as a heretic and traitor, who was actually at the head of 30,000 Lollards in these fields. About 100 inoffensive people were found there. Cobham escaped: but was taken some time after in Wales. He suffered death, being hung on a gallows, by a chain fastened round his body, and, thus suspended, burnt alive, in Dec. 1418. *Pennant*.

broke out: the Austrians crossing the Ticino and entering Piedmont. The French emperor declared war against Austria, and immediately sent troops into Italy. The Austrians were defeated at Montebello, May 20; Palestro, May 30, 31; Magenta, June 4; and Solferino, June 24. By the peace of Villafranca (July 11), the largest part of Lombardy was ceded to Louis Napoleon, who transferred it to the king of Sardinia. It now forms part of the new kingdom of Italy.

LONDON. The greatest and richest city in the world. Some will have it that a city existed on the spot 1107 years before the birth of Christ, and 354 years before the foundation of Rome,* that it was the capital of the Trinobantes, 54 B.C., and long previously the royal seat of their kings. In A.D. 61, it was known to the Romans as *Lundinium*. *Lundinium* or *Colonia Augusta*, was the chief residence of merchants at that period, and the great mart of trade and commerce, though not dignified with the name of a colony. *Tacitus*. It is said, but not truly, to have derived its name from *Lud*, an old British king, who was buried near where Ludgate formerly stood; but its name is from *Llyn-Din*, the "town on the lake." It became the capital of the Saxon kingdom of Essex, and was called *Lunden-ceaster*. In 1860, London and the suburbs were estimated to cover 121 square miles, 11 miles each way, being three times as large as in 1800. The population of the metropolitan districts in 1851, was 2,362,236; in 1861, was 2,803,034. The population of "the city" in 1851, was 127,869; in 1861, was 112,247. See *Mayors, Lord*.

		Thames water conveyed into the city by leaden pipes	1580-94
		Stow publishes his survey	1598

* The fables of Geoffrey of Monmouth, with regard to the origin of London, are unworthy of the attention of the antiquary. That London was founded by Brute, a descendant of the Trojan *Aeneas*, and called New Troy, or Troy-novant, until the time of *Lud*, who surrounded it with walls, and gave it the name of *Cæter Lud*, or *Lud's Town*, &c., may be considered as mere romance. *Leigh*.

† Stow incorrectly states this charter to have been given in 1209, but it bears date May 10th in the 16th year of king John's reign, which began in 1199. This charter was acted on at that period in various instances, as many of the mayors were afterwards continued in their offices for several years together; and the same right was exerted in the case of Mr. Alderman Wood, who filled the office of lord mayor during two succeeding years, those of 1816 and 1817. *Leigh*.

‡ This terrible pestilence broke out in India, and spreading itself westward through every country on the globe, reached England. Its ravages in London were so great, that the common cemeteries were not sufficient for the interment of the dead; and various pieces of ground without the walls were assigned for burial-places. Amongst these was the waste land now forming the precincts of the Charter-house, where upwards of 50,000 bodies were then deposited. This disorder did not subside till 1357. *Ibid.*

§ This proclamation or decree was dated from Nonesuch, 7th July 1580, and it was forbidden to erect new buildings where none had before existed in the memory of man. The extension of the metropolis

LONDON, BISHOPRIC OF. A most ancient see, archiepiscopal in the time of the Britons, said to have been founded in the reign of Lucius, about A.D. 179, when Theanus was first archbishop. Pope Gregory intended London to continue archiepiscopal; but St. Augustin, whom his holiness had sent over to convert the Saxons, was so much pleased with his reception from Ethelbert, king of Kent, that he set up his staff at Canterbury, the capital of Ethelbert's dominions, which continues the metropolitan see of England to this day. London, however, became a bishopric, under Mellitus in 604, and has yielded to the church of Rome five saints, and to the realm sixteen lord chancellors and lord treasurers; it was valued in the king's books at 1119*l.* 8*s.* 4*d.* *per annum*. Present income, 10,000*l.*

RECENT BISHOPS OF LONDON.

1787. Beilby Porteus, died May 14, 1809.	1828. Charles James Blomfield; resigned Oct. 1856
1809. John Randolph, died July 28, 1813.	(died, Aug. 5, 1857).
1813. W. Howley, translated to Canterbury, Aug. 1823.	1856. Archibald Campbell Tait (present bishop).

LONDON BRIDGE, OLD. Some kind of structure is said to have existed A.D. 978. A bridge was built of wood, 1014, which was partly burned in 1136, and afterwards repaired. The late old bridge was commenced about 1176, by Peter of Colechurch, and completed in 1209, with houses on each side, connected together by large arches of timber, which crossed the street. This bridge was the scene of an awful catastrophe in July, 1212. A fire happened at the Southwark end, which brought immense crowds from London to see, and to extinguish it: but the houses at the north end of the bridge caught fire likewise, which prevented their return, and the fire at the south end prevented their advancing; several vessels that approached to take them off were sunk by overcrowding; and it is said that upwards of 3000 persons lost their lives either by being killed, burned, or drowned. The bridge was restored in 1300, and again suffered by fire in 1471, Feb. 13, 1632, and Sept. 1725. In 1756 all the houses were pulled down. The waterworks were begun in 1582, and caught fire and were destroyed in 1774. The toll was discontinued, March 27, 1782.

LONDON BRIDGE, NEW. After many repairs, the old bridge was reported insecure: and in 1822 the corporation advertised for designs for a new one. That by Mr. John Rennie was approved. On his death the works were executed under the superintendence of his sons John and George. The first pile was driven 200 feet to the west of the old bridge, March 15, 1824; and the first stone was laid by the lord mayor, alderman Garratt, June 15, 1825. The bridge was opened by William IV. and his queen, going by water, attended by a crowd of nobility, amid great festivities, Aug. 1, 1831. Its length is 928 feet, and within the abutments, 728 feet; the span of the centre arch is 132 feet, and of the side arches (of which there are two on each side) 140 and 130 feet; the width of the carriage-way is 33½ feet, and of the abutments at the base 73 feet. The cost of this great structure was 506,000*l.**

* On March 17, 1859, it was computed that there passed over London Bridge 20,498 vehicles (of which 4483 were cabs and 4286 omnibuses), and 167,910 persons (107,074 on foot, and 60,836 in vehicles).

LONDON CITIZENS. To them have been granted many privileges and immunities from the time of William the Conqueror, whose first charter, granted in A.D. 1079, is still preserved in the city archives. This charter is written in beautiful Saxon characters, on a slip of parchment six inches long, and one broad, and is in English as follows:—"William the king greeteth William the bishop, and Godfrey the portreve, and all the burgesses within London, friendly. And I acquaint you, that I will that ye be all there law-worthy, as ye were in king Edward's days. And I will that every child be his father's heir, after his father's days. And I will not suffer that any man do you any wrong. God preserve you." This is the first of many charters granted to London. In 1680 Charles II. granted a charter confirming all the previous ones. In 1682 the citizens having given offence by a petition to the king against the prerogative of parliament, all their charters were seized under a writ of *Quo warranto*. They were returned by James II. in 1688; and in 1690 the city recovered its lost privileges.

LONDON GATES. The original walls of London were the work of the Romans. Theodosius, governor of Britain, is said to have raised them A.D. 379; but they are supposed to have been built about 306. There were originally four principal gates; but in process of time, as new roads were made, the numbers increased; and among others were the Prætorian way, Newgate, Dowgate, Cripple-gate (so called from lame beggars that sat there), Aldgate, Aldersgate, Ludgate, Bridegate, Moorgate, Bishopgate, the Postern on Tower-hill, and Temple-bar, rebuilt 1670-2, the only one of the city boundaries now remaining.

LONDON INSTITUTION, "for the advancement of literature and the diffusion of useful knowledge," in imitation of the Royal Institution (*which see*), was founded in 1805 by sir Francis Baring, bart. and others; first at 8, Old Jewry, Cheapside. The celebrated prof. Porson was the first librarian. The present building was completed in 1819, and opened on April 21; the first lecture was delivered by Mr. W. T. Brande, on May 5, following. Mr. W. R. Grove, Q.C. (the inventor of the Voltaic battery which bears his name), was the first professor of experimental philosophy here, and held that position from 1840 to 1846. The Institution possesses an excellent library, lecture-room, and laboratory.

LONDON GAZETTE. See *Newspaper*.

LONDON STONE. A stone placed in Cannon-street by the Romans, the spot being then the centre of the city, 15 B.C. Cheapside was at this period in the suburbs. *Burns*. London Stone is one of the greatest antiquities of the city, having been known before the time of William I. It was removed from the opposite side of the way, in 1742; but the time and purpose of its erection are alike unknown. Some have supposed it to be the spot whence the Romans measured the distance of their several stations. It was against this stone that Jack Cade struck his sword, exclaiming, "Now is Mortimer lord of this city!" 1450.

LONDON UNIVERSITY. See *University, London*.

LONDON UNIVERSITY COLLEGE, was founded by the exertions of lord Brougham, Thomas Campbell, and others. The building, originally called the London University, was commenced April 30, 1827 (when the first stone was laid by the duke of Sussex); and was opened by an inaugural lecture from professor Bell, Oct. 1, 1828. Its plan of instruction includes a junior school, to prepare pupils for the college; and the college course, comprehends arts, law, medicine, mathematics, natural philosophy, and languages. In Gordon-square, adjacent is *University Hall*, founded in 1847, where divinity and moral philosophy form distinct courses. On the application of the London University for a charter, government resolved upon granting two charters—one for the establishment of a university in London (*see the article*), and the other of this college, both charters being granted on the same day, Nov. 28, 1836; the latter founded on a deed of settlement, dated Feb. 11, 1826, of what was then called the London University, which title was formerly renounced.

LONDON DERRY, OR DERRY, (N. Ireland). Mentioned A.D. 546. An abbey here was burned by the Danes, in 783. A charter was granted to the London companies in 1615. The town was surprised, and sir George Powlett, the governor, and the entire garrison were put to the sword by rebels, in 1606. It was besieged by O'Neal in 1641. A grant was made of Derry, with 210,000 acres of land, to various companies in London, in 1689, when it took its present name. Memorable siege of Derry, commenced April 20, 1689, was sustained against the army of James II., who for a time commanded in person. The heroic garrison and inhabitants were, on this memorable occasion, driven to the extremity of famine; but under the direction of the rev. George Walker, they defended the place against the enemy until the siege was raised by gen. Kirke. James's army, under the French general Rosen, retired with the loss of about 9000 men, after having practised almost unparalleled cruelties upon the inhabitants of the villages around.

LONE STAR. A secret society formed in 1848, called the order of the Lone Star, formed in Alabama and other southern states of the North American union, whose object was declared to be the "extension of the institutions, the power, the influence, and the commerce of the United States over the whole of the western hemisphere, and the islands of the Atlantic and Pacific oceans." The first acquisitions to be made by the order were Cuba and the Sandwich Islands. The knowledge of the existence of this society reached England in August, 1852.

LONG ISLAND, OR FLATBUSH, (N. America), BATTLE OF, Aug. 27, 1776, between the British troops, under sir William Howe, and the revolted Americans, who suffered a severe defeat, after a well-fought action, losing 2000 men killed and wounded, and 1000 prisoners. The Americans were pursued by the victors in their retreat to New York, but were saved under cover of a thick fog from further discomfiture.

LONGEVITY. Methuselah died, aged 969, 2349 B.C. (*Gen. v. 27*). In these countries the instances of it are remarkable, though rare. Golour M'Crain, of the Isle of Jura, one of the Hebrides, is said to have kept 180 Christmases in his own house, and died in the reign of Charles I., being the oldest man on anything approaching to authentic records for upwards of 3000 years. *Greig.* In 1014 died Johannes de Temporibus who lived 361 years (!) *Stow.* Thomas Parr, a labouring man of Shropshire, was brought to London by the earl of Arundel, in 1635, and considered the wonder of his time, being then in his 153rd year, and in perfect health; but the journey and change of air and diet killed him, Nov. 15, the same year. Henry Jenkins, of Yorkshire, died in 1670, and was buried in Bolton churchyard, Dec. 6, in that year, aged 169 years.

OTHER EXTRAORDINARY INSTANCES.			
1656. James Bowles, Killingworth	aged 152	1853. Mrs. Mary Power (aunt of the late rt. hon. Rd. Lalor Shiel), Ursuline Convent, Cork, March 20	116

— Mrs. Judith Crawford, Spanish-town	151		
1840. Mrs. Martha Roike, of Dromore, county of Kildare, Aug. 27	133		

LONGITUDE, determined by Hipparchus, at Nice, who fixed the first degree in the Canaries, 162 B.C. Harrison made a time-keeper, in A.D. 1759, which in two voyages was found to correct the longitude within the limits required by the act of parliament, 12th Anne, 1714; and obtained the reward. See *Harrison's Time-piece*. Other improvements followed. The chronometers of Arnold, Earnshaw, and Bréguet, bring the longitude almost to the truth. Chronometers are now received on trial at Greenwich observatory. The act relating to the discovery of the longitude at sea was repealed in 1828. The Bureau des Longitudes at Paris was established in 1795.

LOOKING-GLASSES. See *Mirrors*.

LOOM. The weaver's, otherwise called the Dutch loom, was brought into use in London from Holland, in or about the year 1676, since when the general principle of the loom has been infinitely varied by mechanical ingenuity. There were, in 1825, about 250,000 hand-looms in Great Britain, and 75,000 power-looms, each being equal to three hand-looms, making twenty-two yards each per day. We have no means of knowing the precise number at present; but the increase must be prodigious. The Jacquard loom was invented about 1800. The steam-loom was introduced in 1807. See *Cotton* and *Electric-Loom*, p. 250.

LONG PARLIAMENT met Nov. 3, 1640; was forcibly dissolved by Cromwell, April 20, 1653.

LORD, when printed in the Bible, in small capitals (**LORD**) stands for Jehovah, the self-existing God, the name first revealed to Moses, 1491 B.C. *Exod.* vi. 3; when in ordinary type, for *Adonai*, a lord or master. With us, it is a term of nobility, see *Lords* and *Barons*. The etymology of this word is doubtful. See *Ladies*.

LORD CHAMBERLAIN, CHANCELLOR, &c. See *Chamberlain, Chancellor, &c.*

LORDS. The nobility of England take their creation from the 1st of William the Conqueror, 1066, when William Fitz-Osborn, the first peer, is said to have been made earl of Hereford; and afterwards Walter d'Evreux, earl of Salisbury; Copsi, earl of Northumberland; Henry de Ferrers, earl of Derby, and Gerodus (a Fleming), earl of Chester. Twenty-two other peers were made in this sovereign's reign. The first peer created by patent was lord Beauchamp of Holt Castle, by Richard II. in 1387. In Scotland, Gilchrist was created earl of Angus by Malcolm III. 1037. In Ireland, sir John de Courcy was created baron of Kinsale, &c., in 1181; the first peer after the obtaining of that kingdom by Henry II. Peers of England are free from all arrests for debts, as being the king's hereditary counsellors. Therefore a peer cannot be outlawed in any civil action, and no attachment lies against his person; but execution may be taken upon his lands and goods. For the same reason, they are free from all attendance at courts leet, or sheriffs' turns; or, in case of a riot, from attending the *posse comitatus*. He can act as a justice of the peace in any part of the kingdom. See *Baron, Earl, &c.*

LORDS, HOUSE OF. The peers of England were summoned *ad consulendum*, to consult, in early reigns, and were summoned by writ, 6 & 7 John, 1205, but the earliest writ extant is 49 Hen. III., 1264-5. The commons did not form a part of the great council of the nation until some ages after the conquest. See *Parliament*. The house of lords includes the spiritual as well as temporal peers of Great Britain. The bishops are supposed to hold certain ancient baronies under the king, in right whereof they have seats in this house. The temporal lords consist of the several degrees of nobility: some sit by descent, as do all ancient peers; some by creation, as all new-made peers; and others by election, since the union with Scotland in 1707, and with Ireland 1801.—Scotland elects 16 representative peers, and Ireland 4 spiritual lords by rotation of sessions, and 28 temporal peers for life. The house of lords now (1862) consists of 3 princes of the blood, 3 archbishops, 20 dukes, 22 marquesses, 132 earls, 29 viscounts, 225 barons, and 27 bishops; in all 461. The house of lords—

At the death of Charles II.	176 peers.	At the death of George III.	339 peers.
At the death of William III.	192	At the death of George IV.	396
At the death of Anne	209	At the death of William IV.	456
At the death of George I.	216	In the 18th Victoria, 1855	448
At the death of George II.	229	In the 20th Victoria, 1857	449
The barons enact the constitutions of Clarendon in 1164.		Unite with the commons in making William and Mary king and queen, 1689.	
Obtain Magna Charta in 1215.		Reject the great Reform bill, Oct. 7, 1831; pass it June 4, 1832.	
Hold the government, 1264-5.		Oppose successfully the creation of life-peerages,* Feb. 7, 1856.	
House of lords abolished by the commons, Feb. 6, 1649; restored, 1660.			

LORDS JUSTICES. See *Justices*.

LORETTO, near Ancona, Italy. Here is the *Casa Santa*, or Holy House, in which it is pretended the Virgin Mary lived at Nazareth, and which was carried by angels into Dalmatia from Galilee in 1291, and brought here a few years after. The famous lady of Loretto stands upon an altar holding the infant Jesus in her arms, and is surrounded with gold lamps, whose glare conceals her face. She is clothed with cloth of gold, set off with jewels, with which the little Jesus, though in his shirt, is covered also. Loretto was taken by the French

* Peerage for life only, with the title of lord Wensleydale of Wensleydale, was granted to baron sir James Parke, Jan. 10, 1856; the house of lords opposed his sitting and voting as a peer for life, and on July 25, 1856, he was created a peer in the usual way, with the title of lord Wensleydale of Walton.

in 1796, and the holy image carried to France; but it was brought back with pious pomp, welcomed with the discharge of cannon and the ringing of bells, and borne in procession to the holy house on a rich frame resting on the shoulders of eight bishops, Jan. 5, 1803.

L'ORIENT (W. France). Lord Bridport achieved a memorable victory off this port over the French fleet, June 23, 1795. The British squadron actually engaged consisted of ten ships of the line; the enemy's force, of twelve ships of the line, eleven frigates, and some smaller vessels; after an action of three hours (from 6 p.m. till 9) the French got into the port, leaving three sail of the line, L'Alexandre, Le Formidable, and Le Tigre, in the possession of the victors; the loss of the French was severe; that of the British inconsiderable.—The French flag-ship, L'Orient, blew up during the battle of the Nile, Aug. 1, 1798. Admiral Brueys and about 900 men perished.

LORRAINE (formerly Lotharingia), a French province, became a kingdom under Lothaire (son of the emperor Lothaire I.) about 855; but was divided on his death, in 869, part of it being made a duchy. The first hereditary duke, Gerard, was nominated by the emperor Henry III. in 1048. From Gerard descended the illustrious house of Lorraine, represented now by the emperor of Austria, whose ancestor, the empress Maria Theresa, married in 1736, Francis, formerly duke of Lorraine, but then of Tuscany. Lorraine had been given to the dethroned king of Poland, Stanislaus I., for life; at his death in 1766, it was united to France.

LOTTERIES. The first mentioned in English history began drawing at the western door of St. Paul's cathedral, Jan. 11, 1569, and continued day and night until May 6 following. It contained 40,000 "*lots*," at 10s. each lot. The profits were for repairing the fortifications on the coast of England, and the prizes were pieces of plate.

First lottery for sums of money took place in . . . 1630	For the collection of pictures of alderman
Lottery for the British Museum . . . 1753	Boydell, a great encourager of the arts, by act . . . 1804-5
Cox's museum, containing many rare specimens of art and articles of virth, disposed of by lottery, by an act of parliament . . . 1773	Lotteries abolished by 4 Geo. IV. c. 60 . . . Oct. 1826
An act passed for the sale of the buildings of the Adelphi by lottery . . . June 16, —	Act passed, declaring that the then pending Glasgow lottery should be the last permitted to be drawn . . . 1834
Lotteries established in 1693, and for more than 130 years yielded a large annual revenue to the crown. The Irish state lottery was drawn in . . . 1780	An act passed imposing a penalty of 50l. for advertising foreign or any lotteries in the British newspapers . . . 1836
Lottery for the Leverian Museum . . . 1784-5	All lotteries were suppressed in France . . . Nov. 15, 1793, and 1836
For the Pigott diamond, permitted, Jan. 2, 1801; it was afterwards sold at Christie's auction for 9500 guineas . . . May 10, 1802	Mr. Dethiers' twelfth cake lottery, Argyl-rooms, Hanover-sq., was suppressed Dec. 27, 1860

LOUDON-HILL, or DRUMCLOG. See *Drumclog*.

LOUIS-D'OR. The Louis of gold, a French coin of 24 francs, was first struck by Louis XIII. in 1640. Its value (20 francs) fluctuated, and in 1810 was superseded by the Napoleon.

LOUISIANA (N. America), one of the United States. Discovered by Ferdinand de Soto in 1541; traversed by M. de Salle in 1682, and settled by Louis XIV. (from whom it derived its name) in 1718. It formed the basis of Law's Mississippi scheme.

Ceded to Spain at the peace when all east of the Mississippi was given to England . . . 1763	Gen. Jackson defeated the British at New Orleans . . . Jan. 8, 1815
Restored to France . . . 1801	Seceded from the Union by ordinance, Jan. 26, 1861
Sold to the Americans 1803, and made a State, 1812	The Protestant bishop Polk declares for secession . . . Feb. 1861

LOUVRE. This renowned edifice in Paris is said to have been originally a royal residence in the reign of Dagobert, A.D. 628. It was a prison-tower constructed by Philippe Augustus in 1204. It afterwards became a library, and Charles VI. made it his palace (about 1304). Successive kings enlarged and adorned it, particularly Louis XIV.—Napoleon I. turned it into a museum and deposited here the finest collection of paintings, statues, and treasures of art known in the world. The chief of those brought from Italy have since been restored to the rightful possessors. The magnificent buildings of the New Louvre, begun by Napoleon I. and completed by Napoleon III. were inaugurated by the latter, in great state, Aug. 14, 1857.

LOVE FEASTS. See *Agape*.

LOWERING BOAT APPARATUS. See *Life-boats*.

LOW SUNDAY, the first Sunday after Easter, said to derive its name from the contrast between its solemnities and those of Easter Sunday.

LOYALTY LOANS. There were several of these raised during the revolutionary and Bonaparte wars; but one instance so peculiarly marked the spirit and devotion of the British people, that it is referred to as the *Loyalty loan*; a subscription loan was opened in London on the 5th Dec. 1796, and in fifteen hours and twenty minutes the sum of eighteen millions sterling was subscribed, thus demonstrating the wealth and patriotism of England, and the hearty concurrence of her people in the war. See *National Association*.

LÜBECK, a city in N. Germany, one of the four republics of the German confederation, was built in the twelfth century, and was the chief founder of the Hanseatic league about 1240, which lasted till 1630. Lübeck was declared a free imperial city about 1226; but was frequently attacked by the Danes. The French took it by assault Nov. 6, 1806, and Napoleon incorporated it into his empire in 1810. On his fall in 1814 it became once more a free imperial city. Population in 1857, 43,225.

LUCANIANS, a warlike people of S. Italy, who defeated the invading Alexander of Epirus at Pandosia, 332 B.C.; were subdued by the Romans, 277; revolted after the battle of Cannæ, 216; were reduced by Scipio, 201; again revolted, 90; and were admitted as citizens of Rome, 88 B.C.

LUCCA (central Italy), formerly a Roman colony, 177 B.C., and a Lombard duchy, became a free city, about A.D. 1055, and took an active part in the civil wars of the Italian republics. It was united with Tuscany, and given in 1805 as a principality to Eliza Bonaparte by her brother Napoleon I. In 1814 Lucca became a duchy, and was given to Marie Louise, widow of Louis, king of Etruria. It was exchanged by her son Charles-Louis for Parma and Placentia in 1847, when it was annexed once more to Tuscany, and with it became part of the kingdom of Italy in 1860.

LUCIA, ST. (West Indies), settled by the French in 1650. Taken by the British several times in the subsequent wars. Memorable insurrection of the French negroes, April, 1795. In this year Guadaloupe, St. Vincent's, Grenada, Dominica, St. Eustatia, and St. Lucia, were taken by the British. St. Lucia was restored to France at the peace of 1802; but was again seized by England the next year, and confirmed to her by the treaty of Paris in 1814. See *Colonies*.

LUCIFER MATCHES came into use about 1834. In March, 1842, Mr. Reuben Partridge patented machinery for manufacturing the splints. In 1845 Schrötter of Vienna discovered his amorphous phosphorus, by the use of which lucifers are rendered less dangerous, and the manufacture less unhealthy.

LUCKNOW, the capital of Oude. See *India*, 1857.

LUDDITES. Large parties of men, under this designation, commenced their depredations at Nottingham, breaking frames and machinery, Nov. 1811. Skirmish with the military there, Jan. 29, 1812. Several serious riots occurred again in 1814; and numerous bodies of these people, chiefly unemployed artisans, committed great excesses in 1816, *et seq.* Several of these Luddites were tried and executed.

LUGDUNUM. See *Leyden* and *Lyons*.

LUNATICS. An eminent authority has traced insanity, in a thousand male patients, to the following causes:

Drunkenness	110	Old age	69	Poisonous effluvia	17
Consequences of disease	100	Chagrin	54	Ill-usage	12
Epilepsy	78	Love	47	Crimes, remorse and despair	9
Ambition	73	Accidents	39	Malformation of the skull	4
Excessive labour	73	Religious enthusiasm	29	Other and unknown causes	83
Born Idiots	71	Unnatural practices	27		
Misfortunes	69	Political events	26	Pretended insanity	

"The king shall have the custody of the lands of natural fools," &c., 17 Edw. II. 1324
 Marriages with lunatics declared void, 15 Geo. II. c. 30 1742
 The numerous laws respecting lunatics were consolidated and amended by 16 & 17 Vict. cc. 70, 96, 97 1853
 A new lunacy act for Scotland passed 1858
 An act to amend the law relating to commissions of lunacy passed (said to be in consequence of the Wyndham case, see *Trials*, 1862) 1862

TREATMENT OF THE INSANE.
 Till the end of the last century lunatics were

treated with cruel severity. See Conolly "On the Treatment of the Insane," 1856
 The insane were exhibited at Bethlem as a show, for 2d. or 1d. till 1770
 Enlightened principles of treatment were introduced by Wm. Tuke, at the Society of Friends' "Retreat," at York, and by Pinel, at the Bicêtre, Paris, with very great success 1792
 Esquirol succeeds Pinel, and strongly recommends instruction in the management of mental disorders 1810
 Exposure of enormous cruelties in the Bethlem Hospital 1815
 This led to gradual improvements, and at last

LUNATICS, *continued.*

to the total abolition of mechanical restraints at Lincoln, 1837, and at Hanwell Asylum, (under the superintendence of Dr. John Conolly) and at other places 1839

Psychological Journal, first published by Dr. Forbes Winslow 1848
Journal of Mental Science, by Dr. J. C. Bucknill 1852

LUNATICS IN CHARGE IN ENGLAND AND WALES, JAN. 1, 1855.

	PRIVATE.		PAUPER.		Total.
	Male.	Female.	Male.	Female.	
County Asylums	132	123	6008	7316	13,579
Hospitals	895	723	91	94	1,803
Licensed Houses	1448	1350	1034	1279	5,111
	2475	2196	7133	8689	20,493

On Jan. 1, 1858, there were in charge in England and Wales 22,310 lunatics of all classes: on Jan. 1, 1859, 29,858; on Jan. 1, 1860, 17,837; on Jan. 1, 1862, 22,807.

In 1851, there were in Ireland nearly 15,000 lunatics of all classes; in Scotland in 1851, 3362 in charge; in 1855, 7403; of which only 3328 were under the protection of the law.

LUND-HILL, near Barnsley, in South Yorkshire. One of the most destructive colliery explosions on record occurred here, Feb. 19, 1857. While the miners were dining in the pit the inflammable gas took fire and exploded. Above 180 miners perished. In April and May bodies were still being extricated. There had been great laxity of discipline in the pit. 7000*l.* were subscribed for the bereaved.

LUNEBURG. See *Brunswick*.

LUNEVILLE (France), **PEACE OF**, concluded between the French republic and the emperor of Germany, confirming the cessions made by the treaty of Campo Formio, stipulating that the Rhine, to the Dutch territories, should form the boundary of France, and recognising the independence of the Batavian, Helvetic, Ligurian, and Cisalpine republics, Feb. 9, 1801.

LUPERCALIA. A yearly festival,* observed at Rome, on Feb. 15, in honour of Pan, destroyer of wolves (*lupi*), first instituted by the Romans, according to Plutarch; but according to Livy, brought by Evander into Italy. These feasts were continued till A.D. 496, when pope Gelasius abolished them, on account of the great disorders and indecencies that were committed in their celebration. *Pardon.* This, however, is doubtful.

LUSATIA, a marquise in N. Germany, given to John of Bohemia, 1319; obtained by Matthias of Hungary, 1478; and ceded to Saxony in 1635.

LUSIAD. See *Epic*.

LUSITANIA. See *Portugal*.

LUSTRUM. An expiatory sacrifice made for the Roman people, at the end of every five years, after the census had been taken, 472 B.C. Every fifth year was called a *lustrum*; and ten, fifteen, or twenty years, were commonly expressed by two, three, or four *lustra*. The number of Roman citizens was—in 293 B.C., 272,308; 179 B.C., 273,294; 70 B.C., 450,000; 28 B.C., 4,164,060; A.D. 48, 5,984,072.

LUTHERANISM,† the form of Christianity professed by the majority of the people of the north of Germany, Prussia, Denmark, and Sweden. The doctrines are mainly embodied in Luther's catechisms, in the Augsburg Confession, and in the *Formula Concordiæ* of the Lutherans, published in 1580. Their first university was founded at Marburg, in 1527, by Philip, landgrave of Hesse.

LUTZEN (Prussia), **BATTLE OF**, between the French army commanded by Napoleon on the one side, and the combined armies of Russia and Prussia, commanded by general Wittgenstein; fought May 2, 1813. It opened the campaign of the year. Each of the adversaries claimed the victory, but it was manifestly on the side of France. The battles of Bautzen and Würtzchen immediately followed (May 19—21), both in favour of Napoleon. The allies were compelled to pass the Oder, and an armistice was agreed to, and afterwards prolonged; but unfortunately for the French emperor it did not produce peace.

* Naked youths ran through the streets with whips, lashing all whom they encountered, even women, who received the stripes with inclination, believing that they removed barrenness and eased the pains of childbirth. Augustus forbade all persons above the age of fourteen to appear naked during this festival. Cicero in his *Philippics*, reproaches Antony for having disgraced the dignity of the consulship by appearing naked on one of these occasions. *Vulvo.*

† Martin Luther was born at Eisleben, Nov. 10, 1483; studied at Erfurt, 1501; was professor of philosophy at Wittenburg, 1508; resisted the sale of indulgences, 1517; defended himself at Augsburg, 1518; at Worms, 1520; was excommunicated, June 16, 1520; began his German bible, 1521; married Katherine de Bora, 1525; published his German bible complete, 1534; died Feb. 18, 1546.

LUTZENGEN, or LUTZEN, BATTLE OF. See *Lippstadt*.

LUXEMBURG (Holland), capital of the grand duchy of Luxemburg, of which part is subject to Holland and part to Belgium since 1839. Luxemburg was once considered the strongest fortress in the world. It was taken and pillaged by the French in 1542-3 : was taken by the Spaniards in 1544 ; by the French in 1684 ; and restored to Spain in 1697. It was again taken by the French in 1701 ; and afterwards given to the Dutch as a barrier town, and ceded to the emperor at the peace in 1713. It withstood several sieges in the last century. It surrendered to the French after a long and memorable siege, June 7, 1795.

LUXOR. See *Thebes*.

LUXURY. The instances of extravagance and luxury are numerous in the history of almost all countries, ancient and modern, and many laws have been enforced to repress them. Horace mentions fowls dressed in Falernian wine, mussels and oysters from the Lucrine lake and Circean promontory, and black game from the Umbrian forests. *Lardner*. Lucullus, at Rome, was distinguished for the immoderate expenses of his meals ; his halls were named from the different gods ; and when Cicero and Pompey attempted to surprise him, they were amazed by the costliness of a supper which had been prepared upon the word of Lucullus, who merely ordered his attendants to serve it in the hall of Apollo ; this feast for three persons casually met, would have sufficed for three hundred nobles specially invited. In England luxury was restricted by a law wherein the prelates and nobility were confined to two courses every meal, and two kinds of food in every course, except on great festivals. The law also prohibited all who did not enjoy a free estate of 100*l.* per annum from wearing furs (see *Furs*), skins, or silk ; and the use of foreign cloth was confined to the royal family alone ; to all others it was prohibited, A.D. 1337. An edict was issued by Charles VI. of France, which said, "Let no man presume to treat with more than a soup and two dishes," 1340. Luxury has made rapid strides in this country since the peace in 1815.

LYCÆUM. The Lyceum took its name from its having been originally a temple of Apollo Lyceus ; or rather, a portico, or gallery, built by Lyceus, son of Apollo. The Lyceum was a celebrated spot near the banks of the Ilissus, in Attica, where Aristotle taught philosophy ; and as he generally taught his pupils while he walked, they were hence called *peripatetics*, *walkers-about*, and his philosophy was called, from this place, the philosophy of the Lyceum, 342 B.C. *Stanley*. See *Theatres*.

LYCIA, a region of Asia Minor. It belonged successively to Cræsus (about 560 B.C.), the Persians (546 B.C.), to Alexander the Great (333 B.C.), and to his successors the Seleucidæ. The Romans gave Lycia to the Rhodians (188 B.C.). It became afterwards nominally free under the Roman government, and was finally annexed to the empire by Claudius. The marbles, brought from Lycia by Sir Charles Fellows, were deposited in the British Museum, 1840-6.

LYDIA, or Mæonia, an ancient kingdom in Asia Minor, under a long dynasty of kings, the last of whom was Cræsus, proverbial for his riches. The coinage of gold and silver money, and other useful inventions, are ascribed to the Lydians. Æsop, the Phrygian fabulist, Aleman, the first Greek poet who wrote in a style of gallantry, Thales of Miletus, Anaximenes, Xenophanes, Anacreon of Teos, Heraclitus of Ephesus, &c., flourished in Lydia.

Argon, a descendant of Hercules, reigns in Lydia. <i>Herod.</i>	B.C. 1223	Thales of Miletus. <i>Blair.</i>	May 28, B.C. 585
The kingdom of Lydia, properly so called, begins under Ardyus I. <i>Blair.</i>	797	Cræsus, son of Alyattes, succeeds to the throne and conquers Asia Minor.	560-50
Alyattes I. reigns	761	Cræsus, dreading the power of Cyrus, whose conquests had reached to the borders of Lydia, crosses the Halys to attack the Medes, with an army of 420,000 men and 60,000 horse	548
Meles commences his rule	747	He is defeated, pursued, and besieged in his capital by Cyrus, who orders him to be burned alive : the pile is already on fire	
Reign of Candaules	735	when Cræsus calls on the name of <i>Solon</i> , and Cyrus hearing him, spares his life. Lydia, the kingdom of the "richest of mankind," made a province of the Persian empire	546
Gyges, first of the race Mermnadæ, kills Candaules, marries his queen, usurps the throne, and makes great conquests	718	Sardis burnt by the Ionians	499
Ardysus II. reigns, 673; the Cimbri besiege Sardis, the capital of Lydia.	635	Lydia conquered by Alexander	332
The Milesian war commenced under Gyges, is continued by Sadyattes, who reigns	628	Becomes part of the kingdom of Pergamus	283
Reign of Alyattes II.	617	Conquered by the Turks	A.D. 1326
Battle upon the river Halys between the Lydians and Medes, interrupted by an almost total eclipse of the sun, which occasions a conclusion of the war. This eclipse had been predicted many years before by			

LYING-IN HOSPITALS. The first was established in Dublin by Dr. Bartholomew Mosse, an eminent physician, amidst strong opposition. It was opened March, 1745. See *Hospitals*.

LYMPHATIC VESSELS. The slender pellucid tubes carried into the glands of the mesentery, receiving first a fine thin lymph from the lymphatic ducts, which dilute the chylous fluid. *Cheyne*. These vessels were found by Jasper Asellius in 1622; he published his dissertations on the subject in 1627. *Nouv. Dict.* Discovered in oviparous animals by Dr. Hewson, who disputed the honour of the discovery with Dr. Munro, 1762.

LYNCH LAW. Punishment inflicted by private individuals independently of the legal authorities, said to derive its name from John Lynch, a farmer, who exercised it upon the fugitive slaves and criminals dwelling in the "dismal swamp," North Carolina, when they committed outrages upon persons and property which the colonial law could not promptly repress. This mode of administering justice began about the end of the seventeenth century and still exists in the outlying provinces of the United States.

LYONS (S. France), the Roman Lugdunum. Founded by M. Plancus, 43 B.C. The city was reduced to ashes in a single night by lightning, A.D. 59, and was rebuilt in the reign of Nero. It was a free city till its union with France in 1307.

Two general councils held here	A.D. 1245, 1274	to great popular excesses for many days,

LYRE. Its invention is ascribed to the Grecian Mercury, who, according to Homer, gave it to Apollo, the first that played upon it with method, and accompanied it with poetry. The invention of the primitive lyre, with three strings, is ascribed to the first Egyptian Hermes. Terpander added several strings to the lyre, making the number seven, 673 B.C. Phrynis, a musician of Mitylene, added two more, making nine, 438 B.C.

M.

MACADAMISING, a system of road-making devised by Mr. John Macadam, and published by him in an essay, in 1819, having practised it in Ayrshire. He received a grant of 10,000*l.* from parliament, and was appointed surveyor-general of the metropolitan roads in 1827. He died in 1836.

MACAO, in China, was given to the Portuguese as a commercial station, A.D. 1517.

MACARONI. This name was given to a poem by Theop. Folengo, 1509, and it continues to designate trifling performances, as buffoonery, puns, anagrams, "wit without wisdom, and humour without sense." His poem was so called from an Italian cake of the same name, pleasant to the taste, but without any alimentary virtue. These poems became the reigning taste in Italy and France, where they gave birth to *Macaroni academies*, and reaching England, to *Macaroni clubs*, till, in the end, everything ridiculous in dress and manners was called "Macaroni."

MACCABEES, a family of patriotic Jews, who commenced their career during the persecution of Antiochus Epiphanes, 167 B.C., when Mattathias a priest resisted the tyranny of the governor. His son Judas Maccabæus defeated the Syrians in three battles, 166, 165 B.C.; but fell in an ambush, 161 B.C. His brother Jonathan made a league with the Romans and Lacedæmonians, and after an able administration was treacherously killed at Ptolemais by Tryphon, 143 B.C. His brother and successor, Simon, was also murdered 135 B.C. John Hyrcanus, son of Simon, succeeded. His son Judas, called also Aristobulus, took the title of king, 107 B.C. The history of the Maccabees is contained in five books of that name, two of which are included in our Apocrypha, four are accounted canonical by the Roman Catholic Church; none by Protestant communions.

MACDONALD AFFAIR. See *Prussia*, 1861.

MACE, a weapon anciently used by the cavalry of most nations, was originally a spiked club, hung at the saddle-bow, and usually of metal. Maces were also early ensigns of authority borne before officers of state, the top being made in the form of an open crown, and commonly of silver gilt. The lord chancellor and speaker of the house of commons have maces borne before them. Edward III. granted to London the privilege of

having gold or silver maces carried before the lord mayor, sheriffs, aldermen, and corporation, 1354. It was with the mace usually carried before the lord mayor on state occasions, that Walworth, lord mayor of London, knocked the rebel Wat Tyler off his horse, a courtier afterwards despatching him with his dagger, for rudely approaching Richard II., 1381. Cromwell entering the house of commons to disperse its members and dissolve the parliament, ordered one of his soldiers to "take away that fool's bauble, the mace," which was done, and the doors of the house locked, -April 20, 1653.

MACEDON (N. Greece). The first kingdom was founded by Caranus, about 814 B.C. It was an inconsiderable country, sometimes under the protection of Athens, sometimes of Thebes, and sometimes of Sparta, until the reign of Philip, the father of Alexander the Great, who by his wisdom as a politician, and exploits as a general, made it a powerful kingdom, and paved the way for his son's greatness.

Reigns of Caranus, 814 B.C., or 796, or 748; Perdiccas I., 729; Argæus I., 684; Philip I., 640 or 609.

Philip defeated by the Romans at Cynoccephalus . . . 197
Reign of Perseus, his son . . . 179
Perseus defeated by the Romans . . . 171
The consul Æmilius Paulus enters Macedon, and pronounces it a Roman province . . . 168
Perseus and his sons made prisoners, walk in chains before the chariot of Æmilius in his triumph for the conquest of Macedon . . . 167
Macedonia plundered by Theodoric the Ostrogoth . . . A.D.
Conquered by the Bulgarians . . . 982
Recovered by the emperor Basil . . . 1001
Formed into the Latin kingdom of Thessalonica, by Boniface, of Montferat . . .
After various changes, it is finally conquered by the Turks under Amurath II., and annexed to his empire . . . 1430

MACHIAVELLIAN PRINCIPLES, those laid down by Nicholas Machiavelli of Florence (born 1469, died 1527), in his *Practice of Politics* and *The Prince*. By some they are stigmatised as "the most pernicious maxims of government, founded on the vilest policy;" and by others as "sound doctrines, notwithstanding the prejudice erroneously raised against them." The author said that if he taught princes to be tyrants, he had also taught the people to destroy tyrants. The work appeared in 1517, and was translated into English in 1761.

MADAGASCAR, on the S.E. coast of Africa, is an island extending over an area larger than that of Great Britain and Ireland, and now contains more than three millions of inhabitants. It is said to have been discovered by Lorenzo Almeida, A.D. 1506. The French have often attempted to settle on this island, but generally with little success. Their most permanent establishment was at Fort Dauphin, which fell into the hands of the English with Bourbon and Mauritius in 1810 and 1811. In 1818, the settlements were ceded to the king Radama, on his giving up the slave trade. Radama was a ruler in advance of his people; and greatly favoured Europeans and encouraged the profession of Christianity. He died in 1828, and a reactionary policy under his queen, an energetic sovereign, immediately began. The English missionaries who came to Madagascar in 1820 were obliged to depart in 1836. The application of the native laws to the European settlers occasioned an unsuccessful attack on the town of Tamatave, by a united expedition from the English at the Mauritius, and the French from the Isle of Bourbon, in June, 1845. All amicable intercourse ceased for ten years. The French were defeated in an attack on this island, Oct. 19, 1855. The native Christians suffered much persecution, although the prince, the son of the then reigning queen, embraced Christianity in 1846. The rev. W. Ellis in 1858 published an interesting account of his three visits to the island, on behalf of the London Missionary Society, in 1854-5-6. In Aug. 1857, it was stated that the queen had ordered the expulsion of the English and French. She died in Aug. 1861, and was succeeded by her son Radama II. a Christian, who is said to be under French influence.—A paper describing a pigmy from Madagascar was presented to the Royal Society by an eminent physician, in 1809.

MADEIRA, an island on the N.W. coast of Africa, so called on account of its woods: it was discovered, it is said, in 1344, by Mr. Macham, an English gentleman, or mariner, who fled from France for an illicit amour. He was driven here by a storm, and his mistress, a French lady, dying, he made a canoe, and carried the news of his discovery to Pedro, king of Arragon, which occasioned the report that the island was discovered by a Portuguese, A.D. 1345. But it is maintained that the Portuguese did not visit this island until 1419 or 1420, nor did they colonise it until 1431. It was taken possession of by the British in July, 1801; and again by admiral Hood and general (afterwards viscount) Beresford, Dec. 24, 1807, and retained in trust for the royal family of Portugal, which had just then emigrated to the Brazils. It was subsequently restored to the Portuguese crown. Since 1852 the renowned vineyards here have been totally ruined by the vine disease.

MADIAI PERSECUTION. See *Tuscany*.

MADRAS (S. E. Hindostan), called by the natives Chennapatam. Colonised by the English, and Fort George built by permission of the king of Golconda, 17 James I. 1620. Madras was taken by the French in 1746, and was restored in 1749, immediately after the peace of Aix-la-Chapelle. Madras is now the second of the presidencies of our Indian Empire. For occurrences not mentioned below, see article *India*.

and a dreadful conflict takes place May 2, 1808	

MAESTRICHT (Holland). It revolted from Spain 1570, and was taken by the prince of Parma in 1579, when a dreadful massacre took place. In 1632, the prince of Orange reduced it after a memorable siege, and it was confirmed to the Dutch in 1648; Louis XIV. took it in 1673; William prince of Orange invested it in vain in 1676; but in 1678 it was restored to the Dutch. In 1748 it was besieged by the French, who were permitted to take possession of the city on condition of its being restored at the peace then negotiating. At the commencement of 1793, Maestricht was unsuccessfully attacked by the French, but they became masters of it towards the end of the following year. In 1814, it was made part of the kingdom of the Netherlands; it now belongs to Holland.

MAGAZINE, at first a miscellaneous periodical publication. There are now magazines devoted to nearly every department of knowledge. The following are the dates of the first publication of the principal magazines. See *Reviews* and *Newspapers*.

Gentleman's Magazine 1731	European Magazine 1782	Fraser's Magazine 1830
London 1732	Methodist 1784	Metropolitan 1831
Scots 1739	Evangelical 1792	Penny 1832
Royal 1759	Monthly 1796	Tait's 1833
Court 1760	Philosophical 1798	Cornhill 1859
Gospel 1768	Blackwood's 1817	Macmillan's 1859
Lady's 1772	New Monthly 1814	Temple Bar; and St. James's 1860

MAGDALENS and MAGDALENETTES, communities of nuns and women, the latter class consisting chiefly of penitent courtesans. The convent of Naples was endowed by queen Sancha, A.D. 1324. That at Metz was instituted in 1452. At Paris, 1492. The Magdalen at Rome was endowed by pope Leo. X., in 1515, and favoured by Clement VIII. in 1594. The Magdalen Hospital, London, was founded in 1758, principally under the direction of Dr. Dodd. The Asylum in Dublin was opened in June, 1766.

MAGDEBURG (Prussia). The archbishopric was founded about A.D. 967. The city suffered much during the religious wars in Germany. It was blockaded for seven months by the Imperialists, under Wallenstein, in 1629; and was taken and barbarously sacked by Tilly on May 10, 1631. It was given to Brandenburg in 1648; was taken by the French Nov. 8, 1806, and annexed to the kingdom of Westphalia; but was restored to Prussia in 1813.†

MAGELLAN, STRAITS OF (S. America), passed by Fernando de Magelhaéns (Magellan), a Portuguese, with a fleet of discovery fitted out by the emperor Charles V. in 1519. Magellan completed the first voyage round the world, but was killed in 1521. The Spaniards had a fort here, called Cape Famine, because the garrison perished for want.

MAGENTA, a small town in Lombardy, memorable for the victory of the French and Sardinian army over the Austrians, June 4, 1859. The emperor Louis Napoleon commanded, and he and the king of Sardinia were in the thickest of the fight. It is said that

* Appointed financial secretary and a member of the Indian council at Calcutta, Oct. 1862.

† The *Magdeburg Experiment* is shown by means of a hollow sphere, composed of two hemispheres, fitted air-tight. When the air is exhausted by the air-pump, the hemispheres are held together by the pressure of the atmosphere, and require great force to separate them. The apparatus was suggested by Otto von Guericke, the inventor of the air-pump. He died in 1686. *Brande*.

55,000 French and Sardinians, and 75,000 Austrians were engaged. The former are asserted to have lost 4000 killed and wounded, and the Austrians 10,000, besides 7000 prisoners; these numbers are still doubtful. The French generals Espinasse and Clere were killed. The opportune arrival of general M'Mahon during a deadly struggle between the Austrians and the French, greatly contributed to the victory. The contest near the bridge of Buffalora was very severe. The Austrians fought well, but were badly commanded. The emperor and king entered Milan on June 8 following. M'Mahon and Regnault d'Angely were created marshals of France.—The dye, rosaniline, obtained by chemists from gas-tar, has been termed *magenta red*.—See *Aniline*.

MAGI, or WORSHEPPERS OF FIRE. The Persians adored the invisible and incomprehensible God as the principle of all good, and paid homage to fire, as the emblem of his power and purity. They built no altars nor temples; their sacred fires blazed in the open air, and their offerings were made upon the earth. The Magi, their priests, are said to have had skill in astronomy, &c., hence the term Magi was applied to all learned men, till they were finally confounded with the magicians. Zoroaster, king of Bactria, was the reformer of the sect of the Magi; he flourished about 1080 B.C.; others say 550 B.C. Their religion was superseded in Persia by Mahometanism, A.D. 652. The Parsees at Bombay are descendants of the Guebres or fire-worshippers.

MAGIC. See *Alchemy, Witchcraft, &c.* The invention of the MAGIC LANTERN is ascribed to Roger Bacon, about A.D. 1260, but more correctly to Athanasius Kircher, who died 1680.

MAGNA CHARTA. The fundamental parts of the great charter of English liberty were derived from Saxon Charters, continued by Henry I. and his successors. It was signed by John at Runnymede, near Windsor, June 15, 1215,* &c. It was many times confirmed, and as frequently violated, by Henry III. This last king's grand charter was granted in 1224, and was assured by Edward I. See *Forests*.

MAGNA GRÆCIA. The independent states founded by Greek colonists in South Italy, Sicily, &c., beginning in 974 B.C. Pandosia and Metapontum were built in 774 B.C. Cumæ, in Campania, is said to have been founded in 1034 B.C. These states were ruined through siding with Hannibal when he invaded Italy, 216 B.C.

Syracuse	B.C. 734	Crotone	B.C. 710	Lipara	B.C. 627
Leontium and Catana	730	Tarentum	708	Agigentum	582
Sybaris	721	Locri Epizephyrii	673	Thurium	432

MAGNESIA (Asia Minor). Here Antiochus the great, king of Syria, was defeated by the Scipios 190 B.C.—The white alkaline earth used in medicine, of gently purgative properties, was in use in the beginning of the eighteenth century, when it was sold by a Roman canon as *Magnesia alba*. Its properties were developed by Dr. Black, about 1755. The metal *Magnesium* was obtained from its earth by Humphry Davy, about 1807.

MAGNETISM. Magnes, a shepherd, is said to have been detained on Mount Ida by the nails in his boots. The attractive power of the loadstone or magnet was early known, and is referred to by Homer, Aristotle, and Pliny; it was also known to the Chinese and Arabians. The Greeks are said to have obtained the loadstone from Magnesia in Asia, 1000 B.C. Roger Bacon is said to have been acquainted with its property of pointing to the north (1294). The invention of the mariner's compass is ascribed to Flavio Gioia, a Neapolitan, about 1320; but it was known in Norway previous to 1266; and is mentioned in a French poem, 1150.

Robert Norman, of London, discovered the dip of the needle about A.D. 1576
 Gilbert's treatise "De Magnete," published, 1600; Halley's theory 1683
 Marcel observed that a bar of iron becomes temporarily magnetic by position 1722
 Artificial magnets made by Dr. G. Knight 1746
 The variation of the compass was observed by Bond, about 1668; the diurnal variation by Graham, 1722; on which latter Canton made 4000 observations previous to 1756
 Coulomb constructed a torsion balance for determining the laws of attraction and repulsion, 1786; also investigated by Michel, Euler, Lambert, Robison, and others 1750-1800

The deflection of the magnetic needle by the voltaic current was discovered by Ørsted 1820
 Mr. Abraham invents a magnetic guard for persons engaged in grinding cutlery 1821
 The magnetic effects of the violet rays of light exhibited by Morichini, 1824; polarity of a sewing needle so magnetized shown by Mrs. Somerville A.D. 1825

 Sir W. Snow Harris invents various forms of the compass 1831
 Electricity produced from a magnet by professor Faraday, 1831; his researches on the action of the magnet on light, on the mag-

* On Nov. 20, 1214, the archbishop of Canterbury and the barons met at St. Edmondsbury. On Jan. 6, 1215, they presented their demands to the king, who deferred his answer. On May 10 they were censured by the pope. On May 24 they marched to London, and the king was compelled to yield.

MAGNETISM, *continued.*

netic properties of flame, air, and gases (published 1845), on dia-magnetism (1845), on magne-crystalline action (1848), on atmospheric magnetism (1850), on the magnetic force 1851-2
 Magnetic observations established in the British colonies under the superintendence of col. Edward Sabine . . . 1840 *et seq.*

Tyndall proves the existence of dia-magnetism polarity 1856
 In the present century our knowledge of the phenomena of magnetism has also been greatly increased by the labours of Arago, Ampère, Hansteen, Gauss, Weber, Poggen-dorff, Sabine, Lamont, Tyndall, Du Moncel, &c.* See *Animal Magnetism*.

MAGNETO-ELECTRICITY. See under *Electricity*. Magneto-electricity has been recently applied to telegraphic and to lighthouse purposes.†

MAGNOLIA. *Magnolia glauca* was brought to these countries from N. America in A.D. 1688. The laurel-leaved Magnolia, *Magnolia grandiflora*, was brought from N. America about 1734. The dwarf Magnolia, *Magnolia pumila*, was brought from China in 1789; and the following varieties also from China, viz. the brown stalked, 1789; the purple, 1790; and the slender, 1804.

MAGYARS. See *Hungary*.

MAHOGANY, is said to have been brought to England by Raleigh, in 1595; and to have come into general use about 1720.

MAHOMETANISM‡ was promulgated A.D. 611. Mahomet asserted that the Koran was revealed to him by the angel Gabriel during a period of twenty-three years. He is said to have been helped by a Jew and two Christians. The dogmas of Mahomet, embodied in the Koran, include—the unity of God, the immortality of the soul, predestination, a last judgment, and a sensual paradise. He enjoined on his disciples circumcision, prayer, alms, frequent ablution, and fasting; and permitted polygamy and concubinage.§

MAHRATTAS, a people of Hindostan, who originally dwelt North-West of the Deccan, which they overran about 1676. They endeavoured to overcome the Mogul, but were restrained by the Afghans. They entered into alliance with the East India Company in 1767, made war against it in 1774, again made peace in 1782, and were finally subdued in 1818. Their last prince, Sindiah, is now a pensioner of the British government.

MAID. See *Holy Maid*, Elizabeth Barton, and *Joan of Arc*, Maid of Orleans.

MAIDA (Calabria), where the French, commanded by general Regnier, were signally defeated by the British under major-general sir John Stuart, July 4, 1806.

MAIDEN. See *Guillotine*.

MAIDS OF HONOUR. Anne, daughter of Francis II. duke of Brittany, and queen of Charles VIII. and Louis XII. of France, was the first to have young and beautiful ladies about her person, called maids of honour. *Phil. de Commines*. When Charles died (1498), she put a *cordelier* (a black knotted lace) round her coat of arms, as a token of mourning, which introduced the custom. The queen of Edward I. of England is said to have had four maids of honour.

* In the Royal Institution, London, is a magnet by Logeman, of Haarlem, constructed on the principles of Dr. Elias, which weighs 100 lbs., and can sustain 430 lbs. Hæcker, of Nuremberg, constructed a magnet weighing 36 grains, capable of sustaining 140 times its own weight. This was exhibited in 1851, also at the Royal Institution.

† The South Foreland Lighthouse, near Dover, was illuminated by the magneto-electric light in the winters of 1838-9 and 1850-60, and at Dengeness in 1861-2. The light excels all other artificial lights in brilliancy, continuance, &c.

‡ Mahomet, or Mohammed, was born at Mecca, A.D. 569; announced himself as a prophet about 611: fled from his enemies to Medina (his flight is called the Hégira), 622; overcomes his enemies, the Koreish, the Jews, &c. 623; defeats the Christians at Muta, 629; is acknowledged as a sovereign 630; dies, June 7, 632—it is said of slow poison, administered by a Jew to test his divine character.—The Mahometans are divided into several sects, the two chief being the *Sonnites*, or the Orthodox, who recognised as caliph Abubeker, the father-in-law of Mahomet, in preference to Omar and Ali; and the *Shiites* (Sectaries), or *Fatimites*, the followers of Ali, who married Fatima, the prophet's daughter. The Ottoman empire is the chief seat of the Sonnites, the sultan being considered the representative of the caliphs; while Persia has been for centuries the stronghold of the Shiites.—The Mahometans conquered Arabia, North Africa, and part of Asia, in the seventh century; in the eighth they invaded Europe, conquering Spain, where they founded the Califat of Cordova, which lasted from 756 to 1031, when it was broken up into smaller governments, the last of which, the kingdom of Grenada, endured till its subjugation by Ferdinand in 1492; but the Mahometans were not finally expelled from Spain till 1609. Their progress in France was stopped by their defeat at Tours by Charles Martel, in 732.—After a long contest, the Turks under Mahomet II. took Constantinople in 1453; he made it his capital and the chief seat of his religion. Though considered to be declining, Mahometanism is calculated as including 100 millions amongst its votaries.

§ It is worth noting that on November 25, 1858, Coomroodén Tyaibjee, a Mahometan, after serving his articles, was duly admitted to practise as an attorney, having taken the oaths upon the Koran. Lord chief-justice Campbell wished him success in his profession.

MAIL-COACHES for the conveyance of letters were first set up at Bristol by Mr. John Palmer, of Bath, Aug. 2, 1784; and were extended to other routes in 1785, at the end of which year they became general in England. The mails had been previously conveyed by carts with a single horse, or by boys on horseback. Mail-coaches were exempted from tolls. These mails led to the prosperity of the post-office. The mails were first sent by rail in 1838.

MAIMING AND WOUNDING. See *Coventry Act*.

MAINE, a province, N.W. France, was seized by William I. of England in 1069. It acknowledged prince Arthur, 1199; and was taken from John of England by Philip of France, 1204; was recovered by Edward III. in 1357; but given up, 1360. After various changes it was finally united to France by Louis XI. in 1481.—**MAINE**, N. America, was discovered by Cabot, 1497; and colonised by the English in 1638; it became a State of the Union in 1820. The boundary line between the British and the United States territories in Maine was settled by the Ashburton treaty, concluded Aug. 9, 1842. The Maine liquor law, prohibiting the manufacture and use of intoxicating drinks with certain exceptions, was enacted in 1851.

MAJESTY. Among the Romans, the emperor and imperial family were addressed by this title. It was assumed by popes and the emperors of Germany. It was first given to Louis XI. of France in 1461. *Voltaire*. Upon Charles V. being chosen emperor of Germany in 1519, the kings of Spain took the style of majesty. Francis I. of France, at the interview with Henry VIII. of England, on the Field of the Cloth of Gold, addressed the latter as Your Majesty, 1520. James I. coupled this title with the term "Sacred," and "Most Excellent."

MAJORCA. See *Balearic Isles* and *Minorca*. Majorca rebelled against Philip V. of Spain in 1714; but submitted, July 14, 1715.

MALABAR (W. coast of Hindostan). The Portuguese established factories here in 1505; the English did the same in 1601.

MALACCA, on the Malay peninsula, East Indies, was a flourishing Portuguese settlement in 1511. The Dutch factories were established in 1640. It now forms part of the British "Straits" settlements, the Dutch government having exchanged it for Bencoolen in Sumatra.

MALAKHOFF, a hill near Sebastopol, on which was situated an old tower, which the Russians strongly fortified during the siege in 1854-5. The allied French and English attacked it on June 17 and 18, 1855, and after a conflict of 48 hours were repulsed with severe loss; that of the English being 175 killed and 1126 wounded; that of the French 3338 killed and wounded. On Sept. 8, the French again attacked the Malakhoff; at 8 o'clock the first mine was sprung, and at noon the French flag floated over the conquered redoubt. See *Sebastopol*. In the Malakhoff and Redan were found 3000 pieces of cannon of every calibre, and 120,000 lbs. of gunpowder.

MALDON (Esséx). This town was built 28 B.C. Some suppose it to have been the first Roman colony in Britain. It was burnt by queen Boadicea, and was rebuilt by the Romans in the first century. It was burnt by the Danes, A.D. 991, and was rebuilt by the Saxons. Maldon was incorporated by Philip and Mary. The singular custom of Borough-English is kept up here, by which the youngest son, and not the eldest, succeeds to the burgage tenure on the death of his father. See *Borough-English*.

MALEGNANO, or **MELEGNANO**, modern names of Marignano, *which see*.

MALICIOUS DAMAGES. The law respecting them was consolidated and amended by 24 & 25 Vict. c. 97. It protects works of art, the electric telegraph, &c., 1861.

MALO, ST. (N.W. France). This port sustained a tremendous bombardment by the English under adm. Benbow in 1693, and under lord Berkeley, in July, 1695. In 1758 the British landed in considerable force in Canealle bay, and went up to the harbour, where they burnt upwards of a hundred ships, and did great damage to the town, making a number of prisoners. It is now defended by a very strong castle, and the harbour is most difficult of access.

MALPLAQUET (N. France). Here the allies under the duke of Marlborough and prince Eugene defeated the French commanded by marshal Villars, September 11, 1709. Each army consisted of nearly 120,000 choice soldiers. There was great slaughter on both sides, the allies losing 18,000 men, which loss was but ill repaid by the capture of Mons.

MALT, barley prepared for brewing and distillation. A duty was laid upon malt in 1667, 1697, *et seq.* Important acts for the regulation of malt duties were passed in 1830 and 1837. In March, 1858, there were 6157 licensed maltsters in the United Kingdom.

MALT, *continued.*

BUSHELS OF MALT MADE IN THE UNITED KINGDOM IN THE FOLLOWING YEARS :—

1825. England	<i>Bushels</i> 29,572,742	1840. England	<i>Bushels</i> 33,376,720
Scotland	3,925,847	Scotland	4,374,328
Ireland	2,706,862	Ireland	1,915,584
	<u>36,205,451</u>		<u>39,666,632</u>

Made in the United Kingdom in 1835, 42,892,012 *bushels*: in 1847, 35,307,815; in 1850, 40,744,752; in 1857, 45,967,461; in 1861, 47,914,614.

MALTA (formerly Melita), an island in the Mediterranean, held successively by the Phenicians, Carthaginians, and Romans, which last conquered it, 259 B.C. The apostle Paul was wrecked here, A.D. 62 (*Acts* xxvii., xxviii.). Malta was taken by the Vandals, 534; by the Arabs 870; and by the Normans from Sicily, 1090. With Sicily it became successively part of the possessions of the houses of Hohenstaufen, Anjou (1266), and Aragon (1260). In 1530 Charles V. gave it to the Knights Hospitallers, who defended it most courageously and successfully against the Turks in 1551 and 1565, when the Turks were obliged to abandon the enterprise after the loss of 30,000 men. The island was taken by general Bonaparte in the outset of his expedition to Egypt, June 12, 1798. He found in it 1200 pieces of cannon, 200,000 lbs. of powder, two ships of the line, a frigate, four galleys, and 40,000 muskets; besides an immense treasure collected by superstition; and 4500 Turkish prisoners, whom he set at liberty. Malta was blockaded by the British in 1798, and taken by major-general Pigot, Sept. 5, 1800; but, at the peace of Amiens, it was stipulated that it should be restored to the knights. The British, however, retained possession, and the war recommenced between the two nations: but by the treaty of Paris, in 1814, the island was guaranteed to Great Britain. La Valetta, the capital, was founded in 1557 by the grand master La Valetta. The Protestant College was founded in 1846.

MALTA, KNIGHTS OF. A military-religious order, called also Hospitallers of St. John of Jerusalem, Knights of St. John, and Knights of Rhodes. Some merchants of Malfi, trading to the Levant, obtained leave of the caliph of Egypt to build a house for those who came on pilgrimage to Jerusalem, and whom they received with zeal and charity, A.D. 1048. They afterwards founded a hospital for the reception of pilgrims, from whence they were called Hospitallers (Latin *hospes*, a guest). The military order was founded about 1099; confirmed by the pope in 1113. In 1119 the knights defeated the Turks at Antioch. After the Christians had lost their interest in the East, and Jerusalem was taken, the knights retired to Acre, which they defended valiantly in 1290. They next followed John, king of Cyprus, who gave them Limisso in his dominions, where they stayed till 1310, in which year they took Rhodes, under their grand master De Vallaret, and the next year defended it under the duke of Savoy against an army of Saracens; since when, his successors have used F. E. R. T. for their device, that is *Fortitudo ejus Rhodum tenuit*, or, His valour kept Rhodes. From this they were called *knights of Rhodes*; but Rhodes being taken by Solymán in 1522, they retired into Candia, thence into Sicily. Pope Adrian VI. granted them the city of Viterbo for their retreat; and in 1530 the emperor Charles V. gave them the isle of Malta. The order was suppressed in England in 1540; restored in 1557; and again suppressed in 1559. St. John's Gate, Clerkenwell, a relic of their possessions, still exists. The emperor Paul of Russia declared himself grand master of the order in June, 1799.

MAMELUKES, originally Turkish and Circassian slaves, established by the sultan as a kind of body-guard, A.D. 1230. They advanced one of their own corps to the throne, about 1250, and continued to do so until Egypt became a Turkish province, in 1517, when the beys took them into pay, and filled up their ranks with reëgades from various countries. On the conquest of Egypt by Bonaparte, in 1798, they retreated into Nubia; but, assisted by the Arnauts, they once more wrested Egypt from the Turkish government. On March 1, 1811, they were decoyed into the power of the Turkish pacha, Mehemet Ali, and slain at Cairo to the number of 1600. In 1804, Napoleon embodied some of them in his guard.

MAMMOTH, an extinct species of Elephant. An entire mammoth, flesh and bones, was discovered in Siberia in 1799. Remains of this animal have since been found at Harwich in 1803, and at places in Europe, Asia, and America.

MAN, ANTIQUITY OF. In 1846, M. Boucher de Perthes found some rude flint implements mingled with bones of extinct animals; in the old alluvium near Abbeville in Picardy, France. Similar flints have since been found in Sicily by Dr. Falconer, and at Brixham by Mr. Pengelly. Hence many geologists infer that man existed on the earth much earlier than has been hitherto believed.

MAN, ISLE OF, was subdued by Edward, king of Northumberland, A.D. 621; by Magnus of Norway, 1092; ceded to the Scots, 1266; and taken from them in 1344, by Montacute, afterwards earl of Salisbury, to whom Edward I. gave the title of king of Man, in 1343. It was afterwards subjected to the earl of Northumberland, on whose attainder Henry IV. granted it in fee to Sir John Stanley, 1406; it was taken from this family by Elizabeth, but was restored in 1608, to the earl of Derby, through whom it fell by inheritance to the duke of Athol, 1735. He received 70,000*l.* from parliament for the sovereignty in 1765; and the nation was charged with the further sum of 132,944*l.* for the purchase of his interest in the revenues of the island in Jan. 1829. The countess of Derby held the isle against the parliament forces in 1651.

MAN, BISHOPRIC OF, is said to have been presided over by Amphibalus about A.D. 360. Some assert that St. Patrick was the founder of the see, and that Germanus was the first bishop; about 447. It was united to Sodor in 1113. The bishop has no seat in the House of Lords; but lord Auckland (bishop 1847-54) sat by right of his barony. Present income 2000*l.*

RECENT BISHOPS OF SODOR AND MAN.

1784. Claudius Crigan; died in 1813.	1841. Thos. Vowler Short, translated to St. Asaph in 1846.
1813. George Murray, translated to Rochester in 1827.	1846. Walter Augustus Shirley; died in 1847.
1828. William Ward; died in 1838.	1847. John Eden (lord Auckland), translated to Bath in 1854.
1838. James Bowstead, translated to Lichfield in Dec. 1839.	1854. Hon. Horatio Powys (present bishop, 1862).
1840. Henry Pepps, translated to Worcester in 1841.	

MANASSAS JUNCTION, Virginia, United States, an important military position, where the Alexandria and Manassas Gap railways meet, near a creek named Bull Run. It was held by the Confederates in 1861, when they were attacked by the Federal general Irvin McDowell. He began his march from Washington on July 16, and gained some advantage on the 18th at Centreville. On the 21st was fought the first battle of Bull Run. The Federals, who began the fight, had the advantage, till about 3 o'clock, P.M., when the Confederate general Johnston brought up reinforcements, which at first the Federals took for their own troops. After a brief resistance, the latter were seized with sudden panic, and, in spite of the utmost efforts of their officers, fled in disgraceful rout, abandoning a large quantity of arms, ammunition, and baggage. The Confederate generals Johnston and Beauregard did not think it prudent to pursue the fugitives, who did not halt till they arrived at Washington. The Federal army is said to have had 481 killed, 1011 wounded, 1246 missing. The loss of the Confederates was stated to be about 1500.—In March 1862, when the army of the Potomac, under general McClellan, marched into Virginia, they found that the Confederates had quietly retreated from the camp at Manassas. On August 30, 1862, this place was the site of another great battle between the northern and southern armies. In August, general "Stonewall" Jackson, after compelling the Federal general Pope to retreat, defeated him at Cedar mountain on the 9th, turned his flank on the 22nd, and arriving at Manassas repulsed his attacks on the 29th. On the 30th general R. E. Lee (who had defeated general McClellan and the invading northern army before Richmond, June 26 to July 1), joined Jackson with his army, and Pope received reinforcements from Washington. A desperate conflict ensued, which ended in the Confederates gaining a decisive victory, compelling the Federals to a hasty retreat to Centreville, where they were once more routed, Sept. 1. The remains of their army took refuge behind the lines of Washington on Sept. 2. Pope was at once superseded, and McClellan resumed the command to march against the Confederates, who had crossed the Potomac and entered Maryland. See *United States*.

MANCHESTER (Lancashire) is very ancient. In the time of the Druids it was distinguished as one of the principal stations of their priests, and celebrated for the privilege of sanctuary attached to its altar, which, in the British language was called *Meyne*, signifying a stone. Prior to the Christian era it was one of the principal seats of the Brigantes, who had a castle, or stronghold, called *Mancheion*, or the place of tents, near the confluence of the rivers Medlock and Irwell, the site of which, still called the "Castle Field," was, about the year 79, selected by the Romans, on their conquest of this part of the island under Agricola, as the station of the *Cohors Prima Frisiorum*, and, with reference to its original British name, called by them *Manconium*; hence its Saxon name *Mancestre*, from which its modern appellation is derived. *Lewis' Topog. Dict.*

Mancheion taken from the Britons A.D. 488	"Manchester cottons" introduced A.D. 1352
Captured by Edwin of Northumbria 620	The church made collegiate 1421
The inhabitants become Christians about 627	Free Grammar-school founded 1516
The town taken by the Danes, 877; retaken 923	The privilege of sanctuary removed to Chester about 1541

Sir John Potter, a benefactor to the town, died,	
	Oct. 25, 1858
British Association meet here (2nd time)	Sept. 1861

MANCHESTER, BISHOPRIC OF. An order in council in Oct. 1838, declared that the sees of St. Asaph and Bangor should be united on the next vacancy in either, and that the bishopric of Manchester should be immediately created within the jurisdiction of the archiepiscopal see of York; the county of Lancaster for that purpose to be detached from Chester. By act 10 Vict. (1847) the sees of St. Asaph and Bangor were to exist undisturbed, and that of Manchester was to be created. The rev. Dr. James Prince Lee (the present bishop, 1862) was appointed in 1847, and consecrated in 1848. Income, 4200*l.*

MANES, the name applied by the ancients to the soul when separated from the body. The manes were reckoned among the infernal deities, and were generally supposed to preside over the burial-places and monuments of the dead. They were solemnly worshipped by the Romans, and invoked by the augurs; Virgil (22 B.C.) introduces his hero as sacrificing to the Manes. The Romans superscribed their epitaphs with D. M., *Dis Manibus*.

* Called *Peterloo*. The assembly consisted of from 60,000 to 100,000 persons, men, women, and children. Mr. Hunt, who took the chair, had spoken a few words, when the meeting was suddenly assailed by a charge of the Manchester cavalry, assisted by a Cheshire regiment of yeomanry, and a regiment of hussars, the outlets being occupied by other military detachments. The unarmed multitude were in consequence driven one upon another, by which many were killed, ridden over by the horses, or cut down by their riders. The deaths were 11 men, women, and children, and the wounded about 600.

† The temporary building consisted of a hall upwards of 700 feet long and 100 feet wide, and including a transept, covered an area of 80,000 square feet. It cost above 25,000*l.* It contained the most extraordinary collection of works of art (valued at 6,000,000*l.*) ever brought together in this country. The collection of national portraits was very remarkable. There were 1,300,000 visitors. The expenses of the undertaking amounted to 99,500*l.*; the receipts to 98,500*l.*

MANGANESE. Black oxide of manganese, long used to decolorise glass, and *Magnesia nigra*, was formerly included among the ores of iron. Its distinctive character was proved by the researches of Pott (1740), Kaim and Winterl (1770), and Scheele and Bergmann (1774); it was first eliminated by Gahn. Manganese combined with sulphur is called mineral chameleon, from its rapid change of colour under certain circumstances. Forchhammer employed it as a test for the presence of organic matter in water; and Berzelius and Smith successfully applied this test to air in 1858.

MANICHEANS, a sect founded by Manes, which began to infest the East about 260. It spread into Egypt, Arabia, and Africa, and particularly into Persia. A rich widow, whose servant Manes had been, left him much wealth, after which he assumed the title of apostle, or envoy of Jesus Christ, and announced that he was the paraclete or comforter that Christ had promised to send. He maintained two principles, the one good and the other bad; the first he called light, which did nothing but good, and the second he called darkness, which did nothing but evil. He rejected the Old Testament, and composed a system of doctrine from Christianity and the dogmas of the ancient fire-worshippers. He obtained many followers. Sapor, king of Persia, believed in him at one time; but afterwards he burnt him. He was burnt alive by Bahram or Varanes, king of Persia, A.D. 274. His doctrines spread themselves over the Roman empire, and several sects sprang from them.

MANILLA (built about 1573), capital of the Philippine Isles, a great mart of Spanish commerce. 3000 persons perished here by an earthquake in 1645. Manilla was taken by the English in 1757; and again in Oct. 1762, by storm. The archbishop engaged to ransom it for about a million sterling; never wholly paid. Manilla was nearly destroyed by an earthquake in Sept. 22, 1852.

MANNHEIM (S. Germany), founded in A.D. 1606, became the court residence of the Palatine of the Rhine in 1719; but his becoming elector of Bavaria in 1777 caused the removal of the court to Munich. Mannheim surrendered to the French, under command of general Pichegru, Sept. 20, 1795. On Oct. 31, the Austrians under general Windisch defeated the French near the city. Several battles were fought with various success in the neighbourhood during the late wars. Kotzebue, the popular dramatist, was assassinated at Mannheim, by a student of Wurtzburg, named Sand, April 2, 1819.

MANORS are as ancient as the Saxon constitution, and imply a territorial dominion with the jurisdiction, rights, and perquisites belonging to it. They were formerly called baronies, and still are lordships. Each lord was empowered to hold a court called the court-baron for redressing misdemeanors, and settling disputes between the tenants. *Cabinet Lawyer.*

MANSION-HOUSE, LONDON. The residence of the lord mayor. It is situate at the east end of the Poultry, on the site of the ancient stock's-market. It was built of Portland stone by Dance the elder, 1739-53. See *Mayor*.

MANSOURAH (Lower Egypt). Here Louis IX. was defeated by the Saracens and taken prisoner, April 5, 1250. He gave Damietta and 400,000 livres for his ransom.

MANTINEA (Arcadia, Greece), BATTLES here, (1) Athenians and Argives defeated by Agis II. of Sparta, 418 B.C. (2) Between Epaminondas and the Thebans, and the combined forces of Lacedæmon, Achaia, Elis, Athens, and Arcadia, 362 B.C. The Theban general was victorious, but was killed in the engagement, and from that Thebes lost its power and consequence among the Grecian states. The emperor Adrian built a temple at Mantinea in honour of his favourite Alcinoüs. The town was also called Antigonía.

MANTUA (N. Italy). Virgil was born at a village near this city, 70 B.C. Hence he is often styled the Mantuan bard. Mantua was ruled by the Gonzagas, lords of Mantua, from 1328 to 1708, when it was seized by the emperor Joseph I. It has since been held by the Austrians. Mantua surrendered to the French, Feb. 2, 1797, after a siege of eight months. It was retaken by the Austrian and Russian army, July 30, 1799, after a short siege. In 1800, after the battle of Marengo, the French again obtained possession of it. It was included in the kingdom of Italy till 1814, when it was restored to the Austrians.

MANUFACTURES. See *Silk, Cotton, &c.* **MAORIS.** See *New Zealand*.

MAPLE-TREE. The *Acer rubrum*, or scarlet-maple, was brought here from N. America, before A.D. 1656. The *Acer Negundo*, or ash-leaved maple, before 1688. From the *Acer saccharinum* (introduced here in 1735) the Americans make very good sugar.

MAPS. See *Charts and Mercator*.

MARATHON (in Attica). Here, on Sept. 28 or 29, 490 B.C., the Greeks, only 10,000 strong, defeated the Persian army amounting to 500,000, who had 200,000 killed. The

former were commanded by Miltiades, Aristides, and Themistocles. Among the slain was Hippias, the instigator of the war. The Persian army was forced to retreat to Asia.

MARBLE. Dipœnus and Scyllis, statuarys of Crete, were the first artists who sculptured marble, and polished their works; all statues previously being of wood, 568 B.C. *Pliny*. The edifices and monuments of Rome were constructed of, or ornamented with, fine marble. The ruins of Palmyra are chiefly of white marble.

MARBURG (W. Germany). The cathedral was founded, 1231; and the first Protestant university in 1527. It suffered much during the Seven years' war, 1753-60.

MARCH, the first month of the year, until Numa added January and February, 713 B.C. Romulus, who divided the year into months, gave to this month the name of his supposed father, Mars; though Ovid observes, that the people of Italy had the month of March before the time of Romulus, but that they placed it very differently in the calendar. The year formerly commenced on the 25th day of this month. See *Year*.

MARCHES, LORDS OR, noblemen who lived on boundaries settled between England and Wales, and England and Scotland, and, according to Camden, had their laws, and power of life, death, &c., like petty princes. These powers were abolished, 1535, and 1547.

MARCIONITES, heretics, followers of Marcion, about A.D. 150, who preceded the Manichees, and taught similar doctrines. *Cave*.

MARCOMANNI, a people of Southern Germany, expelled the Boii from Bohemia, and united with other tribes, invaded Italy about A.D. 167, but were repelled by the emperors Antoninus and Verus; defeated by the Legion called, from a fabled miracle, the Thundering Legion, 179: and finally driven beyond the Danube by Aurelian, 271.

MARENGO, N. Italy. Here the French army, commanded by Bonaparte, attacked the Austrians: after prodigies of valour, his army was retreating, when the timely arrival of general Dessaix (mortally wounded in the action) turned the fortunes of the day. The slaughter on both sides was dreadful: the Austrians lost 6000 in killed, 12,000 in prisoners, and 45 pieces of cannon; and though the French boasted that the loss on their side did not much exceed 3000 men, it was afterwards known to be vastly more, June 14, 1800. By a treaty between the Austrian general Melas and Bonaparte, signed on the next day, the latter obtained twelve strong fortresses, and became, in fact, the master of Italy.

MARESCHALS, or MARSHALS, in France, were the esquires of the king, and originally had the command of the vanguard to observe the enemy and to choose proper places for its encampment. Till the time of Francis I., in 1515, there were but two marshals, who had 500 livres per annum in war, but no stipend in time of peace. The rank afterwards became of the highest military importance, the number was without limit, and the command supreme. Napoleon's marshals were renowned for skill and courage. See *Marshal*.

MARIAN PERSECUTION. See *Protestants*.

MARIGNANO (now MALEGNANO), N. Italy, near Milan. Three battles have been fought near here, 1. Francis I. of France defeated the duke of Milan and the Swiss, Sept. 13, 14, 1515; above 20,000 men were slain. This conflict has been called the Battle of the Giants.—2. Near here was fought the battle of Pavia (*which see*).—3. After the battle of Magenta, June 4, 1859, the Austrians entrenched themselves at Malegnano. The emperor sent marshal Baraguay d'Hilliers with 16,000 men to dislodge them, which he did with a loss of about 850 killed and wounded. The Austrians are said to have lost 1400 killed and wounded, and 900 prisoners, out of 18,000 engaged.

MARINE FORCES. Marines were first established with the object of forming a nursery to man the fleet. An order in council, dated 16 Oct. 1664, authorised 1200 soldiers to be raised and formed into one regiment. In 1684, the 3rd regiment of the line was called the Marine Regiment; but the system of having soldiers exclusively for sea-service was not carried into effect until 1698, when two marine regiments were formed. More regiments were embodied in subsequent years; and in 1741 the corps consisted of ten regiments, each 1000 strong. In 1759 they numbered 18,000 men. In the latter years of the French war ending in 1815, they amounted to 31,400, but there were frequently more than 3000 supernumeraries. The *jollies*, as they are called, frequently distinguished themselves. The vote for 1857 was for 16,000 marines, inclusive of 1500 artillery. *P. H. Nicolas*.

MARINER'S COMPASS. See *Compass* and *Magnetism*.

MARINO, SAN, a republic in Central Italy, has existed since the sixth century. Its independence confirmed by pope Pius VII. in 1817. Population in 1858, about 8000.

MARK. This coin originated among the northern nations, and the name *mark-lubs* is still retained in Denmark, as money of account. The mark was a general continental coin, of silver. *Ashc.* In England, the mark means the sum of thirteen shillings and fourpence; and here the name is also retained in particular cases of fines being adjudged against infractors of the law in criminal courts. *Ashc.*

MARKET. See *Smithfield* and *Metropolitan Cattle Market*.

MARK'S, ST., Venice. The church was erected in 829; the piazza in 1592.

MARLBOROUGH, STATUTES OF, were enacted in the castle of Marlborough, in Wiltshire, 1267. Some are still referred to.—**MARLBOROUGH HOUSE,** Pall Mall, London, was built by Wren for the duke of Marlborough, 1709-10; was bought for the princess Charlotte and prince Leopold in 1817; held by queen Adelaide till 1849. It is to be the residence of the prince of Wales.

MARONITES, Christians in the East, followers of one Maron in the fifth century; they are said to have embraced the errors of the Jacobites, Nestorians, and Monothelites: in 1180 they numbered 40,000, living in the neighbourhood of Mount Libanus, and, being a brave people, they were of great service to the Christian kings of Jerusalem. They were reconciled to the church of Rome about the 12th century. For an account of the massacres of the Maronites in 1860, see *Druses*.

MAROONS, a name given in Jamaica to runaway negroes. When the island was conquered from the Spaniards, a number of their negroes fled to the hills and became very troublesome to the colonists. A war of eight years' duration ensued, when the Maroons capitulated on being permitted to retain their free settlements, about 1730. In 1795 they again took arms, but were speedily put down and transported to Nova Scotia. *Brande.*

MAR-PRELATE TRACTS, virulently attacking episcopacy, were written, it is believed, by Henry Penry, who was cruelly executed, May 29, 1693, for having written seditious words against the queen (found about his person when seized). The tracts appeared about 1586. Some had very singular titles: such as "An Almand for a Parrat," "Hay any Worke for Cooper?" &c. They were collected and reprinted in 1843.

MARQUE, LETTERS OF. See *Privateering*.

MARQUESAS ISLANDS (Polynesia), were discovered in 1595 by Mendana, who named them after the viceroy of Peru, Marquesa de Mendoza. They were visited by Cook in 1774, and were taken possession of by the French admiral Dupetit Thouars, May 1, 1842.

MARQUESS, a dignity, called by the Saxons Markin-Reve, by the Germans Markgrave, took its original from Mark or March, a limit or bound (see *Marches*); and their office being to guard or govern the frontiers of a province. It is the next place of honour to a duke, and was introduced several years after that title had been established in England. The first on whom it was conferred was the favourite of king Richard II., Robert de Vere, earl of Oxford, created marquess of Dublin, and placed in parliament between the dukes and earls, 1385. James Stewart, second son of James III. of Scotland, was made marquess of Ormond, in 1476 without territories; afterwards earl of Ross.

MARRIAGE was instituted by God (*Gen. ii.*), and confirmed by Christ (*Mark x.*), who performed a miracle at the celebration of one (*John ii.*). Matrimonial ceremonies among the Greeks are ascribed to Cærops, king of Athens, 1554 B.C.

ROYAL MARRIAGE ACT, was passed in 1772, in consequence of the marriage of the duke of Gloucester, the king's brother, with the widow of the earl Waldegrave, and of the duke of Cumberland with the widow of colonel Horton and daughter of lord Ingham. [By this act, none of the descendants of George II., unless of foreign birth, can marry under the age of twenty-five, unless with the consent of the king: at and after that age, the consent of parliament is necessary to render the marriage valid.] The marriage of the duke of Sussex with the lady Augusta Murray, solemnised in 1793, was pronounced illegal, and the claims of their son, sir Augustus d'Este, declared invalid, by the House of Lords, July 9, 1844.

HALF MARRIAGE. *Semi-Matrimonium.* Among the Romans concubinage was a legitimate union, not merely tolerated but authorised. The concubine had the name of *semi-coniux*. They might have either a wife or a concubine, provided they had not both together. Constantine the Great checked concubinage, but did not abolish it. This ancient custom of the Romans was preserved, not only among the Lombards, but by the French when they held dominion in that country. Cujas assures us that the Gascons and other people bordering on the Pyrenean mountains had not relinquished this custom in his time, 1590. The women bore the name of "wives of the second order." *Hénault.* See *Morganatic Marriages.*

DOUBLE MARRIAGES. There are some instances of a husband and two wives (but they are very rare) in

countries where polygamy was interdicted by the state. The first Lacedæmonian who had two wives was Anaxandrides, the son of Leon, about 510 B.C. Dionysius of Syracuse married two wives, viz: Doris, the daughter of Xenetus, and Aristomache, sister of Dion, 398 B.C. It is said that the count Gleichen, a German nobleman, was permitted under peculiar circumstances, by Gregory IX. in A.D. 1237, to marry and live with two wives. The Mormonites practise and encourage polygamy.

FORCED MARRIAGES. The statute 3 Henry VII. 1487, made the principal and abettors in marriages with heiresses, &c. contrary to their will, equally guilty as felons. By 39 Eliz. 1596, such felons were denied the benefit of clergy. This offence was made punishable by transportation, 1 Geo. IV. 1820. The remarkable case of Miss Wharton, heiress of the house of Wharton, whom captain Campbell married by force, occurred in William III.'s reign. Sir John Johnston was hanged for seizing the young lady, and the marriage was annulled by parliament 1650.—Edward Gibbon Wakefield was tried at Lancaster, and found guilty of the felonious abduction of Miss Turner, March 24, 1827; and his marriage with her was immediately dissolved by act of parliament.

MARRIAGES BY SALE. Among the Babylonians, at a certain time every year, the marriageable females were assembled, and disposed of to the best bidder. This custom is said to have originated with Atossa, daughter of Belochus, about 1433 B.C.

FLEET MARRIAGES. See *Fleet*.

MARSEILLAISE HYMN. The words and music are ascribed to Rouget de Lille, a French engineer officer, who composed it at the request of marshal Lucknow, in 1791, to cheer the conscripts at Strasburg. It derived its name from some troops from Marseilles marching into Paris to the tune in 1792. *Brande.*

MARSEILLES, the ancient *Massilia* (S. France), a maritime city, founded by the Phœceans about 600 B.C.; an ally of Rome, 218 B.C. Cicero styled it the Athens of Gaul, on account of its excellent schools.

Taken by Julius Cæsar after a long and terrible siege 45 B.C.; and by Eurie the Visigoth, A.D. 470, and was sacked by the Saracens . . . A.D. 839.

MARSHALS. Two were appointed in London to clear the streets of vagrants, and to send the sick, blind, and lame to asylums and hospitals for relief, 1567. *Northouck.*

MARSHALS, BRITISH FIELD-. This rank was first conferred upon John, duke of Argyll, and George, earl of Orkney, by George II. in 1736. See *Marsschal*.

* Of these marriages it is stated in the registrar's returns, that 47,570 men and 70,601 women could not write, and that they signed the marriage register with their marks.—In France, the marriages were 208,893 in 1820; 243,674 in 1825; and 259,177 in 1830. As respects Paris, the statistics of that city, which are very minute and curious, furnish the following classes as occurring in 7754 marriages—Bachelors and maids, 6456; bachelors and widows, 368; widowers and maids, 708; widowers and widows, 222.

MARSHALS OF FRANCE, &c., appointed by Napoleon I. during his wars, 1804-14.

Arrighi, duke of Padua.	Murat, king of Naples, executed Oct. 13, 1815.
Augereau, duke of Castiglione.	Ney, prince of Moskwa, executed Dec. 7, 1815.
Bernadotte, prince of Ponte Corvo: afterwards king of Sweden.	Oudinot, duke of Reggio.
Berthier, prince of Neufchâtel and Wagram, committed suicide at Bamberg, 1815.	Soult, duke of Dalmatia.
Bessieres, duke of Istria.	Suclet, duke of Albufera.
Davoust, prince of Eckmühl and duke of Auerstadt.	Victor, duke of Belluno.
Jourdan, peer of France.	
Junot, duke of Abrantes.	
Kellerman, duke of Vainay.	
Laanes, duke of Montebello, killed at Aspern, 1809.	
Lefebvre, duke of Dantzig.	
Macdonald, duke of Tarento.	
Marmont, duke of Ragusa.	
Massena, prince of Essling and duke of Rivoli.	
Moncey, duke of Conegliano.	
Mortier, duke of Treviso, killed by Fieschi, July 28, 1835.	

OFFICERS OF STATE.

Cambacérés, duke of Parma.
Caulaincourt, duke of Vicenza.
Champagne, duke of Cadore.
Duroc, duke of Friuli, killed at Bautzen, 1813.
Fouché, duke of Otranto.
Le Brun, duke of Piacenza.
Marot, duke of Bassano.
Savary, duke of Rovigo, and
Talleyrand de Perigord, prince of Benevento, died 1838.

MARSHALSEA COURT of the Queen's house was very ancient, of high dignity, and coeval with the common law. Since the decision of the case of the Marshalsea (see *Lord Coke's 10 Rep. 68*) no business had been done in this court; but it was regularly opened and adjourned at the same time with the Palace court, created in 1665; the judges and other officers being the same as in the Palace court. See *Palace Court*. The Marshalsea court was altogether discontinued, Dec. 31, 1849.

MARSI, a brave people of Southern Italy, who, after several contests, yielded to the Romans, about 301 B.C. During the civil wars they and their allies rebelled, having demanded and been refused the rights of Roman citizenship, 91 B.C. After many successes and reverses, they sued for and obtained peace and the rights they required, 87 B.C. The Marsi being *Socii* of the Romans, this was called the *Social war*.

MARSTON MOOR (near York). The Scots and parliamentary army were besieging York, when prince Rupert, joined by the marquess of Newcastle, determined to raise the siege. Both sides drew up on Marston Moor, to the number of fifty thousand, and the contest was long undecided. Rupert, commanding the right wing of the royalists, was opposed by Oliver Cromwell, at the head of a body of troops whom he had taken care to levy and discipline. Cromwell was victorious; he drove his opponents off the field, followed the vanquished, returned to a second engagement and a second victory. The prince's whole train of artillery was taken, and the royalists never afterwards recovered the blow; fought July 2, 1644.

MARTELLO TOWERS were circular buildings of masonry erected in the beginning of the present century, on the coast of England, as defences against invasion.

MARTIAL LAW. See *Courts-Martial* and *Military Law*.

MARTINIQUE (West Indies), settled by France, 1635. This and the adjacent isles of St. Lucia and St. Vincent, and the Grenadines, were taken by the British from the French in February, 1762. They were restored to France at the peace of the following year. They were again taken, March 16, 1794; were restored at the peace of Amiens in 1802; and were again captured, Feb. 23, 1809. A revolution took place in this island in favour of Napoleon, but it was finally suppressed by the British, June 1, 1815, and Martinique reverted to its French masters. Severe earthquakes occurred here in 1767 and 1839.

MARTINMAS, the feast of St. Martin, bishop of Tours, in the fourth century, is observed on Nov. 11. In many parts of the north of England, and of Scotland, it continues to be one of the quarter-days for receiving rents.

MARTIN'S HALL, ST., Long Acre, London, was opened as a concert-room for Mr. John Hullah on Feb. 11, 1850; burnt down, Aug. 26, 1860; and rebuilt, 1861.

MARTYRS. Stephen, the first Christian martyr, was stoned A.D. 33. The festivals of the martyrs are, many of them, of very ancient date, and took their rise about the time of Polycarp, who suffered martyrdom about A.D. 166. England has had martyrs. See *Persecutions* and *Protestants*.

MARYLAND, one of the first thirteen United States of North America, was granted in 1632 by lord Baltimore, and settled by a company of English Romanists in 1634. It contains the district of Colombia, in which Washington is situate. It continued in the Union when the other slave states seceded in 1860 and 1861. The Confederate army under general Lee, after their victory at Bull Run, Aug. 30, 1862, crossed the Potomac and entered

Maryland. They were followed by the Federal army under McClellan. Severe conflicts ensued, especially on Sept. 17, at Antietam Creek, with great loss on both sides, each claiming the victory. The Confederates retired into Virginia, in good order, and it is said with much booty.

MASKS. Poppæa, the wife of Nero, is said to have invented the mask to guard her complexion from the sun; but theatrical masks were in use among the Greeks and Romans. Horace attributes them to Æschylus; yet Aristotle says the inventor and time of their introduction were unknown.—Modern masks, and muffs, fans, and false hair for the women, were devised by the harlots of Italy, and brought to England from France in 1572. *Slow.*

MASQUERADES were in fashion in the court of Edward III., 1340; and in the reign of Charles, 1660, masquerades were frequent among the citizens. The bishops preached against them, and made such representations as occasioned their suppression, 9 Geo. I. 1724. [No less than six masquerades were subscribed for in a month at this time.] They were revived, and carried to shameful excess by connivance of the government, and in direct violation of the laws, and tickets of admission to a masquerade at Ranelagh were on some occasions subscribed for at twenty-five guineas each, 1776. *Morrimer.* At the close of a bal masqué, March 5, 1856, Covent-garden theatre was destroyed by fire.

MASS, in the Roman Church, is the office or prayers used at the celebration of the eucharist, in memory of the passion of Christ, and to this every part of the service alludes. The general division consists in high and low: the first is that sung by the choristers, and celebrated with the assistance of a deacon and sub-deacon; low masses are those in which the prayers are badly rehearsed without singing. Mass was first celebrated in Latin about A.D. 394; it was introduced into England in the seventh century. Prostration was enjoined at the elevation of the host in 1201.*

MASSACHUSETTS (New England, N. America), the seat of the first English settlement, 1620. It joined the first congress of the States in 1774. See *United States.*

MASSACRES. The following are among the most remarkable:—

BEFORE CHRIST.

Of all the Carthaginians in Sicily, 397 B.C.
2000 Tyrians crucified and 8000 put to the sword for not surrendering Tyre to Alexander, 331 B.C.
Of 2000 Capuans, friends of Hannibal, by Gracchus, 211 B.C.
A dreadful slaughter of the Teutones and Ambrones, near Aix, by Marius, the Roman general, 200,000 being left dead on the spot, 102 B.C.
The Romans throughout Asia, women and children not excepted, massacred in one day, by order of Mithridates, king of Pontus, 88 B.C.
A great number of Roman senators massacred by Cinna, Marius, and Sertorius, 87 B.C.
Again, under Sylla and Catiline, his minister of vengeance, 82 B.C.
At Perugia, Octavianus Cæsar ordered 300 Roman senators and other persons of distinction to be sacrificed to the manes of Julius Cæsar, 40 B.C.

AFTER CHRIST.

At the destruction of Jerusalem, 1,100,000 of Jews are said to have been put to the sword, A.D. 70.
The Jews, headed by one Andre, put to death 100,000 Greeks and Romans, in and near Cyrene, A.D. 115.
Cassius, a Roman general, under the emperor M. Aurelius, put to death 300,000 of the inhabitants of Seleucia, A.D. 165.
At Alexandria, many thousands of citizens are massacred by order of Antoninus, A.D. 215.
The emperor Probus is said to have put to death 400,000 of the barbarian invaders of Gaul, A.D. 277.
Of the Gothic hostages by Valens, A.D. 378.
Of Thessalonica, when 7000 persons involved into the circus were put to the sword, by order of Theodosius, A.D. 390.
Of the circus factions at Constantinople, A.D. 532.
Massacre of the Latins at Constantinople by order of Andronicus, A.D. 1184.

Of the Albigenses and Waldenses, commenced at Toulouse, A.D. 1208. Thousands perished by the sword and gibbet of the French in Sicily, A.D. 1282. See *Sicilian Vespers.*
At Paris, of the Armagnacs, at the instance of John, duke of Burgundy, A.D. 1418.
Of the Swedish nobility, at a feast, by order of Christian II., A.D. 1520.
Of 70,000 Huguenots, or French Protestants, in France. See *St. Bartholomew*, Aug. 24, 1572.
Of the Christians in Croatia, by the Turks, when 65,000 were slain, A.D. 1592.
Of the pretender Demetrius, and his Polish adherents, May 27, 1606.
Of Protestants at Thorn, put to death under a pretended legal sentence of the chancellor of Poland, for being concerned in a tumult occasioned by a Roman Catholic procession, A.D. 1724. All the Protestant powers in Europe interceded to have this unjust sentence revoked, but unavailingly.
At Batavia 12,000 Chinese were massacred by the natives. October, 1740, under the pretext of an intended insurrection.
At the taking of Ismail by the Russians, 30,000 old and young were slain. December, 1790. See *Ismail*.
Of French Royalists. See *Septembriziers*, Sept. 2, 1792.
Of Poles, at Praga, 1794.
In St. Domingo, where Dessalines made proclamation for the massacre of all the whites, March 29, 1804, and many thousands perished.
Insurrection at Madrid, and massacre of the French, May 2, 1808.
Massacre of the Mamelukes, in the citadel of Cairo, March 1, 1811.
Massacre of Protestants at Nismes, perpetrated by the Catholics, May 1815.
Massacre at Scio, April 22, 1822. See *Chios*.
Destruction of the Janissaries at Constantinople (some say 16,000, others 20,000 killed), June 14, 1826.
Massacre of Christians at Aleppo. Oct. 16, 1850.

* Dr. Daniel Rock, in his work entitled "The Church of our Fathers" (1849), gives a full account of an ancient MS. of "The Service of the Mass, called the Rite of Salisbury," compiled for that cathedral, by St. Osmond and others, from the end of the eleventh to the end of the twelfth century.

MASSACRES, *continued.*

Of Maronites, by the Druses, in Lebanon, June, 1860; and of Christians, by the Mahometans at Damascus, July 9-11, 1860. See *Druses* and *Damascus*.

MASSACRES IN BRITISH HISTORY.

Of 300 English nobles on Salisbury Plain, by Hen-
gist, about A.D. 450.
Of the monks of Bangor, to the number of 1200, by
Ethelfrid, king of Bernicia, A.D. 607 or 612.
Of the Danes in the southern counties of England,
in the night of November 13, 1002, and the 23rd
Ethelred II. At London it was most bloody, the
churches being no sanctuary. Amongst the rest
was Gunilda, sister of Swein, king of Denmark,
left in hostage for the performance of a treaty but
newly concluded. *Baker's Chronicle*.
Of the Jews, in England. Some few pressing into
Westminster Hall at Richard I.'s coronation, were
put to death by the people; and a false alarm
being given that the king had ordered a general
massacre of them, the people in many parts of
England slew all they met. In York 500, who had
taken shelter in the castle, killed themselves, rather
than fall into the hands of the multitude, A.D. 1189.
Of the Bristol colonists, at Cullen's Wood, Ireland.
See *Cullen's Wood*, A.D. 1203.

Of the English factory at Amboyna, in order to dis-
possess its members of the Spice Islands, A.D.
Feb. 1624.

Massacre of the Protestants in Ireland, in O'Neill's
rebellion, Oct. 23, 1641. Upwards of 30,000
British were killed in the commencement of this
rebellion. *Sir William Petty*. In the first three or
four days of it, forty or fifty thousand of the Pro-
testants were destroyed. *Lord Clarendon*. Before
the rebellion was entirely suppressed, 154,000
Protestants were massacred. *Sir W. Temple*.
Of the MacDonalds of Glencoe. See *Glencoe*. Feb.
13, 1692.

Of 184 men, women, and children, chiefly Protes-
tants, burnt, shot, or pierced to death by pikes:
perpetrated by the insurgent Irish, at the barn of
Scullabogue, Ireland, in 1798. *Mesgrave*.
Of Europeans at Meerut, Delhi, &c., by mutineers
of the native Indian army. See *India*, May and
June, 1857.

Of Europeans at Kalangan, on the south coast of
Borneo, May 1, 1859. Among the sufferers was
Mr. James Motley, aged 37, an eminent geologist
and naturalist. He was superintendent of an
expedition sent out to work the coal mines of the
country.

MASSAGETÆ, an ancient Scythian people (probably the ancestors of the Goths), who
invaded Asia about 635. In a conflict with them Cyrus the Great was killed, 529 B.C.

MASSILIA. See *Marseilles*.

MASTER OF THE CEREMONIES. See *Ceremonics*.

MASTERS IN CHANCERY, chosen from the equity bar, were first appointed it is said to
assist the extreme ignorance of sir Christopher Hatton, lord chancellor of England, in 1588.
The office was abolished in 1852.

MASTER OF THE GREAT WARDROBE, an officer of great antiquity and dignity. The
establishment was abolished in 1782, and the duties transferred to the lord chamberlain.

MASTER OF THE ROLLS, an equity judge, derives his title from having the custody of
all charters, patents, commissions, deeds, and recognisances, made into rolls of parchment;
his decrees are appealable to the court of chancery. The repository of public papers, called
the Rolls, is in Chancery-lane. They were formerly kept in a chapel founded for the
converted Jews; but after their having been expelled the kingdom, it was annexed for ever
to the office of the mastership of the rolls. Here were kept all the records since the
beginning of the reign of king Richard III., 1483; all prior to that period being kept in the
Tower of London. See *Records*. The first recorded master of the rolls was either John de
Langton, appointed 1286, or Adam de Osgodeby, appointed Oct. 1, 1295; but it is clear that
the office was in existence long before. *Hardy*.

MASTERS OF THE ROLLS.

Sir Wm. Grant appointed	May 27, 1801	Sir John Leach	May 3, 1827
Sir Thomas Plumer	Jan. 6, 1818	Sir C. Pepys (aft. lord Cottenham)	Sept. 20, 1834
Robert lord Gifford	April 5, 1824	Henry Bickersteth (aft. lord Langdale), Jan. 10, 1836	
Sir J. S. Copley (aft. lord Lyndhurst), Sept. 14, 1826		Sir John Romilly (the present, 1862), March 28, 1851	

MATHEMATICS formerly meant all sorts of learning and discipline; but is now applied
to the sciences relating to numbers and quantity. See *Arithmetic*. Among the most eminent
mathematicians were Euclid, 300 B.C.; Archimedes, 287 B.C.; Descartes, died 1650; Barrow,
died 1677; Leibnitz, died 1716; sir Isaac Newton, died 1727; Euler, died 1783; Lagrange,
died 1813; Laplace, died 1827; and Dr. Peacock, died 1858. Dr. Whewell, Mr. G. B. Airy
(astronomer royal), professor de Morgan, I. Todhunter, and Mary Somerville, born 1790,
author of the "Mechanism of the Heavens," are eminent living mathematicians.

MATINS. The service or prayers first performed in the morning or beginning of the
day in the Roman Catholic Church. The *French Matins* imply the massacre of St.
Bartholomew, Aug. 24, 1572. The *Matins of Moscow*, the massacre of prince Demetrius,
and the Poles his adherents, at six o'clock in the morning of May 27, 1606.

MAUNDY-THURSDAY (derived by Spelman from *mande*, a hand-basket, in which
the king was accustomed to give alms to the poor; by others from *dies mandati*, the day

on which Christ gave his grand *mandate*, that we should love one another), the Thursday before Good Friday. *Whately*. On this day it was the custom of our kings, or their almoners, to give alms, food, and clothing to as many poor men as they were years old. It was begun by Edward III. when he was fifty years of age, A.D. 1363, and is still continued by our sovereign.

MAUR, ST. See *Benedictines*.

MAURITANIA (N. Africa), with Numidia, became a Roman province, 45 B.C., with Sallust for pro-consul. Augustus created (30 B.C.) a kingdom formed of Mauritania and part of Getulia, for Juba II., a descendant of the ancient African princes, after being subjugated by the Vandals and Greeks. Suetonius Paulinus suppressed a revolt here, A.D. 42. The Arabs entered the country about A.D. 667 and subdued it. See *Morocco* and *Moors*.

MAURITIUS, or ISLE OF FRANCE (in the Indian Ocean), was discovered by the Portuguese, A.D. 1505; but the Dutch were the first settlers in 1598. They called it after prince Maurice, their stadtholder, but on their acquisition of the Cape of Good Hope they deserted it; and it continued unsettled until the French landed, and gave it the name of one of the finest provinces in France, 1715. This island was taken by the British, Dec. 2, 1810, and confirmed to them by the treaty of Paris in 1814.

MAUSOLEUM. Artemisia married her own brother, Mausolus, king of Caria, Asia Minor, 377 B.C. At his death she drank in liquor his ashes after his body had been burned, and erected to his memory at Halicarnassus a monument, one of the seven wonders of the world (350 B.C.), termed *Mausoleum*. She invited all the literary men of her age, and proposed rewards to him who composed the best elegiac panegyric upon her husband. The prize was adjudged to Theopompus, 357 B.C. She died 352 B.C. The statue of Mausolus is among the antiquities brought from Halicarnassus by Mr. C. T. Newton in 1857, and placed in the British Museum. A mausoleum for the royal family of England was founded by the queen at Frogmore, March 15, 1862.

MAUVE (French for *malva*, mallow), a dye produced by Dr. Stenhouse from lichens in 1848: now produced from *Anilino* (*which see*).

MAY-DAY.* The ancient Romans used to go in procession to the grotto of Egeria on May-day. May-day has also been immemorially observed in England as a rural festival. See *Evil May-day*.

* MAY, the fifth month of the year, received its name, some say, from Romulus, who gave it this appellation in respect to the senators and nobles of his city, who were denominated *maiores*; though others supposed it was so called from Maia, the mother of Mercury, to whom they offered sacrifices on the first day.

MAYNOOTH COLLEGE (Ireland), founded by parliament, 1795, and endowed by a yearly grant voted for the education of students designed for the Roman Catholic priesthood in Ireland. An act for its government was passed in 1800. It contains about 500 students. Permanent endowment of this college (30,000*l.* for the enlargement of the buildings, and 26,000*l.* annually) were granted by parliament, June 1845. This occasioned much controversy in England, a motion being made for its abolition almost every session. The college was repaired and enlarged in 1860.

MAYORS OF THE PALACE were high officers in France, and had great influence during the later Merovingian kings. They were Pepin the Old (or de Landen), A.D. 622 *et seq.*; Pepin Héristal, 687-714; Charles Martel, 714-741; Pepin le Bref, 741-752, who shut up Childeric III. in a monastery, and himself took the kingdom. In this quality, Charles Martel ruled with despotic sway, A.D. 735 *et seq.*—MAYORS OF CORPORATIONS. At the time of the Norman conquest, 1066, the chief officer of London was called *port-grave*, afterwards softened into *port-reve*, from Saxon words signifying chief governor of a harbour. He was afterwards called *provost*; but in Henry II.'s reign, the Norman title of *maire* (soon after *mayor*) was brought into use. At first the mayor was chosen for life, but afterwards for periods of irregular duration: now he is chosen annually, but is eligible for reelection. He must be an alderman, and must have previously filled the office of sheriff.

* The benevolent Mrs. Elizabeth Montague (who died in 1800) gave for many years, on May-day, an entertainment at her house in Portman-square, to the chimney-sweepers of London. They were regaled with roast beef and plum-pudding, and a dance succeeded. Upon their departure, each guest received a shilling from the mistress of the feast. It is said, though the statement is much doubted, that this entertainment was instituted to commemorate the circumstance of Mrs. Montague's having once found a boy of her own, or that of a relation, among the sooty tribe. In allusion to this incident, perhaps, a story resembling the adventures of this lost child is pathetically related by Montgomery, in "The Chimney-Sweeper's Boy."

His duties commence on Nov. 9. The prefix *LORD* is peculiar to the chief civic officer of London, Dublin, Edinburgh, and York (1389, when a new charter was granted).

The first mayor, Henry Fitz-Alwyn, appointed in 1189: held office for 24 years.		The more costly pageants and triumphs of the show laid aside 1685
First presented to the barons of the exchequer 1251		The lord mayor entertained the prince regent of England, the emperor of Russia, king of Prussia, and numerous foreigners of high rank June 18, 1814
The prefix of <i>lord</i> granted by Edward III. with the style of right honourable 1354		The lord mayor, Farncombe, gave a banquet to prince Albert and the mayors of most of the boroughs of the United Kingdom, in furtherance of the project of the great International Industrial Exhibition to be held in 1851, March 21, 1850
Sir Henry Pickard, who had been lord mayor of London in 1357, sumptuously entertained in one day four monarchs: Edward, king of England; John, king of France; the king of Cyprus; and David, king of Scotland; the Black Prince and many of the nobility being present. <i>Star</i> 1363		The lord mayor, sir F. Moon, entertained the emperor and empress of the French, April 19, 1855
Sir John Norman, the first lord mayor who went by water to be sworn at Westminster, and lord mayor's show instituted 1453		

LORD MAYORS OF LONDON.

1800-1. Sir William Staines, bart.	1821-2. Christopher Magnay.	1842-3. J. Humphery.
1801-2. Sir John Eamer, bart.	1822-3. William Heygate.	1843-4. Sir W. Magnay, bart.
1802-3. Charles Price.	1823-4. Robert Waithman.	1844-5. Michael Gibbs.
1803-4. John Perring.	1824-5. John Garratt.	1845-6. John Johnson.
1804-5. Peter Perchard.	1825-6. William Venables.	1846-7. Sir George Carroll.
1805-6. Sir James Shaw.	1826-7. Anthony Browne.	1847-8. John K. Hooper.
1806-7. Sir William Leighton, bt.	1827-8. Matthias Prime Lucas.	1848-9. Sir James Duke, bt., M.P.
1807-8. John Ainsley.	1828-9. William Thompson.	1849-50. Thomas Farncombe.
1808-9. Sir Charles Flower, bart.	1829-30. John Crowder.	1850-1. Sir John Musgrove.
1809-10. Thomas Smith.	1830-1. Sir John Key, bart.	1851-2. William Hunter.
1810-11. Joshua Jonathan Smith.	1831-2. Sir John Key, bt., again.	1852-3. Thomas Challis, M.P.
1811-12. Sir Claudius S. Hunter, bt.	1832-3. Sir Peter Laurie.	1853-4. Thomas Sidney.
1812-13. George Scholey.	1833-4. Charles Farebrother.	1854-5. Sir Fras. G. Moon, bart.
1813-14. Sir William Demville, bt.	1834-5. Henry Winchester.	1855-6. David Salomons.
1814-15. Samuel Birch.	1835-6. William Taylor Copeland.	1856-7. Thomas Quedsted Fimnis.
1815-16. Matthew Wood.	1836-7. Thomas Kelly.	1857-8. Sir Robt. W. Carden, bt.
1816-17. Matthew Wood, again.	1837-8. Sir John Cowan, bart.	1858-9. David W. Wire.
1817-18. Christopher Smith.	1838-9. Samuel Wilson.	1859-60. John Carter.
1818-19. John Atkins.	1839-40. Sir Chapman Marshall, bt.	1860-1. William Cubitt, M.P.
1819-20. George Brydges.	1840-1. Thomas Johnson.	1861-2. William Cubitt, again.
1820-1. John T. Thorpe.	1841-2. John Pirie.	1862-3. W. A. Rose.

LORD MAYORS OF DUBLIN.

John le Deceer was appointed first provost in 1308; a gilded sword was granted to be borne before the provost by Henry IV. 1407	with the title of lord, by Charles II., who granted 500l. per annum, in lieu of the company of foot 1665
Thomas Cusack appointed first mayor 1409	A new collar of SS. granted by William III. to the mayor, value 1000l., the former having been lost in James II.'s time 1697
The collar of SS. and a foot company granted by Charles II. to the mayors 1660	
Sir Daniel Bellingham, the first mayor honoured	

MEAL-TUB PLOT, against the duke of York, afterwards James II., contrived by one Dangerfield, who secreted a bundle of seditious letters in the lodgings of colonel Maunsell, and then gave information to the custom-house officers to search for smuggled goods, Oct. 23, 1679. After Dangerfield's apprehension on suspicion of forging these letters, papers were found concealed in a *meal-tub* at the house of a woman with whom he cohabited, which contained the scheme to be sworn to, accusing the most eminent persons in the Protestant interest, and who were against the duke of York's succession, of treason,—particularly the earls of Shaftesbury, Essex, and Halifax. On Dangerfield being whipped the last time, as part of his punishment, June 1, 1685, one of his eyes was struck out by a barrister named Robert Francis: this caused his death, for which his assailant was hanged.

MEASURES. See *Weights*.

MEATH (Ireland), **BISHOPRIC OF.** There were formerly many episcopal sees in Meath, as Clonard, Duleek, Kells, Trim, Ardbraccan, Dunshaughlin, and Slane, besides others of less note; all which, except Duleek and Kells, were consolidated, and their common see was fixed at Clonard, before the year 1151-2, at which time the division of the bishoprics in Ireland was made by John Paparo, then legate from pope Eugene III. to the Irish. The two sees of Duleek and Kells afterwards submitted to the same fate. Meath was valued, 30 Henry VIII., at 373l. 12s. per annum.

MECCA (in Arabia), the birth-place of Mahomet, A.D. 569. The temple is a gorgeous structure, much visited by pilgrims. On one of the neighbouring hills is a cave, where it is pretended Mahomet usually retired to perform his devotions; and where the greatest part of the Koran was brought to him by the angel Gabriel, A.D. 604. Two miles from the town is

the hill where, they say, Abraham went to offer up Isaac, 1871 B.C. Mecca after being vainly besieged by Hosein for the Caliph Yezid, A.D. 682, was taken by Abdelmelek, 692. In 1803 it fell into the hands of the Wahabees, a Mahometan sect. It is said that 160,000 pilgrims visited Mecca in 1858, and only 50,000 in 1859.

MECHANICS. When the simple mechanical powers were first introduced is so uncertain, that they have been ascribed to heathen deities. The axe, wedge, wimble, &c., are said to be the invention of Dædalus. We know nothing of the machinery by which the immense masses of stone which are found in some of the ancient edifices were moved and elevated. See *Steam Engine*.

Aristotle writes on mechanics about . . . B.C.	320	Theory of the inclined plane investigated by Cardan, about . . . A.D.	1540
The properties of the lever, &c., demonstrated by Archimedes, who died . . .	287	Work on Statics, by Stevinus . . .	1586
[He laid the foundations of nearly all those inventions, the further prosecution of which is the boast of our age. Wallis (1695).]		Theory of falling bodies, Galileo . . .	1638
The hand-mill or quern, was very early in use; the Romans found one in Yorkshire		Laws of collision, Wallis, Wren, about . . .	1668
Cattle-mills, <i>mola jumentaria</i> , were also in use by the Romans	* *	Theory of oscillation, Huygens . . .	1670
The water-mill was probably invented in Asia; the first that was described was near one of the dwellings of Mithridates		Epicycloidal form of the teeth of wheels, Roemer . . .	1675
A water-mill is said to have been erected on the river Tiber, at Rome		Percussion and animal mechanics, Borelli; he died . . .	1679
Pappus wrote on mechanics, about . . . A.D.	50	Application of mechanics to astronomy, paralogism of forces, laws of motion, &c., Newton, Hooke, &c.	—
Floating-mills on the Tiber	350	Problem of the catenary with the analysis, Dr. Gregory	1697
Tide-mills were, many of them, in use in Venice about . . .	536	Spirit level (and many other inventions), by Dr. Hooke, from 1660 to . . .	1702
Wind-mills were in very general use in the twelfth century	1078	D'Alembert's researches on dynamics, about . . .	1743
Saw-mills are said to have been in use at Augsburg . . .	* *	Borgnis' Dictionnaire de Mécanique appliquée aux Arts, 10 vols. . .	1818-23
	1332	[Among the best modern writers on the science of mechanics are Poncelet, Whewell, Barlow, Moseley, Delaunay, and Bartholomew Price.]	

MECHANICS' INSTITUTIONS. One was founded by Dr. Birkbeck in London, and another in Glasgow, in 1823; and soon after others arose in different parts of the empire. They have revived since 1857, many noblemen and gentlemen giving lectures in them.

MECKLENBURG (N. Germany), formerly a principality in Lower Saxony, now independent as the two grand-duchies of Mecklenburg-Schwerin (population in 1858, 546,639); and Mecklenburg-Strelitz (population in 1861, see p. viii). The house of Mecklenburg is among the most ancient in Europe, as it claims to be descended from Genseric the Vandal, who ravaged the western empire in the fifth century, and died A.D. 477. During the thirty years war Mecklenburg was conquered by Wallenstein, who became its duke 1628; it was restored to its own duke in 1630. After several changes the government was settled in 1701 as it now exists in the two branches of Schwerin and Strelitz. In 1815 the dukes of Mecklenburg were made grand-dukes.—The royal family of England for a century has been intimately allied with the house of Mecklenburg-Strelitz. King George III. married Charlotte, a daughter of the duke, in 1761; their son, the duke of Cumberland (afterwards king of Hanover) married princess Frederica Caroline, a daughter of the duke, in 1815; and princess Augusta of Cambridge married, in 1843, Frederic, the present grand-duke (1861).

GRAND-DUKES OF MECKLENBURG-SCHWERIN.

1815. Frederic-Francis I.	Heir, his son, Frederic-Francis, born March 19, 1851.
1842. Frederic-Francis II. March 7: born Feb. 28, 1823 (PRESENT grand-duke, 1862).	

GRAND-DUKES OF MECKLENBURG-STRELITZ.

1815. Charles.	Heir, his son, Adolphus-Frederic, born July 22, 1848.
1816. George, born Aug. 12, 1779, succeeded, Nov. 6.	
1860. Frederic, Sept. 6: born Oct. 17, 1819 (the PRESENT grand-duke 1862).	

MEDALS. There is hardly any record of medals or decorations as rewards in the army or navy before the time of the commonwealth. The house of commons resolved to grant rewards and medals to the fleet whose officers (Blake, Monk, Penn, and Lawson) and men gained a glorious victory over the Dutch fleet, off the Texel, in 1653. Blake's medal of 1653 was bought by his majesty William IV. for 150 guineas. In 1692 an act was passed for applying the tenth part of the proceeds of prizes for medals and other rewards for officers, seamen, and marines. Subsequent to lord Howe's victory, June 1, 1794, it was thought expedient to institute a naval medal. Medals were presented by the queen to persons distinguished in the war in the Crimea, May 18, 1855.

MEDIA, a province of the Assyrian empire, revolted from 711 B.C., and became an independent kingdom, and conquered Persia, but was subdued by Cyrus; from that time united to the Persian empire, and shared its fate.

Revolt of the Medes	B.C. 711	War with the Lydians (see <i>Italy</i>)	B.C. 603
Deiokes, founder of Ecbatana, reigns	709	Astyages reigns	594
Phraortes or Arphaxad reigns; (he conquers Persia, Armenia, and other countries)	656	Astyages deposed by Cyrus, 550; who establishes the empire of Persia (<i>which see</i>)	560
Warlike reign of Cyaxares	632-594		

MEDICAL BENEVOLENT COLLEGE (Epsom, Surrey). Subscriptions began in 1851, and the college was opened in 1855, by the prince consort. It provides an asylum for 20 pensioners male and female. 40 foundation scholars (sons of medical men) are fed, clothed, and educated.

MEDICAL COUNCIL. In 1858 an act was passed "to regulate the qualifications of practitioners in medicine and surgery;" amended in 1860. It established "the General Council of Medical Education and Registration of the United Kingdom." The first meeting of this council took place on Nov. 23, 1858, when sir B. C. Brodie was elected first president (who on Nov. 30 was elected president of the Royal Society). He was succeeded by Mr. J. H. Green in June 1860. The first Medical Register was issued in July 1859. In 1862 the the council was incorporated by parliament, and authorised to prepare and sell a new Pharmacopœia.

MEDICI FAMILY, illustrious as the restorers of literature and the fine arts in Italy, were chiefs or *signori* of the republic of Florence from 1434, in which year Cosmo de' Medici, who had been banished from the republic, was recalled, and made its chief; he presided over it for thirty years. Lorenzo de' Medici, styled "the Magnificent," and the "Father of Letters," ruled Florence from 1469 to 1492. John de' Medici (pope Leo X.) was the son of Lorenzo. *Roscoe.* From 1569 to 1737 the Medici family were hereditary grand-dukes of Tuscany, *which see.* Catherine de' Medici became queen of France in 1547, and regent in 1550. She plotted with the duke of Alva to destroy the Protestants in 1565.

MEDICINE. See *Physic*.

MEDINA (Arabia Deserta), famous for the tomb of Mahomet, contained in a large mosque, closed with rich curtains, and lighted by a vast number of rich lamps. Medina was called the City of the Prophet, because here Mahomet was protected when he fled from Mecca, July 16, A.D. 622. This flight gave rise to the remarkable epoch in chronology, called the *Hégira*, Arabic denoting to *flee*, or *quit one's country or friends*.—Medina was taken by the Wahabees in 1804.

MEEANEE, BATTLE OF (India). The Hyderabad Ameers, amounting to 30,000 infantry, with 15 guns, and 5000 cavalry, posted in a formidable position at Meeanee, were attacked on Feb. 17, 1843, by lieut.-gen. sir Charles Napier with 2600 men of all arms. This insignificant force fell so impetuously upon the enemy, that although the gathering masses of these wild warriors continually advanced sword in hand, striving in all the fierceness of their valour to break into the opposing ranks, they were hurled down the slope by hundreds. At length the Ameers gave way, and retreated in tolerable order, though harassed by a galling fire from the victors. Their loss was enormous. By a careful computation, it amounted to 6000 men. The British had six officers and 60 rank and file killed; 14 officers and 200 men wounded. *P. H. Nicolas.*

MEGARA, a city of ancient Greece, was subdued by the Athenians in the eighth century, B.C. Pericles suppressed a revolt, 445 B.C. The Megarians founded Byzantium, 657 B.C. and sent a second colony 628 B.C. The Megarian (Eristic or disputations) school of philosophy was founded by Euclid and Stilpo, natives of Megara.

MEISTERSINGERS. See *Mimesingers*.

MELAZZO (W. Sicily). Here Garibaldi, on July 20 and 21, 1860, defeated the Neapolitans under general Bosco, who lost about 600 men: Garibaldi's loss being 167. The latter entered Messina; and on July 30 a convention was signed, by which it was settled that the Neapolitan troops were to quit Sicily. They held the citadel of Messina till March 13, 1861.

MELBOURNE (Australia), capital of Victoria (*which see*). It was laid out as a town by orders of Sir R. Bourke, in April 1837. The first land-sale took place in June, and speculation commenced and continued till it caused wide-spread insolvency in 1841-2. Melbourne has since rapidly increased in prosperity.

MELBOURNE, *continued.*

Made a municipal corporation, 1842; a bishopric, 1847
 First legislative assembly of Victoria meets 1852
 Gold found in great abundance about eighty
 miles from Melbourne in the autumn of 1851,
 and immense numbers of emigrants flocked
 there in consequence, causing an enormous
 rise in the prices of provisions and clothing. 1852
 Population 23,000 in 1851; about 100,000 at the
 end of 1852
 The city greatly improved with public buildings,
 handsome shops, &c. 1853
 The Victoria bank, Ballarat, broken open, and
 14,300*l.* in money and 200 ounces in gold dust

carried off [one of the robbers was taken in
 England, sent back to Melbourne, and there
 tried and hanged] Oct. 8, 1854
 Monster meeting held at Ballarat respecting
 the collection of the gold licences, followed by
 riots, during which the Southern Cross flag
 was raised; intervention of the military;
 twenty-six rioters and three soldiers killed,
 and many wounded Nov. 30, —
 The mayor comes to London to congratulate
 the queen on the marriage of the princess
 royal. 1858

MELBOURNE ADMINISTRATIONS. On the retirement of earl Grey, July 9, 1834, viscount Melbourne became first minister of the crown. On the accession of viscount Althorpe to the earldom of Spencer, on his father's decease, Nov. same year, lord Melbourne waited on the king to receive his majesty's commands as to the appointment of a new chancellor of the exchequer, when his majesty said he considered the administration at an end. Sir Robert Peel succeeded, but was compelled to resign in 1835, and lord Melbourne returned to office. His administration finally terminated, Aug. 30, 1841, sir Robert Peel again coming into power. See *Administrations.*

FIRST ADMINISTRATION, July, 1834.

Viscount Melbourne, * *first lord of the treasury.*
 Marquess of Lansdowne, *lord president.*
 Earl Mulgrave, *privy seal.*
 Viscount Althorpe, *chancellor of the exchequer.*
 Viscount Duncannon, viscount Palmerston, and Mr.
 Spring Rice (afterwards lord Monteagle), *home,*
foreign, and colonial secretaries.
 Lord Auckland, *admiralty.*
 Mr. Charles Grant (afterwards lord Glenelg), and
 Mr. C. P. Thomson (afterwards lord Sydenham),
boards of control and trade.
 Lord John Russell, *paymaster of the forces.*
 Lord Brougham, *lord chancellor.*
 Sir John Hobhouse, Mr. Ellice, marquess of Conyngham, Mr. Littleton, &c.

SECOND ADMINISTRATION, April, 1835.

Lord Melbourne, *first lord of the treasury.*
 Marquess of Lansdowne, *lord president.*
 Viscount Duncannon, *privy seal, with the woods and forests.*
 Mr. Rice, *chancellor of the exchequer.*
 Lord John Russell, viscount Palmerston, and lord
 Glenelg, *home, foreign, and colonial secretaries.*
 Earl of Minto, *admiralty.*
 Sir John Hobhouse, and Mr. Poulett Thomson,
boards of control and trade.
 Lord Holland, *duchy of Lancaster.*
 Viscount Howick, *secretary-at-war.*
 Mr. Labouchere, sir Henry Parnell, lord Morpeth, &c.
 The chancellorship in commission; sir C. Pepys
 (afterwards lord Cottenham) became *lord chancellor.*
 Jan. 1836.

MELEGNANO. See *Murignano.*

MELODRAMA. A species of dramatic entertainment, which, if it did not actually originate with Mr. Holcroft, was at least introduced by him in a manner so popular and interesting as to entitle him to the honour of its production in a refined form; his melodramas were first represented in 1793.

MEMEL, an important commercial port in Prussia, built by the Teutonic knights, 1252; was almost totally destroyed by fire, October 4, 1854. The loss was estimated at 1,100,000*l.*

MEMORY. See *Mnemonics.*

MEMPHIS, an ancient city of Egypt ("of which the very ruins are stupendous") is said to have been built by Menes, 3890 B.C.; or by Misraim, 2188 B.C. It was restored by Septimius Severus, A.D. 202. In the 7th century, under the dominion of the Saracens, it fell into decay. The invasion of Cambyzes, 526 B.C., began the ruin of Memphis, and the founding of Alexandria, 332, completed it.

MENAI STRAIT (between the Welsh coast and the isle of Anglesey). Suetonius Paulinus, when he invaded Anglesey, transported his troops across this strait in flat-bottomed boats, while the cavalry swam over on horseback, and attacked the Druids in their last retreat. Their horrid practice of sacrificing their captives, and the opposition he met with, so incensed the Roman general, that he gave the Britains no quarter, throwing all that escaped from that battle into fires which they had prepared for the destruction of himself and his army, A.D. 61.—In crossing this strait a ferry boat was lost, and fifty persons, chiefly Irish, Dec. 4, 1785.—The road from London to Holyhead has been long regarded as the highway from the British metropolis to Dublin; Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting beautiful suspension bridges over the river Conway and the Menai Strait, commenced

* Wm. Lamb, born in 1779; became M.P. for Westminster, 1812; secretary for Ireland, 1827; succeeded his father as viscount Melbourne, 1828; died Nov. 24, 1848.

in July 1818, and finished in July 1825. The Britannia tubular bridge over the Menai was constructed by Stephenson and Fairbairn in 1849-50. See *Tubular Bridges*.

MENDICANT FRIARS. The term was applied to several orders of religious orders who commenced alms-begging in the thirteenth century, in the pontificate of Innocent III. They were very numerous, spread over Europe, and embraced many communities; but at length were confined by a general council, held by Gregory X. at Lyons, in 1272, to the following four orders—Dominicans, Franciscans, Carmelites, and Augustines. The Capuchins and other orders branched off from them. See *Franciscans*, &c.

MENDICITY SOCIETY (Red Lion-square, London), was established in 1818 for the suppression of public begging, and other impositions on the credulity of the benevolent. Tickets received from the society are given by subscribers to beggars, who obtain relief at the society's house, Red Lion-square, Holborn, if deserving. The society has caused above 23,000 vagrants to be convicted as impostors. In 1857, 54,074 meals were distributed, and 3785 begging letters investigated.

MENSURATION, the various properties of conic sections were discovered by Archimedes, to whom the chief advancement in mensuration may be attributed. He also determined the ratio of spheres, spheroids, &c., about 218 B.C. See *Arithmetic*.

MENTZ (S. W. Germany), the Roman *Moguntiacum*, &c. The archbishopric was founded by Boniface, A.D. 745. Many diets and councils have been held here; and here John Faust established a printing-press in 1442. A festival in honour of John Guttenburg was celebrated here in 1837.

MENU, **INSTITUTES OF**, the very ancient code of India. Sir W. Jones, who translated them into English (1794), considers their date should be placed between Homer (about 962 B.C.) and the Roman Twelve Tables (about 449 B.C.). Sir William Jones's translation appeared in 1794.

MERCATOR'S CHARTS. The true inventor of these charts is said to have been a Mr. Wright, who made several voyages; in his absence Gerard Mercator published the charts in his own name, 1556. They are, however, now confidently ascribed to Mercator's own ingenuity. In these charts the meridians and parallels of latitude cut each other at right angles, and are both represented by straight lines, enlarging the degrees of latitude as they recede from the equator.

MERCHANT. The name given to citizens who trade abroad. The merchants of London and Amsterdam were accounted the most enterprising and richest in the world. An attempt was made by queen Anne's ministry to exclude merchants from sitting in the house of commons, in 1711; but it failed. The Merchant Adventurers' society (see *Adventurers*) was established by the duke of Brabant, in 1296; it extended to England in Edward III.'s reign; and was formed into an English corporation in 1564.

MERCHANT-TAILORS. A rich company of the city of London, of which seven kings have been members, viz. Richard II. and III., Edward IV., Henry IV., V., VI., and VII. They were called Merchant-Tailors from the admission of the last-named king into their company, A.D. 1501; but they were incorporated in 1466. The Merchant-Tailors' school was founded in 1561. *Stout*.

MERCIA: See under *Britain*.

MERCURY: See *Quicksilver* and *Cadmel*.

MERCY, ORDER OF (in France), was established with the object of accomplishing the redemption of Christian captives; founded by John de Matha in 1198. *Hénault*. Another order was formed by Pierre Nolasque, Spain, A.D. 1223. At the first institution, the number of members was considerable, and included many potentates and princes.

MERIDA (Spain), a town in Estremadura (built by the Romans), was taken by the French, Jan. 1811. Near this town, at Arroyos Molinos, the British army under general (afterwards lord) Hill defeated the French under general Girard, after a severe engagement, Oct. 28, 1811. The British took Merida from the French in January, 1812, general Hill leading the combined force of English and Spanish-troops.

MEROE, an ancient city and country of inner Africa, near the sources of the Nile, said to have flourished under sacerdotal government in the time of Herodotus, about 450 B.C.

MEROVINGIANS, the first race of French kings, A.D. 418-752. See *Mayors* and *France*.

MERRIMAC. See *United States*, 1862.

MERRY-ANDREW. The name was first given to a physician, Andrew Borde, who lived in the reign of Henry VIII., and who, on some occasions, on account of his facetious manners

and good humour, appeared at court, 1547. He used to attend markets and fairs, and harangue the people, by whom he was called Merry Andrew.

MERTHYR-TYDVIL (Glamorganshire), in which very alarming riots commenced June 3, 1831, and continued for several days, in which a number of persons, chiefly the rioters, were killed and wounded. They were suppressed by the military and magistracy.

MERTON (Surrey). At an abbey here, the barons under Henry III. Jan. 23, 1236 held a parliament which enacted the statutes called the Provisions of Merton, now the most ancient body of laws next after Magna Charta. See *Bastards*.

MESMERISM. Frederick Anthony Mesmer, a German physician, of Mersburg, published his doctrines in 1766, contending, by a thesis on planetary influence; that the heavenly bodies diffused through the universe a subtle fluid which acts on the nervous system of animated beings. Quitting Vienna for Paris, in 1778, he gained numerous proselytes to his system in France, where he received a subscription of 340,000 livres. The government appointed a committee of physicians and members of the Academy of Sciences to investigate his pretensions. Among these were Franklin and Dr. Bailly, and the result appeared in an admirable paper drawn up by the latter, 1784, exposing the futility of animal magnetism, as the delusion was then termed. Mesmerism excited attention again about 1848, when Miss Harriet Martineau and others announced their belief in it.*

MESSALIANs; a sect (about A. D. 310) professing to adhere to the very letter of the Gospel. They refused to work, quoting this passage, "Labour not for the food that perisheth."

MESSENA (now *Maura-Matra*), a country of the Peloponnesus. The kingdom commenced by Polycæon, 1499 B. C. It had long sanguinary wars against Sparta (see *next article*), and once contained a hundred cities, most of whose names even are now unknown. It was at first governed by kings; after its restoration to power in the Peloponnesus, it formed a republic, under the protection first of the Thebans, and afterwards of the Macedonians; but it never rose to eminence.

The first Messenian war began 743 B. C.; was occasioned by violence offered to some Spartan women in a temple of devotion common to both nations; the king of Sparta being killed in his efforts to defend the females. Eventually *Thome* was taken, and the Messenians became slaves to the conquerors. B. C. 723

The second war was commenced about 682 B. C. to throw off the galling Spartan yoke, ending in the defeat of the Messenians, who fled to Sicily. B. C. 662
The third war took place 490 B. C., and the fourth. 465-455

MESSINA (Sicily), so named by the Samians, who seized this city, then called Zancle, 671 B. C. It belonged for many ages to the Roman empire, but fell to the Saracens, about A. D. 829. *Priestley*. In the eleventh century Roger the Norman took it by surprise, and delivered it from Mahometan oppression. See *Sicily*.

Revolt against Charles of Anjou, and is succeeded by Peter of Aragon. A. D. 1282
Revolt in favour of Louis XVI. of France, who is proclaimed here 1676; the Spaniards punish it severely. 1678
Almost ruined by an earthquake and eruption of Etna. 1693
Nearly depopulated by a plague. 1740

Half destroyed by an earthquake. A. D. 1783
Head-quarters of the British forces in Sicily, prior to. 1814
An insurrection here, subdued. Sept. 7, 1848
Garibaldi enters Messina after his victory at Melazzo. July 20, 21, 1860
The citadel surrenders to gen. Cialdini, Mar. 13, 1861

METALS. Tubal-Cain is mentioned as an "instructor of every artificer in brass and iron." Gen. iv. Moses and Homer speak of the seven metals, and Virgil of the melting of steel. The Phenicians had great skill in working metals. See *Mines*, *Iron*, and the other metals. Bunsen and Kirchhoff's method of chemical analysis by means of the spectrum has added Cæsium, Rubidium, and Thallium to the number of metals-(1861).

METAMORPHISTS. In the fifteenth century affirmed that Christ's natural body, with which he ascended into heaven, was wholly deified.

METAPHYSICS, the science of abstract reasoning, or that which contemplates the existence of things without relation to matter. The term, literally denoting, "after physics," originated from those words having been put at the head of certain essays of Aristotle, which follow his treatise on Physics. *Mackintosh*. Modern metaphysics arose in the fifteenth century—the period when an extraordinary impulse was given to the human mind in Europe, commonly called the "revival of learning." Hobbes, Cudworth, S. T. Coleridge, Dugald Stewart, and sir W. Hamilton, were eminent British metaphysicians, and Descartes, Pascal, Kant, and Fichte, foreign ones.

* In 1859 the Mesmeric Infirmary issued its tenth annual report, archbishop Whately being president, and the earl of Carlisle and Mr. Monckton Milnes among the vice-presidents.

METAURUS, a river in Central Italy, where Hasdrubal the brother of Hannibal was defeated and slain 207 B.C., when marching with abundant reinforcements. The Romans were led by Livius and Claudius Nero, the consuls. The latter commanded the head of Hasdrubal to be thrown into his brother's camp. This victory was of vital importance.

METEMPSYCHOSIS, a doctrine attributed to Pythagoras, 528 B.C., supposing the transmigration of the soul from one body to another. It is also ascribed to the Egyptians, who would eat no animal food lest they should devour the body into which the soul of a deceased friend had passed. They had also an idea that so long as the body of the deceased was kept entire, the soul would not transmigrate; and therefore embalmed the dead.

METEOROLOGY (from the Greek *metēōros*, aerial), the science which treats of the phenomena which have their origin in the air, such as rain, lightning, meteors, fogs, &c. Bacon, Boyle, and Franklin wrote on this subject. John Dalton's essay on Meteorology appeared in 1793. Luke Howard's work on the clouds appeared in 1802, and his "Barometrographia" in 1848. Sir W. Reed published his "law of storms" in 1838. The works of Daniell (1845), Kämtz (1845), and Müller (1847), are esteemed. Mr. James Glaisher, the energetic secretary of the British Meteorological Society (established in 1850) is the most eminent meteorologist of the day.* By his exertions the apparatus at Greenwich was erected; and meteorology has appeared in the "Greenwich Observations" since 1848. Meteorological observatories have been erected in all parts of the globe within the last 20 years. The Meteorological department of the Board of Trade established in 1855, under Admiral FitzRoy, commenced the publication of Reports in 1857. It has issued apparatus and instruction books to captains of ships, and established observatories in many places in the empire. The Kew Meteorological Observatory was established by the British Association in April 1860. At the recommendation of M. Le Verrier and Admiral FitzRoy, Meteorological information, obtained by the telegraph from the principal places in the United Kingdom, has been transmitted daily to Paris, and thence to other parts of Europe, since Sept. 1, 1860. Meteorological observations appear in the *Times* daily. See *Barometer*.

METHODISTS. See *Wesleyans*.

METONIC CYCLE, a period of 19 years, or 6940 days, at the end of which the changes of the moon fall on the same days. See *Catippic Period*.

METRICAL SYSTEM. Before the Revolution there was no uniformity in French weights and measures. On May 8, 1790, the Constitutional Assembly charged the Academy of Sciences with the organisation of a better system. The committee named for the purpose by the Academy included the illustrious names of Berthollet, Borda, Delambre, Lagrange, Laplace, Méchain, and Prony. Delambre and Méchain were charged with the measurement of an arc of the meridian between Dunkirk and Barcelona, and from their calculations the *mètre*, which is equal to a ten-millionth part of the distance between the poles and the equator (and 3 280 8 English feet) was made the unit of length and the base of the system by law on April 7, 1795. The system was completed in 1799, and made by law the only legal one on Nov. 2, 1801. A decree on Feb. 12 accommodated the old measures to the new system; but on July 4, 1837, it was decreed that after Jan. 1, 1840, the metrical and decimal system in its primitive simplicity should be used in all business transactions. The example of France has been followed by the greater part of Europe, and will probably be adopted in the British empire.

Unit of SURFACE, *centiare* = a square *mètre* (a square *décamètre* or *are* = 100 square *mètres*).

Unit of VOLUME or SOLIDITY, *stère* = a cubic *mètre*.

Unit of CAPACITY, *litre* = a cubic *décimètre* (or 10th of a cubic *mètre*).

Unit of WEIGHT, *gramme* = weight of a cubic centimetre (the 100th part of a *mètre*) of distilled water.

Unit of MONEY, the *franc*, a piece of silver weighing 5 grammes.

The multiples of these units are expressed by Greek numerals (*deca*, 10; *hecto*, 100; *kilo*, 1000; *myria*, 10,000). The divisors are expressed by Latin numerals (*deci*, 10; *centi*, 100; *milli*, 1000).

METRONOME, a musical time-keeper, was patented in England by John Mälzel, Dec. 5, 1815.

METROPOLITAN (from the Greek *metropolis*), a title given at the council of Nice, 325, to certain bishops who had jurisdiction over others, in a province. The dignity is said to have arisen in the second century, through the dissentient bishops in a district referring to one of superior intellect.

METROPOLITAN BOARD OF WORKS, was established by 18 & 19 Viet. c. 120 (1855), amended in 1862. It held its first meeting and elected Mr. John Thwaites as

* See p. 65, note; *Scientific Balloon Ascents*. On Sept. 5, 1862, Mr. Glaisher ascended from Wolverhampton to the height of 52 miles.

chairman, Dec. 22, 1855. The office is in Spring-gardens. In 1858, the powers of this Board were extended in order to effect the purification of the Thames by constructing a new main drainage for the metropolis. The Board was authorised to raise a loan and levy 3d. in the pound on the property in the metropolis. The works are now in progress (1862). It is also authorised to construct the Thames Embankment. In 1861 the Board received nearly a million pounds, and expended 900,000*l.* See *Thames*.

METROPOLITAN CATTLE MARKET, inaugurated by the lord mayor and corporation on Wednesday June 13, 1855, in presence of the prince consort. It is situated in Copenhagen Fields, an elevated site north of London, occupying an area of about 15 acres, larger by 9 acres than Smithfield, and capable of containing 30,000 sheep, 6400 bullocks, 1400 calves, and 900 pigs. In the centre is a circular building, let to bankers and others having business connected with graziers and cattle-agents. Within and around the market are erected several large taverns. A place is set apart for slaughtering animals, with approved appliances for purposes of health, by ventilation, sewerage, &c.; there is also a place for haystands. Sales commenced on Friday, June 15, 1855.—An act for establishing a meat and poultry market in Smithfield (*which see*) was passed in 1860.

METROPOLITAN UNDERGROUND RAILWAY, between Paddington and Victoria street, near Holborn. The act for it passed in 1853; the construction began in the spring of 1860; it was about to be opened for traffic, Nov. 1862. Many serious difficulties were overcome by great skill and energy.

METTRAY. See *Reformatory Schools*.

METZ. See *Austrasia*.

MEXICO (N. America), discovered in A.D. 1517, conquered by the Spaniards under Fernando Cortez, 1521. The territory was named New Spain. The mint of Mexico was begun in 1535. This country rebelled in war against the viceroy in 1816; and under Iturbide gained its independence in 1821. Present president, Benito Juarez, appointed Feb. 11, 1858; made absolute dictator, June 30, 1861. Population in 1862 about 7,500,000.

Act of independence	Sept. 28, 1821	Benito Juarez declared constitutional president at Vera Cruz	Feb. 11, 1858
Iturbide made emperor	May, 1822	Civil war: several engagements	Aug. to Nov. —
Mexican constitution proclaimed by the president Vitoria	Oct. 1823	General Miguel Miramon nominated president at Mexico by the Junto	Jan. 6, 1859
Iturbide went to England; but returning and endeavouring to recover his dignity, he was shot	July 19, 1824	Zuloaga abdicates	Feb. 2, —
Federal constitution established	Oct. —	In consequence of injury to British subjects, ships of war sent to Mexico	Feb. —
Treaty of commerce with Great Britain ratified, ...	April, 1825	Miramon forces the lines of the liberal generals, enters the capital, assumes his functions as governor, and governs without respect to the laws of life and property	April 10, —
Expulsion of the Spaniards decreed	March, 1829	Juarez confiscates the church property, July 13, Miramon and the clerical party defeat the liberals under Colima	Dec. 21, —
Spanish expedition against Mexico surrendered, ...	Sept. 26, —	He besieges Vera Cruz, March 5; bombards it; compelled to raise the siege	March 21, 1860
Mexican revolution; the president Guerrero deposed	Dec. 23, —	General Zuloaga deposes Miramon, and assumes the presidency	May 1, —
Independence of Mexico recognised by Brazil, June 1830; by Spain	Dec. 28, 1836	Miramon arrests Zuloaga, May 9; the diplomatic bodies suspend official relation with the former	May 10, —
Declaration of war against France	Nov. 30, 1838	Miramon defeated by Degollado	Aug. 10, —
This war terminated	March 9, 1839	He governs Mexico with much tyranny; the foreign ministers quit the city	Oct. —
War with the United States	June 4, 1845	He is compelled to retire; Juarez enters Mexico, and re-elected president	Jan. 19, 1861
The Mexicans defeated at Palo Alto, May 8; and subsequently at Matamoras	— 1846	Juarez made dictator by the congress, June 30, in consequence of many gross outrages on foreigners, the British, French, and Spanish governments, after much vain negotiation, claiming efficient protection of foreigners and the payment of arrears due to fundholders, sign a convention engaging to combined hostile operations against Mexico	Oct. 31, —
Santa Fe captured, Aug. 22; and Monterey, ...	Sept. 24, —	Spanish troops land at Vera Cruz, Dec. 8; it surrenders	Dec. 17, —
Battle of Buena Vista, the Mexicans defeated by general Taylor with great loss, after two days' fighting	Feb. 22, 1847	A British naval and French military expedition arrives	Jan. 7, 8, 1862
The Americans, under general Scott, defeat the Mexicans, making 6000 prisoners	April 18, —	The Mexicans determine on resistance, and invest Vera Cruz; their taxes are raised 25 per cent	Jan. —
Various actions followed. Treaty between Mexico and the United States ratified, May 19, ...	May 19, 1848	Miramon arrives, but is sent back to Spain by the British admiral	Feb. —
Political convulsions	Sept. 1852		
President Arista resigns Jan. 6; and St. Anna is invited to return	Feb. 1853		
St. Anna becomes dictator	March 17, —		
He abdicates; Carera elected president	Jan. 1855		
Who also abdicates; succeeded first by Alvarez, and afterwards by general Comonfort	Dec. —		
Property of the clergy sequestered	March 31, 1856		
New constitution	Feb. 5, 1857		
Comonfort chosen president	July, —		
Coup d'état; Comonfort compelled to retire, Jan. 11; general Zuloaga takes the government	Jan. 21-26, 1858		

MEXICO, *continued.*

Project of establishing a Mexican monarchy for Archduke Maximilian of Austria, disapproved of by the British and Spanish governments, Feb. 1862

Negotiation ensues between the Spanish and Mexicans: convention between the Allies and Mexicans ratified at Soledad March 4, —

Additional French troops arrive March 23, —

The Mexican general Marquez takes up arms against Juarez; and general Almonte joins the French general Lorencez; Juarez demands a compulsory loan, and puts Mexico in a state of siege March, —

The Spanish and British forces retire: the French government disavows the convention at Soledad, April 3; and sends reinforcements to Lorencez May, —

The French, induced by Marquez, advance into

the interior; severely repulsed by general Zaragoza, at Fort Guadalupe near Puebla,

May 5; and at Orizaba May 18, 1862

The French defeat the Mexicans at Cerro de

Borgo, near Orizaba June 13, 14, —

The Mexican liberals said to be desirous of negotiation Aug. —

Gen. Forey and 2500 French soldiers land, Aug. 28, —

Letter from the emperor Napoleon to Lorencez

disclaiming any intention of imposing a

government on Mexico, announced Sept. —

Death of Zaragoza, a great loss to the Mexicans, Sept. 8, —

Gen. Forey deprives Almonte of the presidency

at Vera Cruz, and appropriates the civil and

military power to himself Oct. —

MEZZOTINTO. See *Engraving*.

MICHAELMAS. Sept. 29, the feast of St. Michael, the reputed guardian of the Roman Catholic church, under the title of "St. Michael and all Angels." Instituted according to Butler, A.D. 487. See *Goose*.

MICROMETER, an astronomical instrument used to discover and measure any small distance and the minuter objects in the heavens, such as the apparent diameters of the planets, &c.; its invention is ascribed by some to M. Huygens, A.D. 1652; but our countryman Gascoyne's instrument is prior to that time.

MICROSCOPES, said to have been invented by Fontana, in Italy, and by Drebbel, in Holland, about 1621. Those with double glasses were made at the period when the law of refraction was discovered, about 1624. Solar microscopes were invented by Dr. Hooke. In England great improvements were made in the microscope by Benjamin Martin (who invented and sold pocket microscopes about 1840), by Henry Baker, F.R.S., about 1763, and still greater during the present century by Wollaston, Ross, Jackson, Varley, and others. A binocular microscope (*i.e.* for two eyes), was constructed by Prof. Biddell, in 1851. Wenham's improvements were made known in 1861. Treatises on the microscope by J. Quekett (1848), and by Dr. W. B. Carpenter (1856), and Griffith and Henfrey's Micrographic Dictionary (1856), are valuable. The Microscopical Society of London was established in 1839.

MIDDLE AGES. See *Dark Ages*. Henry Hallam's "Middle Ages" appeared in 1818.

MIDDLE CLASS EXAMINATION. See *Education* (1858).

MIDDLE LEVELS. See *Levels*.

MIDIANITES, an eastern people, descendants of Midian, a son of Abraham.—Having enticed the Israelites to idolatry they were severely chastised, 1452 B.C. They invaded Canaan about 1249 B.C., and were thoroughly defeated by Gideon.

MIDWIFERY. Women were the only practitioners of this art among the Hebrews and Egyptians. Hippocrates, who practised medicine in Greece, 460 B.C., is styled by some the father of midwifery, as well as of physic.* It advanced under Celsus, who flourished A.D. 37, and of Galen, who lived A.D. 131. In England midwifery became a science about the period of the institution of the College of Physicians, 10 Hen. VII. 1518.†

MILAN. •Mediolanum, capital of the ancient Liguria, now Lombardy, is reputed to have been built by the Gauls, about 408 B.C.

Conquered by the Roman consul Marcellus B.C. 222

Seat of government of the western empire A.D. 286

Council of Milan 346

St. Ambrose, bishop of Milan 375

Milan plundered by Attila 452

Included in the Ostrogothic kingdom 489; in

the Lombard Kingdom 569

Becomes an independent republic 1101

* Agnodice, an Athenian virgin, disguised her sex to learn medicine. She was taught by Hierophilus, her father, the art of midwifery, and when employed, always discovered her sex to her patients. This brought her into so much practice, that the males of her profession, who were now out of employment, accused her, before the Areopagus, of corruption. She confessed her sex to the judges, and a law was made to empower all free-born women to learn midwifery. The whole story is doubtful.

† The celebrated Dr. Harvey personally engaged in the practice of it, about 1603; and after his example, the calling in of men in all difficult cases followed. Astruc affirms that the epoch of the employment of men-midwives goes no further back than the first lying-in of Madame de la Vallière, mistress of Louis XIV., 1663. She sent for Julian Clement, an eminent surgeon, who was conducted with great secrecy to the house. The same surgeon was employed in the subsequent labours of this lady, and he being very successful, men-midwives afterwards came into repute, the name of accoucheur being given to them.

MILAN, *continued.*

The emperor Frederic I. takes Milan and appoints a podestà	A.D. 1158	Made the capital of the kingdom of Italy, and Napoleon Bonaparte crowned with the iron crown here	May 26, 1805
It rebels: and is taken by Frederic and destroyed	1162	The <i>Milan decree</i> of Napoleon against all continental intercourse with England	Dec. 17, 1807
Rebuilt and fortified	1169	Insurrection against the Austrians; flight of the viceroy	March 18, 1848
The Milanese defeated by the emp. Frederic II.	1237	Another revolt promptly suppressed and rigorously punished	Feb. 6, <i>et seq.</i> , 1853
The Visconti become paramount in Milan	1277	Milan visited by the emperor of Austria	Nov. 1856
John Galeazzo Visconti takes the title of duke	1395	Amnesty for political offences granted	Dec. 1857
Francesco Sforza, son-in-law of the last of the Visconti, subdues Milan and becomes duke	1450	After the defeat of the Austrians at Magenta, June 4, Louis Napoleon and the king of	June 8, 1859
Milan conquered by Louis XII. of France	1499	Sardinia enter Milan	July 12, —
The French expelled by the Spaniards	1525	Peace of Villafranca; a large part of Lombardy transferred to Sardinia	Aug. 8, 1860
Milan annexed to the crown of Spain	1540	Victor-Emmanuel enters Milan as king	April 29, 30, 1861
Ceded to Austria	1714	Reactionary plots of Neapolitan soldiery suppressed	
Conquered by the French and Spaniards	1743		
Reverts to Austria, upon Naples and Sicily being ceded to Spain	1748		
Seized by the French	June 30, 1796		
Retaken by the Austrians	1799		
Regained by the French	May 31, 1800		

MILETUS, a Greek city of Ionia, Asia Minor, founded about 1043 B.C. During the war with Persia it was taken, 494 B.C., but restored 449. Here Paul delivered his celebrated charge to the elders of the church of Ephesus, A.D. 60 (*Acts* xx).

MILFORD HAVEN (Wales). Here the earl of Richmond, afterwards Henry VII., landed on his enterprise against Richard III. whom he defeated at Bosworth, 1485. The packets from this port to Ireland, sailing to Waterford, were established in 1787. The whole royal navy of England, it is said, can ride in safety in this haven. The dockyard established here in 1790, was removed to Pembroke in 1814.

MILITARY or **MARTIAL LAW** is built on no settled principle, but is entirely arbitrary, and, in truth, no law; but sometimes indulged rather than allowed, as law. *Sir Matthew Hale*. It has been several times proclaimed in these kingdoms, and in 1798 was almost general in Ireland, where it was proclaimed in 1803.

MILITARY ASYLUM, **ROYAL**, at Chelsea, "for the children of the soldiers of the regular army." The first stone was laid by the duke of York, June 19, 1801.

MILITARY KNIGHTS OF WINDSOR. See *Poor Knights of Windsor*.

MILITIA, the standing national force of these realms, is traced to king Alfred, who made all his subjects soldiers, A.D. 872 to 901.

First commission of array to raise a militia	1122	General militia act for England and Scotland, 1802; for Ireland	1809
Revived by Henry II.	1176	Enactment authorising courts-martial to inflict imprisonment instead of flogging passed	1814
Again revived	1557	Acts to consolidate the militia laws passed in 1852, * 1853, and	1854
Said to amount to 160,000 men	1623	Militia embodied on account of the Russian war, 1854; and on account of the Indian mutiny	1857
The present militia statutes established 1661 to 1663	1663		
Supplemental militia act passed	1797		
Irish militia offered its services in England, March 28, 1804	1804		

MILKY WAY (or **Galaxy**) in the heavens. Juno is said by the Greek poets to have spilt her milk in the heavens after suckling Mercury or Hercules. Democritus was the first who taught that the *via lactea* was occasioned by a confused multitude of stars, about 428 B.C. Proved by Galileo by means of the telescope.

MILLENNIUM. This doctrine supposes that the world will end at the expiration of the seven thousandth year from the creation; and that during the last thousand years Christ and the saints will reign upon earth; see *Rev.* ch. xx. It was very generally inculcated as early as the second and third centuries, by Papias, Justin Martyr, and others. *Burnett*.

MILLS. The earliest instrument for grinding manna and corn was the mortar. Moses forbade mill-stones to be taken in pawn, because it would be like taking a man's life to pledge. *Deut.* xxiv. 6. The hand-mill was in use among the Britons previously to the conquest by the Romans. The Romans introduced the water-mill. Cotton mills put in motion by water were erected by sir Richard Arkwright, at Cromford, Derbyshire. He died in 1792.

* This militia act was consequent upon the then prevailing opinion of the necessity of strengthening our national defences against the possibility of French invasion. The act empowered her majesty to raise a force not exceeding 80,000 men, of which number 50,000 were to be raised in 1852, and 30,000 in 1855; the quotas for each county or riding to be fixed by an order in council.

MINCIO, a river of Lombardy. Here the Austrians were repulsed by the French under Brune, Dec. 25-27, 1800; and by Eugene Beauharnais, Feb. 8, 1814. The provinces of Verona and Mantua are watered by the Mincio.

MINDEN (Prussia), **BATTLE OF**, Aug. 1, 1759, between the English, Hessians, and Hanoverians, on one side, and the French on the other. The first army was commanded by prince Ferdinand and (under him) lord George Sackville, who gained a complete victory, pursuing the enemy to the very ramparts of Minden. Lord George Sackville (afterwards lord George Germaine) commanded in this battle the British and Hanoverian horse, and for some disobedience of orders he was tried by a court-martial on his return to England, found guilty, and dismissed the service, April 22, 1760. He was afterwards restored to court favour, and became secretary of state, 1776.

MINES. Those of Great Britain are very numerous and rich.* Strabo and Tacitus enumerate gold and silver as among the products of England. The earliest instance of a claim to a mine royal being enforced occurs 47 Hen. III. 1262. It related to mines containing gold, together with copper, in Devonshire; and in Edward I.'s reign, according to Mr. Ruding, the mines in Ireland, which produced silver, were supposed to be so rich, that the king directed a writ for working them to Robert de Ufford, lord justice, 1276. The lead mines of Cardiganshire, from which silver has ever since been extracted, were discovered by sir Hugh Myddelton in the reign of James I. Haüy's "*Traité de Minéralogie*" appeared in 1801: a British Mineralogical Society was established in 1800. The government School of Mines, &c., Jermyn-street, St. James's, was opened in 1851. An act for the regulation of mines was passed in 1860. A Miners' Protection Association was proposed by Mr. William Gurney and others in March 1862.

MINIÉ RIFLE, invented at Vincennes, about 1833, by M. Minié (born about 1800). From a common soldier he raised himself to the rank of chef d'escadron. His rifle is considered to surpass all made previous to it, for accuracy of direction and extent of range. It was adopted by the French, and, with various modifications, by the British army in 1852.

MINISTER OF WAR. See *War Minister*.

MINNESINGERS, lyric German poets, of the twelfth and thirteenth centuries, who wrote to cheer and entertain the knights and barons of the time. In the fourteenth century, the *Meister-singers* devoted themselves to the enlivening the burgesses and citizens. Some of their songs have been collected and published.

MINORCA and MAJORCA, the Balearic Isles (*which see*). Minorca was captured by lieut.-gen. Stanhope and sir John Leake in Aug. 1708, and was ceded to the British by the treaty of Utrecht in 1713. It was retaken by the Spanish and French in July 1756. Admiral Byng fell a victim to the exasperation of the public mind, for not relieving it, with a force greatly inferior to that of the enemy. See *Byng*. It was restored to the British at the peace in 1763. Besieged by the Spaniards, and taken Feb. 5, 1782. It was again captured by the British under gen. Stuart, without the loss of a man, Nov. 15, 1798; but was given up at the peace of Amiens in 1802.

MINSTRELS, originally pipers appointed by lords of manors to divert their copyholders while at work, owed their origin to the glee-men or harpers of the Saxons, and continued till about A.D. 1560. John of Gaunt erected a court of minstrels at Tutbury in 1380. So late as the reign of Henry VIII. they intruded without ceremony into all companies, even at the houses of the nobility; but in Elizabeth's reign they sank into neglect, and were adjudged rogues and vagabonds (1597).

MINT. Athelstan first enacted regulations for the government of the mint about A.D. 928. There were several provincial mints under the control of that of London. Henry II. is said to have instituted a mint at Winchester, 1125. Stow says the mint was kept by Italians, the English being ignorant of the art of coining, 7 Edw. I. 1278. The operators were formed into a corporation by the charter of king Edw. III., in which condition it consisted of the warden, master, comptroller, assay-master, workers, coiners, and subordinates. The first entry of gold brought to the mint for coinage occurs 18 Edw. III. 1343. Tin was coined by Charles II. 1684; and gun-metal and pewter by his successor James. Sir Isaac Newton was warden 1699-1727, during which time the debased coin was called in, and new-issued at the loss of the government. Between 1806 and 1810, grants amounting to 262,000*l.* were made by parliament for the erection of the present Mint, which was

* In 1857 the value of the mineral produce of the United Kingdom was estimated at 25,961,649*l.*; and that of the metals obtained from the furnace at 18,105,708*l.* *Mining Records.*

completed in 1813; it was injured by fire Oct. 31, 1815. The new constitution of the mint, founded on the report of the hon. Wellesley Pole, took effect in 1817.

MASTERS OF THE MINT.

1817. Wellesley Pole.
1823. Thomas Wallace.
1827. George Tierney.
1828. J. C. Herries.

1830. Lord Auckland.
1834. James Abercrombie.
1835. Alexander Baring.
— Henry Labouchere.
1841. William E. Gladstone.

1845. Sir George Clerk.
1846. Richard L. Shiel.
1850. Sir John F. Herschel, F.R.S.
1855. Thomas Graham, F.R.S.

MIRRORS. In ancient times mirrors were made of metal; and from a passage in the Mosaic writing we learn that the mirrors used by the Jewish women were made of brass. Mirrors in silver were introduced by Praxiteles, 328 B.C. Mirrors or looking-glasses were made at Venice A.D. 1300; and in England, at Lambeth, near London, in 1673. The improvements in manufacturing plate-glass, and that of very large size, has cheapened looking-glasses very much. Methods of silvering glass by a solution of silver, thus avoiding the use of mercury, so injurious to the health of the workmen, were made known by M. Petitjean in 1851; and by M. Cimeg in 1861.

MISSIONS. Among the Romanists, the religious orders of St. Dominic, St. Francis, St. Augustin, &c., had missions to the Levant and to America. Marco Polo is said to have introduced missionaries into China, A.D. 1275. The Jesuits had missions to China (*which see*) and to most other parts of the world. Among the Protestants, an early undertaking of this kind was a Danish mission, planned by Frederick IV. in 1706. But the Moravian Brethren may be said to have led the way to the new Christian missions about 1732. The London Missionary Society held their first meeting Nov. 4, 1794.*

MISSISSIPPI, a great river, N. America. The Mississippi trade was begun in England, in Nov. 1716. The celebrated Mississippi scheme or bubble in France, which was commenced about the same period, exploded in 1720; at which time the nominal capital is said to have amounted to 100,000,000*l.* The ruin of thousands of families, dupes of this iniquitous scheme, soon followed in both countries. See *Lavo's Bubble*.—The North American state MISSISSIPPI was admitted as a state of the union in 1817, and seceded from it by ordinance, Jan. 9, 1861.

MISSOLOGHI, a town in Greece, heroically and successfully defended against the Turks by Marco Botzaris in 1822. It was taken in 1826 after a year's siege.—Here lord Byron died in 1824. It was surrendered to the Greeks in 1829.

MISSOURI, a North American State, admitted into the Union 1821, decided on neutrality in the conflict of 1861, but was invaded by both the confederate and federal forces in June of that year, and became one of the seats of war. See *United States*, 1861 *et seq.* For the MISSOURI COMPROMISE, see *Slavery in America*.

MITHRIDATE, a physical preparation in the form of an electuary, supposed to be antidote to poison and the oldest compound known, is said to have been invented by Mithridates, king of Pontus, about 70 B.C.

MITHRIDATIC WAR, caused by the massacre of 100,000 Romans, by Mithridates, king of Pontus, 88 B.C., and remarkable for its duration, its many battles, the destruction of human life it occasioned, and the cruelties of its commanders. Mithridates having taken the consul Aquilius, made him ride on an ass through a great part of Asia, crying out as he rode, "I am Aquilius, consul of the Romans." He ultimately despatched him by ordering melted gold to be poured down his throat, in derision of his avarice, 85 B.C. Mithridates was defeated by Pompey, 66 B.C.; and poisoned himself, 63 B.C.

MITRE. The cleft cap or mitre was worn by the Jewish high-priest, 1491 B.C. It had on it a golden plate inscribed "HOLINESS TO THE LORD." *Exodus xxxix. 28.* Among the primitive Christians, young women who professed a state of virginity, and were solemnly consecrated thereto, wore a purple or golden mitre. Anciently the cardinals wore mitres; but, at the council of Lyons, in 1245, they were appointed to wear hats.

MNEMONICS, artificial memory, was introduced by Simonides the younger, 477 B.C. *Arund. Marbles.* In modern times, mnemonics have been elaborately treated; "Mnemo-

* Our missionaries abroad have not unfrequently suffered grievous hardships and privations. Commander Allan Gardner, R.N., who left England in the *Ocean Queen* in Sept. 1850, on the Patagonian mission, with Mr. Williams, surgeon, Mr. Maidment, catechist, and four others, died on Picton Island, at the mouth of the Beagle Channel, to the south of Tierra del Fuego, having been starved to death, all his companions having previously perished, Sept. 6, 1851.—M. Schoffier, a missionary to Cochin-China, was publicly executed at Son-Tay, by order of the grand mandarin, for preaching Christianity, such preaching being prohibited by the law of that country, May 4, 1851.

nica" was published by John Willis in 1618; and the *Memoria Technica* of Dr. Grey first appeared in 1730. A system of mnemonics was announced in Germany, in 1806-7.

MÖCKERN (in Prussia), **BATTLE OF**, between the French army under Eugene Beauharnais, and the allied Russian and Prussian army, which latter was defeated with great loss, April, 1813. Another and yet more desperate, and still more sanguinary battle was fought here, Oct. 14, 1813, between the French and the allies. In this latter bloody conflict the place was taken and retaken five different times.

MODELS. The first were figures of living persons, and Dibutades, the Corinthian, is the reputed inventor of those in clay. His daughter, known by the appellation of the Corinthian Maid, being about to be separated from her lover, who was going on a distant journey, traced his profile by his shadow on the wall; her father filled up the outline with clay, which he afterwards baked, and thus produced a figure of the object of her affection, giving rise to an art till then unknown, about 985 B.C.*

MODENA (formerly Mutina), till lately capital of the duchy in Central Italy; was governed by the house of Este, from 1288 till 1796, when the last male of that house, the reigning duke Hercules III., was expelled by the French. By the treaty of Campo Formio, the Modenese possessions were incorporated with the Cisalpine republic, 1797. The archduke Francis of Este, son of the archduke Ferdinand of Austria, and of Mary, the heiress of the last duke, was restored in 1814. Modena, in accordance with the voting by universal suffrage, was annexed to Sardinia on March 18, 1860. Population, in 1857, 604,512.

RECENT GRAND-DUKES OF MODENA.

- | | |

MOESIA (now Bosnia, Servia, and Bulgaria) was finally subdued by Augustus. It was successfully invaded by the Goths, 253 B.C., who eventually settled here. See *Goths*.

MOGULS, or MONGOLS. They deduce their origin from Japhet, son of Noah. His son, Turk, they say, was the first king or khan of those nations afterwards known as Turks, Tartars, and Moguls. Their first great leader, Jenghis Khan, overran Asia, A.D. 1206-27. They subsequently ravaged the east of Europe, about 1241-2, when they began to retreat. Timour Beg, or Tamerlane, was their chief after a train of conquests 1368-1404. His descendant, Baber, formed the empire of the Great Mogul, 1526. See *India*.

MOHAMMERAH, a Persian town near the Euphrates, captured, after two hours' cannonading, by sir James Outram, during the Persian war, March 26, 1857. News of the peace arrived there on the 4th of April.

MOHATZ (Lower Hungary). Here, Louis, king of Hungary, defeated by the Turks under Solyman II. with the loss of 22,000 men, was suffocated by the fall of his horse in a muddy brook, Aug. 29, 1526. Here also prince Charles of Lorraine defeated the Turks, Aug. 12, 1687.

MOHILOW (in Russia). Here the Russian army, under prince Bagration, was signally defeated by the French under marshal Davoust, prince of Eckmühl, July 23, 1812.

MOHOCKS, ruffians, who went about London at night, wounding and disfiguring the men, and indecently exposing the women. One hundred pounds were offered by royal proclamation, in 1712, for apprehending any one of them. See *Northouck*.

MOLDAVIA. See *Danubian Principalities*.

MOLUCCAS, an archipelago in the Indian Ocean (the chief island, Amboyna), discovered by the Portuguese, about 1511, and held by them secretly till the arrival of the Spaniards, who claimed them till 1629, when Charles V. yielded them to John III. for a large sum of money. The Dutch conquered them in 1607, and have held them ever since,—except from 1810 till 1814, when they were subject to the English.

MOLWITZ (in Prussian Silesia). Here the Prussians, commanded by Frederick II., obtained a great victory over the Imperialists, April 10, (March 30), 1741.

* A beautiful model of the new town of Edinburgh before the building began, was formed in wood. A model was made of a bridge over the Neva, of uncommon strength as well as elegance; and the mountains of Switzerland, modelled by general Pfiffer, rank as one of the most surprising undertakings ever achieved by human industry. This last was begun in 1766, and was completed Aug. 1785. M. Choffin's model of Paris also was remarkable for its precision.

MOLYBDENUM, a whitish, brittle, almost infusible metal. Scheele, in 1778, discovered molybdic acid in a mineral hitherto confounded with graphite. Hjelm, in 1782, prepared the metal from molybdic acid; and in 1825 Berzelius described most of its chemical characters. *Gmelin*.

MONACHISM (from the Greek *monos*, alone). Catholic writers refer to the prophet Elijah, and the Nazarenes mentioned in *Numbers*, ch. vi., as early examples. The first Christian ascetics appear to be derived from the Jewish sect of the Essenes, whose life was very austere, practising celibacy, &c. About the time of Constantine (A.D. 306-322) numbers of these ascetics withdrew into the deserts, and were called *hermits*, *monks*, and *anchorites*; * of whom Paul, Anthony, and Pachomius were most celebrated. Simeon, the founder of the Stylitæ (or pillar saints), died A.D. 451. He is said to have lived on a pillar 30 years. St. Benedict, the great reformer of monachism, published his rules and established his monastery at Monte Cassino, about A.D. 529. The Carthusians, Cistercians, &c., are so many varieties of Benedictines. In 964, by decree of king Edgar, all married priests were to be replaced by monks. See *Abbys* and *Benedictines*.

MONACO, a principality, N. Italy, held by the Genoese family Grimaldi since A.D. 968. By treaty on Feb. 2, 1861, the prince ceded the communes of Roquebrune and Mentone, to France for four million francs. The present prince, Charles III., born Dec. 8, 1818, succeeded June 20, 1856. Population about 1200.

MONARCHY. The most ancient was that of the Assyrian, founded soon after the Deluge. See *Assyria*. Historians reckon four grand or almost universal monarchies—the Assyrian, Persian, Grecian, and Roman, *which see*.

MONASTERIES. See *Abbys*.

MONEY is mentioned as a medium of commerce in *Genesis* xxiii., when Abraham purchased a field as a sepulchre for Sarah, 1860 B.C. The coinage of money is ascribed to the Lydians. Moneta was the name given to their silver by the Romans, it having been coined in the temple of Juno-Moneta, 269 B.C. Money was made of different ores, and even of leather and other articles, both in ancient and modern times. It was made of pasteboard by the Hollanders so late as 1574. Silver has greatly decreased its value since the Norman conquest; viz. a pound in that age was three times the quantity that it is at present, and twelve times its value in purchasing any commodity. See *Coin*; *Gold*; *Silver*; *Copper*; *Mint*; *Banks*, &c.

MONGOLS. See *Tartary*.

MONK. See *Monachism*.

MONMOUTH'S REBELLION. James duke of Monmouth, (born at Rotterdam, April 9, 1649,) a natural son of Charles II. by Lucy Waters, was banished England for a conspiracy in 1683. He invaded England at Lyme, June 11, 1685. He was proclaimed king at Taunton on the 20th of the same month; was defeated at Sedgemoor near Bridgewater, July 6; and was beheaded on Tower-hill, July 15, 1685.

MONOLITH, Greek for single stone. See *Obelisk*. **MONOPHYSITES**. See *Eutychians*.

MONOPOLIES. Commercial monopolies reached to such a height in England, that parliament petitioned against them, and they were in consequence mostly abolished about the close of Elizabeth's reign, 1601-2. They were further suppressed, as being contrary to law, 21 James I. 1624. In 1630, Charles I. violated this law by establishing monopolies of soap, salt, leather, and other things in common use, to supply a revenue without the help of parliament. It was decreed that none should be in future created, as was previously the custom, by royal patent, 16 Charles I. 1640. *Anderson's History of Commerce*.

MONOTHELITES, heretics who affirmed that Jesus Christ had but one will, were favoured by the emperor Heraclius, A.D. 630; they long disturbed the church and empire, and merged into the sect of the Eutychians, *which see*.

MONROE DOCTRINE, a term applied to the determination expressed by James Monroe, president of the United States, 1817-24, not to permit any European power to interfere in restraining the progress of liberty in North or South America. This doctrine was referred to in 1859, with the view of weakening the influence of Great Britain and Spain on the American continent.

MONSTER, THE. Renwick Williams, who prowled nightly through the streets of London, secretly armed with a sharp instrument, a double-edged knife, with which he shockingly

* The anchorites of the 12th, 13th, and 14th centuries, must not be confounded with the anchorites or hermits. The former were confined to their solitary cells: the latter were permitted to go where they pleased.

wounded numbers of females whose more respectable appearance attracted his attention. He was tried and convicted on a variety of these charges, July 8, 1790. See *Mohocks*.

MONTALEMBERT'S TRIAL. See *France*, 1858.

MONTANISTS, followers of Montanus, of Ardaba, in Mysia, an extraordinary enthusiast, about A.D. 171. He was reputed to have the gift of prophecy, and proclaimed himself the Comforter promised by Christ, condemned second marriages as fornication, permitted the dissolution of marriage, forbade the avoiding martyrdom, and ordered a severe fast of three lents; he hanged himself with Maximilla, one of his women-scholars, before the close of the second century. *Cave*. The eloquent father, Tertullian, joined the sect, 204.

MONT BLANC, in the Swiss Alps, is the highest mountain in Europe, being 15,781 feet above the level of the sea. The summit was first reached by Saussure, aided by a guide named Balma, on Aug. 2, 1787. Mr. John Auldjo and Mr. (afterwards sir Charles) Fellows published illustrated accounts of their ascents in 1827. The summit was attained by Dr. Hamel (when three of his guides perished) in 1820, and by many other persons before and since. In professor Tyndall's "Glaciers of the Alps" will be found an account of his ascents in 1857 and 1858. See *Alps*.

MONTABELLO, a village in Piedmont, where Lannes defeated the Austrians, June 9, 1800, and acquired his title of duke of Montebello; and where (May 20, 1859), after a contest of six hours, the French and Sardinians defeated the Austrians, who lost about 1000 killed and wounded, and 200 prisoners. The French lost about 670 men, including general Beuret. The action was honourable to both parties. The Tyrolese riflemen long held a churchyard, making deadly havoc among the French artillerymen. The Sardinian cavalry displayed great gallantry.

MONTE CASINO (Central Italy). Here Benedict formed the first monastery of his new order of monks, A.D. 529.

MONTEM. See *Elon*.

MONTENEGRO, now an independent principality in European Turkey, was conquered by Soliman II. in 1526. It rebelled in the last century, and established an hereditary hierarchical government in the family of Petrovitsch Njegesch, endured, but not recognised by the Porte. The nephew and successor of the Vladika, Peter II., in 1851 declined to assume the ecclesiastical function, and declared himself a temporal prince with the title of Daniel I. In 1852 he began war with Turkey. Montenegro was put in a state of blockade, Dec. 14, 1852, which was raised April 10, 1853. After several indecisive encounters, tranquillity was restored by the influence of the arms and negotiations of Omar Pacha, the general of the Turkish army; he left the province, Feb. 25, 1853. In June, 1858, war again broke out, and the Turks were defeated at Grahovo. Peace was restored in Nov. following. The country was much disturbed through the tyrannical conduct of prince Daniel, who was assassinated, Aug. 13, 1860, aged 35. He was succeeded by his nephew Nicolas (married Nov. 8, 1860). In consequence of an insurrection in the Herzegovina, favoured by the Montenegrines, the sultan of Turkey again announced the blockade of Montenegro, April 4, 1861. Omar Pasha invaded the province with an army of 32,000 men in August: after many conflicts with various success, but latterly in favour of the Turks, peace was made in 1862. See *Herzegovina*.

MONTENOTTE, a village in Piedmont, memorable as being the site of the first victory gained over the Austrians by Napoleon Bonaparte, April 11, 1796.

MONTEREAU (near Paris). Here the allied armies were defeated by the French, commanded by Napoleon, with great loss in killed and wounded; but it was one of his last triumphs, Feb. 18, 1814.—On the bridge of Montereau at his meeting with the dauphin, John the Fearless, duke of Burgundy, was killed by Tanneigny de Châtel in 1419. This event led to our Henry V. subduing France, the young duke Philip joining the English.

MONTE VIDEO (South America), was taken by storm by the British forces under sir Samuel Auchmuty, but with the loss of nearly one-third of our brave troops, Feb. 3, 1807. It was evacuated July 7 the same year, in consequence of the severe repulse the British met with at Buenos-Ayres. See *Buenos-Ayres*. Monte Video, a subject of dispute between Brazil and Buenos-Ayres, given up to Uruguay, 1828.

MONTFERRAT (Lombardy), HOUSE OF, celebrated in the history of the Crusades; began with Alderan, who was made marquis of Montferrat by Otho, about 967. Conrad of Montferrat became lord of Tyre, and reigned from 1187 till 1191, when he was assassinated. William IV. died in a cage at Alexandria, having been thus imprisoned nineteen months,

1292. Violante, daughter of John II., married Andronicus Palæologus, emperor of the East. Their descendants ruled in Italy amid perpetual contests till 1533, when John George Palæologus died without issue. His estates passed after much contention to Frederic II. Gonzaga, marquis of Mantua, in 1536.

MONTGOMERY, capital of Alabama, United States, founded 1817. Here the state convention passed the ordinance of secession from the Union on Jan. 11, 1861; here the confederate congress met on Feb. 4, and elected Jefferson Davis president, and Alexander Stephens vice-president, of the confederate states of North America; and here they were inaugurated on Feb. 18. On May 21, the congress adjourned to meet on July 20 at Richmond, in Virginia, that state having joined the confederates and become the seat of war.

MONTIEL (Spain), BATTLE OF, March 14 (or 23), 1369, between Peter the Cruel, king of Castile, and his brother Henry of Trastamare, aided by the French warrior Bertram du Guesclin. Peter was totally defeated, and afterwards slain by his brother and others at a meeting to which he had been drawn by Du Guesclin, whom he had endeavoured to bribe to permit him to escape.

MONTREAL, the second city in Lower Canada, built by the French.

Surrendered to the English	Sept. 6, 1760	A destructive fire	Aug. 23, 1850
Taken by the Americans, Nov. 12, 1775; retaken by the British	June 15, 1776	Another, destroying 1200 houses, the loss estimated at a million sterling	July 12, 1850
The church, Jesuits' college, prison, and many buildings burnt down	June 6, 1803	At an anti-papal lecture here by Gavazzi, riots ensued and many lives were lost	June 10, 1853
Great military affray	Sept. 29, 1833	The cathedral destroyed by fire	Dec. 10, 1856
The self-styled "loyalists" of Montreal assault the governor-general, lord Elgin; enter the parliament-house, drive out the members, and set fire to the building	April 26, 1849	Victoria railway bridge (<i>which see</i>) formally opened by the prince of Wales	Aug. 25, 1860

MONUMENT of LONDON begun in 1671, and finished in 1677. The pedestal is forty feet high, and the edifice altogether 202 feet, that being the distance of its base from the spot where the fire which it commemorates commenced. It is the loftiest isolated column in the world. Its erection cost about 14,500*l*. The staircase is of black marble, consisting of 345 steps, by which a balcony is reached.* Of the four original inscriptions, three were Latin, and the following in English :—

THIS PILLAR WAS SET UP IN PERPETVALL REMEMBRANCE OF THAT MOST DREADFUL BURNING OF THIS PROTESTANT CITY, BEGUN AND CARRIED ON BY Y^e TREACHERY AND MALICE OF Y^e POPISSH FACTION, IN Y^e BEGINNING OF SEPTEMBER. IN Y^e YEAR OF OUR LORD 1666, IN ORDER TO Y^e CARRYING ON THEIR HORRID PLOTT FOR EXTRIPATING Y^e PROTESTANT RELIGION AND OLD ENGLISH LIBERTY, AND Y^e INTRODUCING POKERY, AND SLAVERY.

These legends were cut in 1681, obliterated by James II.; re-cut in the reign of William III.; and were finally erased by order of the common council, Jan. 26, 1831. They produced Pope's indignant lines :—

"Where London's column, pointing at the skies,
Like a tall bully, lifts the head, and lies."

MOODKEE (India). Here, on Dec. 18, 1845, the Sikhs attacked the advanced guard of the British, and were repulsed three miles, losing many men and 15 pieces of cannon. Sir Robert Sale was mortally wounded. Lady Sale signalised herself during the two memorable retreats from Afghanistan. The battle followed that of Ferozeshah (*which see*).

MOOLTAN (India). Here Moolraj Sing, ruler of the Sikhs, murdered Mr. Vans Agnew and lieutenant Anderson, April 21, 1848. This led to a siege. A conflict took place between the British and the Sikhs, in which the latter were driven to the town of Mooltan with great loss, Nov. 7, 1848. It was taken after a protracted bombardment, Jan. 2, 1849, and the citadel made an unconditional surrender, together with its garrison, Jan. 22, 1849. See *India*.

MOON. The full moon was held favourable for any undertaking by the Spartans, and the Greeks generally looked upon full moons, or the times of conjunction of the sun or moon, as seasons most favourable to marriage. Opacity of the moon, and the true causes of lunar eclipses, taught by Thales, 640 B.C. Hipparchus made observations on the moon at Rhodes, 127 B.C. Posidonius accounted for the tides from the motion of the moon, 79 B.C.

* William Green, a weaver, fell from this monument, June 25, 1750. A man named Thomas Craddock, a baker, precipitated himself from its summit, July 7, 1788. Mr. Lyon Levy, a Jewish diamond merchant, of considerable respectability, threw himself from it, Jan. 18, 1810; as did more recently three other persons: in consequence of which a fence was placed round the railings of the gallery in 1839.

Diog. Laert. Maps of the moon have been constructed by Hevelius (1647), Cassini (1680), and others. Beer and Mädler's beautiful map was published in 1834. In 1862 professor John Phillips invited the British Association to make arrangements to obtain a "systematic representation of the physical aspect of the moon." Photographs of the moon were taken and exhibited by Mr. Warren De la Rue in 1857. See *Eclipse*.

MOORS, formerly the natives of Mauritania (*which see*), but afterwards the name given to the Numidians and others, and now applied to the natives of Morocco and the neighbourhood. They assisted Genseric and the Vandals in their invasion of Africa, A.D. 429, and frequently rebelled against the Roman emperors. They resisted for a time the progress of the Arab Mahometans, but were overcome by them in 707; and in 1019 introduced into Spain to support the Arabs, where their arms were long victorious. In 1063 they were defeated in Sicily by Roger Guiscard. The Moorish kingdom of Granada was set up in 1237, and lasted till 1492, when it fell before Ferdinand V. of Castile, mainly owing to internal discord. The expulsion of the Moors from Spain was decreed, but not fully carried into effect till 1609, when the bigotry of Philip III. inflicted this great injury to his country. About 1518 the Moors established the piratical states of Algiers and Tunis (*which see*). In the history of Spain, the Arabs and Moors must not be confounded.

MORAL PHILOSOPHY has been defined as the knowledge of our duty, the science of ethics, or art of being virtuous and happy. Socrates is universally regarded as the father of ancient moral philosophy, about 430 B.C., and Grotius of that in modern times, about A.D. 1623. See *Philosophy*.

MORAT (Switzerland), where Charles the Bold of Burgundy was completely defeated by the Swiss, June 22, 1476. A monument, constructed of the bones of the vanquished, was destroyed by the French in 1798, who erected a stone column in its place.

MORAVIA, an Austrian province, occupied by the Slavonians about 548, and conquered by the Avars and Bohemians, who submitted to Charlemagne. About 1000 it was subdued by Boleslas of Poland, but recovered by Ulric of Bohemia in 1030. After various changes Moravia and Bohemia were amalgamated into the Austrian dominions in 1526.

MORAVIANS, UNITED BRETHREN, said to have been part of the Hussites, who withdrew into Moravia in the fifteenth century; while the Brethren say that their sect is derived from the Greek church in the ninth century. In 1722 they formed a settlement (called *Herrnhut*, the Watch of the Lord), on the estate of count Zinzendorf. Their church consisted of 500 persons in 1727. They were introduced into England by count Zinzendorf about 1737; he died at Chelsea in June 1760. In 1851 they had 32 chapels in England. They are zealous missionaries, and founded the early settlements in foreign parts.

MOREA, the Peloponnesus. See *Greece*.

MORETON BAY (New South Wales). The colony founded here in 1859 has since been named *Queen's Land* (*which see*).

MORGANATIC MARRIAGES. When the left hand is given instead of the right, between a man of superior and a woman of inferior rank, in which it is stipulated that the latter and her children shall not enjoy the rank or inherit the possessions of the former. The children are legitimate. They are frequently contracted in Germany by royalty and the higher nobility. Our George I. was thus married; and later, the king of Denmark to the countess of Danner, Aug. 7, 1850.

MORGARTEN (Switzerland), **BATTLE OF**, Nov. 16, 1315. The most memorable, as well as extraordinary and glorious in the annals of Switzerland; 1300 Swiss engaged 20,000 Austrians, commanded by the duke Leopold, whom they completely defeated. They seized upon the heights of Morgarten, overlooking the defile through which the enemy was to enter their territory from Zug, and thus achieved their victory.

MORICE DANCE, an ancient dance peculiar to some of the country parts of England, and, it is said, also to Scotland, was performed before James I. in Herefordshire.

MORMONITES (calling themselves the Church of Jesus Christ, of LATTER-DAY SAINTS). This sect derives its origin from Joseph Smith, called the prophet, who announced in 1823, at Palmyra, New York, that he had had a vision of the angel Moroni. In 1827 he said that he found the book of Mormon, written on gold plates in Egyptian characters. This book, there is good reason to believe, was written about 1812, by a clergyman named Solomon Spaulding, as a religious romance in imitation of the scripture style. It was translated and published in America in 1830, in England in 1841. It fell into the hands of Rigdon and Smith, who determined to palm it off as a new revelation. In 1830 they organised a church

at Kirkland, Ohio. In 1831-2, they founded Zion, in Jackson county, Missouri. From 1833 to 1839 the sect endured much persecution, and, driven from place to place, was compelled to travel westwards; till in 1840-1 the city Nauvoo on the Mississippi was laid out and a temple was built. In 1844, Joseph and his brother Hyrum, when in prison on a charge of treason, were shot by an infuriated mob, and Brigham Young was chosen seer. In 1845, being much harassed by their neighbours, departure from Nauvoo was determined on, and the Great Salt Lake was chosen "for an everlasting abode," and taken possession of, July 24, 1847. In 1849, the valley was surveyed by order of the United States government, and in 1850 the colony had attained to great prosperity. In the same year the provisional government was abolished, and the Utah territory was recognised by the United States, Brigham Young being appointed the first governor; and the university of Deseret was founded. The population in 1851 was 11,354. The Mormonites command payment of tithes, honour and encourage labour, permit polygamy, and believe in their leaders working miracles. Missionaries are sent out to all parts of the globe, and the sect is said to be increasing in Europe. In August, 1855, it was stated that the crops at the Utah settlement were almost utterly destroyed by locusts. In 1857, the United States judge at Utah resigned from inability to discharge his functions, in consequence of the violent and treasonable conduct of the Mormons, and their leader, Brigham Young; whereon the United States government sent an army to Utah: a compromise was entered into, and peace was established by governor Cummings in June, 1858. A conference of Mormon elders, &c., was held in London on Sept. 1, 1857, at which most offensive speeches were made and songs sung advocating polygamy, &c. A Mormonite meeting took place at Southampton, Feb. 18, 1861. A French Mormonite priest preached at Paris in Oct. 1862.

MOROCCO, an empire in North Africa, formerly Mauritania (*which see*). In 1051 it was subdued for the Fatimite caliphs by the Almoravides, who eventually extended their dominion into Spain. These were succeeded by the Almohades (1129), the Merinites (1270), and in 1516 by the Chetifs, pretended descendants of Mahomet, the now reigning dynasty. In 1844 the Moors attacked the French at the instigation of Abd-el-Kader. The prince de Joinville bombarded Tangiers, Aug. 6, and Mogader, Aug. 16. On Aug. 14 marshal Bugeaud signally defeated the Moors at the river Isly, from which he acquired the title of duke. Peace was signed between France and Morocco, Sept. 10, 1844. Morocco has been frequently at war with the Spaniards and Portuguese since the thirteenth century, principally owing to the African pirates, who are not sufficiently restrained by the sultan. Muley Abderrahman reigned from 1822 till his death in Sept. 1859; he was succeeded by Sidi Mohammed, the present sultan or emperor. The Spaniards, who possess several places on the coast of Morocco (Ceuta, Penon de Valez, &c.), having suffered much annoyance by Moorish pirates, declared war against the sultan in Oct. 1859. Negotiations had proved fruitless: the Spanish government increasing their demands as the sultan yielded. The English government interfered in vain. For the events of the war, see *Spain*, 1859-60. A Moorish ambassador (the first since the time of Charles II.), arrived in London in June, 1860, and stayed till August. He gave 200*l.* to the lord mayor for the London charities. On Oct. 24, 1861, the British government gave a guarantee for a loan of 426,000*l.* to the emperor to meet his engagements with Spain.

MORTALITY. See *Bills of Mortality*. The following list, compiled from Bills of Mortality of London, shows the average of diseases, &c., in 20,000 deaths in that city:—

Abcess	79	Erysipelas	18	Palsy	31	CASUALTIES.	
Age and debility	1614	Fever	694	Paralysis	187	Broken limbs	12

MORTARA ABDUCTION. See *Jews*, 1858.

MORTARS. A short gun with an extraordinary large bore, and close chamber, used for throwing bombs; said to have been used at the siege of Naples in 1435, and to have been first made in England in 1543. The celebrated mortar left by Soult in Spain was fixed in St. James's-park in Aug. 1816, and still remains there. On Oct. 19, 1857, a colossal mortar, constructed by Mr. Robert Mallet, was tried at Woolwich; with a charge of 70 lbs. it threw a shell weighing 2550 lbs. $1\frac{1}{2}$ mile horizontally, and about $\frac{3}{4}$ mile in height.

MORTIMER'S CROSS (Herefordshire). The earl of Pembroke and the Lancastrians were severely defeated by the young duke of York, afterwards Edward IV., Feb. 2, 1461. He assumed the throne as Edward IV. in March following.

MORTMAIN ACT (*mort main*, dead hand). When the survey of all the land in England was made by William I., 1085-6, the whole was found to amount to 62,215 knights' fees, of which the church then possessed 28,015, to which additions were afterwards made, till the 7th of Edward I., 1279, when the statute of mortmain was passed, from a fear that the estate of the church might grow too bulky. By this act it was made unlawful to give any estates to the church without the king's leave; and this act, by a supplemental provision, was made to reach all lay-fraternities, or corporations, in the 15th of Richard II., 1391. Mortmain is such a state of possession as makes it inalienable, whence it is said to be in a dead hand. Several statutes have been passed on this subject; and one much referred to is the 10th George II., 1736.

MOSCOW, the ancient capital of Russia, was founded it is said by Dolgorouki, about A.D. 1147. The occupation of the south of Russia by the Mongols, in 1235, led to Moscow becoming the capital, and beginning with Jaroslav II., 1238, its princes became the reigning dynasty. Moscow has been frequently taken in war: it was plundered by Timour in 1382; by the Tartars in 1451 and 1477; and by Ladislas of Poland in 1611. This city was entered by Napoleon I. and the French, Sept. 14, 1812, and the Russian governor, Rostopchin, ordered that it should be set on fire in five hundred places at once. In this memorable conflagration, 11,840 houses were burnt to the ground, besides palaces and churches. The French, thus deprived of quarters, evacuated Moscow, Oct. 19, and it was re-entered by the Russians, Oct. 22, following. Since then, Moscow has been rebuilt with great splendour. Although St. Petersburg (built in 1703) has become the capital, yet Moscow is the most beloved by the Russians, who regard it as a holy city. The railway to St. Petersburg was opened in 1851.

MOSKWA, or BORODINO, BATTLE OF. See *Borodino*.

MOSQUITO COAST (Central America). The Indians inhabiting this coast have been long under the protection of the British, who held Belize and a group of islands in the bay of Honduras. The jealousy of the United States long existed on this subject. In April, 1850, the two governments covenanted not "to occupy, or fortify, or colonise, or assume, or exercise any dominion over any part of Central America." In 1855 the United States charged the British government with an infraction of the treaty; on which the latter agreed to cede the disputed territory to the republic of Honduras, with some reservation.* The matter was finally settled in Feb. 1857.

MOSS-TROOPERS, desperate plunderers, and lawless soldiers, secreting themselves in the mosses on the borders of Scotland. They were finally extirpated in 1609.

MOTTOES, ROYAL. *Dieu et mon Droit*, first used by Richard I., A.D. 1198. *Ich dien*, "I serve," adopted by Edward the Black Prince, at the battle of Cressy, 1346. *Honi soit qui mal y pense*, the motto of the Garter, 1349. *Je maintiendrai*, "I will maintain," adopted by William III., to which he added, in 1688, "the liberties of England and the Protestant religion." *Semper eadem*, adopted by queen Anne, 1702. See them severally.

MOUNTAIN PARTY. See *Clubs, French*.

MOUNTS. See *Etna, Hecla, Vesuvius, Bernard, Calvary, and Olivet*.

MOURNING FOR THE DEAD. The Israelites neither washed nor anointed themselves during the time of mourning, which for a friend lasted seven days; upon extraordinary occasions a month. The Greeks and Romans fasted. The ordinary colour for mourning in Europe is black; in China, white; in Turkey, violet; in Ethiopia, brown; it was white in Spain until A.D. 1498. *Herrera*. Anne of Brittany, the queen of two successive kings of

* St. Juan del Norte (Greytown) was held by the British on behalf of the Mosquitoes till the American adventurers, under col. Kinney, took possession of it in Sept. 1855. He joined Walker; and on Feb. 10, 1856, their associate Rivas, the president, claimed and annexed the Mosquito territory to Nicaragua.

France, mourned in black, instead of the then practice of wearing white, on the death of her first husband, Charles VIII., April 7, 1498. *Hénault.*

MOUSQUETAIRES, or **MUSQUETEERS**, horse-soldiers under the old French *régime*, raised by Louis XIII., 1622. This corps was considered a military school for the French nobility. It was disbanded in 1646, but was restored in 1657. A second company was created in 1660, and formed cardinal Mazarine's guard. *Hénault.*

MUGGLETONIANS, so called from Ludowic Muggleton, a tailor, known about 1641, and prominent about 1657. He and one Reeves affirmed that God the Father, leaving the government of heaven to Elias, came down and suffered death in a human form. They asserted that they were the two last witnesses of God which should appear before the end of the world. A sect of this name still exists.

MULBERRY TREES. The first planted in England are in the gardens of Sion-house. Shakspeare planted a mulberry-tree with his own hands at Stratford-upon-Avon; and Garrick, Macklin, and others were entertained under it in 1742. Shakspeare's house was afterwards sold to a clergyman of the name of Gastrel, who cut down the mulberry-tree for fuel, 1765; but a silversmith purchased the whole and manufactured it into memorials.

MULE, a spinning machine, invented in 1779 by Samuel Crompton, born at Bolton, Lancashire, in 1753. From the name of his residence he termed the machine *Hall-in-the-wood-wheel*; it was also termed *mustin wheel*, from its giving birth to the British muslin and cambric manufacture; but from its combining the advantages of Hargreave's spinning jenny, and Arkwright's adaptation, it derived the name of *mule*. It is stated that Crompton at the time knew nothing of the latter. In common with other inventors he received no adequate recompense, although he did not restrict the benefits of his invention by a patent; but gave it up in 1780. It produced yarn treble the fineness and very much softer than any ever before produced in England. Parliament voted him 5000*l.* in 1812, now considered a most inadequate compensation. Mr. Roberts invented the self-acting mule in 1825.

MUMMIES (from the Arabic *mum*, wax). See *Embalming*. The mummies in the British Museum, with other Egyptian antiquities, were placed there about 1803. Mr. Alex. Gordon, in 1737, published an Essay on three Egyptian Mummies, one of which was brought to England in 1722 (by capt. Wm. Lethieullier); two others came in 1734, one of which was retained by Dr. Mead, the other was given to the College of Physicians. (The first named is now in the British Museum). In 1834, Mr. T. J. Pettigrew published a "History of Egyptian Mummies." Both the above-mentioned works contain plates.

MUNICH, the beautiful capital of Bavaria, was founded, it is said, A.D. 962. It was taken by Gustavus Adolphus of Sweden in 1632; by the Austrians in 1704, 1741, and 1743; and by the French, under Moreau, July 2, 1800. It abounds in schools, institutions, and manufactures. The university was founded by king Louis in 1826.

MUNICIPAL CORPORATIONS. See *Corporations*.

MUNSTER, in Westphalia. The bishopric, said to have been founded by Charlemagne, A.D. 780, was secularised in 1802, and ceded to Prussia in 1815. The Anabaptists, under John of Leyden, the king of Munster, held the city in 1534 and 1536. Here was signed the treaty of Westphalia (*which see*), or Munster, Oct. 24, 1648. **MUNSTER**, the Southern province of Ireland. In 1568, a commission was issued for its government by a president and council, and new colonies were founded in 1588.

MURCIA, a province N.E. Spain, was subdued by the Moors, A.D. 713; by Ferdinand of Castile, 1240; and divided between Castile and Arragon, 1305.

MURDER, the highest offence against the law of God. (*Genesis ix. 6, 2348 B.C.*). A court of Ephetae was established by Demophoon of Athens for the trial of murder, 1179 B.C. The Persians did not punish the first offence. In England, during a period of the Heptarchy, murder was punished by fines only. So late as Henry VIII.'s time, the crime was compounded for in Wales. Murderers were allowed benefit of clergy in 1503. Aggravated murder or *petit treason*, (a distinction now abolished), happened in three ways; by a servant killing his master; a wife her husband; and an ecclesiastical person his superior, stat. 25 Edw. III. 1350. The enactments relating to this crime are very numerous, and its wilful commission has been rarely excepted from mercy by our sovereigns. The act whereby the murderer should be executed on the day next but one after his conviction, was repealed 1836. See *Executions* and *Trials*.

MUSEUM, originally a quarter of the palace of Alexandria, like the Prytaneum of Athens, where eminent learned men were maintained by the public. The foundation is

attributed to Ptolemy Philadelphus, who here placed his library, about 284 B.C. Besides the British Museum and Soane's Museum (*which see*) there are very many others in London.

MUSIC. • "Jubal, the father of all such as handle the harp and the organ," (3875 B.C., *Gen.* iii. 21). Lucretius ascribes its invention to the whistling of the winds in hollow reeds. Franckinus to the various sounds produced by the hammers of Tubal-Cain. Cameleon Pontique and others to the singing of birds; and Zarlinio to the sound of water dropping, &c. The flute, and harmony or concord in music, are said to have been invented by Hyagnis, 1506. *Arund. Marbles.* Vocal choruses of men are first mentioned 556 B.C. *Dufresnoy.*

MUSIC IN ENGLAND. Before the Reformation there was but one kind of music in Europe worth notice, namely, the sacred chant, and the descant built upon it. This music moreover was applied to one language only, the Latin. *Ashe.* The original English music, from the period of the Saxons to that era in which our countrymen imbibed the art, and copied the manner of the Italians, was of a character which neither pleased the soul nor charmed the ear. But as all the arts seem to have been the companions of successful commerce, our music soon improved, our taste was chastened, and sweet sounds formed an indispensable part of polite education. Prior to 1600, the chief music was masses and madrigals, but dramatic music was much cultivated from that time. About the end of James I.'s reign a music professorship was founded in the University of Oxford by Dr. Wm. Hychin; and the year 1710 was distinguished by the arrival in England of George Frederick Handel. Mozart came to England in 1763; Joseph Haydn in 1791; and Carl Maria von Weber in 1825. The study of music has been greatly promoted in this country since 1840, by the labours of John Hullah. The Tonic *sol-fa* system (in which at first the letters *d, r, m, f, s, l, t,* (for *do, re, mi, fa, so, la, ti,*) are used instead of notes) was invented by John Curwen about 1847, and has been successfully employed in the instruction of large numbers of children in vocal music.

MUSICAL NOTES &c. The first six are said to have been invented by Guy Aretino, a Benedictine monk of Arezzo, about A.D. 1025. *Blair.* The notes at present used were perfected in 1338. Counterpoint was brought to perfection by Palestrina about 1555. Cafforio of Lodi, read lectures on musical composition in the fifteenth century, and they effected great improvement in the science. The Italian style of composition was introduced into these countries about 1616.

THE MUSICAL FICH was settled in France in 1860. The middle C to be 322 vibrations in a second. At a meeting on the subject, held at the Society of Arts, in Nov. 23, 1860, the concert pitch of C was recommended to be 328 vibrations in a second. Mr. Hullah has adopted 322 vibrations.

MUSICAL FESTIVALS IN ENGLAND. Dr. Byssie, chancellor of Hereford, proposed to the members of the choir, a collection at the cathedral door after morning service, when forty guineas were collected and appropriated to charitable purposes. It was then agreed to hold festivals at Hereford,

Gloucester, and Worcester, in rotation, annually. Until the year 1753, the festival lasted only two days; it was then extended at Hereford to three evenings; and at Gloucester, in 1757, to three mornings, for the purpose of introducing Handel's "Messiah," which was warmly received, and has been performed annually ever since. Musical festivals on a great scale are now annually held at various cathedrals in England. *See Handel and Crystal Palace.*

MUSICAL INSTITUTIONS. The Ancient Academy of Music was instituted in 1710. It originated with numerous eminent performers and gentlemen wishing to promote the study of vocal harmony. The Madrigal Society was established in 1741, and other musical societies followed. The Royal Society of Music arose from the principal nobility and gentry uniting to promote the performance of operas composed by Handel, 1785. Royal Academy of music, established 1822, *which see.* The Philharmonic concerts began in 1813. The centenary of the "Noblemen's Catch Club" was kept in July, 1861.

• EMINENT MODERN MUSICAL COMPOSERS.

MUSKETS. *See Fire-arms.*

MUSLIN, a fine cotton cloth, so called, it is said, as not being bare, but having a downy nap on its surface resembling moss, which the French call *mousse*. According to others, it

* Pythagoras (about 555 B.C.) maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortal ears, which he called "the music of the spheres." St. Cecilia, a Roman lady, is said to have excelled so eminently in music, that an angel was enticed from the celestial regions by the fascinating charms of her melody; and this hyperbolic tradition has been deemed sufficient authority to make her the patroness of music and musicians. She died in the third century.

† He had eleven sons; four of them distinguished musicians.

was first brought from Moussol, in India, whence the name. Muslins were first worn in England in 1670. *Anderson*. By means of the *Mule* (*which see*), British have superseded India muslins.

MUTE. A prisoner is said to *stand mute*, when, being arraigned for treason or felony, he either makes no answer, or answers foreign to the purpose. Anciently, a mute was taken back to prison, placed in a dark dungeon, naked, on his back, on the bare ground, and a great weight of iron placed upon his body; in this situation he was fed with three morsels of bad bread one day, and three draughts of stagnant water the next, and so on alternately until he died. For a very memorable instance of this punishment in A.D. 1605, see article *Pressing to Death*. Long after pressing to death was practically abolished, it was customary, where a prisoner obstinately refused to plead, for the gaoler to twist a piece of whipcord or catgut round his thumb, and pull it gradually so tight, that it frequently cut to the bone, during which operation the judge urged the culprit to answer to the indictment. By 12 Geo. III. 1772, judgment is awarded against mutes, in the same manner as if they were convicted, or confessed. A man refusing to plead was condemned and executed at the Old Bailey on a charge of murder, 1778, and another on a charge of burglary, at Wells, 1792. An act was passed in 1827, by which the court is directed to enter a plea of "not guilty" when the prisoner will not plead.

MUTINIES, BRITISH. The mutiny throughout the fleet at Portsmouth for an advance of wages, April 1797. It subsided on a promise from the Admiralty, which, not being quickly fulfilled, occasioned a second mutiny on board the *London* man-of-war; admiral Colpoys, with his captain, was put into confinement for ordering the marines to fire, whereby some lives were lost. The mutiny subsided May 10, 1797, when an act was passed to raise wages, and the king pardoned the mutineers. A more considerable one at the Nore, which blocked up the trade of the Thames, broke out on May 27, 1797, and subsided June 13, 1797, when the principal mutineers were put in irons, and several executed, (including the ringleader nicknamed rear-admiral Richard Parker) June 30 at Sheerness. Mutiny of the *Danae* frigate; the crew carried the ship into Brest harbour, March 27, 1800. Mutiny on board admiral Mitchell's fleet at Bantry Bay, Dec. 1801, and January following: see *Bantry Bay*. Mutiny at Malta, began April 4, 1807, and ended on the 12th, when the mutineers blew themselves up by setting fire to a large magazine, consisting of between 400 and 500 barrels of gunpowder. See *Madras* and *India*, 1857.

MUTINY ACT, a statute for the discipline, regulation, and payment of the army, &c., was passed in 1688, and has been re-enacted annually ever since.

MUTINY OF THE BOUNTY, April 28, 1789. For particulars see *Bounty*.

MYCALE (Ionia, Asia Minor), **BATTLE OF**, fought between the Greeks (under Leotychides the king of Sparta, and Xanthippus the Athenian), and the Persians, Sept. 22, 479 B.C.; being the day on which Mardonius was defeated and slain at Platea by Pausanias. The Persians (about 100,000 men) who had just returned from the unsuccessful expedition of Xerxes in Greece, were completely defeated, thousands of them slaughtered, and their camp burnt. The Greeks sailed back to Samos with an immense booty.

MYCENÆ, a division of the kingdom of the Argives, in the Peloponnesus. It stood about fifty stadia from Argos, and flourished till the invasion of the Heraclidae.

Perseus removes from Argos, and founds Mycenæ	B.C. 1431, 1313, or 1282	Ægisthus, in the absence of Agamemnon, lives in adultery with the queen Clytemnestra. On the return of the king they assassinate him; and Ægisthus mounts the throne	B.C. 1183
Reign of Eurystheus	1280, 1274, or 1258	Orestes, son of Agamemnon, kills his mother and her paramour	1176
[Towards the close of his reign is told the story of the several dangerous enterprises surmounted by Hercules.]		Orestes dies of the bite of a serpent	1106
Ægisthus assassinates Atreus	1201	The Achæans are expelled	—
Agamemnon succeeds to the throne; becomes king of Sicyon, Corinth, and perhaps of Argos	—	Invasion of the Heraclidae, and the conquerors divide the dominions	1103
He is chosen generalissimo of the Grecian forces going to the Trojan war	1193	Mycenæ destroyed by the Argives	468

MYLÆ, a bay of Sicily, where the Romans, under their consul Duillius, gained their first naval victory over the Carthaginians, and took fifty of their ships, 260 B.C. Here also Agrippa defeated the fleet of Sextus Pompeius, 36 B.C.

MYSORE (S. India), was made a flourishing kingdom by Hyder Ali in 1761, and by his son, Tippoo Sahib, who considerably harassed the English. Tippoo was chastised by them in 1792, and on May 4, 1799, his capital, Seringapatam, was taken by assault and himself slain. The English now hold the country.

MYSTERIES. "Mystery" is said to be derived from the Hebrew *mistar*, to hide. The *Sacred* mysteries is a term applied to the doctrines of Christianity, the chief of which is the incarnation of Christ, called the "mystery of godliness," (or God-likeness). 1 *Tim.* iii. 16. The *Profane* mysteries were the secret ceremonies performed by a select few in honour of some deity. From the Egyptian mysteries of Isis and Osiris sprang those of Bacchus and Ceres among the Greeks. The Eleusinian mysteries were introduced at Athens by Eumolpus, 1356 B.C.

MYSTERY PLAYS. See *Drama*.

MYTHOLOGY (Greek *mythos*, fable), the traditions respecting the gods of any people. The Egyptians and Babylonians, forgetting the invisible and true God, first worshipped positive objects, as the sun and moon; then transferred their adoration to the operations of nature and the passions of their own minds, embodied them under symbolical representations, and ultimately worshipped the symbols themselves. Thoth is supposed to have introduced mythology among the Egyptians, 1521 B.C.; and Cadmus, the worship of the Egyptian and Phœnician deities among the Greeks, 1493 B.C.

N.

NAAS (Ireland). Here a desperate engagement took place between a body of the king's forces, and the insurgent Irish, during the rebellion of 1798. The latter were defeated with the loss of 300 killed and many wounded, May 24, 1798.

NABONASSAR, ERA OF, received its name from the celebrated prince of Babylon, under whose reign astronomical studies were much advanced in Chaldæa. The years are vague, containing 365 days each, without intercalation. The first day of the era was Wednesday, (said, in mistake, to be Thursday, in *L'Art de Vérifier les Dates*), Feb. 26, 747 B.C.—3967, Julian period. To find the Julian year on which the year of Nabonassar begins, subtract the year, if before Christ, from 748; if after Christ, add to it 747.

NAG'S HEAD STORY. Matthew Parker was consecrated archbishop of Canterbury at Lambeth, Dec. 17, 1559, by bishops Barlow, Coverdale, Scory, and Hodgkins. Many years after, the Romish writers brought forth a tale of Parker and the others having been consecrated at the Nag's Head Tavern, Cheapside, by Scory, in an irregular manner. This tale was refuted by Burnet, and is now given up by Romanists.

NAHUM, FESTIVAL OF. Nahum, the seventh of the twelve minor prophets, about 713 B.C.; the festival is the 24th of December.

NAJARA (or Navarete), N. Spain. Here Edward the Black defeated Henry de Trastamere, and re-established Peter the Cruel on the throne of Castile, April 3, 1367.

NAMES. Adam and Eve named their sons. *Gen.* iv. 25, 26. Plato recommended it to parents to give happy names to their children; and the Pythagoreans taught that the minds, actions, and successes of men were according to their names, genius, and fate. The popes change their names at their exaltation to the pontificate, "a custom introduced by pope Sergius, whose name till then was swine-snout," A.D. 687. *Platina*. Onuphrius refers it to John XII. 956; and gives as a reason, that it was done in imitation of SS. Peter and Paul, who were first called Simon and Saul. In France it was usual to change the name given at baptism. The two sons of Henry II. of France were christened Alexander and Hercules; at their confirmation these names were changed to Henry and Francis. Monks and nuns at their entrance into monasteries assume new names, to show that they are about to lead a new life. See *Surnames*.

NAMUR, in Belgium, was made a county in 932, was ceded to the house of Austria by the peace of Utrecht, and was garrisoned by the Dutch as a barrier town of the United Provinces in 1715. Namur was taken by the French in 1746, but was restored in 1748. In 1781, the emperor Joseph expelled the Dutch garrison. In 1792, it was again taken by the French, who were compelled to evacuate it the following year; but they regained possession of it in 1794. The French, however, delivered it up to the allies in 1814. It was a scene of a severe conflict, in June 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo.

NANCY, Lorraine, France: founded in the twelfth century. Charles the Bold of Burgundy endeavoured to conquer Lorraine, and besieged Nancy in 1476; but on Jan. 5, 1477, he was defeated and slain by the duke of Lorraine and his Swiss allies.

NANKIN, made the central capital of China A.D. 420. See *China*, 1842, and 1853.

NANTES. See *Edict*.

NAPIER'S BONES. See *Logarithms*.

NAPLES, formerly the continental division and seat of government of the kingdom of the Two Sicilies, began with a Greek colony named Parthenope (about 1000 B.C.) which was afterwards divided into Palæopolis (the *old*), and Neapolis (the *new city*), from which latter the present name is derived. The colony was conquered by the Romans in the Samnite war, 326 B.C. Naples, after resisting the power of the Lombards, Franks, and Germans, was subjugated by the Normans under Roger Guiscard, king of Sicily, A.D. 1131. Few countries have had so many political changes and cruel and despotic rulers, or suffered so much by convulsions of nature, such as earthquakes, volcanic eruptions, &c. In 1856 the population of the kingdom of Naples was 6,886,030, of Sicily, 2,231,020; total, 9,117,050. It now forms part of the revived kingdom of Italy.

Naples conquered by Theodoric the Goth . . . A.D. 493
 Retaken by Belisarius . . . 536
 Taken again by Totila . . . 543
 Retaken by Narses . . . 552
 Becomes a duchy nominally subject to the Eastern empire . . . 568 or 572
 Duchy of Naples greatly extended . . . 593
 Robert Guiscard, the Norman, made duke of Apulia, founds the kingdom of Naples . . . 1059
 Naples conquered, and the kingdom of the two Sicilies founded by Roger Guiscard II. . . 1131
 The imperial house of Hohenstaufen (see *Germany*) obtains the kingdom by marriage; and rules . . . 1194-1266
 The pope appoints Charles of Anjou, king, who defeats the regent Manfred (son of Frederic II. of Germany) at Benevento (Manfred slain) . . . Feb. 26, —
 Charles also defeats Conradin (the last of the Hohenstaufens), who had come to Naples by invitation of the Ghibellines, at Tagliacozzo, Aug. 23; Conradin beheaded . . . Oct. 29, 1268
 The massacre called the Sicilian vespers (*which see*) . . . March 30, 1282
 Andrew of Hungary, husband of Joanna I., murdered . . . Sept. 18, 1345
 He is avenged by his brother Louis king of Hungary, who invades Naples . . . 1349
 Alphonso V. of Arragon (called the Wise and Magnanimous), on the death of Joanna II. seizes Naples . . . 1435
 Naples conquered by Charles VIII. of France . . . 1494
 And by Louis XII. of France and Ferdinand of Spain . . . 1501
 Naples and Sicily united to Spain . . . 1504
 Insurrection of Masaniello * . . . 1647
 Another insurrection suppressed by don John of Austria . . . Oct. —
 Henry II. duke of Guise lands and is proclaimed king, but in a few days is taken prisoner by the Spaniards . . . April, 1648
 Naples conquered by prince Eugene of Savoy, for the emperor . . . 1706
 Discovery of Herculaneum (*which see*) . . . 1711 or 1713
 The Spaniards by the victory at Bitonto (May 26) having made themselves masters of both kingdoms, Charles (of Bourbon), son of the king of Spain, ascends the throne, with the ancient title renewed, of the king of the Two Sicilies . . . A.D. 1734
 Order of St. Januarius instituted by king Charles . . . 1738
 Charles, becoming king of Spain, vacates the throne of the Two Sicilies in favour of his third son Ferdinand, agreeably to treaty . . . 1759

Expulsion of the Jesuits . . . Nov. 3, 1767
 Dreadful earthquake in Calabria . . . Feb. 5, 1783
 Enrolment of the Lazzaroni (*which see*) as pikemen or spontoneers . . . Oct. 9, 1793
 The king flies on the approach of the French republicans, who establish the Parthenopean republic . . . Jan. 14, 1799
 Nelson appears; Naples retaken; the restored king rules tyrannically . . . June, —
 Prince Caracciolo tried and executed by order of Nelson . . . June 29, —
 The Neapolitans occupy Rome . . . Sept. 30, —
 Dreadful earthquake felt throughout the kingdom, and thousands perish . . . July 26, 1804
 Treaty of Neutrality between France and Naples ratified . . . Oct. 9, 1805
 Ferdinand, through perfidy, is compelled to fly to Sicily, Jan. 23; the French enter Naples, and Joseph Bonaparte made king . . . Feb. 1806
 The French defeated at Maida . . . July 4, —
 Joseph Bonaparte, after beginning many reforms, abdicates for the crown of Spain, June, 1808
 Joachim Murat made king (rules well), July 15, 1811
 His first quarrel with Napoleon . . . 1811
 His alliance with Austria . . . Jan. 1814
 Death of queen Caroline of Austria . . . Sept. 7, 1815
 Joachim declares war against Austria, Mar. 15, 1815
 Defeated at Tolentino . . . May 3, —
 He retires to France, May 22, and Corsica; he madly attempts the recovery of his throne by landing at Pizzo, Sept. 28; is seized, tried, and shot . . . Oct. 13, —
 Ferdinand, re-established, soon returns to tyrannical measures . . . June, —
 A plague rages in Naples, Nov. 1815 to June, 1816
 Establishment of the society of the Carbonari . . . 1819
 Successful insurrection of the Carbonari under general Pèpè: the king compelled to swear solemnly to a new constitution . . . July 13, 1820
 The Austrians invade the kingdom, at the king's instigation; general Pèpè defeated . . . March 7, 1821
 Fall of the constitutional government, March 23, —
 Death of Ferdinand; (reigned 66 years), Jan. 4, 1825
 [In 30 years, 100,000 Neapolitans perished by various kinds of death.]
 Insurrection of the Carbonari suppressed . . . 1828
 Accession of Ferdinand II. (as faithless and tyrannical as his predecessors) . . . Nov. 8, 1830
 Dispute with England respecting the sulphur trade; settled . . . March, 1840
 Attilio and Emilio Bandiera, with eighteen others, attempting an insurrection in Calabria, are shot † . . . Jan. 17, 1844
 Prospect of an insurrection in Naples; the king grants a new constitution . . . Jan. 29, 1848

* Occasioned by the extortions of the Spanish viceroys. One day an impost was claimed on a basket of figs, and refused by the owner, with whom the populace took part headed by Masaniello (Thomas Aniello), a fisherman; they obtained the command of Naples, many of the nobles were slain and their palaces burnt, and the viceroy was compelled to abolish the taxes and to restore the privileges granted by Charles V. to the city. Masaniello became intoxicated by his success and was slain by his own followers after a few days' rule, on July 16, 1647.

† It was asserted, but denied by lord Aberdeen, that his government had given warning of this attempt, of which they had obtained information by opening letters directed to Mazzini.

NAPLES, *continued.*

Great fighting in Naples; the liberals and the national guard almost annihilated by the royal troops, aided by the lazzaroni, May 15, 1848	liberal ministry; adopts a tricolor flag, &c., June 26, 1860
A martial anarchy prevails; the chiefs of the liberal party arrested in Dec. 1849	Baron Brenier, French ambassador, wounded in his carriage by the mob June 27, —
Settembrini, Poerio, Carafa, and others, after a mock trial, are condemned, and consigned to horrible dungeons for life June, 1850	A liberal ministry formed; destruction of the commissariat of the police in 12 districts; state of siege proclaimed at Naples; the queen-mother flees to Gaeta June 28, —
After remonstrances with the king on his tyrannical government (May), the English and French ambassadors are withdrawn Oct. 28, 1856	Revolutionary committee at Naples, June 15, —
Attempted assassination of the king by Milano, Dec. 8, —	Garibaldi lands in Sicily, May 11; defeats the Neapolitan army at Calatimi, May 15; and at Melazzo, July 20; enters Messina, July 21; the Neapolitans agree to evacuate Sicily July 30, —
The <i>Cagliari</i> * seized June, 1857	The king of Sardinia in vain negotiates with Francis II. for alliance July, —
Italian refugees, under count Pisacane, land in Calabria, are defeated, and their leader killed June 27—July 2, —	Francis II. proclaims the re-establishment of the constitution of 1848, July 2; the army who proclaim count de Trani king, July 10
A dreadful earthquake in the Apennines (see <i>Earthquakes</i>) Dec. 16, —	Garibaldi lands at Melito, August 18; takes Reggio Aug. 21, —
Amnesty granted to political offenders, Dec. 27, 1858	Defection in army and navy; Francis II. retires to Gaeta, Sept. 6; Garibaldi enters Naples without troops Sept. 7, —
Poerio and sixty-six companions released and sent to N. America, Jan.; on their way, they seize the vessel; sail to Cork, March 7; and proceed to London. March 18, 1859	Garibaldi assumes the dictatorship, Sept. 8; and gives up the Neapolitan fleet to the Sardinian admiral Persano, Sept. 11; expels the Jesuits; establishes trial by jury; releases political prisoners Sept. —
Diplomatic relations resumed with England and France June, —	He repulses the Neapolitans at Cajazzo, Sept. 19, and defeats them thoroughly at the Volturno Oct. 1, —

SOVEREIGNS OF NAPLES AND SICILY.

1137. Roger I. (of Sicily, 1130) <i>Norman</i> .	1250. Conrad; son.
1154. William I. the Bad; son.	1254. Conradin, son; but his uncle,
1166. William II. the Good; son.	1258. Manfred, nat. son of Frederick II., seizes the government; killed at Benevento, in 1266.
1189. Tancred, natural son of Roger.	1266. Charles of Anjou, brother of St. Louis, king of France.
1194. William III. son, succeeded by Constance, married to Henry VI. of Germany.	1282. Insurrection in Sicily.
1197. Frederic II. of Germany (<i>Hohenstaufen</i>).	(Separation of the kingdoms in 1282.)
NAPLES. SICILY.	
1282. Charles I. of Anjou.	1282. Peter I. (HI. of Aragon.)
1285. Charles II.; son.	1285. James I. (II. of Aragon.)
1309. Robert the Wise; brother.	1295. Frederic II.
1343. Joanna (reigns with her husband, Andrew of Hungary), 1343-45; with Louis of Tarento, 1349-62; Joanna put to death by	1337. Peter II.
1381. Charles III. of Durazzo, grandson of Charles II.; he becomes king of Hungary, 1386; assassinated there.	1342. Louis.
1385. Ladislaus of Hungary, son.	1355. Frederic III.
1414. Joanna II., sister, dies in 1435, and bequeaths her dominions to Regnier of Anjou. They are acquired by	1376. Maria and Martin (her husband).
	1402. Martin I.
	1409. Martin II.
	1410. Ferdinand I.
	1416. Alphonsus I.

1435. Alphonsus I. thus king of Naples and Sicily.

(*Separation in 1458.*)

* The *Cagliari*, a Sardinian mail steamboat plying between Genoa and Tunis, sailed from the former port on June 25, 1857, with thirty-three passengers, who, after a few hours' sail, took forcible possession of the vessel, and compelled the two English engineers (Watt and Park) to steer to Ponza. Here they landed, released some prisoners, took them on board, and sailed to Sapri, where they again landed, and restored the vessel to its commander and crew. The latter steered immediately for Naples; but on the way the vessel was boarded by a Neapolitan cruiser, and all the crew were landed and consigned to dungeons, where they remained for nine months waiting for trial, suffering great privations and insults. This caused great excitement in England: and, after much negotiation, the crew were released, and the vessel given up to the British government, 3000*l.* being given as a compensation to the sufferers.

NAPLES, *continued.*

NAPLES.
 1458. Ferdinand I.
 1494. Alphonse II. abdicates.
 1495. Ferdinand II.
 1496. Frederic II. expelled by the French, 1501.

SICILY.
 1458. John of Arragon.
 1479. Ferdinand the Catholic.

THE CROWNS UNITED.

1501. Ferdinand III. (king of Spain).
 1516. Charles I. (V. of Germany).
 1556. Philip I. (II. of Spain).
 1598. Philip II. (III. of Spain).

1623. Philip III. (IV. of Spain).
 1665. Charles II. (of Spain).
 1700. Philip IV. (V. of Spain), Bourbon.
 1707. Charles III. of Austria.

(Separation in 1713.)

 1713. Charles III. of Austria.

SICILY.
 1713. Victor Amadeus of Savoy; exchanges Sicily for Sardinia, 1720.

THE TWO SICILIES.

(Part of the empire of Germany, 1720-34.)

1735. Charles IV. (III. of Spain).

1759. Ferdinand IV., a tyrannical and cruel sovereign, flies from Naples in 1806 to Sicily.

(Separation in 1806.)

NAPLES.
 1806. Joseph Napoleon Bonaparte.
 1808. Joachim Murat, shot Oct. 13, 1815.

SICILY.
 1806-15. Ferdinand IV.

THE TWO SICILIES.

1815. Ferdinand I., formerly Ferdinand IV. of Naples and Sicily.
 1825. Francis I.
 1830. Ferdinand II., Nov. 8 (termed King Bomba).

1859. Francis II., May 22; born Jan. 16, 1836, last KING OF NAPLES.
 1861. Victor-Emmanuel II. of Sardinia, as KING OF ITALY; March.

NAPOLEON, CODE. See *Codes.*

NARVA, in Esthonia, Russia, the site of the celebrated battle in which Peter the Great of Russia was totally defeated by Charles XII. of Sweden, "the Madman of the North," then in his nineteenth year, Nov. 30, 1700. The army of Peter is said to have amounted to 60,000, some Swedish writers affirm 100,000 men, while the Swedes did not much exceed 20,000. Charles attacked the enemy in his intrenchments, and slew 30,000; the remainder, exceeding that number, surrendered. He had several horses shot under him, and as he was mounting a fresh one, he said, "These people seem disposed to give me exercise." The place was taken by Peter in 1704.

NASEBY (Northamptonshire), BATTLE OF, between Charles I. and the parliament army under Fairfax and Cromwell. The main body of the royal army was commanded by lord Astley; prince Rupert led the right wing, sir Marmaduke Langdale the left, and the king himself headed the body of reserve. The victory was with the parliament forces, and was decisive of the fate of the king, who was obliged to flee, losing all his cannon and baggage, and 5000 of his army as prisoners, June 14, 1645.

NASHVILLE, Tennessee, N. America, was occupied by the Confederates in 1861, and taken by the Federals Feb. 23, 1862.

NASSAU, a German duchy, was made a county by the emperor Frederic I. about 1180, for Wolram a descendant of Conrad I. of Germany; from whom are descended the royal house of Orange now reigning in Holland (see *Orange and Holland*), and the present duke of Nassau. Wiesbaden was made the capital in 1839. Population of the duchy in 1860, 443,650. On April 25, the Nassau chamber strongly opposed the conclusion of a concordat with the pope and claimed liberty of faith and conscience.

1788. Count Frederic-William joins the Confederation of the Rhine, and is made DUKE in 1806.
 1814. William-George, Aug. 20.

1839. Adolphus-William-Charles, born July 24, 1817. The present duke.

NATAL, Cape of Good Hope, was made a bishopric 1853. A revolt of the boors here was suppressed in June 1842.

NATIONAL ASSEMBLY OF FRANCE. Upon the proposition of the Abbé Siéyès, the states-general of France constituted themselves as the National Assembly, June 17, 1789. On the 20th, the hall of this new assembly was shut by order of the king; upon which the deputies of the *Tiers Etat* repaired to the *Jeu de Paume*, or Tennis-court, and swore not to dissolve until they had digested a constitution for France. On the 22nd they met at the

H H 2

church at St. Louis. This assembly abolished the state religion, annulled monastic vows, divided France into departments, sold the national domains, established a national bank, issued assignats, and dissolved itself, Sept. 21, 1792. See *National Convention*. In 1848 the legislature was again termed the National Assembly. It met May 4; and a new constitution was proclaimed Nov. 12. A new constitution was once more proclaimed by Louis Napoleon in Jan. 1852, after triumphing over the National Assembly.

NATIONAL ASSOCIATIONS. One was formed in 1584, headed by the earl of Leicester, to protect Queen Elizabeth from assassination, in consequence of the discovery of various plots. Another for the defence of William III. against assassins was established in 1696, of which all persons holding office under government were required to be members. See *Social Science* and *Volunteers* for two other National Associations.

NATIONAL CONVENTION OF FRANCE, constituted in the hall of the Tuileries, Sept. 17, and formally opened Sept. 21, 1792, when M. Grégoire, at the head of the National Assembly, repaired thither and announced that that assembly had ceased its functions. It was then decreed, "That the citizens named by the French people to form the National Convention, being met to the number of 371, after having verified their powers, declare that the National Convention is constituted." This convention continued until a new constitution was organised, and the Executive Directory was installed at the little Luxembourg, Nov. 1, 1795. See *Directory*. The Chartists (*which see*) in England formed a National Convention about 1839.

NATIONAL DEBT. The first mention of parliamentary security for a debt of the nation occurs in the reign of Henry VI. The present national debt commenced in the reign of William III. 1690. It amounted, in 1697, to about five millions sterling, and was then thought to be of alarming magnitude. The sole cause of the increase has been war.

	Debt.		Debt.		Debt.
1702. Anne	about £14,000,000	war	£571,000,000	1856. Ditto	£807,981,788
1714. George I.	54,000,000	1814. Close of war with		1857. Funded debt	779,655,399
1749. George II. (after		Napoleon	865,000,000	Unfunded	25,627,300
Spanish war)	78,000,000	1817. English and Irish		1858. Funded debt	778,561,783
1763. George III. (end		Exchequers con-		Unfunded	25,883,700
of the Seven		solidated	848,282,477	1859. Funded debt	786,219,236
Years' War)	139,000,000	1830. Total amount	840,184,022	Unfunded	16,230,000
1786. After Amer. war	268,000,000	1840. Ditto	789,578,720	1860. Funded debt	785,294,641
1798. Foreign war	462,000,000	1850. Ditto	787,029,162	Unfunded	16,183,100
1802. Close of French		1854. Ditto	775,041,272	1861. Funded debt	784,420,007
Revolutionary		1855. Ditto	793,375,199	Unfunded	15,529,800

The annual interest in 1850 was 23,862,257*l*.; and the total interest, including annuities, amounted to 27,699,740*l*. On Jan. 1, 1851, the total unredeemed debt of Great Britain and Ireland was 769,272,562*l*., the charge on which for interest and management was 27,620,449*l*.. The total charge on the debt in 1861 was 26,090,260*l*.

NATIONAL GALLERY, LONDON, began with the purchase, by the British government, for 57,000*l*., of the Angerstein collection of pictures (about forty), in Jan. 1822. The first exhibition of them took place in Pall-mall, in May, 1824. Sir G. Beaumont, Mr. Holwell Carr, and many other gentlemen, as well as the British Institution, contributed many fine pictures; and the collection has been since greatly augmented by gifts and purchases. The present edifice in Trafalgar-square, designed by Mr. Wilkins, was completed and opened in 1838. In July, 1857, a commission appointed to consider the propriety of removing the pictures reported in favour of their remaining in their present locality; and in 1860, 15,000*l*., were voted, to be expended in adapting the central part of the building to exhibition purposes. On May 11, 1861, the National Gallery was re-opened, after having been closed eight months, during which great improvements were made in the internal arrangements.

NATIONAL GUARD OF FRANCE was instituted by the Committee of Safety at Paris on July 13, 1789 (the day before the destruction of the Bastille), to maintain order and defend the public liberty. Its first colours were blue and red, to which white was added, when its formation was approved by the king. Its action was soon paralysed by the revolutionary factions, and it ceased altogether under the consulate and empire. It was revived by Napoleon in 1814, and maintained by Louis XVIII., but was broken up by Charles X. after a tumultuous review in 1827. It was revived in 1830 and helped to place Louis Philippe on the throne. In 1848 its reconstitution and its enlargement from 80,000 to 100,000 men led to the frightful conflict of June 1848. Its constitution was entirely changed in Jan. 1852, when it was subjected entirely to the control of the government. Formerly the National Guard had many privileges, such as choosing their own officers, &c.—

National Guards have been established in Spain, Naples, and other countries during the present century.

NATIONAL PORTRAIT GALLERY was established in Feb. 1857 in pursuance of votes from both houses of parliament. The sum of 2000*l.* was appropriated for the purchase of portraits of persons eminent in British history, and apartments were assigned for their reception. Donations are received under certain restrictions. A valuable collection of National Portraits appeared at the Manchester Exhibition in 1857.

NATIONAL TESTIMONIALS (subscribed for) were presented to Rowland Hill (for his exertions in obtaining the penny postage), June 17, 1846; and to Miss Florence Nightingale (for her beneficent exertions for the sufferers during the Crimean war), Nov. 29, 1855.

NATIVITY. There are two festivals, in the Roman and Greek Churches, under this name. The Nativity of Christ, also observed by the Protestants on December 25th (see *Christmas*); and the Nativity of the Virgin Mary, not observed by the Protestants at all. Pope Sergius I., about 690, established the latter; but it was not generally received in France and Germany till about 1000; nor by the eastern Christians till the twelfth century.

NATURAL HISTORY was studied by Solomon, 1014 B.C., (*1 Kings* iv. 33.), and by Aristotle (384-322 B. C.). See *Botany*, *Zoology*, &c.

NATURAL PHILOSOPHY. See *Philosophy*.

NATURALISATION is defined to be "the making a foreigner or alien a denizen or freeman of any kingdom or city, and so becoming, as it were, both a subject and a native of a king or country, that by nature he did not belong to." The first act of naturalisation passed in 1437; and various similar enactments were made in most of the reigns from that time, several of them special acts relating to individuals. An act for the naturalisation of the Jews passed in May 1753, but was repealed in 1754, on the petition of all the cities in England; for the privileges since granted them, see *Jews*. The act for the naturalisation of prince Albert passed 3 Vict., Feb. 7, 1840.

NATURE-PRINTING. This process consists in impressing objects, such as plants, mosses, feathers, &c., into plates of metal, causing these objects, as it were, to engrave themselves; and afterwards taking casts or copies fit for printing from. Kniphof, of Erfurt, between 1728 and 1757, produced his *Herbarium vivum* by pressing the plants themselves (previously inked) on paper; the impressions being afterwards coloured by hand. In 1833, Peter Kyhl made use of steel rollers and lead plates. In 1842, Mr. Taylor printed lace. In 1847, Mr. Twining printed ferns, grasses, and plants; and in the same year Dr. Branson suggested the application of electrotyping to the impressions. In 1849, professor Leydolt, of Vienna, obtained, by the able assistance of Mr. Andrew Worring, impressions of agates and fossils. The first practical application of this process is in Von Heuffer's work on the Mosses of Arpasch, in Transylvania; the second (the first in this country) in "The Ferns of Great Britain and Ireland," edited by Dr. Lindley; the illustrations to which were prepared under the superintendence of Mr. Henry Bradbury, in 1855-6, who also in 1859-60 printed "The British Sea-weeds," edited by W. G. Johnstone and Alex. Croall.

NAVAL ARCHITECTS' INSTITUTE was established in Jan. 1860. The members give much attention to the consideration of the strength of iron ships.

NAVAL ASYLUM, ROYAL. This institution was commenced at Paddington in 1801, and was transferred to its present situation, near the entrance to Greenwich park, in 1807. The interior of the central portion of the building was commenced in 1613 by Anne, queen of James I., and completed in 1635 by queen Henrietta-Maria, whose arms still adorn the ceiling of the room in which her son Charles II. was born, in 1630.

NAVAL BATTLES. The Argonautic expedition undertaken by Jason is the first upon record, 1263 B.C. *Dufresnoy*. The first sea fight on record is that between the Corinthians and Coreyreans, 664 B.C. *Blair*. The following are among the most celebrated naval engagements: for the details of which see *separate articles*.

Battle of Salamis	Oct. 20, B.C.	480	Battle of Mylæ	260
Battle of Eurymedon		466	The Roman fleet, off Drepanum, destroyed by the Carthaginians	249
Battle of Cyzicus; the Lacedæmonian fleet taken by Alcibiades, the Athenian		410	The Carthaginian fleet destroyed by the consul Lutatius	241
Battle of Ægospotamos		405	Battle of Actium	31
The Persian fleet, under Conon, conquers the Spartan at Cnidos; Pisander, the Athenian admiral, is killed; and the maritime power of the Lacedæmonians destroyed		394	The emperor Claudius II. defeats the Goths, and sinks 2000 of their ships	A.D. 269
			Battle of Lepanto	Oct. 7, 1571

NAVAL BATTLES, *continued.*

- Bay of Gibraltar; Dutch and Spaniards (a bloody conflict and decisive victory, giving for a time the superiority to the Dutch) . . . April 25 1607
- NAVAL ENGAGEMENTS IN BRITISH HISTORY.
- Alfred with 10 galleys, defeated 300 sail of Danish pirates on the Dorset and Hampshire coast. *Asser's Life of Alfred* . . . June 24, 1340 897
- Edward III. defeats the French near Sluys . . . June 24, 1340 1340
- Off Winchelsea; Edward III. defeated the Spanish fleet of 40 large ships, and captured 26 . . . Aug. 30, 1350 1350
- The English and Flemings; the latter signally defeated . . . 1371 1371
- Earl of Arundel defeats a Flemish fleet of 100 sail, and captures 80 . . . March 24, 1387 1387
- Near Milford Haven; the English take 8, and destroy 15 French ships . . . 1405 1405
- Off Harleur; the Duke of Bedford takes or destroys nearly 500 French ships . . . Aug. 15, 1416 1416
- In the Downs; a Spanish and Genoese fleet captured by the earl of Warwick . . . 1459 1459
- Bay of Biscay; English and French, indecisive . . . Aug. 10, 1512 1512
- Sir Edward Howard attacks the French fleet under Prior John, is repulsed and killed . . . April 25, 1513 1513
- The Spanish Armada destroyed near Plymouth . . . July 19, 1588 1588
- Dover straits; between the Dutch admiral Van Tromp, and admiral Blake. The Dutch surprise the English in the Downs, 80 sail engaging 40 English, six of which are taken or destroyed; and the Dutch admiral sails in triumph through the channel, with a boom at his mast-head, to denote that he had swept the English from the seas . . . Nov. 29, 1652 1652
- The English gain a victory over the Dutch fleet off Portsmouth, taking and destroying 12 men-of-war and 30 merchantmen. Van Tromp was the Dutch, and Blake the English admiral . . . Feb. 28-20, 1653 1653
- Again, off the North Foreland. The Dutch and English fleets consisted of near 100 men-of-war each. Van Tromp commanded the Dutch; Blake, Monk, and Deane, the English. Six Dutch ships were taken; 11 were sunk, and the rest ran into Calais roads . . . June 2, — —
- Again, on the coast of Holland; the Dutch lose 30 men-of-war, and admiral Tromp was killed (the seventh and last battle) . . . July, — —
- At Cadiz, when two galleons, worth 2,000,000 pieces of eight, were taken by Blake . . . Sept. 1656 1656
- Spanish fleet vanquished, and burnt in the harbour of Santa Cruz, by Blake . . . April 20, 1657 1657
- English and French: 130 of the Bordeaux fleet destroyed by the Duke of York (afterwards James II.) . . . Dec. 4, 1664 1664
- The duke of York defeats the Dutch fleet off Harwich; Opdam, the Dutch admiral, blown up with all his crew; 18 capital ships taken, 14 destroyed . . . June 3, 1665 1665
- The earl of Sandwich took 12 men-of-war and 2 India ships . . . Sept. 4, — —
- A contest between the Dutch and English fleets for victory, maintained for four days. The English lose 9, and the Dutch 15 ships . . . June 1-4, 1666 1666
- Decisive engagement at the mouth of the Thames, when the English gain a glorious victory. The Dutch lose 24 men-of-war, 4 admirals killed, and 4,000 officers and seamen . . . July 25, 26, — —
- The Dutch admiral De Ruyter sails up the Thames and destroys some ships . . . June 11, 1667 1667
- Twelve Algerine ships of war destroyed by sir Edward Spragg . . . May 10, 1671 1671
- Battle of Southwold-bay. See *Solebay*, May 28, 1672 1672
- Coast of Holland; by prince Rupert, May 28, June 4, and Aug. 11, sir E. Spragg killed; d'Eirees and Ruyter defeated . . . 1673 1673
- Off Beachy Head; the English and Dutch defeated by the French . . . June 30, 1690 1690
- Victory near Cape Ea Hogue . . . May 19, 1692 1692
- Off St. Vincent; the English and Dutch squadrons, under admiral Rooke, defeated by the French . . . June 16, 1693 1693
- Off Carthagona, between admiral Benbow * and the French fleet, commanded by admiral Du Casse. Fought . . . Aug. 19, 1702 1702
- Sir George Rooke defeats the French fleet off Vigo (*which see*) . . . Oct. 12, — —
- Off Malaga; bloody engagement between the French, under the count of Thoulouse, and the English, under sir George Rooke, when the former entirely relinquished the dominion of the seas to England . . . Aug. 24, 1704 1704
- At Gibraltar, when the French lose 5 men-of-war . . . Nov. 5, — —
- Off the Lizard, when an English merchant fleet was taken . . . Oct. 9, 1707 1707
- In the Mediterranean, admiral Leake took 60 French vessels, laden with provisions, May 22, 1708 1708
- Spanish fleet of 29 sail totally defeated by sir George Byng, in the Faro of Messina, July 31, 1718 1718
- Bloody battle off Toulon; Matthews and Lestock against the fleets of France and Spain. Here the brave captain Cornwall fell with 42 men, including officers; and the victory was lost by a misunderstanding between the English admirals . . . Feb. 9, 1744 1744
- Off Cape Finisterre, the French fleet of 38 sail taken by admiral Anson . . . May 3, 1747 1747
- In the East Indies; the French retired to Pondicherry . . . — —
- Off Finisterre, when admiral Hawke took 7 men-of-war of the French . . . Oct. 14, — —
- Off Newfoundland, when admiral Boscawen took 2 men-of-war . . . June 10, 1755 1755
- Off Cape Francoise; 7 ships defeated by 3 English . . . Oct. 21, 1757 1757
- Admiral Pocock defeats the French fleet in the East Indies, in two actions, 1758, and again . . . 1759 1759
- Admiral Boscawen defeats the French under De la Clue, off Cape Lagos . . . Aug. 18, — —
- Admiral Hawke defeats the French fleet, commanded by Conflans, in Quiberon Bay, and thus prevents a projected invasion of England. See *Quiberon Bay* . . . Nov. 20, — —
- Keppel took 3 French frigates, and a fleet of merchantmen . . . Oct. 9, 1762 1762
- On Lake Champlain the provincial force totally destroyed by admiral Howe . . . Oct. 11, 1776 1776

* In the engagement, the other ships of admiral Benbow's squadron falling astern, left this brave commander alone to maintain the unequal battle. In this situation a chain-shot shattered his leg, yet he would not be removed from the quarter deck, but continued fighting till the morning, when the French sheered off. He died in October following, of his wounds, at Jamaica, where, soon after his arrival, he received a letter from the French admiral, of which the following is a literal translation:—

“*Carthagona*, Aug. 22, 1702.
“Sir,—I had little hopes, on Monday last, but to have suppld in your cabin; yet it pleased God to order it otherwise. I am thankful for it. As for those cowardly captains who deserted you, hang them up, for by G—d they deserve it.

Two of those unworthy cowards, captains Kirby and Wade, were shot on their arrival at Plymouth, having been previously tried by a court-martial.

NAVAL BATTLES, *continued.*

- Off Ushant; a drawn battle between Keppel and d'Orvilliers . . . July 27, 1778
- In New England; the American fleet totally destroyed . . . July 30, 1779
- Near Cape St. Vincent; admiral Rodney defeated a Spanish fleet under admiral Don Langara. See *Rodney* . . . Jan. 16, 1780
- At St. Jago; Mons. Suffrein defeated by commodore Johnston . . . April 16, 1781
- Dogger-bank, between adm. Parker and the Dutch adm. Zoutman: 400 killed on each side . . . Aug. 5, —
- Admiral Rodney defeated the French going to attack Jamaica; took 5 ships of the line, and sent the French admiral, Count de Grasse, prisoner to England . . . April 12, 1782
- The British totally defeated the fleets of France and Spain, in the Bay of Gibraltar . . . Sept. 13, —
- East Indies: a series of actions between sir Edward Hughes and Suffrein, viz.: Feb. 17, 1782, the French had 11 ships to 9; April 12 they had 18 ships to 11, yet were completely beaten. Again, July 6, off Trincomalee, they had 13 to 12, and were again beaten with the loss of 1000 killed, Sept. 3, 1782 . . . June 20, 1783
- Lord Howe defeated the French off Ushant, took 6 ships of war, and sunk one . . . June 1, 1794
- Sir Edward Pellew took 15 sail, and burnt 7, out of a fleet of 35 sail of transports, . . . March 8, 1795
- French fleet defeated, and 2 ships of war taken by admiral Hotham. Fought . . . March 14, —
- Admiral Cornwallis took 8 transports, convoyed by 3 French men-of-war. Fought . . . June 7, —
- Eleven Dutch East Indiamen taken by the *Sceptre*, man-of-war, and some armed British Indiamen in company . . . June 19, —
- L'Orient; the French fleet defeated by lord Bridport, and 3 ships of the line taken. See *L'Orient* . . . June 25, —
- Dutch fleet, under admiral Lucas, in Saldanha Bay, surrenders to sir George Keith Elphinstone. See *Saldanha Bay* . . . Aug. 17, 1796
- Cape St. Vincent (*which see*) . . . Feb. 14, 1797

- Camperdown (*which see*) . . . Oct. 11, —
- Nile (*which see*) . . . Aug. 1, 1798
- Off the coast of Ireland: a French fleet of 9 sail, full of troops, as succours to the Irish, engaged by sir John Borlase Warren, and 5 taken . . . Oct. 12, —
- The Texel fleet of 12 ships and 13 Indiamen surrenders to admiral Mitchell . . . Aug. 28, 1799
- Capture of the *Cerberus* (*which see*) . . . July 29, 1800
- Copenhagen bombarded. See *Copenhagen* . . . April 2, 1801
- Gibraltar Bay; engagement between the French and British fleet; the *Hannibal* of 74 guns lost . . . July 6, —
- Off Cadix: sir James Saumarez obtains a victory over the French and Spanish fleets; 1 ship captured. Fought . . . July 12, —
- Sir Robert Calder, with 15 sail, takes 2 ships (both Spanish) out of 20 sail of the French and Spanish fleets, off Ferrol . . . July 22, 1805
- Off Trafalgar (*which see*) . . . Oct. 21, —
- Sir R. Strachan, with 4 sail of British, captures 4 French ships of the line, off Cape-Ortega, . . . Nov. 4, —
- In the West Indies: the French defeated by sir T. Duckworth; 3 sail of the line taken, 2 driven on shore . . . Feb. 6, 1806
- Sir John Borlase Warren captures 2 French ships . . . March 13, —
- Admiral Duckworth effects the passage of the Dardanelles. See article *Dardanelles*, Feb. 19, 1807
- Copenhagen fleet captured . . . Sept. 8, —
- The Russian fleet of several sail, in the *Tagus*, surrenders to the British . . . Sept. 3, 1808
- Basque Roads: 4 sail of the line and much shipping destroyed by lord Gambier, . . . April 12, 1809
- Two Russian flotillas of numerous vessels taken or destroyed by sir J. Saumarez . . . July, —
- French ships of the line driven on shore by lord Collingwood (2 of them burnt by the French next day) . . . Oct. 25, —
- Bay of Rosas, where lieut. Talloway by direction of captain Hallowell takes or destroys 11 war and other vessels. See *Rosas Bay* . . . Nov. 1, —
- Basseterre: *La Loire* and *La Seine*, French frigates, destroyed by sir A. Cochrane, Dec. 18, —
- The *Spartan* frigate gallantly engages a large French force in the Bay of Naples . . . May 3, 1810
- Action between the *Tribune*, captain Reynolds, and 4 Danish brigs. Fought . . . May 12, —
- Isle of Rhé; 17 vessels taken or destroyed by the *Armide* and *Cadmus* . . . July 17, —
- Captain Barrett in the merchant vessel, *Cumberland*, with 26 men, defeats four privateers and takes 170 prisoners . . . Jan. 16, 1811
- Twenty-two vessels from Otranto taken by the *Cerberus* and *Active* . . . Feb. 22, —
- Amazon French frigate destroyed off Cape Bar-leur . . . March 25, —
- Sagone Bay: 2 French store-ships burnt by captain Barrie's ships . . . May 1, —
- The British sloop, *Little Belt*, and American ship, *President*: their rencontre . . . May 16, —
- Off Madagascar; 3 British frigates under captain Schomberg, engage 3 French larger-sized, with troops on board, and capture 2, May 20, —
- The *Thames* and *Cephalus* capture 36 French vessels . . . July, —
- The *Naiad* frigate attacked in presence of Bonaparte by 7 armed prams; they were gallantly repulsed . . . Sept. 21, —
- French frigates *Pauline* and *Pomone* captured by the British frigates *Alceste*, *Active*, and *Unité* . . . Nov. 29, —
- Rivoli of 84 guns, taken by the *Victorious* of 74 . . . Feb. 21, 1812
- L'Orient; 2 French frigates, &c., destroyed by the *Northumberland*, capt. Hotham . . . May 22, —
- Guerrière*, British frigate, 46 small guns, captured by the American ship *Constitution*, 54 guns (an unequal contest) . . . Aug. 19, —
- British brig *Prolic*, captured by the American sloop *Wasp* . . . Oct. 18, —
- British frigate *Macedonian* taken by the American ship *United States*, large class . . . Oct. 25, —
- British frigate *Java*, taken by the American ship *Constitution*, large class . . . Dec. 29, —
- British frigate *Amelia* loses 46 men killed and 95 wounded, engaging a French frigate, Feb. 7, 1813
- British sloop *Peacock* captured by the American ship *Hornet*: she was so disabled that she sunk with part of her crew . . . Feb. 25, —
- American frigate *Chesapeake* taken by the *Shannon*, captain Broke. See *Chesapeake* . . . June 1, —
- American ships *Grouler* and *Eagle* taken by British gun-boats . . . June 3, —
- American sloop *Argus* taken by the British sloop *Pelican* . . . Aug. 14, —
- French frigate *La Trave*, 44 guns, taken by the *Andromache* of 38 guns . . . Oct. 23, —
- French frigate *Ceres* taken by the British ship *Tagus* . . . Jan. 6, 1814
- French frigates *Alcmene* and *Iphigenia* taken by the *Venerable* . . . Jan. 16, —
- French frigate *Terpsichore* taken by the *Majestic* . . . Feb. 3, —
- French ship *Clorinde* taken by the *Dryad* and *Achates*, after an action with the *Eurotas*, . . . Feb. 25, —
- French frigate *L'Etoile* captured by the *Hebrus*, . . . March 27, —
- American frigate *Essex* captured by the *Phoebe* and *Cherub* . . . March 29, —

NAVAL REVIEWS, SALUTE, AND VOLUNTEERS, see under *Navy*.

NAVARINO (S. W. Greece), BATTLE OF, Oct. 20, 1827, between the combined fleets of England, France, and Russia, under command of admiral Codrington, and the Turkish navy, in which the latter was almost wholly annihilated. More than thirty ships, many of them four-deckers, were blown up or burnt, chiefly by the Turks themselves, to prevent their falling into the hands of their enemies. This destruction of the Turkish naval power was characterised, by the duke of Wellington, as being an "untoward event"—a memorable phrase, applied to it to this day.

NAVARRE, now a province of Spain, formed a part of the Roman dominions, and was conquered by Charlemagne, A.D. 778. His descendants appointed governors, one of whom, Garcias Ximenes, took the title of king about 860. In 1076 king Sancho IV. was poisoned, and Sancho Ramirez of Arragon seized Navarre. In 1134 Navarre became again independent under Garcias Ramirez IV. In 1234, Thibault, count of Champagne, became sovereign of Navarre, as nephew of Sancho VII., and in 1284, by the marriage of the heiress Jane with Philip IV. le Bel, Navarre was united to France. See *below*.

SOVEREIGNS OF NAVARRE.

1274. Jane I. and (1284) Philip le Bel of France.
 1305. Louis X. Hutin of France.
 1316. Philip V. the Long, of France.
 1322. Charles IV., the Fair.
 1328. Jane II. (daughter of Jane I.), and her husband Philip d'Erreux.
 1340. Charles II., the Bad.
 1387. Charles III., the Noble. [of Arragon.
 1425. Blanche, his daughter, and her husband, John
 1441. John II., alone, who became king of Arragon, in 1458. He endeavoured to obtain the crown of Castile also.
 1479. Eleanor de Foix, his daughter.

1479. Francis Phœbus de Foix, her son.
 1483. Catharine (his sister) and her husband John d'Albret. Ferdinand of Arragon conquers and annexes all Navarre south of the Pyrenees, 1512.

LOWER NAVARRE (in France).

1516. Henry d'Albret.
 1555. Jane d'Albret and her husband, Anthony de Bourbon, who died 1562.
 1572. Henry III. who became in 1589 king of France, to which Lower Navarre was formally united in 1609.

NAVIGATION. It owes its origin to the Phenicians, about 1500 B.C. The first laws of navigation originated with the Rhodians, 916 B.C. The first account we have of any considerable voyage is that of the Phenicians sailing round Africa, 604 B.C. *Blair*.

NAVIGATION LAWS. A code of maritime laws is attributed to Richard I. of England, said to have been decreed at the isle of Oleron, 1194 (see *Oleron*), and further enactments were made by Richard II. in 1381. — In Oct. 1651, the parliament of Cromwell passed an act entitled "Goods from foreign parts by whom to be imported," the principles of which were affirmed by 12 Charles II. c. 18, "an act for the Encouraging and Increasing of Shipping and Navigation." The latter act restricts the importation and exportation of goods from or to Asia, Africa, or America, to English ships, of which the masters and three-fourths of the mariners are to be English. This was followed by many acts of similar tenor; which were consolidated by 3 & 4 Will. IV. c. 54 (1833). These acts were in the whole or in part repealed by the act "to amend the laws in force for the encouragement of British shipping and navigation," passed 12 & 13 Vict. c. 29, June 26, 1849, after much opposition. This last act came into operation Jan. 1, 1850. The Steam Navigation act, passed 14 & 15 Vict. c. 79, 1851, came into operation Jan. 1, 1852. The act regulating the navigation of the river Thames was passed in 1786.

NAVIGATORS (or *Navvies*.) These important helpers in the construction of railways derived their name (about 1830) from their formerly making the inland navigation in Lincolnshire, &c., and are said to be descendants of the original Dutch canal labourers.

NAVY OF ENGLAND, "whereon, under the good providence of God, the wealth, safety and strength of the kingdom chiefly depends." (*Act for the government of the Navy.*) The first fleet of galleys, like those of the Danes, was built by Alfred A.D. 897. The number of galleys greatly increased under Edgar, who claimed to be lord of the ocean surrounding Britain, about A.D. 965. A formidable fleet was equipped by the public contribution of every town in England, in the reign of Ethelred II. 1007 *et seq.* when it rendezvoused at Sandwich, to be ready to oppose the Danes. From this period fleets were occasionally furnished by the maritime towns, and the Cinque ports, and were usually commanded by the king, or an admiral under him: such was the fleet of Edward III. at the siege of Calais in 1347; it consisted of 40 ships, badly equipped, under no public fixed regulations. The date of the commencement of the Royal or British navy may therefore be placed 4 Henry VIII. 1512, when the first *Navy-office* was appointed, with commissioners to manage naval affairs, and a number of stout ships of war began to be permanently kept on foot by the crown. In the time of Henry VIII. the navy consisted of one ship of 1200 tons, two of 800 tons, and six or seven smaller; the largest was called the *Great Harry*. Elizabeth's fleet at the time of the Spanish Armada, in 1588, consisted of only 28 vessels, none larger than frigates. James I. added 10 ships of 1400 tons each, and 64 guns, the largest then ever built. *Camden.* In the reign of Charles II. the navy consisted of 9 first-rates (equal to our third), 14 second-rates, and 39 third-rates. The cost was 200,000*l.*

 Capt. Cowper Coles' mode of constructing iron-plated vessels, with a cupola for firing from, made known in 1855, and recommended to the admiralty in 1861; adopted by Ericsson in the *Monitor*, 1862; to be adopted by the British government 1862
 Six different kinds of plated vessels said to be constructing; E. J. Reed authorised to build the *Enterprise* as a specimen of an iron-plated sea-going vessel April, 1862
 Royal Oak, iron-clad steamer, launched at Chatham Sept. 10, —
 THE NAVAL SALUTE TO THE BRITISH FLAG began in Alfred's reign, and though sometimes disputed, may be said to have been continued ever since. The Dutch agreed to strike to the English colours in the British seas, in 1673. The honour of the flag salute at sea was also formally assented to by France in 1704, although it had been long previously exacted by England. See *Flag and Salutes at Sea*.
 NAVAL UNIFORMS. The first notice of the establishment of a uniform in the British naval service, which we have met with, occurs in the *Jacobite's Journal* of March 5, 1748, under the head of "Domestic News," in these terms:—"An order is said to be issued, requiring all his majesty's sea-officers, from the admiral down to the midshipman, to wear a

uniformity of clothing, for which purpose pattern coats for dress suits and frocks for each rank of officers are lodged at the Navy-office, and at the several dock-yards, for their inspection." This is corroborated by the *Gazette* of July 13, 1757, when the first alteration in the uniform took place, and in which a reference is made to the order of 1748, alluded to in the journal above mentioned, and which, in fact, is the year when a naval uniform was first established. James I. had indeed granted, by warrant of 6th April, 1609, to six of his principal masters of the navy, "liverie coats of fine red cloth." The warrant is stated to have been drawn *verbatim* from one signed by queen Elizabeth, but which had not been acted upon by reason of her death. This curious document is in the British Museum; but king James's limited red livery is supposed to have been soon discontinued. *Quarterly Review*.

THE NAVY PAY OFFICE, organised in 1644, was abolished in 1836, when the army and navy pay departments were consolidated in the Paymaster General's office.

THE NAVY LIST was first officially compiled by John Finlaison, the celebrated actuary, and published monthly in 1814.

NAVAL REVIEWS. The queen reviewed the fleet at Portsmouth in March 1854 before it sailed to the Baltic, at the commencement of the Russian war; and again at Portsmouth, on the conclusion of peace, in the presence of the parliament, &c., on April 23, 1856. The fleet extended in an unbroken line of 5 miles, and consisted of upwards of 300 men-of-war, with a tonnage of 150,000, carrying 3800 guns, and manned by 40,000 seamen. There were about 100,000 spectators.

NAVAL VOLUNTEERS (or Reserve). By 16 and 17 Vict. c. 73 (1853), the admiralty were empowered to raise a body of seafaring men to be called the "Naval Coast Volunteers," not to exceed 10,000, for the defence of the coast, and for actual service if required. On Aug. 13, 1859, an act was passed to enable the admiralty to raise a number of men, not exceeding 30,000, as a reserve force of seamen, to be called the "Royal Naval Volunteers." In November following the admiralty issued a statement of the "qualifications, advantages, and obligations" of this reserve. The enrolment commenced on Jan. 1, 1860. The engagement will be for five years, and the volunteers will be entitled to a pension when incapacitated after the expiration of the term. At the prospect of war with the United States in Dec. 1861, a great number of seamen at Hartlepool, Dundee, London, Aberdeen, &c., offered their services.

NAVY OF FRANCE. It is first mentioned in history A.D. 728, when, like that of England at an early period, it consisted of galleys: in this year the French defeated the Frison fleet. It was considerably improved under Louis XIV. at the instance of his minister Colbert, about 1697. The French navy was, perhaps, in its highest splendour

about 1781; but it became greatly reduced in the wars with England. See *Naval Battles*. It has been greatly increased by the present emperor, and in 1859 consisted of 51 ships of the line (14 sailing vessels and 37 steamers), and 398 other vessels, in all 449; including vessels building, converting, or ordered to be built. The new French iron-plated frigate *Gloire*, launched in 1860, has been subjected to much criticism, but appears to be generally considered as successful.* Other iron vessels are in course of construction. The *Solférino* and *Magenta* were launched in June, 1861.

NEBULAR HYPOTHESIS, put forth by sir Wm. Herschel, in 1811, supposes that the universe was formed from shapeless masses, nebulae, or clusters of small stars. It has not been generally received. In Oct., 1860, Mr. Lassell strictly scrutinised the dumb bell nebula, and stated that the brightest parts did not appear to be stars.

NECTARINE, the *Amygdalis Persica*, originally came from Persia about 1562. Previously presents of nectarines were frequently sent to the court of England, from the Netherlands; and Catharine, queen of Henry VIII., distributed them among her friends.

NEEDLES make a considerable article of commerce, as well as of home trade, in England. German and Hungarian steel is of most repute for needles. The first that were made in England were fabricated in Cheapside, London, in the time of Mary, by a negro from Spain; but, as he would not impart the secret, it was lost at his death, and not recovered again till 1566, in the reign of Elizabeth; when Elias Growse, a German, taught the art to the English, who have since brought it to the highest degree of perfection. *Stow*.

NEGRO TRADE. See *Slavery*.

NELSON'S FUNERAL.† Nelson was killed at the battle of Trafalgar, Oct. 21, 1805, and the *Victory* man-of-war arrived off Portsmouth with his remains Dec. 4, same year. The body lay in state in the Painted Hall, at Greenwich, Jan. 5; on the 8th was removed to the Admiralty; and on the next day (the 9th) the funeral took place, the most grand and solemn that had then ever taken place in England. The prince of Wales (afterwards George IV.), the duke of Clarence (afterwards William IV.), and other royal dukes, and almost all the peers of England, and the lord mayor and corporation of London, with thousands of military and naval officers and distinguished men, followed the funeral car to St. Paul's. The military assembled on this occasion amounted to near 10,000 regulars, independent of volunteers. The regulars consisted chiefly of the regiments that had fought and conquered in Egypt, and participated with the deceased hero in delivering that country from the power of France.

NEMEAN GAMES, celebrated at Nemea, in Achaia, were originally instituted by the Argives in honour of Archemorus, who died by the bite of a serpent, and Hercules some time after renewed them, 1226 B.C. They were one of the four solemn games observed in Greece with athletic sports. The conqueror was rewarded with a crown of olives, afterwards of green parsley, in memory of the adventure of Archemorus, whom his nurse laid down on a sprig of that plant. They were celebrated every third year, or, according to others, on the first and third year of every Olympiad, 1226 B.C. *Herodotus*. They were revived by the emperor Julian A.D. 362, but ceased in 396.

NEPAUL (India). The East India Company's war with the state of Nepaul commenced Nov. 1, 1814, and terminated April 27, 1815. A treaty of peace was signed between the parties, Dec. 2, 1815. War renewed by an infraction of the treaty by the Nepaulese, Jan. 1816; and after several contests unfavourable to the Nepaulese the former treaty was ratified, March 15, 1816. An extraordinary embassy from the king of Nepaul to the queen of Great Britain arrived in England, landing at Southampton, May 25, and remained till August, 1850; it consisted of the Nepaulese prince, Jung Bahadoor, and his suite, to whom many honours were paid. He supported the English during the Indian mutiny in 1857.

NEPHALIA. Sacrifices of sobriety among the Greeks, when they offered mead instead of wine to the sun and moon, to the nymphs, to Aurora, and to Venus; and burnt any wood but that of the vine, fig-tree, and mulberry-tree, esteemed symbols of drunkenness, 613 B.C.

NEPTUNE, a primary planet, first observed on Sept. 23, 1846, by Dr. Galle at Berlin in consequence of a letter from M. Le Verrier, who had conjectured from the anomalous movements of Uranus, that a distant planet might exist nearly in the position where Neptune

* Mr. Scott Russell says: "The *Gloire* has been built by M. Dupuis de Lome, after a most exact calculation of the effect of iron plates upon the weight and speed of a vessel. She is perfectly fit to carry a broadside of guns of as heavy a calibre as any that can be carried and worked in our own wooden ships, and she is driven at as least as high a speed as any vessel of similar dimensions in our own service."

† Horatio Nelson was born at Burnham Thorpe, Norfolk, 1758; sailed with captain Phipps to the North Pole, 1773; captured Ilba, Aug. 9, 1796; gained the battle of the Nile, Aug. 1, 1798; attacked Copenhagen, April 2, 1801; was killed at Trafalgar, Oct. 21, 1805.

is situated. Calculations to the same effect had been previously made by Mr. J. Couch Adams. Neptune is said to have been seen by Lalande and thought to be a fixed star.

NERWINDEN. See *Landen*.

NESTORIANS, the followers of Nestorius, some time bishop of Constantinople, who is represented as a heretic for maintaining that though the Virgin Mary was the mother of Jesus Christ as man, yet she was not the mother of God, for that no human creature could participate that to another, which she had not herself; and that God was united to Christ under one person but remained as distinct in nature and essence as though he had never been united at all. He was opposed by Eutyches, and died A.D. 439. See *Eutychians*. Nestorian Christians in the Levant administer the sacrament with leavened bread and in both kinds permit their priests to marry, and use neither confirmation nor auricular confession. *Du Pin*. A Nestorian priest and deacon were in London in July, 1862.

NETHERLANDS. See *Flanders, Holland, and Belgium*.

NEUFCHÂTEL, a canton in Switzerland, formerly a lordship, afterwards a principality. The first known lord was Ulric de Fenis about 1032, whose descendants ruled till 1373, after which by marriages it frequently changed governors. On the death of the last of the Longuevilles, the duchess de Nemours, in 1707, there were many claimants; among them our William III. He and the allies however gave it to Frederic I. of Prussia with the title of prince. In 1806 the principality was ceded to France, and Napoleon bestowed it on his general Berthier, who held it till 1814, when it fell to the disposal of the allies. They restored the king of Prussia the title of prince with certain rights and privileges; but constituted it a part of the Swiss confederation. After an unsuccessful attempt in 1831, the inhabitants in 1848 repudiated their allegiance to Prussia, and proclaimed Neuchâtel a free and independent member of the Swiss confederation. The king of Prussia protested against this: and in 1852 a protocol was signed between England, France, and Austria, recognising his claims. In Sept. 1856 some of his adherents, headed by the count de Pourtales, broke out into insurrection against the republican authorities, who however quickly subdued and imprisoned them with the intention of bringing them to trial. War was threatened by the king of Prussia, and great energy and determination manifested by the Swiss. On the intervention of the English and French governments, after many delays, a treaty was signed on June 11, 1857, by which the king of Prussia virtually renounced his claims on receiving a pecuniary compensation, which he eventually gave up. He retains the title of prince of Neuchâtel without any political rights. The prisoners of Sept. 1856 were released without trial, Jan. 18, 1857.

NEUSTRIA. See *Normandy*.

NEUTRAL POWERS. By the treaty of Paris, signed by the representatives of Great Britain, France, Austria, Russia, Prussia, Turkey and Sardinia, on April 16, 1856, it was determined that privateering should be abolished; that neutrals might carry an enemy's goods not contraband of war; that neutral goods not contraband were free even under an enemy's flag; and that blockades to be binding must be effective. The president of the United States acceded to these provisions in 1861.

NEVILL'S CROSS, OR DURHAM, BATTLE OF, between the Scots under king David Bruce, and the English under Philippa, consort of Edward III. and lord Percy, Oct. 17, 1346. More than 15,000 of the Scots were slain, and their king taken prisoner.

NEVIS, ISLAND OF, West Indies, planted by the English in 1628; taken by the French, Feb. 14, 1782; restored to the English in 1783. The capital is Charleston.

NEWARK (Nottinghamshire), **BATTLE OF**, in which the royal army under prince Rupert repulsed the army of the parliament, besieging the town, March 21, 1644. The church was erected by Henry IV. Here, in the midst of troubles, died king John, 1216; and here, May 5, 1646, Charles I., after his defeat at Naseby put himself into the hands of the Scotch army, who afterwards gave him up to his enemies. Newark was first incorporated by Edward VI. and afterwards by Charles II.

NEW BRUNSWICK was taken from Nova Scotia, and received its name as a separate colony in 1785.

NEWBURY (Berkshire). Near here were fought two desperate battles, (1.) Sept. 20, 1643: between the army of Charles I. and that of the parliament under Essex: it terminated somewhat favourably for the king. Among the slain was the amiable Lucius Cary, viscount Falkland, deeply regretted. (2.) A second battle of dubious result was fought between the royalists and the parliamentarians, Oct. 27, 1644.

NEWCASTLE UPON TYNE (Northumberland). The first coal port in the world,* and the metropolis of the north of England. The coal-mines were discovered here about A.D. 1234. The first charter granted to the townsmen for digging coal was by Henry III. in 1239.

The castle built by Robert Courthose, son of William I. 1080
 The town fortified by William II. —
 St. Nicholas church burnt in 1216; but restored by Edward I. to whom John Baliol did homage here 1292
 St. Nicholas church rebuilt 1359
 Newcastle surrenders to the Scotch in 1640 and 1646 1644
 Who here gave up Charles I. to the parliament Occupied by general Wade in 1745
 The Literary and Philosophical society founded 1793; liberally endowed by Robert Stephenson in 1858-9

T. Bewick, the wood engraver, dies 1828
 The magnificent market erected by Richard Grainger, who otherwise greatly improved the town 1835
 High level bridge erected by Robert Stephenson; and grand central station built 1849-50
 1538 persons die of cholera, Aug. 31 to Oct. 26, 1853
 Great fire through the explosion at Gateshead (which see) Oct. 6, 1854
 Great distress through failure of Northumberland Joint Stock Bank Nov. 1857
 Richard Grainger dies, aged 63 July 4, 1861
 Enthusiastic reception of Mr. W. E. Gladstone Oct. 7-9, 1862

NEWCASTLE'S, DUKE OF, ADMINISTRATION. Formed, April, 1754, resigned Nov. 1756, when the duke of Devonshire became first lord of the treasury.

Thomas Holles Pelham, duke of Newcastle, *first lord of the treasury*.
 Henry Bilson Legge, *chancellor of the exchequer*.
 Earl of Holderness and sir Thomas Robinson (afterwards lord Grantham), *secretaries of state*. The latter succeeded by Henry Fox (afterwards lord Holland).

Lord Anson, *first lord of the admiralty*.
 Lord Grenville, *lord president*.
 Lord Gower (succeeded by the duke of Marlborough), *lord privy seal*.
 Duke of Grafton, earl of Halifax, George Grenville, &c.
 Lord Hardwicke, *lord chancellor*.

NEWCASTLE'S, DUKE OF, AND MR. PITT'S ADMINISTRATION (see *Chatham Administration*), formed June, 1757; resigned May, 1762, lord Bute coming into power.

Thomas Holles Pelham, duke of Newcastle, *first lord of the treasury*.
 William Pitt (afterwards lord Chatham), *secretary of state for the northern department and leader of the house of commons*.
 Lord Grenville, *lord president*.
 Earl Temple, *privy seal*.
 Mr. Legge, *chancellor of the exchequer*.
 Duke of Devonshire, *lord chamberlain*.

Earl of Holderness, *secretary of state for the southern department*.
 Duke of Rutland, *lord steward*.
 Lord Anson, *admiralty*.
 Duke of Marlborough (succeeded by lord Ligonier), *ordnance*.
 Henry Fox, George Grenville, viscount Barrington, lord Halifax, James Grenville, &c.
 Sir Robert Henley, *lord keeper of the great seal*.

NEW CHURCH. See *Swedenborgians*.

NEW COLLEGE, St. John's Wood, London, erected by the Independent dissenters for the education of their ministers, 1850-1, is founded on the union of Homerton, Highbury, and Coward colleges.

NEW ENGLAND, North America. See *England, New*.

NEW FOREST, Hampshire, was made ("afforested") by William the Conqueror, A.D. 1079-85. Many populous towns and villages, and indeed the whole country, for above thirty miles in compass, were laid waste, and no less than thirty-six churches were destroyed. William Rufus was killed in this forest by an arrow, shot by Walter Tyrrel, that accidentally glanced against a tree, A.D. 1100, the site of which is now pointed out by a triangular stone. The New Forest Deer Removal act was passed 14 & 15 Vict. c. 76, Aug. 7, 1851.

NEWFOUNDLAND (N. America). Discovered by Sebastian Cabot, who called it *Prima Vista*, June 24, 1497. It was formally taken possession of by sir Henry Gilbert, 1583. In the reign of Elizabeth, other nations had the advantage of the English in the fishery. In 1577 there were 100 fishing vessels from Spain, 50 from Portugal, 150 from France, and only 15, but of larger size, from England. *Hakluyt*. But the English fishery in some years afterwards (1625) had increased so much that the ports of Devonshire alone employed 150 ships, which sold their fish in Spain, Portugal, and Italy. The sovereignty of England was recognised in 1713. Nearly 1000 English families reside here all the year; and in the fishing season (May to September) more than 15,000 persons resort to Newfoundland (one of our finest nurseries for seamen). It obtained the privilege of a colonial legislation in 1845, and the bishopric was established in 1839. Appalling fire at St. John's, a great portion of the town destroyed, the loss estimated at 1,000,000*l.* sterling, June 9, 1846.†

* In 1366 the use of coal for fuel was prohibited in London, by royal proclamation, chiefly because it injured the sale of wood for fuel, great quantities of which were then growing about the city; but this interdiction did not long continue, and we may consider coal as having been dug and exported from this place for more than 500 years.

† On Jan. 14, 1857, a convention was concluded between the English and French governments, con-

NEWGATE, LONDON. The PRISON derives its name from the gate which once formed a part of it, and stood a little beyond the Sessions-house in the Old Bailey. It was used as a prison for persons of rank, as early as 1218; but was rebuilt about two centuries afterwards by the executors of sir Richard Whittington, whose statue with a cat stood in the niche till the time of its demolition by the great fire of London, in 1666. It was then reconstructed in its late form; but the old prison being an accumulation of misery and inconvenience, was pulled down and rebuilt between 1778 and 1780. During the riots in the latter year, the interior was destroyed by fire, but shortly afterwards restored. In 1857 the interior was pulled down to be re-erected on a plan adapted to the reformatory system. The market, established in 1681, was ordered to be abolished by an act passed in 1861. A meat and poultry market is to be erected in Smithfield.

NEW GRENADA (South America), visited by Columbus, and in 1536 conquered and settled by the Spaniards. It formed part of the new republic of Bogota, established in 1811; and, combined with Caracas, formed the republic of Colombia in 1819. After several reunions and dissolutions the republic of New Grenada, on June 1858, merged into the Grenadine Confederation, which includes Bolivar, Antioquia, Panama, and other small states. The president (1861), M. Ospina, entered on office April 1, 1857.

NEW HARMONY. See *Harmonists*.

NEW HEBRIDES, S. Pacific ocean, discovered by Quiros, who believing them to be a continent named them *Tierra Australia del Espiritu Santo*, in 1606. Bougainville in 1768 found them to be islands; and in 1774 Cook gave them their present name.

NEW HOLLAND. See *Australia, New South Wales, &c.*

NEWMARKET (Cambridgeshire), renowned for its horse-races. It is first mentioned in 1227; and probably derived its name from the market then recently established. James I. erected a hunting-seat here, called the king's house, to which Charles I. was taken as a prisoner in 1647, when the parliament army was quartered in the neighbouring village of Kennet. Charles II., who was fond of racing, built a stand-house for the sake of the diversion, about 1667,* and from that period races have been annual to the present time; and many most extraordinary races have been run. See *Races*.

NEW ORLEANS, capital of Louisiana, N. America (*which see*), founded in 1717, under the regency of the duke of Orleans. In 1788, seven-eighths of the city were destroyed by fire; but it is now rebuilt. The British attacked New Orleans in Dec. 1814, and were repulsed with great loss, by the Americans under general Jackson, Jan. 8, 1815. New Orleans was taken by the Federals on April 26, 1862. The strong feeling of the inhabitants in favour of the Confederates and against the Federals induced general B. Butler to rule them with military rigour, occasionally degenerating into brutal tyranny; especially towards females, May to October 1862.

NEWPORT (Monmouthshire). The chartists (*which see*) collected from the mines and collieries in the neighbourhood of Newport (Monmouthshire), to the number of 10,000, armed with guns, pikes, clubs, &c., and arrived at Newport on Monday morning, Nov. 4, 1839. They divided themselves into two bodies, one of which under the command of Mr. John Frost, an ex-magistrate, proceeded down the principal street of Newport; whilst the other, headed by Mr. Frost's son, took the direction of Stowe-hill. They met in front of the Westgate hotel, where the magistrates were assembled with about 30 soldiers of the 45th regiment, and several special constables. The rioters commenced breaking the windows of the house, and fired on the inmates, by which the mayor, Mr. (now sir Thomas) Phillips, and several other persons were wounded. The soldiers returned the fire, and succeeded in dispersing the mob, which with its leaders fled from the town, leaving about twenty rioters dead, and many others dangerously wounded. A detachment of the 10th royal Hussars having arrived from Bristol, the town became tranquil. Frost was apprehended on the following day, together with his printer, and other influential persons among the chartists. He and several others were tried and convicted in January following, and sentenced to death; but this judgment was afterwards commuted to transportation. An amnesty was granted them in May 3, 1856, and they returned to England in Sept. following.

firming certain French privileges of fishery in exchange for others. The English colonists were dissatisfied with this convention.

* During the races, on March 22, 1683, Newmarket was nearly destroyed by an accidental fire, which occasioned the hasty departure of the company then assembled, including the king, the queen, the duke of York, the royal attendants, and many of the nobility; and to this disaster historians have ascribed the failure of the Rye-House plot, the object of which was said to be the assassination of the king and his brother on the road from Newmarket to London if the period of their journey had not been thus anticipated. See *Rye-House Plot*.

NEW RIVER. An artificial river for the supply of London with water, commenced in 1609, and finished in 1613, when the projector, Hugh Middleton, was knighted by James I. *Strype.* This river, which rises in Hertfordshire, and which, with its windings is forty-two miles long, was brought to London in 1614. Sir Hugh Middleton, who was a citizen of London, died very poor, having been ruined by this immense undertaking. So little was the benefit of it understood, that for above thirty years the seventy-two shares, into which it was divided netted only 5*l.* a piece. Each of these shares was sold originally for 100*l.* Within the last few years they were sold at 900*l.* a share, and some lately at 10,000*l.*

NEWRY (N. Ireland). In the rebellion of 1641, Newry was reduced to a ruinous condition; it was surprised by sir Con. Magenis, but was retaken by lord Conway. After the Restoration the town was rebuilt. It was burnt by the duke of Berwick when flying from Schomberg and the English army, and the castle and a few houses escaped, 1689.

NEWS. The origin of this word has been variously defined. News is a fresh account of anything. *Sidney.* It is something not heard before. *L'Estrange.* News is an account of the transactions of the present times. *Addison.* The word "news" many derive from the adjective *new* (German *neues*). In former times (between the years 1595 and 1730) it was a prevalent practice to put over the periodical publications of the day the initial letters of the cardinal points of the compass as in the margin, importing that these papers contained intelligence from the four quarters of the globe; from this practice some consider the term Newspaper to be derived.

NEW SOUTH WALES, the principal colony of Australia (*which see*). The eastern coast of New Holland was explored and taken possession of by Captain Cook in 1770. At his recommendation a convict colony was first formed here. Captain A. Phillip, the first governor, arrived at Botany Bay with 800 convicts, Jan. 20, 1788; but he subsequently preferred Sydney, about seven miles distant from the head of Port Jackson, as a more eligible situation for the capital. A new constitution was granted in 1855 (18 & 19 Vict. c. 54). See *Sydney*. Population in 1856, 269,722; in 1859, 342,062; in 1861, 350,553. The imports for 1859 amounted to 6,597,953*l.*; the exports to 4,768,049*l.*

NEWS-LETTERS. News-writers in the reign of Charles II. collected from the coffee-houses information, which was printed weekly and sent into the country. The *London Gazette*, then the only authorised newspaper, contained little more than proclamations and advertisements.

NEWSPAPERS.* The first published in England, which might truly be considered as a vehicle of general information, was established by sir Roger L'Estrange, in 1663; it was entitled the *Public Intelligencer*, and continued nearly three years, when it ceased, on the appearance of the *Gazette*. In the reign of James I. 1622, appeared the *London Weekly Courant*; and in the year 1643 (the period of the civil war) were printed a variety of publications, certainly in no respect entitled to the name of newspapers, of which the following were the titles:—

England's Memorable Accidents.
The Kingdom's Intelligencer.
The Diurnal of Certain Passages in
Parliament.
The Mercurius Aulicus.

The Scotch Intelligencer.
The Parliament's Scout.
The Parliament's Scout's Dis-
covery, or Certain Information.

The Mercurius Civicus, or London's
Intelligencer.
The Country's Complaint, &c.
The Weekly Account.
Mercurius Britannicus.

A paper called the *London Gazette** was published Aug. 22, 1642. The *London Gazette* of the existing series was published first at Oxford, the court being there on account of the plague, Nov. 7, 1665, and afterwards at London, Feb. 5, 1666. Printing of newspapers and pamphlets prohibited, 31 Charles I. 1680. *Salmon's Chron.* The regular newspapers commenced on the abolition of the censorship of the press in 1651. *Daily Courant* first published in 1709. Newspapers first stamped in 1713.

NUMBER OF STAMPS ISSUED TO BRITISH NEWSPAPERS.

1753 7,411,757
1760 9,404,790

1774	12,300,000
1790	14,035,639
1800	16,084,905
1810	20,172,837
1820	24,862,186
1825	26,950,693
1830	30,158,741
1835	32,874,652
1840	49,033,384
1843	56,433,977
1850	65,741,271

[In 1850 there were also issued supplement stamps at $\frac{1}{4}$ d. 11,684,423.]

In the year ending Jan. 5, 1851, there were 159 London newspapers, in which appeared 891,650 adver-

* Some copies of a publication are in existence called the *English Mercury*, professing to come out under the authority of queen Elizabeth, in 1588, the period of the Spanish Armada. The researches of Mr. T. Watts, of the British Museum, have proved these to be forgeries, executed about 1766. The full title of No. 50 is "*The English Mercurie*, published by authority, for the prevention of false reports, imprinted by Christopher Barker, her highness's printer, No. 50." It describes the Spanish Armada, giving "A journal of what passed since the 21st of this month, between her majesty's fleet and that of Spayne, transmitted by the Lord Highe Admiral, to the Lordes of council."

† On May 22, 1787, a *London Gazette* extraordinary was forged, with a view of affecting the funds.

NEWSPAPERS, *continued.*

issuements; 222 English provincial newspapers, having 875,631 advertisements. In Scotland, same year, 120 newspapers, having 249,141 advertisements. In Ireland 102 newspapers, having 236,728 advertisements. The number of stamps issued was, in England, 65,741,277 at one penny, and 11,684,423 supplement stamps, at one halfpenny; in Scotland, 7,643,045 stamps at one penny, and 241,264 at one halfpenny; in Ireland, 6,302,728 stamps at one penny, and 43,358 at one halfpenny.

Reduction of newspaper duty from fourpence to one penny, took effect on Sept. 15, 1836.

The distinctive die came into use Jan. 1, 1837.

REGISTERED NEWSPAPERS IN 1850.

London newspapers, daily 12

London newspapers, weekly 58

English provincial newspapers 222

Irish newspapers 102

Scottish newspapers 170

British isles 14

By the act passed in 1855 (18 & 19 Vict. c. 27), the stamp on newspapers, as such, was totally abolished, and will be employed henceforth only for postal purposes. Many new papers were then started, which were but of short duration.

In 1857, 71 million newspapers passed through the post-office. In Jan. 1860, 1060 newspapers; and in Jan. 1862, 1165 newspapers were in course of publication in the United Kingdom.

On Oct. 1, 1861, when the paper duty came off, the Times, Daily News, and Morning Post reduced their price to 3d. each copy unstamped.

NEWSPAPERS, FOREIGN. A French writer asserts that our newspapers owe their origin to one of theirs, the *Journal des Savans*; but that paper did not appear until 1665. M. Renaudet appears to have been the first author of newspapers in France; he had an exclusive privilege from Louis XIII. to publish them in 1631. The first newspaper set up in Germany was in 1715. The first published in America was the *Boston News Letter* in 1704; the first at Philadelphia in 1739; and the first in Holland in 1732. "America, whose population is 23 millions and a half, supports 800 newspapers (50 of these publishing daily), and their annual circulation is stated at 64,000,000. In Paris there exist 169 journals, literary, scientific, religious, and political." *Westminster Review*, 1830.

NEWSPAPERS, IRISH. The first was the *Dublin News Letter*, by Joseph Ray, issued in 1685; *Pue's Occurrences* came out in 1700: *Faulkner's Journal* was established by George Faulkner, "a man celebrated for the goodness of his heart, and the weakness of his head," 1728. The oldest of the existing Dublin newspapers are *Saunders'* (then *Edaile's News-Letter*, begun in 1745, and the *Freeman's Journal*, founded by the patriot Dr. Lucas about 1755 as the *Public Register*. The *Limerick Chronicle*, the oldest of the provincial prints, was established in 1768.

NEW STYLE (first adopted on the continent in 1582), ordered to be used in England in 1751; and the next year eleven days were left out of the calendar—the 3rd of September, 1752, being reckoned as the 14th—so as to make it agree with the Gregorian Calendar, *which see*; and also *Calendar*. In A.D. 200, there was no difference of styles: but there had arisen a difference of eleven days between the old and the new style, the latter being so much beforehand with the former: so that when a person using the old style dates the 1st of May, those who employ the new reckon the 12th. From this variation in the computation of time, we may easily account for the varying dates of historical facts.

NEW TESTAMENT. See *Bible*.

NEWTONBARRY RIOT (S.E. Ireland). On a seizure of stock for tithes, a lamentable conflict ensued here between the yeomanry and the people, when thirty-five persons were killed or wounded, June 18, 1831. The jury at the coroner's inquest was unable to agree on a verdict.

* 144,000 copies sold on Dec. 16, 1861. The prince consort died on the 14th.

† Established by Herbert Ingram, M.P., who was unfortunately drowned in Lake Michigan, Sept. 2, 1860.

NEWTON-BUTLER (N. Ireland). On July 30, 1689, the Enniskilleners under Gustavus Hamilton thoroughly defeated the adherents of James II. commanded by general Maccarty, taking him prisoner with his artillery, arms, and baggage.

NEWTONIAN PHILOSOPHY, the doctrines respecting gravitation, &c., taught by sir Isaac Newton in his "Principia," published in 1687. He was born Dec. 25, 1642; became Master of the Mint, 1699; President of the Royal Society, 1703; and died March 20, 1727. A statue of him in marble by Roubilliac was set up at Trinity College, Cambridge, July 14, 1755, and one in bronze by Theed, at Grantham, Sept. 21, 1858, when lord Brougham delivered an eloquent discourse on the life and works of Newton. The latter statue cost 1600*l.*, which sum was obtained by public subscription.

• **NEW YEAR'S DAY**, &c. The feast was instituted by Numa, and was dedicated to Janus (who presided over the new year), Jan. 1, 713 B.C.*

NEW YORK. Settled by the Dutch (who called it Manhattan and New Amsterdam), about A.D. 1614; but the English, under colonel Nichols, dispossessed them and the Swedes, Aug. 27, 1664, and changed its name. Population in 1860, 814,277.

New York was confirmed to England by the peace of Breda Aug. 24, 1667

The city was one of the principal points of the struggle for independence among the states of America. It surrendered to the British forces under general Howe Sept. 15, 1776

and suffered much till the arrival of sir Guy Carleton May 5, 1782

An independent constitution established, April 20, 1777

The city was evacuated by the British; "Evacuation-day" made one of rejoicing ever since Nov. 25, 1783

Academy of the fine arts, and a botanical garden, established in 1804

Awful fire here, 674 buildings destroyed, and property valued at nearly 20,000,000 dollars Dec. 16, 1835

The Park Theatre destroyed by fire Dec. 16, 1848

Serious riot (several lives lost) at the theatre,

originating in a dispute between Mr. Macready (English) and Mr. Forrest (American) actors May 20, 1849

The Crystal Palace, containing an exhibition of goods from all nations, was opened in the presence of the President of the United States and many other dignitaries, July 14, 1853

New York suffered severely by large commercial failures, and "Hunger demonstrations" took place during the panic Nov. 1857

The Crystal Palace was destroyed by fire, Oct. 5, 1858

A magnificent cathedral erected in Great fire in one large house, 18 lives lost, Feb. 2, 1859

During the civil war of 1861 New York strongly supported the government of president Lincoln (republican, or abolitionist); but during 1862 a re-action gradually took place, and the opposition (democrat) candidates for congress were elected by large majorities, Nov. 1862

See under *United States*.

NEW ZEALAND (in the Pacific Ocean), discovered by Tasman in 1642. He traversed the eastern coast, and entered a strait, where, being attacked by the natives, soon after he came to anchor, he did not go ashore. From the time of Tasman, the whole country, except that part of the coast which was seen by him, remained altogether unknown, and was by many supposed to make part of a southern continent, till 1769-70, when it was circumnavigated by captain Cook. In 1773, he planted several spots of ground on this island with European garden seeds; and in 1777 he found some fine potatoes, greatly improved by change of soil. European population, in 1860, 84,294. Value of imports, in 1859, 1,551,030*l.*; exports, 551,484*l.*

The right of Great Britain to New Zealand recognised at the peace in 1814

No constituted authority was placed over it until a resident subordinate to the government of New South Wales was sent out with limited powers 1833

New Zealand Company established; Wellington founded 1839

Capt. Hobson, the first governor, landed Jan. 29; treaty of Waitangi signed, by which the chiefs cede a large amount of land Feb. 5, 1840

Becomes an independent colony April, 1841

Capt. (now admiral) Fitzroy, governor Dec. 1843 to Nov. 1845

A charter, founded upon an act passed in 1846, creating powers municipal, legislative, and administrative Dec. 29, 1847

This charter was not acted on; and a legislative council was opened by the governor, sir George Grey Dec. 20, 1848

Foundation of Auckland, 1840; Nelson and Taranaki (or New Plymouth), 1841; Otago, 1848; Canterbury 1850

New Zealand Company relinquish charter —

New Zealand made a bishop's see, 1841; subdivided to form another called Christchurch, 1852

Captain (now sir George) Grey, governor Nov. 1845 to Dec. 1853

* On this day the Romans sacrificed to Janus a cake of new sifted meal, with salt, incense, and wine; and all the mechanics began something of their art of trade; the men of letters did the same, as to books, poems, &c.; and the consuls, though chosen before, took the chair and entered upon their office this day. After the government was in the hands of the emperors, the consuls marched on New-year's day to the capitol, attended by a crowd, all in new clothes, when two white bulls never yoked were sacrificed to Jupiter Capitolinus. The 1st of January is more observed as a feast-day in Scotland and France than in England. Nonius Marcellus refers the origin of NEW-YEAR'S GIFTS among the Romans to Titus Tatius, king of the Sabines, who having considered as a good omen a present of some branches cut in a wood consecrated to Strenia, the goddess of strength, which he received on the first day of the new year, authorised the custom afterwards, and gave these gifts the name of Strenæ, 747 B.C. In the reign of Augustus, the populace, gentry, and senators used to send him New-year's gifts, and if he was not in town, they carried them to the capitol.

NEW ZEALAND, *continued.*

Col. Wynyard, governor . . . Jan. 1854 to Sept. 1855	Indecisive actions . . . Sept. 10, 19, Oct. 9, 12, 1860
Governor Brown . . . Oct. —	Gen. Pratt defeats the Maoris at Mahoeahi, and destroys their fortified places . . . Nov. 6, —
An earthquake: not much damage done, Jan. 23, —	The New Zealand colonists in England meet and justify the conduct of the governor, Nov. 22, —
A new constitution granted to New Zealand, June 30, 1852; modified in . . . 1857	The Maoris again defeated, Dec. 29, Jan. 23, and Feb. 24 . . . 1860-1
Insurrection of the natives (Maoris) under a chief named William King (Wirimu King), arising out of disputes respecting the sale of land; the bishop Selwyn and others consider the natives to have been unjustly treated . . . March, 1860	The war ends: surrender of natives, March 19, 1861
Indecisive actions between the militia and volunteers and the Maoris . . . March 14, 28, —	Sir George Grey re-appointed governor, June —
War breaks out at Taranaki: the British repulsed with loss . . . June 30, —	Gold discovered at Otago, and other places, June —
Great excitement in Australia; troops sent to New Zealand, under gen. Pratt, land, Aug. 3, —	A native sovereignty proclaimed; 5000 British soldiers in the islands . . . July —
	Loyalty of the natives increasing . . . May, 1862
	The Maori chiefs sign a poetical address of condolence to the queen on the decease of the prince consort; received . . . Nov. 1862

NEY'S EXECUTION. Ney, duke of Elchingen, prince of the Moskwa, and one of the most valiant of the marshals of France, was shot as a traitor Dec. 7, 1815.* On Dec. 7, 1853, his statue was erected on the spot where he fell.

NIAGARA† (N. America). At the head of this river, on its western shore, is Fort Erie. This fort was taken by the English, July 24, 1759, and was abandoned in the war with the United States, May 27, 1813, but was retaken Dec. 19 following. A suspension bridge of a single span of 800 feet over the Niagara, connecting the railways of Canada and New York, was opened in March, 1855. The estimated weight is 1,669,722 lbs., which is suspended by cables of iron wire. The bridge is elevated 18 feet on the Canadian, and 28 on the American side.

NICARAGUA, a state in Central America (*which see*). Population about 300,000; president, F. Martinez. At the commencement of 1855 it was greatly disturbed by two political parties: that of the president, Chamorro, who held Granada, the capital, and that of the democratic chief Castellon, who held Leon. The latter invited Walker the filibuster to his assistance, who in a short time became sole dictator of the state. ‡ By the united

* After the abdication of Napoleon I., 6th April, 1814, he took the oath of allegiance to the king, Louis XVIII. On Napoleon's return to France from Elba, he marched against him; but his troops deserting, he regarded the cause of the Bourbons as lost, and opened the invader's way to Paris, March, 1815. Ney led the attack of the French at Waterloo, where he fought in the midst of the slain, his clothes pierced with bullet-holes, five horses having been shot under him: night and defeat obliged him to flee. Though included in the decree of July 24, 1815, which guaranteed the safety of all Frenchmen, he was sought out, and on Aug. 5, taken at the castle of a friend at Uxellae, and brought to trial before the Chamber of Peers, Dec. 4. The 12th article of the capitulation of Paris, fixing a general amnesty, was quoted in his favour, yet he was sentenced to death and met his fate with fortitude, Dec. 7, 1815.

† Below Fort Erie, about eighteen miles, are the remarkable falls, which are reckoned among the greatest natural curiosities in the world. The river is here 750 yards wide. The half-mile immediately above the cataracts is a rapid, in which the water falls 58 feet: it is then thrown, with astonishing grandeur, down a stupendous precipice of 150 feet perpendicular, in three distinct and collateral sheets: and, in a rapid that extends to the distance of nine miles below, falls nearly as much more. The river then flows in a deep channel till it enters lake Ontario, at Fort Niagara. The falls were visited by the prince of Wales in Sept. 1860.

‡ William Walker was born at Tennessee, in the United States, where he became successively doctor, lawyer, and journalist, and afterwards gold-seeker in California, whence he was invited to Nicaragua by Castellon, with the promise of 52,000 acres of land, on condition of bringing with him a band of adventurers to sustain the revolutionary cause. Walker accepted the terms, and on June 28 landed at Realajo with 68 men. He increased his forces at Leon, and soon after attacked the town of Rivas, where he was repulsed with loss. He then joined col. Kinney, who had occupied and governed Grey Town, Sept. 6. On Oct. 13, Walker captured Granada by surprise when in a defenceless state, shot Mayorga, one of the ministers, and established a rule of terror. By intervention of the American consul he made peace with the general of the state army, Corral, but shot him on Nov. 7, on finding him corresponding with fugitives at Costa Rica. Walker at first was only general-in-chief; but on Rivas, whom he had made president, deserting him, he became sole dictator. On May 14, 1856, his envoy Vijil was recognised by the President of the United States, whence also he obtained reinforcements during his retention of power. Costa Rica declared war against him, Feb. 28, 1856; the other states of Central America soon followed the example, and a sanguinary struggle ensued, lasting till May, 1857. On Nov. 25, 1856, Walker totally burnt Granada, being unable to defend it, and removed the seat of government to Rivas. This place he surrendered to gen. Mora on May 1, 1857, on the intervention of capt. Davis, of the *St. Mary's*, U.S. Himself, his staff, and 260 men were conveyed in that vessel to New Orleans, where they were received with great enthusiasm. On Nov. 25, 1857, he again invaded Nicaragua, landing at Punta Arenas with 400 men; but on Dec. 8, was compelled to surrender to capt. Paulding, U.S., and was conveyed to New York. He escaped punishment by *non prosequi* (June 2, 1858); but capt. Paulding was tried for exceeding orders, and blamed—yet excused by president Buchanan. On Aug. 5, 1860, Walker landed near Truxillo, Honduras, and took the fort on the 6th. On the 7th he proclaimed that he made war on the government, not on the people of Honduras. On being summoned to surrender his booty by capt. Salmon, R.N., of the *Icarus*, he refused, and fled. He was pursued, caught, given up to the Honduras government, tried, and shot (on Sept. 12). His followers were dismissed.

efforts of the confederated states the filibusters were all expelled in May 1857. On May 1, 1858, Nicaragua and Costa Rica appealed to the great European powers for protection.

NICE or **NICÆA**, an important town in Bithynia, Asia Minor, N.W. Antigonus gave it the name Antigonæia, which Lysimachus changed to Nicæa, in memory of his wife. It became the residence of the kings of Bithynia about 208 B.C. At the battle of Nice, A.D. 194, the emperor Severus defeated his rival Niger, who was again defeated at Issus, and soon after taken prisoner and put to death. In 325, the first general council was held here, which composed the **NICENE CREED** and condemned the Arians. It was attended by 318 bishops from divers parts, who settled both the doctrine of the Trinity and the time for observing Easter. The creed was altered, 381, and confirmed, 431, when it was decreed unlawful to make further additions. When the Crusaders took Constantinople, and established a Latin empire there in 1204, the Greek emperors removed to Nice and reigned there till 1261, when they returned to Constantinople. See *Eastern Empire*, p. 242. Nice was taken by the Ottoman Turks in 1330. •

NICE (N. Italy), a colony of Massilia, now Marseilles. It was taken by the French, and retaken by Eugene of Savoy, in 1706; and by the Austrians in 1800. After the mind of the people had been ascertained by universal suffrage (the votes being nearly unanimous for annexation to France), the province of Nice was given up to France by the Sardinian government. The French troops occupied Nice on April 1, in conformity with a treaty signed March 24, 1860. The people are said to have been really unwilling for the change, and Garibaldi vehemently protested against the annexation. Population of the province, in 1857, 256,593.

NICKEL, a white, ductile, malleable, magnetic metal, largely employed in the manufacture of German silver. Cronstedt in 1751 discovered nickel as a peculiar metal in the mineral called copper-nickel.

NICOLAITANES, a sect mentioned *Rev.* ii. 6, 15, said to have sprung from Nicolas, one of the first seven deacons, and to have maintained the legality of a community of wives, as well as all other heresies, and to have denied the divinity of Christ.

NICOMEDIA, the metropolis of Bithynia, Asia Minor, N.W., founded by king Nicomedes I. 264 B.C. on the remains of Astacus; destroyed by an earthquake, A.D. 115; and restored by the emperor Adrian, 124. The Roman emperors frequently resided here during their eastern wars. Here Diocletian resigned the purple, A.D. 305; and Constantine died at his villa in its neighbourhood, 337. It surrendered to the Seljukian Turks, 1078; and to Orchan and the Ottoman Turks in 1338.

NICOPOLIS (now in Bulgaria), **BATTLE OF**, Sept. 28, 1396, between the allied Christian powers under Sigismund, king of Hungary, afterwards emperor, and the Turks under Bajazet; said to have been the first battle between the Turks and Christians; the latter were defeated, losing twenty thousand slain, and as many wounded and prisoners.

NIEMEN or **MEMEL**, a river flowing into the Baltic, and separating Prussia from Russia. On a raft on this river the emperor Napoleon met Alexander of Russia, June 22, 1807; and made peace with him and Prussia. He crossed the Niemen to invade Russia, June 24, 1812, and re-crossed with the remains of his army, Dec. 28.

NIGER EXPEDITION, undertaken with a view to plant an English colony in the centre of Africa, and supported by a government grant of 60,000*l.*, started in the summer of 1841, and commenced the ascent of the river, Aug. 20, in that year. The expedition consisted of the *Albert*, *Wilberforce*, and *Soudan*. Fever broke out among the crews, Sept. 2, when these vessels had arrived at Iddah. The confluence of the Niger and the Chadda (270 miles from the sea) was reached Sept. 11. The *Soudan* then returned with the sick; the *Wilberforce* ascended the Chadda, and the *Albert* the Niger. But the *Wilberforce* was almost immediately compelled to return, and follow the track of the *Soudan*. The *Albert* arrived at Egga, on the Niger (320 miles from the sea), Sept. 28; but so great had been the progress of disease, that orders were now given for the third vessel to return, which she did, after the necessary delay for procuring firewood, on Oct. 4. This last vessel cast anchor in Clarence cove, Fernando Po, Oct. 17, all the same year.

NIGHTINGALE FUND. On Oct. 21, 1854, Miss Florence Nightingale left England with a staff of 37 nurses, and arrived at Scutari Nov. 5; and rendered invaluable services to the army; she returning to London Sept. 8, 1856. In memory, a meeting was held at Willis's Rooms, on Nov. 29, 1855, to raise funds to establish an institution for the training of nurses and other hospital attendants. Madame Jenny Lind Goldschmidt sang at Exeter Hall on March 11, 1856, and gave the proceeds (1872*l.*) to the fund. The subscriptions closed April 24, 1857, amounting to 44,039*l.* The queen gave Miss Nightingale a valuable jewel.

NIL DARPAN. See *India*, 1861.

NILE (Egypt). This great river rises in the Mountains of the Moon, in about ten degrees of N. lat. and in a known course of 1250 miles receives no tributary streams. The travels of Bruce were undertaken to discover the source of the Nile; he set out from England in June 1768; on the 14th of November, 1770, he obtained the great object of his wishes, and returned home in 1773.—This river overflows regularly every year, from about the 15th of June to the 17th of September, when it begins to decrease, having given fertility to the land. It must rise 16 cubits to insure that fertility. In 1829, the inundations of the Nile rose to 26 instead of 22, by which 30,000 people were drowned and immense property lost. Mr. Petherick set out early in 1861 to explore the country at the source of the Nile. The expense of the expedition will be defrayed by subscriptions collected by the Royal Geographical Society, and otherwise.

NILE, BATTLE OF THE, took place on Aug. 1, 1798, near Rosetta, between the Toulon and British fleets, the latter commanded by lord (then sir Horatio) Nelson. Nine of the French line-of-battle-ships were taken, two were burnt, and two escaped, Aug. 1, 1798. The French ship *L'Orient*, with admiral Brueys and 1000 men on board, blew up, and only 70 or 80 escaped. This is sometimes called the battle of Aboukir; it obtained the conqueror a peerage, by the title of baron Nelson of the Nile. His exclamation upon commencing the battle was, "Victory or Westminster Abbey!"

NIMEGUEN (Holland). Here was signed the celebrated treaty of peace between France and the United Provinces, 1678. The French were successful against the British under the duke of York, before Nimeguen, Oct. 28, 1794; but were defeated by the British, with the loss of 500 killed, Nov. 8, following.

NINEVEH. The capital of the Assyrian Empire (see *Assyria*), founded by Ashur, who called it after himself, about 2245 B.C. Ninus reigned in Assyria, and called this city also after himself, Nineveh, 2069 B.C. *Abbé Lenglet*. Jonah preached against Nineveh (about 862 B.C.), which was taken by Nebuchadnezzar, 606 B.C. The discoveries of Mr. Layard and others in the neighbourhood of Mosul, the supposed site of this ancient capital since 1839, have in a manner disinterred and re-peopled a city which for centuries has not only ceased to figure on the page of history, but whose very locality had long been blotted out of the map of the earth.* In 1848 Mr. Layard published his "Nineveh and its Remains," and in 1853 an account of his second visit in 1849-50.

NISBET OR NESBIT (Northumberland), BATTLE OF, between the English and Scotch armies, the latter greatly disproportioned in strength to the former, yet fought by them with surpassing bravery. Several thousands of the Scots were slain upon the field (the number is stated at 10,000) and in the pursuit, May 7, 1402.

NISMES (Nîmes), S. France, was the flourishing Roman colony Nemausus. Its noble amphitheatre was ruined during the English occupation in 1417. Nîmes embraced Protestantism, and suffered much persecution in consequence, and has frequently been the scene of fierce religious contests. The treaty termed the Pacification of Nîmes (July 14, 1629) gave religious toleration for a time to the Huguenots.

NITRE. See *Saltpetre*.

NITRIC ACID, a compound of nitrogen and oxygen, formerly called *aqua fortis*, first obtained in a separate state by Raymond Lully, an alchemist, about A.D. 1287; but we are indebted to Cavendish, Priestley, and Lavoisier for our present knowledge of its properties. Mr. Cavendish demonstrated the nature of this acid in 1785. Nitrous acid was discovered by Scheele about 1774. Nitrous gas was accidentally discovered by Dr. Hales. Nitrous oxide gas was discovered by Dr. Priestley, in 1776.

NITROGEN OR AZOTE (from the Greek *a no*, and *zōē*, I live), an irrespirable elementary gas. Before 1777, Scheele separated the oxygen of the air from the nitrogen, and almost simultaneously with Lavoisier discovered that the atmosphere is a mixture of these two gases. Nitrogen combined with hydrogen forms the volatile alkali ammonia, so freely given off by decomposing animal and vegetable bodies.

* The forms, features, costume, religion, modes of warfare, and ceremonial customs of its inhabitants stand before us distinct as those of a living people; and it is anticipated that, by help of the sculptures and their cuneiform inscriptions, the researches of the learned may go far in filling up the vast blank in Assyrian annals. Among the sculptures that enrich the British Museum may be mentioned the winged bull and lion, and numerous hunting and battle-pieces; but perhaps the most interesting as confirmatory of the truth of Holy Scripture, is the bas-relief of the eagle-headed human figure, presumed to be a representation of the Assyrian god Nisroch (from *Nisr*, an eagle or hawk), whom Sennacherib was in the act of worshipping when he was assassinated by his two sons, about 710 B.C. *2 Kings* xix. 37.

NOBILITY. The Goths, after they had seized a part of Europe, rewarded their heroes with titles of honour, to distinguish them from the common people. The right of peerage seems to have been at first territorial. Patents to persons having no estate were first granted by Philip the Fair of France, A.D. 1095. George Neville, duke of Bedford (son of John, marquess of Montague), ennobled in 1470, was degraded from the peerage by parliament, on account of his utter want of property, 19 Edw. IV. 1478. Noblemen's privileges were restrained in June 1773. See *Peerage* and the various orders of nobility.

NOBILITY OF FRANCE. The French nobility preceded that of England, and continued till the Revolution. The National Assembly decreed that hereditary nobility could not exist in a free state; that the titles of dukes, counts, marquesses, knights, barons, excellencies, abbots, and others, be abolished; that all citizens take their family names; liveries and armorial bearings also to be abolished, June 18, 1790. The records of the nobility, 600 volumes, were burnt at the foot of the statue of Louis XIV. June 25, 1792. A new nobility was created by the emperor Napoleon I. 1808. The hereditary peerage was abolished in that country, Dec. 27, 1831. See *France*.

NOBLE, an ancient English coin, first struck in the reign of Edward III. about 1337. It was stamped with a rose, and was thence called a rose noble; its value as money of account was 6s. 8d. *Camden*.

“**NOLUMUS LEGES ANGLIÆ MUTARI.**” See *Bastards* and *Merton*.

NON-CONFORMISTS. The Protestants in England are divided into conformists and non-conformists, or, churchmen and dissenters. The former conform to the mode of worship and form of church-government established and supported by the state; the latter meet for divine worship in places of their own. The first place of meeting of the latter, in England, was established at Wandsworth, near London, Nov. 20, 1572. The name of non-conformists was taken by the Puritans when the Act of Uniformity came into operation on Aug. 24, 1662, (termed “Black Bartholomew’s day”), when 2000 ministers of the established religion resigned, not choosing to conform to the statute passed “for the uniformity of public prayers and administration of the sacraments.” See *Puritans* and *Dissenters*. The laws against them were relaxed in 1690.—The *Nonconformist* newspaper (edited by Mr. Edward Miall), began in 1841.

NONES, in the Roman Calendar, were the fifth day of each month, excepting March, May, July, and October, when the nones fell on the seventh day.

NON-JURORS. They considered James II. to have been unjustly deposed, and refused to swear allegiance to William III. and his successors. Among them were Sancroft, archbishop of Canterbury; Ken, bishop of Bath and Wells, and the bishops of Ely, Gloucester, Norwich, and Peterborough, and many of the clergy, who were deprived in 1691. Non-jurors were subjected to a double taxation, and were obliged to register their estates, May 1723.

NON NOBIS, DOMINE! (“Not unto us, O Lord!” &c., Ps. cxv. 1), a musical canon, sung as a grace at public feasts, was composed by W. Bird in 1618.

NOOTKA SOUND (Vancouver’s Island), discovered by Captain Cook in 1778. It was settled by the British in 1786, when a few British merchants in the East Indies formed a settlement to supply the Chinese market with furs: but the Spaniards in 1789 captured two English vessels and took possession of the settlement. The British ministry demanded reparation, and the affair was amicably terminated by a convention, and a free commerce was confirmed to England in 1790.

“**NO POPERY RIOTS.**” See *Gordon*.

NORDLINGEN. Here the Swedes under count Horn were defeated by the Austrians in 1634; and the latter by Turenne in 1645.

NORE MUTINY. See *Mutinies*.

NORFOLK ISLAND, a penal colony of England, discovered in 1774, by Captain Cook, who found it uninhabited, except by birds. The settlement was made by a detachment from Port Jackson under governor Phillip, in 1788, in Sydney bay, on the south side of the island. This was at one time the severest penal colony of Great Britain. The island was abandoned in 1809; but re-occupied as a penal settlement in 1825. The descendants of the mutineers of the *Bounty* were removed to it in June 1856. See *Pitcairn’s Island*.

NORMANDY (N. France), part of Neustria, a kingdom founded by Clovis in 511 for his son Clotaire, which was united to France by Charles the Bald in 837. From the beginning of the ninth century it was continually devastated by the Scandinavians, called

Northmen or Normans, to purchase repose from whose irruptions Charles the Simple of France ceded the duchy to their leader Rollo, A.D. 905 to 912. From its conquerors it received its present name. Rollo, the first duke, held it as a fief of the crown of France, and several of his successors after him, until William, the seventh duke, acquired England, in 1066. It remained a province of England with some intermissions till the reign of king John, 1204, when it was re-united to France. It was re-conquered by Henry V., 1418, and held by England partially till 1450. The English, however, still possess the islands on the coast, of which Jersey and Guernsey are the principal.

DUKES.

912. Rollo (or Raoul), baptised as Robert.
920 or 927. William I. Longsword.
943. Richard I. the Fearless.
995. Richard II. the Good.
1027. Richard III.
1028. Robert I. the Devil.
1035. William II. (I. of England).

1087. Robert II., Courthose (his son), after a contest despoiled by his brother.
1106. Henry I. (king of England).
1135. Stephen (king of England).
1144. Matilda and Geoffrey Plantagenet.
1151. Henry II. (king of England in 1154).
1189. Richard IV. (I. of England).
1199-1203. Arthur and John of England.

NORTH ADMINISTRATION. During this administration, formed Jan. 1770, Great Britain lost her American possessions. After his dismission from office, March 30, 1782, lord North entered into a league with the Whigs: this led to the short-lived Coalition ministry (1783). He succeeded to the earldom of Guildford in 1790, and died in 1792. See "*Coalition*."

Frederick, lord North, *First lord of the treasury, and chancellor of the exchequer*.
Earl Gower, *lord president*.
Earl of Halifax, *privy seal*.
Lord Rochford, lord Weymouth (succeeded by lord

Sandwich), and lord Hillsborough, *secretaries of state*
Sir Edward Hawke, *admiralty*.
Marquess of Granby, *ordnance*.
Sir Gilbert Elliot, Lord Hertford, duke of Ancaster, lord Carteret, &c.

NORTHALLERTON (Yorkshire). Near here was fought the "battle of the Standard" between the English and the Scotch armies, Aug. 22, 1138. The archbishop of York brought forth a consecrated standard on a carriage at the moment when the English, under the command of the earls of Albemarle and Ferrers, were hotly pressed by the invaders, headed by king David. This so animated their soldiers, that, coupled with a supposition on the part of the enemy that their king was slain, a retreat was attempted, and the most sanguinary slaughter ensued. *Hume*.

NORTHAMPTON was burnt by the Danes in 1010. Here Henry III. proposed to found a university in 1260, and held a parliament in 1269. On July 10, 1400, a conflict took place between the duke of York and Henry VI. of England, in which the unfortunate monarch was defeated, and made prisoner (the second time) after a sanguinary fight which took place in the meadows below the town. Northampton was ravaged by the plague in 1637. It was seized and fortified by the parliamentary forces in 1642. The memorable fire, which almost totally destroyed the town, occurred Sept. 3, 1675.

NORTH BRITON NEWSPAPER: Number 45* (Wilkes's number), dated Saturday, April 23, 1763, was, by order of both houses of parliament, publicly burnt in London by the hands of the common hangman, Dec. 3, 1763. Wilkes by this newspaper (commenced in 1762), increased the antipathy to the Scotch then very prevalent in England; having been greatly favoured by the minister, the earl of Bute.

NORTH CAROLINA. See *Carolina*.

NORTHMEN or NORSEMEN. See *Scandinavia* and *Normandy*.

NORTHUMBRIA. See *Britain*.

NORTH-WEST PASSAGE. The attempt to discover a north-west passage was made by a Portuguese named Corte Real, about A.D. 1500. It was repeated by the English in 1553; and the project was greatly encouraged by queen Elizabeth in 1585, in which year a company was associated in London, and was called the "Fellowship for the Discovery of the North-West Passage." From 1745 to 1818 parliament offered 20,000*l.* for this discovery. In 1818 the reward was modified by proposing that 5000*l.* should be paid when either 110°, 120°, or 130° W. long. should be passed: one of which payments was made to sir E. Parry. For their

* Number 45 contained a commentary on the king's speech, couched in such caustic terms, that a prosecution was commenced against Wilkes. Having been arrested on a general warrant, he was brought by a writ of *habeas corpus*, before chief justice Pratt, of the common pleas, who declared the judgment of that court, that general warrants were illegal, and he was consequently discharged. But, not content with this escape, he reprinted the obnoxious number, which produced a regular prosecution to conviction. See *Warrants, General*.

labours in the voyages enumerated in the *list below*, Parry, Franklin, Ross, Back, and Richardson, were knighted. The honour of completing the north-west passage is due to capt. M'Clure, who sailed in the *Investigator* in company with com. Collinson in the *Enterprise* in search of sir John Franklin, Jan. 20, 1850. On Sept. 6, he discovered high land, which he named Baring's land; on the 9th, other land, which he named after prince Albert; on the 30th, the ship was frozen in. Entertaining a strong conviction that the waters in which the *Investigator* then lay communicated with Barrow's straits, he set out on Oct. 21, with a few men in his sledge, to test his views. On Oct. 26, he reached Point Russell ($73^{\circ} 31'$ N. lat. $114^{\circ} 14'$ W. long.), where from an elevation of 600 feet he saw Parry or Melville Sound beneath them. The strait connecting the Pacific and Atlantic Oceans he named after the prince of Wales. The *Investigator* was the first ship which traversed the Polar sea from Behring straits to Behring island. Intelligence of this discovery was brought to England by com. Inglefield, and the Admiralty chart was published Oct. 14, 1853. Capt. M'Clure returned to England, Sept. 1854. In 1855, 5000*l.* were paid to captain (afterwards sir Robert) M'Clure, and 5000*l.* were distributed among the officers and crew. On Jan. 30, 1855, the Admiralty notified that the Arctic medal would be given to all persons engaged in the expeditions from 1818 to 1855. See *Franklin*.

NORWAY. Until the ninth century, Norway was divided into petty principalities, and was little known to the rest of Europe except by the piratical excursions of its natives. It was converted to Christianity in A.D. 1000. The city of Bergen was founded in 1070 by Olaf III. Christiania, the modern capital, was built in 1624 by Christian IV. The kingdom since 1000 was alternately subject to Sweden or Denmark, or independent: it was permanently united to Denmark, 1450. Pomerania and Rugen were annexed to Denmark in exchange for Norway; given to Sweden by the treaty of Kiel, Jan. 14, 1814. On May 17, the Norwegians declared their independence. The Swedish troops entered Norway on July 16; the elected king of Norway abdicated, Oct. 10; and on Nov. 4, Charles XIII. was

* The gallant sir Hugh Willoughby, took his departure from Ratcliffe, on his fatal voyage for discovering the north-east passage to China. He sailed with great pomp by Greenwich, where the court then resided. The council and courtiers appeared at the windows, and the people covered the shores. The young king, Edward VI., alone lost the noble and novel sight, for he then lay on his death-bed; so that the principal object of the parade was disappointed. Sir Hugh Willoughby was unfortunately entangled in the ice, and frozen to death on the coast of Lapland. *Hakluyt*.

† Sir John Franklin died June 11, 1847 (see *Franklin*); sir E. Parry died July 8, 1835, aged 65; and sir John Ross died Aug. 30, 1856, aged 80.

‡ In 1831 he discovered Boothia Felix: on June 31, same year, he came to a spot which he considered to be the true magnetic pole, in $70^{\circ} 5' 17''$ N. Lat. and $56^{\circ} 46' 45''$ W. Long.

proclaimed king by the National Diet of Sweden (Storthing) assembled at Christiania. He accepted the constitution which declares Norway a free, independent, indivisible and inalienable state, united to Sweden. Hereditary nobility was abolished in 1821, and the national order of St. Olaf was instituted by king Oscar in 1847. See *Sweden*.

KINGS OF NORWAY.

863. Harold Hårfager.	1164. Magnus V.
933. Eric I.	1184. Sverrir.
936. Haco the Good.	1202. Haco IV.
950. Harold.	1204. Anarchy.
962. Anarchy.	1217. Haco V.
994. Olaf I.	1263. Magnus VI., the Legislator.
1000. Eric and Sweyn.	1280. Eric II., the Priest-hater.
1017. Olaf II., the Lamb.	1299. Haco VI.
1032. Sweyn II.	1319. Magnus VII. (II. of Sweden).
1036. Magnus I., the Good.	1343. Haco VII.
1047. Harold IV., Hardrade.	1380. Olaf IV.
1066. Magnus II. and Olaf III.	1387. Eric III. (VII. of Denmark).
1068. Olaf III., alone.	1397. Norway united to Denmark.
1087. Magnus III., Barefoot.	1448. United to Sweden.
1103. Sigurd I.	1450. Re-united to Denmark.
1130. Magnus IV. and Harold V.	1814. Re-united to Sweden.
1134. Sigurd II.	

NORWICH (Norfolk). First mentioned in history in the Saxon Chronicle at the period when Sweyn, king of Denmark, destroyed it by fire, A.D. 1004. Artisans from the Low Countries established here the manufacture of baizes, arras, &c., about 1132. A great plague in 1348 carried off many thousand persons; and in 1505 Norwich was nearly consumed by fire. The cathedral was first erected in 1088, by bishop Herbert Losinga; it was completed by bishop Middleton, about 1280. The church of the Black friars, now St. Andrew's Hall, was erected in 1415. The public library was instituted in 1784. The Norwich new canal and harbour were opened June 3, 1831.

NORWICH, BISHOPRIC OF, originally East Anglia: the first bishop was Felix, a Burgundian, sent to convert the East Anglians about A.D. 630. The see was divided into two distinct bishoprics—Elmham, in Norfolk, and Dunwich, in Suffolk, about 673. Both sees suffered extremely from the Danish invasions, insomuch that after the death of St. Humbert, they lay vacant for a hundred years. At last the see of Elmham was revived, and Dunwich was united to it; but Arfastus removed the seat to Thetford, where it continued till Herbert Losinga removed it to Norwich, 1091. This see has given to the church of Rome two saints; and to the nation five lord chancellors. It was valued in the king's books at 899*l.* 18*s.* 7½*d.* per annum. Present income 4500*l.* See *Bishoprics*.

RECENT BISHOPS OF NORWICH.

1790. George Horne; died Jan. 17, 1792.	tion, and for a long time the only liberal
1792. Charles Manners Sutton; translated to Canterbury, Feb. 1, 1805.	bishop in the house of peers.
1805. Henry Bathurst; died April 5, 1837. He was a strenuous supporter of catholic emancipa-	1837. Edward Stanley; died Sept. 6, 1849.
	1849. Samuel Hinds; resigned 1857.
	1857. Hon. John T. Pelham, May; present bishop.

NOTABLES. An assembly of the notables of France was convened by Calonne, the minister of Louis XVI. on Feb. 22, 1787, on account of the deranged state of the king's finances. Again on 1788, when Calonne opened his plan, but any reform militated too much against private interest to be adopted. Calonne was dismissed, and soon after retired to England: Louis having lost his confidential minister, De Vergennes, by death, called De Brienne, an ecclesiastic, to his counsels. The notables were re-assembled on Nov. 6, 1788. In the end, the States General were convoked Dec. 5; and from this assembly sprang the National Assembly (*which see*). The notables were dismissed by the king, Dec. 12, 1788.—The *Spanish notables* assembled and met Napoleon (conformably with a decree issued by him commanding their attendance), at Bayonne, May 25, 1808.

NOTARIES PUBLIC, said to have been appointed by the primitive fathers of the Christian church, to collect the acts or memoirs of the lives of the martyrs, in the first century. *Du Fresnoy*. This office was afterwards changed to a legal employment, to attest deeds and writings, so as to establish their authenticity in any other country. An important statute to regulate notarial transactions was passed 40 Geo. III. 1800, and some statutes on the subject have been enacted since.

NOTRE DAME, the cathedral at Paris, was founded 1163.

NOTTINGHAM. The castle here was defended by the Danes against king Alfred, and his brother Ethelred, who retook it, A.D. 868. It was rebuilt by William I. in 1068; and

ultimately it became a strong fortress. It was burnt by rioters during the Reform excitement, Oct. 10, 1831. The riots at Nottingham, in which the rioters broke frames, &c., commenced Nov. 14, 1811, and continued to Jan. 1812. Great similar mischief was done in April, 1814. The Watch and Ward act was enforced Dec. 2, 1816.

NOVARA (Sardinia), BATTLE OF, March 23, 1849, when the Austrian marshal Radetzky totally defeated the king Charles Albert and the Sardinian army. The contest began at 10 A.M. and lasted till late in the evening; the Austrians lost 396 killed, and had about 1850 wounded; the Sardinians lost between 3000 and 4000 men, 27 cannons, and 3000 prisoners. The king of Sardinia soon after abdicated in favour of his son Victor Emmanuel, the present king (1862).

NOVA SCOTIA (N. America). Settled in A.D. 1622, by the Scotch under sir William Alexander, in the reign of James I. of England, from whom it received the name of Nova Scotia. In 1710 the French included it in *Acadia*. Since its first settlement it has more than once changed proprietors, nor was it confirmed to England till the peace of Utrecht, in 1713. It was taken in 1745 and 1758; but was again confirmed to England in 1760. Nova Scotia was divided into two provinces in 1784; and was erected into a bishopric in August, 1787. See *Baronets*. Gold was found in Nova Scotia in 1861.

NOVELS (Novellæ), a part of Justinian's Code published A.D. 535. See *Romances*.

NOVEMBER (*novem*, nine), anciently the ninth month of the year. When Numa added January and February, in 713 B.C. it became the eleventh as now. The Roman senators wished to name this month in which Tiberius was born, by his name, in imitation of Julius Cesar, and Augustus; but the emperor refused, saying, "What will you do, conscript fathers, if you have *thirteen* Caesars?"

NOVGOROD (central Russia), made the seat of his government by Ruric, a Varangian chief, in 862, is held to be the foundation of the Russian Empire. In memory of the event the czar inaugurated a national monument at Novgorod, on Sept. 20, 1862.

NOVI (N. Italy), BATTLE OF, in which the French army, commanded by Joubert, was defeated by the Russians under Suwarrow, with immense loss, Aug. 15, 1799. Among 10,000 of the French slain was their leader, Joubert, and several other distinguished officers.

NOVUM ORGANON of Lord Bacon, contains his system of philosophy, published 1620.

NUISANCES REMOVAL ACT. See *Sanitary Legislation*.

NUMANTINE WAR. The war between the Romans and the Celtiberians (Celts who possessed the country near the Iber, now the Ebro) began 140 B.C. The country was included in the province *Tarraconensis*. War began on account of the latter having given refuge to the Sigdians, their own allies, who had been defeated by the Romans. Numantia, a city unprotected by walls or towers, bravely withstood a long siege. The inhabitants obtained some advantages over the Roman forces, till Scipio Africanus was empowered to finish the war, and see the destruction of Numantia. His army of 60,000 men was bravely opposed by no more than 4000 men able to bear arms. The courage of the Numantines was changed into despair. Their provisions failing, they fed upon horse-flesh, and afterwards on their own dead, and at last drew lots to kill one another. At length they set fire to their houses, and destroyed themselves, so that not even one remained to adorn the triumph of the conqueror, 133 B.C.

NUMIDIA (N. Africa), the seat of the war of the Romans with Jugurtha, which began 111 B.C., and ended with his subjugation and captivity, 106. The last king, Juba, joined Cato and was killed at the battle of Thapsus, 46 B.C., when Numidia became a Roman province. See *Mauritania*.

NUMISMATICS, the science of coins and medals, an important adjunct to the study of history. In this country Evelyn (1697), Addison (1726), and Pinkerton (1789), published works on medals. Ruding's *Annals* is the great work on British coinage (new edition, 1840).—The Numismatic Society in London was founded by Dr. John Lee in 1836. It publishes the *Numismatic Chronicle*.—Mr. Yonge Akerman's *Numismatic Manual* (1840) is a useful introduction to the science. Foreign works are numerous.

NUNCIO, an envoy from the pope of Rome to Catholic states. The pope deputed a nuncio to the Irish rebels in 1645. The arrival in London of a nuncio, and his admission to an audience by James II. 1687, is stated to have hastened the Revolution.

NUNNERY. The first founded is said to have been that to which the sister of St. Anthony retired at the close of the third century. The first founded in France, near

Poitiers, by St. Marcellina, sister to St. Martin, A.D. 360. *Du Fresnoy*. The first in England was at Folkstone, in Kent, by Eadbald, king of Kent, 630. *Dugdale's Monasticum Anglicanum*. See articles *Abbeys* and *Monasteries*. The nuns were expelled from their convents in Germany, in July 1785. They were driven out of their convents in France, in Jan. 1790. In Feb. 1861, monastic establishments were abolished in Naples, compensation being made to the inmates. For memorable instances of the constancy and fortitude of nuns, see articles *Acre* and *Coldingham*.

NUREMBERG, a free imperial German city. In 1522, the diet here demanded ecclesiastical reforms and a general council, and in 1532 secured religious liberty to the Protestants.

O.

OAK, styled the monarch of the woods; and, among the ancients, an emblem of strength, virtue, constancy, and long life. It grows in various parts of the world, but that produced in England is considered to be the best calculated for ship-building. The oak gives name to a constellation in the heavens—Robur Caroli, the royal oak—named by Dr. Halley in 1676, in memory of the oak tree in which Charles II. saved himself from his pursuers, after the battle of Worcester, Sept. 3, 1651. See *Boscobel*. The evergreen oak, *Quercus Ilex*, was brought from the south of Europe before A.D. 1581. The scarlet oak, *Quercus Coccinea*, was brought from North America before 1691. The chestnut-leaved oak, *Quercus Prunus*, from North America before 1730. The Turkey oak, *Quercus Berris*, from the South of Europe, 1735. The agaric of the oak, in pharmacy, was known as a styptic in 1750. In 403 the "Synod of the oak" was held at Chalcedon.

OATES'S PLOT. Titus Oates, at one time chaplain of a ship of war, was dismissed for immoral conduct, and became a lecturer in London. In conjunction with Dr. Tongue, he invented a plot against the Roman Catholics, who he asserted had conspired to assassinate Charles II., and extirpate the Protestant religion. He made it known Aug. 12, 1678, and in consequence several Roman Catholics were accused, and upon false testimony convicted and executed; among them the aged viscount Stafford, Dec. 29, 1680. Oates was afterwards tried for perjury (in the reign of James II.), and being found guilty, was fined, put in the pillory, publicly whipped from Newgate to Tyburn, and sentenced to imprisonment for life, May 1685. On the accession of William and Mary he was pardoned, and a pension of 3*l.* a week granted him, 1689.

OATHS. The administration of an oath in judicial proceedings was introduced by the Saxons into England, A.D. 600. *Rapin*. That administered to a judge was settled 1344. Of supremacy, first administered to British subjects, and ratified by parliament, 26 Hen. VIII. 1535. Of allegiance, first framed and administered, 3 James I. 1605. *Stow's Chron.* Of abjuration, being an obligation to maintain the government of king, lords, and commons, the church of England, and toleration of Protestant dissenters, and abjuring all Roman Catholic pretenders to the crown, 13 Will. III. 1701. Oaths were taken on the Gospels so early as A.D. 528; and the words "So help me God and all saints," concluded an oath until 1550. The Test and Corporation oaths modified by stat. 9 Geo. IV. 1828. See *Tests*. Act abolishing oaths in the customs and excise departments, and in certain other cases, and substituting declarations in lieu thereof, 1 & 2 Will. IV., 1831. Affirmation, instead of oath, by separatists, 3 & 4 Will. IV. c. 82, 1833; and 1 Vict. c. 5, 1837. See *Affirmation*. In 1858 and 1860 Jews elected M.P. were relieved from part of the oath of allegiance. See *Jews*.

OBELISK. (Greek *obelos* a spit, *monolithos* a single stone.) The first mentioned in history was that of Rameses, king of Egypt, about 1485 B.C. The Arabians called them Pharaoh's needles, and the Egyptian priests the finger of the sun; they differed very much as to their costliness, magnitude, and magnificence. Several were erected at Rome; one was erected by the emperor Augustus in the Campus Martius, on the pavement of which was an horizontal dial that marked the hour, about 14 B.C. Of the obelisks brought to Rome by the emperors, several have been restored and set up by various popes, especially Sixtus V. In London are three obelisks: first in Fleet-street, at the top of Bridge-street, erected to the famous John Wilkes, lord mayor of London in 1775; and immediately opposite to it, at the south end of Farringdon-street, stands another, of granite, to the memory of Robert Waithman, lord mayor in 1824, erected June 25, 1833; the third, at the south end of the Blackfriars-road, marks the distance of one mile and a fraction from Fleet-street. An obelisk from Luxor was set up in the Place de la Concorde, Paris, in 1836.

OBSERVATORIES. The first is supposed to have been on the top of the temple of Belus at Babylon. On the tomb of Osymandyas, in Egypt, was another, and it contained a golden circle 200 feet in diameter: that at Benares was at least as ancient as these. The first in authentic history was at Alexandria, about 300 B.C., erected by Ptolemy Soter. The first in modern times was at Cassel, 1561. The Royal Observatory at Greenwich was founded by Charles II., A.D. 1675; and from the meridian of Greenwich all English astronomers make their calculations.

OCEAN MONARCH, an American emigrant ship, left Liverpool bound for Boston, Aug. 24, 1848, having 396 passengers on board. She had not advanced far into the Irish Channel, being within six miles of Great Ormshead, Lancashire, when she took fire, and in a few hours was burnt to the water's edge. The Brazilian steam-frigate, the *Alfonzo*, happened to be out on a trial trip at the time, with the prince and princess de Joinville and the duke and duchess d'Aumale on board, who witnessed the catastrophe, and aided in rescuing and comforting the sufferers with exceeding humanity. They, with the crews and passengers of the *Alfonzo* and the yacht *Queen of the Ocean*, so effectually rendered their heroic and unwearied services as to save 156 persons from their dreadful situation, and 62 others escaped by various means. But the rest, 178 in number, perished in the flames or in the sea.

OCTARCHY. The octarch was the chief or most powerful of the monarchs of the heptarchy, giving laws to the others, and was called *Rex gentis Anglorum*. Though there were seven kingdoms, yet the whole British nation was for the most part subject to one king alone. Hengist was the first octarch, A.D. 455, and Egbert the last, A.D. 800. See *Britain*. Some authors insist that the English heptarchy should have been called the *octarchy*, and that *heptarchy* is not the correct term.

OCTOBER, the eighth month in the year of Romulus, as its name imports, and the tenth in the year of Numa, 713 B.C. October still retained its first name, although the senate ordered it to be called *Faustinus*, in honour of *Faustina*, wife of Antoninus the emperor; and Commodus called it *Invictus*, and *Domitianus*. October was sacred to Mars.

OCTROIS (from the Low Latin, *auitorium*, authority), a term originally applied to concessions from sovereigns; or to the taxes levied at the gates of towns in France on articles of food before entering the city. These octrois, of ancient origin, were suppressed in 1791, but re-established in 1797, and were re-organised in 1816, 1842, and 1852. In 1859 the octrois of Paris produced above 54 million francs. The Belgian government became very popular in July 1860, by abolishing the *Octrois*.

ODES are nearly as old as the lyre: they were at first extempore compositions, accompanying this instrument, and sung in honour of the gods. Perhaps the most beautiful and sublime odes ever written, as well as the oldest, are those of the royal prophet Isaiah, on the fall of Babylon, composed about 757 B.C. Anacreon's odes were composed about 532; Pindar's from 498 to 446; and Horace's from 24 to 13, all B.C. Anciently odes were divided into strophe, antistrophe, and epode. See *Poets Laureate*, and *Lyric Poetry*.

ODESSA, a port on the Black Sea, built by the empress Catherine of Russia in 1784-1792, after the peace of Jassy. In 1817 it was made a free port, since when its prosperity has rapidly increased. It was partially bombarded by the British, April 21, 1854, in consequence of the Russian batteries having fired on a flag of truce, April 6. On May 12, the English frigate *Tiger* stranded here, and was destroyed by Russian artillery. The captain Giffard, and many of his crew were killed, and the rest made prisoners.

ODONTOLOGY (from the Greek *odontes*, teeth), the science of the teeth, may be said to have really begun with the researches of professor Richard Owen, who in 1839 made the first definite announcement of the organic connection between the vascular and vital soft parts of the frame and the hard substance of a tooth. His comprehensive work "Odontography" (illustrated with beautiful plates) was published 1840-5.

ECUMENICAL BISHOP (from the Greek *oikoumenē*, the habitable, understood *globe*), "universal bishop;" a title assumed by John, bishop of Constantinople, 587.

OFFA'S DYKE, the intrenchment from the Wye to the Dee, made by Offa, a Saxon king, to defend his country from the incursions of the Welsh, A.D. 774. Offa, king of Mercia, caused a great trench to be dug from Bristol to Basingwark, in Flintshire, as the boundary of the Britons who harboured in Wales; the Welsh endeavoured to destroy it, but were repulsed with great loss. *Chron. Brit.*

OGYGES, **DELUGE OF** (which laid Attica waste for more than two hundred years afterwards, and until the arrival of Cecrops), is stated to have occurred 1764 B.C. See *Deluge*.

OHM'S LAW, for determining the quantity of the electro-motive force of the Voltaic battery, was published in 1827. It is in conformity with the discovery that the earth may be employed as a conductor, thus saving the return wire in electric-telegraphy.

OIL was used for burning in lamps as early as the epoch of Abraham, about 1921 B.C. It was the staple commodity of Attica, and a jar-full was the prize at the Panathenæan games.—It was the custom of the Jews to anoint with oil persons appointed to high offices, as the priests and kings, *Psalms* cxxxiii. 2; *1 Sam.* x. 1; xvi. 13. The anointing with this liquid seems also to have been reckoned a necessary ingredient in a festival-dress, *Ruth* iii. 3.—The fact that oil, if passed through red-hot iron pipes, will be resolved into a combustible gas, was long known to chemists; and after the process of lighting by coal-gas was made apparent, Messrs. Taylor and Martineau contrived apparatus for producing oil-gas on a large scale 1815.—**OIL SPRINGS**, see *Petroleum*.

OLBERS. The asteroid of this name, discovered by M. Olbers, in 1802, is now termed *Pallas*. See *Planets*.

OLD BAILEY SESSIONS-COURT is held for the trial of criminals, and its jurisdiction comprehends the county of Middlesex, as well as the city of London. It is held eight times in the year by the royal commission of *oyer and terminer*. The judges are, the lord mayor, those aldermen who have passed the chair, the recorder, and the common-serjeant, who are attended by both the sheriffs, and one or more of the national judges. The court-house was built in 1773,* and was enlarged in 1808. See *Central Criminal Court*.

OLD MAN OF THE MOUNTAIN. See *Assassins*.

OLD STYLE. See *Style* and *New Style*.

OLDENBURG, a grand duchy in North Germany, was annexed to Denmark in 1448; in 1773 Christian VII. ceded the country to Russia in exchange for Holstein Gottorp, and soon after the present dignity was established. Population, in 1858, 294,359.

GRAND-DUKES OF OLDENBURG.

1773. Frederick Augustus.	1829. May 21. Paul Frederick.
1785. Peter Frederick. The duchy was seized by Napoleon, and annexed to his empire in 1811; but restored in 1814.	1853. Feb. 27. Nicholas Frederick (born July 8, 1827), the present grand-duke. <i>Heir</i> : Prince Frederick Augustus (born Nov. 16, 1852).

OLERON, **LAWS OF**, relating to sea affairs, are said to have been enacted by Richard I. of England, when at the island of Oleron, in France, 1194; which is now doubted. They were received by all Europe, on account of their wisdom, justice, and humanity.

OLIVES are named in the earliest accounts of Egypt and Greece; and at Athens their cultivation was taught by Cecrops, 1556 B.C. He brought the olive from Sais, in Upper Egypt. They were first planted in Italy about 562 B.C. "When thou beatest thine olive-tree, thou shalt not go over the boughs again: it shall be for the stranger, for the fatherless, and for the widow." *Deut.* xxiv. 20.

OLTENITZA, **BATTLE OF**. A large Turkish force having crossed the Danube, under Omar Pasha, established themselves at Olténitza in despite of the vigorous attacks of the Russians, who were repulsed with loss, Nov. 2 and 3, 1853. On the 4th a most desperate attempt was made to dislodge the Turks by general Danneberg with 9000 men. After a spirited engagement the Russians were defeated, with the loss of 1200 killed and wounded. The Turks only lost 106 men.

OLYMPIADS. The celebrated era of the Greeks, which dates from July 1, 776 B.C., being the year in which Coræbus was successful at the Olympic games. This era reckoned by periods of four years instead of single years. Each period was called an Olympiad, and

* During some trials in the old court, the lord mayor, one alderman, two judges, the greater part of the jury, and numbers of spectators, caught the gaol distemper, and died May 1750. Again, this disease was fatal to several in 1772. Twenty-eight persons were killed at the execution of Mr. Steele's murderers, at the Old Bailey, Feb. 22, 1807.

in marking a date, the year and Olympiad were both mentioned. The second Olympiad began in 772 B.C., and so on. The computation by Olympiads ceased with the 305th, A.D. 440.

OLYMPIC GAMES, so famous among the Greeks, are said to have been instituted by the Idae Dactyli, 1453 B.C., or by Pelops, 1307 B.C.; revived by Iphitus, 884 B.C., in honour of Jupiter, and were held at the beginning of every fifth year, on the banks of the Alpheus, near Olympia, in the Peloponnesus, now the Morea, to exercise the youth in five kinds of combats. The conquerors in these games were highly honoured. The prize contended for was a crown made of a kind of wild olive, appropriated to this use. In 1858, M. Zappas, a wealthy Peloponnesian, gave funds to re-establish these games, under the auspices of the queen of Greece, to commence in Oct. 1859.

OLYNTHUS, a city, N. Greece, subdued in war by Sparta in 382—379 B.C. It resisted Philip of Macedon, 350 B.C., by whom it was destroyed, 347.

OMENS. See *Augury*. Amphietyon was the first who is recorded as having drawn prognostications from omens, 1497 B.C. Alexander the Great, and Mithridates the Great, are said to have studied omens. At the birth of this latter, 131 B.C., there were seen for seventy days together, two large comets, whose splendour eclipsed that of the noon-day sun, occupying so vast a space as the fourth part of the heavens; and this omen, we are told, directed all the actions of Mithridates throughout his life. *Justin*.

OMMIADES, a dynasty of Mahometan caliphs, of whom fourteen reigned in Arabia, A.D. 661—750; and eighteen at Cordova, in Spain, 750—1031.

OMNIBUSES (from *omnibus*, for all) began to run in Paris in April, 1828. The idea of such conveyances is ascribed to Pascal about 1672, when similar carriages were started, but soon discontinued. They were introduced by an enterprising coach proprietor named Shilliber, and first licensed at Somerset-house in July, 1829. The first omnibus started from Paddington to the bank of England on Saturday, July 4, in that year. The omnibus is usually licensed to carry from ten to twelve passengers inside, and from ten to fourteen outside; and is attended by a footman, called a conductor. Regulations were made respecting omnibuses by 16 & 17 Vict. c. 33 (1853). See *Cabriolets* and *Hackney Coaches*. The London Omnibus Company was established in Jan. 1856. The saloon omnibuses ran in 1857-60. There are now (1862) above 8000 omnibuses running in London.

ONE POUND NOTES were issued by the bank of England, March 4, 1797: for England only, 1823; re-issued for a short time, Dec. 16, 1852. *Rosse*.

O. P. RIOT AT COVENT GARDEN THEATRE (London). This occurred on the opening of the new theatre, with increased prices of admission, began Sept. 18,* and lasted till Dec. 10, 1809.

OPERAS. Octavio Rinuccini, of Florence, was the inventor of operas, or of the custom of giving musical representations of comedy, tragedy, and other dramatic pieces. Emilio de Cavalero, however, disputed this honour with him, A.D. 1590. *Nouv. Dict. Hist.* Rinuccini's opera was a musical pastoral called *Daphne*, and his success induced him to write the opera of *Eurydice*, which was represented at the theatre of Florence, 1600, on the marriage of Mary de' Medicis with Henry IV. of France. The music of these pieces was composed by Jacobi Peri. An opera entitled *L'Orfeo*, *Favola in Musica*, composed by Monteverde, was performed in 1607, and is supposed to have been the first opera that was ever published. Among the Venetians, the opera was the chief glory of their carnival. About the year 1669, the abbot Perrin obtained a grant from Louis XIV. to set up an opera at Paris, where, in 1672, was acted *Pomona*.

OPERAS IN ENGLAND. Sir William Davenant introduced a species of opera in London in 1684. The first regularly performed opera was at York buildings in 1692. The first at Drury-lane was in 1705. The operas of Handel were performed in 1735, and they became general in several of the theatres a few years after. Among the favourite performances of this kind was Gay's *Beggars' Opera*, first performed in 1727 at the Haymarket. It ran for sixty-three successive nights, but so offended the persons in power, that the lord chamberlain refused a licence for the performance of a second part of it, entitled "Polly." This resentment induced Gay's friends to come forward on its publication with so handsome a subscrip-

* The play was *Macbeth*, and not one word from the stage was heard. The concurrence of all parts of the house in the desire for reduction, gave a furious and determined party in the pit courage to proceed, and great injury was done in pit, boxes, and galleries. For many successive nights the audience, too strong to be controlled, continued their demand, and renewed their depredations, while the managers seemed, on their part, resolved not to give way.

OPTIC NERVES are said to have been discovered by N. Varole, a surgeon and physician of Bologna, about A.D. 1538. *Nouv. Dict.*

ORACLES. The most ancient was that of Dodona; but the most famous the oracle of Delphi, 1263 B.C. See *Delphi*. The heathen oracles were always delivered in such dubious expressions, that let what would happen to the inquirer, they might be explained to mean the event that came to pass.

ORANGE. The sweet, or China orange, was first brought into Europe from China by the Portuguese, in 1547; and it is asserted that the identical tree, whence all the European orange-trees of this sort were produced, is still preserved at Lisbon, in the gardens of one of its nobility. Orange-trees were first brought to England, and planted, with little success, in 1595; they are said to have been planted at Beddington park, near Croydon, Surrey. The duty on imported oranges was repealed in 1860.

ORANGE, a principality in S.E. France, formerly a lordship in the ninth or tenth century. It has been ruled by four houses successively: that of Giraud Adhemar (to 1174); of Baux (1182 to 1393); of Chalons (to 1530); and of Nassau (1530 to 1713). See *Nassau*. Philibert the Great, prince of Orange, the last of the house of Chalons, having been wronged by Francis I. of France, entered the service of the emperor Charles V. to whom he rendered great services by his military talents. He was killed at the siege of Florence, Aug. 3, 1530. He was succeeded by his nephew-in-law Renée of Nassau. See the *princes of Orange* under *Holland*. The eldest son of the king of Holland is styled prince of Orange, although the principality was ceded to France in 1713.

ORANGE RIVER, a free state in South Africa. The British government transferred (by sir George Clerk) their powers over this territory to a provisional government, March 29, 1854. A Volksraad, or legislative council, and governor (elected every four years) have since been appointed.

ORANGEMEN. A battle, called the battle of the Diamond, was fought in the county of Armagh, in Sept. 1795; and the treachery experienced by the Protestants on that occasion convinced them they would become an easy prey to the Roman Catholics, from their small numbers, unless they associated for their defence. In commemoration of that victory the first Orange lodge was formed in the county of Armagh, Sept. 21, 1795; but the name of Orangemen existed some time before. They associated to maintain the constitution in church and state, as established at the Revolution by the prince of Orange. An Orange lodge was formed in Dublin, the members publishing a declaration of their principles in Jan. 1798. It is stated, that in 1836, there were 145,000 Orangemen in England, and 125,000 in Ireland, the duke of Cumberland being grand-master. After a parliamentary inquiry, Orange clubs were broken up at the request of the house of commons: but revived in 1845. In Oct. 1857, the lord chancellor of Ireland ordered that justices of the peace should not belong to Orange clubs. The Orangemen in Canada were greatly excited during the visit of the prince of Wales in Sept. 1860. An Orange demonstration in Belfast on Sept. 17, 1862, led to desperate riots.

ORATOR HENLEY. An English clergyman of some talents, and great eccentricity, obtained this name by opening what he called his "Oratory" in London, in 1726. He had a kind of chapel in Newport-market, where he gave lectures on theological topics on Sundays, and on other subjects on Wednesdays, every week. Novelty procured him a multitude of hearers; but he was too imprudent to gain any permanent advantage from his project. After having served as a butt for the satirical wits, poets, and painters of his time, he removed his oratory to Clare-market, and sank into comparative obscurity and contempt previously to his death, in 1756.

ORATORIANs (from the Latin *orare*, to pray), a regular order of priests established by St. Philip Neri, about 1564, and so called from the oratory of St. Jerome, at Rome, where they offered up prayers. They had a foundation in France, commenced by father de Berulle, afterwards cardinal, 1612.—The rev. Frederic Faber and others, as "Fathers of the Oratory," established themselves first in King William-street, Strand, in 1848, and afterwards at Brompton.

ORATORIO, a kind of sacred drama, the subject of it being generally taken from the Scriptures, set to music. *Mason*. The origin of oratorios, so named from having been first performed in an oratory, is ascribed to St. Philip Neri, about 1550. The first oratorio in London was performed in Lincoln's-inn theatre, in Portugal-street, in 1732. Handel's oratorio of "Israel in Egypt" was produced in 1738; and the "Messiah" in 1741; Haydn's "Creation" in 1798; Mendelssohn's "St. Paul" in 1837; and "Elijah" in 1846.

ORCHOMENUS, a small Greek state in Boeotia, was destroyed by the Thebans, 368; restored by Philip II. of Macedon, 354; and given up by him to Thebes, 346 B.C.

ORDEAL. The ordeal was known among the Greeks.* With us it is a term signifying the judiciary determination of accusations for criminal offences by fire and water. It was introduced into England with other superstitions taken from the codes of the Germans. That by fire was confined to the upper classes of the people; that of water, to bondsmen and rustics. Women accused of incontinency formerly underwent the ordeal, to prove their innocence. A prisoner who pleaded not guilty, might choose whether he would put himself for trial upon God and his country, by twelve men, as at this day, or upon God only: and then it was called *the judgment of God*, presuming He would deliver the innocent. The accused were to pass barefooted and blindfolded over nine red-hot ploughshares, or were to carry burning irons in their hands; and accordingly as they escaped, they were judged innocent or guilty, acquitted or condemned. The ordeal was used from Edward the Confessor's time to that of Henry III. It was abolished 45 Hen. III. 1261.

ORDERS. See *Knighthood*.

ORDERS IN COUNCIL were issued by the British government, Jan. 7, and Nov. 11, 1807, prohibiting trade with the ports occupied by the French. They were reprisals for Napoleon's *Berlin decree* (*which see*). These restrictions greatly checked the progress of manufactures in this country, and caused much distress till their removal in 1814.

ORDINATION of ministers in the Christian church began with Christ and his apostles. See *Mark* iii. 14; and *Acts* vi. and xiv. 23. In England in 1549 a new form of ordination of ministers was ordered to be prepared by a committee of six prelates and six divines.

ORDINANCE. See *Self-Denying Ordinance*.

ORDNANCE-OFFICE. Before the invention of guns, this office was supplied by officers under the following names: the bowyer; the cross-bowyer; the galeater, or purveyor of helmets; the armourer; and the keeper of the tents. Henry VIII. placed it under the management of a master-general, a lieutenant, surveyor, &c. The master-general was chosen from among the first generals in the service of the sovereign. The appointment was formerly for life, but since the Restoration was held *durante bene placito*, and not unfrequently by a cabinet minister. *Bealson*. The letters patent for this office were revoked May 25, 1855, and its duties vested in the minister of war, lord Panmure. The last master-general was lord Fitzroy Somerset, afterwards lord Raglan.

ORDNANCE SURVEY. The trigonometrical survey of England was commenced by gen. Roy, in 1784, continued by col. Colby, and completed by col. James in 1856. The publication of the maps commenced in 1810, under the direction of col. Mudge, and is still going on; the southern part on the scale of one inch to the mile, the northern six inches to the mile: a large part of these maps have been coloured geologically. The survey of Ireland has been completed and published; that of Scotland is to be proceeded with.

OREGON TERRITORY. A dispute respecting boundaries arose in 1845 between the British government and that of the United States, which was settled by treaty June 12, 1846. Oregon was admitted as a state by the Union in Feb. 1859.

ORGANS. Their invention is attributed to Archimedes, about 220 B.C.; and to one Ctesibius, a barber of Alexandria, about 100 B.C. The organ was brought to Europe from the Greek empire, and was first applied to religious devotions, in churches, in A.D. 657. *Bellarmino*. Organs were used in the western churches by pope Vitalianus, in 658. *Ammonius*. It is affirmed that the organ was known in France in the time of Louis I. 815, when one was constructed by an Italian priest. St. Jerome mentions an organ with twelve pairs of bellows which might have been heard a mile off; and another at Jerusalem which might have been heard on the Mount of Olives. The organ at Haarlem is one of the largest in Europe; it has 60 stops and 8000 pipes. At Seville is one with 1000 stops and 5300 pipes. The organ at Amsterdam has a set of pipes that imitate a chorus of human voices. Of the organs in ENGLAND, that at St. George's hall, Liverpool, by Mr. Willis, is the largest; next in order, that at York minster, and that in the Music-hall, Birmingham. In London, the largest is, perhaps, that of Spitalfields church; and that in Christ church is nearly as extensive. The best is the famous Temple organ, erected by competition of Schmidt and Harris, two eminent builders; after long-protracted disputes about their merits, the question was referred to vote, and Mr. Jefferies, afterwards chief justice, gave the casting vote in favour of Schmidt (called Father Smith), about 1682. A monster organ was erected in the Crystal Palace, Sydenham, in June, 1857, which at times overpowered the 2400 vocal and instrumental performers.

* In *Numbers* v. 2, directions are given to try women accused of incontinence with the *water of jealousy*.

ORIEL COLLEGE (Oxford), founded in 1337, by Adam de Brome, archdeacon of Stow, and almoner to king Edward II. This college derives its name from a tenement, called *l'Oriole*, on the site of which the building stands.

ORIFLAMME. See *Auriflamma*.

ORIGENISTS pretended to draw their opinions from the writings of Origen (about A.D. 206). They maintained that Christ was the son of God no other way than by adoption and grace; that souls were created before the bodies; that the sun, moon, stars, and the waters that are under the firmament, had all souls; that the torments of the damned shall have an end, and that the fallen angels shall after a time be restored to their first condition. They were condemned by councils, and the reading of Origen's works was forbidden. *Burke*. These doctrines were condemned by the council of Constantinople in 553.

ORION STEAM-SHIP. On June 18, 1850, this splendid vessel, bound from Liverpool to Glasgow, struck on a sunken rock, northward of Portpatrick, and within a stone's throw of land, and instantly filled in seven fathoms of water. Of two hundred passengers supposed to be on board at the time, more than fifty were drowned.

ORKNEY AND SHETLAND ISLES (North of Scotland). These islands were conquered from the Picts by Harold king of Norway, A.D. 870, and were ceded to James III. as his bride's dowry in 1468. The Orkneys were the ancient Orcades: united with Shetland, they now form one of the Scotch counties. The bishopric of Orkney was founded by St. Servanus early in the fifth century, some affirm by St. Colm. It ended with the abolition of episcopacy in Scotland, about 1689. See *Bishops of Scotland*.

ORLEANS (a city in central France), formerly *Aurelianum*; gave title to a kingdom, A.D. 491, and afterwards to a duchy, usually held by one of the royal family. It was besieged by the English, under John Talbot, afterwards earl of Shrewsbury, Oct. 12, 1428, and was bravely defended by Gaucour, the more so as its fall would have ruined the cause of Charles VI. king of France. It was relieved by the heroism of Joan of Arc, afterwards surnamed the Maid of Orleans, April 29, 1429, and the siege was raised. See *Joan of Arc*. Siege of Orleans, when the duke of Guise was killed, 1563.

DUKES OF ORLEANS.

Louis contended for the regency with John the Fearless, duke of Burgundy, by whose instigation he was assassinated in 1407.
Charles taken prisoner at Agincourt, 1415; released, 1440; died, 1465.
Louis, became Louis XII. of France in 1498, when the duchy merged in the crown.

BOURBON BRANCH.

Philip, youngest son of Louis XIII., born 1640; died, 1701.

Philip II., born 1673; becomes REGENT, 1715; dies, 1723.
Louis, born, 1703; died, 1752.
Louis Philippe, born, 1725; died, 1785.
Louis Philippe Joseph, born, 1747; opposed the court in the French revolution; takes the name *Egalité*, Sept. 11, 1792; voted for the death of Louis XVI.; was guillotined, Nov. 6, 1793.
Louis Philippe, born, 1773; chosen king of the French, Aug. 9, 1830; deposed, Feb. 24, 1848; died, Aug. 26, 1850. See *France*.

ORLEANS, NEW. See *New Orleans*.

ORMULUM, a metrical version of the Gospels and Acts, in early English, made by an ecclesiastic named Orm, in the 12th century, was printed at Oxford in 1852 from a MS. in the Bodleian.

ORNITHOLOGY. See *Birds*.

ORPHAN-HOUSES. The emperor Trajan first formed establishments for this purpose. Pliny relates in his Panegyric that Trajan had caused five thousand free-born children to be sought out and educated, about A.D. 105. Orphan-houses, properly so called, are mentioned for the first time in the laws of the emperor Justinian. At the court of Byzantium, the office of inspector of orphans, *orphantrophos*, was so honourable, that it was held by the brother of the emperor Michael IV. in the eleventh century. See *Foundling Hospitals*.

ORPHEONISTES. See *Crystal Palace*, 1860.

ORRERY. The employment of planetary machines to illustrate and explain the motions of the heavenly bodies, appears to have been coeval with the construction of the clepsydrae and other horological automata. Ptolemy devised the circles and epicycles that distinguish his system about A.D. 130. The planetary clock of Finée was begun A.D. 1553. The planetarium of De Rheita was formed about 1650. The planetarium, now termed the

* The asylum for Female Orphans, Lambeth, was instituted in 1758. Similar institutions are now numerous. The London Orphan Asylum (in 1823; removed to Clapton in 1823); the Infant Orphan Asylum at Wanstead (1827); and the Asylum for Fatherless Children (in 1844; settled at Needham, Surrey,) were established mainly through the exertions of a Baptist minister, the rev. Andrew Reed.

Orrery, it is said, was constructed by Rowley, after a pattern devised by the clock-maker George Graham, at the expense of Charles Boyle, earl of Orrery, about 1715.

ORSINI'S PLOT against the emperor Napoleon III. See *France*, Jan. 1858.

ORTHEZ or ORTHEZ (S. France), BATTLE OF, between the British and Spanish armies on one side, and the French on the other, the former commanded by Wellington, and the latter by marshal Soult. In this engagement the British gained a great and decisive victory, Feb. 27, 1814. The victory was soon followed by the battle of Toulouse (*which see*).

OSBORNE HOUSE, Isle of Wight, was purchased by the queen in 1845, and rebuilt by Mr. Cubitt.

OSMIUM, discovered in platinum ore by Tennant in 1804, was stated in 1861 to be the heaviest known metal.

OSSORY (S.E. Ireland), BISHOPRIC OF, was first planted at Saiger, about A.D. 402 (thirty years before the arrival of St. Patrick), from whence the bishops of it were called *Episcopi Saigerenses*. From Saiger it was translated to Aghavoe, in Upper Ossory, in 1052. Felix O'Duillany, bishop of Ossory, translated the see to Kilkenny, about the end of the reign of Henry II. The cathedral church was allowed to be the finest in Ireland. This bishopric was united to Ferns and Leighlin in 1842, under the provisions of the Church Temporalities' act, passed in 1833.

OSTEND (Belgium), is famous for the long siege it sustained against the Spaniards, from July 1601 to Sept. 1604, when it surrendered by an honourable capitulation. On the death of Charles II. of Spain, the French seized Ostend; but in 1706, after the battle of Ramilies, it was retaken by the allies. It was again taken by the French in 1745, but restored in 1748. In 1756, the French garrisoned this town for the empress-queen Maria Theresa. In 1792, the French once more took Ostend, which they evacuated in 1793, and repossessed in 1794. The English landed troops here, who destroyed the works of the Bruges canal; but the wind shifting before they could re-embark, they were obliged to surrender to the French, May 19, 1798. Here in 1843 the king of Belgium met the queen and prince Albert. See *Cuba*, note.

OSTRACISM (from the Greek *ostrakon*, a potsherd or shell), a mode of proscription at Athens, by which those who were either too rich, or had too much authority, were condemned to ten years' banishment (but without any confiscation of their goods or estates), for fear they might set up for tyrants over their native country. This custom is said to have been first introduced by the tyrant Hippias; by others, it is ascribed to Cleisthenes, about 510 B.C. The people wrote the names of those whom they most suspected upon small shells; these they put in an urn or box, and presented it to the senate. Upon a scrutiny, he whose name was oftenest written was sentenced by the council to be banished *ab aris et focis* (from his altar and hearth). 6000 votes were required. This law was abused, and they who deserved best of the commonwealth fell under the popular resentment, as Aristides, noted for his justice, Miltiades, for his victories, &c. It was abolished by ironically proscribing Hyperbolus, a mean person.

OSTROGOTHS or EASTERN GOTHS, were distinguished from the Visigoths (Western Goths) about A.D. 330. After ravaging eastern Europe, Thrace, &c., their great leader, Theodoric, established a kingdom in Italy, which lasted from 493 to 553. See *Italy*.

OSTROLENKA, BATTLE OF, between the Poles and Russians, one of the most sanguinary and desperate battles fought by the Poles for the recovery of their independence, May 26, 1831. On both sides the slaughter was immense, but the Poles remained masters of the field: they, however, shortly afterwards retreated to Praga. The Russians, in their accounts of this battle, claimed the victory.

OSTRICH, the *struthio* of the ancients, a native of Africa (see *Job* xxxix. 14). Ostriches were hatched and reared at San Donato, near Florence, 1859-60.

OTAHEITE or TAHITI, an island in the S. Pacific Ocean, seen by Byron in 1765, and visited in 1767 by captain Wallis, who called it George the Third Island. Captain Cook came hither in 1768, to observe the transit of Venus; sailed round the whole island in a boat, and stayed three months: it was visited twice afterwards by that celebrated navigator. See *Cook*. Omai, a native of this island, was brought over to England by captain Cook, and carried back by him, in his last voyage. In 1799, king Pomare ceded the district of Matavai to some English missionaries. Queen Pomare was compelled to place herself under the protection of France, Sept. 9, 1843. She retracted, and Otaheite and the neighbouring islands were taken possession of by admiral Dupetit-Thouars in the name of the French

king, Nov. 1843. The French imprisoned Mr. Prichard, the English consul, March 5, 1844, but the act was censured in France.

OTTERBURN (Northumberland), **BATTLE OF**, fought Aug. 10 (or 15), 1388, between the English under the earl of Northumberland and his two sons, and the Scots under the heroic sir William Douglas, who was slain by Henry Percy, surnamed Hotspur. The Scots obtained the victory, and the two Percies were made prisoners. On this battle the well-known ballad of *Chevy Chase* is founded. *Walsingham*.

OTTOMAN EMPIRE. See *Turkey*.

OUDE, a large and rich province in North India, formerly a vice-royalty held by the vizer of the great mogul. On the dismemberment of his empire about 1760, it was seized by the vizer Sujah-ud-Dowlah, ancestor of the late royal family.

Battle of Buxar, where Sujah and his ally, Meer Cossim, are totally defeated, and the British became virtually masters of Oude. May 23, 1764
Reign of Asoph-ud-Dowlah, who cedes Benares, &c., to the East India Company, who place troops in Oude (see *Chunar*) . . . 1775-81
[The annual subsidy to the company in 1787 was 500,000l.; in 1794, 760,000l.; in 1801, 1,352,347l.] More territories ceded to the company . . . 1801
Ghazee-ud-deen becomes *king*, with the consent of the British . . . 1819
Dreadful misgovernment of Nusser-ud-deen, 1827-37
[At his death the British resident, colonel Lowe, suppresses promptly an insurrection.]
Mahomed Ali governs well . . . 1837-42
But his son Umjeed Ali Shah . . . 1842-7

And grandson, Wajid Ali Shah, exceed all their predecessors in profligacy . . . 1847-56
In consequence (by virtue of the treaty of 1801) Oude is annexed to the British territories, by decree, proclaimed . . . Feb. 7, 1856
The queen and prince of Oude, &c., arrive in London to appeal . . . Aug. 20, —
Oude joins the Indian mutiny: ex-king of Oude imprisoned (on suspicion) . . . June 14, 1857
The queen dies at Paris, Jan. 24: and the prince at London . . . Feb. 26, 1858
[For the war, see *India*, 1857-8.]
Triumphal entry of the governor-general into Lucknow. The Talookdars (landholders) receive a free grant of their estates . . . Oct. 22, 1859
Oude is said to be prospering under British rule 1862

UDENARDE (Belgium), where on July 11, 1708, the English and allies, under the duke of Marlborough and prince Eugene, thoroughly defeated the French, who were besieging Oudenarde. The French king proposed peace without effect.

OULART (S.E. Ireland), where a body of 5000 Irish insurgents attacked the king's troops, in small number, May 27, 1798. The North Cork militia, after great feats of bravery, were cut to pieces, five men only escaping. *Musgrave*.

OUNCE, the sixteenth part of the pound avoirdupois, and twelfth of the pound troy. The word is from *uncia*; and its precise weight was fixed by Henry III. who decreed that an English ounce should be 640 dry grains of wheat; that twelve of these ounces should be a pound; and that eight pounds should be a gallon of wine, 1233.

OURIQUE (Portugal), where Alfonso, count or duke of Portugal, encountered five Saracen kings and a prodigious army of Moors, July 25, 1139, and signally defeated them. He was hailed king upon the spot. Lisbon, the capital, was taken, and he soon after was here crowned as the first king; the Moorish dominion being overthrown.

OUTLAW, one deprived of the benefit of the law, and out of the king's protection: a punishment for such as being called in law do contemptuously refuse to appear. In the reign of Edward III. all the judges agreed, that none but the sheriff only, having lawful warrant therefor, should put to death any man outlawed. *Cowel*.

OUZEL GALLEY SOCIETY. In 1700 the case of a ship in the port of Dublin excited great legal perplexity. To lessen the delay and expense, it was referred to an arbitration of merchants, whose decision was prompt and highly approved. This led to the foundation of the present society for terminating commercial disputes by arbitration. The vessel was named the *Ouzel Galley*, and the society adopted the name in 1705.

OVATION. An inferior triumph which the Romans allowed those generals of their army whose victories were not considerable.* Publius Posthumius Tubertus was the first who was decreed an ovation, 503 B.C.

OVERLAND MAIL. See *Waghorn*.

OWHYHEE or **HAWAII**, an island in the N. Pacific Ocean, discovered in 1778, by captain Cook. On Feb. 14, 1779, he here fell a victim to a sudden resentment of the

* He who was thus rewarded, entered the city with a myrtle crown upon his head, that tree being consecrated to Venus; wherefore, when Marcus Crassus was decreed the honour of an ovation, he particularly desired it as a favour of the senate to be allowed a laurel crown instead of a myrtle one. This triumph was called ovation, because the general offered a sheep (*ovis*) when he came to the capitol, whereas in the great triumph he offered a bull.

natives. A boat having been stolen by one of the islanders, the captain went on shore to seize the king, and keep him as a hostage till the boat was restored. The people would not submit to this insult, and their resistance brought on hostilities, and captain Cook and some of his companions were killed. Great progress has been recently made in civilization here; and an order of nobility and representative assembly were instituted in 1860. The population then was about 120,000.

OXFORD. Here Canute held a wittenagemot in 1018, and here Henry III., compelled by his barons, summoned a parliament (called the "Mad") in 1258. *Dugdale.* See *Parliament.* Parliaments assembled here in 1625 and 1665, in consequence of the plague then raging in London; * and in 1644, Charles I. summoned such members of both houses as were devoted to his interest to meet him at Oxford; these were seceders from the parliament at Westminster. Charles II. held a parliament here in 1681. The BISHOPRIC was formed out of the diocese of Lincoln in 1542, when king Henry VIII. endowed it out of the lands of the dissolved monasteries of Abingdon and Osney, and assigned the church of the abbey of Osney for a cathedral, but afterwards he removed the seat of the see to Oxford in 1545. The present cathedral, anciently dedicated to St. Frideswide, was afterwards entitled Christ church. Present income of the see, 5000*l.*

RECENT BISHOPS OF OXFORD.

1807. Charles Moas; died, Dec. 16, 1811.	1827. Charles Lloyd; died, May 31, 1829.
1812. William Jackson; died, Dec. 2, 1815.	1829. Richard Bagot; translated to Bath, Nov. 1846.
1815. Edward Legge; died, Jan. 27, 1827.	1845. Samuel Wilberforce, present bishop.

OXFORD UNIVERSITY. This university is by some supposed to have been a seminary for learning before the time of Alfred, and to have owed its revival and consequence to his liberal patronage. Others state, that though the university is ascribed to Alfred, yet that no regular institution deserving the name existed even at the period of the Norman conquest. It was incorporated by queen Elizabeth in 1571. On Aug. 31, 1850, a commission was appointed to inquire into its "state, studies, discipline, and revenues," which reported April 27, 1852; and acts were passed in 1855 and 1856 making many alterations in the constitution and government of the university. A University Museum was opened in July, 1860.

COLLEGES.

University. Said to have been founded by king Alfred, 872; founded by William, archdeacon of Durham, about A.D. 1232	Corpus Christi. Richard Fox, bishop of Winchester 1526
Baliol. John Baliol, knt. (father to Baliol, king of the Scots), and Deborah, his wife 1263	Christ Church. Cardinal Wolsey, 1525; and afterwards by Henry VIII. 1532
Merton College. Walter de Merton, bishop of Rochester 1264	Trinity. Sir Thomas Pope, on the basis of a previous institution, called Durham College, 1554
Hertford College (dissolved in 1818, and a Hertford scholarship appointed) 1312	St. John's. Sir Thomas Whyte, lord mayor of London 1555
Exeter. Walter Stapleton, bishop of Exeter 1314	Jesus College. Dr. Hugh Price; queen Elizabeth 1571
Oriel College. King Edward II.; Adam de Brome, archdeacon of Stowe 1326	Wadham. Nicholas Wadham, and Dorothy, his wife 1613
Queen's College. Robert de Egdesfield, clerk, confessor to queen Philippa, consort of Edward III. 1340	Pembroke. Thomas Teesdale and Richard Wightwick, clerk 1624
New College. William of Wykeham, bishop of Winchester: first called St. Mary of Winchester 1386	Worcester. Sir Thomas Coke of Bentley, in Worcestershire; it was originally called Gloucester College 1714
Lincoln College. Richard Fleming, 1427; finished by Rotherham, bishop of Lincoln 1479	
All Souls' College, founded by Henry Chicheley, archbishop of Canterbury 1437	HALLS (not incorporated).
Magdalen. William of Waynflete, bishop of Winchester 1456	St. Edmund's 1269
Brasenose. William Smyth, bishop of Lincoln, and sir Richard Sutton 1509	St. Mary's 1473
	New Inn Hall 1472
	St. Mary Magdalen 1482
	St. Alban's 1547

[Oxford University Calendar.]

RECENT CHANCELLORS.

1809. Lord Grenville.	1852. The earl of Derby.
1834. The duke of Wellington.	

OXFORD ADMINISTRATION: formed May 29, 1711.

Robert, earl of Oxford (previously right hon. Robert Harley), <i>lord treasurer.</i>	John, duke of Normanby and Buckingham, <i>lord president.</i>
Sir Simon (afterwards lord) Harcourt, <i>lord keeper.</i>	John, bishop of Bristol (aft. London), <i>privy seal.</i>

* THE FATAL OXFORD ASSIZES,—when the high sheriff and 300 other persons died suddenly, of an infection caught from the prisoners, 20 Eliz. 1577. *Now.* This distemper was supposed to arise from the stench that came from the prisoners, who were so much crowded within close and narrow walls.

OXFORD ADMINISTRATION, *continued.*

Henry St. John (afterwards viscount Bolingbroke), and William, lord Dartmouth, *secretaries of state*. Robert Benson (afterwards lord Bingley), *chancellor of the exchequer*. The duke of Shrewsbury succeeded lord Oxford, re-

ceiving the lord treasurer's staff on July 30, 1714, three days before the death of queen Anne. From the reign of George I. the office of lord treasurer has been executed by commissioners.

OXFORD'S ASSAULT ON THE QUEEN. A youth named Edward Oxford, who had been a servant in a public-house, discharged two pistols at her majesty queen Victoria and prince Albert, as they were proceeding up Constitution-hill in an open phaeton from Buckingham palace, June 10, 1840. He stood within a few yards of the carriage; but fortunately neither her majesty nor the prince was injured. Oxford was subsequently tried at the Old Bailey (July 10), and being adjudged to be insane, was sent to Bethlehem hospital.

OXYGEN (a gas so called from the Greek *oxus*, sharp, as being generally found in acids), is the most abundant of all substances, constituting about one-third of the solid earth, and forming by weight nine-tenths of water and one-fourth of the atmosphere. It was first separated from red oxide of mercury by Priestley in Aug. 1774, and by Scheele, who was ignorant of Priestley's discovery, in 1775. It is the chief supporter of animal life by respiration, and of combustion. See *Ozone*.

OYER and TERMINER. A commission directed to the judges of the courts, by virtue whereof they have power to *hear and determine* treasons, felonies, &c.

O YES! A corruption of the French *oyez*, hear ye! The term used by a public crier to enjoin silence and attention; very ancient, and the date not known.

OYSTER (the Latin *Ostrea edulis*), is said to have its capital in Britain, for though found elsewhere on the coasts of Europe, in no part of them does it attain such perfection as in our seas. British oysters are celebrated by the Roman satirist Juvenal (Sat. IV. 140) about A.D. 100. The robbery of oyster-beds is prohibited by 7 & 8 Geo. IV. c. 29 (1826). About 15,000 bushels of oysters are said to be produced from the Essex beds alone. In 1858 M. Coste commenced rearing oysters in great numbers on the coast of Brittany. His plan was found to be successful in 1860.

OZONE (from *ozein*, to yield an odour), a name given in 1840 by M. Schönbein of Basle to the odour in the atmosphere developed during the electric discharge. It is considered to be a modification of the oxygen (*which see*), and when occurring naturally, to have an effect on health. It is also produced by the action of moist air on phosphorus. In 1858 ozonometers had been constructed by Dr. Lankester and others. M. Schönbein has since discovered another modification of oxygen, which he terms *antiozone* (1859), which hitherto has been found only in the compound state (in peroxides of sodium, potassium, &c.).

P.

PACIFICATION, EDICTS OF. The name usually given to the edicts of toleration granted by the French kings to the Protestants. See *Ghent*.

First edict, by Charles IX., permitting the exercise of the reformed religion near all the cities and towns in the realm . . . Jan. 1562
The reformed religion permitted in the houses of lords justiciaries, and certain other persons, . . . March, 1563
These edicts revoked, and all Protestant ministers ordered to quit France in fifteen days . . . 1568
Edict, allowing lords and others to have service in their houses, and granting public service in certain towns . . . 1570

[In August, 1572, the same monarch authorised the massacre of St. Bartholomew. See *Bartholomew*.]
Edict of Pacification by Henry III., April; revoked, Dec. 1575; renewed for six years, Oct. 1577 [Several edicts were published against the Protestants after the six years expired.]
Edict of Henry IV., renewing that of Oct. 1577, 1591
Edict of Nantes (*which see*), by Henry IV., April 13, 1598
Pacification (*which see*) of Nismes . . . July 14, 1629

PACIFIC STEAM-VESSEL. See *Steam Navigation*.

PADLOCKS. This species of lock was invented by Bechar at Nuremberg in A.D. 1540.

PADUA, the Roman Patavium, in Venetia, N. Italy, said to have been founded by Antenor, soon after the fall of Troy, 1183 B.C. It flourished under the Romans. Patavian Latin was considered very corrupt, and is traced in Livy, a native of Padua. After being an independent republic, Padua was ruled by the Carrara family from 1318 till 1405, when it was seized by the Venetians. The university was founded about 1228.

PAGANS, the heathen, idolators, gentiles, worshippers of idols, not agreeing in any set form or points of belief, except in that of one God supreme, in which point all travellers assure us they concur; Constantine ordered the Pagan temples to be destroyed throughout the Roman empire, A.D. 331; and Paganism was finally overthrown in the reign of Theodosius the younger, about 391. It was renounced by the Roman Senate, in 388.

PAINS AND PENALTIES. See *Queen Caroline*.

PAINTING. An art, according to Plato, of the highest antiquity in Egypt. Osymandyas (see *Egypt*) causes his exploits to be represented in painting, 2100 B.C. *Usher*. Pausias of Sicyon was the inventor of the encaustic, a method of burning the colours into wood or ivory, about 360-330 B.C. The ancients considered Sicyon the nursery of painters. Antiphiles, an Egyptian, is said to have been the inventor of the grotesque, 332 B.C. *Pliny*. The art was introduced at Rome from Etruria, by Quintus Fabius, who on that account was styled *Pictor*, 291 B.C. *Livy*.* The first excellent pictures were brought from Corinth by Mummius, 146 B.C. After the death of Augustus, not a single painter of eminence appeared for several ages; Ludius, who was very celebrated, is supposed to have been the last, about A.D. 14. Painting on canvas seems to have been known at Rome in A.D. 66. Bede, the Saxon historian, who died in 735, knew something of the art. It revived about the end of the thirteenth century, and to Giovanni Cimabue, of Florence, is awarded the honour of its restoration. It was at once encouraged and generously patronised in Italy. John Van Eyck, of Bruges, and his brother Hubert, are regarded as the founders of the Flemish school of painting in oil, 1415. *Dufresnoy*. Paulo Uccello was the first who studied perspective. The earliest mention of the art in England is A.D. 1523, about which time Henry VIII. patronised Holbein, and invited Titian to his court.†

EMINENT PAINTERS.

	School.	Born.	Died.		School.	Born.	Died.
Cimabue	Florentine,	1240	1300	Mieris	Dutch .	1635	1681

Gerard Douw	Ditto .	1613	1680	Martin	Ditto .	1790	1854
Sir Peter Lely	German .	1617	1680				

* Parrhasius of Ephesus and Zeuxis were contemporary painters. These artists once contended for pre-eminence in their profession, and when they exhibited their respective pieces the birds came to peck the grapes which Zeuxis had painted. Parrhasius then produced his piece, and Zeuxis said, "Remove the curtain, that we may see the painting." The curtain itself was the painting, and Zeuxis acknowledged himself to be conquered, exclaiming, "Zeuxis has deceived the birds; but Parrhasius has deceived Zeuxis!" Parrhasius dressed in a purple robe, and wore a crown of gold, calling himself king of painters, 415 B.C. *Plutarch*.

† In Aug. 1866, the sale of lord Northwick's pictures occupied 18 days. It produced 95,725*l*. A Carlo Dolci fetched 2020*l*, and a Murillo 2400*l*.

PALACE COURT. The court of the queen's palace of Westminster, created by letters patent, 1664, was held in Great Scotland yard, and was a court of record for the trial of all personal actions, arising within the limits of twelve miles round the sovereign's palace, with the exception of the city of London. It was abolished in 1849.

PALACE OF WESTMINSTER. The new houses of parliament now in course of completion are so called. The first contract for the embankment of the river was taken in 1837, by Messrs. Lee; this embankment, faced with granite, is 886 feet in length, and projected into the river in a line with the inner side of the third pier of old Westminster-bridge. Sir Charles Barry (born, 1795, died, 1860) is the architect of the sumptuous pile of buildings raising since 1840. The whole stands on a bed of concrete twelve feet thick: to the east it has a front of about 1000 feet, and covers an area of nine statute acres. It contains 1100 apartments, 100 staircases, and two miles of passages or corridors. The great Victoria tower at the south-west extremity is 346 feet in height, and towers of less magnitude crown other portions of the building. The peers took possession of their house, April 15, 1847; and the commons, of their house, Nov. 4, 1852. See *Parliament and Bells*.

PALÆOLOGI, a family which reigned as emperors of the East from 1260 to 1453. George Palæologus raised Alexius Comnenus to the throne in 1081, and thereby founded his own family. Andrew, the last Palæologus, son of Thomas, ruler of the Morea, after the overthrow of his father, became a Mahometan at Constantinople about 1533.

PALÆONTOLOGY (from the Greek *palaïos*, ancient, and *onta*, beings), treats of the evidences of organic beings in the earth's strata. It is a branch of Geology (*which see*). Cuvier, Mantell, Agassiz, Owen, Edward Forbes, and Blainville, all of the present century, may be reckoned as fathers of this science. The Palæontographical society, which publishes elaborate monographs of British organic remains, was founded in 1847. Professor Owen's "Palæontology" was published in 1860. "Nearly 40,000 species of animals and plants have been added to the *Systema Naturæ* by palæontological research." *Huxley*. See *Man, antiquity of*.

PALATINATE OF THE RHINE, one of the seven ancient electorates of Germany. It was long united to Bavaria; but was separated in 1294.—Frederic V. the elector palatine in 1610, married in 1613 Elizabeth, the daughter of James I. of England, and thus became the ancestor of queen Victoria. See *Hanover*. In 1619 he was elected king of Bohemia; but lost all by his defeat by the Austrians at Prague in 1620. The Palatinate was horribly ravaged by Tilly in 1622, and by the French in 1688.* The elector palatine Charles Theodore inherited Bavaria in 1778: since when the two electorates have been united. See *Bavaria*.

PALATINE. William the Conqueror made his nephew, Hugh D'Abrincis, count palatine of Chester, with the title of earl, about 1070. Edward III. created the palatine of Lancaster, 1359. See *Lancaster*, *duchy of*. The bishoprics of Ely (963) and Durham were also made county palatines. The latter was vested in the crown in 1836. There is also mention made of the county palatine of Hexham, in 33 Henry VIII. c. 10, which then belonged to the archbishop of York, but by the 14th of Elizabeth it was dissolved, and made part of the county of Northumberland. The palatinate jurisdiction of Durham was separated from the diocese, and vested in the crown, 6 Will. IV. c. 19, June 21, 1836.

PALERMO, N. W. Sicily, the ancient Panormus. It has been held by the Carthaginians, B.C. 415; taken by the Romans, B.C. 254; by the Saracens, A.D. 832; and by the Normans, 1072. Here Roger II. was crowned king of Sicily 1130. Palermo was the scene of the Sicilian Vespers (*which see*), March 30, 1282. It suffered from earthquake in 1726 and 1740. The king Ferdinand resided at Palermo from 1806 to 1815, while Naples was ruled by Joseph Bonaparte and Joachim Murat. It revolted against the tyranny of Ferdinand II. Jan. 12, 1848. It was attacked by general Filangieri, March 29, 1849, and surrendered on May 14. It was taken by Garibaldi, June 6, 1860.

PALESTINE. See *Jews*. After being several times conquered by the Saracens, and retaken from the seventh to the tenth century, and after being the scene of the wars of the Crusades (*which see*), and other conflicts, Palestine was united to the Ottoman empire by Selim I. in 1516. See *Holy Places* and *Syria*.

PALESTRO, N. Italy, where the Sardinians defeated the Austrians, May 30, 31, 1859.

* About 7000 of poor Protestants, from the banks of the Rhine, driven from their habitations by the French, arrived in England, and were encamped at Blackheath and Camberwell: a brief was granted to collect alms for them. Five hundred families went under the protection of the government to Ireland, and settled chiefly about Limerick, where parliament granted them 24,000*l.* for their support. Three thousand were sent to New York and Hudson's Bay; but not having been received kindly, they went to Pennsylvania, and being there greatly encouraged by the Quakers, they invited over some thousands of German and Swiss Protestants, who soon made this colony flourishing, 7 Anne, 1709. *Anderson*.

PALL, PALLIUM, in the Roman Church an ensign of dignity conferred by the pope upon archbishops. An archbishop of Canterbury has paid 5000 florins for a pall. By a decretal of pope Gregory XI. (about 1370), no archbishop could call a council, bless the chrism, consecrate churches, ordain a clerk, or consecrate a bishop, till he had received his pall from the see of Rome. The pall was first worn by an Irish archbishop in 1152, when Gelasius was recognised as primate of all Ireland.

PALLADIUM, the statue of Pallas, concerning which ancient authors disagree. Some say it fell from heaven near the tent of Ilus, as he was building Ilium; and that on its preservation depended the safety of Troy; which the oracle of Apollo declared should never be taken so long as the Palladium was found within its walls. This fatality being made known to the Greeks, they contrived to steal it away during the Trojan war, 1184 B.C., though some maintain that it was only a statue of similar size and shape, and that the real Palladium was conveyed from Troy to Italy by Æneas, 1183 B.C., and preserved by the Romans with the greatest secrecy in the temple of Vesta, and esteemed the destiny of Rome.—**PALLADIUM** is a rare metal discovered in platinum ore by Dr. Wollaston in 1803.

PALLAS,* the planet, was discovered by Olbers, at Bremen, March 28, 1802.

PALMERSTON ADMINISTRATION.† The resignation of the Aberdeen administration was announced Feb. 1, 1855, but nearly all its members returned to office soon after under lord Palmerston,—lord Derby and lord John Russell having each in vain endeavoured to form an administration. On Feb. 22, Mr. Gladstone, sir James Graham, and Mr. Sidney Herbert resigned on account of the Sebastopol inquiry. Lord John Russell resigned July 13. Lord Canning was appointed governor-general of India, July 4, 1855. This cabinet resigned Feb. 20, 1858, in consequence of a vote of censure upon the government for introducing the Foreign Conspiracy bill. It was succeeded by the Derby administration (*which see*).

First lord of the treasury, Henry viscount Palmerston.
Lord chancellor, lord Cranworth.

President of the council, earl Granville.

Lord privy seal, duke of Argyll; earl of Harrowby; afterwards the marquess of Clanricarde.

Secretaries—home, sir George Grey; *foreign*, earl of Clarendon; *colonial*, Sidney Herbert (resigned Feb. 22); afterwards lord J. Russell (resigned July 13); sir William Molesworth (died Oct. 22, 1855); next, Henry Labouchere; *war*, lord Panmure.

Chancellor of the exchequer, W. Gladstone (resigned Feb. 22); next, sir G. Cornewall Lewis.

First lord of the admiralty, sir James Graham (resigned Feb. 22); next, sir Charles Wood.

Board of control, sir Charles Wood; next, R. Vernon Smith.

Public works, sir W. Molesworth; next, sir B. Hall (appointed July 22, 1855).

Postmaster-general, viscount Canning (appointed governor-general of India, July 4); next, duke of Argyll.

President of the board of trade, lord Stanley of Alderley. Marquess of Lansdowne, without office.

Chancellor of the duchy of Lancaster, M. T. Baines (appointed Nov. 24, 1855).

PALMERSTON-RUSSELL ADMINISTRATION. The Derby administration (*which see*) resigned June 11, 1859. Earl Granville was requested by the queen to form an administration, and obtained the support of lord Palmerston, but not of lord John Russell: the two last then united to form the present cabinet, which came into office June 18, 1859.

First lord of the treasury, Henry viscount Palmerston.
Lord high chancellor, John lord Campbell (died June 23, 1861); succeeded by sir Richard Bethell, made lord Westbury.

Lord president of the council, earl Granville.
Lord privy seal, duke of Argyll.

Secretaries—foreign affairs, lord John (afterwards earl) Russell; *colonies*, duke of Newcastle; *home*, sir G. Cornewall Lewis; succeeded by sir George Grey;

war, Sidney (afterwards lord) Herbert; succeeded by sir G. C. Lewis; *India*, sir Charles Wood.
Chancellor of the exchequer, Wm. Ewart Gladstone.

First lord of the admiralty, duke of Somerset.

President of the board of trade, Thomas Milner Gibson. [This office was offered to Mr. R. Cobden, and declined by him.]

Secretary of state for Ireland, Edward Cardwell; succeeded by sir R. Peel (not in the cabinet).

Chancellor of the duchy of Lancaster, sir George Grey, bart.; succeeded by Edward Cardwell.

Postmaster-general, earl of Elgin (proceeded to China in April, 1860); succeeded by lord Stanley of Alderley, appointed Sept. 1860.

Poor-law board, Charles P. Villiers (July 9, 1860).

PALM-SUNDAY. When Christ made his triumphal entry into Jerusalem, multitudes of the people who were come to the feast of the Passover, took branches of the palm-tree, and went forth to meet him, with acclamations and hosannas, A.D. 33. It is usual, in popish countries, to carry palms on the Sunday before Easter, hence called Palm Sunday.

* It is distant from the sun about 263 millions of miles, and completes its revolution in four years seven months and one-third of a month. Schroeter, a German astronomer, estimated its diameter to be 2000 miles, and consequently nearly the size of our moon. It presents a ruddy aspect, and is surrounded with a nebulosity. It is distinguished from all the other planets by the very great inclination of its orbit to the plane of the ecliptic, which is no less than thirty-four degrees thirty-five minutes.

† Henry John Temple was born in 1784; was educated at Harrow, Edinburgh, and Cambridge; succeeded his father, viscount Palmerston, 1802; became M.P., and a junior lord of the admiralty, 1807; was secretary-at-war, 1809-28, and secretary for foreign affairs, Nov. 1830-34, April 1835 to Sept. 1841, and July 1846 to Dec. 1851; and home secretary, Dec. 1852 to March 1855, when he became first lord of the treasury. He was created lord warden of the Cinque ports, March 31, 1861; and master of Trinity board, June 16, 1862. He has sat for Tiverton since 1835.

PALMYRA, Syria. The ruins, chiefly of white marble discovered by some English travellers in 1678, prove Palmyra to have been more extensive and splendid than even Rome itself. It was supposed to have been the Tadmor in the wilderness built by Solomon, but was manifestly Grecian. The origin of its prosperity may have been the trade with India. The brilliant part of the history of Palmyra was under Odenatus and his queen Zenobia. Odenatus died, and Zenobia assumed the title of queen of the East, in A.D. 267. Aurelian defeated her at Adessa and made her captive 273. From that time Palmyra ceased to make a figure in history. It is now inhabited by only a few Arab families. The ruins were visited in 1751, by Mr. Wood, who published an account of them in 1753. Mr. Dawkins also visited Palmyra; and Mr. Bruce, on ascending a neighbouring mount, was overcome with the magnificent sight.

PAMPELUNA (N.E. Spain, taken by the French on their invasion of Spain), was invested by the British, between whom and the French obstinate conflicts took place, July 27 and 29, 1813. It surrendered to the British Oct. 31, in that year.

PAMPHLET. The first appearance of pamphlets amongst us is generally thought to have been in opposition to the errors and corruptions of the Church of Rome. Those who were first convinced of the reasonableness of the "new learning," as it was then called, propagated their opinions in small pieces, which were cheaply printed, and (what was then of great importance) easily concealed. Political pamphlets began in Edw. VI.'s time, and were very numerous in the seventeenth century. Large collections are in the libraries of the British Museum and the Royal and London Institutions.

PANAMA, the isthmus which joins the two Americas. Across this a ship canal has been proposed: and a railway was opened in 1855. In that year a new state, New Grenada, was divided into eight federal states, one of which is named Panama.

PANDECTS. A digest of the civil law made by order of Justinian, about A.D. 529. These Pandects (which condensed all the then known laws) were accidentally discovered in the ruins of Amalfi, A.D. 1137; they were removed from Pisa in 1415, and are now preserved in the library of the Medici at Florence, as the *Pandectæ Florentinæ*.

PANICS, COMMERCIAL, generally the result of over-speculation. See *Bubbles, South Sea, Law's*. The last in this country were, in 1847, through the railway mania; in 1857, through American failures; and in April, 1859, through the fear of a continental war.

PANNONIA, part of Illyria, now Hungary, was finally subdued by Tiberius, A.D. 8.

PANOPTICON OF SCIENCE AND ART, in Leicester-square, erected in 1852-3 for a chartered company, by Mr. T. H. Lewis the architect; was opened in 1854 for lectures, musical performances, &c. It had a very large electrical machine, battery, &c. The speculation did not succeed; the building was sold in 1857, and in Feb. 1858, was opened for concerts and horsemanship, and called the Alhambra.

PANORAMAS, the invention of Robert Barker, are bird's-eye views painted in distemper round the wall of a circular building. In 1788 he exhibited at Edinburgh a view of that city, being the first picture of the kind. He then commenced similar exhibitions in London, having adopted the name '*Panorama*' to attract notice, and was ultimately enabled to build commodious premises in Leicester-square for that purpose. He died in April 1806.

PANTHEON AT ROME. A temple built by Augustus Caesar, some say by Agrippa, his son-in-law, 27 B.C. It was in a round form, having niches in the wall, where the image or representation of a particular god was set up; the gates were of brass, the beams covered with gilt brass, and the roof covered with silver plate. Pope Boniface III. dedicated it to the Virgin Mary, and all the saints, by the name of S. Maria della Rotonda, or "ad Martyres," 608.—The **PANTHEON IN LONDON** was erected by subscription, and opened Jan. 25, 1772. It was formed into an opera-house; was burnt down Jan. 14, 1792; was rebuilt in 1795 and 1812; and made a bazaar in 1834.

PANTOMIMES were representations by gestures and attitudes among the ancients, and were introduced on the Roman stage by Pylades and Bathyllus, 22 B.C. Pantomime dances were introduced about the same time.

"PAPAL AGGRESSION." In a consistory holden in Rome, Sept. 30, 1850, the pope (Pius IX.) named fourteen new cardinals, of whom four only were Italians. Among the ten foreigners raised to the dignity of cardinal, was Dr. Wiseman, Roman Catholic vicar-apostolic of the London district, who was at the same time created lord archbishop of Westminster. On Oct. 27, following, Dr. Ullathorne was enthroned as Roman Catholic bishop of Birmingham in St. Chad's cathedral in that town. The same day a pastoral

letter from Dr. Wiseman was read in all the Roman Catholic chapels of his see ; and on its becoming generally known to the British people that all England had been parcelled out similarly into Romish dioceses, the strongest indignation at this assumption of the pope was expressed throughout the empire.* The answer of the bishop of London (Dr. Blomfield) to a memorial from the Protestant clergy of Westminster, against the pope's creation of a Romish hierarchy in this country, was followed by the celebrated "Durham" letter from lord John Russell, then chief minister of the crown (Nov. 4), to the bishop of Durham, in which is severely censured not only the papal aggression, but also the proceedings of the tractarian clergy of the Church of England ; and immediately from every quarter of England addresses poured into her majesty the queen, calling upon her and the government to resist this monstrous usurpation. As many as 6700 addresses, it is said, had been voted from nearly as many influential meetings up to Dec. 31, 1850. The great agitation on this subject produced the Ecclesiastical Titles bill, 14 & 15 Vict. c. 60 (passed Aug. 1851), which prohibited the constitution of bishops of pretended provinces under a penalty of 100*l*. This statute, however, has not yet been acted upon.

PAPAL STATES. See *Rome and Popes*.

PAPER. See *Papyrus*. Paper is said to have been invented in China, 170 B.C. It was first made of cotton about A.D. 1000 ; and of rags in 1319. White coarse paper was made by sir John Spelman, a German, at Dartford, in England, 33 Eliz. 1590 : and here the first paper mills were erected. *Stora*. Paper for writing and printing manufactured in England, and an act passed to encourage it, 2 Will. III. 1690 ; before this time we paid for these articles to France and Holland 100,000*l*. annually. The French refugees taught our people ; they had made coarse brown paper almost exclusively, until they came among us. White paper was first made by us in 1690. *Anderson*. Paper-making by a machine was first suggested by Louis Robert, who sold his model to the celebrated M. Didot, the great printer. The latter brought it to England, and here, conjointly with M. Fourdrinier, he perfected the machinery. M. Fourdrinier obtained a patent for paper-making machinery in 1801 ; and for manufacturing paper of an indefinite length in 1807 ; it had previously been made tediously by the hand. The machinery was also improved by Mr. Bryan Donkin. A sheet of paper 13,800 feet long, and four feet wide, was made at Whitehall-mills, Derbyshire, in 1830 ; and one 21,000 feet long, and 6 feet 3 inches wide, was made at Colyton in Devon in 1860. The paper duty imposed in 1694 (producing latterly, about 1,400,000*l*. annually), after having been the subject of agitation for several years, was repealed in 1861. See *Parchment Paper*.

PAPER-HANGINGS, &c. Stamped paper for this purpose was first made in Spain and Holland, about A.D. 1555. Made of velvet and floss, for hanging apartments, about 1620. The manufacture of this kind of paper rapidly improved in this country during the eighteenth century ; and it has been brought to such perfection latterly, that rich stained paper is made at twelve shillings for one yard, and the common kinds 24 yards for one shilling.—**PAPER BRICKS** have been made in America ; and paper tubing for water and gas, made by M. Jaloureau of Paris, was shown in 1860.

PAPER-MONEY. See *Banks*.

PAPIER MACHÉ. This manufacture (of paper-pulp combined with gum and sometimes china clay) has existed for above a century. Martin, a German snuff-box maker, is said to have learnt the art from one Lefevre about 1740. In 1745 it was taken up by Baskerville, the printer at Birmingham, and soon spread over that district. Papier maché is now largely employed in ornamenting the interior of buildings, &c.

PAPYRUS. The reed from which was made the celebrated paper of Egypt and India, used for writings until the discovery of parchment, about 190 B.C. Ptolemy prohibited the exportation of it from Egypt, lest Eumenes of Pergamus should make a library equal to that of Alexandria, 263 B.C. A manuscript of the *Antiquities of Josephus* on papyrus of inestimable value was among the treasures seized by Bonaparte in Italy, and sent to the National Library at Paris ; but was restored in 1815.

PARACHUTE. See *Balloons*.

PARADISE LOST, the great English epic by John Milton, appeared first in 10 books in 1667 ; in 12 books in 1674.

* Among other consecrations that followed, and continued the excitement, was that of Dr. Briggs, created Roman Catholic bishop of Beverley, and enthroned in St. George's chapel at York, Feb. 13, 1851 ; Dr. Browne created bishop of Clifton, and Dr. Burgess bishop of Shrewsbury ; both consecrated in St. George's cathedral, Southwark, July 27, 1851 ; and other priests were similarly raised to new Roman Catholic prelacies.

PARAFFINE (from *parum affinis*, having little affinity with anything), also called photogen, a solid substance, somewhat like spermaceti, produced by distillation of coal, and first obtained by Reichenbach in 1830. It was procured from mineral oil by Mr. James Young about 1849, and is also obtained from Irish peat. It makes excellent candles.

PARAGUAY, a republic in South America, discovered by Sebastian Cabot in 1526; and conquered by Alvarez Nuñez in 1535, and civilised by the Jesuits, who in 1608 commenced their missions there and established an exclusive government, which they held till their expulsion in 1768. Paraguay rose against the Spanish yoke in 1811. In 1814 Dr. Francia was elected dictator; he ruled well; he was succeeded on his death in 1840 by Vival. From 1814 to 1844 the country was rigidly closed against foreigners. The present (1862) president, C. A. Lopez, was elected in 1844. Paraguay was recognised as an independent state by the Argentine Confederation in 1852, and by Great Britain in 1853.

PARASOLS were used by the ancient Egyptians. In their present form (said to have been devised by the duchess of Rutland) they came into general use about 1820.

PARCHMENT. Invented for writing books by Eumenes (some say by Attalus), of Pergamus, the founder of the celebrated library at Pergamus, formed on the model of the Alexandrian, about 190 B.C. Parchment-books from this time became those most used, and the most valuable as well as oldest in the world are written on the skins of goats. It should be mentioned that the Persians and others are said to have written all their records on skins long before Eumenes' time.—**PARCHMENT PAPER** (or Vegetable Parchment), was invented and patented in 1857 by Mr. W. E. Gaine, C.E., who discovered, that when paper is exposed to a mixture of two parts of concentrated sulphuric acid and one part of water for no longer time than is required to draw it through the fluid, it is immediately converted into a strong tough skin-like material. It must be instantly washed with water. Its great strength points out many applications of this material, *e.g.*, maps, school and account books, and drawing paper. In 1859 it appeared that a similar invention had been made in Paris by Figuier and Poumarède in 1846.

PARDONS. General pardons were proclaimed at coronations: first by Edward III. in 1327. The king's power of pardoning is said to be derived *a lege sue dignitatis*; and no other person has power to remit treason or felonies, stat. 27 Henry VIII. 1535. *Blackstone*. A pardon cannot follow an impeachment of the house of commons: stat. Will. III. 1700.

PARIAN MARBLES. The chronology of the Parian Marbles was composed 264 B.C. The Parian Marbles were discovered in the island of Paros, A.D. 1610. They were brought to England, and were presented to the university of Oxford, by Thomas Howard, lord Arundel, whence they are called the Arundelian Marbles, *which see*.

PARIS (formerly *Lutetia Parisiorum*), the capital of France, situated on the river Seine, which cuts it into two unequal parts, the strongest being towards the north, and in which are three isles, *la ville* (the city), the *île St. Louis*, and the *île Louviers*. In the time of Julius Cæsar, Lutetia comprised the city only. It was greatly improved by the emperor Julian, who made it his residence while he governed Gaul, A.D. 355 to 361, and Clovis also resided here in 510. It became successively the capital of the kingdoms of Paris, Soissons, and Neustria, and eventually of all the kingdom. The representative of the house of Orleans, styled count of Paris, now resides in England. Population of Paris in 1856, 1,178,262; in 1860, 1,525,535. See *France*.

 Treaty of Paris between England and Persia, March 4, 1857
 Treaty of Paris between the European powers, Prussia, and Switzerland, respecting Neuchâtel May 26, —
 Important commercial treaty between France and England Jan. 23, 1860

PARISHES. Their boundaries in England were first fixed by Honorius, archbishop of Canterbury, A.D. 636. They were enlarged, and the number of parishes was consequently reduced in the fifteenth century, when there were 10,000. The parishes of England and Wales now amount to 11,077. Parish registers were commenced 1538. By an act passed in 1856 new parishes may be formed out of too extensive ones. See *Registers and Benefices*.

PARK'S TRAVELS. Mungo Park set sail on his first voyage to Africa, under the patronage of the African Society, to trace the source of the river Niger, May 22, 1795; and returned Dec. 22, 1797, after having encountered great dangers, without his journey through intertropical regions having enabled him to achieve the great object of his ambition. He again sailed from Portsmouth on his second voyage, Jan. 30, 1804, appointed to a new expedition by government; but never returned. The accounts of his murder at Broussa on the Niger were a long time discredited; but at length too well authenticated.

PARKS. The Romans attached parks to their villas. Fulvius Lupinus, Pompey, and Hortensius, among others, had large parks. In England, the first great park of which particular mention is made, was that of Woodstock, formed by Henry I. 1125. The parks of London are in a high degree essential to the health of its immense population. St. James's park was drained by Henry VIII. about 1537. It was improved, planted, and made a thoroughfare for public use, 1668. The Green park forms a part of the ground inclosed by Henry VIII. In Hyde park, the sheet of water called the Serpentine river, although in the form of a parallelogram, was made between 1730 and 1733, by order of queen Caroline, consort of George II. This queen once inquired (it is said) of the first Mr. Pitt (afterwards earl of Chatham), how much it would cost to shut up the parks as private grounds. He replied, "Three crowns, your majesty." She took the hint, and the design was never afterwards entertained. See *Green, Hyde, St. James's, Regent's, Victoria, and Battersea Parks*.

PARLIAMENT (from the French, *parlement*, discourse), derives its origin from the Saxon general assemblies, called *Wittenagemot*. The name was applied to the general assemblies of the state under Louis VII. of France, about the middle of the twelfth century, but it is said not to have appeared in our law till its mention in the statute of Westminster I., 3 Edw. I. A.D. 1272: and yet Coke declared in his *Institutes*, and spoke to the same effect, when speaker (A.D. 1592), that this name was used even in the time of Edward the Confessor, 1041. The first summons by writ on record was directed to the bishop of Salisbury, 6 & 7 John, 1205. The first clear account we have of the representatives of the people forming a

house of commons, was in the 43rd Henry III. 1258, when it was settled by the statutes of Oxford, that twelve persons should be chosen to represent the commons in the three parliaments, which, by the sixth statute, were to be held yearly. *Burton's Annals*. The general representation by knights, citizens, and burgesses, took place 49 Henry III. 1265. *Dugdale's Summonses to Parliament*, edit. 1685. See *Commons and Lords*. The power and jurisdiction of parliament are so transcendent and absolute, that it cannot be confined, either for causes or persons, within any bounds. It hath sovereign and uncontrollable authority in making and repealing laws. It can regulate or new-model the succession to the crown, as was done in the reigns of Henry VIII. and William III. It can alter and establish the religion of the country, as was done in the reigns of Henry VIII., Edward VI., Mary, and Elizabeth. *Sir Edward Coke*.* The fourth edition of May's "Practical Treatise on Parliament" was published in 1859. See *Triennial* and *Septennial*.

NUMBER AND DURATION OF PARLIAMENTS, FROM 27 EDW. I. 1299, TO 25 VICTORIA, 1862.

Edward I.	8 parl. in	8 yrs. reign.	Henry V.	12 parl. in	9 yrs. reign.
Edward II.	20	"	Henry VI.	22	"
Edward III.	37	"	Edward IV.	5	"
Richard II.	26	"	Richard III.	1	"
Henry IV.	10	"	Henry VII.	8	"

* When the royal assent is given to a public bill, the clerk says "*Le roi le veut.*" If the bill be a private bill, he says "*Soit fait comme il est désiré.*" If the bill have subsidies for its object, he says, "*Le roi renvoie ses loyaux sujets, accepte leur bénévolence, et aussi le veut.*" If the king do not think proper to assent to the bill, the clerk says, "*Le roi s'avisera;*" which is a mild way of giving a refusal. It is singular that the sovereign of England should still make use of the French language to declare her intentions to her parliament.

PARLIAMENT OF IRELAND, began with conferences of the English settlers, it is said, on the hill of Tara, in 1173. Writs for knights of the shire were issued in 1295. The Irish parliament last met on Aug. 2, 1800; the bill for the Union having passed.

PARLIAMENT OF SCOTLAND consisted of barons, prelates, and abbots, and occasionally of burgesses. A great national council was held at Scone by John Balliol, Feb. 9, 1292; and by Robert Bruce at Cambuskenneth, in 1326. Afterwards, the number of representatives from towns diminished; a house of commons was never formed in Scotland. The parliament of Scotland sanctioned the Act of Union on Jan. 16, 1707, and met for the last time on April 22, same year.

PARLIAMENT OF PARIS was made the chief court of justice in France by Philip IV.; at his suggestion it revoked a bull of pope Boniface VIII., 1302. It was suppressed by Louis XV., 1771; restored by Louis XVI., 1774; demanded a meeting of the States-General in 1787; and was suspended by the National Assembly, Nov. 3, 1789.

PARMA (N. Italy), founded by the ancient Etrurians. It took part with the Lombard legion in the wars with the German emperors. It was made a duchy (with Placentia) A.D. 1545. It fell to Spain by Philip V.'s marriage with Elizabeth Farnese, 1714. Near Parma were fought two battles: one between the confederates, England, France, and Spain, against the emperor; indecisive, both armies claiming the victory, June 29, 1734. Near the Trebbia, on June 19, 1799, the French, under Macdonald, were defeated by Suwarrow, with the loss of 10,000 men and four generals. The duke of Parma was raised to the throne of Tuscany,

* Called The *Addle* Parliament. It remonstrated with the king on his levying *benevolences*, and passed no acts.

with the title of king of Etruria, in Feb., 1801. Parma was afterwards united to France (with Placentia and Guastalla), and on the fall of Napoleon was conferred on Maria Louisa, the ex-empress, by the treaty of Fontainebleau, April 5, 1814. Parma was alternately occupied by the Austrians and Sardinians in the war of 1848. The latter retired from it after the battle of Novara, March 23, 1849. On March 14 previously the duke Charles II. announced his abdication in favour of his son Charles III. The latter was stabbed by an assassin, March 26, 1854, and died the next day, leaving his son, the present titular duke, Robert I., a minor (born July 9, 1848), whose mother immediately became regent. When the war in Italy began in 1859, the Parmesans rose, and established a provisional government, May 1; the duchess-regent retired to Switzerland. Farini became dictator Aug. 18, 1859. On Sept. 12, the annexation to Sardinia was voted. On Oct. 5, col. Anviti, a former obnoxious police minister, having rashly returned, was cruelly murdered by the mob. Parma now forms part of the province of Emilia in the kingdom of Italy; to which it was annexed by decree, March 18, 1860, by an almost unanimous vote by universal suffrage.

PARRICIDE. There was no law against it in ancient Rome, such a crime not being supposed possible. About 172 B.C., L. Ostius having killed his father, the Romans first scourged the parricide; then sewed him up in a leathern sack made air-tight, with a live dog, a cock, a viper, and an ape, and thus cast him into the sea. The old Egyptians used to run sharp reeds into every part of the bodies of parricides; and having thus wounded them, threw them upon a heap of thorns, and set fire to them. In France, before the execution of the criminal, the hand is cut off. Memorable execution of Miss Blandy, at Oxford, for the murder of her father, April, 1752.

PARSEES. See *Magi* and *Bombay*.

PARTHENON (thus called from the Greek, *parthenē*, virgin), a temple at Athens dedicated to Minerva, erected 442 B.C. In it Phidias placed his renowned statue of that goddess, 438.

PARTHENOPEAN REPUBLIC was established by the French at Naples (anciently called Parthenope) Jan. 1799, and overthrown in June, same year.

PARTHIA. The Parthians were originally a tribe of Scythians, who, being exiled, as their name implies, from their own country, settled near Hyrcania. Arsaces laid the foundation of an empire which ultimately extended over a large part of Asia, 250 B.C.; and the Parthians were never wholly subdued by the Romans. The last king, Artabanus V., was killed A.D. 226: his territories were annexed to the new kingdom of Persia; under Artaxerxes, who had revolted against Parthia.

PARTITION TREATIES. The first treaty between England and Holland for regulating the Spanish succession, was signed Aug. 19, 1698; and the second (between France, England and Holland, declaring the archduke Charles presumptive heir of the Spanish monarchy, Joseph Ferdinand having died in 1699), March 13, 1700. Treaty for the partition of Poland: the first was a secret convention between Russia and Prussia, Feb. 17, 1772; the second between the same powers and Austria, Aug. 5, same year; the third was between Russia, Austria, and Prussia, Nov. 25, 1795.

• **PASQUINADES.** * Small satirical poems obtained this name about 1533.

PASSAU (Germany), **TREATY OF**, whereby religious freedom was established, was ratified between the emperor Charles V. and the Protestant princes of Germany, July 31, 1552. *Hénault*. In 1662 the cathedral and great part of Passau were consumed by fire.

PASSENGERS—by public vehicles, are protected by 1 & 2 Will. IV. c. 22 (1831), 1 & 2 Vict. c. 79 (1838); and 16 & 17 Vict. c. 33 (1853). Mr. Cleghorn, under whom the front seat on the near side of one of the General Omnibus Company's carriages had given way, recovered 400*l.* damages against the company, in a verdict by consent, in the Queen's Bench, Dec. 10, 1856. The Ships' Passenger act, 18 & 19 Vict. c. 119, was passed in 1855. See *Campbell's Act*.

PASSOVER, the most solemn festival of the Jews, instituted 1491 B.C. in commemoration of their coming out of Egypt; because, the night before their departure, the destroying angel, who put to death the firstborn of the Egyptians, *passed over* the houses of the Hebrews

* This name originated in this way: At the stall of a cobbler named Pasquin, at Rome, a number of idle persons used to assemble to listen to the pleasant sallies of Pasquin, and to relate little anecdotes in their turn, and indulge themselves in raillery at the expense of the passers-by. After the cobbler's death in the sixteenth century the statue of a gladiator was found near his stall, to which the people gave his name, and on which the wits of the time, secretly at night, affixed their lampoons upon the state, and their satirical effusions on their neighbours.

without entering them; they being marked with the blood of the Paschal Lamb killed the evening before. The Passover was celebrated in the new temple, April 18, 515 B.C. *Usher.*

PASSPORT SYSTEM forbids subjects to quit one country or enter another without the consent of the sovereign thereof. In 1858 the system was somewhat changed in this country, and the stamp duty on passports was reduced from 5s. to 6d. Passports were abolished in Norway in 1859; in Sweden in 1860; and (with regard to British subjects) in France, Dec. 16, 1860; and in Italy, June 26, 1862. The passport system was established in the United States on Aug. 19, 1861. The abolition of passports is proposed in Prussia (1862).

PATAY (France), where Joan of Arc, the Maid of Orleans, was present, when the earl of Richemont signally defeated the English, June 18, 1429. Talbot was taken prisoner, and the valiant Fastolfe was forced to fly. In consequence, Charles VII. of France entered Rheims in triumph, and was crowned July 17, following year, Joan of Arc assisting in the ceremony in full armour, and holding the sword of state. See *Joan of Arc*.

PATENTS. Licences and authorities granted by the king. Patents granted for titles of nobility were first made 1344, by Edw. III. They were first granted for the exclusive privilege of printing books, in 1591. The property and right of inventors in arts and manufactures were secured by letters patent by an act passed in 1623. The later laws regulating patents are very numerous; among them are 5 & 6 Will. IV. c. 83, 1835, and 15 & 16 Vict. c. 83 (1852).—By the latter COMMISSIONERS OF PATENTS were appointed, viz., the lord chancellor, the master of the rolls, the attorney-general for England and Ireland, the lord advocate, and the solicitor-generals for England, Scotland, and Ireland. Since 1852, a journal has been published under their authority, and indexes of patents, from March, 1617, to the present time. Specifications of patents may be consulted by the public at the Free Library and Reading-Room, in Southampton-buildings, March 5, 1854. A museum containing models, portraits, &c., was established in 1859 at South Kensington, mainly by the exertion of Mr. Bennet Woodcroft.

PATRIARCHS. The dignity among the Jews is referred to the time of Nerva, A.D. 97. The ecclesiastical historian Socrates gives this title to the chiefs of Christian dioceses about A.D. 440. It was first conferred on the five grand sees of Rome, Constantinople, Alexandria, Antioch, and Jerusalem. The Latin Church had no patriarchs till the sixth century. The first founders or heads of religious orders are called patriarchs.

PATRICIANS, the senators of Rome; their authority began with the city itself. See *Rome*.

PATRICK'S CATHEDRAL, ST. (Dublin), was erected in 1190, by archbishop Comyn, on the site of an old church. The cathedral was desecrated in 1546, and used as a law court till 1564. It is now in course of restoration. See *Knights*.

PATRIOTIC FUNDS. One was established July 20, 1803, by the subscribers to Lloyd's, "to animate the efforts of our defenders by sea and land" by providing a fund for the relief of themselves when wounded, and of their widows and orphans, and for granting pecuniary rewards and badges of distinction for valour and merit. On Aug. 24, 1809, 424,832*l.* had been received, and 331,611*l.* expended. From 1803 to 1826 the total sum received was 629,823*l.* 14*s.* 1*d.* In Oct. 1854, a commission (prince Athert at the head) was appointed to raise and distribute a fund bearing this name, for the relief of the families of those who might fall in the Russo-Turkish war. Large sums have been collected from this country and the colonies, amounting to 1,171,270*l.* in July, 1855; to 1,296,282*l.* on Nov. 16, 1855; to 1,460,000*l.* in June, 1857. The overplus, 200,000*l.*, was appropriated to founding an asylum for 300 orphan girls (the Royal Victoria Patriotic Asylum), on Wandsworth common, the first stone of which was laid by the queen July 11, 1857. The royal family and many of the aristocracy contributed drawings, some of which were sold for high prices, in May, 1855. A large fund was collected for the relief of the sufferers by the Indian mutiny. See *India*, 1857.

PAUL JONES, a Scotchman, born 1742; died at Paris, 1792. He commanded an American privateer during the American war, and was memorable for his daring depredations on British commerce. He landed and pillaged the house of lord Selkirk, near Kirkcudbright, and at Whitehaven he burnt shipping in the harbour, April, 1778. The Dutch permitted Paul Jones to enter their ports with two of the king's ships of war which he had taken, and which the stadtholder peremptorily refused to deliver up, 1779.

PAULICIANS, a sect of Christian reformers, arose about A.D. 652. Although they were severely persecuted, they spread over Asia Minor, in the ninth century, and finally settled at Montfort, in Italy, where they were attacked by the bishop of Milan in 1028. Severe decrees against them were made in 1163, and they gradually dispersed; very probably sowing the seeds of the great reformation of the 16th century.

PAUL'S CATHEDRAL, ST. (London), the noblest Protestant church in the world. The best authority that exists illustrative of the origin of this church, is its great restorer, sir Christopher Wren. His opinion, that there had been a church on this spot, built by the Christians in the time of the Romans, was confirmed when he searched for the foundations for his own design. He explodes the notion of there having been a temple of Diana. The first church is supposed to have been destroyed during the Diocletian persecution (302), and to have been rebuilt in the reign of Constantine. This was demolished by the pagan Saxons, and restored by Sebert in 603. It was injured by fire in 962, and destroyed by the great conflagration in 1087, after which Mauritius, then bishop of London, commenced the magnificent edifice which immediately preceded the present cathedral. On April 2, 1631, a commission was granted to Laud, then bishop of London, to restore the cathedral; which however was totally destroyed by the memorable fire of 1666. The first stone of the present edifice was laid June 21, 1675, and the choir was opened for divine worship, Dec. 2, 1697. The whole edifice was completed in 1710 (with the exception of some of the decorations, not finished until 1723) under the illustrious architect, sir Christopher Wren. The total cost (including 200 tons weight of iron railing) was 1,511,202*l.*—Money having been subscribed to adapt St. Paul's for the purpose, evening services began on Sunday, Nov. 28, 1858, when above 4000 persons were present. The ball and cross were restored by Mr. Cockrell, in 1822.

Length of St. Paul's from the grand portico to the east end, is	feet 570	Campaniles, or bell towers, at each corner, height	feet 208
Breadth, north to south portico	282	Breadth of western entrance	180
Exterior diameter of the dome	145	Circumference of dome	420
Height from ground to top of cross	404	Entire circumference of the building	2292
		Diameter of ball	6

PAUL'S CROSS, ST., (London), which stood before the cathedral, was a pulpit formed of wood, mounted upon steps of stone, and covered with lead, from which the most eminent divines were appointed to preach every Sunday in the forenoon. To this place, the court, the mayor, the aldermen, and principal citizens used to resort. It was in use as early as 1259, and was appropriated not only to instruct mankind by preaching, but to every purpose political or ecclesiastical:—for giving force to oaths, for promulgating laws, &c. Jane Shore, mistress of Edward IV., was brought before this cross in 1483, divested of all her splendour. It was demolished in 1643 by order of the parliament.

PAUL'S SCHOOL, ST., was endowed in 1512 by John Colet, dean of St. Paul's, for 153 boys "of every nation, country, and class," in memory of the number of fishes taken by Peter, John xxi. 11. The first schoolhouse was burnt in 1666; the second by Wren was taken down in 1824, and the present building erected by George Smith. William Lilly was the first master, and his grammar is still used by the school. *Timbs.*

PAUPERS. See *Poor*.

PAVEMENT. The Carthaginians are said to have been the first who paved their towns with stones. The Romans, in the time of Augustus, had pavement in many of their streets; but the Appian Way was a paved road, and was constructed 312 B.C. In England there were few paved streets before Henry VII.'s reign. London was first paved about the year 1533. It was paved with flagstones between 1815 and 1825. Wood and asphalte paving were tried in 1839, and have been disused since 1847. See *Wood Pavement*.

PAVIA (N. Italy), the ancient *Ticinum* or *Papia*. Its university, founded by Charlemagne, is the oldest in Europe. Pavia was built by the Gauls, who were driven out by the Romans, and these in their turn were expelled by the Goths. In 568, it was taken by the Lombards and became the capital of their kingdom. In the twelfth century, it was erected into a republic, but soon after was subjected to Milan and followed its fortunes. On Feb. 24, 1545, a battle was fought near here between the French and the Imperialists, when the former were defeated, and their king, Francis I., after fighting with heroic valour, and killing seven men with his own hand, was at last obliged to surrender himself prisoner. Francis wrote to his mother, Louisa of Savoy, regent of the kingdom during his absence, saying, *Tout est perdu, madame, fors l'honneur* (All is lost, madam, except honour).

PAWNBROKERS. The origin of borrowing money by means of pledges deposited with lenders is referred to Perugia, in Italy, about A.D. 1458. The institutions were termed *monti di pietà*. Soon afterwards, it is said that the bishop of Winchester established a system of lending on pledges, but without interest. The business of pawnbrokers was regulated in 1756, and licences issued in 1783. The rate of interest on pledges was fixed in 1800. In London there were, in 1851, 334 pawnbrokers; and in England, exclusively of London,

1127; the number is increasing in proportion to the population. In 1860 an act was passed enabling pawnbrokers to charge a halfpenny for every ticket describing things pledged for a sum under 5s. The acts relating to pawnbrokers were amended in 1856.

PAX, a small tablet, generally silver, termed *tabula pacis* or *osculatorium*, kissed by the Roman Catholic priests and laity; substituted for the primeval kiss of peace in the early church. The pax is said to have been introduced about the 12th century.

PAYMASTER-GENERAL. In 1836 the whole of the army and navy pay departments were consolidated into one, termed the Paymaster-general's office, sometimes held by a Cabinet minister.

PEACE. A temple was dedicated to peace by Vespasian, A.D. 75. See *Fire-works, Justices, Treaties, &c.*—A PEACE SOCIETY was founded in 1816 for the promotion of universal peace. It held its 45th anniversary in May, 1861. A congress of the friends of peace, from all parts of the world, commenced its sittings at Paris, Aug. 22, 1849. It met in London at Exeter hall, Oct. 30 following; and at Frankfort, in St. Paul's church, Aug. 22, 1850; at Birmingham, Nov. 28, 1850; and at Exeter hall, July 22, 1851. A meeting was held at Manchester, Jan. 27, 1853; and at Edinburgh, Oct. 12, 1853. Mr. Bright and Mr. Cobden are among the most conspicuous members of this society. A deputation from the Peace Society, consisting of Messrs. J. Sturge, Pease, and another quaker friend, stated their views to the emperor of Russia at St. Petersburg, at an interview granted them in Feb. 1854.

PEARLS. The formation of the pearl has embarrassed both ancient and modern naturalists to explain. M. Reaumur, in 1717, alleged that pearls are formed like other stones in animals. An ancient pearl was valued by Pliny at 80,000*l.* sterling. One which was brought in 1574, to Philip II., of the size of a pigeon's egg was valued at 14,400 ducats, equal to 13,996*l.* A pearl named the *Incomparable*, spoken of by De Boote, weighed thirty carats, equal to five pennyweights, and was about the size of a muscadine pear. The pearl mentioned by Tavernier, as being in possession of the emperor of Persia, was purchased of an Arab in 1633, and is valued at a sum equal to 110,400*l.*

PEDESTRIANISM. Euclidas, a citizen of Platea, went from thence to Delphi to bring the sacred fire. This he obtained, and returned with it the same day before sunset, having travelled 125 English miles. No sooner had he saluted his fellow-citizens, and delivered the fire, than he fell dead at their feet. After the battle of Marathon, a soldier was sent from the field to announce the victory at Athens. Exhausted with fatigue, and bleeding from his wounds, he had only time to cry out, "Rejoice, we are conquerors!" and immediately expired. Foster Powell, the celebrated English pedestrian, performed many astonishing journeys on foot. Among these, was his expedition from London to York and back again, in 1788, which he completed in 140 hours. One of the most astonishing feats of pedestrianism performed in England was that of captain Barclay, in 1809.* See *Barclay and Walking*.

PEEL ADMINISTRATIONS.† The FIRST succeeded the Melbourne administration, which was broken up on the retirement of lord Althorpe, the chancellor of the exchequer, in Nov. 1834. Sir R. Peel then in Italy was summoned home, the duke of Wellington holding the seals of office in the interim. They resigned in April, 1835. In May 1841 sir R. Peel carried a vote of want of confidence in the Melbourne cabinet, but did not take office; and in Sept. of that year, he became again premier.

FIRST ADMINISTRATION (Dec. 1834).

Sir Robert Peel, *first lord of the treasury and chancellor of the exchequer*.

Lord Lyndhurst, *lord chancellor*.

Earl of Rosslyn, *lord president*.

Lord Wharncliffe, *privy seal*.

Henry Goulburn, *duke of Wellington, and earl of Aberdeen, home, foreign, and colonial secrets. of state*.

Earl de Grey, *first lord of the admiralty*.

Lord Ellenborough, and Alexander Baring, *board of control and trade*.

Sir Edward Knatchbull, *paymaster of the forces*.

J. C. Herries, *secretary at war*.

Sir George Murray, *master-general of the ordnance, &c.*

[Terminated, April 1835.]

* On Oct. 7, 1861, a 12 miles foot-race was held, when Levett, the champion of England, ran 7 miles in 37 minutes 27 seconds; Deerfoot, a Seneca Indian, ran 12 miles in 65 minutes 5 seconds; and Mills ran 10 miles in 54 minutes 10 seconds; other races followed.

† Sir Robert Peel was born Feb. 5, 1783; entered parliament in 1809; became under-secretary of the colonies in 1811, chief secretary for Ireland in 1812, M.P. for Oxford in 1818 (when he resigned his office), secretary for home department in 1822; resigned office and reappointed in 1827; resigned again in 1830; became premier in 1834 and 1841, *see above*. He was thrown from his horse June 29, and died July 2, 1850. He greatly relaxed the severity of our criminal code in 1827, *et seq.*; established the new police, and carried the Catholic Emancipation Bill in 1829, and the repeal of the Corn Laws in 1846. Statues have been erected to him—at Salford in 1852; at Tamworth, Leeds, Bury, and Manchester, in 1853; and in London and Birmingham in 1855.

PEEL ADMINISTRATIONS, *continued.*

SECOND ADMINISTRATION (Sept. 1841).

Sir Robert Peel, *first minister*.
 Duke of Wellington, in the cabinet without office.
 Lord Lyndhurst, *lord chancellor*.
 Lord Wharncliffe, *lord president*.
 Duke of Buckingham, *lord privy seal*.
 Sir James Graham, earl of Aberdeen, and lord Stanley, *home, foreign, and colonial secretaries*.

Henry Goulburn, *chancellor of the exchequer*.
 Earl of Haddington, *first lord of the admiralty*.
 Earl of Ripon, *board of trade*.
 Lord Ellenborough, *India board*.
 Sir Henry Hardinge, sir Edward Knatchbull, sir George Murray, &c.
 [Terminated, June 29, 1846, by sir Robert's resignation.]

PEELITES, a name given to gentlemen, whigs and tories, who adhered to sir Robert Peel, after his defeat by the Conservative party, on account of his free-trade measures carried in 1846. The principal were H. Goulburn, W. E. Gladstone, Sidney (afterwards lord) Herbert, sir James Graham, E. Cardwell, sir George Clerk, and others.

PEEP-O'DAY-BOYS were insurgents in Ireland, who visited the houses of their antagonists at break of day, in search of arms. They first appeared July 4, 1784, and for a long period were the terror of the country. See *Defenders*.

PEERS. See *Lords*.

PEGU, a province of the Burmese empire, discovered by the Portuguese in 1520. Pegu, the capital, was taken by major Cotton, with 300 men, in June 1852, without loss; and afterwards abandoned. It was again occupied by the Burmese and strongly fortified, with a garrison of 4000 men. It was re-captured by general Godwin with 1200 men and two guns, in two hours, with the loss of six killed and thirty-two wounded. The province was annexed to our Indian possessions, by proclamation, Dec. 20, 1852, and has since prospered. In Feb. 1862, it was united with Arracan and Tenasserim as British Burmah.

PEKIN, the Northern capital of China, was founded by Kublai in 1279; rebuilt by Yong-lo, 1471; visited by lord Macartney in 1793; surrendered to the allied English and French armies, Oct. 12, 1860; and evacuated by them Oct. 26 following, after peace had been signed. It is described as being in a very desolate state, with a scattered indigent population, estimated at four millions.

PELAGIANS, followers of Pelagius, a Briton, appeared at Rome about A.D. 400. Their doctrines were condemned at Carthage about 412, and at other councils. They maintained:—

1. That Adam was by nature mortal, and whether he had sinned or not would certainly have died.
 2. That the consequences of Adam's sin were confined to his own person.
 3. That new-born infants are in the same condition with Adam before the

fall.
 4. That the law qualified men for the kingdom of heaven, and was founded upon equal promises with the Gospel.
 5. That the general resurrection of the dead does not follow in virtue of Our Saviour's resurrection, &c.

PELASGI, the primitive inhabitants of Greece and Italy, appear to belong to the Indo-Germanic race. They were in Greece about 1900 B.C., and in Italy about 1600 B.C. They have been termed Tyrrheni, Sicani, or Siculi, Apuli, &c. From the Pelasgi came the Dorians, Æolians, and Ionians; all three being Hellenes or Greeks.

PELEW ISLANDS (N. Pacific Ocean), discovered by the Spaniards in the seventeenth century. The East India Company's packet, *Antelope*, captain Wilson, was wrecked here in 1783. The king, Abba Thulle, allowed captain Wilson to bring prince Le Boo, his son, to England, where he arrived in 1784, and died soon after of the small-pox. The East India Company erected a monument over his grave in Rotherhithe churchyard.

PELHAM'S ADMINISTRATION. See *Broad Bottom Administration*.

PELOPIUM. See *Niobium*.

PELOPONNESIAN WAR continued for twenty-seven years between the Athenians and the people of the Peloponnesus, with their respective allies, and is the most famous of the wars of Greece. It began by an attempt of the Boeotians to surprise Plataea, 431 B.C. on May 7, and ended 404 B.C. by the taking of Athens by the Lacedæmonians.

PELUSIUM (now *Tineli*), formerly the key of Egypt. Here in 525 B.C. Psammeticus III. was defeated by Cambyzes the Persian, who thereby obtained possession of the kingdom.

PENAL LAWS AFFECTING ROMAN CATHOLICS, enacted against Roman Catholics in these realms were very severe; and even up to the period of passing the Emancipation Bill many of them remained un repealed. The following comprises the chief statutes set forth in *Scully's History of the Penal Laws*, in 1812. All the laws against Roman Catholics were repealed by the Relief Bill, passed April 13, 1829.

PENAL LAWS, AFFECTING ROMAN CATHOLICS, *continued.*

Priests celebrating Marriages.—If any popish priest shall celebrate matrimony between any two persons knowing that both or either is of the Protestant religion (unless previously married by a Protestant clergyman), he shall suffer the punishment of a popish regular [that is, transportation; and if he return, the punishment of high treason]. 6 Anne, 1708; 8 Anne, 1710.

Exclusion from Parliament.—No peer of the realm shall sit in the house of peers, nor person chosen as a member of the house of commons shall sit as such, unless he first take the oath of allegiance and supremacy, and subscribe to the declaration against transubstantiation, the sacrifice of the mass, idolatry of the Church of Rome, invocation of the Virgin Mary or of the saints. Penalty: all the punishments of a popish recusant convict, 3 Will. and Mary, 1691.

Elective Franchise.—No Catholic shall vote at the election of any member to serve in parliament, as a knight, citizen, or Burgess, 14 Geo. 1. 1727. Conditionally reinstated, 1793.

Corporate Offices.—No Catholic shall be mayor, sovereign, portreeve, burgomaster, bailiff, alderman, recorder, treasurer, sheriff, town-clerk, common-councilman, master or warden of any guild, corporation, or fraternity in any city, walled town, or corporation in Ireland. First statute, 17 & 18 Chas. II. 1667. Irish statute, 21 & 22 Geo. III., confirming the English Test and Corporation Acts.

The Army and Navy.—Persons holding offices, civil and military, and receiving pay, salary, fee, or wages, to take the oaths of supremacy, and abjuration, and to subscribe to the declaration against transubstantiation, the mass, &c. English statute, 25 Chas. II. 1675. A severer enactment as regards penalties in Ireland, 9 Anne, 1710.—All military offices, except master-general of the ordnance, commander-in-chief, and generals, were opened to Catholics, 1793.

Excluded Parish Vestries, &c.—By act for preventing Papists having it in their power to obstruct the building or repairing of churches, by out-voting the Protestant parishioners, 12 Geo. I. 1725.

Arms forbidden.—By act for disarming the Papists, requiring them to deliver up to the justices or civil officers all their armour, arms, and ammunition, &c., and authorising search, &c. by day or night. Makers of fire-arms forbidden Catholic apprentices, 7 Will. III. 1695. No Catholic to be employed as fowler for any Protestant, 10 Will. III. 1698. Penalty: fine and one year's imprisonment for first offence; for the second, all the pains and penalties of persons attainted of a *premiure*.—These acts were confirmed, 13 Geo. II. 1739; they were qualified, 33 Geo. III. 1793.

Trial by Jury, &c.—Catholics not to serve as grand jurors, unless a sufficient number of Protestants cannot be found, 6 & 8 Anne. Issues to determine questions arising upon popery laws, to be tried by known Protestants only, 6 & 8 Anne, 1708-10. No Catholic to serve on juries in actions between a Protestant and a Catholic, 20 Geo. II. 1755.

Medical Professions.—Catholics (in England) prohibited from practising physic, or exercising the trade of apothecaries, 5 Jas. I. 1606.

Property.—The Catholics disabled from taking leases for a longer term than 31 years, or at rents less than two-thirds of the improved yearly value, 2, 8 Anne, 1703-9. He cannot dispose of his estate by will, or lend money upon the security of land, 2 Anne, 1702. Allowed to take leases for a term of 999 years, 18 Geo. III. 1778. Permitted to take or to transfer lands by devise, descent, purchase, or otherwise, the same as Protestants, 21 & 22 Geo. III. 1781.

Possession of a Horse.—Catholics prohibited from

the keeping any horse of a value exceeding 5*l.*, statute 7 Will. III. 1694.

Children of Catholics.—A child conforming to the established religion, may force his parent to surrender his estate, under a fair allowance, 2 Geo. I. 1716. The eldest son may reduce his fee-simple estate to a life estate. A younger brother may deprive the elder of the legal right of primogeniture, 1 Geo. II. 1727.

Education.—Catholics prohibited from keeping schools, or procuring the education of his child at home, 2 Geo. I. 1716. Prohibited from sending him beyond seas for education, 6 Geo. I. 1719. Permitted to keep schools and teach, 32 Geo. II. 1758. Admissible to Trinity College, 1793.

Guardians.—No Catholics to be guardians, or to have the custody or tuition of any orphan or child under the age of 21 years, 2 Anne, 1703. Permitted to be guardians, 1782. A Catholic may dispose of the custody of his child or children, by will, during minority, to any person other than a Catholic ecclesiastic, 30 Geo. III. 1790.

Catholic Holydays.—Punishment for not working upon Catholic holydays; each offence 2*s.* fine on labourers; or in default, the punishment of whipping, 6 Will. III. 1694.

Burying the Dead.—Punishment for burying the dead, except in Protestant churchyards, or being present at the burying any dead other than therein, 9 Will. III. 1697.

Pilgrimages, &c.—Who shall attend or be present at any pilgrimage or meeting held at any holy well, or reputed holy well: fine 10*s.*, or in default, whipping, 2 Anne, 1703.

Crosses, Pictures, &c.—Magistrates to demolish all crosses, pictures, and inscriptions publicly set up to promote the piety of Catholics, 2 Anne, 1703.

Divine Worship.—All officers and soldiers shall diligently frequent divine service and sermon, in the places appointed for the assemblage of the regiment, troop, or company, to which they may belong. *Articles of War.* No exception made in favour of Catholic officers or soldiers.

Benefices.—If a Catholic become possessed of any right of presentation to a benefice, the same shall be *ipso facto* vested in the crown, if he do not abjure his religion, 2 Anne, 1704.

Donations and Bequests.—Statutes (in England) interdicting donations and bequests for superstitious uses; such as towards the maintenance of a priest or chaplain to say mass, to pray for the souls of the dead, or to maintain perpetual obits, lamps, &c., to be used at prayers for dead persons. Such to be vested in the king, and applied to Protestant institutions, 1 Edw. VI. 1547.

The Papal See.—The obtaining from the bishop of Rome any manner of bull, writing, or instrument, written or printed, containing any thing or matter; or publishing or putting in use any such instrument; the procurers, abettors, and counsellors to the fact shall be adjudged guilty of high treason, 13 Eliz. 1570.

Mendicant Poor.—Any child who (with the consent of its parents) shall be found begging, the parson and wardens of the parish shall detain, and they shall bind such child to a Protestant master until the age of 21, or to a Protestant tradesman until the age of 24 years, 2 Geo. I. 1716.

Concessions.—Catholics qualified to be barristers, solicitors, attorneys, &c. And the withdrawing of certain prohibitions theretofore existing with respect to marriages with Protestants, apprentices to the law, schoolmasters, &c., 22 Geo. III. 1782.

PENAL SERVITUDE was substituted for transportation by 16 & 17 Vict. c. 99 (1853), and 20 & 21 Vict. c. 3 (1857).

PENANCE, a sacrament in the Roman church, arose out of the practice of auricular confession (*which see*). The council of Trent, in its 14th session (1551), decreed that every one is accursed who shall affirm that this sacrament was not instituted by Christ.

PENANG, OR PRINCE OF WALES'S ISLAND, was given up to the East India Company in 1786, by capt. F. Light who received it as a marriage portion with the daughter of the king of Keddah. It now forms part of the *Straits Settlement* (*which see*).

PENDULUMS. The pendulum is affirmed to have been adapted by Galileo the younger, about A.D. 1641. Christian Huyghens contested the priority of this discovery: the latter certainly brought clocks with pendulums to perfection, 1656. *Dufresnoy*. See *Clocks*. Experiments were made to determine the density of the earth by pendulums by Mr. G. B. Airy (now astronomer royal) and others in a mine in Cornwall, in 1826 and 1828; and at Harton colliery in 1854. In 1851, M. Foucault demonstrated the rotation of the earth by the motion of a pendulum.

PENINSULAR WAR. See under *Spain*, 1808.

PENITENTS. There are various orders, as Magdalens, Magdalenettes, &c. The order of Penitents of St. Magdalen was founded at Marseilles, about A.D. 1272. The Penitents of the Name of Jesus was a congregation of religious in Spain who had led a licentious life, formed about 1550. The penitents of Orvieto were formed into an order of nuns about 1662. There were numerous orders of penitents in various parts of Italy, who afterwards changed their name.

PENNSYLVANIA (N. America), the first state in the Union in regard to mineral wealth and nearly so in manufactures. Population in 1860, 2,906,370. Sir Walter Raleigh was the first adventurer who planted a colony on these shores, in the reign of Elizabeth. Pennsylvania was granted by Charles II. to the duke of York, 1664; and it was sold to the Penn family, 1680-1 *et seq.* Pennsylvania was afterwards purchased from the Indians by the celebrated William Penn (son of admiral Penn), who went out from England with a number of colonists; from which period the settlement gradually increased. Mr. Penn granted a charter in May, 1701, but the emigrants from the Low Countries refused it, and separated themselves from the province of Pennsylvania. They afterwards had their own assembly, in which the governor of Pennsylvania presided. This state adopted an independent constitution in 1776, and established the present in 1790. It is strongly Unionist. See *United States of America*.

PENNY. The ancient silver penny was the first silver coin struck in England, and the only one current among the Anglo-Saxons. The penny, until the reign of Edward I. was struck with a cross, so deeply indented that it might be easily parted into two for halfpence, and into four for farthings, and hence these names. Copper penny and two-penny pieces were coined by Boulton and Watt at Soho, Birmingham, in 1797, and were accounted the finest of our copper currency. See *Coins*, &c.—The **PENNY MAGAZINE** began in 1827; the **PENNY CYCLOPEDIA** in 1833 (supplements in 1846 and 1858). The **PENNY RECEIPT** stamp was appointed in 1853, and in 1850 a penny stamp was directed to be placed on bankers' cheques. **PENNY BANKS** (in 1861 about 200) were established about 1850:

PENNY-POST. See *Post-Office*.

PENRUDDOCK'S REBELLION on behalf of Charles II. was suppressed, and himself executed, in 1655.

PENSIONS. The Crown's power of granting them, often much abused, was materially checked by statute 1 Anne, c. 1 (1702).

English pension list fixed at 95,000l. 1781
 Irish pension list said to amount to 489,000l. 1793
 Provision made by parliament to reduce all the
 pension lists of the United Kingdom from
 145,000l. to a maximum of 75,000l. 1830
 A committee appointed to define the proper
 persons to whom pensions should be granted:
 it reported in favour of servants of the crown

and public, and also of those who "by their
 useful discoveries in science and attainments
 in literature and the arts, have merited the
 gracious consideration of their sovereign and
 the gratitude of their country" 1834
 The queen empowered to grant annually new
 pensions to the amount of 1200l. 1837

PENTECOST signifies the fiftieth, and is the solemn festival of the Jews so called because it was celebrated fifty days after the feast of the Passover, *Lev. xxiii. 15*. It is called the feast of weeks, *Exod. xxxiv. 22*, because it was kept seven weeks after the Passover.

PENTLAND HILLS (near Edinburgh). Here the Scotch presbyterians since called Cameronians (*which see*), who had risen against the government, on account of the establishment of episcopacy, were defeated by the royal troops, Nov. 28, 1666. Many of the insurgents were subsequently executed.

PEOPLE. The duke of Norfolk and C. J. Fox, at dinner in 1798, gave as a toast "the Majesty of the People," for which their names were struck off the list of privy councillors. A "People's petition" was presented to parliament by Mr. T. Duncombe and rejected, May 2, 1842.

PEPSIN, a peculiar organic substance found by Schwamm in the gastric juice, and named by him from *pepsis*, digestion. It was experimented on by M. Blondlot in 1843, and has since been prescribed as a medicine.

PERCEVAL, ADMINISTRATION. It commenced on the dissolution of that of the duke of Portland, which was terminated by his grace's death, Oct. 30, 1809. Mr. Perceval had been intimately connected with the affairs of the princess of Wales. See *Delicate Investigation*. Mr. Perceval was assassinated in the lobby of the house of commons, by Bellingham, May 11, 1812. The earl of Liverpool succeeded as premier.

Spencer Perceval, first lord of the treasury, chancellor of the exchequer, and chancellor of the duchy of Lancaster.	Lord Mulgrave, admiralty. Mr. Dundas and earl Bathurst, boards of control and trade.
Earl Camden, lord president.	Earl of Chatham, ordnance.
Earl of Westmoreland, lord privy seal.	Viscount Palmerston, secretary-at-war, &c.
Richard Ryder, marquess of Wellesley, and earl of Liverpool, home, foreign, and colonial secretaries.	Lord Eldon, lord chancellor.

PERCUSSION-CAPS. See *Fire-arms*.

PERCY FAMILY. William de Percy obtained lands in Yorkshire from William the Conqueror. Henry de Percy was created earl of Northumberland in 1377. The last male of the Percy family died in 1678. Sir Hugh Smithson, having married Elizabeth baroness Percy, assumed the name of Percy, and was created earl Percy and duke of Northumberland in 1766. See *Otterburn*. The Percy Society (for the publication of ancient ballad poetry), was established in 1840, and dissolved in 1852.

PEREKOP, an isthmus, five miles broad, connecting the Crimea with the mainland. It was called by the Tartars Orkapou, "gate of the isthmus," which the Russians changed to its present name, which signifies a barren ditch. The Tartar fortress was taken and destroyed by the Russian marshal, Munich, in 1736, by assault, although it was defended by 1000 Janissaries and 100,000 Tartars. It was again strongly fortified by the khan, but was again taken by the Russians in 1771, who have ever since retained it.

PERFUMERY (from the Latin *per*, through, and *fumus*, smoke), was known to the ancients. In *Exodus xxx.* (B.C. 1490), directions are given for making the holy incense. Philip Augustus of France granted a charter to the master perfumers in 1190. Perfumes became fashionable in England in the reign of Elizabeth. In 1860 there were about forty manufacturing perfumers in London; in Paris, about eighty. No such trade as a perfumer was known in Scotland in 1763. *Creech*. A stamp-tax was laid on various articles of perfumery in England, and the vendor was obliged to take out a licence, in 1786. At the corner of Beaufort-buildings, in the Strand, resided Lilly the perfumer, mentioned in the *Spectator*. *Leigh*.

PERGAMOS. See *Seven Churches*, 3.

PERIPATETIC PHILOSOPHY. See *Lyceum*.

PERJURY, in some countries, was punished with death. The early Romans threw the offender headlong from the Tarpeian precipice; but that penalty was afterwards altered, upon a supposition that the gods would vindicate their own honour by some remarkable judgment upon the offender. The Greeks set a mark of infamy upon him. After the empire became Christian, any one who swore falsely upon the Gospels, was to have his tongue cut out. The canons of the primitive church enjoined eleven years' penance; and in some states the false swearer became liable to the punishment he charged upon the innocent. Perhaps the greatest perjurer in modern times was Titus Oates. See *Oates*. A woman named Alice Grey was convicted of many perjuries in 1856. In England, perjury was punished with the pillory, 1563. By the Abolition of Oaths bill, persons making a false declaration are deemed guilty of a misdemeanor; Act 5 & 6 Will. IV. cc. 60 & 61, 9 Sept. 1835.

PERKINS' METALLIC TRACTORS. See *Animal Magnetism*.

PERONNE (N. France), **TREATY OF.** Louis XI. of France, having placed himself in the power of the duke of Burgundy, was forced to sign this treaty confirming those of Arras and Conflans, with some other humiliating stipulations, A.D. 1468. Louis XI. had promised Champagne and Brié as appanages to his brother Charles, duke of Berry, not intending to keep his word, apprehending that those provinces, being so near Burgundy, would prove a fresh source of broils and disputes. *Hénault*.

PERSECUTIONS. Historians usually reckon ten general persecutions of the Christians. See *Jews, Heretics, Inquisition, Huguenots, Protestants, Massacres, Bartholomew, St., &c.*

1st, under Nero, who having set fire to Rome, threw the odium upon the Christians. Multitudes of them were massacred. Some were wrapt up in the skins of wild beasts, and torn and devoured by dogs; others were crucified, and numbers burnt alive A.D. 64
2nd, under Domitian 95
3rd, in the reign of Trajan 106
4th, under Adrian 118
5th, under Severus 199
6th, under Maximinus 235

7th, under Decius, more bloody than any preceding. The Christians were driven from their habitations, plundered and put to death by torments, the rack, and fire A.D. 250
8th, under Valerian 257
9th, under Aurelian 272
10th, under Diocletian, which lasted ten years; houses filled with Christians were set on fire, and droves of them were bound together with ropes and cast into the sea 302

PERSEPOLIS, the ancient splendid capital of Persia. Alexander has been falsely accused of setting fire to it, while intoxicated, 331 B.C. The fire is said to have been accidental and not extensive. Ruins of this city still exist.

PERSIAN EMPIRE. Persia, in the Bible called Elam, is said to have received its appellation from Perseus, the son of Perseus and Andromeda, who settled here, and perhaps established a petty sovereignty. The name is more probably of Indian origin. Persia was included in the first Assyrian monarchy, 900 B.C.; when that empire was dismembered by Arbaces, &c., it appertained to the kingdom of Media. Population of the present kingdom about 10,000,000.

Zoroaster, king of Bactria, founder of the Magi—Justin B.C. 2115
Zoroaster II., Persian philosopher, generally confounded with the king of Bactria 1082
Cyrus, king of Persia, 557; overthrows the Medo-Babylonian monarchy, about 557; conquers Asia Minor about 548; becomes master of the East, 536; killed in a war with the Massagetae 529
Cambyses, his son, conquers Egypt (*which see*). The false Smerdis killed; Darius made king 525
Revolt of the Babylonians subdued 512
Conquest of Ionia; Miletus destroyed 498
Darius equips a fleet of 600 sail, with an army of 300,000 soldiers, to invade the Peloponnesus, which is defeated at Marathon (*which see*) 490
Xerxes (king, 485); recovers Egypt, 484; enters Greece in the spring of this year, at the head of an immense force; the battle of Thermopylae 480
Xerxes enters Athens, after having lost 200,000 of his troops, and is defeated in a naval engagement off Salamis —
The Persians defeated at Mycale and Platea, Sept. 22, 479
Cimon, son of Miltiades, with a fleet of 250 vessels, takes several cities from the Persians, and destroys their navy, consisting of 340 sail, near Cyprus 470
Xerxes is murdered in his bed by Artabanus 465
Reign of Artaxerxes Longimanus —
Xerxes IV., king, slain by Sogdianus, who is deposed by Ochus Darius II., Nothus 425
Artaxerxes II. Mnemon, king, 405; battle of Cunaxa, Cyrus the younger killed 401
Retreat of the 10,000 Greeks (*see Retreat*) —
Artaxerxes III. (Ochus) kills all his relations at his accession 359
He is killed by his minister Bagoas, and his son, Arses, made king 338
Bagoas kills him and sets up Darius III., by whom he himself is killed 336
Alexander the Great enters Asia; defeats the Persians at the river Granicus, 334; near Issus, 333; at Arbela 331
Darius killed by Bessus, who is torn in pieces —
Alexander founds the 3rd or Grecian monarchy Persia was partly re-conquered from the Greeks; is subjugated by the Parthians 250
Artaxerxes I., a common soldier, founder of the Sassanides dynasty, restores the kingdom of Persia A.D. 226

Religion of Zoroaster restored and Christianity persecuted A.D. 227
Artaxerxes murdered; succeeded by Sapor I.; Armenia becomes independent under Chosroes 240
Sapor conquers Mesopotamia 258
Repels the Romans and slays the emperor Valerian 260
Sapor assassinated; succeeded by Hormisdas I., who favours the Manichees 272
Varanes I. (Baharam) persecutes them and the Christians 273
Varanes II. defeated by the emperor Probus; makes peace 277
Persia invaded by the emperor Carus, who conquers Seleucia and Ctesiphon 283
Varanes III. king, 293; Narses 294
The emperor Galerius conquers Mesopotamia, Assyria, &c. 298
Peace with Diocletian —
Hormisdas II. king 301 or 303
Ormuz built about 303
Sapor II. king, 309; proscribes Christianity, 326; makes war successfully with Rome for the lost provinces 337-360
The emperor Julian invades Persia; slain near the Tigris; his successor Jovian purchases his retreat by surrendering provinces 363
Sapor annexes Armenia, 365; and Iberia, 366; makes peace with Rome 372
Artaxerxes II. king, 380; Sapor III. 385
Armenia and Iberia independent 386
Varanes IV. 390; Yezdejird I., 404; conquers Armenia 412
Varanes V. 420, persecutes Christians; conquers Arabia Felix, 421; makes peace with the Eastern Empire for 100 years 422
Armenia again united to Persia 428
Wars with Huns, Turks, &c. 430-2
Yezdejird II. king, 440; Hormisdas III. 457; civil war, 458-86; Feroze king, 458; Pallas, 484; Kobad, 486; Jamaspes, 497; Kobad again 497
His son, Chosroes I. king; long wars with Justinian and his successors, with various fortune 531-79
Successful campaigns of Belisarius 541-2
Hormisdas IV. continues the war; degrades his general, Baharam, who deposes him; but is eventually defeated 590
Chosroes II. 591; renews the war with success, 603; Egypt and Asia Minor subdued 614-6
Chosroes totally defeated by the emperor Heraclius, who advances on Persia 627
Chosroes put to death by his son, Siroes, 628;

PERSIAN EMPIRE, *continued.*

Artaxerxes III. king, 629; Purandokt, daughter of Chosroes, reigns, 630; Shenendeh, her lover, 631; Arzemdokt, her sister, 631; Kesra, 631; Ferokhdad, 632; Yesdejdird III.
 Persia invaded by the Arabs; the king flies, 651; is betrayed to them and is put to death, and his army exterminated
 Persia becomes the seat of the Shiite or Fatimite Mahometans
 The Taherite dynasty established, 813; the Saffaride, 872; the Samanide
 Persia subdued by Toghrul Beg and the Seljukian Turks, 1038; who are expelled, 1104; subdued by Genghiskhan and the Mongols
 Bagdad made the capital
 Is invaded by Timour, 1380; ravaged by him, 1399; conquered by the Turcomans, 1468; who are expelled by the Shiites, or Fatimite

Mahometans, who establish the Sophi dy.
 nasty under Ismail I.
 Ispahan made the capital
 The Turks take Bagdad: great massacre
 Georgia revolts to Russia
 Teheran made the capital
 War with Russia
 Rupture with England in consequence of the Persians taking Herat (*which see*), Oct. 25;
 war declared
 Persians defeated; Bushire taken
 Gen. Outram defeats the Persians at Kooshab,
 And at Mohammerah
 Peace ratified at Teheran
 Commercial treaty with France, &c.
 Herat given up by the Persians
 The shah decrees a re-organisation of the government

SHAHS OF PERSIA.

1502. Ismail or Ishmael: conquers Georgia, 1519.
 1523. Tamasp or Thamas I.
 1576. Ismail II. Meerza.
 1577. Mahommed Meerza.
 1582. Abbas I. the Great: made a treaty with the English, 1612; died in 1628.
 1628. Shah Sophi.
 1641. Abbas II.
 1666. Shah Sophi II.
 1694. Hussein; deposed.
 1722. Mahmoud, chief of the Afghans.
 1725. Ashraff, the Usurper; slain in battle.
 1730. Tamasp or Thamas II.; recovered the throne of his ancestors from the preceding.
 [Thamas-Kouli-Khan, his general, obtained great successes in this and the subsequent reigns.]
 1732. Abbas III., infant son of Tamasp, under the regency of Kouli-Khan, who afterwards caused himself to be proclaimed king as

1736. Nadir Shah (the Victorious King); conquers India, 1739; assassinated at Korassan by his nephew.
 1747. Shah Rokh.
 1751. [Interregnum.]
 1759. Kureem Khan.
 1779. Many competitors for the throne, and assassinations till—
 1795. Aga-Mahommed-Khan obtains the power, and founds the reigning (Turcoman) dynasty; assassinated, 1797.
 1798. Futeh Ali-Shah.
 1834. Mahommed-Shah, grandson of Futeh; succeeded by his son.
 1848. Nasr-ul-Deen, or Nausser-ood-deen, Sept. 4; born 1829; the PRESENT (1862) shah of Persia; said to be an able prince and friendly to Britain.

PERSON, OFFENCES AGAINST. The statute laws respecting these were consolidated and amended in 1861.

PERTH (Scotland), said to have been founded by Agricola, about A.D. 70. It was besieged by the regent Robert in 1339. On Feb. 20, 1437, James I. was murdered at the Black Friars monastery here, by Robert Graham and the earl of Athol, for which their bodies were torn with red-hot pincers, burning crowns of iron pressed down upon their heads, and in the end their hearts taken out and thrown into a fire.—Gowrie's conspiracy occurred here, Aug. 6, 1600. Perth was taken by Cromwell in 1651; and by the earl of Mar, after the battle of Lumblane, in 1715.

PERU (South America). Visited by the Spaniards in A.D. 1513, and soon afterwards easily conquered. Pizarro, in 1530, and others, with one vessel, 112 men, and four horses, set out to invade South America. Not succeeding, he again, in 1531, embarked with three small vessels, 140 infantry, and thirty-six horses; with these, and two reinforcements of thirty men each, he conquered the empire of Peru, and laid the foundation of that vast power which the Spaniards long enjoyed in the New World. Peru remained in subjection to the Spaniards (who murdered the Incas and all their descendants) without any attempt being made to throw off the oppressive yoke till 1782. The independence of the country was completely achieved in 1825. The new Peruvian constitution was signed by the president of the Republic, March 21, 1828. The present president (1862) is general Ramon Castilla, elected in 1855. Population (without Indians) in 1859 about 2½ millions.

PERUGIA, a city of the Papal States, anciently one of the Etruscan Confederation. It allied itself with the Samnites, but was ruined by two defeats by the Romans, 309 and 295 B.C. It was taken by Octavius Cæsar from the adherents of Antony: many of whom were immolated on altars by their victor. Leo X. took Perugia from the rival families Oddi and Baglioni, in 1520. An insurrection here against the pope was put down by the Swiss with great cruelty, June 20, 1859. It was taken by the Sardinian general Fanti, in Sept. 1860, when the cruel Papal general Schmidt and 1600 men were made prisoners.

PERUKE, or **WIG**. The ancients used false hair, but the present peruke was first worn in France and Italy about 1620; and introduced into England about 1660.

PESCHIERA. See *Quadrangle*.

PESTALOZZIAN SYSTEM of education was devised by Henri Pestalozzi, born at Zurich, in Switzerland, in 1746, died 1827. In 1775 he began by turning his farm into a school for educating poor children in industrial pursuits, as well as reading and writing; but did not succeed. In 1798 he established an orphan school, where he began with the mutual instruction, or monitorial system, since adopted by Lancaster; but his school was soon turned into an hospital for the Austrian army. In 1802, in conjunction with Fellenberg, he established his celebrated school at Hofwyl, which at first was very successful, but eventually declined through mismanagement and dissensions. Pestalozzi's labours, however, rendered great service to the progress of education.

PESTH (Hungary), built about 889, was repeatedly taken and besieged in the wars of Hungary, particularly in the long contests with the Turks. The last time it changed masters, was in 1684, after the raising of the famous siege of Vienna by Sobieski. Buda-Pesth was taken by the Imperialists, Jan. 5, 1849. The Hungarians afterwards defeated the Austrians, who were obliged to evacuate it, April 18, same year. See *Hungary*.

PESTILENCE. See *Plague*.

PETALISM (from the Greek *petalon*, a leaf), a mode of deciding upon the guilt of citizens of Syracuse, similar to the Athenian ostracism, the name being written on a leaf, (generally of an olive) instead of a shell, about 460 B.C. If the guilt of the accused were thus established, the sentence was usually banishment. *Colgrave*.

PETARD, an instrument whose invention is ascribed to the Huguenots in 1579. Petards were of metal, nearly in the shape of a hat, and were employed to blow up gates, or other barriers, and also in countermines to break through into the enemy's galleries. Cahors was taken by Henry IV. by means of petards in 1580, when it is said they were first used.

PETER, THE WILD BOY. A savage creature found in the forest of Hertswold, electorate of Hanover, when George I. and his friends were hunting. He was found walking on his hands and feet, climbing trees like a squirrel, and feeding on grass and moss, Nov. 1725. At this time he was supposed to be thirteen years old. The king caused him to taste of all the dishes at the royal table; but he preferred wild plants, leaves, and the bark of trees, which he had lived on from his infancy. No efforts of the many philosophic persons about court could entirely vary his savage habits, or cause him to utter one distinct syllable. He died in Feb. 1785, at the age of 72. Lord Monboddo represented him to be a proof of the hypothesis that "man in a state of nature is a mere animal."

PETER'S PENCE, presented by Ina, king of the West Saxons, to the pope at Rome, for the endowment of an English college there, A.D. 725. So called because agreed to be paid on the feast of St. Peter. The tax was levied on all families possessed of thirty pence yearly rent in land, out of which they paid one penny. It was confirmed by Offa, 777, and was afterwards claimed by the popes as a tribute from England, and regularly collected, till suppressed by Henry VIII. *Camden*. The public collection (on behalf of the pope) was forbidden in France in 1860.

PETERBOROUGH (Northamptonshire), founded 633; anciently called Medeshamstede; obtained its present name from a king of Mercia founding an abbey here, and dedicating it to St. Peter in 689. The church was destroyed by the Danes; but it was rebuilt with great beauty and continued to flourish till the Reformation. The bishopric erected by Henry VIII. in 1541, out of the lands of the dissolved monastery, was wholly taken from the diocese of Lincoln. The first bishop was John Chambers, the last abbot of Peterborough. The see was valued in the king's books at 419*l.* 19*s.* 11*d.* Present income 4500*l.*

RECENT BISHOPS OF PETERBOROUGH.

1794 Spencer Madan; died, Oct. 8, 1813.
1813 John Parsons; died, March 12, 1819.

1819 Herbert Marsh; died, May 1, 1839.
1839 George Davys, PRESENT bishop (1862)

PETERLOO. See *Manchester Reform Meeting*.

PETERSBURG, ST., the modern capital of Russia, founded by Peter the Great, May 27, 1703. He built a small hut for himself, and some wretched wooden hovels. In 1710, the count Golovkin built the first house of brick; and the next year, the emperor, with his own hands, laid the foundation of a house of the same material. The seat of empire was transferred from Moscow to this place in 1711. Here, in 1736, a fire consumed 2000 houses; and

in 1780, another fire consumed 11,000 houses; this last fire was occasioned by lightning. Again in June, 1796, a large magazine of naval stores and 100 vessels were destroyed. The winter palace was burnt to the ground, Dec. 29, 1837. The railway to Moscow was finished in 1851; to Berlin opened May 5, 1862. The university was closed in Oct. 1861, on account of the riotous behaviour of the students. On June 10, 1862, property to the amount of nearly a million sterling was destroyed by fire.

Peace of St. Petersburg, between Russia and Prussia, the former restoring all her conquests to the latter, signed. . . . May 5, 1762
Treaty of St. Petersburg for the partition of Poland (see article *Partition Treaties*), Aug. 5, 1772
Treaty of St. Petersburg, led to a coalition against France. . . . Sept. 8, 1805

Treaty of Alliance, signed at St. Petersburg, between Bernadotte, prince royal of Sweden, and the emperor Alexander; the former agreeing to join in the campaign against France, in return for which Sweden was to receive Norway. . . . March 24, 1812

PETER'S CHURCH, ST. (Rome), originally erected by Constantine, A.D. 306. About 1450, pope Nicholas V. commenced a new church. The present magnificent pile was designed by Bramante; the first stone was laid by pope Julius II. in 1506. In 1514, Leo X. employed Raphael and two others to superintend the building. Paul III. committed the work to Michael Angelo, who devised the dome, in the construction of which 30,000 lbs. of iron was used. The church was consecrated Nov. 18, 1626, the building having occupied 176 years. The front is 400 feet broad, rising to a height of 180 feet, and the majestic dome ascends from the centre of the church to a height of 324 feet: the length of the interior is 600 feet, forming one of the most spacious halls ever constructed. The length of the exterior is 669 feet; its greatest breadth within is 442 feet; and the entire height from the ground 432 feet.

PETERSWALDEN (Germany), **CONVENTION OF**, between Great Britain and Russia, by which a firm and decisive alliance between those powers was made against France, and the course of action against Napoleon Bonaparte, was planned, signed July 8, 1813. This alliance led to the overthrow of Bonaparte in the next year.

PETERWARADEIN (in Austria), where prince Eugene of Savoy gained a great victory over the Turks, Aug. 5, 1716.

PETITIONS. The right of petitioning the crown and parliament for redress of grievances is a fundamental principle of the constitution. Petitions are extant of the date of Edward I. In the reign of Henry IV. petitions began to be addressed to the house of commons in considerable numbers. In 1837, there were presented to parliament 10,831 petitions, signed by 2,905,905 persons; in 1859, 24,386, signed by 2,290,579 persons. See *Rights, Petition of*.

PETRARCH AND LAURA: celebrated for the refined passion of the former for the latter, begun in 1327, which was the chief subject of his enchanting sonnets. He was born 1304, crowned with laurel, as a poet and writer, on Easter-day, April 8, 1341; and died at Arquà, near Padua, July 18, 1374. Laura died April 6, 1348.

PETROLEUM, rock oil or mineral oil, similar to paraffine, has been found in many parts of the world, especially at Rangoon. In 1860-1, a number of oil-springs were discovered in the bituminous coal regions of N.W. Pennsylvania, and others have been since discovered in Ohio and other states; and also in Canada. In consequence numerous artesian wells have been sunk, manufactories erected, and an almost unlimited supply obtained. In consequence of the importation of large supplies of this oil into this country, and many accidents having taken place through its inflammability at low temperature, an act for "the safe keeping of petroleum" was passed in July, 1862. Petroleum will doubtless be eventually largely employed in the arts.

PETROPAULOVSKI, a fortified town on the east coast of Kamtschatka, was attacked by an English and French squadron, Aug. 30, 1854. They destroyed the batteries, but failed in taking some Russian frigates, except the *Sitka*, a store-ship taken by the *President*, and a schooner taken by the *Pique*. Admiral Price was killed, it is supposed by the accidental discharge of his own pistol. A party of 700 sailors and marines landed to assault the place, but fell into an ambuscade; many were killed, including capt. Parker and M. Bourasset, English and French officers. The objects of the attack were not attained, it is thought from want of stores. After this the Russians greatly strengthened their defences, but on May 30, 1855, the allied squadron in the Pacific arriving here found the place deserted. The fortifications were destroyed, but the town was spared. The Russian ships escaped.

PEVENSEY (Sussex). The castle is very ancient. From the abundance of Roman bricks, it is supposed that there was a Roman fortress on the spot. Here William of Normandy landed, Sept. 28 or 29, 1066. The duke of York, in the reign of Henry IV. was

for some time confined within the walls of this castle ; as was also queen Joan, of Navarre, the last wife of Henry IV. who, with her confessor, friar Randal, was accused of a design to destroy the king. In 1840, on removing some earth within the castle, a great many Roman coins were discovered.

PEWS in churches were not in use in England till long after the Reformation : about the middle of the seventeenth century. The earliest *reading-pew* with a date is one at Geddington St. Mary, Northamptonshire, dated 1602. *Hook*.

PFAFFENDORF or LIEGNITZ (Silesia). Here was fought a battle between the Imperialists and Prussians, Aug. 15, 1760. The Austrians were signally defeated by the king of Prussia, who thus prevented the junction of the Russian and Austrian armies ; and worked out the consummate policy disclosed by subsequent events.

PHALANX, the Greek phalanx consisted of 8000 men in a square battalion, with shields joined, and spears crossing each other. The battalion formed by Philip of Macedon was called the Macedonian phalanx, and was instituted by him 360 B.C.

PHARISEES, a sect among the Jews ; so called from a Hebrew word which signifies to separate or set apart, because they pretended to a greater degree of holiness and piety than the rest of the Jews. *Luke* xviii. 9. The Talmud enumerates seven classes of Pharisees.

PHARMACOPEIA, a book of directions for the preparation of medicines, published by colleges of physicians. In 1862 the General Medical Council were empowered to prepare and sell a new Pharmacopœia, to supersede those of the colleges of London, Edinburgh, and Dublin.

PHARMACY : the knowledge of the chemical and medical properties of drugs and all other things employed medicinally. The Pharmaceutical Society of London was founded in 1841, mainly by the exertions of Mr. Jacob Bell, and obtained its charter in 1843. It publishes a monthly journal.—15 & 16 Vict. c. 56 (1852), regulates the qualifications of pharmaceutical chemists.

PHAROS, of Ptolemy Philadelphus of Alexandria, was esteemed as one of the wonders of the world. It was a tower built of white marble, erected about 280 B.C. On the top, fires were constantly kept, to direct sailors in the bay. The building cost 800 talents, which are equivalent to above 165,000*l.* English, if Attic ; or if Alexandrian, double that sum. There was this inscription upon it—"King Ptolemy to the gods, the saviours, for the benefit of sailors ;" but Sostratus, the architect, wishing to claim all the glory, engraved his own name upon the stones, and afterwards filled the hollow with mortar, and wrote the above inscription. When the mortar had decayed, Ptolemy's name disappeared, and the following inscription became visible : "Sostratus the Cnidian, son of Dexiphanes, to the gods, the saviours, for the benefit of sailors."

PHARSALIA (Thessaly, N. Greece), BATTLE OF, between Julius Cæsar and Pompey, Aug. 9, 48 B.C., in which the former obtained a decisive victory, losing about 200 men, or, according to others, 1200. Pompey's loss was 15,000, or 25,000 according to others, and 24,000 of his army were made prisoners of war by the conqueror. After this defeat Pompey fled to Egypt, where he was treacherously slain, by order of Ptolemy the younger, then a minor, and his body thrown naked on the strand, exposed to the view of all whose curiosity led them that way, till it was burnt by his faithful freedman Philip 1.

PHILADELPHIA (Pennsylvania), was planned by William Penn in 1682. The first American Congress assembled here in 1774, and promulgated the declaration of independence on July 4, 1776. It was the capital of the Union till 1800, when Washington was selected in its place.—See *Asia Minor, Seven Churches*.

PHILIPHAUGH, near Selkirk, S. Scotland, where the marquess of Montrose and the royalists were defeated by David Leslie and the Scotch Covenanters, Sept. 13, 1645. The latter slew many of their prisoners in cold blood.

PHILIPPI (Macedonia), so named by the great Philip. Here two battles were fought between Octavius Cæsar and Marc Antony on one side, and the republican forces of Brutus and Cassius, in Oct. 42 B.C., in which the former obtained the victory. In the first, Brutus, who commanded the right wing, defeated the enemy ; but Cassius, who had care of the left, was overpowered and ordered his freedman to run him through the body. In the second battle, the wing which Brutus commanded obtained a victory ; but the other was defeated, and he found himself surrounded by the soldiers of Antony. He, however, made his escape, and soon after fell on his sword. Paul wrote an epistle to the Christians here, A.D. 64.

PHILIPPICS. This species of satire derives its name from the orations of Demosthene against Philip II. of Macedon, 352-341 B.C. The term is also applied to the orations of Cicero against Marc Antony, the second of which, called divine by Juvenal, cost Cicero his life, 43 B.C. The term Philippic is now applied to any invective declamation.

PHILIPPINE ISLES (in the Malay Archipelago), discovered by Magellan, in March 1521, who here lost his life in a skirmish. They were taken possession of in 1565 by a fleet from Mexico, which first stopped at the island of Zebu, and subdued it. In 1570 a settlement was effected at the mouth of the Manilla river, and Manilla became the capital of the Spanish possessions in the Philippines. See *Manilla*.

PHILISTINES, a people of Palestine, conquered Israel, 1156 B.C., and ruled it forty years. They were defeated by Samuel, 1120; and by Saul and Jonathan, 1087. They again invaded Israel about 1063, when David slew their champion Goliath. After David became king he thoroughly subdued them, 1040 B.C. In common with Syria their country was subjugated by the Romans, under Pompey about 63 B.C.

PHILOSOPHER'S STONE. See *Alchemy*.

PHILOSOPHY (love of wisdom), the knowledge of the reason of things, in opposition to history, which is only the knowledge of facts; or to mathematics, which is the knowledge of the quantity of things:—the hypothesis or system upon which natural effects are explained. *Locke*. Pythagoras first adopted the name of philosopher (such men having been previously called sages), about 528 B.C. Philosophers were expelled from Rome, and their school suppressed, by Domitian, A.D. 83. *Univ. Hist.* Philosophy is now divided into:—1. Moral or Ethical; 2. Intellectual; 3. Natural or Physical.

MORAL AND INTELLECTUAL PHILOSOPHY.

ANCIENT SCHOOLS.—*Pythagorean*, about 500 B.C.; *Platonic* (the Academy), by Plato, 374; *Peripatetic* (the Lyceum), by Aristotle, 334; *Sceptic*, by Pyrrho, 334; *Cynic*, by Diogenes, 330; *Epicurean*, by Epicurus, 306; *Stoic*, by Zeno, 200; *Middle Academy*, by Arcesilaus, 278; *New Academy*, by Carneades, 160.

MODERN SYSTEMS.—*Rational*, Bacon, about A.D. 1624; *Cartesian*, Descartes, about 1650; *Reflective or Perceptive*, Locke, 1690; *Idealistic*, Berkeley, 1710; *Elective*, Leibnitz, 1710; *Common Sense*, Reid, 1750-70; *Transcendental*, Kant, 1770-1860; *Scientific*, Fichte, 1800-14; *Absolute Identity*, Schelling, 1800-20; *Absolute Idealism*, Hegel, 1810-30; *Utilitarian*, Bentham, 1790-1830; *Positive*, Comte, 1830.

NATURAL PHILOSOPHY.

Greek and Latin.—Thales, about 600 B.C.; Pythagoras, 500; Aristotle and Plato, 350; Euclid, 300; Archimedes, 287; Hipparchus, 150; Lucretius, about 100; Julius Caesar, 50; Ptolemy, A.D. 150. **Middle Ages.**—Arabians: Ben Musa, 800; Alhazen,

&c., 1100. Gerbert, Decimals, 959. Roger Bacon, *Opus Majus*, 1266.

Inductive Philosophy:—

Copernicus's system published	1543
Tycho Brahe	1546-1601
Kepler's Laws	1609-18
Bacon's <i>Novum Organum</i>	1620
Galileo's <i>Dialogues</i>	1632
Royal Society begins (which see)	1645
Otto Guericke—Air-pump and Electric machine	1654
Huyghens on Pendulums	1658
Newton—Fluxions, 1665; Analysis of Light, 1669; Theory of Gravitation, 1684; <i>Principia</i> published, 1687; death	1727
Bradley discovers aberration	—
Euler on Perturbation of the Planets	1748
Black on Heat	1762
Laplace on Tides	1775
Lagrange, <i>Mécanique Analytique</i>	1788
Galvani and Volta's researches	1791
Laplace, <i>Mécanique Céleste</i>	1799
[See <i>Astronomy, Optics, Chemistry, Electricity, &c.</i>]	

PHIPPS' EXPEDITION. The hon. captain Phipps (afterwards lord Mulgrave) sailed from England in command of the *Sea-horse* and *Carcass* ships, to make discoveries, as near as possible, to the North Pole, 1773. In August of that year, he was for nine days environed with impenetrable barriers of ice, in the Frozen Ocean, north of Spitzbergen, 80° 48 north latitude. All further progress was not only impossible, but retreat also, and in this dreadful situation all on board gave themselves up for lost; but a brisk wind in two or three days accomplished their deliverance. They returned to England without having made any discoveries, Sept. 20, 1773. Nelson was coxswain to the second in command.

PHOCIS, a state in Northern Greece. The Phocians seized Delphi 357 B.C. and commenced the second Sacred War. They were opposed by Thebes and other states, and were utterly subdued by Philip II. of Macedon, in 346.

PHŒNICIA, on the sea coast of Syria. The natives were the most eminent navigators and traders of antiquity; their cities or allied states being Tyre, Sidon, Berytus, Tripoli, Byblos, and Ptolemais or Acre. From the nineteenth to the thirteenth centuries before Christ, they established colonies on the shores or isles of the Mediterranean—Carthage, Hippo, Utica, Gades, Panormus; and are said to have visited the British Isles. Phœnicia was conquered by Cyrus, 537 B.C.; by Alexander 334; by the Romans 47; and after partaking of the fortunes of Palestine, was added to the Ottoman empire, A.D. 1516.

PHŒNIX CLUBS, of a treasonable character, were formed in Ireland in 1858. They met at night to drill. Several persons were arrested and tried in March 1859, at Tralee;

but the jury could not agree on their verdict. Eventually some of the prisoners pleaded guilty, and were discharged on being bound over to keep the peace.

PHONOGRAPHY (from the Greek *phonē*, sound). The Phonetic society, whose object is to reform our mode of writing and printing by rendering it more consonant to sound, was established, March 1, 1843;—sir W. C. Trevelyan, president, and Mr. Isaac Pitman, secretary, the latter being the inventor of the system which was made known in 1837. Among other works published by the promoters of this system, was the "Phonetic News," in 1849.

PHONOSCOPE, an apparatus for testing the quality of musical strings, invented by M. Koenig and exhibited at the International Exhibition in 1862.

PHOSPHORUS was discovered in 1667, by Brandt, of Hamburg, who procured it from urine. The discovery was prosecuted by John Kunckel, a Saxon chemist, about 1670, and by the hon. R. Boyle about the same time. *Nouv. Dict.* Phosphoric acid is first mentioned in 1743, but is said to have been known earlier. Gahn pointed out its existence in bones in 1769, and Scheele devised a process for extracting it. Canton's phosphorus is so called from its discoverer, 1768. Photophosphuretted hydrogen was discovered by sir Humphry Davy in 1812. The consumption of phosphorus has immensely increased since the manufacture of lucifer matches. In 1845, Schrötter of Vienna made the important discovery of what is termed allotropic or amorphous phosphorus, which is not so unwholesome to work as ordinary phosphorus.

PHOTO GALVANOGRAPHY, the art of producing engravings by the action of light and electricity. The earliest specimens were produced by Nicéphore Niepce and presented by him in 1827 to the great botanist Robert Brown. Great advances have since been made in this art by MM. Niepce de St. Victor (who published a treatise on it in 1856), and Vitry, Mr. W. R. Grove, H. Fox Talbot, &c. In 1854, Paul Pretsch patented a process which he called "Photogalvanography."

PHOTOGLYPHIC ENGRAVING (a process by which the light actually etches a picture on a plate that may be and has been printed from), was patented by Mr. Fox Talbot, in 1858, and is described and exemplified in the *Photographic News*, Sept. 9 and 16, 1859, a specimen being given in the latter number.

PHOTOGRAPHY. The action of light on chloride of silver was known as early as the sixteenth century. The phenomenon was studied by Scheele (1777), Senebier (1790), Ritter, and Wollaston (1801). From the results of these investigations, experiments were made by Thos. Wedgwood and Humphry Davy, which were published in 1802. Wedgwood may be regarded as the first *photographer*. His paper was entitled "An account of a method of copying paintings upon glass, and of making profiles by the agency of light upon nitrate of silver." Further discoveries were made by Niepce in 1814, and sir J. Herschel in 1819. Daguerre commenced his experiments in 1824; and in 1826 joined Niepce, and worked with him till the death of the latter in 1833. The production of the *Daguerreotype* plates was announced in Jan. 1839; and the French chamber of deputies granted a pension to Daguerre and to Isidore Niepce (the son). In 1839 also Mr. Henry Fox Talbot first published his mode of multiplying photographic impressions, by producing a *negative* photograph (*i.e.* with the light and shades reversed) from which any number of positive copies may be obtained. His patent for producing the *Talbotype* or *Calotype* (on paper) is dated Feb. 1841. From this time improvements have been made with great rapidity. In 1851, Collodion (*which see*) was applied to photography by Mr. F. Archer.—The Photographic Society of London was established in 1853. It publishes a journal. On Dec. 22, 1852, 774 specimens of photography were exhibited at the rooms of the Society of Arts, Adelphi.—*Celestial Photography* began with professor Bond, the astronomer of Cambridge, U.S., who exhibited a photograph of the moon in 1851. Since then, Mr. Warren De la Rue of London has produced excellent photographs of the moon and other heavenly bodies, and on July 18, 1860, photographed the solar eclipse.—In 1861 Mr. Thompson of Weymouth photographed the bottom of the sea.† In 1861, professor O. M. Rood suggested the application of photography to the microscope. See *Cartes de Visite*. The copyright of photographs is secured by an act passed in 1862.

PHOTOZINCOGRAPHY (a process by which photographs are transferred to zinc plates which may be printed from), was devised by sir Henry James, chief of the Ordnance Survey, and made known in 1860. By it maps, charts, and engravings may be printed at a small cost.

* Journal of the Royal Institution, 1802, p. 170.

† Photography was successfully applied to the transfer of works of art to wood blocks, by Mr. John Leighton, in his illustrated edition of *Lyra Germanica* (1861).

PHRENOLOGY. See *Craniology*.

PHRYGIA (now Kerman), a province in Asia Minor, in which Troy was situated; became part of the Persian empire in 537, and partook of its changes. It became a Roman province in 47 B.C. and a Turkish one 1392 A.D.

PHYSIC. Egypt appears to have been the cradle of the healing art; "and the priests," says Cabanis, "soon seized upon the province of medicine, and combined it with their other instruments of power." From the hands of the priests medicine fell into those of the philosophers, who freed it from its superstitious character. Pythagoras endeavoured to explain the formation of diseases, the order of their symptoms, and the action of medicine, about 529 B.C. Hippocrates, justly regarded as the father of medicine and the founder of the science, flourished about 422 B.C. Galen, born A.D. 131, was the oracle of medical science for nearly 1500 years. About A.D. 980, Avicenna, an Arab, wrote a system of medicine. The discovery of the circulation of the blood, by Dr. Harvey, furnished an entirely new system of physiological and pathological speculation, 1628.

EMINENT PHYSICIANS AND SURGEONS.

PHYSIC GARDENS. The first cultivated in England was by John Gerard, surgeon of London, in 1567; that at Oxford was endowed by the earl of Danby, in 1652; that at Cambridge was commenced about the middle of the last century; and that at Chelsea, originated by sir Hans Sloane, was given to the Apothecaries' Company in 1721; this last was very much admired by the illustrious Linnæus.

PHYSICIANS, ROYAL COLLEGE OF, London, was projected by Dr. Linaere, physician to Henry VIII.;* who, through his interest with cardinal Wolsey, obtained letters-patent, constituting a corporate body of regular physicians in London, with peculiar privileges, Sept. 23, 1518. Linaere was elected the first president of the college. Dr. W. Harvey was a great benefactor to this institution, 1653. He built a library and public hall, which he granted for ever to the college, with his books and instruments. The college was afterwards held in a building in Warwick-lane, erected by sir C. Wren, where it continued till 1823, when the present elegant stone edifice was erected from designs by sir R. Smirke.—The College of Physicians, Dublin, was founded by charter of Charles II. 1667, and was re-incorporated in 1692. The Royal College of Physicians, Edinburgh, Nov. 29, 1681.

PHYSICS. See under *Philosophy*.

PHYSIOGNOMY, a science which affirms that the dispositions of mankind may be discovered from the features of the face. The origin of the term is referred to Aristotle; Cicero was attached to the science. It became a fashionable study from the beginning of the sixteenth century; and in the last century, the essays of Le Cat and Pernethy led to the modern system. Lavater's researches in this pursuit arose from his having been struck with the singular countenance of a soldier who passed under a window at which he and Zimmerman were standing; published 1776.

PHYSIOLOGY is that part of physics which treats of the inner constitution of animals and plants, and the several functions and operations of all their organs and tissues. The works of Müller, Milne-Edwards, and Carpenter are much celebrated, and Todd's *Cyclopædia of Physiology* (1836-59) is a library in itself.

PIANO-FORTE, invented by J. C. Schröder, of Dresden, in 1717; he presented a model of his invention to the court of Saxony; and, some time after, G. Silverman, a musical-instrument maker, began to manufacture piano-fortes with considerable success. The invention has also been ascribed to an instrument-maker at Florence. The square piano-forte was first made by Freiderica, an organ-builder of Saxony, about 1758. Piano-fortes were made in London by M. Zumpie, a German, 1766; and have been since greatly improved by Broadwood, Collard, Kirkman, Erard, and others.

* **PHYSICIAN TO THE KING.** The earliest mandate or warrant for the attendance of a physician at court is dated A.D. 1454, the 33 Henry VI., a reign fertile in the patronage which was afforded to practitioners in medicine; but in that reign no appointment existed which can justly be called physician to the royal person. By this warrant the king, with the consent of his privy council, deputed to three physicians and two surgeons the regulation of his diet, and the administration of such medicines and remedies as might be sufficient for his cure, without any allusion to the previous existence or permanency of the office which they were authorised for a time to fill, or to a remuneration for their services. *Life of Linaere.*

PICENTINES, a Sabine tribe, subdued by the Romans, 268 B.C. They began the Social War in 90, and were conquered in 89 B.C.

PICHEGRU'S CONSPIRACY. See *Georges, &c.*

PICQUET was the first known game upon the cards. It was invented by Joquemín, and afterwards other games, for the amusement of Charles VI. of France, who was at that time in feeble health, 1390. *Mézéray*. "It is remarkable," observes a French writer, "that the earliest game upon the cards should be at once the most simple and intellectual." Cards are referred by some persons to the Romans, and it is disputed whether they are, in modern times, of French or Spanish origin. See article *Cards*.

PICTS. A Scythian or German colony, who landed in Scotland much about the time that the Scots began to seize upon the Hebrides, or Western Isles. They afterwards lived as two distinct nations, the Scots in the highlands and isles, and the Picts in that part now called the lowlands. Between A.D. 838 and 842, the Scots under Kenneth II. totally subdued the Picts, and seized all their kingdom. See *Roman Wall*.

PICTURES. See *Painting*.

PIEDMONT (*Podemontium*, Latin, foot of the mountains), a region in North Italy, the seat of government of the modern kingdom of Sardinia, *which see*.

PIE-POUDRE COURT, the Court of Dusty Foot, whose jurisdiction was established for cases arising at fairs and markets, to do justice to the buyer and seller immediately upon the spot. By stat. 17 Edw. IV. it had cognizance of all disputes in the precincts of the market to which it might belong, 1477.

PIER AND HARBOUR ACT, to facilitate the formation, management, and maintenance of piers and harbours in Great Britain and Ireland, was passed in 1862.

PIGEONS. Courier pigeons are of very ancient use. The ancients being destitute of the post, were accustomed, when they took a long journey and were desirous of sending back any news with uncommon expedition, to take tame pigeons with them. When they thought proper to write to their friends, they let one of these birds loose, with letters fastened to its neck: the bird once released, would never cease its flight till it arrived at its nest and young ones. Taurosthenes announced to his father his victory at the Olympic games by sending to him at Ægina a pigeon stained with purple. *Ovid*. Hirtius and Brutus corresponded by means of pigeons at the siege of Modena. In modern times, the most noted were the pigeons of Aleppo, which served as couriers at Alexandretta and Bagdad. Thirty-two pigeons sent from Antwerp were liberated from London at 7 o'clock in the morning; and on the same day at noon one of them arrived at Antwerp; a quarter of an hour afterwards a second arrived; the remainder on the following day, Nov. 23, 1819. *Phillips*.

PILGRIMAGE or GRACE. An insurrection, so called, headed by Aske and other gentlemen of Yorkshire, joined by priests in the habits of their order, and 40,000 men of York, Durham, Lancaster, and other counties, against Henry VIII. They took Hull and York, with smaller towns. The duke of Norfolk marched against them, and great numbers of the insurgents were executed, 1536-7.

PILGRIMAGES* began with the pilgrimage of the empress Helena to Jerusalem, A.D. 326. They became frequent at the close of the tenth century. Robert II. of France made several pilgrimages; among others, one to Rome about the year 1016, perhaps in 1020, when he refused the imperial dignity and the kingdom of Italy. *Hénault*. Many licences were granted to captains of English ships to carry pilgrims abroad. 7 Hen. VI. 1428.

PILLORY, a scaffold for persons to stand on, to render them publicly infamous, that all might avoid and refuse to have any dealings with them. This punishment was awarded against persons convicted of forgery, perjury, libelling, &c. In some cases the head was put through a hole, the hands through two others, the nose slit, the face branded with one or more letters, and one or both ears were cut off. There is a statute of the pillory 41 Hen. III. 1256. Many persons died in the pillory by being struck with stones by the mob, and pelted with rotten eggs and putrid offal. It was abolished as a punishment in all cases except perjury, 1815. The pillory was totally abolished in 1837. The last who suffered this punishment at the Old Bailey was Peter Jas. Bossy for perjury, June 24, 1830.

PILNITZ, near Dresden, Saxony. The famous convention of Pilnitz took place between the emperor Leopold and the king of Prussia, July 20, 1791. On Aug. 27 the treaty of

* **PILGRIM FATHERS** is the name given in North America to a party of English Puritans who sailed in the "May-flower" to North America in 1620.

Pilnitz, or, as some style it, the Partition Treaty, was finally agreed upon at Pavia by the courts in concert. It was to the effect "that the emperor should retake all that Louis XIV. had conquered in the Austrian Netherlands, and uniting these provinces to the Netherlands, give them to his serene highness the elector palatine, to be added to the palatinate, Bavaria to be added to the Austrian possessions," &c.

PILOT. The act relating to pilots is 16 & 17 Vict. c. 129 (1853), with other acts, is embodied in the Merchant Shipping act, 1854.

PINE-TREES. The Stone pine (*Pinus Pinæa*), brought to these countries before 1548. The Cluster pine (*Pinus Pinaster*), brought from the South of Europe before 1596. The Weymouth pine (*Pinus Strobus*), from North America, 1705. Frankincense pine (*Pinus Tæda*), from North America, before 1713. There are other varieties.

PINKEY (near Edinburgh), where the English under the earl of Hertford, protector, totally defeated the Scots, Sept. 10, 1547. There fell not 200 of the English, but above 10,000 of the Scots. Above 1500 were taken prisoners. *Hume*.

PINS, as an article of commerce, are first mentioned in a statute of 1483. Brass pins were brought from France in 1540, and were first used in England, it is said, by Catherine Howard, queen of Henry VIII. Previously both sexes used ribands, loop-holes, laces with points and tags, clasps, hooks and eyes, and skewers of brass, silver and gold. Pins were made in England in 1543. *Stow*. They were first manufactured by machinery in England in 1824, under a patent of Lemuel Wellman Wright, of the United States.

PIRACY was severely repressed by the Romans. Pompey destroyed the Cilician pirates, 67 B.C. See *Buccaners*. An act of parliament to punish piracy was passed in 1837.

PIRÆUS the port of Athens, was united to the city by two long walls, one erected by Themistocles, and the other by Pericles, 456 B.C., which were destroyed by Lysander, 404 B.C. The Piræus was able to contain 400 Greek vessels. It was occupied by the French during the Russian war in 1854.

PISA, an ancient city in Tuscany, was founded about six centuries before Christ, and was favoured by the early Roman emperors. The citizens took an active part in the Italian wars of the middle ages, and eventually became subject to Florence, after a long siege, 1405-6. The university was founded in 1343, and revived by the Medici in 1472, and 1542. The celebrated Campanile or leaning tower was built about 1154,* and the Campo Santo about the same time. The rival popes, Benedict XIII. and Gregory XII., were deposed at a council held at Pisa in 1409, and Alexander V. elected in their room.

PISTOLS, the smallest sort of fire-arms, carried sometimes at the saddle-bow, sometimes in a girdle round the waist, sometimes in the pocket, &c. *Pardon*. The pistol was first used by the cavalry of England in 1544. Of late years they have been made with a revolving cylindrical breech, in which are formed several chambers for receiving cartridges, and bringing them in succession into a line with the barrel ready for firing. The earliest model of this kind of arm. is to be found in the United Service Museum, and is supposed to date from the reign of Charles I. The manufacture of pistols by machinery was first introduced into England from the United States, America, in the year 1853, by col. Colt, the inventor of the celebrated Colt pistol, at which time nearly the whole of the machinery used was new to this country. The perfection and economy of this system of manufacture induced the British government to establish the Enfield armoury, in the year 1855.

PITCAIRN'S ISLAND. A small island in the Pacific Ocean, said to have been discovered by Pitcairn in 1768, and seen by Cook in 1773, and since noted for being colonised by ten mutineers from the ship *Bounty*, captain Bligh, in 1789.† See *Bounty*.

* This celebrated tower was erected for the purpose of containing bells, and stands in a square close to the cathedral of Pisa. It is built entirely of white marble, and is a beautiful cylinder of eight stories, each adorned with a round of columns, rising one above another. It inclines so far on one side from the perpendicular, that in dropping a plummet from the top, which is 138 feet in height, it falls sixteen feet from the base. Some think this was done purposely by the architect; others attribute it to an accidental subsidence of the foundation. From this tower Galileo made his observation on gravitation (about 1633).

† They remained unknown to England until discovered accidentally in 1814. A ship bearing the island was hailed by a swarthy youth in the English language, when it appeared that the mutineers, soon after settling there, had married some black women from a neighbouring island, and had become a singularly well-conducted community under the fostering care of Adams, the principal mutineer. As their numbers increased, the island proved incapable of their support. Their priest, the Rev. Mr. Nobbs, obtained for them the favour of the English government, which removed them with all their property in the ship *Morayshire*, on May 3rd, and landed them, after a boisterous passage, on Norfolk island, prepared previously for their reception, June 8, 1856. The government stocked Norfolk island with 2000 sheep, 450 head of cattle, and twenty horses, and gave them stores to last twelve months; their numbers were 96 males and 102 females.

PITTS ADMINISTRATIONS.* The first administration was formed on the dismissal of the Coalition ministry (*which see*), Dec. 27, 1783, and terminated by his resignation in 1801. The second was formed May 12, 1804; and terminated by his death, Jan. 23, 1806. A public funeral was decreed to his honour by parliament, and a grant of 40,000*l.* to pay his debts.

ADMINISTRATION OF 1783.

William Pitt, *first lord of the treasury and chancellor of the exchequer.*

Earl Gower, *lord president.*

Duke of Rutland, *privy seal.*

Marquess of Carmarthen and earl Temple, immediately succeeded by lord Sydney, *secretaries.*

Lord Thurlow, *lord chancellor.*

Viscount Howe, *admiralty.*

Duke of Richmond, *ordnance.*

William Wyndham Granville, Henry Dundas, &c.

[Mr. Pitt continued minister until 1801. Many changes in his ministry, of course, occurred in the long period of seventeen years.]

ADMINISTRATION OF 1804.

William Pitt, *first lord of the treasury.*

Lord Eldon, *lord chancellor.*

Duke of Portland, succeeded by lord Sidmouth (late

Mr. Addington), *lord president.*

Earl of Westmorland, *lord privy seal.*

Lord Hawkesbury, lord Harrowby (succeeded by

lord Mulgrave), and earl Camden (succeeded by

viscount Castlereagh), *home, foreign, and colonial secretaries.*

Viscount Melville (succeeded by lord Barham), *admiralty.*

Duke of Montrose, lord Mulgrave, Mr. Dundas, &c.

PITTSBURG LANDING (near Corinth, Tennessee). On Sunday April 6, 1862, a great battle was fought between the American federals under Grant and Prentiss, and the confederates under Albert Sydney Johnston and Beauregard. The latter began the attack and were victorious, but lost their able general Johnston. The federals were reinforced the next day and renewed the attack: the confederates maintained their ground; but soon after retired in good order to Corinth.

PIUS IV. CREED OF. See *Confessions*.

PLACENTIA, a city in North Italy, founded by the Romans about 220 B.C. It suffered in all the convulsions attending the fall of the empire, and the wars of the middle ages. In 1254, it fell under the rule of the family of the Scotti. In 1302 Alberto Scotti was overcome, and Placentia was united to Milan, then ruled by the Visconti. On their extinction in 1447, Placentia revolted, but was taken by Sforza duke of Milan, and treated very cruelly. In 1513 it was given to pope Leo X. In 1545, Paul III. gave it with Parma, as a duchy, to his son Peter Louis Farnese. See *Parma*.

PLAGUE. The plagues of Egypt (1491 B.C.), are described in *Exodus*, chap. ix. &c. The first recorded general plague in all parts of the world occurred 767 B.C. *Petavius*. At Carthage a plague was so terrible that people sacrificed their children to appease the gods, 534 B.C. *Baronius*. At Rome prevailed a desolating plague, carrying off a hundred thousand persons in and round the city, 461 B.C. The plague at Athens, which spread into Egypt and Ethiopia, and caused an awful devastation, 430 B.C., is admirably described by Thucydides. Another which raged in the Greek islands, Egypt, and Syria, and destroyed 2000 persons every day, 188 B.C. *Pliny*.

At Rome, a most awful plague; 10,000 persons perished daily A.D. 80.

Again ravaged the Roman empire, A.D. 167, 169, 180.

Another, in the Roman empire. For some time 5000 persons died daily at Rome, and many towns were entirely depopulated, A.D. 250-265.

In Britain, a plague swept away such multitudes, that the living were scarcely sufficient to bury the dead, A.D. 430.

A dreadful one began in Europe in 558, extended all over Asia and Africa, and it is said did not cease for many years.

At Constantinople, when 200,000 of its inhabitants perished, and in Calabria, Sicily, and Greece, 746-749. In London, 962.

At Chichester, in England, an epidemical disease carried off 34,000 persons, 772. *Will. Malme*.

In Scotland 40,000 persons perished of a pestilence, 954.

In London, a great mortality, 1094; and in Ireland, 1095.

Again, in London: it extended to cattle, fowls, and other domestic animals, 1111. *Holinshed*.

In Ireland: after Christmas this year, Henry II. was forced to quit the country, 1172.

Again, in Ireland, when a prodigious number perished, 1204.

The "Black Death" in Italy, 1340.

A plague raged throughout Europe, causing extensive mortality. Britain and Ireland suffered grievously. In London alone 200 persons were buried daily in the Charterhouse-yard, 1348. (That at Florence described by Boccaccio.)

In Paris and London a dreadful mortality prevailed in 1362 and 1367, and in Ireland in 1370.

A great pestilence in Ireland called the *Fourth*, destroyed a great number of the people, 1383. 30,000 persons perished of a dreadful pestilence in London, 1407.

Again in Ireland, superinduced by a famine: great numbers died 1466; and Dublin was wasted by a plague, 1470.

An awful pestilence at Oxford, 1471; and throughout England, a plague which destroyed more people than the continual wars for the fifteen preceding years, 1478. *Repin: Salmon*.

The awful *Sudor Anglicus*, or sweating sickness, very fatal in London, 1485. *DeLaune*.

The plague in London so dreadful that Henry VII. and his court removed to Calais, 1499-1500. *Stow*.

The sweating sickness (mortal in three hours), in London, 1506; and again in 1517. In most of the capital towns in England half the inhabitants died, and Oxford was depopulated, 9 Hen. VIII. *Stow*.

* William Pitt, the second son of the great earl of Chatham, was born March 28, 1759; became M.P. Jan. 23, 1782; moved for reform in Parliament, May 7, 1782: and became chancellor of the exchequer in 1782.

PLAGUE, *continued.*

Limerick was visited by a plague, when many thousands perished, 1522.
 The sweating sickness again in England, 1528; and in North Germany in 1529; and for the fifth time in England, in 1551.
 30,578 persons perished of the plague in London alone, 1603-1604. It was also fatal in Ireland.
 200,000 perished of a pestilence at Constantinople, in 1611.
 In London a great mortality prevailed, and 35,417 persons perished, 1625.
 In France, a general mortality; at Lyons, 60,000 persons died, 1632.
 The plague brought from Sardinia to Naples (being introduced by a transport with soldiers on board), raged with such violence as to carry off 400,000 of the inhabitants in six months, 1656.
 The GREAT PLAGUE OF LONDON, in 1664-5, which carried off 68,596 persons; some say 100,000.*
 Fires were kept up night and day to purify the air for three days: and it is thought the infection

was not totally destroyed till the great conflagration of 1666.
 60,000 persons perished of the plague at Marseilles and neighbourhood, brought in a ship from the Levant, 1720.
 One of the most awful plagues that ever raged, prevailed in Syria, 1760. *Abbé Mariti*.
 In Persia, a fatal pestilence, which carried off 80,000 of the inhabitants of Bassora, 1773.
 In Egypt, above 800,000 persons died of plague, 1792.
 In Barbary, 3000 died daily; and at Fez 247,000 perished, 1799.
 In Spain and at Gibraltar, immense numbers were carried off by a pestilent disease in 1804 and 1805.
 Again at Gibraltar, an epidemic fever much resembling the plague, caused great mortality, 1823.
 The Asiatic Cholera (see *Cholera*) made its first appearance in England, at Sunderland, Oct. 26, 1831; in Scotland, at Inverloding, Dec. 23, same year; and in Ireland, at Belfast, March 14, 1832.
 The Cholera again visited England, &c. 1848 and 1849. See *Cholera*.

PLANETS. The planet Jupiter was known as a planet to the Chinese and the Chaldeans; to the former, it is said, 3000 B.C.; and correctly inserted in a chart of the heavens made about 600 B.C. and in which 1460 stars are accurately described; this chart is said to be in the imperial library at Paris. The satellites of Jupiter are generally considered to have been discovered by Galileo, 1610; but Janssen, it is affirmed, claimed some acquaintance with them about twenty years before. We now know nine primary planets, termed major: *Mercury, Venus, the Earth, Mars, Jupiter, Saturn, Uranus, Neptune, and Vulcan*; and seventy-six secondary, or minor, situated between the orbits of Mars and Jupiter.†

Uranus, formerly called *Georgium Sidus* and *Herschel*; discovered by W. Herschel (see *Georgium Sidus*) March 13, 1781
Neptune, discovered by Galle (in consequence of the calculations of Le Verrier and Adams, (see *Neptune*) Sept. 23, 1846
Vulcan (between Mercury and the Sun), discovered by M. Lescaubault, a physician, ... March 26, 1859
MINOR PLANETS (according to Mr. G. F. Chambers.)
 1. *Ceres*, discovered by Piazzi (this planet is visible to the naked eye) Jan. 1, 1801
 2. *Pallas*, or *Olbers*, discovered at Bremen by Olbers (see *Pallas*) March 28, 1802
 3. *Juno*, discovered by Harding (see *Juno*) Sept. 1, 1804
 4. *Vesta*, discovered by Olbers (see *Vesta*) March 29, 1807
 5. *Astræa*, by K. C. Hencke Dec. 8, 1845
 6. *Hebe*, by the same July 1, 1847
 7. *Iris*, by J. R. Hind Aug. 13, —

8. *Flora*, by the same Oct. 18, 1847
 9. *Metis*, by A. Graham April 25, 1848
 10. *Hygiea*, by A. De Gasparis April 12, 1849
 11. *Parthenope*, by the same May 11, 1850
 12. *Victoria*, by J. R. Hind Sept. 13, —
 13. *Egeria*, by A. De Gasparis Nov. 2, —
 14. *Irene*, by J. R. Hind May 19, 1851
 15. *Eunomia*, by A. De Gasparis July 29, —
 16. *Psyche*, by the same March 17, 1852
 17. *Thetis*, by R. Luther April 17, —
 18. *Melpomene*, by J. R. Hind June 24, —
 19. *Fortuna*, by the same Aug. 22, —
 20. *Massilia*, by A. De Gasparis Sept. 19, —
 21. *Eutelia*, by H. Goldschmidt Nov. 15, —
 22. *Calliope*, by J. R. Hind Nov. 16, —
 23. *Thalia*, by the same Dec. 15, —
 24. *Themis*, by A. De Gasparis April 5, 1853
 25. *Phocæa*, by M. Chacornac April 6, —
 26. *Proserpine*, by R. Luther May 5, —
 27. *Buterpe*, by J. R. Hind Nov. 8, —
 28. *Bellona*, by R. Luther March 1, 1854

* The following passage is taken from De Foe's History of the Plague (a work of imagination):—"It commenced in December, 1664. In May, June, and July, it had continued with great severity; but in August and September it quickened into dreadful activity, sweeping away 8000 persons in a week. Then it was that the whole British nation wept for the sufferings of the metropolis. In some houses carcases lay waiting for burial; and in others, persons were seen doubled up in their last agonies. In one room were heard dying groans; and in the next the ravings of delirium, mingled with the wailings of relatives and friends, and the apprehensive shrieks of children. Infants passed at once from the womb to the grave. The yet healthy child hung upon the putrid breast of a dead mother; and the nuptial bed was changed into a sepulchre. Some of the affected ran about staggering like drunken men, and fell and expired in the streets; while others calmly laid themselves down, never to rise but at the call of the last trumpet. At length, in the middle of September, more than 12,000 perished in one week; in one night 4000 died; and in the whole, not 68,000, as has been stated, but 100,000 perished of this plague. The hearsees were but dead-carts which continually traversed the streets, while the appalling cry, '*Bring out your dead*,' thrilled through every soul. Then it was that parents, husbands, wives, and children saw all those that were dear to them thrown with a pitchfork into a cart, like the offal of a slaughter-house, to be conveyed without the walls, and flung into one promiscuous heap, without the rites of sepulture, without a coffin, and without a shroud! Some graves were dug so large as to hold a thousand bodies each; and into those huge holes, the living, wrapt in blankets and rags, threw themselves among the dead, in their agonies and delirium. They were often found in this state hugging the flesh of their kindred that had not quite perished. People in the intolerable torment of their swellings, ran wild and mad, laying violent hands upon themselves; and even mothers in their lunacy, murdered their own children. When the carts were insufficient for their office, the houses and streets were rendered tenfold more pestilential by the unburied dead." De Foe.

† The numerical order differs in the lists of English and French astronomers.

PLANTAGENET, HOUSE OF, to which belonged fourteen English kings, from Henry II. 1154, to Richard III. killed at the battle of Bosworth, 1485. Plantagenet seems to have been at first no more than one of those sobriquets or nicknames at that time so common. The first so-called was Fulke Martel, earl of Anjou, in the tenth century.†

PLASSEY, in Bengal, India, the site of a battle fought between the British under Clive, and the Hindoos under Surajah Dowlah, June 23, 1757. The nabob, although at the head of about 68,000 men, was vanquished by 1000 British, and about 2000 sepoys. The victory laid the foundation of our empire in India. See *India*.

PLASTER OF PARIS. Gypsum, sulphate of lime used for moulds, statuary, &c., first found at Montmartre, a village near Paris, whence it obtained its name. The method of taking likenesses by its use was first discovered by Andrea Verrochio, about A.D. 1466.

PLATA, LA. See *Argentine Republic*.

PLATÆA (Boeotia, N. Greece), site of the battle between Mardonius commander of the army of Xerxes of Persia, and Pausanias the Lacedæmonian and the Athenians, Sept. 22, 479 B.C.; the same day as the battle of Mycale. The Persian army consisted of 300,000 men, of whom scarce 3000 escaped with their lives by flight. The Grecian army, about 110,000, lost but few men. The plunder which the Greeks obtained was immense, and Greece was henceforth delivered from the fear of Persian invasions. Platea was destroyed by the Thebans, 374 B.C.

PLATE. The earliest use of plate as an article of domestic luxury cannot be precisely traced. In England, plate, with the exception of spoons, was prohibited in public-houses by statute 8 Will. III. 1696. The celebrated Plate Act passed in May 1756. This act was repealed in 1780. The act laying a duty upon plate passed in 1784. See *Goldsmiths' Company*. By 17 & 18 Vict. c. 96 (1854), gold wares were allowed to be manufactured at a lower standard; but a later act excepted marriage-rings.

PLATING. The art of covering baser metals with a thin plate of silver, either for use or for ornament, said to have been invented by a Birmingham spur-maker, who began with making the branches of a pair of spurs hollow, and filling the hollow with a slender rod of steel. He continued to make the hollow larger, and the iron thicker, till at last he merely coated the iron spur with silver. The invention was quickly applied to other purposes. See *Electro-type*.

PLATINUM, the heaviest of all the metals, except Osmium. The name originated with the Spaniards, it would seem on account of its silvery colour, from the word *Plata*, signifying

* Long invisible, re-discovered by M. Goldschmidt, Sept. 1, 1862. Believed at first to be *Daphne*, No. 41. E. Schubert proved it to be a new planet, named *Melée* in 1862.

† This noble, having contrived the death of his nephew, the earl of Brittany, in order to succeed to the earldom, his confessor sent him, in atonement for the murder, to Jerusalem, attended by only two servants, one of whom was to lead him by a halter to the Holy Sepulchre, the other to strip and whip him there, like a common malefactor. Broom, in French *genet*, in Latin *genista*, being the only tough, pliant shrub in Palestine, the noble criminal was smartly scourged with it, and from this instrument of his chastisement, he was called *Planta-genista*, or Plantagenet. *Skinner* and *Mézeray*.

silver. It was found in the auriferous sand of the river Pinto, in South America. It was unknown in Europe until A.D. 1741, when Don Antonio Ulloa announced its existence in the narrative of his voyage to Peru. *Greig*. In its ore have been found the metals Palladium, Rhodium, Osmium, Iridium, and Ruthenium, (*which see*). In 1859 M. H. Ste Claire Deville made known, in the *Annales de Chimie*, a new method of obtaining platinum from its ore, in great abundance and purity. At the international exhibition of 1862 was shown a mass worth 384*ol.*, weighing 266½ lbs., of a metal hitherto considered infusible, obtained by his process.

PLATONIC PHILOSOPHY, has been the most popular of all systems (see *Philosophy*). Plato's dialogues have been termed, "Philosophy backed by example." He was a disciple of Socrates, 409 B.C. and died 347. The leading feature of his mind was comprehensiveness.

PLATONIC YEAR. The period of time which the equinoxes take to finish their revolution, at the end of which the stars and constellations have the same place with regard to the equinoxes that they had at first. Tycho Brahe says that this year or period requires 25,816 common years to complete it; Ricciolus computes it at 25,920; and Cassini at 24,800; at the end of which time some imagined that there would be a total and natural renovation of the whole creation.

PLATTSBURGH. A British expedition against this place, a town of New York, on Lake Champlain, was designed under general sir George Prevost; but was abandoned after the naval force of England had suffered a defeat in an engagement with the Americans, Sept. 11, 1814, when the British squadron in Lake Champlain was captured. See *United States*.

PLAY-GROUNDS. In 1858 a society was established by the earl of Shaftesbury and other benevolent persons to provide play-grounds for the recreation of adults and the children of the humble classes. Ground was liberally offered by the government, and by the marquess of Westminster and others; and in 1859 an act of parliament was passed to facilitate grants of lands for this purpose, for which part of Smithfield was to be reserved. The scheme has not been successful hitherto.

PLAYS. See *Drama* and *Theatres*.

PLEADINGS. Clothaire held a kind of moveable parliament called *placita*, whence came the word pleas, A.D. 616. *Hénault*. In the early courts of judicature in England, pleadings were made in the Saxon language in 786; and in Norman-French from the period of the conquest in 1066 until 1362. Cromwell ordered all law proceedings to be taken in English in 1650. In English law the pleadings are the mutual statements of the plaintiff's cause of action, and the defendant's ground of defence.

PLEBEIANS. Plebes, the citizens of Rome, distinct from the Patricians. See *Rome*, 494-366 B.C.

PLOTS. See *Conspiracies*.

PLOUGH MONDAY, in January, the first Monday after the Epiphany. It received the appellation from its having been fixed upon by our forefathers, as the day upon which they returned to the duties of agriculture after enjoying the festivities of Christmas. *Ashe*. On Plough Monday, too, the ploughmen in the north country used to draw a plough from door to door and beg plough-money to drink. *Bailey*.

PLUM. We have two native plums: our finer kinds came from Italy and Flanders about 1522. The *Diospyros Lotus*, the date-plum, was brought from Barbary, before A.D. 1596. The Pishamin plum, *Diospyros Virginiana*, from America, before 1629. Formerly damsons, apricots, and peaches went by this name, as raisins do to this day.

PLURALITIES. Clergymen have been restrained from holding more than one benefice by several statutes: the first being 21 Henry VIII. 1529. In 1838 an act was passed prohibiting the holding of more than two benefices except they were at a distance less than ten miles; and the law on this subject was still further amended in 1850 and 1855, provision being made for the amalgamation of neighbouring benefices.

PLURAL NUMBER. See *We*.

PLYMOUTH, a fortified seaport in Devonshire. It was in 1588 the rendezvous of the English fleet of 120 sail under Howard, Drake, &c., which pursued the Spanish Armada. See *Breakwater* and *Dock-yards*.

PLYMOUTH BRETHREN. A body of Christians calling themselves "the Brethren," which first appeared at Plymouth about 1830. In 1851 they had 132 places of worship in England and Wales. They object to national churches as too latitudinarian, and to dissenters as too sectarian. They receive into communion all who confess Christ, and own

the Holy Ghost as his vicar. Their doctrines agree with those of most evangelical Protestant churches, but they recognise no order of ministers.

PNEUMATIC DESPATCH COMPANY propose conveying letters and parcels through pipes by means of atmospheric pressure and a vacuum. Pipes were laid down in Thread-needle-street on Sept. 12, 1860; and on Aug. 20, 1861, successful experiments were performed at Battersea. In Oct. 1862 pipes were being laid down in Camden Town.

PNEUMATICS, the science which treats of the mechanical properties of air and gases. See *Air*.

PODESTÀ (from *potestas*, power), an Italian governor, afterwards a judge; one with supreme authority was appointed at Milan by the emperor Frederick I., when he took the city in 1158.

POET-LAUREAT. Selden could not trace the precise origin of this office.* Chaucer, on his return from abroad assumed the title of poet-laureat: and in the twelfth year of Richard II. 1389, he obtained a grant of an annual allowance of wine. James I. in 1615, granted to his laureat a yearly pension of 100 marks; and in 1630, this stipend was augmented by letters-patent of Charles I. to 100*l.* per annum, with an additional grant of one tierce of Canary Spanish wine, to be taken out of the king's store of wine yearly.

POETS-LAUREAT FROM THE REIGN OF QUEEN ELIZABETH.†

Elizabeth appointed Edmund Spenser, who died	A.D. 1598-9	The rev. Laurence Eusden, died	A.D. 1730
Samuel Daniel, died	1619	Colley Cibber, died	1757
Ben Jonson, died	1637	William Whitehead, died	1785
Sir William Davenant, died	1668	Rev. Dr. Thomas Warton, died	1790
John Dryden: deposed at the revolution	1688	Henry James Pye, died	1813
Thomas Shadwell, died	1692	Dr. Robert Southey, died	March 21, 1843
Nahum Tate, died	1715	William Wordsworth, died	April 23, 1850
Nicholas Rowe, died	1718	Alfred Tennyson (born 1809)	installed 1850
		The PRESENT Poet-Laureat (1862).	

POETRY, the oldest, rarest, and most excellent of the fine arts, and highest species of refined literature. It was the first fixed form of language, and the earliest perpetuation of thought. It existed before music in melody, and before painting in description. *Hazlitt*. The exact period of the invention of poetry is uncertain. In Scriptural history, the sublime song of Moses on the signal deliverance of the Israelites, and their passage through the Red Sea, 1491 B.C., *Exodus* xv., is said to be the most ancient piece of poetry in the world. Orpheus of Thrace is deemed the inventor of poetry (at least in the western part of the world), about 1249 B.C. See *Epics, Odes, &c.*

POICTIERS (W. France), the scene of the battle between Edward the Black Prince and John, king of France, in which the English arms triumphed, Sept. 19, 1356. The standard of France was overthrown, many of her nobility slain, and her king was taken prisoner, and brought to London. *Carte*.

POISONING. A number of Roman ladies formed a conspiracy for poisoning their husbands, which they too fatally carried into effect. A female slave denounced 170 of them to Fabius Maximus, who ordered them to be publicly executed, 331 B.C. It was said that this was the first public knowledge they had of poisoning at Rome.‡ Poisoning was made

* Warton, in his *History of English Poetry*, states that in the reign of Henry III. there was a *Verseificator Regis*, to whom an annual stipend was first paid of one hundred shillings. The first mention of a *Poet Laureat* occurs, we believe, in the reign of Edward IV., when John Kay was laureat; Andrew Bernard was laureat, *temp.* Henry VII.; and John Skelton, *temp.* Henry VIII. Edmund Spenser, as above, was poet-laureat in the reign of Elizabeth. Whitehead was created on the refusal of Gray, Warton on the refusal of Mason, and Southey on the refusal of Scott. Laurence Eusden commenced a series of birth-day and New Year's Odes which continued till the death of Pye, in 1813. We believe that on Southey's appointment the tierce of Canary wine was commuted for 2*l.*

† "At the accession of George I. Rowe was made poet-laureat, I am afraid by the ejection of poor Nahum Tate, who died in the Mint, where he was forced to seek shelter from extreme poverty." *Dr. Johnson*. On the death of Warton its abolition was recommended by Gibbon, whose elegant compliment on the occasion still more forcibly applied on Wordsworth's death, in 1850.—"This is the best time for not filling up the office, when the prince is a man of virtue, and the poet just departed was a man of genius."—*Decline and Fall*, &c., chap. lxx.

‡ A deadly poison freely administered by Italians in the seventeenth century, was called *aqua tofana*, from the name of the woman Tofania, who made and sold it in small flat vials. She carried on this traffic for half a century, and eluded the police; but, on being taken, confessed that she had been a party in poisoning 600 people. Numerous persons were implicated by her, and many of them were publicly executed. All Italy was thrown into a ferment, and many fled, and some persons of distinction, on conviction, were strangled in prison. It appeared to have been chiefly used by married women who were tired of their husbands. Four or six drops were a fatal dose; but the effect was not sudden, and therefore not suspected. It was as clear as water, but the chemists have not agreed about its real composition. A proclamation of the pope described it as aquafortis distilled into arsenic, and others considered it as a solution

petty treason in England, and was punished by boiling to death (of which there are some remarkable instances) 23 Hen. VIII. 1532. See *Boiling to Death*. The frequency of cases of poisoning by means of arsenic, in England, caused the British legislature to pass a law rendering the sale of arsenic, (which until then, could be obtained without check by any person, from druggists' and apothecaries' shops) a matter of difficulty. This act regulated the sale of arsenic, and was passed 14 Vict. c. 13, June 6, 1851.* Two recent remarkable cases of poisoning are those for which W. Palmer was executed in 1856, and Miss M. Smith tried in 1857 (see *Trials*). Catherine Wilson a noted poisoner was executed on Oct. 20, 1862. A committee of the commons on the subject of the sale of poisons was appointed in 1857, but no legislation has yet ensued.

POITOU, an ancient province W. France, part of the dowry of Eleanor, queen of Henry II. of England. It partook of the fortunes of Aquitaine, *which see*.

POLAND (N.E. Europe), part of ancient Sarmatia. It is said to have become a duchy under Lechus or Lesko I. A.D. 550; and a kingdom under Boleslaus, about A.D. 992. The natives belong to the great Slavonic family. The word Pole is not older than the 10th century. Population of the kingdom of Poland in 1857 was 4,789,379.

of crystallised arsenic. Between 1666 and 1676 the marchioness de Brinvilliers poisoned her father and two brothers and many others. She was executed July 16, 1676.

* Nov. 1858, 17 persons died at Bradford through eating sweetmeats in which arsenic had been mixed by mistake. Mr. Hodgson, a chemist, was tried for homicide, but was acquitted—though guilty of culpable negligence.

† On Feb. 22, 1846, an Austrian force under general Collin, which had entered Cracow on the approach of armed bands of peasantry, was attacked and driven out of the town. A Provisional Government was then proclaimed by the insurgents, and two days afterwards they crossed the Vistula, expecting to be joined by the peasantry of Galicia, who were solicited by the nobles and clergy to strike a blow in the cause of liberty. The Austrian government, in order to prevent this junction, excited in the peasantry a suspicion of the motives of the nobles, and offered a reward for every noble delivered up, alive or dead: a general massacre of the nobility and clergy in the circle of Tarnow followed; the insurgents from Cracow were defeated at Gdow, whence they retreated to Podgorza, a suburb of Cracow; here they were attacked by general Collin, and driven into Cracow on the 27th of February. The forces of the three powers then began to concentrate on Cracow; the people in the town opened negotiations with the Austrians about a surrender, and while these were going on, a Russian corps entered the town without resistance, and soon afterwards the revolution was at an end.

POLAND, *continued.*

The courts of Austria, Russia, and Prussia, revoke the treaty of 1815 which constituted Cracow a free republic, and it is declared Austrian territory Nov. 16, 1846
 [This annexation was protested against by England, France, Sweden, and Turkey.]
 The kingdom of Poland finally made a Russian province May, 1847
 Great popular demonstration in commemoration of the battle of Grochow Feb. 25, 1861
 Six members of the Royal Agricultural Society killed by the military Feb. 27
 Great excitement at their funeral; many citizens put on mourning; an address to the emperor Alexander signed by 60,000 persons; mild conduct of prince Gortschakoff, the governor March 1-7, —
 Mikhanoff, curator of Poland, who had written a circular exciting the peasantry against their lords, quits Warsaw, which is illuminated in consequence March 17, —
 The government promises reforms and the re-establishment of Poland as a separate kingdom; yet abolishes the Agricultural Society, April 7, —
 Great meeting in consequence; which is dispersed by the military (now 32,000 strong); above 100 are killed and wounded April 8, —
 Great agitation in the rural districts; the Russian officials quit Lublin; general Chruleff marches hither April, —
 60,000 soldiers in Poland; reign of terror in Warsaw May, —
 Death of prince Gortschakoff, lieutenant-gen. of Poland May 30, —

New administrative council appointed June, 1861
 Death of prince Adam Czartoryski at Paris, aged 91 July 15, —
 Oppressive regulations issued respecting dress. Fresh disturbances: Warsaw put in a state of siege Oct. —
 Military arrests in churches in Warsaw, they are closed by the priests Oct. 17, —
 The governor, count Lambert, leaves Warsaw Oct. 23, —
 General Gerstenzweig, the military governor, assassinated Oct. 25, —
 Bialobzeski, catholic archbishop of Warsaw, arrested, Nov. 19; tried and condemned to death as a rebel for closing the churches [he died shortly after] Dec. 18, —
 The new archbishop Felinski exhorts the Poles to submission Feb. 15, 1862
 Rigour of the government relaxed; amnesty granted to 89 convicted political prisoners, April 29, —
 The grandduke Constantine, appointed governor, May 28; begins with lenient policy, but his life is attempted by Jaroszynsky, July 3; who is executed Aug. 21, —
 Attempted assassination of Wielopolski, a liberal Pole, president of the council Aug. 26, —
 Count Zamoyiski, an eminent loyal Pole, exiled for presenting to the government the report of a meeting of nobles at Warsaw, for which he had been asked Sept. —
 Telkner, the chief of the secret police, found murdered Nov. 9, —
Soo Cracow, Warsaw, and Russia.

DUKES' AND KINGS OF POLAND.

842. Piastus.
 861. Ziemovitius, his son.
 892. Lesko or Lescus IV.
 921. Ziemomislas, son of Lesko.
 962. Miecislus I. becomes Christian.
 992. Boleslas I. surnamed the Lion-hearted; obtained the title of king from the emperor Otto III.
 1025. Miecislus II.
 1034. Richense or Richsa, his consort, regent; driven from the government.
 1037. [Anarchy.]
 1041. Casimir I. her son, surnamed the Pacific; he had retired to a monastery, but was invited to the throne.
 1058. Boleslas II. styled the Intrepid.
 1062. Ladislas, called the Careless.
 1062. Boleslas III. surnamed Wry-mouth.
 1073. Ladislas II. son of the preceding.
 1073. Boleslas IV. the Curled.
 1073. Miecislus III. the Old; deposed.
 1073. Casimir II. surnamed the Just.
 1080. Lesko V. the White; abdicated.
 1080. Miecislus III. restored.
 1080. Ladislas III.; retired.
 1080. Lesko V. restored; assassinated; succeeded by his son, an infant.
 1087. Boleslas V. surnamed the Heathen.
 1087. Lesko VI. surnamed the Black.
 1087. [Horrid Anarchy.]
 1087. Przemislus, styled king of Poland, governs wisely; assassinated.
 1097. Ladislas I. (IV.) the Short; deposed.
 1102. Wenceslas, king of Bohemia, claims Poland.
 1104. Ladislas IV. the Short.
 1113. Casimir III. the Great, one of the best princes of Poland; encourages the arts, and amends the laws; killed by a fall from his horse.
 1370. Louis, king of Hungary.
 1384. Maria and Hedwiga, daughters of Louis, and her consort, Jagello, duke of Lithuania, by the style of Ladislas V.

1399. Ladislas H. (V.) alone; he united Lithuania to Poland.
 1434. Ladislas III. (VI.) his son; succeeded as king of Hungary, 1440.
 1445. [Interregnum.]
 — Casimir IV.
 1492. John (Albert) I. his son.
 1501. Alexander, prince of Livonia, brother of the preceding.
 1506. Sigismund I. brother of Alexander; obtained the surname of the Great.
 1548. Sigismund II. Augustus, son of the last king; a splendid reign; added Livonia to his kingdom; died 1570. Interregnum.

ELECTED MONARCHS.

1573. Henry de Valois, duke of Anjou, brother to the king of France; afterwards succeeded to the French throne.
 1575. Stephen Bathori, prince of Transylvania; established the Cossacks as a militia.
 1586. [Interregnum.]
 1587. Sigismund III. son of the king of Sweden, to the exclusion of Maximilian of Austria, elected by the nobles.
 1632. Ladislas IV. (VII.) Vasa, son of Sigismund III.; succeeded by his brother.
 1649. John II. or Casimir V.; abdicated, and retired to France, where he died in 1672.
 1668. [Interregnum.]
 1668. Michael-Koributh-Wiesnowski: in this reign the Cossacks join the Turks, and ravage Poland.
 1674. John III. Sobieski; the last independent king; illustrious for victories over the Cossacks, Turks, and Tartars.
 1697. [Interregnum.]
 — Frederick-Augustus I., son of John-George, elector of Saxony; and elector in 1694, deprived of his crown.
 1704. Stanislas I. (Lezinski); forced to retire from his kingdom.

POLAND, *continued.*

1709. Frederick-Augustus again.

1733. Frederick-Augustus II. son of the preceding sovereign.

1763. [Interregnum.]

1764. Stanislaus II. Augustus Poniatowski, resigned his sovereignty, Nov. 25, 1795; died at St. Petersburg, a state prisoner, Feb. 12, 1798.

POLAR CLOCK. An optical apparatus invented by professor Wheatstone (about 1849), whereby the hour of the day is found by means of the polarization of light.

POLAR REGIONS. See *North-West Passage*, and *South Pole*.

POLE STAR, OR POLAR STAR. A star of the second magnitude, the last in the tail of the constellation called the *Little Bear*; its nearness to the North Pole causes it never to set to those in the northern hemisphere, and therefore it is called the seaman's guide. Two stars in the constellation *Ursa Major*, or Great Bear, are called *pointers* to the Polar star. The discovery of the Pole star is ascribed by the Chinese to their emperor Hong Ti, the grandson (they say) of Noah, who reigned and flourished 1970 B.C. *Univ. Hist.*

POLICE. That of London has been extended and regulated at various periods. Its jurisdiction was extended 27 Eliz. 1585, and 16 Chas I. 1640; and the system improved by various acts in subsequent reigns. The London police grew out of the London watch, instituted about 1253. Police statutes 5, 11, 32, and 54 Geo. III. The magistracy at Bow-street has been long established. **POLICE OFFICERS.** The jurisdiction of twenty-one magistrates, three to preside in each of the seven divisional offices, commenced Aug. 1, 1792. The Thames police was established in 1798. The London police was remodelled by Mr. (afterwards sir Robert) Peel, by statute 10 Geo. IV. June 19, 1829, and commenced duty Sept. 29, following. The London Police Improvement acts passed 3 Vict. 1839, 4 Vict. 1840, which were amended by 19 & 20 Vict. c. 2, 1856. In 1857 the total expenditure was 445,212*l.* for the Metropolitan police, consisting of 17 superintendents, 140 inspectors, 630 sergeants, and 5296 constables. The total efficient police force in England and Wales, exclusive of the Metropolis, in Sept. 1859 was 11,309. See *Constabulary*. Division X. was established to attend the International Exhibition in 1862.

POLITICAL ECONOMY, the science which has for its object the improvement of the condition of mankind, and the promotion of civilisation, wealth, and happiness. Its history in this country may be dated from the publication of Dr. Adam Smith's "Wealth of Nations," 1776. The works of Mill and McCulloch are justly celebrated. A professorship of Political Economy was established at Oxford, by Mr. Henry Drummond, M.P., in 1825; and at Cambridge, by the University, in 1828.

POLITICAL UNIONS were formed in England in 1831 to carry the Reform Bill: the most important was that at Birmingham.

POLITICIANS. A politician is described as a man well versed in policy, or the well regulating and governing of a state or kingdom; a wise and cunning man. A man of artifice; one of deep contrivance. *South.* The term was first used in France about A.D. 1569. *Hénault.* A new faction appeared, known by the name of Politicians, headed by the duc d'Alençon and the Montmorencies, and strengthened by the accession of the Huguenots, in 1574. The duke was arrested, and the Montmorencies sent to the Bastille. *Idem.*

POLL-ACT. An iniquitous act passed in Ireland by the Junto of the Pale, putting a price upon the heads of certain of the ancient Irish; the earl of Desmond being then deputy, 5 Edward IV. 1465. This act endured for a number of years. For particulars see NOTE to article *Ireland*. Numbers of the Irish suffered under this act. *Scutty.*

POLL-TAX, OR CAPITATION TAX, existed among the ancient Romans. It was first levied in England in 1379; and occasioned the rebellion of Wat Tyler (see *Tyler*), 1381. It was again levied in 1513. By the 18th Charles II. every subject was assessed by the head, viz.—a duke 100*l.*, a marquis 80*l.*, a baronet 30*l.*, a knight 20*l.*, an esquire 10*l.*, and every single private person 12*d.*; 1667. This grievous impost was abolished by William III. at the period of the Revolution.

POLOTSK (Russia). The French under marshal Oudinot were here defeated by the Russians under general Wittgenstein, July 30 and 31, 1812. The same armies contending the next day, the Russians were defeated. After several actions of less note, in which the advantage was sometimes on one, sometimes on the other side, Polotsk was stormed by the Russians, and retaken, Oct. 1812.

POLYGAMY, &c. Most of the early nations of the world permitted polygamy. In Media, it was a reproach to a man to have less than seven wives. Among the Romans, Marc Antony

is mentioned as the first who took two wives; and the practice became frequent until forbidden by Arcadius, A.D. 393. The emperor Charles V. punished this offence with death. In England, by statute 1 James I. 1603, it was made felony, but with benefit of clergy. This offence was punished with transportation, but now by imprisonment or penal servitude. It is permitted by the Mahometans and Mormonites. See *Marriages*. POLYANDRY (where one woman has several husbands) is permitted in some eastern countries, the children having equal rights.

POLYGLOT. The term is derived from two Greek words denoting "many languages," and is chiefly applied to editions of the Bible in several languages.

The Complutensian Polyglot, in six vols. folio, was printed at Alcala (Complutensis) in Spain, A.D. 1502-17; the first edition published in 1522, at the expense of the celebrated cardinal Ximenes, costing 250,000 ducats. Six hundred copies of it were printed; three on vellum. Count Mac Carthy, of Toulouse, paid 483*l.* for one of these copies at the Pinelli sale.

The second Polyglot was printed at Antwerp, by

Montanus, 8 vols. folio, in 1559-72, at the expense of Philip II. of Spain.

The third was printed at Paris, by Le Jay, in 10 vols. folio, 1628-45.

The fourth, and most complete, in London, edited by Bryan Walton, was published in 6 vols. folio, 1654-7.

Copies of all four are in the library of the British and Foreign Bible Society.

POLYNESIA, a name recently given to the isles in the great Pacific Ocean.

POLYPES (*many-footed*), animals, also named *Hydræ*, on account of their property of reproducing themselves when cut in pieces, every part soon becoming a perfect animal; first discovered by Leeuwenhoek, and described by him in the *Philosophical Trans.* 1703. The polypes are of the order *Zoophytes*; they partake of the animal and vegetable nature, and therefore are justly placed as the link which joins the animal to the vegetable world.

POLYTECHNIC INSTITUTION, ROYAL, Regent-street, London, was erected by Thompson in 1838, and enlarged in 1848. It contains a hall of manufactures with machines worked by steam-power, lecture theatres, &c., a diving-bell, electric machine, &c. *Timbs*. The institution did not prosper commercially, and its decline was hastened by the fall of a staircase on Jan. 3, 1859, when one person was killed, and many injured. The institution was closed in May 1859, but was re-opened by a new company, on Nov. 12, 1860.

POMEGRANATE TREE (*Punica Granatum*) was brought to England from Spain before 1584. It originally came from Spanish America.

POMERANIA, a Prussian province, N. Germany, was held by the Poles, A.D. 980, and by Denmark, 1210; made an independent duchy, 1479; and divided between Sweden and Brandenburg, 1648. The Swedish part was ceded to Prussia in 1815.

POMFRET or **PONTEFRAC** (S. York). At the castle (built A.D. 1069), Richard II. was confined and murdered, Feb. 10. Henry IV. by whom he was deposed, wishing for his death, an assassin, attended by eight followers, rushed into the king's apartment. He wrested a pole-axe from one of the murderers, and soon laid four of their number dead at his feet, but was at length overpowered and slain. Some writers assert that Richard escaped and died in Scotland. In this castle also, the earl Rivers, lord Gray, sir Thomas Vaughan, and sir Richard Haut or Hause were executed, or rather murdered, by order of the duke of Gloucester, then protector of England (afterwards Richard III.), June 13-26, 1483.

POMPEII (S. Italy), an ancient city of Campania, was partly demolished by an earthquake, A.D. 63. It was afterwards rebuilt, but was swallowed up by an awful eruption of Vesuvius, accompanied by an earthquake, on the night of the 24th of August, A.D. 79. Many of the principal citizens happened at the time to be assembled at a theatre where public games were exhibited. The ashes buried the whole city, and covered the surrounding country. After a lapse of fifteen centuries, a countryman, as he was turning up the ground, accidentally found a bronze figure; and this discovery attracting the attention of the learned, further search brought numerous other objects to light, and at length the city was once more clear on by the sun. The part first cleared was supposed to be the main street, A.D. 1750. The kings of Naples have greatly aided in uncovering Pompeii.

POMPEY'S PILLAR, stands about three-quarters of a mile from Alexandria, between the city and the lake Maryoutis. The shaft is fluted, and the capital ornamented with palm-leaves; the whole, which is highly polished, composed of three pieces, and of the Corinthian order. The column measures, according to some, 61 feet; and others 141, and even 160 feet; but of its origin, name, use, and age, nothing is certain.

* It is generally believed that the column has no reference to Pompey, to whom a mark of honour was, nevertheless, set up somewhere about this part. One supposes the edifice was dedicated to Vespasian,

PONDICHERY (S.E. India), formerly the capital of French India, and first settled by the French in 1674. It was taken from them by the Dutch in 1693, and was besieged by the English in 1748. It was taken by the English in Jan. 1761, and was restored in 1763; again taken Oct. 1778, and restored in 1783. Pondicherry was captured by the British, Aug. 23, 1793, and in 1803; but was restored in 1815.

PONTIFFS (Latin *Pontifices*), the highest Roman sacerdotal order established by Numa. The college first consisted of 4 patricians; to these 4 plebeians were afterwards added. Sylla increased the number to 15 (8 *maiores*, 7 *minores*). The chief was called the Pontifex Maximus. T. Coruncanus, a plebeian, obtained this office, 254 B.C.

PONTUS, a kingdom in Asia Minor. The early history of this country (which seems to have been but a portion of Cappadocia, and received its name from its vicinity to the *Pontus Euxinus*) is very obscure. Artabazus was made king of Pontus by Darius Hystaspes. His successors were little more than satraps or lieutenants of the kings of Persia, and are scarcely known even by name.

Artabazus made king of Pontus by Darius Hystaspes	B.C. 487
Reign of Mithridates I.	383
Ariobarzanes invades Pontus	363
Mithridates II. recovers it	336
Mithridates III. reigns	301
Ariobarzanes II. reigns	266
Mithridates IV. is besieged in his capital by the Gauls, &c.	252
Mithridates makes an unsuccessful attack upon the free city of Sinope, and is obliged to raise the siege by the Rhodians	219
Reign of Pharnaces, 100; he takes Sinope, and makes it the capital of his kingdom	183
Reign of Mithridates V.	157
He is murdered in the midst of his court	123
Mithridates VI. surnamed the Great, or Eupator, receives the diadem at 12 years of age	—
Marries Laodice, his own sister	115
She attempts to poison him; he puts her and her accomplices to death	112
Mithridates makes a glorious campaign; conquers Scythia, Bosphorus, Colchis, and other countries	87
He enters Cappadocia	97
His war with Rome	89
Tigranes ravages Cappadocia	86

Mithridates enters Bithynia, and makes himself master of many Roman provinces, and puts 80,000 Romans to death	B.C. 86
Archelaus defeated by Sylla, at Chaeronea; 100,000 Cappadocians slain	—
Victories and conquests of Mithridates up to this time	74
The fleet of Mithridates defeats that under Lucullus, in two battles	73
Mithridates defeated by Lucullus	69
Mithridates defeats Fabius	68
But is defeated by Pompey	66
Mithridates stabs himself, and dies	63
Reign of Pharnaces	—
Battle of Zela (see <i>Zela</i>); Pharnaces defeated by Caesar	47
Darius reigns	39
Polemon, son of Zeno, reigns	36
Polemon II. succeeds his father	A.D. 33
Mithridates VII. reigns	40
Pontus afterwards became a Roman province, under the emperors.	—
Alexis Commenus founded a new empire of the Greeks at Trebisond, in this country, A.D. 1204, which continued till the Turks destroyed it, in 1459.	—

POOR KNIGHTS OF WINDSOR. Instituted by Henry VIII. in his testament, 1546-7. Their original number was thirteen, but the knights were subsequently increased to twenty-eight; and the institution underwent modifications from time to time. King William IV. changed the name by which these knights had been till then known, and they were designated "Military Knights of Windsor," in consequence of their having all held commissions in the army, Sept. 1833. The "Naval Knights of Windsor" are maintained on a distinct foundation, under the bequest of Samuel Travers.

POOR LAWS. The poor of England till the time of Henry VIII. subsisted as the poor of Ireland until 1838, entirely upon private benevolence. By statute 23 Edw. III. 1349, it was enacted that none should give alms to a beggar able to work. By the common law, the poor were to be sustained by "parsons, rectors of the church, and parishioners, so that none should die for default of sustenance;" and by 15 Rich. II. impropriators were obliged to distribute a yearly sum to the poor. But no compulsory law was enacted till the 27th Hen. VIII. 1535. The origin of the present system of poor laws is referred to the 43rd of Elizabeth, 1601.

Poor Law Amendment bill passed 1834; amended in 1836, 1838, 1846, and 1847.
 Poor Law (Ireland) act passed 1838; amended 1839.
 Poor Law (Ireland) Rate in Aid act passed in 1849.
 In Scotland, in the year ending May 1851, the number relieved was 141,870, at an average cost of *2l. 2s. 5d.* and the expenditure was 535,042.
 In Ireland, the poor's rate for the year ending Sept. 1851, was 1,101,878*l.*
 A Poor Law system established in Scotland, 1845.

An agitation for the equalization of poor rates throughout the kingdom began in 1837.
 The *Times* draws attention to the condition of the *houseless poor* in London, which led to measures for their relief, Dec. 1854.
 Laws respecting removal of the poor amended in 1848.
 Union Relief act passed to enable certain unions to obtain temporary aid on account of the distress in Lancashire through suspension of cotton manufactures 1862.

another to Severus; and Mr. Clarke, from a half-effaced inscription on the base, discovered that Adrian is the person honoured; while many assert, from the same inscription, that it is dedicated to Diocletian Augustus, most adorable emperor, tutelary deity of Alexandria.

POPE (from the Greek *Pappas*, and *Papa*, a father or grandfather), considered by Romanists to be the visible chief of the church, the vicar of Jesus Christ, and the successor of St. Peter. This title was originally given to all bishops. It was first adopted by Hyginus, A.D. 139; and pope Beniface III. induced Phocas emperor of the East, to confine it to the prelates of Rome, 606. By the connivance of Phocas also, the pope's supremacy over the Christian Church was established. See *Italy, Reformation*, and *Rome, Modern*.

The custom of kissing the pope's toe introduced, A.D. 708	his prerogative of making and unmaking kings†	A.D. 1191
Adrian I. caused money to be coined with his name 780	The pope collected the tenths of the whole kingdom of England	1226
Sergius II. the first pope who changed his name on his election; some contend that it was Sergius I. and others John XII. or XIII. See <i>Names</i> .	The papal seat was removed for seventy years to Avignon in France	1308

BISHOPS AND POPES OF ROME.

42. St. PETER: (said by very doubtful tradition to have been the first bishop of Rome, and to have been crucified, head downwards, in 66.)	97. St. Clement: abdicated.
** St. Clement (Clemens Romanus); according to Tertullian.	100. St. Evaristus: martyred.
66. St. Linus: † martyred.	109. St. Alexander: martyred.
73. St. Anacletus: martyred.	119. St. Sixtus: martyred.
	127. St. Telesphorus: martyred.
	139. St. Hyginus: the first who called himself <i>pope</i> .
	142. St. Pius: martyred.

* "When Louis, king of France, and Henry II. of England, met pope Alexander III. at the castle of Toul, on the Loire, they both dismounted to receive him, and holding each of them one of the reins of his bride, walked on foot by his side, and conducted him in that submissive manner into the castle." *Hume*

† In the eleventh century the power of the pontiff of Rome seems to have reached its utmost height. Gregory VII. assumed the exclusive title of Pope, which till then had been common to other bishops; and his successors carried their pretensions so far as to hold themselves out as lords of the universe, arbiters of the fate of empires, and supreme rulers of the kings and princes of the earth. In this character they proceeded to dispose of kingdoms, and to loose subjects from their allegiance, as is remarkably instanced in the history of John, king of England. At length they affirmed the whole earth to be their property, as well where Christianity had been propagated, as where it had not; and therefore, on the discovery of the East and West Indies and America, Alexander VI., in 1493, granted to the Portuguese a right to all the countries lying to the eastward, and to the Spaniards all those westward of Cape Non, in Africa, which they might respectively be able to conquer. They finally pretended to be lords of the future world also; and by licences, pardons, dispensations, and indulgences, which they sold to the best bidders, to have a power of restraining, and in some instances of subverting, even the Divine justice itself. *Aspin: Lives of the Popes*.

‡ St. Linus is set down in nearly all accounts of popes as the immediate successor of St. Peter; but Tertullian, who was undoubtedly well-informed, maintains that St. Clement succeeded the Apostle. In the first century of the Christian Church, neither the dates of succession, nor the succession of bishops, are reconciled by even the best authorities. Some assert that there were two or three bishops of Rome at the same time.

POPE, *continued.*

157. St. Anicetus.
 168. St. Soterus: martyred under Marcus Antoninus.
 177. St. Eleutherus: opposed the Valentinians.
 193. St. Victor: martyred under Severus.
 202. St. Zephyrinus.
 219. St. Calixtus: martyred.
 222. [The chair vacant.]
 223. St. Urban: beheld in the persecution of Alexander Severus.
 230. St. Pontianus: banished by the emperor Maximin.
 235. St. Anterus: martyred.
 236. St. Fabian: martyred under Decius.
 250. [The chair vacant.]
 251. St. Cornelius: died the next year.
 252. St. Lucius: martyred the year following.
Novatianus: * antipope.
 253. St. Stephen: martyred in the persecution of Valerian.
 257. Sixtus II. (his coadjutor): martyred three days before his faithful disciple St. Laurence, in the persecution of Valerian, 258.
 258. [The chair vacant.]
 259. Dionysius: opposed the heresy of Sabellius.
 269. Felix: martyred; canonised.
 275. Eutychianus: martyred.
 283. Caius: a relative of the emperor Diocletian.
 296. Marcellinus: distinguished by his courage under a severe persecution; canonised.
 304. [The chair vacant.]
 308. Marcellus: banished from Rome by the emperor. Maxentius; canonised.
 310. St. Eusebius: died the same year.
 311. St. Melchisedes: coadjutor to Eusebius.
 314. Silvester.
 336. Marcus or Mark? died the next year.
 337. Julius: of great piety and learning main- tained the cause of St. Athanasius.
 352. Eucherius: banished; and in
 356. *Felix II.*, antipope: placed in the chair by Constans, during the exile of Liberius, on whose return he was driven from it with ignominy.
 [The emperor would have the two popes reign together; but the people cried out, "*One God, one Christ, and one bishop!*"]
 358. Liberius, again: abdicated.
 — Felix became legal pope; but he was made away with by Liberius.
 359. Liberius, again.
 366. Damasus: opposed the Arians: St. Jerome was his secretary.
 384. Siricius: succeeded to the exclusion of Ursicinus.
 398. Anastasius: caused the works of Origen to be proscribed.
 402. Innocent I.
 417. Zosimus: canonised.
 418. Boniface I.: maintained in the pontifical chair by the emperor Honorius, against his rival Eulalius: canonised.
 422. Celestine I.: canonised.
 432. Sixtus III.: suppressed the heresies of Nestorius and Pelagius in the West.
 440. Leo I. the Great: most zealous in his endeavours to extend the papal see: canonised.
 461. St. Hilary.
 468. St. Simplicius.
 483. Felix III.: had a violent dispute with the emperor Zeno respecting the Western Church: canonised.
 492. Gelasius: canonised.
 496. Anastasius II.: endeavoured to bring about a unity between the Eastern and Western Churches: canonised.
 498. Symmachus: canonised.
 514. *Laurentius*: antipope.
 — Hormisdas: canonised.
 523. John I.: thrown into prison, where he died in 526.
 526. Felix IV.: introduced extreme unction as a sacrament: canonised.
 530. Boniface II.—*Dioscorus*.
 533. John II.: opposed the Eutychians and Nestorians.
 535. Agapetus: died the same year.
 536. Silverius: son of pope Hormisdas, who had married before entering into the ecclesiastical state. The empress Theodora violently persecuted him, and procured his banishment into Lycia, making Vigilius his successor.
 537. Vigilius: banished, but restored.
 555. Pelagius I.: endeavoured to reform the manners of the clergy.
 560. John III.: the great ornament of churches.
 573. [The see vacant.]
 574. Benedict I., surnamed Bonosus.
 578. Pelagius II.: died of the plague then desolating Rome.
 590. Gregory the Great, an illustrious patrician: converted the Anglo-Saxons to Christianity.
 604. Sabinianus.
 606 or 607. Boniface III.: died in a few months.
 607 or 608. Boniface IV.
 614 or 615. Deusdedit.
 617 or 618. Boniface V.
 625. Honorus I.
 639. [The see vacant.]
 640. Severinus: died shortly after.
 640. John IV.
 642. Theodorus I.
 649. Martin I.: some say, starved to death; others, died of his sufferings.
 654. Eugenius I.: canonised.
 657. Vitalianus: this pope sent missionaries into England.
 672. Adeodatus, the "Gift of God."
 676. Donnus I.
 678. Agathon.
 682. Leo II.: instituted holy water.
 683. [The see vacant.]
 684. Benedict II.
 685. John V.: ruled with wisdom.
 686. Conon.—*Theodore and Pascal*.
 687. Sergius: "governed wisely."
 701. John VI.
 705. John VII.
 708. Sisinnius: died 20 days after election.
 — Constantine.
 715. Gregory II.: canonised.
 731. Gregory III.: the first pope who sent nuncios to foreign powers.
 741. Zacharias.
 752. Stephen II.: with this pope commenced the temporal power of the Church of Rome.
 757. Paul I.: moderate and pious.
 767. *Constantine Theophylactus*.
 768. Stephen III.
 772. Adrian I.: sanctioned images, in which he was opposed by the kings of England and France.
 795. Leo III.
 816. Stephen IV.: died the next year.
 817. Pascal I.
 824. Eugenius II.
 824. Valentinus.
 — Gregory IV.: pious and learned.
 844. Sergius II.
 847. Leo IV.: defeated the Saracens.
 855. Pope Joan (*which see*) said to have been elected.
 — Benedict III.—*Anastasius*.
 858. Nicholas I., styled the Great.
 867. Adrian II.
 872. John VIII.
 882. Marinus or Martin II.
 884. Adrian III.: died the next year

* The names in *italics* were antipopes.

POPE, *continued.*

885. Stephen V.
 891. Formosus: died detested; his corpse was thrown into the river Tiber.
 896. Boniface VI.: deposed.
 897. Romanus. → *Sergius*.
 — Stephen VI.: strangled in prison.
 898. Theodorus II.: governed 22 days.
 — John IX.
 900. Benedict IV.
 903. Leo V.: driven from his seat a few months after his election, and died in prison.
 — Christopher.
 904. Sergius III.: disgraced his dignity by his vices.
 911. Anastasius III.
 913. Landonius, or Landò.
 914. John X.: resigned, and was stifled by Guy, duke of Fuscany.
 928. Leo VI.: considered an intruder by many Roman Catholic historians.
 929. Stephen VII.
 931. John XI.: imprisoned in the castle of St. Angelo, where he died.
 936. Leo VII.: great in zeal and piety.
 939. Stephen VIII.: "of ferocious character."
 942. Marinus II. or Martin II.
 946. Agapetus II.: of holy life.
 956. John XII., the Infamous: deposed for adultery and cruelty, and murdered.
 953. Leo VIII.: an honour to the chair, though an intruder. — *Buronius*.
 964. Benedict V.: chosen on the death of John XII., but opposed by Leo VIII., who was supported by the emperor Otto: the Roman people were obliged to abandon his cause.
 965. John XIII., elected by the authority of the emperor against the popular will.
 972. Benedict VI.: murdered in prison.
 974. Boniface VII.
 — Donatus II. → *Benedict VII.**
 983. John XIV.
 984. John XV.: died before consecration.
 985. John XVI.
 996. Gregory V. → *John XVII.* was expelled by the emperor, and barbarously used by his rival.
 999. Silvester II.
 1003. John XVII.: legitimate pope, died same year.
 — John XVIII.: abdicated.
 1009. Sergius IV.
 1012. Benedict VIII. → *Gregory*.
 1014. John XIX.
 1013. Benedict IX.: became pope, by purchase, at 12 years of age; expelled.
 1014. Sylvester III.: 3 months.
 — Gregory VI.: deposed. → *Sylvester*.
 1016. Clement II. (the Romanists call *Clemens Romanus* the first Clement): died next year.
 1017. Benedict again: again deposed.
 1018. Damascus II.: died soon after.
 — Leo IX.: canonised.
 1014. [The throne vacant one year.]
 1015. Victor II.
 1017. Stephen IX.
 1018. Benedict X.: expelled.
 — Nicholas II.
 1061. Alexander II.: he raised the papal power. — *Honorius II.*
 1073. Gregory VII. the celebrated Hildebrand. †
 1080. Clement III.
 1085. [The throne vacant one year.]
 1086. Victor III.
 1088. Urban II.: crusades commenced.
 1099. Pascal II.
 1178. Gelasius II.: retired to a monastery. → *Gregory VIII.*
 1119. Calixtus II.
 1124. Honorius II.
 1130. Innocent II. → *Anacletus II.*
 1138. Victor III.

1143. Celestine II.: ruled five months.
 1144. Lucius II.: killed by accident in a popular commotion.
 1145. Eugenius III.: canonised.
 1153. Anastasius IV.: ruled a short time only.
 1154. Adrian IV., or Nicholas Brakespeare, the only Englishman elected pope: born at Abbot's Langley, near St. Alban's. He obliged Frederick I. to prostrate himself before him, kiss his foot, hold his stirrup, and lead the white palfrey on which he rode.
 1159. Alexander III., avenger of the murder of Thomas à Becket. → 1159, *Victor IV.*: 1164, *Pascal III.*: 1168, *Calixtus III.*: 1178, *Innocent III.*
 1181. Lucius III.
 1185. Urban III.
 1187. Gregory VIII.: ruled only two months.
 — Clement III.
 1191. Celestine III.
 1198. Innocent III. (Lothario Conti): excommunicated king John of England.
 1216. Honorius III.: learned and pious.
 1227. Gregory IX.: caused a new crusade to be undertaken.
 1241. Celestine IV.: died 18 days after his election.
 — [The throne vacant 1 year and 7 months.]
 1243. Innocent IV.: gave the red hat to cardinals.
 1254. Alexander IV.
 1261. Urban IV.
 1265. Clement IV., an enlightened Frenchman, previously cardinal and legate to England: discouraged the crusades.
 1268. [The throne vacant 2 years and 9 months.]
 1271. Gregory X.: elected while he was with Edward I. of England in the Holy Land.
 1276. Innocent V.: died shortly after.
 — Adrian V.: legate to England in 1254: died 36 days after election.
 — Vicedominus: died the next day.
 — John XX. or XXI.: died in 8 months.
 1277. Nicholas III.: died in 1280.
 1281. Martin IV.
 1285. Honorius IV.: promoted the crusades.
 1288. Nicholas IV.: endeavoured to stir up the princes of Christendom to a new crusade, but without success.
 1292. [The throne vacant 2 years and 3 months.]
 1294. Celestine V.: resigned from fear.
 — Boniface VIII.: proclaimed that "God had set him over kings and kingdoms;" imprisoned his predecessor, and laid France and Denmark under interdict.
 1303. Benedict XII.: a pious and liberal pontiff; poisoned by some ambitious cardinals a short time after his election.
 1304. [The throne vacant 11 months.]
 1305. Clement V., Bertrand the Goth: removed the papal seat from Rome to Avignon.
 1314. [The throne vacant 2 years and 4 months.]
 1316. John XXII.
 1334. Benedict XII. [*Nicholas V.* at Rome.]
 1342. Clement VI.: a learned prelate, a generous prince, and amiable man.
 1352. Innocent VI.
 1362. Urban V.: illustrious as a patron of learning.
 1370. Gregory XI.: also an eminent protector of learning: he restored the papal chair to Rome.
 SCHISM. → 1378-1447.
 1378. Urban IV.: so severe and cruel that the cardinals chose Robert of Geneva, under the name of *Clement VII.*, which led to great violence.
 1389. Boniface IX.
 1394. Benedict (called *XIII.*): at Avignon
 1404. Innocent VII.: died in 1406.

* The names in *italics* were antipopes.

POPE, *continued.*

1406. *Gregory XII.* Angelo Corario : elected during the schism in the East : *Benedict XIII.* : both popes were deposed, and the schism ended with the election of
 1409. *Alexander V.* : died, supposed by poison.
 1410. *John XXIII.* : elected during the great schism : deposed.
 1417. *Martin V.* Otho Colonna.
 1424. *Clement VIII.*
 1431. *Eugenius IV.* Gabriel Condolmera : deposed by the council of Basil ; and Amadeus of Savoy chosen, as *Felix V.*, in 1439, who resigned 1449.
 1447. *Nicholas V.*
 1455. *Calixtus III.*
 1458. *Pius II.* *Æneas Silvius Piccolomini.*
 1464. *Paul II.* : a noble Venetian.
 1471. *Sixtus IV.*
 1484. *Innocent VIII.*, a noble Genoese.
 1492. *Alexander VI.*, the infamous Roderic Borgia : poisoned at a feast by drinking of a bowl he had prepared for another.
 1503. *Pius III.* Francis Todeschini : 21 days pope.
 — *Julius II.* Julian de la Ruvere.
 1513. *Leo X.* (John de' Medici) : this pope's grant of indulgences for crime led to the Reformation.
 1522. *Adrian VI.*
 1523. *Clement VII.* Julio de' Medici : refused to divorce Catherine of Aragon, and denounced the marriage of Henry VIII. with Anne Boleyn.
 1534. *Paul III.* Alexander Farnese.
 1550. *Julius III.*
 1555. *Marcellus II.* : died soon after election.
 — *Paul IV.* John Peter Caraffa. When queen Elizabeth sent him an ambassador to announce her accession, he haughtily answered "that to the holy see, and not to her, belonged the throne, to which she had no right as being a bastard."
 1559. *Pius IV.*, cardinal de' Medici.
 1566. *Pius V.*
 1572. *Gregory XIII.*, the greatest civilian and canonist of his time : under him the calendar was reformed.
 1585. *Sixtus V.* : an able governor.
 1590. *Urban VII.* : died 12 days after election.
 — *Gregory XIV.* Nicholas Sfondrate.
 1597. *Innocent IX.* : died in two months.
 1592. *Clement VIII.* : learned and just.
 1605. *Leo XI.* : died same month.
 — *Paul V.* Camille Borghese.
 1621. *Gregory XV.* Alexander Ludovisio.
 1623. *Urban VIII.* : gave the title of Eminence to cardinals.
 1644. *Innocent X.* John Baptist Pamphilus.
 1655. *Alexander VII.* Fabio Chigi.
 1667. *Clement IX.*
 1679. *Clement X.* John Baptiste Emile Altieri.
 1676. *Innocent XI.*
 1689. *Alexander VIII.*
 1691. *Innocent XII.* Antonio Pignatelli.
 1700. *Clement XII.* John Francis Albani.
 1721. *Innocent XIII.* Michael Angelo Conti ; the eighth pontiff of his family.
 1724. *Benedict XIII.*, properly so called.
 1730. *Clement XII.*
 1740. *Benedict XIV.*, the amiable Lambertini.
 1758. *Clement XIII.* Charles Rezzonico.
 1769. *Clement XIV.* (the illustrious Ganganelli) : suppressed the Jesuits.
 1774. *Pius VI.* Angelo Braschi, Feb. 15 ; dethroned by Bonaparte : he was expelled from Rome, and deposed in Feb. 1798 ; and died at Valence, Aug. 29, 1799.
 1800. *Pius VII.* Chiaramonte : elected March 13 ; agrees to a concordat with France, July 15, 1801 ; crowns Napoleon, Dec. 2, 1804 ; excommunicates him, June 10, 1809 ; imprisoned, July 6, 1809 ; restored in 1814 ; died, Aug. 20, 1823. (He restored the Jesuits).
 1823. *Leo XII.* Annibal della Ganga, Sept. 28.
 1829. *Pius VIII.* Francis Xavier Castiglioni, March 31.
 1831. *Gregory XVI.* Mauro Capellari, Feb. 2, 1831 : died June 1, 1846.
 1846. *Pius IX.* Giovanni Maria Mastai Ferretti : elected June 16 (born May 13, 1793). The PRESENT (1862) pope. See *Rome*.

POPE JOAN. It is asserted that in the ninth century, a female, named Joan, conceived a violent passion for Felda, a young monk, and, in order to be admitted into his monastery, assumed the male habit. On the death of her lover, she entered on the duties of professor, and, being very learned, was elected pope, when Leo IV. died, in 855. Other scandalous particulars follow ; "yet until the Reformation the tale was repeated and believed without offence." *Gibbon*.

POPIISH PLOTS. See *Gunpowder Plot* and *Oates's Plot*.

POPLAR TREES. The Tacamahac poplar, *Populus Balsamifera*, was brought hither from North America before 1692. The Lombardy poplar was brought from Italy about the year 1758. *Hist. of Plants*.

POPULATION. The population of the world is estimated at 1,301,647,782. See table of the Population of Countries at p. viii. (after the Preface).

Europe	275,806,741	Africa	200,000,000	Australia	1,445,000
Asia	755,000,000	America	67,895,041	Polynesia	1,500,000

POPULATION OF ENGLAND AND WALES.

Estimated in 1377 . . . 2,092,978 | In 1483 4,689,000 | In 1696 5,250,000

PORCELAIN, formed of earth *kaolin*, was made in China in the 2nd century after Christ. Chinese porcelain is mentioned in histories of the 16th century, when it was introduced into England, and eagerly sought after. Through the discovery of the earth kaolin in Saxony, the manufacture at Dresden began in 1700 (see *Dresden*); that at Chelsea began in 1752; at Bow in 1758. The British manufacture was greatly improved by Josiah Wedgwood about 1762; and by Herbert Minton, who died in 1858. The discovery of kaolin in France led to the establishment of the Sèvres manufacture in 1765. The so-called porcelain paper and card were manufactured by De la Rue and others in 1829.

PORT EGMONT, a fine harbour on the N.W. coast of Falkland Islands. Commodore Byron was despatched to found a colony here in 1765. The Falkland Islands were probably seen by Magellan, but Davis is supposed to have been the first who discovered them, in 1592. They were visited by sir Richard Hawkins in 1594. They are most inhospitable.

PORTEOUS MOB. Capt. Porteous, at Edinburgh, on April 15, 1736, commanded the guard at the execution of Wilson, a smuggler, who had, heedless of his own fate, saved the life of a brother criminal, by springing upon the soldiers around them, and by main force keeping them back, while his companion fled, and never afterwards was heard of. The execution of Wilson excited great commiseration, and the spectators pelted the guard with stones. Fearing a rescue, capt. Porteous ordered his men to fire upon the mob, seventeen of whom were killed or wounded. For this he was tried and found guilty of murder, June 22, 1736; but the queen granted him a reprieve (the king being then in Hanover). The people however arose, assembled round the prison at night, broke open its doors, took out Porteous, and dragging him to the Grass-market hanged him on a dyer's sign-post, Sept. 7, 1736. No actor in this scene was ever detected.

PORTER. Dr. Ashe says that this beverage obtained its appellation on account of its having been drunk by porters in the city of London, about 1730.* The number of licensed brewers in 1850, in England, was 2257; in Scotland, 154; and in Ireland, 96—total 2507. London engrosses, it is said, one third of the entire business of the whole of England, and it is remarkable that this business has been drawn of late into the hands chiefly of eight or ten houses of gigantic capitals. Messrs. Whitbread and Co. built a porter cask 65 feet in diameter, 25 feet high, with 56 hoops weighing from one to three tons each—the contents 20,000 barrels. It was four years in building. On Oct. 17, 1814, at Meux's brewhouse two large vats burst, destroying many neighbouring houses. Several lives were lost; and the total loss of porter was estimated at between 8000 and 9000 barrels, Oct. 17, 1814.

PORTERAGE ACT. *Act for regulating the portorage of small parcels, July 1799.

PORT JACKSON (New South Wales), thirteen miles north of Botany Bay, was so named by capt. Cook in 1770. The capes that form its entrance are high, rugged, and perpendicular cliffs; and the harbour is one of the noblest in the world, extending 14 miles in length, with numerous creeks or coves. See *Sydney*.

PORTLAND ADMINISTRATIONS. The first was the celebrated Coalition ministry (*which see*), of which William Henry Cavendish, duke of Portland,† as first lord of the

* The malt liquors previously in use were ale, beer, and twopenny, and it was customary to call for a pint or tankard of half and half,—i.e., half of ale and half of beer; half of ale and half of twopenny; or half of beer and half of twopenny. In the course of time it also became the practice to ask for a pint or tankard of three-thirds, meaning a third of ale, beer, and twopenny; and thus the publican was obliged to go to three casks for a single pint of liquor. To avoid this trouble and waste, a brewer of the name of Harwood conceived the idea of making a liquor which should partake of the united flavours of ale, beer, and twopenny. He did so, and succeeded, calling it entire, or entire butt beer, meaning that it was drawn entirely from one cask or butt; and being a hearty nourishing liquor, it was very suitable for porters and other working people. Hence it obtained its name of porter, and was first retailed at the Blue Last, Curtain Road. *Leigh*.

† Born 1738; became lord chamberlain, 1765; lord lieutenant of Ireland, 1782; premier, 1783; home secretary, 1794; lord president, 1801; premier again, 1807; died, 1809; when Mr. Spencer Perceval became premier.

treasury, was the head. It obtained the name of the "Coalition" ministry, from the remarkable union of Lord North with Mr. Fox. Formed April 5, 1783; dissolved by Mr. Pitt's coming into power, Dec. same year. The duke of Portland became a second time first minister, March 25, 1807.

Earl Camden, *lord president.*

Earl of Westmoreland, *lord privy seal.*

Hon. Spencer Perceval, lord Hawkesbury (after-

wards earl of Liverpool), Mr. Canning, and

viscount Castlereagh (afterwards marquess of Londonderry), *home, foreign, and colonial secretaries.*

Earl Bathurst and Mr. Dundas, *boards of trade and control.*

Lord Mulgrave, *admiralty.*

Earl of Chatham, *ordnance.*

Lord Eldon, *lord chancellor.*

PORTLAND ISLE (off Dorset). Fortified before A.D. 1142. Portland castle was built by Henry VIII. about 1536. Off this peninsula a memorable naval engagement commenced between the English and Dutch, Feb. 18, 1653. The battle continued for three days, and the English destroyed eleven Dutch men-of-war and thirty merchantmen. Van Tromp was admiral of the Dutch, and Blake of the English. — Here is found the noted freestone used for building our finest edifices. The Portland lights were erected 1716 and in 1789. The pier, with nearly half a mile square of land, was washed into the sea in Feb. 1792. Prince Albert laid the first stone of the Portland breakwater, July 25, 1849. A mutiny among the convicts here in Sept. 1858 was promptly suppressed.

PORTLAND or BARBERINI VASE. This beautiful specimen of Greek art (composed of a glass-like substance, with figures and devices, raised on it on white enamel; height 10 inches; diameter in the broadest part, 7; with a handle in each side) was discovered about the middle of the sixteenth century, in a marble sarcophagus in a sepulchre at a place called Monte del Grano, about 2½ miles from Rome. The sepulchre was supposed to have been that of the Roman emperor, Alexander Severus (A.D. 222–235), and his mother Mammæa, and the vase is supposed to have been the cinerary urn of one or other of these royal personages. It was placed in the palace of the Barberini family, at Rome, where it remained till 1770, when it was purchased by sir William Hamilton, from whose possession it passed to that of the duchess of Portland, and in 1810 it was deposited in the British Museum by the duke, who was one of the trustees. There it remained till the 7th February, 1845, when it was smashed to pieces with a stone by a man named William Lloyd. The pieces of the fractured vase were, however, put together afterwards, in a very complete manner, and then repaired. It still exists in the Museum, but is not now shown to the public. Josiah Wedgwood made a mould of this vase, and took from it a number of casts.

PORTO BELLO (S. America), discovered by Columbus, Nov. 2, 1502, was taken by Morgan the buccaneer in 1668; by the British under admiral Vernon, from the Spaniards, Nov. 20, 1739. It was again taken by admiral Vernon, who destroyed the fortifications, in 1742. Before the abolition of the trade by the galleons, in 1748, it was the great mart for the rich commerce of Peru and Chili.

PORTO FERRAJO, capital of Elba (*which see*); built and fortified by Cosmo I. duke of Florence, in 1548. The fortifications were not finished till 1628 when Cosmo II. completed them with great magnificence. *See France.*

PORT PHILLIP (New S. Wales), the original name of the colony of Victoria (*which see*).

PORTRAIT GALLERY. *See National Portrait Gallery.*

PORTREEVE (derived from Saxon words signifying the governor of a port or harbour). The chief magistrate of London was so styled; but Richard I. appointed two bailiffs, and afterwards London had mayors. *Camden.* *See Mayors.*

PORT ROYAL (Jamaica), once a considerable town, was destroyed by an earthquake in June 1692; laid in ashes by a fire in 1702; reduced to ruins by an inundation of the sea in 1722; and destroyed by a hurricane in 1774. After these extraordinary calamities, the custom house and public offices were removed to Kingston. Port Royal was again greatly damaged by fire in 1750; by another awful storm in 1784; and by a devastating fire in July, 1815. This place suffered in the visitation of cholera that afflicted nearly the whole island in 1850.

PORT ROYALISTS. The name popularly given to the learned members of the celebrated convent of the Port Royal des Champs (founded about 1230; and refounded in 1626), who occupied their time there in religious exercises, and in instructing youth, from about 1636 to 1656, when they were expelled by Louis XIV., as Jansenists and heretics. Among the distinguished names connected with Port Royal are those of Lancelot, Pascal, Arnauld, Nicole de Sacy, and Tillemont. The school-books which were published for the use of that institution were greatly esteemed. The establishment was suppressed in 1709.

PORTSMOUTH (Hampshire), the most considerable haven for men-of-war, and the most strongly fortified place in England. The dock, arsenal, and storehouses were established in the reign of Henry VIII. Population in 1851, 72,096; in 1861, 94,546.

The French under d'Annebaut attempted to destroy Portsmouth, but were defeated by viscount Lisle, in the then finest war-ship in the world, the *Great Harry* . . . 1544

Another fire occasioned loss to the amount of 100,000*l.* . . . July 27, 1770
[French perfidy was suspected both times, but there was no actual proof.]
Grand naval mock engagement and parade of the fleet, the king being present, June 22 to 25, 1773, and . . . June 30, 1794
Another great fire occurred . . . Dec. 7, 1776
A great naval review was held near Portsmouth on . . . April 25, 1866

PORTUGAL, the ancient Lusitania. The present name is derived from Porto Callo, the original appellation of the city of Oporto. After a struggle (for nine years under Viriathes, a brave able leader), the Lusitanians finally submitted to the Roman arms about 137 A.C. It underwent the same changes as Spain on the fall of the Roman empire. There are in Portugal two universities, that of Coimbra, founded in 1308, and the smaller one of Evora, founded in 1533. Lisbon has also its royal academy, and the small town of Thomar has an academy of sciences; but in general, literature is at a low ebb in Portugal. The poet Camoens, called the Virgil of his country, and author of the *Lusiad* (1569), translated into English by Mickie, was a native of Lisbon. Population of the kingdom in 1857:—continental, 3,568,895; colonies, 2,759,412.

The British armament quits Portugal, April 28; foreign ministers withdraw . . . May 3, 1828
 Sir John Doyle arrested . . . June 13, —
 Dom Miguel assumes the title of king . . . July 4, —
 He dissolves the three estates . . . July 12, —
 His troops take Madeira . . . Aug. 24, —
 Release of sir John Doyle . . . Sept. 7, —
 The queen Donna Maria arrives in London, Oct. 6; and at Windsor . . . Dec. 22, —
 Dom Miguel's expedition against Terceira defeated . . . Aug. 11, 1829
 Duke of Palmella appointed regent . . . March, 1830
 Dom Pedro arrives in England . . . June 16, 1831
 Insurrection in Portugal, in favour of the queen; more than 300 lives lost . . . Aug. 21, —
 Dom Pedro's expedition sails from Belle-isle, Feb. 9; at Terceira he proclaims himself regent of Portugal, April 2; and takes Oporto, July 8, 1832
 The Miguelites attack Oporto; and are defeated with considerable loss on both sides, Sept. 19, Mount Cavello taken . . . April 9, 1833
 Admiral Napier takes Dom Miguel's squadron off Cape St. Vincent . . . July 2, —
 Lisbon is evacuated by the duke of Cadaval's army; the queen proclaimed . . . July 24, —
 After various conflicts Dom Miguel capitulates to the Pedroite forces, and Santarem surrenders . . . May 26, 1834
 Dom Miguel is permitted to leave the country unmolested, and he embarks at Evora for Genoa . . . May 31, —
 Massacres take place at Lisbon . . . June 9, —
 The Cortes declare the queen to be of age, Sept. 15, —
 Dom Pedro dies . . . Sept. 21, —
 Oporto wine company abolished . . . —
 Prince Augustus of Portugal (duke of Leuchtenberg), just married to the queen, dies, March 28, 1835
 The queen marries prince Ferdinand of Saxe Coburg . . . April 9, 1836
 Revolution at Lisbon . . . Aug. 9, —
 Another outbreak there . . . Nov. 3, —
 The duke of Terceira attempts to restore Dom Pedro's charter . . . Aug. 18, 1837
 He and Saldanha fail in the attempt, and embark for England . . . Sept. 18, —
 Oporto wine company re-established . . . April 7, 1838
 The northern provinces in a state of insurrection about this time . . . April 20, 1846
 The duke of Palmella resigns his ministry, Oct. 31, —
 Action at Evora, the queen's troops defeat the insurgent forces . . . Oct. 31, —
 British squadron under adm. Parker arrives in the Tagus, at the queen's request . . . Oct. 31, —
 Palmella banished . . . Nov. 26, —

Marquess of Saldanha defeats count Bornfin at Torres Vedras . . . Dec. 22, 1846
 The insurgents enter Oporto . . . Jan. 7, 1847
 London conference, by which England, France, and Spain determine to assist the queen of Portugal to terminate the civil war . . . May 21, —
 Submission of Sa de Bandeira to the queen, June 11, —
 A Spanish force enters Oporto, and the Junta capitulates . . . June 26, —
 An American squadron arrives in the Tagus to enforce claims against the Portuguese government . . . June 22, 1850
 Military insurrection, headed by the duke of Saldanha, who being out-stripped in his march on Santarem by the king of Portugal, flees northward . . . April 10, 1851
 Oporto declares for the duke, who had left the city for Vigo to embark for England; but is called back by the insurgents . . . April 24, —
 Saldanha's triumphal entry into Oporto, Apr. 29, The conde de Thomar, prime minister, resigns, and embarks on board a British ship for England, where he arrives . . . May 16, —
 Dom Miguel marries the princess of Lowenstein-Rosenberg . . . Sept. 21, —
 An addition to the Portuguese charter sanctioned by the queen: the prince-royal takes the oath to the constitution . . . July 18, 1852
 Conversion of the public debt . . . Dec. 18, —
 Death of the queen Maria II. . . Nov. 15, 1853
 King-consort recognised as regent . . . Dec. 19, —
 The young king visits England . . . June, 1854
 The slaves on royal domains freed . . . Dec. 30, —
 The king visits France . . . May, 1855
 Inauguration of the king . . . Sept. 16, 1855
 Resignation of Saldanha ministry . . . June 5, 1856
 First Portuguese railway (from Lisbon to Santarem) opened . . . Oct. 26, —
 Fever rages in Lisbon: the king very active in relieving the sufferers . . . Oct. and Nov. 1857
 The French emigrant ship for negroes, *Charles-et-Georges* seized . . . Nov. 29, —
 Anger of the French government: its ultimatum sent, Oct. 13; and ships of war to the Tagus: the vessel restored (see *Charles-et-Georges*) . . . Oct. 25, 1858
 Death of the duke of Terceira, prime minister, April 26; succeeded by the senhor Aguiar, May 2, who resigns . . . July 2, 1860
 Death of the king, Pedro V.; succeeded by his brother the duke of Oporto . . . Nov. 11, 1861
 Death of Don John, the king's brother, Dec. 29, —
 The law of succession altered in favour of the king's sisters . . . Jan. 3, 1862
 The king married to princess Maria Pia of Savoy by proxy, at Turin, Sept. 27; at Lisbon, Oct. 6, —
 Elections: majority for the government, Nov. —

COUNTS AND KINGS OF PORTUGAL.

1093. Henry, count or earl of Portugal.
 1112. Alfonso, his son, and Theresa.
 1128. Alfonso, count of Portugal, alone.
 1139. Alfonso I. declared KING, having obtained a signal victory over a prodigious army of Moors on the plains of Ourique.
 1182. Sancho I., son of Alfonso.
 1215. Alfonso II., surnamed Crassus, or the Fat.
 1223. Sancho II. or the Idle: deposed.
 1248. Alfonso III.
 1279. Denis or Dionysius, styled the Father of his country.
 1325. Alfonso IV., the Brave.
 1357. Peter, the Severe: succeeded by his son,
 1367. Ferdinand I.; succeeded by his natural brother,
 1382. John I., the Bastard, and the Great; married Philippa, daughter of John of Gaunt, duke of Lancaster.

1433. Edward or Duarte.
 1438. Alfonso V., the African.
 1481. John II., whose actions procured him the titles of the Great and the Perfect; succeeded by his cousin,
 1495. Emmanuel, the Fortunate.
 1521. John III., son of Emmanuel; he admitted into his kingdom the religious institution of the Inquisition.
 1557. Sebastian: drowned after the great battle of Alcazarquivir, in Africa, Aug. 4, 1578; when the crown reverted to his great uncle,
 1578. Henry, the Cardinal, son of Emmanuel.
 1580. Anthony, prior of Crato, son of Emmanuel: deposed by Philip II. of Spain, who united Portugal to his other dominions till 1640.
 1640. John IV., duke of BRAGANZA: dispossessed the Spaniards in a bloodless revolution, and was proclaimed king, Dec. 1.

PORTUGAL, *continued.*

1566. Alfonso VI. : deposed in 1668, and his brother and successor Peter made regent : the latter ascended the throne in
 1683. Peter II. : succeeded by his son,
 1706. John V. : succeeded by his son,
 1750. Joseph Emmanuel. The daughter and successor of this prince married his brother, by dispensation from the pope, and they ascended the throne, as
 1777. Maria-Frances-Isabella and Peter III. jointly.
 1786. Maria, alone : this princess afterwards falls into a state of melancholy and derangement ; dies, 1816.
 1792. Regency. John, son of the queen, and afterwards king, declared regent of the kingdom.
 1816. John VI., previously regent. He had withdrawn in 1807, owing to the French invasion of Portugal, to his Brazilian dominions ; but the discontent of his subjects obliged him to return in 1821 ; died in 1826.

1826. Peter IV. (Dom Pedro), son of John VI. : making his election of the empire of Brazil, abdicated the throne of Portugal in favour of his daughter,
 — Maria II. (da Gloria), who became queen at 7 years of age.
 1828. Dom Miguel, brother to Peter IV., usurped the crown, which he retained, amid civil contentions, until 1833.
 1833. Maria II. restored : declared in Sept. 1834 (being then 15) to be of age, and assumed the royal power accordingly : died Nov. 15, 1853 ; succeeded by her son,
 1853. Peter V. (Dom Pedro), born Sept. 16, 1837 ; died Nov. 11, 1861 ; succeeded by his brother,
 1861. Louis I., the PRESENT (1862) king, born Oct. 1, 1838.
His presumptive : his brother, prince Augustus, born Nov. 4, 1847.

POSITIVE PHILOSOPHY * set forth by Auguste Comte, an eminent mathematician, born about 1795 ; died at Paris, 1852.

POSTS. Said to have originated in the regular couriers established by Cyrus, who erected post-houses throughout the kingdom of Persia, about 536 B.C. Augustus was the first who introduced this institution among the Romans, and who employed post-chaises. This was imitated by Charlemagne about A.D. 800. *Ash.* Louis XI. first established post-houses in France owing to his eagerness for news, and they were the first institution of this nature in Europe, 1470. *Hénault.* In England the plan commenced in the reign of Edward IV. 1481, when riders on post-horses went stages of the distance of twenty miles from each other, in order to procure the king the earliest intelligence of the events that passed in the course of the war that had arisen with the Scots. *Gale.* Richard III. improved the system of couriers in 1483. In 1543 similar arrangements existed in England. *Sadler's Letters.* Post communications between London and most towns of England, Scotland, and Ireland, existed in 1635. *Strype.*

POST-OFFICE OF ENGLAND. The first chief postmaster of England was Thomas Randolph, appointed by queen Elizabeth in 1581. James I. appointed Matthew de l'Equer as foreign postmaster ; and Charles I. appointed William Frizell and Thomas Witherings in 1631. A proclamation of Charles I. states in the preamble that "whereas to this time there hath been no certain intercourse between the kingdoms of England and Scotland, the king now commands his postmaster of England for foreign parts to settle a running post or two to run night and day between Edinburgh and London, to go thither and come back again in six days, † 1631. An enlarged office was erected by the parliament in 1643 ; and one more considerable in 1657, with a view "to benefit commerce, convey the public dispatches, and as the best means to discover and prevent many dangerous wicked designs against the commonwealth by the inspection of the correspondence." *Ash.*

The Post-office as at present constituted was founded 12 Charles II. Dec. 27, 1660.
 Cross posts established by Ralph Allen, 1720.
 The mails were first conveyed by coaches, Aug. 2, 1784, when the first mail left London for Bristol. See *Mail Coaches.*
 The mails first conveyed by railway, 1830 ; by the overland route to India
 PENNY POST first set up in London and its suburbs by a Mr. Robert Murray, upholsterer ; in 1681. He assigned his interest in the

undertaking to Mr. Dockwra, a merchant, 1683 ; but on a trial at the King's Bench bar it was adjudged to belong to the duke of York, as a branch of the general post, and was thereupon annexed to the revenue of the crown, 1690. This institution was considerably improved in and around London, and was made a two-penny post, July 1794 *d seq.*
 A penny-post was first set up in Dublin . . . 1774
 Early in 1837, Mr. Rowland Hill ; breached his plan of penny-postage, which was adopted

* It sets aside theology and metaphysics as two merely preliminary stages in life ; and abandons all search after causes and essences of things, and restricts itself to the observation and classification of phenomena and the discovery of their laws. Comte asserted that Europe had now arrived at the third stage of its progress. He aimed at being the founder of a new religion as well as a new philosophy, the "religion of humanity."

† The king also commanded his "postmaster of England for foreign parts" to open a regular communication by running posts between the metropolis and Edinburgh, West Chester, Holyhead, Ireland, Plymouth, Exeter, &c. (Rates of postage—1 letter carried under 80 miles, 2d. ; under 140 miles, 4d. ; above that distance in England, 6d. ; to any part of Scotland, 8d.) Even so late as between 1730 and 1740, the post was only transmitted three days a week between Edinburgh and London ; and the metropolis, on one occasion, *only sent a single letter*, which was for an Edinburgh banker, named Ramsay.

‡ A national testimonial was presented to him, June 17, 1846 ; on Nov. 30, he was appointed secretary to the post office ; and created K.C.B. in 1860.

POST-OFFICE OF ENGLAND, *continued.*

after a full investigation by a Committee of the House of Commons in 1839
 The new postage law, by which the uniform rate of 4d. per letter was tried as an experiment, came into operation Dec. 5, —
 The uniform rate of 1d. per letter of half an ounce weight, &c., commenced Jan. 10, 1840 —
 The stamped postage covers came into use, May 6, —
 Number of letters delivered in the last year of the heavy postage (1839) was 82,470,596, including 6,563,024 franks.
 In 1840, the number was 168,768,344; in 1851, 360,651,187, whereof 36,512,649 were in Scotland, and 35,982,782 were in Ireland.
 The number in 1856 was, England 388 millions; Scotland, 42 millions; Ireland, 48 millions; total, 478 millions; being an increase of 42 per cent. on 1855, and an average of 17 to each person.
 On Feb. 14, 1856, 618,000 letters passed through the general post-office.
 In 1859, 544,796,000 letters were posted in the United Kingdom; being an increase of 42 per cent. on 1858. The average annual number to each person—in England 22; Scotland, 16; Ireland, 7.

In 1860, 564 millions of letters were delivered in the United Kingdom; in 1861, 593 millions.
Book-Post.—On June 5, 1855, a treasury warrant was issued, providing for the carriage by post of books, pamphlets, &c., under certain restrictions—4 oz. for 1d.; 8 oz. for 2d., &c.
Public receptacles for letters before 1840, about 4500.
 In 1860, there were in the United Kingdom, 11,412 post-offices.
 The street *Letter-boxes* were erected in March, 1855. The first one was placed at the corner of Fleet-street and Farringdon-street. There were 1958 in 1860.
 A *Money-Order Office*, set up in 1792, was little used on account of the expense till 1840. In 1839, 188,291 money orders were issued for 313,124l.; in 1861, 7,580,455 orders for 14,616,348l.
 The *Postal Guide* first appeared in 1856; in which year London and the vicinity was divided into districts for postal purposes: viz. East, West, &c. The postmaster-general has issued 8 Annual Reports (for 1854-61).
 The *Post-office Directory* first appeared in 1860.

REVENUE OF THE POST-OFFICE.

1643. It yielded . . .	£5,000	1744. It yielded . . .	£235,492	1835. United Kingdom	£2,353,340
1653. Farmed to John Manley for . . .	10,000	1764. Ditto . . .	432,048	1839. Ditto . . .	2,522,495
1663. Farmed to Daniel O'Neale for . . .	21,500	1790. Ditto . . .	480,074	1840. New rate . . .	471,000
1674. Farmed for . . .	43,000	1800. Ditto . . .	745,313	1845. Net revenue . . .	761,962
1685. It yielded . . .	65,000	1805. Great Britain . . .	1,424,994	1850. Ditto . . .	803,878
1707. Ditto . . .	111,461	1810. Ditto . . .	1,709,065	1855. Ditto . . .	1,137,220
1714. Ditto . . .	145,227	1815. Ditto . . .	1,755,898	1859. Ditto . . .	1,150,960
1723. Ditto . . .	201,805	1820. United Kingdom . . .	2,402,697	1860. Ditto . . .	1,102,479
		1825. Ditto . . .	2,255,239	1861. Ditto . . .	1,161,983
		1830. Ditto . . .	2,301,432		

POST-OFFICES.

The GENERAL POST-OFFICE of London was originally established in Cloak-lane, near Dowgate-hill, whence it was removed to the Black Swan, in Bishopsgate-street. After the great fire of 1666, it was removed to the Two Black-Pillars in Brydges-street, Covent-garden, and afterwards (about 1690) to sir Robert Viner's mansion in Lombard-street. It was transferred to the building in St. Martin's-le-Grand, erected on the site of an ancient college and sanctuary, from designs by R. Smirke, esq., Sept. 23, 1829.

The new Post-office of Dublin opened, Jan. 6, 1818.
 The foundation of a new Post-office at Edinburgh was laid by the prince consort in Oct. 1861.

POST-OFFICE SAVING-BANKS established, 1861; interest 2½ per cent.; government responsible to depositors. The number of these banks and the amount of deposits received on March 31, 1862, were

	Banks.	Deposits.
England . . .	1795	£668,879 10 2
Wales . . .	129	28,392 2 10
Scotland . . .	299	10,237 9 8
Ireland . . .	300	26,064 18 8
The Islands . . .	9	1,679 15 0
	2532	£735,253 16 4
London district . . .		267,329 13 8

POSTMASTERS.

The number of postmasters (2) reduced to 1, 1822.
 The offices of postmaster-general of England and of Ireland united in one person, 1831.

1823. Thomas earl of Chichester.
 1826. Lord Frederick Montague.
 1827. William duke of Manchester.
 1830. Charles duke of Richmond.
 1834. Francis marquess of Conyngham.
 1835. William lord Maryborough.
 — Francis marquess of Conyngham.
 — Thomas earl of Lichfield.
 1841. William viscount Lowther.
 1846. Edward earl of St. Germans.
 — Ulick marquess of Clanricarde.
 1855. George duke of Argyll.
 1858. Charles lord Colchester.
 1859. James earl of Elgin.
 1860. Edward lord Stanley of Alderley (the PRESENT postmaster)

SECRETARIES.

1797. Francis Freeling.
 1836. Wm. L. Maberley.
 1846. Rowland Hill, the PRESENT secretary.

POSTING. Post-chaises were invented by the French, and, according to Grainger, were introduced into this country by Mr. William Tull, son of the well-known writer on Husbandry. Posting was fixed by statute of Edward VI. at one penny per mile, 1548. By a statute, re-establishing the post-office, none but the postmaster or his deputies could furnish post-horses for travellers, 1660, and hence the name. The post-horse duty was imposed in 1779. Post-horse duty yielded, in 1852, in England 128,501l., and in Scotland 16,933l.

POTASSIUM, a most remarkable metal, discovered in 1807 by Humphry Davy, who first succeeded in separating it from potash by means of a powerful voltaic battery, in the

laboratory of the Royal Institution, London; and also the metals *Sodium* from soda, *Calcium* from lime, &c. The alkalis and earths had been previously regarded as simple substances. Potassium ignites on contact with water.

POTATOES, natives of Chili and Peru, were originally brought to England from Santa Fe, in America, by sir John Hawkins, A.D. 1563. Others ascribe their introduction to sir Francis Drake, in 1586; while their general introduction is mentioned by many writers as occurring in 1592. Their first culture in Ireland is referred to sir Walter Raleigh, who had large estates in that country, about Youghal, in the county of Cork. It is said that potatoes were not known in Flanders until 1620. A fine kind of potato was first brought from America by Mr. Howard, who cultivated it at Cardington, near Bedford, 1765; and its culture became general soon after. The failure of the potato crop in Ireland, four successive years from 1845, caused famine among the poor, to which succeeded pestilential disease of which multitudes died; among them many priests and physicians. Parliament voted ten millions sterling in this awful exigency, and several countries of Europe, and the United States of America, forwarded provisions and other succours. See *Ireland*.*

POTIDÆA, a town in Macedonia, a tributary of Athens, against whom it revolted 432 B.C., but submitted in 429. It was taken from the Athenians after three years' siege, by Philip II. of Macedon in 358 B.C.

POTOSI (Peru). Silver mines here were discovered by the Spaniards in 1545; they are in a mountain in the form of a sugar-loaf.

POTSDAM (near Berlin), the Versailles of Prussia. It was made an arsenal in 1721. Here is situated the palace of *Sans Souci*, embellished by Frederic II., which was occupied by Napoleon I. in Oct. 1806. Here also is the new palace, the residence of prince Frederic William and his wife the princess Royal of England, married, Jan. 25, 1838.

POTTERY. Marryatt's History of Pottery and Brongniart's "*Arts Céramiques*" are valuable works. See *Earthenware*, *Porcelain*, &c.

POULTRY. An exhibition of poultry was held in London in January 1853, when nearly 1000 cocks were exhibited. Similar exhibitions have been held at the Crystal Palace since.

POULTRY COMPTER (London), was one of the most noted of the old city prisons. The comptor of Wood-street belonged to the sheriff of London, and was made a prison-house in 1555. This latter and Bread-street comptor were rebuilt in 1667. The Giltspur-street prison was built to supply the place of the old city compters; it was pulled down in 1855. The Poultry chapel was erected on the site of the Poultry comptor, in 1819. *Leigh*.

POUND, from the Latin *Pondus*. The value of the Roman *pondo* is not precisely known, though some suppose it was equivalent to an Attic *mina* or 3l. 4s. 7d. The pound sterling was in Saxon times about A.D. 671, a pound troy of silver, and a shilling was its twentieth part; consequently the latter was three times as large as it is at present. *Peacham*. Our avoirdupois weight pound, came from the French, and contains sixteen ounces; it is in proportion to our troy weight as seventeen to fourteen. See under *Standard*.

POWDERING THE HAIR is said to have taken its rise from some of the ballad-singers at the fair at St. Germain's whitening their heads, to make themselves ridiculous. It became very general about A.D. 1614. In England the hair-powder tax, one guinea for each person, began in May 1795, at which time the practice was at its height. The tax still exists, yielding in England under 4000*l.* per year. It was abolished in Ireland.

POWER-LOOMS. See *Looms* and *Cotton*.

POYNINGS' LAW, so called after sir Edward Poynings, one of the lord deputies of Ireland at the time of its passing, A.D. 1494. By this law all legislation in the Irish parliament was confined to matters first approved of by the king and the English council. This act was repealed together with the English Declaratory act of the 6th of Geo. I. and some other equally obnoxious Irish statutes, April, 1782.

PRÆMONSTRATENSIAN ORDER, founded in 1120 by Norbert, a monk. Its first house in England was founded by Peter de Gousla or Gousel, at Newsham, in Lincolnshire, 1143—*Tanner*; according to others in 1146. The order spread widely through England soon after. The house at Newsham was dedicated to St. Mary and St. Martial. *Lewis*.

PRÆMUNIRE, LAW OF. This law (which obtained its name from the first two words "*Præmoneri*," or "*Præmuniri facias*," "Cause to be forewarned," and which is applied to

* From statistical returns, it appears that the potato crop is so very uncertain that it ought not to be relied on as a staple article of food.

any offence in the way of contempt of the sovereign or his government) derived its origin from the exorbitant power which was exercised in England by the pope. The offence ranked as one against the king, because it consisted of introducing a foreign power into the land, and thereby creating an *imperium in imperio*. The first statute of Præmunire was enacted 35 Edward I. 1306. *Coke*. The church of Rome in the assertion of her supremacy, bestowed most of the bishoprics, abbeys, &c., before they were void, upon favourites, on pretence of providing the church with better qualified successors before the vacancies occurred. To put a stop to these encroachments, Edward III. enacted a statute in 1352. The statute commonly referred to as the statute of Præmunire is the 16th of Richard II. 1392. But several other enactments, of similar object, followed in subsequent reigns.

PRÆTORIAN GUARDS were instituted by the emperor Augustus (13 B.C.): their numbers were enlarged by Tiberius, Vitellius, and their successors. At first supporters of the imperial tyrants they eventually became their masters, actually putting up the imperial diadem for sale (as in A.D. 193 when it was bought by Didius Julianus). They at times committed many atrocities, and were finally disbanded by Constantine, in 312.

PRÆTORS. Magistrates at Rome. The office was instituted 365 B.C., when one prætor only was appointed; but a second was appointed in 252 B.C. One (*prætor urbanus*) administered justice to the citizens, and the other (*prætor peregrinus*) in causes which related to foreigners. In 227 B.C. two more prætors were created to assist the consul in the government of the provinces of Sicily and Sardinia, which had been lately conquered; and two more when Spain was reduced into the form of a Roman province, 197 B.C. Sylla, the dictator, added two more, and Julius Cæsar increased the number to 10, which afterwards became 16. After this, their number fluctuated, being sometimes 18, 16, or 12; till, in the decline of the empire, their dignity decreased, and their numbers were reduced to three.

PRAGA, a suburb of Warsaw, where a most bloody battle was fought, Nov. 5, 1794; 30,000 Poles were butchered by the renowned Russian general Suwarrow. On Feb. 25, 1831, near here, the Poles, commanded by Skrznecki, defeated the Russian army, commanded by general Giesmar, who lost 4000 killed and wounded, 6000 prisoners, and 12 pieces of cannon.

PRAGMATIC SANCTION. An ordinance relating to the church and sometimes state affairs. The ordinances of the kings of France are thus called: in one the rights of the Gallican church were asserted against the usurpation of the pope in the choice of bishops, by Charles VII. in 1438. The Pragmatic Sanction for settling the empire of Germany in the house of Austria, A.D. 1439. Again the emperor Charles VI. published the Pragmatic Sanction, whereby, in default of male issue, his daughters should succeed in preference to the daughters of his brother Joseph I., April 17, 1713; and he settled his dominions on his daughter Maria Theresa, in conformity thereto, 1723. She succeeded in Oct. 1740; but it gave rise to a war, in which most of the powers of Europe were engaged, which lasted till 1748.

PRAGUE, the capital of Bohemia. The old city was founded about A.D. 759; the new city was rebuilt in 1348, by the emperor Charles IV. who made it his capital and erected a university. Prague has suffered much by war. In 1619, the Bohemians elected Frederick V. count Palatine (son-in-law of our James I.) for their king; on Nov. 8, 1620, their army was totally defeated by the Austrians, under Maximilian of Bavaria. The unfortunate king was forced to flee with his queen and children into Holland, leaving all his baggage and money behind him. He was afterwards deprived of his hereditary dominions, and the Protestant interest was ruined in Bohemia. The pusillanimity and inactivity of James I. were severely censured. Prague was taken by the Swedes in 1648, and by the French in 1741; but they were obliged to leave it in 1742. In 1744 it was taken by the king of Prussia; but he was obliged to abandon it in the same year. The great battle of Prague was fought May 6, 1757. In this engagement the Austrians were defeated by prince Henry of Prussia, and their whole camp taken; their illustrious commander, general Braun, was mortally wounded, and the brave Prussian, marshal Schwerin, was killed. After this victory, Prague was besieged by the king of Prussia, but he was soon obliged to raise the siege.—An insurrection in Prague, June, 1848, was suppressed in a few days.

PRÄISE-GOD-BAREBONES' PARLIAMENT. See *Barebones*.

PRASLIN MURDER was perpetrated on the duchesse de Choiseul-Praslin, by her husband, the duc de Praslin, at his own house in Paris, Aug. 17, 1847. She was the only daughter of the celebrated marshal Sebastiani, the mother of nine children, and in her forty-first year. Circumstances were so managed by him as to give it the appearance of being the act of another. During the arrangements for the trial, the duke took poison.

PRAYER-BOOK. See *Common Prayer*.

PRAYERS. "Then began men to call upon the name of the Lord" (*Gen.* iv. 26), 3875 B.C. The mode of praying with the face to the east was instituted by pope Boniface II. A.D. 532. This last custom, which prevailed among the Jews, has been recently adopted in some Protestant places of worship in England. Prayers for the dead were first introduced into the Christian church about A.D. 190. *Eusebius*. Prayers addressed to the Virgin Mary and to the saints were introduced by pope Gregory, A.D. 593.

PRECEDENCE was established in very early ages : and in most of the countries of the East, and of Europe, and was amongst the laws of Justinian. In England the order of precedence was regulated chiefly by two statutes, namely, one passed 31 Henry VIII. 1539, and the other, 1 George I. 1714.

PREDESTINATION, the belief that God hath from all eternity unchangeably appointed whatever comes to pass. This doctrine is the subject of one of the most perplexing controversies that have occurred among mankind. It was taught by the ancient stoics and early Christians ; and Mahomet introduced the doctrine into the Koran. The controversy respecting it in the Christian Church arose in the fifth century, when it was maintained by St. Augustin ; and Lucidus, a priest of Gaul, taught it, A.D. 470. It is defined in the seventeenth article of the Church of England. It is held by *Calvinists* and opposed by *Arminians* (*which see*).

PREROGATIVE COURT. Formerly all wills were proved in it, and all administrations taken, which belong to the archbishop of Canterbury by his prerogative. A judge to decide disputes was appointed by the archbishop. Appeals from this court to the judicial committee of the privy council were instituted in 1830. This court was abolished, and the *Probate Court* established in 1857.

PREROGATIVE, ROYAL. In England the sovereign is the supreme magistrate. It is a maxim that he *can do no wrong*. He is the head of the established church, of the army and navy, and the fountain of office, honour, and privilege, but is subject to the laws, unless exempted by name. The royal prerogatives were greatly exceeded by several despotic sovereigns, such as Elizabeth, James I. and Charles I. Elizabeth used the phrase "We, of our Royal prerogative which we will not have argued or brought in question" (1691). James I. told his parliament "that as it was blasphemy to question what the Almighty could do of His power, so it was sedition to enquire what a king could do by virtue of his prerogative." These extreme doctrines were nullified by the revolution of 1688 ; and the exercise of the prerogative is now virtually subject to parliament. See *Lords*.

PRESBURG, an ancient city in Hungary, where the diets have been held and the kings crowned. On Dec. 26, 1805, a treaty was signed between France and Austria, by which the ancient states of Venice were ceded to Italy ; the principality of Eichstadt, part of the bishopric of Passau, the city of Augsburg, the Tyrol, all the possessions of Austria in Suabia, in Brisgau, and Ortenau, were transferred to the elector of Bavaria, and the duke of Wurtemberg, who, as well as the duke of Baden, were then created kings by Napoleon. The independence of the Helvetic republic was also stipulated.

PRESBYTERIANS * are so called from their maintaining that the government of the church appointed in the New Testament was by Presbyteries, or association of ministers and ruling elders, equal in power, office, and in order. Presbyterianism was established in England in 1648, but abolished at the restoration in 1660. It became the established form of church government in Scotland. Its distinguishing tenets seem to have been first embodied in the formulary of faith said to have been composed by John Knox, in 1560, which was approved by the parliament, and ratified, 1567, and finally settled by an act of the Scottish senate, 1696, afterwards secured by the treaty of union with England in 1707. The first Presbyterian meeting-house in England was established at Wandsworth, Surrey, Nov. 20, 1572.

PRESCOTT (Upper Canada). On Nov. 17, 1838, the Canadian rebels were attacked by the British under major Young, and (on the 18th) by lieutenant-colonel Dundas, who dispersed the insurgents, several of whom were killed, and many taken prisoners, and the remainder surrendered. The troops also suffered considerably.

PRESIDENT OF THE COUNCIL, LORD, the fourth great officer of state, is appointed to this important office by letters-patent, under the great seal, *durante beneplacito*, and, by his office, is to attend the king's royal person, and to manage the debates in council ; to propose matters from the king at the council-table ; and to report to his majesty the resolutions taken thereupon. The council was re-modelled according to a plan by sir William Temple

* "The elders (Greek *presbyterous*) I exhort, who am also an elder (*synpresbyteros*)." 1 Peter v. 1.

in 1679, when Anthony Ashley, earl of Shaftesbury, became lord-president. See *Administrations* and *Privy Council*. PRESIDENT of the United States. See *United States*.

PRESS, LIBERTY OF THE. The *imprimatur* "let it be printed," was much used on the title-pages of books printed in the sixteenth and seventeenth centuries. The liberty of the press was severely restrained, and the number of master-printers in London and Westminster limited by the Star Chamber, 13 Charles I., July 1, 1637. "Disorders in printing" were redressed by the parliament in 1643 and 1649; and by Charles II. in 1662. The censorship of the press (by a licence established in 1655 and 1693) was abandoned in 1695 (6 Will. III.). The celebrated toast, "The liberty of the press: it is like the air we breathe—if we have it not we die," was first given at the Crown and Anchor tavern, at a Whig dinner in 1795. Presses were licensed, and the printer's name required to be placed on both the first and last pages of a book, July, 1799. The severity of the restrictions on the French press was relaxed by M. Persigny, minister of the Interior, in Dec. 1860, but soon restored. The liberty of the press in the United States has been greatly checked during the Civil War, 1861-1862.

PRESS (Newspaper), a journal, published in Dublin, of considerable talent, but of a most revolutionary tendency. It was commenced in Oct. 1797, and the celebrated Arthur O'Connor, and Mr. Emmett, the barrister (whose brother was executed in 1803), and several other conspicuous men were contributors to it: their writings served to inflame the public mind in Ireland, on the eve of the memorable rebellion, which broke out in 1798. The paper was suppressed by a military force, March 6, 1798, and Mr. O'Connor was arrested at Margate, while attempting his escape to France.—The existing weekly Conservative paper the *Press* was first published in May 1853.

PRESSING TO DEATH. A punishment in England, referred to the reign of Henry III. or of Edward I. and on the statute book until the latter part of the last century. A remarkable instance of this death, in England, is the following:—Walter Calverly, of Calverly in Yorkshire, esq., having murdered two of his children, and stabbed his wife in a fit of jealousy, being arraigned for his crime at York assizes, stood mute, and was thereupon pressed to death in the castle, a large iron weight being placed upon his breast, Aug. 5, 1605. *Sew's Chron.* Major Strangways suffered death in a similar manner at Newgate in 1657, for the murder of his brother-in-law, Mr. Fussell.

PRESSING FOR THE SEA SERVICE. See *Impressment*.

PRESTON (Lancashire). A manufacturing town.* Near here Cromwell totally defeated the royalists under sir Marmaduke Langdale, Aug. 17, 1648. Preston was taken in 1715 by the Scotch insurgents, under Forster, who proclaimed king James VII. They were defeated in a battle on Nov. 12, by generals Wills and Carpenter, who with the royal army invested Preston on all sides. The Scots at length laid down their arms, and their nobles and leaders were secured; some of them were shot as deserters, and others were sent to London pinioned and bound together, to intimidate their party.—The stoppage of the cotton manufacture in 1861 and 1862 occasioned great suffering in Preston. The festival termed the Preston guild, said to have been instituted in Saxon times, and to have been kept once in 20 years regularly since 1562, was duly celebrated in Sept. 1862.

PRESTON-PANS, near Edinburgh, the scene of a battle between the Young Pretender, prince Charles Stuart, and his Scotch adherents, and the royal army under sir John Cope, Sept. 21, 1745. The latter was defeated with the loss of 500 men, and was forced to flee at the very first onset. Sir John Cope precipitately galloped from the field of battle to Berwick-upon-Tweed, where he was the first to announce his own discomfiture. His disgrace is perpetuated in a favourite Scottish ballad, called "Johnnie Cope."

PRETENDERS. A name given to the son and grandsons of James II. of England.—The OLD PRETENDER, or Chevalier de St. George, born June 10, 1688, was acknowledged by Louis XIV. as James III. of England, in 1701. He was proclaimed, and his standard set up, at Braemar and Castletown, in Scotland, Sept. 3, 1715; and he landed in Peterhead, in Aberdeenshire, from France, to encourage the rebellion that the earl of Mar and his other adherents had prompted, Dec. 25, same year. This rebellion having been soon suppressed, the Pretender escaped to Montrose (from whence he proceeded to Gravelines), Feb. 4, 1716;

* **PRESTON STRIKE.** In 1853, a great number of strikes took place among the workmen in the north of England. Those at Preston struck for an increase of 10 per cent. on their wages. On Oct. 15, the masters, in consequence, closed forty-nine mills, and 20,000 persons were thrown out of employment, who were mostly maintained for a long time by subscriptions from their fellows. In the week ending Dec. 17, 1853, 14,972 were relieved at the cost of 282ol. 8s. The committee of workmen addressed Lord Palmerston, Nov. 15, 1853, who gave them his advice Dec. 24, following. After many attempts at reconciliation, the strike closed for want of funds, May 1, 1854.

and died at Rome, Dec. 30, 1765.—The YOUNG PRETENDER, Charles-Edward, was born in 1720. He landed in Scotland, and proclaimed his father king, June 1745. He gained the battle of Preston-pans, Sept. 21, 1745, and of Falkirk, Jan. 17, 1746; but was defeated at Culloden, April, 16, same year, and sought safety by flight. He continued wandering among the wilds of Scotland for nearly six months; and as 30,000*l.* were offered for taking him, he was constantly pursued by the British troops, often hemmed round by his enemies, but still rescued by some lucky accident, and at length escaped from the isle of Uist to Morlaix. He died Jan. 31, 1788. His natural daughter assumed the title of duchess of Albany; she died in 1789. His brother, the cardinal York, calling himself Henry IX. of England, born March, 1725, died at Rome in Aug. 1807. See *Scotland*.

PRICES. See *Corn, Bread, and Provisions*. Mr. T. Tooke, in 1838, published a "History of Prices from 1793 to 1856." He was latterly aided by Mr. W. Newmarch.

PRIDE'S PURGE. On Dec. 6, 1648, colonel Pride at the head of two regiments, surrounded the house of parliament, and seizing in the passage forty-one members of the Presbyterian party, sent them to a low room, then called *hell*. Above 160 other members were excluded, and none admitted but the most furious of the independents. This atrocious invasion of parliamentary rights was called *Pride's Purge*, and the privileged members were named the *Rump-parliament*, which lasted till its dismissal by Cromwell April 20, 1653.

PRIEST (derived from *presbyteros*, elder), in the English church the minister who presides over the public worship. In *Gen.* xiv. 18, Melchizedek king of Salem is termed "priest of the most high God." (1913 B.C. See *Hebrews* vii.) The Greek *hiercus*, like the Jewish priest, had a sacrificial character, which idea of the priesthood is still maintained by the Romanists and those who favour their views. Among the Jews, the priests assumed their office at the age of thirty years. The dignity of high or chief priest was fixed in Aaron's family, 1491 B.C. After the captivity of Babylon, the civil government and the crown were superadded to the high priesthood; it was the peculiar privilege of the high priest, that he could be prosecuted in no court but that of the great Sanhedrim. The heathens had their arch-flamen or high priest, like the Christian archbishops.

PRIMER. A book so named from the Romish book of devotions, and formerly set forth or published by authority, as the first book children should publicly learn or read in schools, containing prayers and portions of the scripture. Copies of primers are preserved of so early a date as 1539. *Ashe*. From this early book came the name of the elementary primer made use of in schools. *Idem*. The primer is so named from the Romish book of devotions. *Locke*. Henry VIII. issued a prayer-book termed a primer in 1546.

PRIMOGENITURE, RIGHT OF. A usage brought down from the earliest times. The firstborn in the patriarchal ages had a superiority over his brethren, and in the absence of his father was priest to the family. In England, by the ancient custom of gavel-kind, primogeniture was of no account. It came in with the feudal law, 3 Will. I. 1068. The rights of primogeniture were abolished in France in 1790.

PRINCE EDWARD'S ISLAND (N. America), was discovered by Cabot, in 1497; was finally taken from the French by the British, in 1758; united with Cape Breton as a colony in 1763; but separated in 1768.

PRINCE OF WALES'S ISLAND. See *Penang*.

PRINTED GOODS. The art of calico-printing is of considerable antiquity, and there exist specimens of Egyptian cotton dyed by figured blocks many hundred years old. A similar process has been resorted to even in the Sandwich Islands, where they use a large leaf as a substitute for the block. The copyright of designs was secured by two acts, 2 Vict. cc. 13, 17, passed June, 1839.

PRINTING. Block-printing was practised by the Chinese several centuries before the Christian era. The honour of printing with single types has been appropriated to Mentz, Strasburg, Haarlem, Venice, Rome, Florence, Basle, and Angsburg; but the names of the three first only are entitled to attention. See *Press*.

Adrian Junius awards the honour of the invention to Laurences John Koster of Haarlem, "who printed with blocks, a book of images and letters, *Spectum Humanæ Salvationis*, and compounded an ink more viscous and

tenacious than common ink, which blotted, about
[The leaves of this book being printed on one side only, were afterwards pasted together.]
John Fust established a printing-office at

* In 1859 Mr. Samuel Leigh Sotheby issued an elaborate work compiled by his father and himself entitled "*Principia Typographica*," containing fac-similes, &c. of the block-books of the fifteenth century; and Mr. J. Russell Smith published a fac-simile of the *Biblia Pauperum*, a very early block-book.

PRINTING, *continued.*

- Mentz, and printed the *Tractatus Petri Hispani* 1442
- John Gutenberg invented cut metal types, and used them in printing the earliest edition of the Bible, which was commenced in 1444, and finished in 1460
- Peter Schœffer cast the first metal types in matrices, and was therefore the inventor of COMPLETE PRINTING 1452
- Book of Psalms*, printed by Fust and Schœffer Aug. 14. 1457
- The *Durandi Rationale*, first work printed with cast metal types 1459
- [Printing was introduced into Oxford, about this time. *Collier*. But this statement is discredited by *Dibdin*.]
- A *Living* printed. *Du Fresnoy* 1460
- The first Bible completed. *Idem* —
- Mentz taken and plundered, and the art of printing, in the general ruin, is spread to other towns * *
- The types were uniformly Gothic, or old German (whence our old *English* or *Black Letter*), until Greek characters (quotations only) first used, same year 1465
- Cicero de Officiis* printed by Fust at Mentz —
- Roman characters, first at Rome 1467
- A *Chronicle*, said to have been found in the archbishop of Canterbury's palace (the fact disputed), bearing the date *Oxford* anno 1468
- William Caxton, a mercer of London, set up the first press at Westminster * 1471
- He printed *William Caxton's Recueil of the Hystories of Troy*, by *Raoul le Feuvre*. *Phillips* —
- His first pieces were, *A Treatise on the Game of Chess* and *Tully's Offices* (see below). *Dibdin* 1474
- Ætop's Fables*, printed by Caxton, is supposed to be the first book with its leaves numbered. * *
- Aldus cast the Greek Alphabet, and a Greek book printed *ap. Aldi* 1476
- He introduces the *Italics* * *
- The *Pentateuch*, in Hebrew 1482
- Homer in *folio*, beautifully done at Florence, eclipsing all former printing, by *Demetrius* 1488
- Caxton prints the *Boke of Eneydos* 1490
- Aldus Mauntius begins printing at Venice 1494
- Printing used in Scotland 1509
- The first edition of the *whole Bible* was, strictly speaking, the *Complutensian Polyglot* of cardinal Ximenes (see *Polyglot*) 1517
- The *Liturgy*, the first book printed in Ireland, by Humphrey Powell 1550

- Printing in Irish characters introduced by Nicholas Walsh, chancellor of St. Patrick's 1571
- The first newspaper printed in England (see *Newspapers*) 1588
- First patent granted for printing 1591
- First printing-press improved by William Blaeu, at Amsterdam 1601
- First printing in America, in New England, when the *Freeman's Oath* and an almanack were printed 1639
- First Bible printed in Ireland was at Belfast. *Hardy's Tour* 1704
- First types cast in England by Caslon. *Phillips* 1720
- Stereotype printing practised by William Ged, of Edinburgh about 1730
- The present mode of stereotype invented by Mr. Tillich about 1779
- [Stereotype printing was in use in Holland in the last century. *Phillips*.]
- Logographic* Printing in which words cast in one piece were employed: patented by H. Johnson and Mr. Walter of the *Times*; (soon disused) 1783
- Machine-printing (which see) first suggested by Nicholson 1790
- The Stanhope press invented about 1800; in general use 1806
- Columbian press of Clymer introduced 1814
- Albion press introduced 1816
- The roller, which was a suggestion of Nicholson, introduced —
- Cowper's and Applegarth's rollers 1817
- Printing for the blind (by raised characters) begins 1827
- Type-composing machines*.—By James Young's several numbers of the "Family Herald" were set up, beginning Dec. 17, 1842; *Hattersley's* appeared at the Exhibition of 1862; Hart's was shown at the meeting of the British Association at Cambridge Oct. 6, 1862
- Printing-types electro-faced with copper, about 1850
- Engraved copper-plate electro-faced with iron and nickel 1858
- Miss Emily Faithfull established the Victoria printing-office in Great Coram Street, London, in which female compositors are employed: the "Englishwoman's Journal" printed there Aug. 1861; appointed printer and publisher in ordinary to her Majesty June 1862

[See *Stereotype* and *Nature-Printing*.]

TITLES OF THE EARLIEST BOOKS OF CAXTON AND WYNKYN DE WORDE.

- THE GAME AND PLAYE OF THE CHESSE. * Translated out of the *Freuche* and empyrnted by me William Caxton. *Fynnysshid the last day of Marche the yer of our Lord God a thousand foure hundred and lxxiiij.* HERBERT.
- THE BOKE OF TULLE OF OLDE AGE Emprynted by me simple persone William Caxton into Englysshe as the playis solace and reverence of men growing in to old age the xij day of August the yere of our Lord M. CCC. lxxvj. HERBERT.
- THE POLYCRONYCON conteynynge the Berynges and Dules of many Tynes in eyght Bokes. Imprinted by William Caxton after having somewhat chaunged the rude and olde Englysshe, that is to wete [to wit] certayn Words which in these Dayes be neither vsyd ne vnderstanden. Ended the second day of Juyll at Westmestre the xxij yere of the Regne of Kynge Edward the fourth, and of the Incarnacion of oure

- Lord a thousand four Hundred four Score and tweyne [1482]. DIBDIN'S TYP. ANT.
- THE CRONICLES OF ENGLOND Emprnted by me Wyllyam Caxton thabbey of Westmynstre by london the v day of Juyne the yere of thincarnacion of our lord god! M.CC.CC.LXXX.
- POLYCRONYCON. Ended the thyrtyenth daye of Apryll the tenth yere of the regne of kynge Harry the seuenth And of the Incarnacion of our l.r.d M.CCCCLXXXV. Emprynted by Wynkyn The worde at Westmestre.
- THE HYLLE OF PERFECTION empyrnted at the instance of the reverend religyous fader Tho. Prior of the hous of St. Ann, the order of the charterouse Accomplishsh[d] and fynnyssh[d] at Westmynster the iiii day of Juncueur the yere of our lord Thousande CCC.LXXXVII. And in the xii yere of kynge Henry the vii by me wynkyn de worde. AMES, HERBERT, DIBDIN.

* To the west of the Sanctuary in Westminster Abbey, stood the Eleemosynary or Almonry, where the first printing-press in England was erected in 1471, by William Caxton, encouraged by the learned Thomas Miling, then abbot. He produced "*The Game and Play of Chess*," the first book ever printed in these kingdoms. There is a slight difference about the place in which it was printed, but all agree that it was within the precincts of this religious house. *Leigh*.

† A fac-simile of this book was printed by Mr. Vincent Figgins in 1859.

PRINTING, *continued.*

THE DESCRIPTION OF ENGLONDE Walys Scotland and Irland speaking of the Noblesse and Worthynesse of the same Envysshed and empynted in Flete-strete in the sygne of the Sonne by me Wynkyn de Worde the yere of our lord a. m. cccc and vj. mensis Maytis [mense Maii]. DIBDIN'S TYP. ART.

The Pestycall or Sermons on sondays and holidais taken out of the golden legend empynted at london in Flete-strete at ye sygne of ye Sonne by wynkyn de worde. In the yere of our lord m.ccccc.viii. And ended the xi days of Maye. AMES.

THE LORD'S PRAYER [As printed by Caxton in 1483.] Father our that art in heavens, hallowed be thy name :

thy kingdome come to us : thy will be done in earth as it is in heaven : our every dayes bread give us to day : and forgive us oure trespasses, as we forgive them that trespass against us ; and lead us not in to temptation, but deliver us from all evil sin, amen. LEWIS'S LIFE OF CAXTON.

A PLACARD. [As printed by William Caxton.] If it plesse any man spiritual or temporal to bye any pice of tico or thire comemoracions of Salisburi vse* empynted after the forme of this preset letre whiche ben and truly correct, late him come to westminster in to the almonestye at the reed pale [red pale] and he shall have them good there. DIBDIN'S TYP. ART.

PRINTING-MACHINES. William Nicholson, editor of the *Philosophical Journal*, first projected (1790-1), but M. König first contrived and constructed a working printing-machine, which began with producing *The Times* of Nov. 28, 1814, a memorable day in the annals of typography. In 1815, Mr. E. Cowper applied his inventive mind to the subject.† Since then improvements have been rapid and important ; König's machine printed 1800 an hour on one side ; Cowper's improvements increased this number to 4200. This was raised to 15,000, by Mr. Applegath's machine, which prints *The Times*. Hoe's American machine introduced into London in 1858, prints 20,000 an hour.

PRINTING-PRESS. See under article *Printing*.

PRINTING IN COLOURS was first commenced by the employment of several blocks, to imitate the initial letters in MSS. (for instance, the Mentz Psalter of Fust, A.D. 1457, which has a letter in three colours). Imitations of chiaroscuro soon followed ("Repose in Egypt," engraving on wood, after Louis Cranach, in 1519, in Germany ; others by Ugo da Carpi, in Italy, 1518). J. B. Jackson (1720-1754) attempted, without success, to imitate water-colour drawings, and to print paper-hangings. About 1783, John Skippe, an amateur, printed some chiaroscuros. In 1819-22, Mr. William Savage produced his remarkable work, "Hints on Colour Printing," illustrated by imitations of chiaroscuro, and of coloured drawings, which are still greatly admired, giving details of the processes employed. In 1836, Mr. George Baxter produced beautiful specimens of Picture-Printing, and took out a patent, which expired in 1855. In some of the illustrations to the "Pictorial Album" (1836), he employed twenty different blocks. Since then great improvements have been made in the art. It has been applied to Lithography (hence Chromolithography). In 1849, Mr. G. C. Leighton produced imitations of water-colour-drawings, by means of modifications and improvements of Savage's processes. In 1851 he commenced colour-printing by machinery, and has since availed himself of aqua-tinted plates ; and also of electrotyped silver and copper surfaces to obtain purity of colour as well as durability. The large coloured prints of *The Illustrated London News* were first issued in Dec. 1856.

PRIORIES, are mentioned in A.D. 722 in England. They were at first dependent on the great abbeys. See *Abbeys and Monasteries*. The priories of aliens were seized upon by Edward I. in 1285, and in succeeding reigns on the breaking out of war with France ; but were usually restored on the conclusion of peace. These priories were dissolved, and their estates vested in the crown, 3 Hen. V. 1414. *Rymer's Fœdera*.

PRISONERS OF WAR, among the ancient nations, when spared, were usually enslaved. About the thirteenth century, civilised nations began to exchange their prisoners.

The Spanish, French, and American prisoners of war in England were 12,000 in number, Sept. 30, 1779
The number exchanged by cartel with France, from the commencement of the then war, was 44,000 June, 1781
The English prisoners in France estimated at

6000, and the French in England 27,000, Sept. 1798
The English in France amounted to 10,300, and the French, &c., in England to 47,600, in . . . 1811
[This was the greatest number, owing to the occasional exchanges made, up to the period of the last war.]

PRISONS OF LONDON. See *Fleet, King's Bench, Newgate, Poultry, Clerkenwell*.

Horsemonger-lane gaol was built in . . . 1791
The state of prisons was greatly improved after

the exertions of Howard. Cold Bath-fields prison was built on his suggestion about . . . 1794

* Romish Service books, used at Salisburi by the devout called *Pies* (*Pica*, Latin), as is supposed from the different colour of the text and rubric. Our printing-type *Pica* is called *Cicero* by foreign printers. *Wheatley*.

† In 1817 was published Blumenbach's *Physiology* by Elliotson, the first book printed by machinery. The machine employed being Bensley's patent, one which printed both sides in one operation at the rate of 900 sheets an hour (1816.)

PRISONS OF LONDON, *continued.*

The atrocities of Governor Aris in this prison were exposed in parliament	July 12, 1800	New Bridewell prison was erected as a substitute for the City Bridewell, Blackfriars, in 1829
White Cross-street prison for debtors was erected in	1813-15	Tothill Fields Bridewell, built in 1618, was re-built in
Borough compter; mean and confined till visited by a parliamentary committee in	1817	The old Marshalsea prison was pulled down
Savoy prison, for the confinement of deserters from the Guards, formerly situated in the Strand, was pulled down to make room for Waterloo-bridge	1819	Pentonville prison was completed in
		Middlesex House of Detention, Clerkenwell, was erected in
		Holloway prison was opened
		Act passed for abolishing Queen's Bench prison 1862

PRISON DISCIPLINE SOCIETY owes its existence to the philanthropic labours of sir T. F. Buxton, M.P. It was instituted in 1815, and held its first public meeting in 1820. Its objects are the amelioration of gaols, by the diffusion of information respecting their management, the classification and employment of the prisoners, and the prevention of crime, by inspiring a dread of punishment, and by inducing the criminal, on his discharge, to abandon his vicious pursuits.

PRIVATEER, a ship belonging to private individuals, sailing with a licence (termed a *Letter of Marque*), granted by a government in time of war, to seize and plunder the ships of the enemy. The practice, said to have been adopted by Edward I. against the Portuguese in 1295, was general during the war between Spain and the Netherlands in the seventeenth century, and during the last French war. Privateering was abolished by the great sovereigns of Europe by treaty, March 30, 1856. The United States government refused to agree unless the right of blockade was also given up. The British government declined this, asserting "that the system of commercial blockade was essential to its naval supremacy." On April 17, 1861, Jefferson Davis, president of the southern confederacy, announced his intention of issuing letters of marque, and on the 19th president Lincoln proclaimed that all southern privateers should be treated as pirates. This decree was not carried out. See *United States*. All the great powers forbade privateering among their own subjects during the American civil war.

PRIVILEGED PLACES. See *Asylums*.

PRIVY COUNCIL. This assembly is of great antiquity. A council was instituted by Alfred, A.D. 895. In ancient times the number was twelve; but it was afterwards so increased, that it was found inconvenient for secrecy and despatch, and Charles II. limited it to thirty, whereof fifteen were the principal officers of state (councillors *ex officio*), and ten lords and five commoners of the king's choice, A.D. 1679. *Salmon*. The number of the council was about twelve when it discharged the functions of state, now confined to the members of the cabinet; but it had become of unwieldy amount before 1679, in which year it was remodelled upon sir William Temple's plan, and reduced to thirty members: the number is now unlimited. *Beatson*. To attempt the life of a privy-councillor in the execution of his office was made capital, occasioned by Guiscard's stabbing Mr. Harley while the latter was examining him on a charge of high treason, 9 Anne, 1711.*

PRIVY SEAL, THE LORD, the fifth great officer of state, has the custody of the privy seal, which he must not put to any grant, without good warrant under the king's signet. This seal is used by the king to all charters, grants, and pardons, signed by the king, before they come to the great seal. Richard Fox, bishop of Winchester, held this office in the reign of Henry VIII. previously to 1523, when Cuthbert Tunstall, bishop of London, was appointed. The privy seal has been on some occasions in commission. *Beatson*.

PRIZE MONEY, arising from captures made upon the enemy, was decreed by government to be divided into eight equal parts, and distributed by order of ranks, April 17, 1793.

PROBATE COURT, established in 1857 by 20 & 21 Vict. c. 77, which abolished all powers exercised by the Ecclesiastical Courts in the granting of probates of wills. &c. See *Prerogative Court*. The first judge, appointed Jan. 5, 1858, was sir Cresswell Cresswell, who took his seat on Jan. 12. *Probate* is the exhibiting and proving a will before the proper authority.

* JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.—In lieu of the Court of Delegates, for appeals from the lord chancellors of Great Britain and of Ireland in cases of lunacy—from the Ecclesiastical and Admiralty courts of England, and the Vice-Admiralty courts abroad—from the Warden of the Stannaries, the courts of the Isle of Man, and other islands, and the Colonial courts, &c.,—fixed by statute 3 & 4 Will. IV. c. 41, 1833. *Judges*—the president of the privy council, the lord chancellor, and such members of the privy council as may hold and have held that office of lord keeper or first commissioner of the great seal, lord chief justice of the Queen's Bench, master of the rolls, vice-chancellor, lord chief justice of the Common Pleas, lord chief baron, judge of the Admiralty, chief judge of the court of Bankruptcy, and others appointed by the queen, being privy councillors.

PROCLAMATIONS, ROYAL, "have only a binding force when grounded upon and to enforce the laws of the realm." *Coke*. Henry VIII. in 1539 declared that they were as valid as acts of parliament.

PROFILES. The first profile taken, as recorded, was that of Antigonus, who, having but one eye, his likeness was so taken, 330 B.C. *Ashm.* "Until the end of the third century, I have not seen a Roman emperor with a full face; they were always painted or appeared in profile, which gives us the view of a head in a very majestic manner." *Addison*.

PROMISSORY NOTES. They were regulated and allowed to be made assignable in 1705. First taxed by a stamp in 1782: the tax was increased in 1804, and again in 1808, and subsequently. Numerous enactments varied the amount of the stamp upon promissory notes and bills. See *Bills of Exchange*.

PROPAGANDA FIDE, CONGREGATIO DE (congregation for the propagation of the faith of the Romish church), was constituted at Rome by Gregory XV. in 1622.

PROPAGATION OF THE GOSPEL SOCIETY received its charter June 16, 1601. Its sphere is generally limited to the British Colonies.

PROPERTY TAX. Parliament granted to Henry VIII. a subsidy of two-fifteenths from the commons and two-tenths from the clergy to aid the king in a war with France, 1512. *Rapin.* Cardinal Wolsey proposed a tenth of the property of the laity and a fourth of the clergy to the same king, 1522. The London merchants strenuously opposed this tax: they were required to declare on oath the real value of their effects; but they firmly refused, alleging that it was not possible for them to give an exact account of their effects, part whereof was in the hands of correspondents in foreign countries. At length the king accepted the tax according to their own calculation. *Butler*. The assessments on real property, under the property tax of 1815, were 51,898,423*l.*; of which Middlesex was 5,595,537*l.*; Lancashire, 3,087,774*l.*; and Yorkshire, 4,700,000*l.*; while Wales, of 4,752,000 acres, or one million more than Yorkshire, was but 2,153,801*l.* See *Income Tax*.

PROPHETS. See under *Jews*.

PROPHECYING: about 1570 the puritanical part of the clergy, particularly at Northampton, held meetings (termed prophesyings) for prayer and exposition of the Scripture. These were forbidden by queen Elizabeth, May 7, 1577, and immediately ceased.

PROTECTIONISTS. A name given to that section of the Conservative party which opposed the repeal of the corn-laws, and which separated from sir Robert Peel in 1846. The name was derived from a "Society for the *Protection of Agriculture*," of which the duke of Richmond was chairman, and which had been established to counteract the efforts of the Anti-Corn Law League, Feb. 17, 1844. Lord George Bentinck was the head of the party from 1846 till his death, Sept. 21, 1848. The Derby administration not proposing the restoration of the corn-laws, the above society was dissolved, Feb. 7, 1853.

PROTECTORATES IN ENGLAND. That of the earl of Pembroke began Oct. 19, 1216, and ended by his death the same year. Of Humphry duke of Gloucester, in England, began Aug. 31, 1422; he was murdered Feb. 28, 1447. Of Richard duke of Gloucester began April 9, 1483, and ended by his assuming the royal dignity, June 22, the same year. Of Somerset began Jan. 28, 1547, and ended by his resignation in 1549. Of Oliver Cromwell began Dec. 16, 1653, and ended by his death, Sept. 13, 1658. Of Richard Cromwell began Sept. 14, 1658, and ended by his resignation, May 5, 1659. See *England*.

PROTESTANTS. The emperor Charles V. called a diet at Spires in 1529, to request aid from the German princes against the Turks, and to devise means for allaying the religious disputes which then raged owing to Luther's opposition to the Roman Catholic religion. Against a decree of this diet, to support the doctrines of the Church of Rome, six Lutheran princes, with the deputies of thirteen imperial towns, formally and solemnly *protested*, April 19, 1529. Hence the term Protestants was given to the followers of Luther, and it afterwards included Calvinists, and all other sects separated from the see of Rome. The six protesting princes were: John and George, the electors of Saxony and Brandenburg; Ernest and Francis, the two dukes of Lunenburg; the landgrave of Hesse; and the prince of Anhalt: these were joined by the inhabitants of Strasburg, Nuremberg, Ulm, Constance, Heilbron, and seven other cities. See *Lutheranism, Calvinism, Huguenots, Germany, &c.*

Protestants persecuted in Scotland and Germany 1546
Edward VI. established Protestantism in Eng-
land 1548

 Thirty years' war between Romanists and Protestants in Germany 1618-48
 Protestants persecuted at Thorn in Poland 1724

Protestant Association (see "*Gordon's No Popery Mob*") 1780
 A society for planting communities of the poorer Protestants on tracts of land, particularly in the northern counties of Ireland, established in Dublin in Dec. 1829
 Protestant Conservative Society also established Dec. 9, 1831
 Protestant alliance formed at Armagh Nov. 7, 1845

PROVENCE, (the Roman *Provincia*) S.E. France, was made a kingdom by the emperor Lothaire for his son Charles. It afterwards became part of the kingdom of Arles as a feudal country, and was re-united to the German empire in 1032 by Conrad II. On the fall of the Hohenstaufens it was acquired by Charles of Anjou, king of Naples, in 1265; and was held by his successors till its annexation to France by Louis XI. in 1481.

PROVERBS. The Book of Proverbs by Solomon is dated about 1000 B.C. The latter part were collected by order of Hezekiah, about 700 B.C. Ray's collection of English proverbs appeared in 1672, and Bohn's general collection in 1857.

PROVISIONS—REMARKABLE STATEMENTS CONCERNING THEM. See *Oxford*.

Wheat for food for 100 men for one day worth only one shilling, and a sheep for fourpence, Henry I. about 1130. The price of wine raised to sixpence per quart for red, and eightpence for white, that the sellers might be enabled to live by it, 2 John, 1200. *Burton's Annals*.

When wheat was at 6s. per quarter, the farthing loaf was to be equal in weight to twenty-four ounces (made of the whole grain), and to sixteen the white.

When wheat was 18. 6d. per quarter, the farthing white loaf was to weigh sixty-four ounces, and the whole grain (the same as standard now) ninety-six, by the first assize, A.D. 1202. *Mat. Paris*.

A remarkable plenty in all Europe, 1280. *Dufresnoy*.

Wheat 1s. per quarter, 14 Edw. I. 1286. *Stow*.

The price of provisions fixed by the common council of London as follows: two pullets, three half-pence; a partridge, or two woodcocks, three half-pence; a fat lamb, sixpence from Christmas to Shrovetide,

the rest of the year fourpence, 29 Edw. I. 1299. *Stow*.

Price of provisions fixed by parliament: at the rate of 2l. 8s. of our money for a fat ox, if fed with corn, 3l. 12s.; a shorn sheep, 5s.; two dozen of eggs, 3d.; other articles nearly the same as fixed by the common council above recited, 7 Edw. II. 1313. *Rot. Parl.*

Wine the best sold for 20s. per tun, 10 Rich. II. 1387. Wheat being at 18. 1d. the bushel in 1390, this was deemed so high a price that it is called a dearth of corn by the historians of that era.

Beef and pork settled at a half-penny the pound, and veal three farthings, by act of parliament, 24 Henry VIII. 1533. *Anderson*.

Milk was sold three pints, ale-measure, for one half-penny, 2 Eliz. 1560. *Stow's Chronicle*.

For the price of *Bread* since 1735, see *Bread*.

PROVEDIMENTO SOCIETIES in Italy, formed to aid in acquiring Rome and Venice, elect Garibaldi as their chief, March 10, 1862. They were tolerated by Ricasoli, but warned to be moderate by Rattazzi.

PRUD'HOMMES, CONSEILS DE (from *prudens homo*, a prudent man), trade tribunals in France, composed of masters and workmen, instituted in 1806, by Napoleon, to arbitrate on trade disputes. Similar bodies with this name existed as far back as 1452 at Marseilles, and at Lyons in 1464.

PRUSSIA. This country was anciently possessed by the Venedi, about 320 B.C. They were conquered by the Borussi, who inhabited the Rhipæan mountains; and from these the

* His love of life had induced Crammer, some time previously, to sign a paper wherein he condemned the Reformation: and when he was led to the stake, and the fire was kindled round him, he stretched forth his right hand, with which he had signed his recantation, that it might be consumed before the rest of his body, exclaiming from time to time, "This unworthy hand!" Raising his eyes to heaven, he expired with the dying prayer of the first martyr of the Christian Church, "Lord Jesus, receive my spirit."

The following documents are taken from a "*Book of the Joint Diet, Dinner, and Supper, and the charge thereof, for Crammer, Latimer, and Ridley*," kept by the bailiffs of Oxford, while they were in the custody of those officers, previously to their being burnt alive:—

1ST OCTOBER, 1554.—DINNER.

Bread and ale	£0 0 2
Oysters	0 0 1
Butter	0 0 2
Eggs	0 0 2
Lyng	0 0 8
A piece of fresh salmon	0 0 10
Wine	0 0 3
Cheese and pears	0 0 2

The three dinners . . . £0 2 6

TO BURN LATIMER AND RIDLEY.

For 3 load of wood faggots	£0 12 0
Item, 1 load of furze faggots	0 3 4

Item, for the carriage of these 4 loads	£0 2 6
Item, a post	0 1 4
Item, 2 chains	0 3 4
Item, 2 staples	0 0 6
Item, 4 labourers	0 2 8

£1 5 8

TO BURN CRAMMER.

For 100 of wood faggots for the fire	£0 6 0
For 100 and $\frac{1}{2}$ of furze	0 3 4
For the carriage of them	0 0 8
For 2 labourers	0 2 8

£0 12 8

country was called Borussia. Some historians, however, derive the name from *Po*, signifying near, and *Russia*—Po-Russia, easily modified into Prussia. The Porussi afterwards intermixed with the followers of the Teutonic knights, and latterly with the Poles. This people and country were little known until about A.D. 1007.

 Prince of Prussia made permanent regent; Oct. 7, —
 Resignation of Manteuffel ministry, succeeded by that of prince Hohenzollern-Sigmaringen (liberal): the elections end in favour of the new government. Nov. —
 Prince Frederick William, son of the princess royal of England, born. Jan. 27, 1859
 Italian war—Prussia declares its neutrality, but arms to protect Germany. May and June, —
 The regent announces that "the Prussian army will be in future the Prussian nation in arms." Jan. 12, 1860
 The regent and several German sovereigns meet the emperor of the French at Baden (see *Baden*). June 15-17, —
 Baron Bunsen dies (aged 70). Nov. 27, —
 Disclosures respecting the oppressive system of Prussian police. Stieber, the director, prosecuted and censured, but not punished. Nov. —
 Death of Frederick William IV. Accession of William I. Jan. 2, 1861
 Meeting of the chambers* on the motion for the address, M. Von Vincke carries an amendment in favour of Italian unity and "a firm alliance with England." Feb. 6, —
 The Macdonald affair* settled by a firm yet conciliatory despatch from the Baron von Schleinitz. May, —

Attempted assassination of the king by Becker, a Leipsic student, July 14; who is sentenced to 20 years imprisonment. Sept. 23, 1861
 The king meets the emperor Napoleon at Compeigne. Oct. 6-8, —
 The king and queen crowned at Königsberg; he declares that he will reign by the "Grace of God." Oct. 18, —
 Bill for making the ministry responsible, passed. March 6, 1862
 The chamber of representatives oppose the government in regard to the length of military service, March 6; and resolve on discussing the items of the budget; the ministry resigns; the king will not accept the resignation, but dissolves the chambers. March 11, —
 The ministry (liberal) resign, and a reactionary cabinet formed under Van der Heydt, March 18 —April 12, —
 Elections go against the government: only one minister elected. May, —
 Parliament opens; ministers appeal to the patriotism of the members. May 19, —
 Sovereign discussion on military expenditure; the chamber reduces the vote for the maintenance of the army from 200,000 to 135,000 men. Sept. 11-16, —
 Van der Heydt resigns; succeeded as premier by the Count Bismark Schönhausen, Sept.; who informs the chamber that the budget is deferred till 1863; the chamber protests against this as unconstitutional. Sept. 30, —
 The chamber of peers passes the budget without the amendments of the chamber of representatives; which (by 237 against 2) resolves that the act is contrary to the letter and spirit of the constitution. Oct. 11, —
 The king closes the session (65th) saying, "The budget for the year 1862, as decreed by the chamber of representatives, having been rejected by the chamber of peers on the ground of insufficiency, the government of his majesty is under the necessity of controlling the public affairs outside the constitution." Oct. 13, —
 Agitation in favour of the constitution proceeding: passive resistance adopted; several liberal papers suppressed. Nov. —

MARGRAVES, ELECTORS, DUKES, AND KINGS.

MARGRAVES OR ELECTORS OF BRANDENBURG.
 1134. Albert I. surnamed the Bear, first elector of Brandenburg.
 1170. Otho I.
 1184. Otho II.
 1206. Albert II.
 1221. John I. and Otho III.
 1266. John II.
 1282. Otho IV.
 1309. Waldemar.
 1319. Henry I. the Young.
 1320. [Interregnum.]
 1321. Louis I. of Bavaria.
 1322. Louis II. surnamed the Roman.
 1350. Otho V. the Stuppard.
 1373. Wenceslas, of Luxemburg.
 1378. Sigismund, of Luxemburg.
 1388. Jossus, the Bearded.
 1411. Sigismund again, emperor.
 1415. Frederick I. of Nuremberg (of the house of Hohenzollern).
 1440. Frederick II. surnamed Ironside.

1470. Albert III. surnamed the German Achilles.
 1476. John III. his son; as margrave: styled the Cicero of Germany.
 1486. John III. as elector.
 1499. Joachim I. son of John.
 1535. Joachim II. poisoned by a Jew.
 1571. John-George.
 1598. Joachim-Frederick.
 1608. John-Sigismund.

DUKES OF PRUSSIA.

1618. John-Sigismund.
 1619. George-William.
 1640. Frederick-William, his son; generally styled the "Great Elector."
 1688. Frederick III. son of the preceding; crowned king, Jan. 18, 1701.

KINGS OF PRUSSIA.

1701. Frederick I. king.
 1713. Frederick-William I. son of Frederick I.

* On Sept. 12, 1860, Captain Macdonald was committed to prison at Bonn, for resisting the railway authorities there. The English residents appealed and were also censured. A correspondence ensued between the Prussian government and the British foreign secretary; and strong language was uttered in the house of commons, April 26, and in the Prussian chambers, May 6, 1861.

PRUSSIA, *continued*.

1740. Frederick II. (Frederick III.; styled the Great), son; made Prussia a military power.
 1786. Frederick-William II. nephew of the preceding king.
 1797. Frederick-William III. He had to contend against the might of Napoleon, and after extraordinary vicissitudes, he aided England in his overthrow.

1840. Frederick-William IV. son; succeeded June 7 (born Aug. 3, 1770; died Jan. 2, 1861).
 1860. William I. Born March 22, 1797.
Heir. His son, prince Frederick-William, born Oct. 18, 1831; married Victoria, princess-royal of England, Jan. 25, 1858. They have three children.

PRUSSIC ACID (or hydrocyanic acid) is colourless, smells like peach flowers, freezes at 5° Fahrenheit, is very volatile, and turns vegetable blues into red. It was accidentally discovered by Diesbach, a German chemist, in 1709. Scheele first obtained this acid in a separate state, about 1782. Simple water distilled from the leaves of the *lauro-cerasus* was first ascertained to be a most deadly poison by Dr. Madden of Dublin.

PRYTANIS, a magistrate of Corinth, annually elected from 745 B.C. till the office was abolished by Cypselus, a despot, 655 B.C.

PSALMS or **DAVID** were collected by Solomon, 1000 B.C.; others were added 580 and 515 B.C. The old Church of England version in metre by Sternhold and Hopkins was published in 1562; the New Version by Tate and Brady in 1598.

PSEUDOSCOPE, a name given by professor Wheatstone (about 1852) to the stereoscope, when employed to produce "conversions of relief," *i.e.*, the reverse of the stereoscope—a terrestrial globe becoming a hollow hemisphere.

PTOLEMAIC SYSTEM. Claudius Ptolemy of Pelusium, in Egypt (about A.D. 140), supposed that the earth was fixed in the centre of the universe, and that the sun, moon, and stars moved round once in twenty-four hours. This system (long the official doctrine of the church of Rome) was universally taught till that of Pythagoras (500 B.C.) was revived by Copernicus, A.D. 1530, and demonstrated by Kepler (1619) and Newton (1687).

PUBLIC HEALTH. See *Health*. **PUBLIC-HOUSES.** See *Victualers*.

PUBLIC SAFETY, COMMITTEE OF, was established at Paris during the French Revolution on April 6, 1793, with absolute power; in consequence of the coalition against France. The severe government of this committee is termed the Reign of Terror, which ended with the execution of Robespierre and his associates, July 28, 1794.

PUDDLING. Making water tight by means of wet clay was largely adopted by Brindley in constructing the Bridgewater canals, 1761 *et. seq.* See *Iron Manufacture*.

PUGILISM. See *Boxing*.

PULLEY. The pulley, together with the vice and other mechanical instruments, are said to have been invented by Archytas of Tarentum, a disciple of Pythagoras, about 516 B.C. It has been ascertained that in a single moveable pulley the power gained is doubled. In a continued combination the power is equal to the number of pulleys, less one, doubled.

PULTOWA (Russia), where Charles XII. of Sweden was entirely defeated by Peter the Great of Russia, July 8, 1709, dangerously wounded, and obliged to take refuge at Bender, in the Turkish dominions.

PULTUSK (Russia), a battle was fought between the Saxons under king Augustus, and the Swedes under Charles XII., in which the former were signally defeated, May 1, 1703. Here also the French under Napoleon fought the Russian and Prussian armies; both sides claimed the victory, but it inclined in favour of the French, Dec. 26, 1806.

PUMPS. Ctesibius of Alexandria, architect and mechanic, is said to have invented pumps (with other hydraulic instruments), about 224 B.C., although the invention is ascribed to Danaus, at Lindus, 1485 B.C. They were in general use in England, A.D. 1425. An inscription on the pump in front of the late Royal Exchange, London, stated that the well beneath was first sunk in A.D. 1282. The air-pump was invented by Otto Guericke in 1654, and was improved by Boyle in 1657.

PUNCTUATION. The ancients do not appear to have had any system; and doubtless employed arbitrary signs to distinguish the parts of a discourse. Of our points the period (.) is the most ancient. The colon (:) was introduced about 1485; the comma (,) was first seen about 1521, and the semicolon (;) about 1570. In sir Philip Sidney's "*Arcadia*" (1587), they all appear, as well as the note of interrogation (?), asterisk (*), and parentheses ().

PUNIC WARS. The first Punic war was undertaken by the Romans against Carthage, 264 B.C. The ambition of Rome was the origin of this war; it lasted twenty-three years,

and ended 241 B.C.—The SECOND Punic war began 218 B.C. in which year Hannibal marched a numerous army of 90,000 foot, and 12,000 horse, towards Italy, resolved to carry on the war to the gates of Rome. He crossed the Rhone, the Alps, and the Apennines, with uncommon celerity; and the Roman consuls, who were stationed to stop his progress, were severally defeated. The battles of Trebia, of Ticinus, of the lake of Thrasymenus, 217, and of Cannæ, 216, followed. Scipio carried the war into Africa, and Hannibal was recalled. The decisive battle of Zama was fought 202 B.C., the Carthaginians being totally defeated. This war lasted seventeen years, and ended in 201 B.C.—The THIRD Punic war began 149 B.C. and was terminated by the fall of Carthage, 146 B.C. See *Carthage*.

PUNJAB (N.W. Hindostan), was traversed by Alexander the Great, 327 B.C.; and by Tamerlane, A.D. 1398. The war with the Sikhs began here, Dec. 14, 1845, and was closed, March 29, 1849, when the Punjab was annexed. The Punjab has since flourished, and on Jan. 1, 1859, was made a distinct presidency (to include the Sutlej states, and the Delhi territory).

PURGATIVES. Those of the mild species (aperients), particularly cassia, manna, and senna, were first discovered by Actuarius, a Greek physician, A.D. 1245. Drastics, more powerful purgatives, frequently occasion great injury.

PURGATORY, the middle place between heaven and hell, where, it is believed by the Roman Catholics, the soul passes through the fire of purification before it enters the kingdom of God. The doctrine of purgatory was known about A.D. 250; and was introduced into the Roman church in 593. *Platina*. Introduced early in the sixth century. *Dupin*. It was first set forth by a council at Florence, 1438. *Dr. Hook*.

PURIFICATION, after childbirth, was ordained by the Jewish law, 1490 B.C. (*Lev. xii.*) The Christian feast of purification was instituted A.D. 542, in honour of the Virgin Mary's going to the temple. (*Luke ii.*) Pope Sergius I. ordered the procession with wax tapers, whence Candlemas-day.

PURITANS, the name, first given about 1564, to persons who aimed at greater purity of doctrine, holiness of living, and stricter discipline than others. At first they were members of the Established church, but afterwards separated, professing to follow the word of God alone, and maintaining that the English church still retained many human inventions and popish superstitions. See *Nonconformists* and *Presbyterianism*.

PURPLE, a mixed tinge of scarlet and blue, discovered at Tyre. It is said to have been found by a dog's having by chance eaten a shell-fish, called *murex* or *purpura*; upon returning to his master, Hercules Tyrius, he observed his lips tinged, and proper use was made of the discovery. Purple was anciently used by the princes and great men for their garments by way of distinction, and to this day the purple colour is the livery of our bishops &c. The dignity of an archbishop or great magistrate, is frequently meant by the purple. The purple was first given to the cardinals by pope Paul II. 1465.

PUSEYISM, a name attached to the views of certain clergymen and lay members of the church of England, who endeavoured to restore the practice of the church of England to what they believed to be required by the language of her Liturgy and Rubrics; but which were considered by their opponents to be contrary to her doctrine and discipline, and of a Romish tendency. The term was derived from the name of the professor of Hebrew at Oxford, Dr. Pusey, who was popularly supposed to be the originator and chief supporter of those views. The heads of houses of the university of Oxford passed resolutions censuring Dr. Pusey's attempts to renew practices which are now obsolete, March 15, 1841; and his celebrated sermon was condemned by the same body, May 30, 1843. See *Tractarians*.

PYDNA (Macedon), where Perseus, the last king of Macedon, was defeated and made prisoner by the Romans, commanded by Æmilius Paulus, 168 B.C.

PYRAMIDS OF EGYPT, according to Dr. Pococke and Soniani, "so celebrated from remote antiquity, are the most illustrious monuments of art." The three principal pyramids are situated on a rock, at the foot of some high mountains which bound the Nile. The first building of them commenced, it is supposed, about 1500 B.C. The greatest is said to have been erected by Cheops, 1082 B.C. The largest, near Gizeh, is 461 feet in perpendicular height, with a platform on the top 32 feet square, and the length of the base is 746 feet. It occupies above twelve acres of ground, and is constructed of stupendous blocks of stone. There are many other smaller pyramids to the south of these.—The battle of the Pyramids, when Bonaparte defeated the Mamelukes, took place July 21, 1798.

PYRENEES. After the battle of Vittoria (fought June 21, 1813), Napoleon sent Soult to supersede Jourdan, with instructions to drive the allies across the Ebro, a duty to which his abilities were inferior, for Soult retreated into France with a loss of more than 20,000 men, having been defeated by Wellington in a series of engagements from July 25 to August 2. One at the Pyrenees on July 28. A railway through the Pyrenees (from Bilboa to Miranda) was opened Aug. 21, 1862.

PYRENEES, PEACE OF THE, a peace concluded between France and Spain, between cardinal Mazarin, for the French king, and Don Lewis de Haro, on the part of Spain, in the island of Pheasants, on the Bidassoa. By the treaty of the Pyrenees, Spain yielded Roussillon, Artois, and her right to Alsace; and France ceded her conquests in Catalonia, Italy, &c., and engaged not to assist Portugal, Nov. 7, 1659.

PYROMETER (fire-measurer), an apparatus employed to ascertain the temperature of furnaces, &c., where thermometers cannot be employed; Muschenbroek's pyrometer (a metallic bar) was described by him in 1731. Improvements were made by Ellicott and others. Wedgwood employed clay cylinders about 1782. Professor Daniell received the Rumford medal for an excellent pyrometer in 1830. Mr. Ericson's useful pyrometer appeared in the Great Exhibition of 1851. *Eng. Cyc.*

PYTHAGOREAN PHYLOSOPHY. Pythagoras, of Samos, head of the Italic sect, flourished about 555 B.C. He is said to have taught the doctrine of metempsychosis or transmigration of the soul from one body to another; forbidden his disciples to eat flesh, as also beans, because he supposed them to have been produced from the same putrified matter from which at the creation of the world man was formed; to have invented the multiplication table; to have improved geometry; and to have taught the modern system of astronomy.

PYTHIAN GAMES, in honour of Apollo, near the temple of Delphi; first instituted, according to the more received opinion, by Apollo himself, in commemoration of the victory which he had attained over the serpent, Python, from which they received their name; though others maintain that they were first established by Agamemnon, or Diomedes, or by Amphictyon, or lastly, by the council of the Amphictyons, 1263 B.C.

PYX, the casket in which Catholic priests keep the consecrated wafer. In the ancient chapel of the pyx, at Westminster abbey, are deposited the standard pieces of gold and silver, under the joint custody of the lords of the treasury and the comptroller-general. The "trial of the pyx" signifies the verification by a jury of goldsmiths of the coins deposited in the pyx-box by the master of the mint. This took place on July 17, 1861, at the exchequer office, Old Palace yard, in the presence of twelve privy councillors, twelve goldsmiths, and others.

Q.

QUACKERY. At the first appearance that a French quack made in Paris, a boy walked before him, publishing with a shrill voice, "My father cures all sorts of distempers;" to which the doctor added in a grave manner, "What the child says is true." *Addison*. Quacks sprung up with the art of medicine; and several countries, particularly England and France, abound with them. In London, some of their establishments are called colleges. Quack medicines were taxed in 1783, *et seq.* An inquest was held on the body of a young lady, Miss Cashin, whose physician, St. John Long, was afterwards tried for manslaughter, Aug. 21, 1830; he was found guilty, and sentenced to pay a fine of 25*ol.* Oct. 30 following. The same quack (who had previously absconded) was tried for manslaughter in the case of Mrs. Catherine Lloyd, and acquitted Feb. 19, 1831. Dr. Vriès, "the black doctor," a professed cancer-curer, at Paris, was condemned to 15 months' imprisonment as an impostor in Jan. 1860. See *Homœopathy* and *Hydropathy*.

QUADRAGESIMA SUNDAY, first Sunday in Lent. See *Lent* and *Quinquagesima*.

QUADRANGLE, or QUADRILATERAL, terms applied to the four strong Austrian fortresses in North Italy:—(1) Peschiera, on an island in the Mincio, near the lake of Garda. It was taken by the French in 1796; by the Austrians and Russians in 1799; by the French again in 1801; but restored in 1814. It was taken by the Sardinians in 1843; but retaken by Radetzky in 1849. The Sardinians were about to invest it in 1859, when peace was made: (2) Mantua, on the Mincio: (3) Verona: and (4) Legnago; both on the Adige. See *Mantua*, &c.

QUADRANT, the mathematical instrument in the form of a quarter of a circle. The solar quadrant was introduced about 290 B.C. The Arabian astronomers under the caliphs,

in A.D. 995, had a quadrant of 21 feet 8 inches radius, and a sextant 57 feet 9 inches radius. Davis's quadrant for measuring angles was produced about 1600. Hadley's quadrant, in 1731. See *Navigation*.

QUADRILLE. This popular dance was introduced into this country in 1813, by the then duke of Devonshire, and others. *Raikes*.

QUADRUPLE ALLIANCE, between Great Britain, France, and the emperor (signed at London, July 22, 1718), on the accession of the states of Holland, Feb. 8, 1719, obtained its name. It was for the purpose of guaranteeing the succession of the reigning families in Great Britain and France, and settling the partition of the Spanish monarchy. It led to war.

QUÆSTOR, in ancient Rome was an officer who had the management of the public treasure; instituted 484 B.C. It was the first office any person could bear in the commonwealth, and gave a right to sit in the senate. At first there were two quæstors, afterwards eight. Two were added in 409 B.C. Two were called *Peregrini*, two (for the city) *Urbani*.

QUAKERS, or **SOCIETY OF FRIENDS**, originally called Seekers, from their seeking the truth; and afterwards Friends (3 *John* 14)—“a beautiful appellation, and characteristic of the relation which man, under Christian dispensation, ought to bear towards man.” *Clarkson*. Justice Bennet, of Derby, gave the society the name of Quakers in 1650, because Fox (the founder) admonished him, and those present with him, to tremble at the word of the Lord. This respectable sect, excelling in morals, prudence, and industry, was commenced in England about A.D. 1646, by George Fox (then aged 22), who was soon joined by a number of learned, ingenious, and pious men—among others, by George Keith, William Penn, and Robert Barclay, of Ury.* Fox carried his reverence for supernatural teaching so far as to reject all religious ordinances, and explained away the commands relative to baptism, &c. He rejected the ordinary names of days and months; and used *thee* and *thou* for *you*, as more consonant with truth. He published a book of instructions for teachers and professors, and died Jan. 13, 1691. The first meeting-house in London was in White Hart-court, Gracechurch-street. The first meeting of Quakers in Ireland was in Dublin in 1658; and their first meeting-house in that city was opened in Eustace-street, 1692. The solemn affirmation of Quakers was enacted to be taken in all cases in the courts below, wherein oaths are required from other subjects, 1696. See *Affirmation*. In 1682 Wm. Penn, with a company of Friends colonised Philadelphia, where on Jan. 1, 1788, they emancipated their negro slaves. On Jan. 23, 1833, Edward Pease, a Quaker, was admitted to parliament on his affirmation. The Quakers had in England 413 meeting-houses in 1800, and 371 in 1851. At a Conference held on Nov. 2, 1858, it was agreed to recommend that mixed marriages should be permitted, and that many of the peculiarities of the sect in speech and costume should be abandoned. In 1860 an act was passed rendering valid Quaker marriages when only one of the persons is a Quaker.

QUARANTINE, the custom first observed at Venice, A.D. 1127, whereby all merchants and others coming from the Levant were obliged to remain in the house of St. Lazarus, or the Lazaretto, forty days before they were admitted into the city. Various southern cities have now lazarettos; that of Venice is built in the water. In the times of plague, England and all other nations oblige those that come from the infected places to perform quarantine with their ships, &c., a longer or shorter time, as may be judged most safe. Quarantine acts were passed in 1753 and in 1826.

QUARTER SESSIONS, were established by statute 25 Edw. III. 1350-1. The days of sitting quarterly were appointed 2 Hen. V., 1413. In 1830 it was enacted that henceforth quarter sessions of the peace should be held in the first week after Oct. 11, Dec. 28, March 31, and June 24.

QUATRE-BRAS (Belgium), where on June 16, 1815, two days before the battle of Waterloo, a battle was fought between the British and allied army under the duke of Brunswick, the prince of Orange, and sir Thomas Picton, and the French under marshal Ney. The British fought to maintain their position with remarkable intrepidity, notwith-

* The Quakers early suffered grievous persecutions in England and America. At Boston, U.S., where the first Friends who arrived were females, they (even females) were cruelly scourged, and had their ears cut off. In 1659, they stated in parliament that 2000 Friends had endured sufferings and imprisonment in Newgate; and 164 Friends offered themselves at this time, by name to government, to be imprisoned in lieu of an equal number in danger (from confinement) of death. Fifty-five (out of 120 sentenced) were transported to America, by an order of council, 1664. The masters of vessels refusing to carry them for some months, an embargo was laid on West India ships, when a mercenary wretch was at length found for the service. But the Friends would not walk on board, nor would the sailors hoist them into the vessel, and soldiers from the Tower were employed. In 1665, the vessel sailed; but it was immediately captured by the Dutch, who liberated twenty-eight of the prisoners in Holland, the rest having died of the plague in that year. Of the 120, few reached America.

standing their inferiority in number, and the fatigue of marching all the preceding night. The 42nd regiment (Scotch Highlanders) suffered severely in pursuit of a French division by cuirassiers being posted in ambush behind growing corn as high as the shoulders of the tallest men. In this engagement the gallant duke of Brunswick fell.

QUEBEC (Canada), was founded by the French in 1608.

Quebec reduced by the English, with all Canada, in 1626, but restored in 1632. Besieged by the English, but without success, in 1711; it was conquered by them, after a battle memorable for the death of general Wolfe in the moment of victory, Sept. 13, 1759; besieged in vain by the American provincials, under their general, Montgomery, who was slain Dec. 31, 1775. Public and private stores, and several wharfs,

destroyed by fire; the loss estimated at upwards of 260,000*l.* Sept. 1815. Awful fire, 1650 houses, the dwellings of 12,000 persons, burnt to the ground May 28, 1845. Another great fire, 1365 houses burnt, June 28, — Disastrous fire at the theatre, 50 lives lost Jan. 12, 1846. Visited by the Prince of Wales Aug. 18-23, 1860 (See *Canada* and *Montreal*.)

QUEEN. The first woman invested with sovereign authority was Semiramis, queen of Assyria, 2017 B.C. In 1554 an act was passed "declaring that the regal power of this realm is in the queen's majesty [Mary] as fully and absolutely as ever it was in any of her moste noble progenitours kings of this realm." The Hungarians called a queen-regnant king. See *Hungary*.

QUEEN ANNE'S BOUNTY. Established in Feb. 1704, by queen Anne, being the First Fruits with the Tenths, to increase the incomes of the poorer clergy. There were 5597 clerical livings under 50*l.* per annum found by the commissioners under the act of Anne capable of augmentation. *Chalmers*. Act to consolidate the offices of First Fruits, Tenths, and Queen Anne's Bounty, 1 Vict. 1838.

QUEEN ANNE'S FARTHING. The popular stories of the great value of this coin are fabulous, although some few of particular dates have been purchased by persons at high prices. The current farthing, with the broad brim, when in fine preservation, is worth 1*l.* The common patterns of 1713 and 1714 are worth 1*l.* The two patterns with Britannia under a canopy, and Peace on a car, R R R, are worth 2*l.* 2*s.* each. The pattern with Peace on a car is more valuable and rare, and worth 5*l.* *Pinkerton* (died 1826).

QUEEN'S BENCH COURT AND PRISON. See *King's Bench*.

QUEEN'S BOUNTY, an annual grant of 1000*l.* which commenced about the beginning of the reign of Geo. III. and was continued until the 10th Geo. IV. 1829, when it ceased altogether. The collection upon the king's letter, which used to accompany this grant, has also been discontinued since that year.

QUEEN CAROLINE'S TRIAL, &c.

Caroline Amelia Augusta, second daughter of Charles Wm. Ferdinand, duke of Brunswick, born May 17, 1768; married to George, prince of Wales April 8, 1795. Their daughter, princess Charlotte born, Jan. 7, 1796. The Delicate Investigation (*which see*) May 22, 1806. Charges against her again disproved 1813. Embarks for the continent Aug. 1814. Becomes queen Jan. 20, 1820. Arrives in England June 6, —. A secret committee in the house of lords, appointed to examine papers on charges of incontinence June 8, —. Bill of Pains and Penalties introduced by lord Liverpool July 5, —. The queen removes to Brandenburg-house, Aug. 3, —. Receives the address of the married ladies of the metropolis Aug. 16, —.

Her trial commences Aug. 19, 1820. Last debate on the bill of Pains and Penalties, when the report was approved by 108 against 99; the numerical majority of nine being produced by the votes of the ministers themselves. Lord Liverpool moves that the bill be reconsidered *that day six months* Nov. 10, —. Great exultation throughout England, and illuminations for three nights in London, Nov. 10, 11, 12, —. The queen goes to St. Paul's in state Nov. 29, —. She protests against her exclusion from the coronation July 18, 1821. Taken ill at Drury-lane theatre July 30; dies at Hammersmith Aug. 7, —. Her remains removed, on their route to Brunswick; an alarming riot occurs, owing to the military opposing the body being carried through the city Aug. 14, —.

QUEEN CHARLOTTE SHIP OF WAR, a first-rate ship of the line, of 110 guns, the flag-ship of lord Keith, then commanding in chief in the Mediterranean, was burnt by an accidental fire, off the harbour of Leghorn, and more than 700 British seamen out of a crew of 850 perished by fire or drowning, March 17, 1800.

QUEEN VICTORIA STEAM SHIP. Wrecked Feb. 15, 1853. See *Wrecks*.

QUEENS OF ENGLAND. Since the conquest, besides our present sovereign, four queens of England have reigned in their own right (not counting the empress Maude, daughter of Henry I., or the lady Jane Grey, whose *quasi* reign lasted only ten days, viz.,

Mary I., Elizabeth, Mary II. and Anne. There have been thirty-four queens, the consorts of kings, exclusively of four wives of kings who died previously to their husbands ascending the throne. Of thirty-five actual sovereigns of England, four died unmarried, three kings and one queen.

QUEEN OF WILLIAM I.—*Matilda*, daughter of Baldwin, earl of Flanders; married in 1054; died in 1083.

WILLIAM II.—Died unmarried.

HENRY I.—*Matilda*, daughter of Malcolm III. king of Scotland; married Nov. 11, 1100; died May 1, 1119.

Adelais, daughter of Godfrey, earl of Louvaine; married Jan. 29, 1129; survived the king.

MAUDE OR MATILDA.—Daughter of Henry I. and rightful heir to the throne; born 1101; betrothed, in 1109, at eight years of age, to Henry V. emperor of Germany, who died 1125. She married, secondly, Geoffrey Plantagenet, earl of Anjou, 1130. Was set aside from the English succession by Stephen, 1135; landed in England, and claimed the crown, 1139. Crowned, but soon after defeated at Winchester, 1141. Concluded a peace with Stephen, which secured the succession to her son Henry, 1153; died 1165.

STEPHEN.—*Matilda*, daughter of Eustace, count of Boulogne; married in 1128; died May 3, 1157.

HENRY II.—*Eleanor*, the reputed queen of Louis VII. king of France, and heiress of Guicenne and Poitou; married to Henry 1151; died 1204. See *Rosamond*.

RICHARD I.—*Bevergia*, daughter of the king of Navarre; married May 12, 1191; survived the king.

JOHN.—*Alice*, daughter of the earl of Gloucester; married in 1189; divorced.

Isabella, daughter of the count of Angoulême; she was the young and virgin wife of the count de la Marche; married to John in 1200. Survived the king, on whose death she was re-married to the count de la Marche.

HENRY III.—*Eleanor*, daughter of the count de Provence; married Jan. 24, 1236; survived the king; and died in 1291, in a monastery.

EDWARD I.—*Eleanor* of Castile; married in 1253; died of a fever, on her journey to Scotland, at Grantham, in Lincolnshire, 1290.

Margaret, sister of the king of France; married Sept. 12, 1299; survived the king, dying in 1317.

EDWARD II.—*Isabella*, daughter of the king of France; married in 1308. On the death, by the gibbet, of her favourite Mortimer, she was confined for the rest of her life in her own house at Risings, near London, and died in 1357. *Hume*.

EDWARD III.—*Philippa*, daughter of the count of Hainault; married in 1326; died Aug. 15, 1369.

RICHARD II.—*Anne* of Bohemia, sister of the emperor Wenceslaus of Germany; married in Jan. 1382; died Aug. 3, 1394.

Isabella, daughter of Charles V. of France; married when only seven years old, Nov. 1, 1396. On the murder of her husband she returned to her father.

HENRY IV.—*Mary*, daughter of the earl of Hereford; she died, before Henry obtained the crown, in 1394.

Joan of Navarre, widow of the duke of Bretagne; married 1403; survived the king; died 1437.

HENRY V.—*Catherine*, daughter of the king of France; married May 30, 1420. She outlived Henry, and was married to Owen Tudor, grandfather of Henry VII., in 1423; died 1437.

HENRY VI.—*Margaret*, daughter of the duke of Anjou; married April 22, 1445; survived the king; died Aug. 25, 1481.

EDWARD IV.—*Lady Elizabeth Grey*, daughter of sir Richard Woodville, and widow of sir John Grey, of Groby; married March 1, 1463 or 1464. Suspected of favouring the insurrection of Lambert Simnel; and closed her life in confinement June 8, 1492.

EDWARD V.—Died unmarried.

RICHARD III.—*Anne*, daughter of the earl of Warwick, and widow of Edward, prince of Wales,

whom Richard had murdered, 1471. She is supposed to have been poisoned by Richard (having died suddenly, March 16, 1485), to make way for his intended marriage with the princess Elizabeth of York.

HENRY VII.—*Elizabeth* of York, princess of England, daughter of Edward IV.; married Jan. 18, 1486; died Feb. 11, 1503.

HENRY VIII.—*Catherine of Aragon*, widow of Henry's elder brother, Arthur, prince of Wales; married June 8, 1509; was the mother of queen Mary; was repudiated, and afterwards formally divorced, May 23, 1533; died Jan. 7, 1536.

Anna Boleyn, daughter of sir Thomas Boleyn, and maid of honour to Catherine; was privately married, before Catherine was divorced, Nov. 14, 1532; was the mother of queen Elizabeth; was beheaded at the Tower, May 19, 1536.

Jane Seymour, daughter of sir John Seymour, and maid of honour to Anna Boleyn; was married May 20, 1536, the day after Anna's execution; was the mother of Edward VI., of whom she died in childbirth, Oct. 24, 1537.

Anne of Cleves, sister of William, duke of Cleves; married Jan. 6, 1540; divorced, July 10, 1540; died 1557.

Catherine Howard, niece of the duke of Norfolk; married July 28, 1540; beheaded on Tower-hill, Feb. 12, 1542.

Catherine Parr, daughter of sir Thomas Parr, and widow of Nevill, lord Latimer; married July 12, 1543; survived the king, after whose death she married sir Thomas Seymour, created lord Sudley; died Sept. 5, 1548.

EDWARD VI.—Died unmarried.

LADY JANE GREY.—Daughter of the duke of Suffolk, and wife of lord Guildford Dudley. Proclaimed queen on the death of Edward. In ten days afterwards returned to private life; was tried Nov. 13, 1553; beheaded Feb. 12, 1554, when but seventeen years of age.

MARY (queen regnant).—Daughter of Henry VIII. She ascended the throne July 6, 1553; married Philip II. of Spain, July 25, 1554; died Nov. 17, 1558. The king her husband died in 1568.

ELIZABETH (queen regnant).—Daughter of Henry VIII. Succeeded to the crown Nov. 17, 1558; reigned 44 years, 4 months, and 7 days; died unmarried, March 24, 1603.

JAMES I.—*Anne*, princess of Denmark, daughter of Frederick II.; married Aug. 20, 1590; died March, 1619.

CHARLES I.—*Henrietta-Maria*, daughter of Henry IV., king of France; married June 13, 1625; survived the king; died in France, Aug. 10, 1669.

CHARLES II.—*Catherine of Braganza*, infanta of Portugal, daughter of John IV. and sister of Alfonso VI.; married May 21, 1662; survived the king, returned to Portugal; died Dec. 21, 1705.

JAMES II.—*Ann Hyde*, daughter of Edward Hyde, earl of Clarendon; married Sept. 1660; died before James ascended the throne, 1671; mother of queens Mary and Anne.

Mary-Beatrice, princess of Modena, daughter of Alphonzo d'Este, duke; married Nov. 21, 1673. At the revolution in 1688, she retired with James to France; died at St. Germain, 1718.

WILLIAM AND MARY (queen regnant).—Mary, the princess of Orange, daughter of James II.; married to William, Nov. 4, 1677; ascended the throne Feb. 13, 1689; died Dec. 28, 1694.

ANNE (queen regnant).—Daughter of James II. She married George prince of Denmark, July 28, 1683; succeeded to the throne, March 8, 1702; had thirteen children, all of whom died young; lost her husband, Oct. 28, 1708; died Aug. 1, 1714.

QUEENS OF ENGLAND, *continued.*

GEORGE I.—*Sophia-Dorothea*, daughter of the duke of Zell. She died in prison, Nov. 2, 1726.

GEORGE II.—*Wilhelmina Caroline Dorothea*, of Brandenburg-Anspach; married 1705; died Nov. 20, 1737.

GEORGE III.—*Charlotte Sophia*, daughter of the duke of Mecklenburg-Strelitz; married Sept. 8, 1761; died Nov. 17, 1818.

GEORGE IV.—*Caroline Amelia Augusta*, daughter of the duke of Brunswick. See article *Queen Caroline*.

WILLIAM IV.—*Adelaide Amelia Louisa Theresa*

Caroline, sister of the duke of Saxe-Meiningen; married July 11, 1818; survived the king twelve years. Her Majesty died Dec. 2, 1849.

VICTORIA (*queen regnant*).—*Alexandrina VICTORIA*, the reigning queen, daughter of the duke of Kent; born May 24, 1819; succeeded to the crown June 20, 1837; crowned June 28, 1838; married her cousin, prince Albert of Saxe-Coburg-Gotha, Feb. 10, 1840, who died Dec. 14, 1861.

[See *England*, p. 258.]

QUEEN'S COLLEGES. See *Colleges in Ireland*.

QUEEN'S LAND. Moreton-bay, Australia, was established as a colony in 1859. Admiral sir George F. Bowen was appointed governor, and Brisbane, the capital, was made a bishopric. Population 23,450.

QUEEN'S THEATRE. See *Opera House, the Italian*.

QUEENSTOWN (Upper Canada). This town, on the river Niagara, was taken in the last war with America by the troops of the United States, Oct. 13, 1812; but was retaken by the British forces, who defeated the Americans with considerable loss in killed, wounded, and prisoners, on the same day. Queenstown suffered severely in this war.—The Cove of Cork was named QUEENSTOWN, Aug. 3, 1849, by the queen.

QUENTIN, ST. (N. France). Philip II. of Spain, assisted by the English, defeated the French at St. Quentin, Aug. 10, 1557; and in memory of his victory, the Spanish monarch in fulfilment of a vow he had made before the engagement, built the famous monastery at Escorial, which is called by the Spaniards the eighth wonder of the world. See *Escorial*.

QUERN. The quern, or handmill, is of Roman, or as some say, of Irish invention; but the latter is not likely, as Roman querns have been found in Yorkshire; and it is said by others that the Romans found querns there. No doubt exists, however, that the quern was in very early use in Ireland, as it is mentioned by her oldest historians.

QUESNOY (N. France), was taken by the Austrians, Sept. 11, 1793, but was recovered by the French Aug. 16, 1794. It surrendered to Prince Frederic of the Netherlands, June 29, 1815, after the battle of Waterloo.—It was here that cannon were first used, and called bombardiers. *Hénault*.

QUIBERON BAY (W. France). A British force landed here in 1746, but was repulsed. In the Bay admiral Hawke gained a complete victory over the French admiral Conflans. This most perilous and important action defeated the projected invasion of Great Britain, Nov. 20, 1759. Quiberon was taken possession of by some French regiments in the pay of England, July 3, 1795; but on July 21, owing to the treacherous conduct of some of these soldiers, the French republicans, under Hoche, retook it by surprise, and many of the emigrants were executed. About 900 of the troops, and nearly 1500 royalist inhabitants who had joined the regiments in the pay of Great Britain, effected their embarkation on board the ships. The remainder fell into the hands of the merciless enemy, together with such stores and ammunition as had been landed.

QUICKSILVER, in its liquid state, is commonly called virgin mercury. It is endowed with very extraordinary properties, and used to show the weight of the atmosphere, and its continual variations, &c. Its use in refining silver was discovered A.D. 1540. There are mines of it in various parts, the chief of which are at Almeida, in Spain, and at Idria, in Illyria; the latter, discovered by accident in 1497, for several years yielded 1200 tons. A mine was discovered at Ceylon in 1797. Quicksilver was congealed in winter at St. Petersburg, in 1759. It was congealed in England by a chemical process, without snow or ice, by Mr. Walker in 1787. Corrosive sublimate, a deadly poison, is a combination of mercury and chlorine. See *Calomel*.

QUIETISM, the doctrines of Molinos, a Spaniard (1627-96), whose work, the *Spiritual Guide*, published in 1675, was the foundation of a sect in France. He held that the purity of religion consisted in an internal silent meditation and recollection of the merits of Christ and the mercies of God. His doctrine was hence called Quietism from a kind of absolute rest and inaction in which the sect supposed the soul to be when arrived at that state of perfection called by them unitive life. Madame de la Mothe-Guyon was imprisoned in the Bastille for her visions and prophecies, but released through the interest of Fénelon archbishop of Cambray, between whom and Bossuet, bishop of Meaux, arose a controversy, 1697. These doctrines were condemned by pope Innocent XI. in 1685. *Nouv. Dict.*

QUILLS are said to have been first used for pens in A.D. 553; but some say not before 635. Minshew derives the word from the Teutonic. *Bailey*. Quills are for the most part plucked with great cruelty from living geese, swans, and turkeys; and all persons, from convenience, economy, and feeling, ought to prefer metallic pens, which came first into use about 1820. *Phillips*.

QUINCE, the *Pyrus Cydonia*, brought to these countries from Austria, before A.D. 1573. The Japan Quince, or *Pyrus Japonica*, brought hither from Japan, 1796.

QUININE, or **QUINIA**, an alkaloid (much used in medicine), discovered in 1820 by Pelletier and Caventou. It is a probable constituent of all genuine cinchona barks, especially of the yellow bark.

QUINQUAGESIMA SUNDAY. The observation of this Sunday was instituted by pope Gregory the Great, about 1572. The name of the first Sunday in Lent having been distinguished by the appellation of *Quadragesima*, and the three weeks preceding having been appropriated to the gradual introduction of the Lent fast, the three Sundays of these weeks were called by names significant of their position in the calendar: and reckoning by decades (tenths), the Sunday preceding Quadragesima received its present name, *Quinquagesima*, the second *Sexagesima*, and the third, *Septuagesima*.

QUINTILIANS, heretics in the second century, the disciples of Montanus, who took their name from Quintilia, a lady whom he had deceived by his pretended sanctity, and whom they regarded as a prophetess. They made the eucharist of bread and cheese, and allowed women to be priests and bishops. *Pardon*.

QUIRINUS, a Sabine god; afterwards identified with Romulus. L. Papirius Cursor, general in the Roman army, first directed a sun-dial in the temple of Quirinus, from which time the days began to be divided into hours, 293 B.C. *Aspin*. The sun-dial was sometimes called the Quirinus, from the original place in which it was set up. *Ashe*. The Roman citizens were termed *Quirites*.

QUITO, a presidency of Columbia (*which see*), celebrated as having been the scene of the measurement of a degree of the meridian, by the French and Spanish mathematicians in the reign of Louis XV. Forty thousand souls were hurled into eternity by a dreadful earthquake which almost overwhelmed the city Quito, Feb. 4, 1797. Since then violent shocks, but not so disastrous, occurred; till one, on March 29, 1859, when about 5000 persons were killed. See *Earthquakes*.

QUOITS, a game said to have originated with the Greeks. It was first played at the Olympic games, by the Idaeï Dactyli, fifty years after the Deluge of Deucalion, 1453 B.C. He who threw the discus farthest, and with the greatest dexterity, obtained the prize. Perseus, the grandson of Acrisius, by Danaë, having inadvertently slain his grandfather, in throwing a quoit, exchanged the kingdom of Argos, to which he was heir, for that of Tirynthus, and founded the kingdom of Mycenæ, about 1313 B.C.

QUO WARRANTO ACT, passed 1280. By it a writ may be directed to any person who holds any office or franchise to inquire by what authority he does so. Charles II. employed this power against the corporation of London in 1683. This writ was reversed in 1690.

R.

RACES, one of the exercises among the ancient games of Greece (*see Chariots*). Horse-races were known in England in very early times. Fitz-Stephen, who wrote in the days of Henry II. mentions the delight taken by the citizens of London in the diversion. In James's reign, Croydon in the south, and Garterly in the north were celebrated courses. Near York there were races, and the prize was a little golden bell, 1607. *Camden*. In the end of Charles I.'s reign, races were performed at Hyde Park. Charles II. patronised them, and instead of bells, gave a silver bowl, or cup, value 100 guineas. William III. added to the plates (as did queen Anne), and founded an academy for riding. Act for suppressing races by ponies and weak horses, 13 Geo. II. 1739. The most eminent races in England are those at Newmarket (*which see*), established by Charles II. in 1667; at Epsom, begun about 1711, by Mr. Parkhurst (annual since 1730, *Allen's Surrey*); at Ascot, begun by the duke of Cumberland, uncle to George III.; at Doncaster, established by col. St. Leger in 1778, and at Goodwood, begun by the duke of Richmond (who died in 1806). The Jockey Club began in the time of George II. Its latest rules (by which races are regulated) were enacted in 1828.

RACES, *continued.*

RACE-HORSES.

Flying Childers, bred in 1715 by the duke of Devonshire, was allowed by sportsmen to have been the fleetest horse that ever ran at Newmarket, or that was ever bred in the world; he ran four miles in six minutes and forty-eight seconds, or at the rate of 35½ miles an hour, carrying nine stone two pounds. He died in 1741, aged 26 years.

Eclipse was the fleetest horse that ran in England since the time of *Childers*; he was never beaten, and died in February, 1789, aged 25 years. His heart weighed 14 lb., which accounted for his wonderful spirit and courage. *Christie White's Hist. of the Turf.*

RECENT WINNERS OF "THE DERBY" AT EPSOM.

1846. Pyrrhus.	1852. Daniel O'Rourke.	1858. Beadsman.
1847. Cossack.	1853. West Australian.	1859. Musjid.
1848. Surplice.	1854. Andover.	1860. Thormanby.
1849. Flying Dutchman.	1855. Wild Dayrell.	1861. Kettledrum.
1850. Voltigeur.	1856. Ellington.	1862. Caractacus.
1851. Teddington.	1857. Blink Bonny.	

RACK, an engine of torture, for extracting a confession from criminals, was early known in the southern countries of Europe. The early Christians suffered by the rack, which was in later times an instrument of the Inquisition. The duke of Exeter, in the reign of Henry VI., erected a rack of torture (then called the duke of Exeter's daughter), now seen in the Tower, 1423. In the case of Felton, who murdered the duke of Buckingham, the judges of England nobly protested against the proposal of the privy council to put the assassin to the rack, as being contrary to the laws, 1628. See *Ravaillac*.

RADCLIFFE LIBRARY, OXFORD, founded under the will of Dr. John Radcliffe, the most eminent physician of his time. He had been physician to queen Anne, while princess Anne of Denmark; he offended her by telling her that her ailments were nothing more than the vapours, and she was not reconciled to him when she came to the throne; but in cases of emergency he was, nevertheless, consulted. He died Nov. 1, 1714, leaving 40,000*l.* to the university of Oxford for the founding a library, the first stone of which was laid May 17, 1737; the edifice was completely finished in 1749, and was opened April 13, in the same year. The library consists chiefly of works of medical and philosophical science.

RADCLIFFE OBSERVATORY, OXFORD, founded by the exertions of Dr. Hornsby, Savilian professor of astronomy, about 1771, and completed in 1794. The publication of the observations was commenced in 1842, by Mr. Manuel J. Johnson, the director, appointed in 1839.

RADSTADT, or RASTADT (in Baden), where a peace was signed between France and the emperor, March 6, 1714. It was signed by marshal Villars on the part of the French king, and by prince Eugene on the part of the emperor, and restored the German frontier to the terms of the peace of Ryswick.—THE CONGRESS OF RADSTADT, to treat of a general peace with the Germanic powers, was commenced Dec. 9, 1797; and negotiations were carried on throughout the year 1798. The atrocious massacre of the French plenipotentiaries at Radstadt by the Austrian regiment of Szeltzler, took place April 28, 1799.

RAFTS. The Greeks knew no other way of crossing their narrow seas but on rafts or beams tied to one another, until the use of shipping was brought among them by Danaüs of Egypt, when he fled from his brother Rameses, 1485 B.C. *Heylin.*

RAGGED SCHOOLS, free schools for outcast destitute ragged children, set up in large towns. In these schools the instruction is based on the scriptures, and most of the teachers are voluntary and unpaid. They existed in some parts of London previous to 1844, but did not receive their name till that year, when the "Ragged school union" was formed, principally by Mr. S. Stacey, and Mr. Wm. Locke (since Hon. Secretary). The earl of Shaftesbury is chairman. In 1856 there were 150 Ragged-school institutions:—

128 Sunday schools with 16,937 scholars.
98 Day schools with 13,037 scholars.
117 Evening schools with 8085 scholars.
84 Industrial classes with 3224 scholars.

163 Paid teachers in day schools.
126 Paid teachers in week night-schools.
43 Paid refuge and industrial masters.
2139 Voluntary teachers.

There were in 1856, 16 refugees, where 500 inmates are fed, lodged, clothed, and educated. Upwards of 500 boys and girls have emigrated to the colonies. In 1860, 560 ragged schools had been established. See *Shoe-black Brigade*.

RAGMAN ROLL (said to derive its name from Ragimunde, a papal legate in Scotland), contains the instruments of homage and fealty to Edward I., sworn to by the nobility and clergy of Scotland at Berwick in 1296. The original was given up to Robert Bruce, king of Scotland, in 1328, when his son David was contracted in marriage to the princess Joanna of England.

RAGUSA, a city on the Adriatic, on the south confines of Dalmatia, was taken by the Venetians, 1171, but soon after became an independent republic, 1358. It suffered much by an earthquake, 1667; was taken by the French in 1807, and given up to Austria in 1814.

RAILWAYS. There were short roads called tram-ways, in and about Newcastle, laid down by Mr. Beaumont so early as 1602; they were made of wood. They are thus mentioned in 1676:—"the manner of the carriage is by laying rails of timber from the colliery to the river, exactly straight and parallel; and bulky carts are made with four rollers fitting those rails, whereby the carriage is so easy that one horse will draw down four or five chaldron of coals, and is an immense benefit to the coal merchants." *Roger North.* They were made of iron at Whitehaven, in 1738.

An iron railway was laid down near Sheffield by John Curr in 1776, which was destroyed by the colliers. The first considerable iron railway was laid down at Colebrook Dale in 1786.

The first iron railway sanctioned by parliament in 1801 (with the exception of a few undertaken by canal companies as small branches to mines) was the Surrey iron railway (by horses), from the Thames at Wandsworth to Croydon.

Trevethick and Vivian obtained a patent for a high pressure locomotive engine in 1802.

William Hedley of Wylam colliery constructed a locomotive in 1813.

Stockton and Darlington railway, constructed by Edw. Pease and George Stephenson, was opened Sept. 27, 1825.

The Liverpool and Manchester railway commenced in Oct. 1826, and opened Sept. 15, 1830. See *Liverpool*. This railway led to similar enterprises throughout England and the continent.

The examination of railway schemes, before their introduction into parliament, by the Board of Trade, was ordered 1844.

7 & 8 Vict. c. 85, required companies to run cheap trains every day and to permit erection of electric telegraphs, 1844.

An act passed 10 Vict. Aug. 28, 1846, for constituting commissioners of railways, who have since been incorporated with the Board of Trade.

In 1824, the first locomotive, constructed by George Stephenson, travelled at the rate of 6 miles per hour; in 1829, the Rocket travelled at the rate of 15 miles per hour; * in 1834, the Fire-Fly attained a speed of 20 miles per hour; in 1839, the North Star moved with a velocity of 37 miles per hour; and at the present moment locomotives have attained a speed of 70 miles per hour. During the same period the quantity of fuel required for generating steam has been diminished five-sixths; that is, six tons of coal were formerly consumed for one at the present time, and other expenses are diminished in a corresponding ratio.

The CAPITAL invested in railway undertakings has become enormous. Up to 1840 it was 69 millions; on March 1, 1853, it was estimated at 303 millions; in 1859, at 330 millions; in 1860, 348,130,127. The railway mania and panic year, when 270 railway acts passed, was 1846.

An act for the better regulation of railways passed, 1854.

An act for compensating families of persons killed by accidents (see *Campbell's Act*) passed, 1846.

An act passed to enable railway companies to settle their differences with other companies by arbitration in 1859.

See *Street Railways*.

LIST OF THE PRINCIPAL RAILWAYS OF THE UNITED KINGDOM.

The railways are generally named after their termini.

<i>Railways.</i>	<i>Date of Opening.</i>		<i>Date of Opening.</i>
Arbroath and Forfar	Jan. 3, 1839	Dundee and Newtyle	Dec. 1831
Atmospheric Railway (<i>which see</i>)	1840	Dundee and Perth	May 22, 1847
Aylesbury branch	June 10, 1839	Dunfermline and Alloa; Stirling and Dunfermline	Aug. 1850
Bangor and Carnarvon	July, 1852	Durham and Sunderland	June 28, 1839
Belfast and county of Down	April, 1850	Eastern Counties	June 18, —
Birmingham and Derby	Aug. 12, 1839	Eastern Union (London and Colchester)	Mar. 29, 1843
Birmingham and Gloucester	Dec. 17, 1840	East and West India Docks and Birmingham Junction; from Blackwall railway to Camden Town	Aug. 1850
Birmingham, Wolverhampton, and Stour Valley	July, 1852	Edinburgh and Berwick	June 18, 1846
Brighton and Chichester	June 8, 1846	Edinburgh and Balcath	1831
Brighton and Hastings	June 27, —	Edinburgh and Glasgow	Feb. 8, 1842
Bristol and Exeter	May 1, 1844	Edinburgh, Leith, and Granton	1846
Bristol and Gloucester	July, 1845	Edinburgh and Musselburgh	July 14, 1847
Caledonian	1848	Ely and Huntingdon	—
Canterbury and Whitstable	May, 1830	Ely and Peterborough	Jan. —
Cheltenham and Swindon	May 12, 1845	Exeter and Crediton	May, 1851
Chepstow and Swansea, South Wales	June, 1850	Exeter and Plymouth (part)	May 29, 1846
Chester and Birkenhead	Sept. 22, 1840	Glasgow and Ayr	Sept. 19, 1840
Chester and Crewe	Oct. 1, —	Glasgow and Greenock	March 24, 1841
Cockermouth and Workington	April 28, 1847	Glasgow, Garmkirk, and Coatbridge	July, 1845
Colchester and Ipswich	June 15, 1846	Gloucester and Chepstow	Sept. 1851
Cork and Brandon	Dec. 1851	Grand Junction from Birmingham to Newton	July, 1837
Cornwall	May 1, 1859	Gravesend and Rochester	Feb. 10, 1845
Coventry and Leamington	Dec. 2, 1844	Great Western	June 30, 1841
Croydon and Epsom	May 17, 1847	Great Northern	1842
Dublin and Carlow	Aug. 10, 1846	Hertford branch of Eastern Counties	Oct. 31, 1843
Dublin and Drogheda	May 26, 1844	Ipswich and Bury St. Edmund's	Dec. 24, 1846
Dublin and Kingstown	Dec. 17, 1834	Kelso; branch of North British	June, 1850
Dublin and Belfast Junction	June, 1852		
Dundee and Arbroath	April 8, 1840		

* It obtained the prize of 500*l.* offered by the directors of the Liverpool and Manchester railway company for the best locomotive.

RAILWAYS, *continued.*

PERSONS KILLED BY RAILWAY ACCIDENTS.

	1851-5.	1853-6.	1855.	1857-8.	1858-9.	1859-60.	1861.
Total in one year	236	259	281	271	261	236	284
By causes beyond their own control	38	29	38	38	35	23	69

It has been calculated that out of 16,168,459 travellers by railway one person is killed, and out of 458,370 one is injured by causes beyond their own control.

MEMORABLE RAILWAY ACCIDENTS.

Very many, where only 2 persons killed, are not noted; in nearly all cases a large number were injured.

W. Huskisson, M.P., killed at the opening of the Liverpool and Manchester railway. Sept. 15, 1830	Croydon (Brighton and Dover): collision; 3 killed. Aug. 24, 1854
Great Corby (Newcastle and Carlisle): train runs off line; 3 killed Dec. 3, 1836	Burlington, between New York and Philadelphia; 21 killed Aug. 29, —
Brentwood (Eastern Counties): carriages overturned; 3 killed Aug. 27, 1840	Reading (South-Eastern): collision; 5 killed, Sept. 12, 1855
Cuckfield (London and Brighton): engine runs off line; 4 killed Oct. 2, 1841	Near Paris: collision; 9 killed Oct. 9, —
Sunnyhill cutting, near Reading: engine forced off the line; 8 killed Dec. 24, —	Between Thore and Moret: collision; 16 killed, Oct. 23, —
Versailles: carriages take fire, passengers locked in; 52 or 53 lives lost, including admiral D'Urville May 8, 1842	Campbell (N. Pennsylvanian): collision; above 100 killed July 17, 1856
Masborough (Midland Counties): collision; Mr. Boteler and others killed, many injured, Oct. 20, 1845	Dunkett (Waterford and Kilkenny): collision; 7 killed Nov. 19, —
Stratford (Eastern Counties): collision through great carelessness; Mr. Hind killed, many mutilated July 18, 1846	Kirby (Liverpool and Blackpool): collision; 200 injured, none killed June 27, 1857
Pevensy (Brighton and Hastings): collision; 40 persons injured Aug. 24, —	Lewisham (North Kent): collision; 11 killed, June 28, —
Clifton (Manchester and Bolton): express runs off line; 2 killed, many injured Dec. 15, —	Between Pyle and Port Talbot: collision; 4 killed Oct. 14, —
Chester (Chester and Shrewsbury): train runs off bridge; 4 killed, great number injured, May 18, 1847	Attleborough (North Western): train thrown off the line through a cow crossing the rails; 3 killed May 10, 1858
Wolverton (North Western): collision; 7 killed, many injured June 5, —	Near Mons, Belgium: coke waggon on the rails; 21 killed June, —
Shrivenham (Great Western): collision; 7 killed, many injured May 10, 1848	Chilham (South Eastern): either too great speed or broken axle-tree; 3 killed June 30, —
Carlisle (Caledonian): axle-tree of carriage breaks; 5 killed Feb. 10, 1849	Near Round Oak Station (Oxford and Wolverhampton)—Excursion train: collision; 14 killed Aug. 23, —
Frodsham Tunnel (Chester and Warrington Junction): collision; 6 killed April 30, 1851	Tottenham (Eastern Counties): engine wheel breaks; 6 killed Feb. 20, 1860
Newmarket Hill (Lewes and Brighton): train runs off line; 4 killed June 6, —	Helmshore (Lancashire and Yorkshire) excursion train: collision; 11 killed Sept. 4, —
Bicester (Buckinghamshire): collision; 6 killed Sept. 6, —	Atherstone (North Western): collision of mail and cattle trains; 11 killed Nov. 16, —
Burnley (Lancashire and Yorkshire): collision; 4 killed July 12, 1852	Near Wimbledon; Dr. Baly killed Jan. 28, 1861
Dixonfold (Lancashire and Yorkshire): engine wheels broke; 7 killed March 4, 1853	Railway tunnel falls in near Haddon Hall, Derbyshire; 5 men killed July 2, —
Near Straffan (Great Southern and Western, Ireland): collision; 13 killed Oct. 5, —	Clayton Tunnel (London and Brighton): collision; 23 killed, 176 injured Aug. 25, —
Near Marling, Norfolk (Eastern Counties): collision; 6 killed Jan. 12, 1854	Kentish Town (Hampstead Junction): 16 killed, 320 injured Sept. 2, —
	Market Harborough: collision; 1 killed and 50 injured Aug. 28, 1862
	Near Winchburgh (Edinburgh and Glasgow): collision; 18 killed, 100 wounded Oct. 13, —

RAINBOW. Its theory was developed by Kepler in 1611, and by René Descartes in 1629. See *Spectrum*.

RAMILIES (in Belgium); the site of a battle between the English under the duke of Marlborough and the allies on one side, and the French on the other, commanded by the elector of Bavaria and the marshal de Villeroy, on Whitsunday, May 23, (o.s. 12), 1706. The French, having no confidence in their commanders, or in the disposition of their army, were soon seized with a panic, and a general rout ensued: about 4000 of the allied army were slain in the engagement. The duke pursued and achieved one of his most glorious victories, which accelerated the fall of Louvain, Brussels, and other important places. Parliament rewarded the victor by settling the honours which had been conferred on himself, upon the male and female issue of his daughters.

RANGOON, maritime capital of the Burmese empire, was taken by sir A. Campbell on May 11, 1824, and remained in our possession till December 1826, when it was ceded to the

Burmese on condition of the payment of a sum of money, the reception of a British resident at Ava, and freedom of commerce. Oppression of the British merchants led to the second Burmese war: and Rangoon was taken by storm by general Godwin, April 14, 1852; and annexed to the British dominions in December following.

RANSOME'S ARTIFICIAL STONE is made by dissolving common flints (silica) in heated caustic alkali, and then adding fine sand; the mixture being pressed into moulds and heated to redness. It was made known by the inventor, Mr. Frederick Ransome, in 1848.

RANTERS, a name given to a sect which arose in 1645, similar to the Seekers, now termed Quakers. It is now applied to the Primitive Methodists, who separated from the main body in 1810. See *Wesleyans*.

RAPE was punished by the Saxon laws with death; by mutilation and the loss of eyes in William I.'s reign. This was mitigated by the statute of Westminster 1, 3 Edw. I. 1274. Made felony by stat. Westminster 2, 12 Edw. III. 1338; and without benefit of clergy, 18 Eliz. 1575. The earl of Castlehaven (lord Audley in England) was executed for inviting people to violate his wife, May 13, 1631. Rape made punishable by transportation in 1841; by penal servitude for life or a less period, in 1861.

RAPHIA, a port of Palestine. Here Antiochus III. of Syria, was defeated by Ptolemy Philopater of Egypt, 217 B.C.

RAPHOE (a bishopric in N. Ireland). St. Columb-kille, a man of great virtue and learning, and born of royal blood, founded a monastery in this place; and it was afterwards enlarged by other holy men; but it is the received opinion that St. Eunan erected the church into a cathedral, and was the first bishop of this see in the eighth century. Raphoe was united to the bishopric of Derry by act 3 & 4 Will. IV. 1833. See *Bishops*.

RASPBERRY. This fruit is not named among the fruits that were early introduced into this country from the continent of Europe. *Mortimer*. The Virginian raspberry, or *Rubus occidentalis*, was brought from North America before 1696. The flowering raspberry, or *Rubus odoratus*, came from North America in 1700.

RASTADT. See *Radstadt*.

RATHMINES (near Dublin). Colonel Jones, governor of Dublin castle, made a sally out, routed the marquis of Ormond at Rathmines, killed 4000 men, took 2517 prisoners, with their cannon, baggage and ammunition, Aug. 2, 1649, the period of the Irish rebellion of O'Neil, and others. This battle, followed up by other successes and much severity, discomfited the rebels in this quarter of the kingdom.

RATISBON (in Bavaria), was made a free imperial city about 1200. Several diets have been held here. A peace was concluded here between France and the emperor of Germany, by which was terminated the war for the Mantuan succession, signed Oct. 13, 1630. In later times, it was at Ratisbon, in a diet held there, that the German princes seceded from the Germanic Empire, and placed themselves under the protection of the emperor Napoleon of France, Aug. 1, 1806. Ratisbon was made an archbishopric in 1806, but secularised in 1810. In 1815 it was ceded to Bavaria, and became again an archbishopric in 1817.

RATS. The brown rat, improperly called the Norway rat, the great pest of our dwellings, came to us from Persia and southern Asia, according to the testimony of Pallas and F. Cuvier. Pallas describes the migratory nature of rats, and states that in the autumn of 1729 they arrived at Astrachan in such incredible numbers, that nothing could be done to oppose them; they came from the western deserts, nor did the waves of the Volga arrest their progress. They advanced to the vicinity of Paris in the middle of the sixteenth century, and in some parts of France are still unknown.

RAUCOUX (Belgium). Here marshal Saxe and the French army totally defeated the allies on Oct. 11, 1746.

RAVAILLAC'S MURDER OF HENRY IV. OF FRANCE. He assassinated the king, May 14, 1610.*

RAVENNA (on the Adriatic), a city of the Papal states. It was founded by Greek colonists. It fell under the Roman power about 234 B.C. It was favoured and embellished

* His punishment was most dreadful. He was carried to the Grève, and tied to the rack, a wooden engine in the shape of St. Andrew's cross. His right hand, within which was fastened the knife with which he did the murder, was first burned at a slow fire. Then the fleshy and most delicate parts of his body were torn with red-hot pincers, and into the gaping wounds melted lead, oil, pitch, and resin were poured. His body was so robust, that he endured this exquisite pain, and his strength resisted that of the four horses by which his limbs were to be pulled to pieces. The executioner in consequence cut him into quarters, and the spectators, who refused to pray for him, dragged him through the streets.

by the emperors, and Honorius made it the capital of the Empire of the West about A.D. 404. In 568 it became the capital of an exarchate. It was subdued by the Lombards in 752, and their king, Astolphus, in 754 surrendered it to Pepin, king of France, who gave it in 754 to the pope Stephen, and thus laid the foundation of the temporal power of the Holy see. On April 11, 1512, a great battle was fought between the French under the great Gaston de Foix (duke of Nemours and nephew of Louis XII.), and the Spanish and Papal armies. De Foix perished in the moment of his victory, and his death closed the fortunes of the French in Italy. The confederate army was cut to pieces. The duke of Nemours had performed prodigies of valour, but being too eager in his pursuit of the Spaniards, who were retreating in good order, he was slain. *Henault*. Ravenna became part of the kingdom of Italy in 1860.

READING, Berkshire. Here Alfred defeated the Danes A.D. 871. The abbey was founded in 1121 by Henry I. The last abbot was hanged in 1539 for denying the king's supremacy.

REAPING-MACHINES. One was invented in this country early in the present century, but failed from its intricacies. McCormick's American machine was invented about 1831, and perfected in 1846, and received a gold medal from the jurors of the Exhibition of 1851. Hussey's machine, also American, exhibited at the same time, was highly commended.

REASON was decreed to be worshipped as a Goddess by the French republicans, Nov. 10, 1793. Thomas Paine's "Age of Reason" was published in 1794-5.

REBELLIONS (OR INSURRECTIONS), IN BRITISH HISTORY. Among the most memorable from the period of the Norman conquest were the following :

Against William the Conqueror, in favour of Edgar Atheling, aided by the Scots and Danes, A.D. 1069. By Odo of Bayeux and others, against William II. in favour of his brother Robert, A.D. 1088. Extinguished, 1090.

Of the Welsh, who defeated the Normans and English, commenced in A.D. 1095.

In England, in favour of the empress Maude, A.D. 1139. Ended, 1153.

The rebellion of prince Richard against his father Henry II. A.D. 1189.

Of the Barons, April 1215. Compromised by the grant of *Magna Charta*, June 15 following. See *Magna Charta*.

Of the Barons A.D. 1261. This rebellion terminated in 1267.

Of the lords spiritual and temporal against Edward II. on account of his favourites, the Gavestons, 1312. Again, on account of the Spencers, 1321.

Of Walter the Tyler, of Deptford, vulgarly called *Wat Tyler*, occasioned by the brutal rudeness of a poll-tax collector to his daughter. He killed the collector in his rage, and raised a party to oppose the tax itself, 1381. See *Tyler*.

Of the duke of Gloucester, and other lords, in England, 1387.

Of Henry, duke of Lancaster, who caused Richard II. to be deposed, 1399.

In Ireland, when Roger, earl of March, the viceroy and heir presumptive to the crown, was slain, 1398.

Rebellion of the English and Welsh, 1400-2.

Against king Henry IV. by a number of confederated lords, 1403.

Of Jack Cade, in favour of the duke of York, against Henry VI. 1450. See *Cade's Insurrection*.

In favour of the house of York, 1452, which ended in the imprisonment of Henry VI. and seating Edward IV. of York on the throne, 1461.

Under Warwick and Clarence, 1470, which ended with the expulsion of Edward IV. and the restoration of Henry VI. the same year.

Under Edward IV. 1471, which ended with the death of Henry VI.

Of the earl of Richmond, against Richard III. 1485, which ended with the death of Richard.

Under Lambert Simnel, who pretended to be Richard III.'s nephew, 1486, which ended the same year in discovering that Simnel was a baker's son; he was pardoned.

Under Perkin Warbeck, 1492, which ended in the execution of Warbeck.

Under Flannock, owing to taxes, ended with the battle of Blackheath, 1497.

Of the English in the West, to restore the ancient liturgy, &c. 1549; suppressed same year.

In Norfolk, headed by Ket, the tanner, but soon suppressed, Aug. 1549.

In favour of lady Jane Grey, against queen Mary. Lady Jane was proclaimed queen of England on death of Edward VI. July 10, 1553; but she resigned the crown to Mary a few days afterwards; she was beheaded for high treason, in the Tower, Feb. 12, 1554, aged 17.

Of Sir Thomas Wyatt and others, on account of queen Mary's marriage with Philip of Spain, &c. 1554.

Of the Roman Catholic earls of Northumberland and Westmoreland against queen Elizabeth, Nov. and Dec. 1567. The former fled to Scotland, but was given up by the regent Murray and executed.

Of the Irish, under the earl of Tyrone, 1599, suppressed in 1601.

Under the earl of Essex, against queen Elizabeth, 1600; it ended in his death, 1601.

Of the Irish under Roger More, sir Phelim O'Neil, &c. against the English in Ireland; it ended in 1651.

Rebellion of the Scots, 1666; soon afterwards put down.

Under the duke of Monmouth, 1685; it ended in his death.

Of the Scots in favour of the Old Pretender, 1715; quelled in 1716.

Of the Scots, under the Young Pretender, 1745 suppressed in 1746, when lords Lovat, Balmerino, and Kilmarnock were beheaded.

Of the Americans, on account of taxation, 1774. This rebellion led to a disastrous war, to the loss of our chief North American colonies, and to the independence of the United States, 1782.

In Ireland, called the *Great Rebellion*, when great numbers took up arms, commenced May 24, 1798; suppressed next year.

Again in Ireland, under Robert Emmett, a gifted enthusiast, July 23, 1803, when lord Kilwarden was killed with several others, by the insurgents.

Canadian Insurrection (*which see*), Dec. 1837 to Nov. 1838.

Of Chartists at Newport (*which see*), Nov. 3, 1839.

Smith O'Brien's silly Irish rebellion; terminated in the defeat and dispersion of a multitude of his deluded followers by sub-inspector Trant and about sixty police constables, on Boulagh common, Ballingary, co. Tipperary, July 29, 1848. See *Ireland*.

Rebellion in India (*see India*), 1857-8.

RECEIPTS FOR MONEY. Receipts were first taxed by a stamp-duty in 1783. The act was amended in 1784, 1791, *et seq.*, and receipts were taxed by a duty varying according to the amount of the money received, in all transactions. Stamps required on bills of exchange, notes, and receipts in Ireland, by stat. 35 Geo. III. 1795. See *Bills of Exchange*. The uniform stamp of one penny on receipts, for all sums above £2, was enacted by 16 & 17 Vict. c. 59 (Aug. 4, 1853). See *Stamps*.

RECITATIVE, a species of singing, differing but little from ordinary speaking; and used for narratives in operas, is said to have been first employed at Rome by Emilio del Cavaliere, who disputed the claim of Rinuccini to the introduction of the Italian opera, 1600. See *Opera*. It was soon afterwards adopted in other parts of Italy, and throughout Europe.

RECORDER, the first judicial officer of great corporations. The first recorder of London was Jeffrey de Norton, alderman, 1298; Russell Gurney, Esq., Q.C., the present recorder, was elected 1856. The salary, originally 10*l.* per annum, is now 250*l.* (for life).

RECORDS, PUBLIC, IN ENGLAND, began to be regularly preserved A.D. 1100, by order of Henry I. The repositories which possessed materials the most ancient and interesting to the historian were, the Chapter-house of Westminster Abbey, the Tower of London, and the Queen's Remembrancer's offices of the exchequer. The early records of Scotland, going from London, were lost by shipwreck in 1298. In Ireland, the council-chamber and most of the records were burned, 1711. Public Records act, 2 Vict. c. 94, 10 Aug. 1838.—A new RECORD OFFICE has been erected on the Rolls estate, between Chancery and Fetter lanes, to which the records will be gradually removed.

RECREATION. See *Playground*.

REDHILL. See *Reformatory Schools*.

REFLECTORS. See *Burning-glass*.

REFORM IN PARLIAMENT, a chief source of agitation for many years. Mr. Pitt's motion for a reform in parliament was lost by a majority of 20 in 1782, of 44 in 1783, and of 74 in 1785. The discussions were most remarkable. The public mind was greatly excited on the subject till its settlement. The first ministerial measure of Reform was in Earl Grey's administration, when it was proposed in the house of commons by lord John Russell, March 1, 1831.

BILL OF 1831.

First division; *second* reading; for it, 302; against it, 301—majority, ONE, March 22. On motion for a committee, General Gascoyne moved an amendment "that the number of representatives for England and Wales ought not to be diminished." Amendment carried on a division, 299 to 291—majority, EIGHT, April 19. The bill was abandoned and parliament dissolved, April 22.

A new parliament assembled, June 14. Bill again introduced, June 24. Division on *second* reading: for it, 367; against it, 251—majority, 116, July 4. Division on *third* reading of the bill: for it, 349; against it, 236—majority, 113, Sept. 21.

In the LORDS—first division on *second* reading: lord Wharfedale moved "that the bill be read that day six months." For the amendment, 199; against it, 158—majority, FORTY-ONE, Oct. 8. [Parliament prorogued, Oct. 20, 1831.]

BILL OF 1832.*

Read in the COMMONS a first time, without a division, December 12, 1831. *Second* reading; division, viz.: for the bill, 324; against it, 162—majority, 162, Dec. 17, 1831. *Third* reading; division, viz.: for the bill, 355; against it, 239—majority for it, 116, March 23, 1832.

In the LORDS—read a first time on motion of earl

Grey, March 26. *Second* reading: for the bill, 184; against it, 175—majority, NINE, April 14. In the committee lord Lyndhurst moved "that the question of enfranchisement should precede that of disfranchisement." The division was 151 and 116—majority against ministers, THIRTY-FIVE, May 7. Resignation of ministers, May 9; great public excitement ensued, and they were induced to resume office on the king granting them full power to secure majorities, by the creation of new peers.

In the LORDS, the bill was carried through the committee, May 30; read a *third* time: 106 against 22—majority EIGHTY-FOUR, June 4; received the royal assent, June 7, 1832.

The royal assent given to the Scotch Reform Bill, July 17; and to the Irish one, Aug. 7, 1832.

Lord John Russell introduced a new reform bill, Feb. 13, 1854, which was withdrawn, April 11, 1854, in consequence of the war with Russia.

On Feb. 28, 1859, Mr. Disraeli brought in a reform bill, which was rejected by the commons on March 31, by a majority of 39. This led to a dissolution of parliament, and eventually a change of ministry. The new government (lords Palmerston and J. Russell) brought forward a new bill, March 1, 1860; but withdrew it June 11. No reform bill was brought forward by the government in 1861 and 1862. See *Commons*, note.

REFORMATION, THE. Efforts for the reformation of the church may be traced to the reign of Charlemagne, when Paulinus, bishop of Aquileia, employed his voice and pen to accomplish this object. The principal reformers were Wickliffe, Huss, Jerome of Prague, Savonarola, Luther, Zuinglius, Tyndal, Calvin, Melancthon, Erasmus, Cramer, Latimer, Knox, and Browne. See *Wickliffites*, *Protestants*, *Calvinists*, *Lutherans*, *Presbyterianism*, &c. The era of the reformation are as follow:

* By this "Act to amend the Representation of the People" (2 & 3 Will. 4, c. 45), 56 boroughs in England were disfranchised (schedule A.), 30 were reduced to one member only (B.); 22 new boroughs were created to send two members (C.), and 20 to send one member (D.), and other important changes were made.

REFORMATION, THE, *continued.*

In England (<i>Wickliffe</i>)	about A.D. 1360	In Sweden (<i>Petri</i>)	A.D. 1530
In Bohemia (<i>Huss</i>)	1405	In England (<i>Henry VIII.</i>)	1534
In Germany (<i>Luther</i>)	1517	In Ireland (<i>Archbishop George Browne</i>)	1535
In Switzerland (<i>Zwinglius</i>)	1519	In England, completed, (<i>Cranmer, Bucer, Fagius,</i>	
In Denmark	1521	&c.), 1547; annulled by Mary, 1553; restored	
In Prussia	1527	by Elizabeth	1558
In France (<i>Calvin</i>), see <i>Huguenots</i>	1529	In Scotland (<i>Knox</i>), established	1560
Protestants first so called	—	In the Netherlands, established	1562

REFORMATORY SCHOOLS. The increasing number of juvenile delinquents* has long occupied the minds of philanthropists, and various schemes have been devised to check the evil. Two great institutions have been recently set up for this purpose; the Reformatory Schools at Mettray, near Tours in France, and Redhill, near Reigate in Surrey. The former was established in 1839, by M. de Metz, formerly a counsellor at Paris; warmly seconded in his beneficent work by the vicomte de Courcelles, who gave the estate on which the establishment is placed. The latter is situated on land purchased in 1849 by the Philanthropic Society and was placed under the direction of the rev. Sydney Turner. The first stone of the building was laid April 30, 1849, by the prince consort. The inmates of these establishments are instructed in farm labour, and are divided into so-called families. In 1854 the Juvenile Offenders act was passed. In 1851 and 1853 great meetings were held on the subject: and in Aug. 1856, the first grand conference of the National Reformatory Union was held. In 1852 the North-West London Preventive and Reformatory Institution, in the New Road, was established: in this, all kinds of trades are taught. Acts for establishing reformatory schools were passed in 1857 and 1858. In 1860 there had been established in the United Kingdom 172 reformatories, capable of accommodating 15,000 inmates.

REFRESHMENT HOUSES for the sale of wine, &c., are licensed in pursuance of an act passed in 1860, amended in 1861.

REGENCY BILLS. One was proposed to parliament in consequence of the mental illness of George III., and debated, Dec. 10, 1788. It was relinquished on his majesty's recovery, Feb. 26, 1789. The return of the malady led to the prince of Wales (afterwards George IV.) being sworn in before the privy council as regent of the kingdom, Feb. 5, 1811. The Regency Bill providing for the administration of the government, should the crown descend to the princess Victoria while under eighteen years of age, passed 1 Will. IV., Dec. 23, 1830. A Regency Bill appointing prince Albert regent in the event of the demise of the queen, should her next lineal successor be under age, Aug. 4, 1840.

REGENTS. See *Protectorates*.

REGENT'S CANAL began at Paddington, where it joins a cut to the Grand Junction, passes under Maida Hill, continues its course by the Regent's Park to Islington, where another subterranean excavation, about three-quarters of a mile in length, has been formed for its passage. It then proceeds by Hoxton, Hackney, Mile-end, to Limehouse, where it joins the Thames. The whole length of it is nine miles; it comprises twelve locks and thirty-seven bridges. Opened Aug. 1, 1820.

REGENT'S PARK, originally part of the grounds belonging to a palace of queen Elizabeth, near the north end of Tottenham-court road; pulled down in 1791. Since 1600, the property had been let to various persons, but the leases having expired it reverted to the crown; and in 1814 great improvements were commenced under the direction of Mr. Nash. The park consists of about 450 acres: within it are the gardens of the Zoological Society and the Royal Botanical Society.

REGGIO. See *Rhegium*.

REGIMENTS OF INFANTRY were formed in France about 1588. See *Infantry*. The following are the dates of the establishment of several of the British regiments:

CAVALRY.		Three Indian regiments (19th, 20th, and 21st),	
The Dragoon Guards, the Royal Irish, and the		added	Aug. 1861
Scots Greys were formed by James II., about 1685-6			
Oxford Blues are erroneously said to have been		INFANTRY.	
formed in the reign of Henry VIII.; they		Coldstream Guards, established by Monk, in 1660	
derive their name from their colonel, the		1st Royal	1633
earl of Oxford	in 1661	and Queen's Royal	1661

* It was calculated (about 1856) that there were in London 30,000, and in England 100,000 youths under 17 leading a vagabond life, and that out of 15,000 of those who were committed for trial nearly half were in custody for the first time.

REGIMENTS OF INFANTRY, *continued*.

3rd Buffs	1660	26th Cameronian	1689
4th King's Own	1685	100th Canadian	1858
5th Northumberland Fusiliers	1685	101st to 109th (Indian), added	Aug. 1861

The Highland regiments are the 42nd, 71st, 72nd, 78th, 79th, and 92nd.

REGISTERS, PAROCHIAL, were established by Cromwell, lord Essex, by which the dates of births, marriages and burials, became ascertainable, 27 Hen. VIII. 1530-8. This measure was opposed by the people, who feared some new taxation. A stamp-tax was laid on them in 1784. Laws for their better regulation were enacted in 1813 *et seq.* The great Registration act (introduced by lord John Russell), 6 & 7 Will. IV. c. 86, passed Aug. 17, 1836. See *Bills of Mortality*, &c.

REGISTERS. The registering of deeds and conveyances disposing of real estates was appointed to be effected in Yorkshire and in Middlesex, 2 Anne, 1703 *et seq.* By this regulation, greater security was made for purchasers and mortgagees; and the value of estates increased in the register counties. Wills have been for a series of years kept and registered, in London, at Doctors' Commons. See *Wills*. The registering of shipping in the Thames was commenced 1786; and throughout England, 1787; and several acts and amendments of acts have since followed for keeping and improving registers.

REGIUM DONUM (Royal gift), an allowance granted by the sovereign to dissenting ministers in Ireland. It began in 1723. Its acceptance has been censured by some nonconformists.

REICHSRATH, the representative council of the empire of Austria, reconstituted by a decree, March 5; met on May 31, 1860. In May, 1861, the upper house consisted of 17 spiritual, 55 hereditary, and 39 peers. The lower house consisted of 136 elected deputies. No representatives came from Hungary, Transylvania, Venetia, the Banat, Slavonia, Croatia, and Istria.

REIGN OF TERROR. Maximilien Robespierre headed the populace in the Champ de Mars, in Paris, demanding the dethronement of the king, July 17, 1791. He was triumphant in 1793, and great numbers of eminent men and citizens were sacrificed during his sanguinary administration. Billaud Varennes denounced the tyranny of Robespierre in the tribune, July 28, 1794. Cries of "Down with the tyrant!" resounded through the hall; and he was immediately ordered to the place of execution and suffered death. A large number of his companions were also executed. See *France*. This has been termed the *Red Terror*. The re-action, disgraced by many atrocious acts of wanton cruelty, has been termed the *White Terror*. The Jesuits were conspicuous in the destruction of their adversaries.

RELIGION (from *religio*, I bind again, in the sense of a vow or oath) comprehends a belief in the being and perfections of God, and obedience to his commandments. The Christian religion is set forth in the New Testament, which is the spirit and interpreter of the old. Departure from these scriptures has been the origin of all corrupt forms of religion, as foretold in them. See *Mahometanism*, and other religions and sects under their names. The population of the globe with reference to religious worship, is given by Balbi (who assumed the total population to be 1,050,000,000), and Dieterici (who assumed it to be 1,288,000,000), as follows:

	Balbi (1836).	Dieterici (1861).		Balbi (1836).	Dieterici (1861).
Jews	4,500,000	5,000,000	Idolators, &c. not professing		
Christians	225,000,000	335,000,000	the Jewish, Christian, or		
Roman Catholics	160,000,000	170,000,000	Mahometan worship	665,500,000	800,000,000
Mahometans	155,000,000	160,000,000			

REMONSTRANCE. A most vehement one was drawn up by the house of commons, and presented to king Charles I. Dec. 1, 1641. It consisted of 206 articles, and dwelt bitterly on all the king's illegal and oppressive acts. It was largely circulated and did his cause great mischief.

REMONSTRANTS. See *Arminians*.

RENTS were first made payable in money, instead of in kind, A.D. 1135. Numerous statutes have been enacted in various reigns to define the relations and regulate the dealings between landlord and tenant. By the act 8 Anne, no goods are removable from tenements under an execution until the rent shall have been paid to the landlord by the sheriff, 1709. In England, the duke of Sutherland received his rents in the value of corn, and in Scotland, in the value of wool and sheep. The rental of England, including land, houses, and mines, was six millions about the year 1600, and twelve years' purchase the value of land: About 1690, the rental amounted to fourteen millions, and the land was worth eighteen years'

purchase. *Davenant on the Revenues.* The present rental of the United Kingdom has been estimated in the present century at 127 millions. See *Land, &c.*

REPEAL OF THE UNION, IRELAND. An Irish Association was formed with this object under the auspices of Mr. O'Connell, in 1829.

A proclamation of the lord-lieutenant prohibited the meetings of a society "leagued for the purpose of procuring a repeal of the union, under the name of the Irish Society for Legal and Legislative Relief, or the Anti-Union Society." Oct. 18, 1830

The house of commons, by a majority of 484, reject Mr. O'Connell's motion for repeal, April 27, 1834

A new association in 1841, 1842, and 1843 became more violent. Assemblies of the lower classes of the people were held in the last-named year, in various parts of Ireland, some of them amounting to 150,000 persons, and called "monster meetings."

The great meeting at Trim took place on March 19; other meetings were held at Mullingar, Cork, and Longford, on May 14, 21, and 28, respectively; at Drogheda, Kilkenny, Mal-

low, and Dundalk, on June 5, 8, 11, and 29; at Donnybrook and Balinglass, July 3 and 20; at Tara, Aug. 15; at Longhrea, Clifton, and Lismere, Sept. 10, 17, and 24; and at Mullaghmast Oct. 1, 1843

A meeting to be held at Clontarf, on Oct. 8, was prevented by government; and Mr. O'Connell and his chief associates were brought to trial for political conspiracy, Jan. 15, 1844, and convicted, Feb. 12; but the sentence was reversed by the house of lords, Sept. 4. See *Trials.*

The association for the repeal of the union continued for some time under the direction of Mr. John O'Connell, but was little regarded. The total "repeal rent" amounted to 134,379l.

A vain attempt was made in Dublin to revive repeal agitation Dec. 4, 1860

REPUBLICANS. See *Democrats.* **REPUBLICS.** See *Athens, Rome, Genoa, Venice, &c.*

REQUESTS, COURTS OF. See *Court of Conscience.*

RESERVE FORCES. In the summer of 1859, acts were passed to provide for the establishment of a military reserve force of men who have been in her majesty's service (not to exceed 20,000), and a volunteer reserve force of seamen not to exceed 30,000.

RESTORATION, THE, emphatically so called, being that of king Charles II. to the crown of England, after an interregnum of eleven years and four months, between Jan. 30, 1649, when Charles I. was beheaded, and May 29, 1660, on which latter day the exiled monarch was restored, and entered London amidst the enthusiastic acclamations of the people. See *England.*

RETREAT OF THE GREEKS, 10,000 in number, who had joined the army of the younger Cyrus in his revolt against his brother Artaxerxes Mnemon. Cyrus was defeated and slain at Cunaxa, 401 B.C. Artaxerxes having enticed the Greek leaders into his power and killed them, Xenophon was called by his countrymen to the command. He rose superior to danger, and though under continual alarms from sudden attacks, he led them across rapid rivers, through vast deserts, over the tops of mountains, till he reached the sea. The Greeks returned home after a march of 1155 parasangs or leagues, which was performed in 215 days, after the absence of fifteen months. This retreat has been immortalised by the interesting account given by its conductor.

REUSS-GREIZ and REUSS-SCHLEITZ, two principalities in central Germany, with a united population of 121,200. The reigning family sprang from Ekbert count of Osterode in the tenth century. The princely dignity was conferred on the family by the emperor Sigismund in 1426.

1856. Reigning prince of Reuss-Schleitz, Henry LXIX. | 1859. Reigning prince of Reuss-Greiz, Henry XXII.
Sept. 16; born May 19, 1792. | Nov. 8; born March 28, 1846.

REVENUE, PUBLIC, OF ENGLAND. The revenue collected for the civil list, and for all the other charges of government, as well ordinary as extraordinary, was 1,200,000l. per annum, in 1660, the first after the restoration of Charles II. in 1690 was raised 6,000,000l. every branch of the revenue being anticipated; this was the origin of the funds and the national debt, 2 William and Mary. *Salmon.* The revenue laws were amended in 1861.

GENERAL VIEW OF THE PUBLIC REVENUE SINCE THE CONQUEST.

William I.	£400,000	Henry IV.	£100,000	Charles I.	£295,819
William Rufus	350,000	Henry V.	76,643	Commonwealth	1,577,247
Henry I.	300,000	Henry VI.	64,076	Charles II.	1,490,000
Stephen	250,000	Edward IV.	***	James II.	2,001,855
Henry II.	200,000	Edward V.	100,000	William III.	3,895,205
Richard I.	150,000	Richard III.	130,000	Anne (at the Union)	5,691,803
John	100,000	Henry VII.	400,000	George I.	6,762,643
Henry III.	80,000	Henry VIII.	800,000	George II.	8,522,540
Edward I.	150,000	Edward VI.	400,000	George III. 1788	15,572,071
Edward II.	100,000	Mary	450,000	United Kingdom, 1820.	65,509,570
Edward III.	154,000	Elizabeth	500,000	George IV. 1825	62,871,300
Richard II.	130,000	James I.	600,000	William IV. 1830	55,431,317

Previously to 1834 there had been an average *surplus* of 2½ millions since 1849. In consequence of the Russian war the *deficiency* in 1854 was 3,209,059*l*.; in 1855, 21,141,183*l*.; in 1856, 10,104,412*l*. In 1857 there was a *surplus* of 36,097*l*.; in 1858, of 1,127,657*l*.; in 1859 a *deficiency* of 2,019,584*l*.; and in 1861 a *deficiency* of 2,214,208*l*.

REVIEWS. The *Journal des Savans*, published on Jan. 5, 1665, by Denis de Salo, under the name of Hédouville, was the parent of critical journals. It was soon imitated throughout Europe, and was itself translated into various languages. It is still published. George III. spoke of this publication to Dr. Johnson, in the private interview with which he was honoured by his majesty, in the library of the queen's house, in Feb. 1767. *Boswell*. The *Bibliothèque Anglaise* came out, 1716-27. For Military **REVIEWS**, see *Volunteers*.

REVIVALS. Great excitement on the subject of religion arose in the United States in 1857. In the autumn of 1859, it invaded Scotland, the north of Ireland (particularly Belfast), and England. Many meetings were held for prayers and preaching throughout the week, as well as on Sundays. Some persons believe that this work is from God; others consider it to be merely a species of hysterical mania, similar to the fanatical exhibitions so contagious in the middle ages.

REVOLUTIONS : ANCIENT HISTORY. The Assyrian empire destroyed, and that of the Medes and Persians founded by Cyrus the Great, 536 B.C. The Macedonian empire founded on the destruction of the Persian, on the defeat of Darius Codomanus, by Alexander the Great, 331 B.C. The Roman empire established, by Julius Cæsar, 47 B.C. The empire of the Western Franks began under Charlemagne, A.D. 800. This empire underwent a new revolution, and became the German empire, under Rodolph of Hapsburg, the head of the house of Austria, A.D. 1273.

REVOLVERS. See *Pistols*.

RHEGIUM (now **REGGIO**), S. Italy, a Greek colony, flourished in the 5th century B.C. It was held by the Campanian legion 281-271, afterwards severely punished for its rebellion. Reggio was taken by Garibaldi, Aug. 1860.

RHEIMS (N. France). The principal church here was built before A.D. 406; it was rebuilt in the twelfth century, and is now very beautiful. The corpse of St. Remy, the archbishop, is preserved behind the high altar, in a magnificent shrine. The kings of France were crowned at Rheims; probably because Clovis the founder of the French monarchy, when converted from paganism, was baptised in the cathedral here in 496. Several ecclesiastical councils have been held here. The city was taken and retaken several times in the last months of the French war, 1814.

RHETORIC. Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B.C. Rhetoric was first taught in Latin at Rome by Photius Gallus, about 87 B.C. He taught Cicero, who said, "We are first to consider what is to be said; secondly, how; thirdly, in what words; and lastly, how it is to be ornamented." A regius professor of rhetoric was appointed in Edinburgh, April 20, 1762, when Dr. Blair became first professor. We have now professors of rhetoric in all our universities.

RHINE. This river was fortified as the frontier of the Roman empire, A.D. 298 and 369, and became the boundary of the French republic in 1794. See *Confederation*.

* After deducting expenses of collection.

RHODE ISLAND (N. America), celebrated for its beautiful women, and called by travellers, when in its most flourishing state, the "Eden of America." Settled about 1635. It was taken in the war of independence by the British, Dec. 8, 1776; but was evacuated by them, Oct. 25, 1779. Rhode Island suffered great injury during the revolutionary war, but it has latterly improved in every respect, and again flourishes.

RHODES, an island on the coast of Asia Minor, is said to have been peopled from Crete, as early as 916 B.C. The Rhodians were famous navigators, masters of the sea, and institutors of a maritime code which was afterwards adopted by the Romans. The city was built about 432 and flourished 300—200 B.C. See *Colossus*. Rhodes, long an ally of the Romans, was taken by the emperor Vespasian, A.D. 71. It was held by the Knights Hospitallers from 1309 to 1522, when it was conquered by the Turks, who still retain it. The knights retired to Malta (*which see*).

RHODIUM, a rare metal, discovered in platinum ore, by Dr. Wollaston in 1804. It has been used for the points of metallic pens.

RIALTO, BRIDGE OF THE, at Venice (mentioned by Shakspeare in his "*Merchant of Venice*"), was built about 1590, and consists of a noble arch of marble across the Grand Canal. This arch is ninety feet wide, twenty-four high, and is remarkable for its height and solidity.

RIBBONISM, a term given to the principles of a secret society in Ireland, organised to retaliate on landlords any injuries done to their tenants, not scrupling even at assassination. To the Ribbonmen are attributed many of the agrarian murders during the last 30 years. See *Ireland*.

RICHMOND (Surrey), anciently called Sheen, which in the Saxon tongue, signifies *resplendent*. Here stood a palace in which Edw. I. and II. resided, and Edw. III. died, 1377. Here also died Anne, queen of Richard II. The palace was repaired by Henry V., who founded three religious houses near it. In 1497 it was destroyed by fire; but Henry VII. rebuilt it, and commanded that the village should be called Richmond, he having borne the title of earl of Richmond (Yorkshire) before he obtained the crown; and here he died in 1509. Queen Elizabeth was a prisoner in this palace for a short time during the reign of her sister. When she became queen, it was one of her favourite places of residence; and here she died, March 24, 1603. It was afterwards the residence of Henry prince of Wales. The beautiful park and gardens were enclosed by Charles I. The observatory was built by sir W. Chambers in 1769. In Richmond, Thomson "sang the Seasons and their change;" and died, Aug. 27, 1748.—**RICHMOND** (Virginia), now considered the capital of the southern confederate states. The congress adjourned from Montgomery, Alabama, to Richmond, where it met July 20, 1861. See *United States*, 1861.

RIFLE CORPS. See *National Association* and *Fire-arms*.

RIGHTS, BILL OF, one of the bulwarks of the constitution, obtained by parliament from king Charles I. although he had endeavoured by various artifices to avoid granting it. June 26, 1628. To the PETITION OF RIGHTS, preferred March 17, 1627-8, his majesty answered, "I will that right be done, according to the laws and customs of the realm." Both houses addressed the king for a fuller answer to their petition of rights, whereupon he gave them an answer less evasive, "*Soit fait comme il est désiré*," June 7, 1628. An important declaration was made by the lords and commons of England to the prince and princess of Orange, in 1629, in an act "declaring the rights and liberties of the subject, and settling the succession of the crown."

RINGS: anciently they had a seal or signet engraved on them, to seal writings, and they are so used to this day. In *Genesis* xxviii. 18, it is said that Pharaoh gave Joseph his ring from off his finger. Rings are now put upon women's fourth finger *at marriage*; but the first use of rings by the Jews was at the espousal or contract *before marriage*.

RIO JANEIRO (S. America) was made capital of the empire of Brazil in 1807.

RIOTS, in BRITISH HISTORY. The riotous assembling of twelve or more persons, and their not dispersing upon proclamation, was first made high treason by a statute enacted 2 & 3 Edw. VI. 1548-9. The present operative statute, which is usually understood as the *Riot Act*, was passed 1 Geo. I. 1715. See *below*.

Some riotous citizens of London demolished the convent belonging to Westminster abbey; the ringleader was hanged, and the rest had their hands and feet cut off, 6 Hen. III. 1221. Goldsmiths' and Tailors' companies fought in the

streets of London; several were killed; the sheriffs quelled it, and thirteen were hanged, 1262. A riot at Norwich; the rioters burn the cathedral and monastery; the king went thither, and saw the ringleaders executed, 1271.

RIOTS, *continued.*

Riot of Evil May-day (*which see*), 1517.
 Dr. Lamb killed by the mob, June, 1628.
 A riot, on pretence of pulling down houses of ill-fame; several of the ringleaders hanged, 1668.
 Another, at Guildhall, at the election of sheriffs; several considerable persons who seized the lord mayor, were concerned, 1682.
 At Edinburgh and Dumfries, on account of the Union, 1707.
 In London, on account of Dr. Sacheverel's trial; several dissenting meeting-houses were broken open, Feb. 1710.
 Riot of the Whig and Tory mobs, called Ormond and Newcastle mobs, 1715.
 The *May-house* riot, in Salisbury-court, between the Whigs and Tories. The riot quelled by the guards. Five rioters hanged, July, 1716.
 Of the Spitalfields weavers, on account of employing workmen come over from Ireland. Quelled by the military, but many lives lost, 1736.
 Porteous riot at Edinburgh (*see Porteous*), 1736.
 The sailors in Worcestershire march to Birmingham, and make their own terms with the iron-merchants there, 1737.
 Of sailors who were robbed and ill-used at a house of ill-fame in the Strand; being assisted by a large body, they pulled down the house and destroyed the furniture of several other houses, turning the women naked into the streets, 1749.
 Of the Spitalfields weavers: the duke of Bedford narrowly escaped being killed; many lives lost, 1765.
 A mob in St. George's Fields, to see Mr. Wilkes in the King's Bench prison; the military aid indiscreetly called for by the justices of the peace, and several innocent persons, particularly young Allen, fired upon, and killed, 1768.
 Gordon's "*No Popery*" riots, 1780.
 At Birmingham, on account of commemorating the French revolution, July 14, 1791, when several houses were destroyed.
 In various parts of Scotland, on account of the Militia act, Aug. 1797, when several were killed.
 At Maidstone, at the trial of Arthur O'Connor and others, May 22, 1798; the earl of Thanet, Mr. Ferguson, and others, were active in endeavouring to rescue O'Connor, for which they were tried and convicted, April 25, 1799.
 At Liverpool, occasioned by a quarrel between a party of dragons and a press-gang, June 27, 1809.
 O.P. riot (*which see*) at Covent-garden, Sept. 1809.
 In Piccadilly, in consequence of the house of commons committing sir Francis Burdett to the Tower, April 6, 1810.
 At Sheffield, during which 800 muskets belonging to the local militia were destroyed, April 14, 1812.
 Machinery destroyed by rioters at Nottingham from Nov. 1811 to Jan. 1812.
 In various parts of the north of England, by the Luddites, during 1811 and 1812.
 At the Theatre Royal, Dublin, on account of the celebrated *Dog of Montargis*, several nights, Dec. 1811.
 Alarming riots at Westminster, on account of the Corn Bill; they lasted several days, March, 1815.
 At the depot at Dartmoor, in quelling which seven Americans were killed, and thirty-five wounded April, 1815.
 Popular meetings at Spa-fields, when the shops of the gunsmiths were attacked for arms. Mr. Platt shot in that of Mr. Beckwith on Snow-hill, Dec. 2, 1816. Watson tried for high treason, but acquitted, June, 1817.
 In the park, on the prince-regent going to the house, in which an air-gun was fired at his royal highness, Jan. 28, 1817.
 At Manchester, in consequence of a popular meeting, March 3, 1817.
 Affray at Manchester, called the "*Field of Peterloo*," Aug. 16, 1819. *See Manchester Reform Meeting.*
 At the Theatre Royal, Dublin, of several nights' duration, 1819.

Riot at Paisley and Glasgow; many houses plundered, Sept. 16, 1819.
 At Edinburgh, on the acquittal of queen Caroline, Nov. 19, 1820.
 In London, at the funeral of the queen, through the military opposing the body being carried through the city, Aug. 14, 1821.
 At Knightsbridge, between the military and the populace, on the funeral of Honey and Francis, Aug. 26, 1821.
 At the Theatre in Dublin: the riot called the "*Bottle Conspiracy*," against the marquess Wellesley, lord-lieutenant, Dec. 14, 1822.
 Riot at Ballybay; Mr. Lawless was arrested, Oct. 9, 1828.
 Riot at Limerick; the provision-warehouses plundered and mischief done, June 15, 1830.
 Fatal affrays at Castlepollard, May 23, 1831; and Newtonbarry (*which see*), June 18, 1831.
 Alarming riots at Merthyr-Tydfil, among the iron-workers, several of whom, fired on by the military, were killed and wounded, June 3, 1831.
 Riot at the Forest of Dean, June 8, 1831. *See Dean.*
 Nottingham castle burnt by rioters, Oct. 10, 1831.
 Reform riots at Bristol (*see Bristol*), Oct. 29, 1831.
 Affray at Castleshock, county of Kilkenny, when a number of police, attacked by the populace, were, with their commander, Mr. Gibbins, killed, Dec. 14, 1831.
 Riot at Boughton, near Canterbury, produced by a body of persons called *Thomites*, headed by a fanatic named Thom, or Courtenay, who, with others, was killed, May 31, 1838. *See Thomites.*
 Great riots throughout the country, occasioned by the Chartists. Suppressed by proclamation, Dec. 12, 1838.
 Riots in Birmingham, when much mischief ensued, July 15, 1839. *See Birmingham.*
 Chartist riot at Newport (*which see*), Nov. 4, 1839.
 Meditated Chartist outbreak at Sheffield, with most destructive objects, providentially discovered, and many persons arrested, Jan. 11, 1840.
 Rebecca riots against turnpikes in Wales, in 1843.
 Chartist demonstration (*see Chartists*), April 10, 1848.
 Fatal affray at Dolly's Brae, near Castledwellan, in Ireland, between the Orangemen and the Roman Catholics; several of the latter lost their lives, and some of their houses were ransacked and burnt, July 12, 1849.
 Serious riots at Yarmouth, through a dispute between the ship-owners and the seamen, Feb. 23, 1851.
 Riots occasioned by a procession of Orangemen at Liverpool, and several lives lost, July 14, 1851.
 Riot at Stockport, Cheshire; two Catholic chapels destroyed and houses burnt, June 29, 1852.
 Fierce religious riots at Belfast, in Ireland, occur, July 14, 1852.
 Fatal election riot at Six-mile-Bridge, in the county of Clare, in Ireland; five persons shot dead by the military, July 22, 1852. *See Six-mile-Bridge.*
 Riots at Wigan, among the coal-miners, suppressed by the military without loss of life, Oct. 28, 1853.
 Bread riots at Liverpool, Feb. 19, 1855.
 Riots at Hyde Park, about Sunday Bill, July, 1855; on dearthness of bread, Oct. 14, 21, 28, 1855.
 Riots at Belfast through the open-air preaching of the rev. Hugh Hanna, Sept. 6, 13, 20, 1857.
 Religious riots at St. George's in the East, London, on Sundays in Sept. and Nov. 1859.
 Break out of the convicts at Chatham, suppressed by the military, Feb. 11, 1861.
 Violent riots at Belfast begin, through an Orange demonstration, Sept. 17, 1862.
 Fierce rioting (caused by the Irish against the favourers of Garibaldi) at Hyde Park, London, Sept. 28 and Oct. 5; and at Birkenhead, Cheshire, Oct. 8 and 15, 1862.

See Rebellions.

RIPON (Yorkshire), an ancient town. About A.D. 661 an abbey cell was built here by Eata. Ripon was made a bishopric by archbishop Wilfred in 690, but did not endure so. It suffered much by the ravages of the Danes, the Normans (1069), and the Scots (1319 and 1323). The present see was erected in Oct. 1836, out of the archdeaconry of York in the West Riding. Income, 4500*l*.

BISHOPS.

1836. Charles Thomas Longley, translated to Durham in 1856. 1856. Robert Bickersteth (PRESENT bishop, 1862).

ROADS OF ENGLAND. The first general repair of the highways of this country was directed in 1288. Acts were passed for the purpose in 1524 and 1555, followed by others in Elizabeth's and the succeeding reigns. Roads through the Highlands of Scotland were begun by general Wade in 1746. Loudon M'Adam's roads were introduced about 1813; he prescribes the breaking of stones to six ounces weight, and calculates the expense of breaking stones at a shilling a ton; clean flints and granite clippings answer best. Wooden pavements were tried with partial success in the streets of London; at Whitehall in 1839, and in other streets in 1840. Asphalt pavement soon after. See *Roman Roads* and *Wooden Pavements*. An act "for the better management of the Highways" was passed in 1862, after much opposition. See *M'Adam*.

ROAD MURDER. On the night of June 29-30, 1860, Francis Savile Kent, 4 years old, was murdered, and his body hid in a garden water-closet. His sister Constance Kent, and the nurse Elizabeth Gough, the first suspected, after several examinations were discharged for want of evidence. The coroner was severely blamed for charging the jury improperly; but the court of Queen's Bench in Jan. 1861 refused to issue a writ for a new inquiry.

ROASTING ALIVE. An early instance is that of Bocchoris, king of Egypt, by order of Sabacon of Ethiopia, 737 B.C. *Lenglet*. Sir John Oldcastle, lord Cobham, was thus put to death in 1418, and M. Servetus for heresy at Geneva, in 1553. See *Burning Alive* and *Martyrs*.

ROBBERS. First punished with death by Edmund I.'s laws, which directed that the eldest robber should be hanged. Remarkable robbers were Robin Hood, in England, A.D. 1189 (see *Robin Hood*), and Claud Du Val, "executed at Tyburn," says an historian, quaintly, "to the great grief of the women," Jan. 1670. In Ireland, the famous Mac Cabe was hanged at Naas, Aug. 19, 1691. Galloping Hogan, the rapparee, flourished at this period. Freney, the celebrated highwayman, surrendered himself, May 10, 1749. The accomplished Barrington was transported, Sept. 22, 1790. See *Trials*.

ROBIN HOOD, captain of a band of robbers, in Sherwood forest, Nottinghamshire. Some assert that he was the earl of Huntingdon, disgraced and banished the court by Richard I. at his accession (1189). Robin Hood and Little John and their band are said to have continued their depredations till 1247, when Robin died. *Stow*.

ROCHELLE (W. France), a sea-port on the Atlantic, belonged to the English for some time, but finally surrendered to the French leader, Du Guesclin in 1372. "It became a stronghold of the Calvinist party, and was vainly besieged by the duke of Anjou in 1573. It was taken after a siege of thirteen months by cardinal Richelieu in 1628. The duke of Buckingham was sent with a fleet and army to relieve it; but the citizens declined to admit him. A conspiracy here in 1822 caused loss of life to sergeant Bories and three companions.

ROCHESTER, in Kent, an ancient city, built by the Romans and called *Durobrivis*. The bishopric, founded by Augustin A.D. 604, is the next in age to Canterbury. The first cathedral was erected by Ethelbert, king of Kent. St. Justus was bishop in 604; alterations were made in the diocese in 1845. Rochester is valued in the king's books at 35*l*. 3*s*. 2½*d*. per annum. Present income, 5000*l*.

RECENT BISHOPS.

1793. Samuel Horsley, trans. to St. Asaph's, 1802.	1827. Hugh Percy, translated to Carlisle, Oct. 27.
1802. Thomas Dampier, translated to Ely, 1808.	1827. George Murray, died Feb. 16, 1860.
1809. Walter King, died Feb. 22, 1827.	1860. Joseph Cotton Wigram (PRESENT bishop, 1862).

ROCKETS, destructive war implements, were invented by sir William Congreve about 1803. The carcase-rockets were first used at Boulogne, Oct. 8, 1806, when they set the town on fire, their powers having been previously demonstrated in the presence of Mr. Pitt and several of the cabinet ministers, 1806. Improved rockets were made by Hales in 1846.

ROCKINGHAM ADMINISTRATIONS.

FIRST ADMINISTRATION, July, 1765; to Aug. 1766.
 Charles, marquess of Rockingham, *first lord of the treasury*.
 William Dowdeswell, *chancellor of the exchequer*.
 Earl of Winchelsea and Nottingham, *lord president*.
 Duke of Newcastle, *privy seal*.
 Earl of Northampton, *lord chancellor*.
 Duke of Portland, *lord chamberlain*.
 Duke of Rutland, *master of the horse*.
 Lord Talbot, *lord steward*.
 Hon. Henry Seymour Conway and the duke of Grafton, *secretaries of state*.
 Lord Egmont, *admiralty*.
 Marquess of Granby, *ordnance*.
 Viscount Barrington, *secretary-at-war*.
 Viscount Howe, *treasurer of the navy*.
 Hon. Charles Townshend, *paymaster of the forces*.

Earl of Dartmouth, *first lord of trade*.
 Lords Besborough and Grantham, *lord John Cavendish, Thomas Townshend, &c.*

SECOND ADMINISTRATION, March to July 2, 1782, when the marquess died.
 Marquess of Rockingham, *first lord of the treasury*.
 Lord John Cavendish, *chancellor of the exchequer*.
 Lord Camden, *president of the council*.
 Duke of Grafton, *privy seal*.
 Lord Thurlow, *lord chancellor*.
 William, earl of Shelburne and Charles James Fox, *secretaries of state*.
 Augustus Keppel, *first lord of the admiralty*.
 Duke of Richmond, *master-general of the ordnance*.
 Thomas Townshend, *secretary-at-war*.
 Isaac Barré, Edmund Burke, &c.

ROCROY (N. France). Here, May 19, 1643, the Spaniards were totally defeated by the French, commanded by the great Condé.

RODNEY'S VICTORIES. Admiral Rodney fought, near Cape St. Vincent, the Spanish admiral, Don Langara, whom he defeated and made prisoner, capturing six of his ships, one of which blew up, Jan. 16, 1780. On April 12, 1782, he encountered the French fleet in the West Indies, commanded by the count de Grasse, took five ships of the line, and sent the French admiral prisoner to England: Rodney was raised to the peerage, June, 1782.

ROGATION WEEK. Rogation Sunday received its title from the Monday, Tuesday, and Wednesday following it, called Rogation days, derived from the Latin, *rogare*, to beseech. Extraordinary prayers and supplications for these three days are said to have been appointed in the third century, as a preparation for the devout observance of our Saviour's ascension, on the next day succeeding to them, denominated Holy Thursday or Ascension-day. The whole week in which these days happen is styled Rogation week; and in some parts it is still known by the other names of Crop week, Grass week, and Procession week. The perambulations of parishes have usually been made in this week.

ROHILLAS, an Affghan tribe, who emigrated from Cabul at the end of the seventeenth century, and established themselves in the eastern parts of Delhi. They were after a struggle finally subdued by the English in 1849.

ROLLS' CHAPEL (London). Founded by Henry III. in 1233, for ordaining Jewish rabbis converted to Christianity. On the banishment of the Jews, the buildings now called the Rolls, and the chapel, were annexed by patent to the office of the keeper or master of the rolls of Chancery, from which circumstance they took their name. A number of public records from the time of Richard III. were kept in presses in this chapel. See *Records*.

ROMAGNA, a province of the Papal States, comprised in the legations of Forli and Ravenna. It was conquered by the Lombards; but taken from them by Pepin, and given to the pope, A.D. 753. Caesar Borgia held it as a duchy in 1501, but lost it in 1503. In 1859 the Romagna threw off the temporal authority of the pope, and declared itself subject to the king of Sardinia, who accepted it in March 1860. It now forms part of the province of Emilia, in the new kingdom of Italy. Population (1860) 1,014,582. See *Rome*.

ROMAINVILLE AND BELLEVILLE, heights near Paris, where Joseph Bonaparte, Mortier, and Marmont were defeated by the allies after a vigorous resistance, March 30, 1814. The next day Paris capitulated.

ROMAN CATHOLICS, called also ROMANISTS and PAPISTS. Their religion was the established one till the Reformation. Since then many laws were made against them, which have been repealed. See *Penal Laws* and *Religion*.

Bishop Fisher, sir Thomas More, and others, executed for denying the king's supremacy . 1535
 Catholics absolved from their allegiance to the king by Paul III. 1535; by Pius V. . 1570
 They rebel in . . . 1549 and 1567
 The Gunpowder Plot (*which see*) . . . 1605
 They suffer by Oates' fictitious popish plot . 1678
 They are excluded from the throne . . . 1689
 They suffer by the Gordon riots . . . June, 1780
 Various disabilities removed in . . . 1780 and 1791
 Mr. Pitt proposes measures for their relief, which he gives up . . . 1801-4

Roman Catholic Association organised in Ireland, with the object of removing the political and civil disabilities of Roman Catholics . 1824
 Bills in their favour frequently brought in with out effect from . . . 1813 to 1828
 An act of parliament passed for the suppression of the Catholic Association, March 5, 1829; but it voted its own dissolution, Feb. 12 preceding.
 The Duke of Wellington and sir Robert Peel carry the great Catholic emancipation bill (20 Geo. IV. c. 7) in the commons, March 30;

in the lords, April 10; it receives the royal assent	April 13, 1829	Mr. O'Connell elected first Roman Catholic lord mayor of Dublin	1841
The duke of Norfolk and lords Dormer and Clifford, the first Roman Catholic peers, take their seats	April 28, —	The "Papal Aggression" (<i>which see</i>)	Sept. 1850
The first English member returned, the earl of Surrey, for Horsham	May 4, —	Agitation in favour of the pope	1860-2
Mr. O'Connell elected for Clare, takes his seat (first Roman Catholic M.P. since 1689), Aug.	—	[In 1851 there were in England 570 Roman Catholic chapels with 186,111 sittings.—The Roman Catholic Church in Ireland consists of four archbishops, 24 bishops, and (in 1854) 2291 priests; there are numerous monasteries and convents.]	
Mr. Alexander Raphael the first Roman Catholic sheriff of London	Sept. 28, 1834	Roman Catholic university founded at Drumcondra, Ireland	July 20, 1862
Sir Michael O'Loughlin, the first Roman Catholic judge (as Master of the Rolls in Ireland), appointed	Oct. 30, 1836		

ROMAN ROADS IN ENGLAND. Our historians maintain, but are mistaken, that there were but four of these roads. *Camden.* "The Romans," says Isidore, "made roads almost all over the world, to have their marches in a straight line, and to employ the people;" and criminals were frequently condemned to work at such roads, as we learn from Suetonius, in his life of Caligula. They were commenced and completed at various periods, between the second and fourth centuries, and the Roman soldiery were employed in making them, that inactivity might not give them an opportunity to raise disturbances. *Bede.* They were:—

1st, WATLING-STREET, so named from Vitellianus, who is supposed to have directed it, the Britons calling him in their language <i>Guetalin</i> (from Kent to Cardigan Bay).		been defended by a fosse on both sides (from Cornwall to Lincoln).
2nd, IKENELD, or IKENILD-STREET, from its beginning among the <i>Icen</i> i (from St. David's to Tynemouth).		4th, ERMIN-STREET, from <i>Imunsul</i> , a German word, meaning Mercury, whom our German ancestors worshipped under that name (from St. David's to Southampton).
3rd, FOSSE, or FOSSE-WAY, probably from its having		

ROMAN WALLS. One was erected by Agricola (A.D. 79 to 85) to defend Britain from the incursions of the Picts and Scots; the first wall extended from the Tyne to the Solway frith (80 miles); the second from the frith of Forth near Edinburgh to the frith of Clyde near Dumbarton (36 miles). The former was renewed and strengthened by the emperor Adrian (A.D. 121), and by Septimus Severus (A.D. 208). It commenced at Bowness near Carlisle and ended at Wallsend, near Newcastle. It had battlements and towers to contain soldiers. The more northern wall was renewed by Lollius Urbicus in the reign of Antoninus Pius, about A.D. 140. Many remains of these walls still exist, particularly of the southern one. See *Bruce's "Roman Wall,"* published in 1853.

ROMANCES. As Heliodorus, a bishop of Tricea, in Thessaly, was the author of *Ethiopics*, in Greek, the first work in this species of writing, he is hence styled the "Father of Romances." He flourished A.D. 398. *Huet de Origine Fabul. Roman.* Dunlop's "History of Fiction," published in 1814, is an esteemed book on this subject,

ROME, once the mistress of the world, and subsequently the seat of the most extensive ecclesiastical jurisdiction ever acknowledged by mankind. Romulus is universally supposed to have laid the foundation of this celebrated city on the 20th of April,* according to Varro, in the year 3961 of the Julian period, 3251 years after the creation of the world, 753 before the birth of Christ, 431 years after the Trojan war, and in the fourth year of the sixth Olympiad. The numerous wars of the Romans led to their conquest of nearly the whole of the then known world. In the time of Julius Cæsar, the empire was bounded on the east by the Euphrates, Taurus, and Armenia; by Æthiopia on the south; by the Danube on the north; and by the Atlantic on the west.

Foundation of the city commenced by Romulus, B.C.	753	Romulus sole king of the Romans and Cures, B.C.	742
The Romans seize on the Sabine women at a public spectacle, and detain them for wives	750	Romulus murdered by the senators	716
The Cæminians defeated, and first triumphal procession	748	Numa Pompilius elected king of the Romans, 715; institutes the priesthood, the augurs and vestals	710
Rome taken by the Sabines; the Sabines incorporated with the Romans as one nation	747	Roman calendar of 10 months reformed, and made 12	710
		The Romans and the Albans, contesting for	

* In its original state, Rome was but a small castle on the summit of Mount Palatine: and the founder, to give his followers the appearance of a nation or a barbarian horde, was obliged to erect a standard as a common asylum for criminals, debtors, or murderers, who fled from their native country to avoid the punishment which attended them. From such an assemblage a numerous body was soon collected, and before the death of the founder the Romans had covered with their habitations the Palatine, Capitoline, Aventine, and Esquiline hills, with Mounts Celius and Quirinalis.

ROME, *continued.*

superiority, agreed to choose three champions on each part to decide it. The three *Horatii*, Roman knights, and the three *Curatii*, Albans, having been elected by their respective countries, engaged in the celebrated combat, which, by the victory of the *Horatii*, united Alba to Rome about *B.C.*

War with the Fidenates; the city of Alba destroyed.

Ostia, at the mouth of the Tiber, built.

The first census of the Roman state is taken (*Legend*).

The rape of Lucretia by Sextus, son of Tarquin; royalty abolished: the Patricians establish an aristocratical commonwealth.

Junius Brutus and Tarquinius Collatinus first consuls; first alliance of the Romans with Carthage.

The Capitol finished, and dedicated to *Jupiter Capitolinus*.

The Latins and the Tarquins declare war against the republic, 501; defeated at the lake Regillus.

First dictator made.

Secession of the Plebeians to the sacred mount; establishment of tribunes of the Plebeians.

First agrarian law passed; Spurius Cassius put to death by the Patricians.

C. Martius Coriolanus banished.

He (with the Volsci) besieges Rome, but withdraws at the suit of his wife and mother.

Contests between the Patricians and Plebeians respecting the agrarian law.

The Fabii slain. (See *Fabii*).

The Secular Games first celebrated.

The Decemviri created.

Virginius kills his daughter, Virginia, to save her from Appius Claudius.

The Canuleian law passed, permitting marriages between Patricians and Plebeians.

Military tribunes first created.

Office of Censor instituted.

Rome afflicted with an awful famine, and many persons on account of it drown themselves in the Tiber.

The Volci defeated, and their king Tolumnus slain.

War with the Tuscan.

A temple is dedicated to Apollo on account of a pestilence.

Æqui and Volsci defeated.

Two new questors are added to the former number.

Another and more dreadful famine occurs at Rome.

Three questors are chosen from the Plebeians for the first time.

Institution of the Lectisternian festival on account of a pestilence.

Vei taken after a siege of more than ten years.

Banishment of Camillus.

The Gauls, under Brennus, besiege Clusium (See *Gauls*).

They are expelled by Camillus.

Rome burnt to the ground by the Gauls, who besiege the Capitol.

M. Manlius Capitolinus thrown from the Tarpeian rock, on a charge of aiming at sovereign power.

The first appointment of curule magistrates.

Lucius Sextus, the first Plebeian consul.

Marcus Curtius leaps into the gulf which had opened in the forum.

The Gauls defeated in Italy.

War with the Samnites, which lasts 51 years.

Embassy to Alexander the Great.

Defeat at Caudium.

Priests first elected from the Plebeians.

The Gauls invade the Roman territory; siege of Arezzo.

The Etruscans defeated at the Vademonian lakes *B.C.* 283

War with Pyrrhus 280

First Punic war commenced (see *Punic Wars*) . . . 264

Attilius Regulus said to be put to a cruel death by the Carthaginians 255

Temple of Janus closed 235

Great invasion of the Gauls; repulsed 225

Second Punic war breaks out 218

The Romans are defeated by Hannibal at Cannæ 216

Syracuse taken by Marcellus 212

Scipio defeats Hannibal at Zama, in Africa . . . 202

The Macedonian wars with Philip begin, 213 and 200; his defeat at Cynoscephalæ . . . 197

Death of Scipio Africanus the elder 185

Third Macedonian war begins, 177; Macedon conquered and annexed 168

First library erected at Rome 167

Philosophers and rhetoricians are banished Rome 161

Third Punic war begins 149

Corinth and Carthage destroyed by the Romans (see *Corinth and Carthage*) 146

Numantine war in Spain 153-153

Attalus of Pergamos bequeaths his kingdom and riches to the Romans 133

The Servile war in Sicily 132

Two plebeian consuls —

The Jugurthine war 112-106

The Mithridatic war (which see) 108-63

The Ambrones defeated by Marius 102

The Social war 90-88

Rome besieged by four armies (viz.: those of Marius, Cinna, Carbo, and Sertorius) and taken 87

Sylla defeats Marius 82

Bithynia bequeathed to the Romans by king Nicomedes 74

Revolt of Spartacus and the slaves 73-71

Syria conquered by Pompey 65

The Catiline conspiracy 63

Crassus killed by the Parthians 53

Gaul completely conquered 51

War between Caesar and Pompey 50

Battle of Pharsalia (which see) 48

Cato kills himself at Utica 46

Caesar killed in the Senate-house March 15, 44

Cicero killed, proscribed by Antony 43

Battle of Philippi (which see) 42

The Triumvirate (Octavius, Antony, & Lepidus) . 37

Lepidus ejected 33

Battle of Actium (which see) Sept. 2, 31

Octavius becomes emperor —

He assumes the title of *Augustus* 27

The empire now at peace with all the world; the Temple of Janus shut; Jesus Christ born. (See *Jesus*). 5

—

Ovid banished to Tomi *A.D.* 9

Tiberius retires to Caprea; tyranny of Sejanus . . 26

A census being taken by Claudius, the emperor and censor, the inhabitants of Rome are stated to amount to 6,944,000.—(It is now considered that the population of Rome within the walls was under a million.)

Caractacus brought in chains to Rome 51

St. Paul arrives in bonds at Rome 62

Nero burns Rome to the ground, and charges the crime upon the Christians 64

Seneca, Lucan, &c., put to death 65

Peter and Paul said to be put to death 67

Jerusalem levelled to the ground by Titus, *Spt. 8*, 70

The Dacian war continues 15 years 88

Pliny junior, proconsul in Bithynia, sends Trajan his celebrated account of the Christians, 102

Trajan's expedition into the East, against the Parthians, &c. 106

Trajan's column erected at Rome 114

ROME, *continued.*

Adrian, during his residence in Britain, erects the famous wall A.D.	121	Joseph Mazzini; temporary insurrections at Bologna suppressed by Austrian aid A.D.	1831

- Ancona besieged by sea and land . . . Sept. 17, —
- Cialdini defeats Lamoricière at Castel-Fidardo, Sept. 18; and takes Ancona . . . Sept. 29, 1860
- Additional French troops sent to Rome . . . Oct. —
- The Marches vote for annexation to Sardinia, Nov. —
- Monastic establishments suppressed in the Legations; the monks pensioned; educational institutions founded . . . Dec. —
- Subscriptions raised for the pope in various countries; the formal collection forbidden in France and Belgium; permitted in England, Nov. —
- The French emperor advises the pope to give up his revolted provinces . . . Dec. 21, —
- Publication of *Rome et les Evêques*, Jan. 6; and of *La France, Rome, et l'Italie*, Feb. 15; great excitement, and strong advocacy of the pope's temporal government (attacked by prince Napoleon) in the French chambers, March, 1861
- Petition to the emperor Napoleon to withdraw French troops from Rome, signed by numbers of the Romans . . . May 10, —
- The emperor of France declines a union with Austria and Spain for the maintenance of the pope's temporal power . . . June, —
- Grand ceremony at the canonization of 27 Japanese martyrs (see *Canonization*) June 8, —
- The pope declares a severe allocution against the Italians . . . June 9, —
- Garibaldi calls for volunteers, taking as his watchword, "Rome or death!" . . . July 19, 1862
- Railway between Rome and Naples completed; its opening opposed by the Papal government, Nov. —
- See *Italy*, and *France*, 1862.

KINGS OF ROME.

- BEFORE CHRIST.
753. Romulus: murdered by the senators. [Tatius, king of the Cures, had removed to Rome in 747, and ruled jointly with Romulus six years.]
716. [Interregnum.]
715. Numa Pompilius, son-in-law of Tatius the Sabine, elected; died at the age of 82.
672. Tullus Hostilius: murdered by his successor, by whom his palace was set on fire; his family perished in the flames.
540. Ancus Martius, grandson of Numa.
616. Tarquinius Priscus; son of Demaratus, a Corinthian emigrant, chosen king.
578. Servius Tullius: a manumitted slave; married the king's daughter; and succeeded by the united suffrages of the army and the people.
534. Tarquinius Superbus, grandson of Tarquinius Priscus: assassinates his father-in-law, and usurps the throne.
510. [The rape of Lucretia, by Sextus, son of Tarquin, and consequent insurrection, leads to the abolition of royalty and the establishment of the consulate.]

REPUBLIC.

- BEFORE CHRIST.
- 10-82. First period. From the expulsion of Tarquin to the dictatorship of Sylla.
- 82-27. Second period. From Sylla to Augustus.

EMPERORS OF ROME.

- BEFORE CHRIST.
48. Caius Julius Cæsar; perpetual dictator: assassinated, March 15, 44 B.C.
31. Octavianus Cæsar: in the year 27 B.C. AUGUSTUS IMPERATOR. *Livy.*
- AFTER CHRIST.
14. Tiberius (Claudius Nero).
37. Caius Caligula: murdered by a tribune.
41. Claudius I. (Tiber. Drusus): poisoned by his wife Agrippina, to make way for
54. Claudius Nero: deposed; put himself to death to escape a yet more terrible end.
68. Servius Sulpicius Galba: slain by the prætorian band.
69. M. Salvius Otho: stabbed himself after a reign of three months.
- Aulus Vitellius: deposed by Vespasian, and put to death.
- Titus Flavius Vespasian.
79. Titus (Vespasian), his son.
81. Titus Flavius Domitian, brother of Titus; last of the twelve Cæsars; assassinated.
96. Cocceius Nerva.
98. Trajan (M. Ulpius Crinitus.)
117. Adrian or Hadrian (Publius Ælius).
138. Antoninus Titus, surnamed Pius.
161. Marcus Aurelius (a philosopher) and Lucius Verus, his son-in-law: the latter died in 169.
180. Commodus (L. Aurelius Antoninus), son of Marcus Aurelius: poisoned by his favourite mistress, Marcia.
193. Publius-Helvinus-Pertinax: put to death by the prætorian band.
- [Four emperors now start up: Didianus Julianus, at Rome; Pescennius Niger, in Syria; Lucius Septimius Severus, in Pannonia; and Clodius Albinus, in Britain].
193. Lucius Septimius Severus: died at York in Britain, in 211; succeeded by his sons.
211. M. Aurelius Caracalla, and Septimus Geta. Geta murdered the same year by his brother,

ROME, *continued.*

- who reigned alone till 217, when he was slain by his successor.
217. M. Opilius Macrinus, prefect of the guards : beheaded in a mutiny.
218. Heliogabalus (M. Aurelius Antoninus), a youth : put to death for enormities.
222. Alexander Severus : assassinated by some soldiers corrupted by Maximinus.
235. Caius Julius Verus Maximinus : assassinated in his tent before the walls of Aquileia.
237. M. Antonius Gordianus, and his son : the latter having been killed in a battle with the partisans of Maximinus, the father strangled himself in a fit of despair, at Carthage, in his 86th year.
238. Balbinus and Pupienus : put to death.
- Gordian, junior, grandson of the elder Gordian, in his 16th year : assassinated by the guards, at the instigation of his successor.
244. Philip the Arabian : assassinated by his own soldiers ; his son Philip was murdered, at the same time, in his mother's arms.
249. Metius Decius : he perished with his two sons, and their army, in an engagement with the Goths.
251. Gallus Hostilius, and his son Volusianus : both slain by the soldiery.
253. Maximianus : put to death after a reign of only four months.
253. Valerianus, and his son Gallienus : the first was taken prisoner by Sapor, king of Persia, and flayed alive.
260. Gallienus reigned alone.
- [About this time thirty pretenders to imperial power start up in different parts of the empire ; of these, Cyriades is the first, but he is slain.]
268. Claudius II. (Gallienus having been assassinated by the officers of the guard) succeeds : dies of the plague.
270. Quintillus, his brother, elected at Rome by the senate and troops : Aurelian by the army in Illyricum. Quintillus, despairing of success against his rival, who was marching against him, opened his veins and bled himself to death.
270. Aurelian : assassinated by his soldiers in his march against Persia, in Jan. 275.
275. [Interregnum of about nine months.]
- Tacitus, elected Oct. 25 : died at Tarsus in Cilicia, April 13, 276.
276. Florian, his brother ; his title not recognised by the senate.
276. M. Aurelius Probus : assassinated by his troops at Sirmium.
282. M. Aurelius Carus : killed at Ctesiphon by lightning ; succeeded by his sons,
283. Carinus and Numerianus : both assassinated, after transient reigns.
284. Diocletian : who associated as his colleague in the government,
286. Maximianus Hercules : the two emperors resign in favour of
305. Constantius Chlorus and Galerius Maximianus : the first died at York, in Britain, in 306, and the troops saluted as emperor, his son,
306. Constantine, afterwards styled the Great : whilst at Rome the pretorian band proclaimed
- Maxentius, son of Maximianus Hercules. Besides these were,
- Maximianus Hercules, who endeavoured to recover his abdicated power,
- Flavius Valerius Severus, murdered by the last named pretender ; and
307. Flavius Valerianus Licinius, the brother-in-law of Constantine.
- [Of these, Maximianus Hercules was strangled in Gaul, in 310 ; Galerius Maximianus died wretchedly in 311 ; Maxentius was drowned in the Tiber in 312 ; and Licinius was put to death by order of Constantine in 324.]
323. Constantine the Great now reigned alone : died on Whitsunday, May 22, 337.
327. { Sons of Constantine : divided the empire between them : the first was slain in 340, and the second murdered in 350, when the third became sole emperor.
361. Julian, the Apostate, so called for abjuring Christianity, having been educated for the priesthood : mortally wounded in a battle with the Persians, 363.
363. Jovian : reigned 8 months : found dead in his bed, supposed to have died from the fumes of charcoal.
364. Valentinian and Valens.
375. Valens with Gratian and Valentinian II.
379. Theodosius I., &c.
392. Theodosius alone.
- The Roman empire divided. See *Eastern Empire*, *Western Empire*, and *Popes*.

RONCESVALLE (in the Pyrenees), where, it is said, Charlemagne was surprised and defeated by the Gascons, and his renowned paladin, Roland, or Orlando, slain, A.D. 778. On July 25, 1813, marshal Soult was defeated by the British entering France.

ROPE-MAKING MACHINE. One was patented by Richard March in 1784, and by Edmd. Cartwright, in 1792. Many improvements have been made since.

ROSAMOND'S BOWER. Rosamond was daughter of lord Clifford, and mistress of Henry II. about 1173. A conspiracy was formed by the queen, prince Henry, and his other sons, against the king, on account of his attachment to her. Henry kept her in a labyrinth at Woodstock, where his queen, Eleanor, it is said, discovered her apartments by the clue of a silk thread, and poisoned her. She was buried at Godstew church, from whence Hugh, bishop of Lincoln, had her ashes removed, with every species of indignity, in 1191.

ROSARY. See *Beads*.

ROSAS (N. E. Spain), BAY OF, where a brilliant naval action was fought by the boats of the Cumberland, Volontaire, Apollo, Topaze, Philomel, Scout, and Tuscan, commanded by lieut. Tailour, which ended in the capture or destruction of eleven armed vessels in the bay, Nov. 1, 1809.

ROSBACH (Rosebec) in Flanders. Here Charles VI. of France beat the Flemings, who had revolted against their count, 1382. At Rosbach, in Prussia, a great battle was fought between the Prussians, commanded by Frederick the Great, and the combined army of French and Austrians, in which the latter sustained a complete defeat and severe loss, Nov. 5, 1757.

ROSES, WARS OF THE*. The partisans of the house of Lancaster chose the *red rose* as their mark of distinction, and those of York were denominated from the *white*. Edw. III. was succeeded by his grandson Richard II., who was deposed and succeeded by Roger Mortimer, earl of March, ancestor of the duke of Lancaster (son of John of Gaunt, the third son of Edward), as Henry IV. in 1399, in prejudice to the duke of York, descended from Lionel the second son of Edward III. Several conspiracies arose during the reign of Henry IV. and V., and civil war began in the reign of the weak Henry VI. which filled the kingdom with commotion, and deluged its plains with blood. First battle fought May 22, 1455, at St. Albans, the last at Bosworth, Aug. 22, 1485. Above 100,000 men perished, and many noble families were either totally extinguished or ruined. The union of the roses was effected in the marriage of Henry VII. with the princess Elizabeth, daughter of Edward IV. 1486.

ROSETTA (in Egypt). Taken by the French in 1798; and by the British and Turks, April 19, 1801. The Turks repulsed the British here, May 21, 1807. Near Rosetta, at the mouth of the Nile, was fought the memorable battle of Aug. 1, 1798, between the fleets of France and England, the latter commanded by Nelson. See *Nile*. Ali Pacha rendered great service to his country by constructing a canal between Rosetta and Alexandria.

ROSETTA STONE, discovered by the French in 1799; and brought from Rosetta in a French vessel, from whence it was taken by Mr. Wm. R. Hamilton, who deposited it in the British Museum. In 1841, Mr. Letronne published the text and a translation of the Greek inscription. It is a piece of black basalt, about 3 feet long, and 2½ feet wide, with an inscription in three languages, viz. hieroglyphics, modified hieroglyphics (enchorial), and Greek, setting forth the praises of Ptolemy Epiphanes (about 194 B.C.). It has been subjected to the investigations of Dr. T. Young and Champollion.

ROSICRUCIANS. A sect of mystical philosophers, who first appeared in Germany in the fourteenth century, and again early in the seventeenth century. They derived their name from the *Confessio Rosæ Crucis* of Valentine Andreas, 1615. They swore fidelity, promised secrecy, and wrote hieroglyphically; and affirmed that the ancient philosophers of Egypt, the Chaldeans, Magi of Persia, and Gymnosopists of the Indies, taught the same doctrine.

ROSS, Cork (S. Ireland), a bishopric founded, it is supposed, by St. Fachnan, in the beginning of the sixth century. It was united to Cork in 1340; and Cloyne to both, by the Irish Church Temporalities act (1833). See *Bishops*. **ROSS, New, Wexford** (S.E. Ireland), a battle was fought between the royal troops commanded by general Johnston, and the insurgent force commanded by general Beauchamp Bagenal Harvey; when, after a most obstinate contest, the latter were defeated, losing more than 2600 killed, June 4, 1798. This was one of the best contested battles fought in the rebellion of that year.

ROTA CLUB. A society who met at Miles' Coffee-house in New Palace-yard, Westminster, during the administration of Oliver Cromwell: their plan was that all the great officers of state should be chosen by ballot: and that a certain number of members of parliament should be changed annually by rotation, from whence they took their title. Sir William Petty was one of the members in 1659. *Biog. Brit.*

ROTHERSAY CASTLE. See *Wrecks*, 1831.

ROTTERDAM, the second city in Holland. Its importance dates from the thirteenth century. The commerce of Antwerp was transferred to it in 1509. It suffered much from the French revolutionary wars, and from inundations in 1775 and 1825. Desiderius Erasmus was born here in 1467.

ROUEN (N. France), an archbishopric A.D. 260, became the capital of Normandy in the tenth century. It was held by the English king till 1204; and was retaken by Henry V. Jan. 19, 1419. Joan of Arc, the maid of Orleans, was burnt here May 30, 1431. It was subdued by the king of France in 1449; and was besieged 1562, and 1591.

ROUND-HEADS. In the civil war which began in 1641, the adherents of Charles I. were called Cavaliers, and the friends of the parliament were Round-heads. The term arose from those persons who distinguished themselves by having a round bowl or wooden dish put upon their heads, and their hair cut by the edges or brim of the bowl. See *Cavaliers*.

ROYAL ACADEMY. A society of artists met in St. Peter's court, St. Martin's-lane, about 1739, which Hogarth established as the society of Incorporated Artists, who held their first exhibition at the Society of Arts, Adelphi, April 21, 1760. From this sprang the

* The rose, a symbol of silence, gave rise to the phrase *sub rosa*, "under the rose;" said, by Italian writers, to have risen from the circumstance of the pope's presenting consecrated roses, which were placed over the confessionals at Rome, to denote secrecy, A.D. 1526.

Royal Academy, in consequence of a dispute between the directors and the fellows. On Dec. 10, 1768, the institution of the present Royal Academy was completed under the patronage of George III. ; and sir Joshua Reynolds, knighted on the occasion, was appointed its first president. *Leigh.* The first exhibition of the Academicians (at Pall-Mall) was in 1769. In 1771 the king granted them apartments in old Somerset-house, and afterwards, in 1780, in new Somerset-house, where they remained till 1838, when they removed to the National Gallery. Among its professors have been Johnson, Gibbon, Goldsmith, Macaulay, and Hallam. Turner the painter gave funds to the academy for the award of a medal triennially for landscape painting. It was given to Mr. N. O. Lupton in 1857. A commission of inquiry into the affairs of the academy was appointed in 1862.

PRESIDENTS.

1768. Sir Joshua Reynolds.

1792. Benjamin West.

1820. Sir Thomas Lawrence.

1830. Sir Martin A. Shee.

1850. Sir Charles Eastlake, now PRESIDENT (1862).

ROYAL ACADEMY OF MUSIC was established 1823, mainly by the exertions of lord Burghersh (afterwards earl of Westmoreland, who died Oct. 16, 1859), and was incorporated by charter in 1830. The first concert took place Dec. 8, 1828.

ROYAL ADELAIDE and ROYAL CHARTER. See *Wrecks*, 1850, 1859.

ROYAL ASSENT. If the king assent to a public bill, the clerk of the parliament declares the Norman French, "*Le roy le veut*," the king wills it so to be. If the king refuses his assent, it is in the gentle language of "*Le roy s'aviseira*," the king will advise upon it. This is the language usually adopted to the present day. *Hale.* By the statute 33 Hen. VIII. 1541, the king may give his assent by letters-patent. *Blackstone's Com.*

ROYAL EXCHANGE, LONDON. The foundation of the original edifice was laid by sir Thomas Gresham, June 7, 1566, on the site of the ancient Tun prison. Queen Elizabeth opened it in January 23, 1571, and her herald named it the *Royal Exchange*. *Hume.* It was totally destroyed by the great fire Sept. 1666. Charles II. laid the foundation of the next edifice, Oct. 23, 1667, which was completed by Mr. Hawksmore, a pupil of sir Christopher Wren's, in about three years ; it was repaired and beautified in 1769. This also was burnt Jan. 10, 1838, with a number of public offices, &c. The new Royal Exchange, commenced in 1842 under the direction of Mr. Tite, was opened by the queen, Oct. 28, 1844.

ROYAL EXCHANGE, DUBLIN, commenced in 1760, and opened ten years after—a magnificent building, whose expense was defrayed by lottery schemes, conducted by the merchants with an integrity that did them honour. *Hardie.*

ROYAL GEORGE. First-rate man-of-war of 100 guns, overset off Spithead, and suddenly went down while at anchor, by the guns rolling to one side. Rear-admiral Kempenfeldt, the crew, many marines, women, and Jews, in all above 600 persons were drowned, Aug. 29, 1782.*

ROYAL HUMANE SOCIETY (London). See *Humane Society*.

ROYAL INSTITUTION OF GREAT BRITAIN. This institution, the earliest of the kind in London, was founded, March, 1799, by count Rumford, and sir Joseph Banks, assisted by earls Spencer and Morton, and other noblemen and gentlemen. It received the immediate patronage of George III. and was incorporated, Jan. 13, 1800, by royal charter as "The Royal Institution of Great Britain, for the diffusing knowledge, and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." It was enlarged and extended by an act of parliament in 1810 ; the original plan, as drawn up by count Rumford, in 1799, having been considerably modified.†

The HOUSE (in Albemarle-street, Piccadilly) was purchased in June, 1799 ; and the present front was added by subscription in 1838. The Lecture theatre was erected in 1803, under the superintendence of Mr. T. Webster.

The LIBRARY was commenced in 1803, by the munificent subscriptions of the proprietors of the institution. It now (1862) comprises about 33,000 volumes, the present annual increase being

about 900. Classified catalogues (by W. Harris) were published in 1809 and 1821 ; a new one (by B. Vincent) in 1857.

The MUSEUM contains choice geological specimens collected by Davy, Hatchett, Wollaston, &c. much of the original philosophical apparatus of Cavendish, and of Davy, Faraday, and other professors of the institution ; and other interesting objects, chiefly contributed by the members.

* By the use of the diving-bell, the ship imbedded in the deep, was surveyed in May 1817, *et seq.* Portions of the vessel and its cargo were brought up in 1830-42, under the superintendence of sir Charles Pasley, when gunpowder was ignited by the agency of electricity.

† The members are elected by ballot, and pay five guineas on admission, and five guineas annually, or a composition of sixty guineas.

ROYAL INSTITUTION OF GREAT BRITAIN, *continued.*

The first LECTURE was delivered March 4, 1801, by Dr. Garnett, he being the first professor of natural philosophy and chemistry. In 1802 he was succeeded by Dr. Thomas Young, so celebrated for his researches in optics, resulting in the discovery of the interference of light, and the establishment of the theory of undulation. His "Lectures on Natural Philosophy and the Mechanical Arts," first published in 1807, are still considered a textbook of physical science. His works on antiquarian literature (hieroglyphic inscriptions, &c.) are also highly esteemed. In Feb. 1801, Mr. (afterwards sir Humphry) Davy was engaged as assistant lecturer and director of the laboratory, and on May 31, 1802, he was appointed professor of chemistry. His lectures were eminently successful, and his discoveries in chemistry and electricity have immortalised his name, and conferred honour on the institution: by him the alkaloids, potassium and sodium, were discovered in 1807; the nature of chlorine was determined in 1810, and the safety-lamp invented in 1815.—Professor W. T. Brande succeeded sir Humphry as professor of chemistry in 1813, and held that office till his resignation in 1852, since which time he has been elected hon. professor. From 1816 to 1850 he delivered, in the laboratory of this institution, his celebrated chemical lectures to students.—In 1813, Professor Faraday, on the recommendation of sir H. Davy, was engaged as assistant in the laboratory, and in 1825 as its director: in 1827 he became one of the permanent lecturers of the institution. In 1820 he commenced those researches in electricity and magnetism which form an era in the history of science. In 1823, he discovered the condensability of chlorine and other gases; in 1831 he obtained electricity from the magnet; in 1845 he exhibited the two-fold magnetism of matter, comprehending all known substances, the magnetism of gases, flame, &c.; and in 1850 he published his researches on atmospheric magnetism. Dr. J.

Tyndall, F.R.S., the present professor of natural philosophy, was first elected in July, 1853; he has since prosecuted his researches on magnetism, heat, glaciers, &c. here, and laid the results experimentally before the members.

In 1804 sir J. St. Aubyn and other gentlemen proposed to form a SCHOOL OF MINES at this institution; but the plan, although warmly supported by the members, was withdrawn for want of encouragement by the government and by mining proprietors.

The WEEKLY EVENING MEETINGS, on the Fridays from January to June, as now arranged, commenced in 1826. Discourses (of which abstracts are printed) are given at these meetings by the professors of the institution, and by the most eminent men in every department of science.

ENDOWMENTS. In 1833 John Fuller, esq., of Rosehill, endowed two professorships, of chemistry and physiology: the former was bestowed on Mr. Faraday for life; the latter on Dr. Roget for three years, to be filled up afterwards by triennial election.—The Fullerian professors of physiology have been R. E. Grant, T. R. Jones, W. B. Carpenter, W. W. Gull, T. W. Jones, T. H. Huxley, R. Owen, and J. Marshall.—In 1838 Mrs. Acton gave 1000l. to be invested for paying every seven years 100 guineas for the best essay on the beneficence of the Almighty as illustrated by discoveries in science; which have been awarded—in 1844 to Mr. G. Fownes; in 1851 to Mr. T. Wharton Jones; in 1858 no award was made.

The first officers were sir Joseph Banks, *president*, till the charter was granted, afterwards the earl of Winchelsea; Mr. (afterwards sir Thomas) Bernard, *treasurer*; rev. Dr. Samuel Glassey, *secretary*. The present are the duke of Northumberland, K.G. *president* (since 1842); W. Pole, esq., *treasurer* (since 1849); H. Benze Jones, M.D., *secretary* (who succeeded in Dec. 1860 the rev. John Barlow, who had held the office 18 years).

ROYAL MARRIAGE ACT. See article *Marriage Act, Royal*.

ROYAL MILITARY AND NAVAL ASYLUMS. See *Military and Naval*.

ROYAL NAVY. See *Navy*.

ROYAL SOCIETY (London). In 1645 several learned men met in London to discuss philosophical questions and report experiments; the *Novum Organon* of Bacon, published in 1620, having given great impulse to such pursuits. Some of them (Drs. Wilkins, Wallis, &c.), about 1648-9, removed to Oxford, and with Dr. (afterwards bishop) Seth Ward, the hon. Robert Boyle, Dr. (afterwards sir) W. Petty, and several doctors of divinity and physic, frequently assembled in the apartments of Dr. Wilkins, in Wadham College, Oxford. They formed what has been called the Philosophical Society of Oxford, which only lasted till 1690. The members were, about 1658, called to various parts of the kingdom, on account of their respective professions; and the majority coming to London, constantly attended the lectures at Gresham College, and met occasionally till the death of Oliver Cromwell in 1559.

The society was organised in 1660, and constituted by Charles II. a body politic and corporate, by the appellation of "the President, Council, and Fellows of the Royal Society of London, for improving Natural Knowledge." April 22, 1662.

Evelyn records the first anniversary meeting, St. Andrew's day, Nov. 30, 1663.

The *Philosophical Transactions* begin March 6, 1664-5. In 1668, Newton invented his reflecting telescope (now in the possession of the society), and on April 28, 1686, presented to the society the MS. of his *Principia*, which the council ordered to be printed. This was done under the superintendence and also at the expense of Halley the astronomer, at that time clerk to the society.

The society met for some years at Gresham College, and afterwards at Arundel House (1666), where it came into possession of a valuable library,

presented by Mr. Howard, grandson of its collector, the earl of Arundel. After various changes the fellows returned to Gresham College, where they remained till their removal to Crane-court, in a house purchased by themselves, Nov. 8, 1610. They remove to apartments granted them in Somerset-house, 1780; to apartments in Burlington-house, Piccadilly, 1857.

The first Copley Medal was awarded to Stephen Gray in 1731; the Royal Medal to John Dalton, 1826; the Rumford Medal, instituted in 1797, to count Rumford himself in 1800.

Parliament votes annually 1000l. to the Royal Society for scientific purposes.

Regulations made by which fifteen Fellows are to be elected annually, who pay ten pounds on admission, and four pounds annually, or a composition of sixty pounds, March, 1847.

ROYAL SOCIETY, LONDON, *continued.*

PRESIDENTS.
 1660. Sir Robert Moray.
 1663. Lord Brouncker.
 1677. Sir Joseph Williamson.
 1680. Sir C. Wren.
 1682. Sir John Hoskyns.
 1683. Sir Cyril Wyche.
 1684. Samuel Pepys.
 1686. John, earl of Carbery.
 1689. Thomas, earl of Pomeroi.
 1690. Sir Robert Southwell.

1695. Chas. Montague (attds. earl of Halifax).
 1698. John lord Somers.
 1703. Sir Isaac Newton.
 1727. Sir Hans Sloane.
 1741. Martin Folkes.
 1752. Geo. earl of Macclesfield.
 1764. James, earl of Morton.
 1768. James Burrow.
 1768. James West.
 1772. James Burrow.

1772. Sir John Pringle.
 1778. Sir Joseph Banks.
 1820. Dr. W. H. Wollaston.
 1820. Sir Humphry Davy.
 1827. Davies Gilbert.
 1830. Duke of Sussex.
 1838. Marquess of Northampton.
 1848. Earl of Rosse.
 1854. Lord Wrottesley.
 1858. Sir Benjamin C. Brodie.
 1861. Major-gen. Edward Sabine.

ROYAL SOCIETIES. See *Societies.*

RUBICON, a small river flowing into the Adriatic sea, separated Cisalpine Gaul from Italy proper. Roman generals were forbidden to pass this river at the head of an army. This was done by Julius Cæsar 49 B.C. who thereby began the revolt against the government and a deadly civil war.

RUBIDIUM, an alkaline metal, discovered by Bunsen by means of the spectrum analysis, and made known in 1861.

RUHMKORFF'S INDUCTION COIL. A new magneto-electric apparatus constructed by M. Ruhmkorff in 1851. By its means most brilliant experiments are made. This apparatus has been since considerably modified by its inventor and others. M. Du Moncel published an account of it in 1859.

RULING-MACHINES, used for ruling paper with faint lines, for merchants' account-books, &c. They were invented by an ingenious Dutchman, resident in London, in 1782, and were subsequently greatly improved by Woodmason, Payne, Brown, and others. They were improved in Scotland in 1803. An invention has lately rendered account-books perfect by the numbering of the pages with types, instead of the numbers being written by a pen, so that a page cannot be torn out from them without being discovered.

RUM (French *rhum*), ardent spirit distilled from sugar lees and molasses, deriving its peculiar flavour from a volatile oil. Rum is principally made in the West Indies. The duty (since 1858) on colonial rum imported into the United Kingdom is 8s. 2d. per gallon, on foreign rum (since 1846) is 15s. per gallon.

Imported.	Gallons.	Imported.	Gallons.	Imported.	Gallons.

RUMP PARLIAMENT. See *Pride's Purge.***RUSSELL ADMINISTRATIONS.*** See *Palmerston Administration, &c.*

FIRST ADMINISTRATION, (formed on the resignation of sir Robert Peel, July, 1846).

Lord John Russell, *first lord of the treasury.*

Marquess of Lansdowne, *lord president of the council.*

Earl of Minto, *privy seal.*

Mr. (now sir Charles) Wood, *chancellor of the exchequer.*

Viscount Palmerston, sir George Grey, and earl Grey,

foreign, home, and colonial secretaries.

Sir John Hobhouse (now lord Broughton), and earl of Clarendon (succeeded by Mr. Labouchere),

boards of control and trade.

The earl of Auckland (succeeded by sir Francis

Thornhill Baring), *admiralty.*

Lord Campbell (succeeded by the earl of Carlisle,

late viscount Morpeth), *duchy of Lancaster.*

Mr. Fox Maule, *secretary at war.*

Marquess of Clanricarde, *postmaster*; T. B. Macaulay,

&c.

Lord Cottenham (succeeded by lord Truro), *lord*

chancellor.

Lord John Russell and his colleagues resigned their

offices, Feb. 21, 1851: but were induced (after the

failure of lord Stanley's party to form an administration) to return to power, March 3 following:—

SECOND ADMINISTRATION, or continuation of his first, March 1851.

Lord John Russell, *first lord of the treasury.*

Marquess of Lansdowne, *president of the council.*

Earl of Minto, *lord privy seal.*

Sir Charles Wood, *chancellor of the exchequer.*

Sir George Grey, viscount Palmerston (succeeded by earl Granville, Dec. 22), and earl Grey, *home*

foreign and colonial secretaries.

Sir Francis T. Baring, *first lord of the admiralty.*

Lord Broughton, *board of control.*

Mr. Labouchere, *board of trade.*

Mr. Fox Maule (afterwards lord Pannure, and now

earl of Dalhousie), *secretary at war.*

Marquess of Clanricarde, *postmaster-general.*

Earl Granville, *paymaster-general.*

Lord Seymour, earl of Carlisle, &c.

Lord Truro, *lord chancellor.*

This ministry resigned Feb. 21, 1852. See *Derby*

Administration.

* Lord John Russell, 3rd son of John, duke of Bedford, was born Aug. 19, 1792; M.P. for Tavistock 1813; for London, 1817-61; was paymaster of the forces, 1830-34; secretary for home department 1835-9; for the colonies, 1839-41; first minister, July 1846 to March 1852; secretary for foreign affairs Dec. 1852 to Feb. 1853; president of the council, June 1854 till Feb. 1855; secretary for the colonies, March to Nov. 1855; secretary for foreign affairs since June, 1859; created a peer as earl Russell, July 30, 1861. His motion for reform in parliament was negatived in 1822; adopted March 1, 1831; he introduced the Registration bill, and a New Marriage bill, in 1836.

RUSSELL INSTITUTION (Great Coram-street, London), was founded in 1808 by sir Samuel Romilly, Francis Horner, Dr. Mason Good, Henry Hallam, lord Abinger, and others. The building comprises a library, lecture room, news room, &c.

RUSSELL TRIAL. William lord Russell's trial for complicity in the Rye-House plot was marked by a most touching scene. When he supplicated to have some one near him to take notes to help his memory, he was answered, that any of his attendants might assist him; upon which he said "My WIFE is here, and will do it for me." He was beheaded in Lincoln's-Inn-Fields, July 21, 1683, having slept soundly the night before his execution. Lady Russell survived him forty years, dying Sept. 29, 1723, in her 87th year. The attainder of this nobleman was reversed, 1 Will. III. 1689, his execution having been deemed a MURDER.

RUSSIA, the eastern part of ancient Sarmatia. The name is generally derived from the Roxolani, a Slavonic tribe. Rurick, a Varangian chief, appears to have been the first to establish a government A.D. 862. His descendants ruled amid many vicissitudes till 1598. The progress of the Russian power under Peter the Great and Catherine II., is unequalled for rapidity in the history of the world. The established religion of Russia is the Greek church, with a free toleration, however of other sects, even the Mahometans. By an imperial ukase, in 1802, six universities were established, viz., at St. Petersburg, Moscow, Wilna, Dorpat (in Livonia), Charcov, and Kasan; but literature has made little progress, the native publications being very few, and the best books being all translations. The Russian language, though not devoid of elegance, is, to a foreigner, of very difficult pronunciation: the number of letters and diphthongs is forty-two. The population of the empire in 1858 was 75,148,690. By the first Russian budget (1862), the estimated revenue was 34,500,000*l.*; expenditure, 37,850,000*l.*

Russia invaded by the Huns	A.D. 376	Recalled by a conspiracy of the Strelitz, which he cruelly revenges; 2000 tortured and slain; he beheads many with his own hand	1697
Rurick arrives at Novgorod (or New City), and becomes grand duke [anniversary kept Sept. 20, 1862.]	862	The Russians begin their new year from Jan. 1; (but retain the old style)	1700
Oleg successfully invades the Greek empire	904	War with Sweden, Peter totally defeated by Charles XII. at Narva	Nov. 30, —
Vladimir the Great marries princess Anne of Greece, and is baptised	988	Peter founds St. Petersburg as a new capital	1793
The Golden Horde of Tartars conquer a large part of Russia about	1223	The Strelitz abolished	1794
The grand duke Jurie killed in battle	1237	Charles XII. totally defeated by Peter at Pul-towa, and flees to Turkey	July 8, 1709
The Tartars establish the empire of the Khan of Kaptshak, and exercise great influence in Russia	1242	14,000 Swedish prisoners sent to colonise Siberia	—
Alexander Newski defeats the invading Danes, &c.	1244	War with Turkey; Peter and his army cross the Pruth, and are surrounded by the Turks; they escape by the energy of the empress Catherine, who obtains a truce	June, 1711
He is made grand prince of Russia by the Tartars Tartar war; Moscow burnt	1252	Esthonia, Livonia, and a large part of Finland added to the empire	1715
Tamerlane, after ravaging Tartary, invades Russia; but retires	1395	Peter visits Germany, Holland, and France	—
Accession of Ivan III. the Great—able and despotic	1462	The Jesuits expelled	1713
The foundation of the present monarchy laid	—	Conspiracy and mysterious death of the prince Alexis	July, —
Ivan introduces fire-arms and cannon into Russia	1475	Peter II. (last of the Romanoffs) deposed, and the crown given to Anne of Courland	1730
Great invasion of the Tartars; consternation of Ivan	1479	Elizabeth, daughter of Peter I. reigns, in pre-judice of Ivan VI., an infant, who is imprisoned for life	1741
His general Svenigorod attacks them and annihilates their power	1481	Peter III. dethroned and murdered, succeeded by Catherine his wife	1762
Ivan takes the title of czar	1482	Ivan VI., the rightful heir, till now immured, put to death	1764
Accession of Ivan IV., a cruel tyrant	1533	Rebellion of the Cossacks, 1774; suppressed	1775
The English "Russian company" established; Richard Chancellor sent to open the trade	1554	Dismemberment of Poland; commenced by Catherine (see Poland), 1772; completed	1795
Discovery of Siberia	—	Successful invasions of the Crimea	1769-84
The royal bodyguard (the Strelitz) established	1568	Catherine gives her subjects a new code of laws; abolishes torture in punishing criminals; and dies	1756
Ivan solicits the hand of queen Elizabeth of England	1579	Unsuccessful war with Persia	—
The race of Rurick, who had governed Russia for 700 years, becomes extinct	1598	Russian treaty with Austria and England	1798
The imposition of Demetrius (see <i>Impostors</i>)	1606	Suwarrow with an army joins the Austrians, and checks the French in Italy	1799
Michael-Fedorovitz, of the house of Romanoff, ascends the throne	1613	Mental derangement of Paul	1800
Finland ceded to Sweden	1617	He is murdered	March 23, 1801
Russian victories in Poland	1654	Accession of Alexander I. (who makes peace with England)	1805
First Russian vessel built	1667	He joins the coalition against France	April, 1805
Subjugation of the Cossacks	1672	Allies defeated at Austerlitz	Dec. 2, —
Reign of Ivan and Peter I. or the Great	1682		
Peter sole sovereign	1689		
He visits Holland and England, and works in the dockyard at Deptford	1697

 1825. Nicholas, brother to Alexander ; succeeded, Dec. 1, 1825.
 1855. Alexander II. son of Nicholas, born April 23, 1818 ; succeeded at his father's death, March 2, 1855 ; married April 28, 1841, Mary princess of Hesse ; the PRESENT emperor of Russia (1862).
Heir : his son Nicholas, born Sept. 20, 1843.

RUSSO-TURKISH WAR.* The Russian and French governments having each taken a side in the dispute between the Greek and Latin churches as to the exclusive possession of the *Holy Places* (which see) in Palestine, the Porte advised the formation of a mixed commission, which decided in favour of the Greeks, and a firman was promulgated accordingly, March 9, 1853 : to this decision the French acceded, although dissatisfied.

The Russians make further claims, and prince Menschikoff (who arrived at Constantinople Feb. 28, 1853), by various notes (between March 22 and May 18), demands that a convention should be signed by the sultan granting to the czar such a protectorate over the Greek-Christians in Turkey, as the sultan considered inimical to his own authority, March 22—May 18, 1853
 Menschikoff's ultimatum rejected ; he quits Constantinople. May 21, —
 The sultan issues a hatti-scherif confirming all the rights and privileges of the Greek Christians, and appeals to his allies June 6, —
 The English and French fleets anchor in Besika Bay June 13, —
 The Russians, under gen. Luders, cross the Pruth and enter Moldavia July 2, —

Circular of count Nesselrode in justification, July 2 ; lord Clarendon's reply. July 16, 1853
 The conference of representatives of England, France, Austria, and Prussia meet at Vienna, agree to a note, July 31 ; which is accepted by the czar, Aug. 10 ; but the sultan requires modifications, Aug. 19 ; which the czar rejects, Sept. 7, —
 Two English and two French ships enter the Dardanelles Sept. 14, —
 The sultan (with the consent of a great national council) declares war against Russia Oct. 5, —
 The Turkish fortress at Issaktecha fires on a Russian flotilla (the first act of war) Oct. 23, +
 The Turks cross the Danube at Widdon and occupy Kalafat Oct. 28—Nov. 3, —
 Russia declares war against Turkey Nov. 1, —

* In 1844, when the czar was in England, he conversed with the duke of Wellington and lord Aberdeen (whom he had known many years) respecting the dissolution of the Turkish empire, and on his return he embodied his views in a memorandum drawn up by count Nesselrode, which was transmitted to London, but kept secret till March 1854. In January and February of that year the czar had several conversations on the subject with the British envoy at St. Petersburg, Sir G. H. Seymour, in one of which (Jan. 14) he compared Turkey to a man in a state of decrepitude and sickness, on the point of death, and made proposals to the British government as to the disposal of his property. He stated frankly that he would not permit the British to establish themselves at Constantinople ; but said in another conversation, he would not object to their possessing Egypt. The purport of these conversations was conveyed in despatches to lord John Russell, who replied that the British government declined to make any provision for the contingency of the fall of Turkey. The czar made similar proposals to the French government with the same result.

RUSSO-TURKISH WAR, *continued.*

English and French fleets enter Bosphorus, Nov. 2, 1853
 Russians defeated at Oltonitza Nov. 4, —
 Turks (in Asia) defeated at Bayandur, Atskur, and Achaltzik Nov. 14, 18, 26, —
 Turkish fleet destroyed at Sinope Nov. 30, —
 Collective note from the four powers requiring to know on what terms the Porte will negotiate for peace Dec. 5, —
 Contests at Kalafat (Russians defeated at Citate, Jan. 6) Dec. 31, 1853—Jan. 9, 1854
 At the request of the Porte (Dec. 5) the allied fleets enter the Black Sea Jan. 4, —
 Reply of the Porte to the note of Dec. 5, containing four points as bases of negotiation: viz. 1. The promptest possible evacuation of the principalities. 2. Revision of the treaties. 3. Maintenance of religious privileges to the communities of all confessions. 4. A definitive settlement of the convention respecting the Holy Places (dated Dec. 31), approved by the four powers Jan. 13, —
 Vienna conference closes Jan. 16, —
 Kalafat invested by the Russians Jan. 28-31, —
 Proposal in a letter from the emperor of France to the czar (Jan. 29) declined Feb. 9, —
 Turkish flotilla at Rustchuk destroyed by the Russians under Schilders Feb. 15, —
 Ultimatum of England and France sent to St. Petersburg Feb. 27, —
 The czar "did not judge it suitable to give an answer" March 19, —
 Baltic fleet sails, under sir C. Napier (see Baltic) March 17, —
 Treaty between England, France, and Turkey, March 12, —
 Russians, under Gortschakoff, pass the Danube and occupy the Dobruzscha: severe conflicts in consequence; the Turks at last retire, March 23, 24, —

 Russians, under gen. Schilders, assault Kalafat: they are repulsed; the blockade raised, April 19-21, —
 The *Tiger* steamer run aground near Odessa, captured by the Russians May 12, —
 Russians defeated at Turtukai May 13, —
 Siege of Silistria begun May 17, —
 Allied armies disembark at Varna May 29, —
 Mouths of the Danube blockaded by allied fleets June 1, —
 Russians repulsed at Silistria; Paskiewitsch and many officers wounded June 5, —
 Turks defeated at Ouzgheti (in Asia) June 16, —
 Severe conflict before Silistria, the siege raised, June 18-26, —
 Batteries at the Suliha mouths destroyed by capt. Parker June 26, 27, —

Captain Parker killed July 8, 1854
 Russians defeated at Giurgevo. July 7, —
 10,000 French troops embark at Boulogne for the Baltic July 15, —
 Turks defeated at Hayazi in Armenia, July 29, 30, —
 And again near Kars Aug. 5, —
 Bombardment and surrender of Bomarsund, Aug. 16, —
 [In July and August the allied armies and fleets in the East suffered severely from cholera.] Aug. 16, —
 The Russians defeated by Schamyl in Georgia, about Aug. 28, —
 They begin to evacuate the principalities, Aug. and Sept. —
 By virtue of a treaty with Turkey (June 14) the Austrians, under count Coronini, enter Bucharest Sept. 6, —
 Allies sail from Varna, Sept. 3, and land at Old Fort, near Eupatoria Sept. 14, —
 Russians finally evacuate the principalities, Sept. 20, —
 Skirmish at the Bulgancé Sept. 19, —
 Battle of the Alma (see Alma) Sept. 20, —
 Russians sink part of their fleet at Sebastopol, Sept. 23, —
 Allies occupy Balaklava Sept. 26, —
 Death of marshal St. Arnaud Sept. 29, —
 General Canrobert appointed his successor, Nov. 24, —
 Siege of Sebastopol commenced—grand attack (without success) Oct. 17, —
 Battle of Balaklava—gallant charge of the light cavalry under lord Cardigan, with severe loss, Oct. 25, —
 Sortie from Sebastopol repulsed by generals Evans and Bosquet Oct. 26, —
 Battle of Inkerman; defeat of the Russians, Nov. 5, —
 Miss Nightingale and nurses arrive at Scutari, Nov. 6, —
 Great tempest in the Black Sea, loss of the *Prince*, and many other vessels with stores, Nov. 14-16, —
 Treaty of alliance between England, France, Austria, and Prussia—a commission to meet at Vienna: signed Dec. 2, —
 Russian sortie Dec. 20, —
 Omar Pacha arrives in the Crimea (followed by the Turkish army from Varna) Jan. 5, 1855
 Sardinia joins England and France Jan. 26, —
 Great sufferings in the camp from cold and sickness Jan. and Feb. —
 Russians defeated by the Turks at Eupatoria, Feb. 17, —
 Death of emperor Nicholas, and accession of Alexander II. (no change of war policy), March 2, —
 Sortie from the Malakhoff tower (15,000 men), March 22, —
 Capture of Russian rifle-pits April 19, —
 Arrival of Sardinian contingent May 8, —
 Resignation of gen. Canrobert, succeeded by gen. Pelissier May 16, —
 Desperate night combats May 22-24, —
 Expedition into the sea of Azoff (under sir E. Lyons and sir G. Brown); destruction of Kertch and large amount of stores, May 24, —
 Taganrog bombarded June 3, —
 Massacre of an English boat's crew with flag of truce at Hango June 5, —
 Russians evacuate Anapa June 5, —
 The White Works and Mamelon Vert taken, June 6, 7, —
 Unsuccessful attack on the Malakhoff tower and Redan June 18, —

* 40,000 men, a large number of horses, and a powerful artillery were landed in one day.

RUSSO-TURKISH WAR, *continued.*

Death of lord Raglan; succeeded by general Simpson	June 28, 1855	Sir Wm. Codrington takes the command in room of gen. Simpson	Nov. 14, 1855

Battle of the Tchernaya—defeat of the Russians,	Aug. 16, —	Capitulation of Kars to gen. Mouravieff, after a gallant defence by gen. Williams	Nov. 26, —
Ambuscade on the glacis of the Malakhoff taken; Russian sortie repulsed	Aug. 18, —	Death of admiral Bruat	Nov. 27, —
The French take the Malakhoff (<i>which see</i>) by assault; the English assault the Redan without success; the Russians retire from Sebastopol to the North Forts, and the allies enter the city; the Russians destroy or sink the remainder of their fleet	Sept. 8, &c., —	Russian attack on the French posts at Baidar repulsed	Dec. 3, —
Tanan and Fanagoria captured	Sept. 24, —	Proposals of peace from Austria, with the consent of the allies, sent to St. Petersburg,	Dec. 12, —
The Russians assaulting Kars are defeated with great loss	Sept. 29, —	Centre dock at Sebastopol blown up by the English	Jan. 2, 1856
Russian cavalry defeated (50 killed, 105 prisoners) at Koughil, near Eupatoria, by the French	Sept. 29, →	Council of war at Paris	Jan. 11, —
Kinburn taken (1420 prisoners, 174 guns),	Oct. 17, —	Protocol signed accepting the Austrian propositions as a basis of negotiation for peace	Feb. 7, —
Russians blow up Oczakoff	Oct. 18, —	Destruction of Sebastopol docks completed,	Feb. 1, —
Large stores of corn destroyed near Gheisk in the sea of Azoff	Nov. 4, →	Report of sir John M'Neill and col. Tulloch on state of the army before Sebastopol, published	Feb. 5, —
Defeat of the Russians, and passage of the Taurus by the Turks under Omar Pacha,	Nov. 6, —	Peace conferences open at Paris, an armistice till March 31 agreed on	Feb. 25, —
The czar visits his army near Sebastopol,	Nov. 10, —	Suspension of hostilities	Feb. 29, —
		Proclamation of peace in the Crimea, in London	April 2, —
		The Crimea evacuated	July 9, —

RUTHENIUM, a rare metal, discovered in the ore of platinum by M. Claus in 1845.

RUTHERFORD'S ACT, Lord (13 & 14 Vict. c. 36), for simplifying law proceedings in Scotland, passed 1850.

RUTHVEN, **RAID OF**, a term applied to the seizure of the person of James VI. of Scotland by William Ruthven, earl of Gowrie, and other nobles in 1582. They compelled the king to dismiss his favourites, Arran and Lennox. Ostensibly for this, Gowrie was judicially put to death by his two opponents in 1584.

RYE-HOUSE PLOT, a plot (some think pretended) to secure the succession of the duke of Monmouth to the throne in preference to the duke of York (afterwards James II.), a Roman Catholic. Some of the conspirators are said to have projected the assassination of the king, Charles II., and his brother. This design was said to have been frustrated by the king's house at Newmarket accidentally taking fire, which hastened the royal party away eight days before the plot was to take place, March 22, 1683. See *Newmarket*. The plot was discovered June 12 following. Algernon Sidney suffered death on a charge of being concerned in this conspiracy, Dec. 7, 1683. The name was derived from the conspirators' place of meeting, the Rye-house at Broxbourne, Hertfordshire.

RYSWICK (Holland), where the celebrated peace was concluded between England, France, Spain, and Holland, signed Sept. 20, and by the emperor of Germany, Oct. 30, 1697.

S.

SABBATARIANS. Though commonly applied to the denomination of Seventh-day Baptists, or (as they call themselves) "Sabbath-keepers," yet, in the seventeenth century, this name was given to the English Puritans, who insisted that Sunday was "the Sabbath." Traces exist of Sabbatarian or Sabbathaires, among the sects of the sixteenth century on the continent. Upon the publication of the "Book of Sports" in 1618, a long and violent controversy arose among English divines on these two points: first, whether the Sabbath of the fourth commandment was in force among Christians; and secondly, whether, and on what ground, the first day of the week was entitled to be distinguished and observed as "the Sabbath." In 1628, Theophilus Brabourne, a clergyman, published the first work in favour

* The English lost: killed in action and died of wounds about 3500; died of cholera, 4244; of other diseases nearly 16,000; total loss about 19,500 (including 270 officers); 2673 were disabled. The war added to the national debt 41,041,000*l*. The French lost about 63,500 men; the Russians about half a million. The army suffered greatly by sickness. See *Scutari*, *Times*, and *Nightingale*.

of the Seventh-day or Saturday, as the only true Christian Sabbath. He and several others suffered great persecution for this opinion; but it so prevailed, notwithstanding, that after the restoration there were three or four congregations observing the last day of the week for public worship in London, and seven or eight in the country parts of England. In 1851 there were only three Sabbatarian or Seventh-day Baptist congregations in England; but in America (especially in the New England states) they are numerous and flourishing.

SABBATH, THE, ordained by the Almighty. *Gen. ii.* Jews observe the seventh day in commemoration of the creation of the world and of their redemption from the bondage of the Egyptians; Christians observe the first day of the week in commemoration of the resurrection of Christ from the dead, and the redemption of man. See *Sunday*.

SABBATH SCHOOLS. The first "Sabbath school" was founded by Ludwig Hacker between the years 1740 and 1747, at Ephrata, Lancaster county, Pennsylvania, among the German Seventh-day Baptists there. The school-room was used as an hospital after the battle of Brandywine, fought in 1777. This event occasioned the breaking up of the schools, about five years before the first Sunday-school was instituted in England, at Gloucester, by Robert Raikes, about 1782. See *Sunday Schools*.

SABBATICAL YEAR. A Jewish institution, 1491 B.C. Every seventh year, during which time the very ground had rest, and was not tilled; and every forty-ninth year all debts were forgiven, slaves set at liberty, and estates, &c. that were before sold or mortgaged, returned to their original families, &c. *Josephus*.

SABELLIANISM, from Sabellius (of Ptolemais in Egypt), who flourished in the third century, and who taught that there was but *one* person in the Godhead, the other persons of the Trinity being but different names of the same person. This doctrine was condemned at a council held at Rome A.D. 263. Somewhat similar views were put forth in the middle of the last century by Drs. Watts and Doddridge.

SABINES. The people from whom the Romans, under Romulus, took away their daughters by force, having invited them to some public sports or shows on purpose. When the Sabines determined to revenge this affront, the women became mediators to their fathers in behalf of their husbands the Romans, and a lasting peace was made between them; so that the Sabines became a part of the Roman government and people, 750 B.C. To this day one of the ecclesiastical provinces is called Terra Sabina, whose chief town is Magliano.

SACHEVEREL RIOTS. See *Riots*.

SACRAMENT (from *sacramentum*, an oath, obligation, also mystery). The council of Trent in 1547 affirmed that there were seven sacraments: viz. baptism, the Lord's supper, confirmation, penance, holy orders, matrimony, and extreme unction. The name was given to the Lord's supper by the Latin fathers. The wine was laid aside, and communion by the laity under one form alone, that of bread, took its rise in the West, under pope Urban II. 1096. *M. de Marca*. Communion in one kind only was authoritatively sanctioned by the council of Constance, in 1414. *Dr. Hook*. Henry VIII. of Germany was poisoned by a priest in the consecrated wafer, 1314. The sacramental wine was poisoned by the grave-digger of the church at Zurich, by which sacrilegious deed a number of persons lost their lives, Sept. 4, 1776. In 1614, by the Test Act, all members of both houses of parliament were ordered to take the sacrament, as a guard against the introduction of Roman Catholics. See *Test Act*.

SACRED. This term was first added to the title of Majesty, in the style of the kings of England, at the time of the accession of James I. 1603. See *Titles*.

SACRED WAR, *Sacrum Bellum*. The first, concerning the temple at Delphi, took place 448 B.C. In this war the Athenians and Lacedæmonians were auxiliaries on opposite sides. The second Sacred War occurred on Delphi being seized by the Phocians, 357 B.C. This latter war was terminated by Philip of Macedon taking all the cities of the Phocians, and dispersing the inhabitants, 346 B.C. *Plutarch*.

SACRIFICE. The first religious sacrifice was offered to God by Abel; it consisted of milk and the firstlings of his flock, 3875 B.C. *Josephus; Usher*. Sacrifices to the gods were first introduced into Greece by Phoroneus, king of Argos, 1773 B.C. The offering of human sacrifices seems to have originated with the Chaldeans, from whom the custom passed into Greece, Persia, and other Eastern nations. All sacrifices to the true God ceased with the sacrifice of the Redeemer, A.D. 33. (*Heb. x. 12—14.*) Pagan sacrifices were forbidden by the emperor Constantius II. A.D. 341.

SADDLES. In the earlier ages the Romans used neither saddles nor stirrups, which led to several maladies of the hips and legs. Saddles were in use in the third century, and are mentioned as made of leather in A.D. 304. They were known in England about the year 600. Side-saddles for ladies were introduced by Anne, queen of Richard II. in 1388. *Slow.*

SADDUCEES. A Jewish sect, said to have been founded by Sadoc, a scholar of Antigonus, about 200 B.C., who, misinterpreting his master's doctrine, taught that there was neither heaven nor hell, angel nor spirit; that the soul was mortal, and that there was no resurrection of the body from the dead. The Sadducees were strongly opposed by the Pharisees.

SADLER'S WELLS (N. London), so called after Mr. Sadler, who built an orchestra to entertain the invalids who used the waters medicinally, 1683. Many superstitious notions were attached to the waters before the Reformation. In the course of time the orchestra was enclosed, and the building became a place for dramatic performances. The present theatre was opened in 1765. Eighteen persons were trampled to death at this theatre, on a false alarm of fire, Oct. 15, 1807. See *Theatres*.

SAFETY-LAMP. One was invented in 1815 by sir Humphry Davy, to prevent accidents which happen in coal and other mines. The safety-lamp is founded on the principle that flame, in passing through iron-wire meshes, loses so much of its heat as not to be capable of igniting inflammable substances around, while flame alone ignites gas. It should be mentioned, that the father of all safety-lamps is Dr. Reid Clanny, of Sunderland, whose invention and improvements are authenticated in the *Transactions of the Society of Arts* for 1817. A safety-lamp, the "Geordy," was also devised by George Stephenson, the engineer, in 1815. A miner's electric light, by MM. Dumas and Benoit, was exhibited in Paris on Sept. 8, 1862.

SAFFRON (*Saffran*, French; *Saffrano*, Italian), the flower of crocus, was first brought to England in the reign of Edward III. by a pilgrim, about 1339, probably from Arabia, as the word is from the Arabic *saphar*. *Miller*. It was cultivated in England in 1582; and the best grows in Essex, between Cambridge and Saffron Walden.

SAGE (*Sauge*, French; *Salvia*, Latin), a wholesome herb, comfortable to the brain and nerves. *Mortimer*. A species of this garden plant grew early in England, and some varieties were imported. The Mexican sage, *Salvia Mexicana*, was brought from Mexico A.D. 1724. The blue African sage, *Salvia Africana*, and the golden African sage, *Salvia aurea*, were brought to England from the Cape of Good Hope in 1731.

SACRAMENTO, Sr., a Portuguese settlement in S. America, claimed by Spain in 1680, but relinquished in 1713; ceded in 1777; and acquired by the emperor of Brazil in 1825.

SAGUNTUM (now *Murviédro*, in Valencia, E. Spain), renowned for the dreadful siege it sustained, 219 B.C. The heroic citizens, after performing incredible acts of valour for eight months, chose to be buried in the ruins of their city rather than surrender to Hannibal. They burnt themselves, with their houses, and all their effects, and the conqueror became master of a pile of ashes and of dead.

SAINT. See the names with this prefix throughout the book.

SAILORS' HOME, in Well-street, London Docks; established in 1835. In one year it admitted 5444 boarders, who in addition to the comforts of a home, had the privilege of evening instruction, the use of a savings' bank, &c. The establishment is self-supporting, aided by subscriptions. Similar institutions have since been established.

SALAD. First introduced into England, with other garden roots from Artois, about 1520. It was not till the latter end of the reign of Henry VIII., viz. about 1547, that any salads, carrots, cabbage, or other edible roots, were produced in England. *Butler*. Queen Catherine (Henry's first consort), when she wanted a salad, was obliged to despatch a messenger thither on purpose. *Hume*.

SALAMANCA (W. Spain), taken from the Saracens, A.D. 861. The university was founded 1240, and the cathedral built, 1513. Near here a battle was fought between the British and allies commanded by lord Wellington and the French army under marshal Marmont, July 22, 1812. Wellington was victorious, though the loss of the allies was most severe, amounting in killed, wounded, and missing, to nearly 6000 men; but that of the enemy was much greater. Marmont left in the victor's hands 7141 prisoners, 11 pieces of cannon, 6 stands of colours, and two eagles: 8000 men are believed to have been killed and wounded. Marmont was the seventh French marshal whom lord Wellington had defeated.

in the course of four years. An immediate consequence of this victory was the capture of Madrid with 2500 more prisoners and an immense quantity of stores.

SALAMIS (near Athens). In a great sea-fight, Oct. 20, 480, B.C., Themistocles, the Greek commander, with only 310 sail, defeated the fleet of Xerxes, king of Persia, which consisted of 2000 sail. After this battle, Xerxes retired from Greece, leaving behind him Mardonius, with 300,000 men, to carry on the war, and suffer more disasters. In his retreat he found the bridge of boats he had crossed over at the Hellespont, now the Dardanelles, destroyed by a tempest.—Near Salamis, in Cyprus, the Greeks defeated the Persian fleet, 449, B.C.

SALDANHA BAY, South Atlantic ocean, northward of the cape of Good Hope. Here a Dutch squadron, under admiral Lucas, was captured by vice-admiral sir George Keith Elphinstone, without resistance; two ships of the line and seven smaller vessels surrendered; and sir George was created lord Keith, in consequence of this great and bloodless achievement, which was executed with wonderful judgment, Aug. 17, 1796.

SALENCKEMEN, on the Danube, where a victory was gained by the imperialists under prince Louis of Baden, over the Turks, commanded by the grand vizier Mustapha Kiuprighi, Aug. 19, 1691.

SALIQUE, or **SALIC LAW**, by which females are excluded from inheriting the crown of France, is said to have been instituted by Pharamond, A.D. 424, and ratified in a council of state by Clovis I., the real founder of the French monarchy, in 511. *Henault*. This law prevailed long in Spain, but was formally abolished, March, 1830; and on the death of Ferdinand VII. his daughter succeeded to the sceptre as Isabella II., Sept. 29, 1833. See *Spain*. By this law also Hanover was separated from England, when queen Victoria ascended the English throne, in 1837.

SALISBURY (Wilts), founded in the beginning of the thirteenth century, on the removal of the cathedral hither from Old Sarum. National councils or parliaments were repeatedly held at Salisbury, particularly in 1296, by Edward I.; in 1328, by Edward III.; and in 1384. Henry Stafford, duke of Buckingham, was executed here by order of Richard III., in 1483. On **SALISBURY PLAIN** is Stonehenge (*which see*). This plain was estimated at 500,000 acres. On it were so many cross roads, and so few houses to take directions from, that Thomas, earl of Pembroke, planted a tree at each milestone from Salisbury to Shaftesbury, for the traveller's guide. The first seat of the BISHOPRIC was at Sherborne, St. Aldhelm being prelate, A.D. 705. Herman removed the seat to Old Sarum, about 1072; and the see was removed to this city, under the authority of a papal bull, in 1217. It has yielded to the church of Rome one saint and two cardinals. The building of the cathedral commenced April 28, 1220, and was completed in 1258. This edifice is reckoned one of our finest ecclesiastical erections, and its spire the loftiest in the kingdom. The bishopric is valued in the king's books at 1367*l.* 11*s.* 8*d.* Present income 5000*l.*

RECENT BISHOPS OF SALISBURY.

1797. John Fisher, died July 2, 1825.

1825. Thomas Burgess, died Feb. 19, 1837.

1837. Edmund Denison, died March 6, 1854.

1854. Walter Kerr Hamilton (PRESENT bishop, 1862).

SALMON FISHERIES. The laws relating to them were consolidated and amended in 1861, and the report of a commission of inquiry (including sir Wm. Jardine) was published in Feb. 1862.

SALT (chloride of sodium, a compound of the gas chlorine and the metal sodium), is procured from rocks in the earth, from salt-springs, and from sea-water. The famous salt-mines of Wielitzka, near Cracow, in Poland, have been worked 600 years. The salt-works in Cheshire, called the **WICHES** (Nantwich, Northwich, and Middlewich), were of great importance in the time of the Saxon heptarchy. Since 1797 salt has been largely employed in the manufacture of bleaching powder (by obtaining its chlorine), and soap (by obtaining its soda). On this are based the chemical works of Cheshire and Lancashire. The salt-mines of Staffordshire were discovered about 1670. Salt-duties were first exacted in 1702; they were renewed in 1732; reduced in 1823; and in that year were ordered to cease in 1825. During the French war, the duty reached to 30*l.* per ton. For the salt-tax in France, see *Gabelle*.

SALT-PETRE (from *sal petrae*, salt of the rock), or **NITRE**, is a compound of the gas nitrogen and the metal potassium, and hence is called Nitrate of Potash. It is the explosive ingredient in gunpowder, many detonating powders, and lucifer matches. Boyle in the seventeenth century demonstrated that salt-petre was composed of aqua fortis (nitric acid), and potash; but the discoveries of Lavoisier (1777), and Davy (1807), showed its real com-

position. It is found in all parts of the world, particularly in caves and other places where animal decomposition has taken place. Its manufacture in England began about 1625. During the French revolutionary war, the manufacture was greatly increased by the researches of Berthollet.

SALUTE AT SEA. It is a received maxim at sea, that he who returns the salute always fires fewer guns than he receives, which is done even between the ships of princes of equal dignity; but the Swedes and Danes return the compliment without regarding how many guns are fired to them. Merchantmen lower their mainyard; but men-of-war strike only their topsail. The English claim the right of being saluted first in all places, as sovereigns of the seas; the Venetians claimed this honour within their gulf, &c. See *Flag* and *Naval Salute*.

SALVADOR, St., one of the Bahamas, and the first point of land discovered in the West Indies or America by the illustrious Christopher Columbus. It was previously called Guanahani, or Cat's Isle, and Columbus (in acknowledgment to God for his deliverance from the dangers to which he was exposed in his voyage of discovery) named it St. Salvador, Oct. 11, 1492. The island is, however, still called by sailors Cat Island.

SAMARCAND (in Tartary), was conquered by the Mahometans 707 A. D.; by Genghis Khan 1219, and by Timour in 1359.

SAMARITANS. Samaria was built by Omri, 925 B. C., and became the capital of the kingdom of Israel. On the breaking up of that kingdom (721 B. C.), the conqueror Shalmaneser placed natives of other countries at Samaria. The descendants of these mixed races were abominable to the Jews, and much more so in consequence of the rival temple built on Mount Gerizim by Sanballat the Samaritan, 332 B. C., which was destroyed by John Hyrcanus, 130 B. C. (See *John* iv. & viii. 48, and *Luke* x. 33.)

SAMNITES, a warlike people of South Italy, who strenuously resisted the Roman power, and were not subjugated till after three sanguinary wars, from 343 to 292 B. C. Their brave leader Caius Pontius, who spared the Romans at Caudium, 320, having been taken prisoner, was basely put to death, 292. They did not acquire the right of citizenship till 88 B. C.

SAMOS, an island on the W. coast of Asia Minor. Colonised by Ionians about 1043 B. C. The city was founded about 986. Here Pythagoras was born 555 B. C., and flourished in the favour of Polycrates, who aided him in his travels, 532. Samos was taken by the Athenians 440; and with Greece, became subject to Rome 146. It was taken by the Venetians A. D. 1125, who here made velvet (*samet*), and became subject to the Turks 1459.

SANCTION. See *Pragmatic*.

SANCTUARIES. See *Asylums*. Privileged places for the safety of offenders are said to have been granted by king Lucius to churches and their precincts. St. John's of Beverley was thus privileged in the time of the Saxons. St. Burein's, in Cornwall, was privileged by Athelstan A. D. 935; Westminster, by Edward the Confessor; St. Martin's-le-grand, 1529. Being much abused, the privilege of sanctuary was limited by the pope in 1503, at the request of Henry VII.: it was abolished at the Reformation.—In London persons were secure from arrest in certain localities: these were the Minories, Salisbury-court, Whitefriars, Fulwood's-rents, Mitre-court, Baldwin's-gardens, the Savoy, Clink, Deadman's-place, Montague-close, and the Mint. This security was abolished 1696, but lasted in some degree till the reign of George II.

SANDALS. See *Shoes*.

SANDEMANIANS. See *Glasites*.

SANDHURST, ROYAL MILITARY COLLEGE. Founded, first at High Wycombe, in 1799. Removed to Great Marlow in 1802, and to Sandhurst in 1812. The college, for which the land was purchased at Blackwater, near Bagshot, consists of two departments, called the Senior and Junior: competitive examination for entrance into the junior departments began in Feb. 1858.

SANDWICH ISLANDS, a group in the Pacific Ocean, discovered by captain Cook in 1778. In *Owhyhee*, one of these islands, he fell a victim to the sudden resentment of the natives, Feb. 14, 1779. The king and queen visited London in 1824, and died there in July. These people have made great progress in civilisation, and embraced Christianity before any missionaries were settled among them. The present king Kamehameha IV. when 20 years old succeeded his uncle, Dec. 15, 1854. He married Miss Emma Rooker, 1856. His heir the prince of Hawaii was born May 20, 1858. An English bishopric was established at Honolulu in 1861, for which Dr. Thos. Staley was consecrated Aug. 18, 1862.

SANHEDRIM. An ancient Jewish council of the highest jurisdiction, of seventy, or as some say, seventy-three members, usually considered to be that established by Moses,

Num. xi. 16,—1490 B. C. It was yet in being at the time of Jesus Christ, *John* xviii. 31. A Jewish Sanhedrim was summoned by the emperor Napoleon I. at Paris, July 23, 1806, and assembled accordingly, Sept. 18.

SANITARY LEGISLATION. Strict cleanliness is enjoined in the law of Moses, 1490 B. C. Great attention has been paid to the public health in France since 1802. Tardieu published his "*Dictionnaire de Hygiène*," 1852-54. To Dr. Southwood Smith is mainly attributable the honour of commencing the agitation on the subject of public health in England about 1832; his "*Philosophy of Health*" having excited much attention. Since 1838 he has published numerous sanitary reports, having been much employed by the government. The results are—

Nuisances Removal Act passed (subsequently repealed)	1845—1848	Burial Act (and subsequent amendments) 1852—1853
Baths and Washhouses Act	1846—1847	Smoke Nuisance Abatement Act (and amendment)
Public Health Act, and subsequent Supplemental Acts	1848	Nuisances Removal Act [amended in 1860]
Common Lodging Houses Act	1851—1853	Diseases Prevention Act
Labouring Classes Lodging Houses Act	1851	Local Government Act
		Public Health Act

SANSKRIT, the ancient language of the Brahmins of India, spoken at the time of Solomon, has been much studied of late years. Sir Wm. Jones, who published a translation of the poem *Sakuntalâ* in 1783, discovered that a complete literature had been preserved in India, comprising sacred books, (the Vedas,) history and philosophy, lyric and dramatic poetry. Texts and translations of many works have been published by the aid of the East India Company, the Oriental Translation Fund, and private liberality. The professorship of Sanskrit at Oxford was founded by Colonel Boden. The first professor H. H. Wilson, appointed in 1832, translated part of the *Rig-veda Sanhita*, the sacred hymns of the Brahmins, and several poems, &c. The present professor, Monier Williams (elected 1860), published an English and Sanskrit dictionary, 1851. Professor Max Müller published his *History of Sanskrit Literature* in 1859, and has edited part of the original text of the Vedas. Philologists have discovered an intimate connection between the Sanskrit, Persian, Greek, Latin, Teutonic, Slavonian, Celtic, and Scandinavian languages.

SANTA CRUZ (Teneriffe, Canary Isles). Here admiral Blake entirely destroyed 16 Spanish ships, secured with great nautical skill, and protected by the castle and forts on the shore. This exploit was so miraculous, that all who knew the place wondered any sober man, with what courage soever endowed, would have undertaken it; and the victors could hardly persuade themselves to believe what they had done; whilst the surviving Spaniards thought they were devils, and not men, who had destroyed their ships in such a manner, April 20, 1657. *Clarendon*. In an unsuccessful attack made upon Santa Cruz by Nelson, several officers and 141 men were killed, and the admiral lost his right arm, July 24, 1797.*

SAPPHIC VERSE, invented by Sappho, the lyric poetess of Mitylene. She was equally celebrated for her poetry, beauty, and a hopeless passion for Phaon, a youth of her native country, on which last account it is said she threw herself into the sea from Mount Leucas, and was drowned. The Lesbians, after her death, paid her divine honours, and called her the tenth muse, 594 B. C. Some consider the story fabulous.

SAPPHIRE. This precious stone is of an azure or beautiful sky-colour, and transparent; in hardness it exceeds the ruby, and is next to the diamond; it is so hard as scarcely to bear engraving. It was most highly prized by the ancient inhabitants of the East, and many nations attributed all their happiness and success to wearing it about their person, more as a charm than an ornament. Thomas Kouli Khan is said to have possessed a sapphire valued at three hundred thousand pounds, 1733. With us, this stone is the fourth in the order of value. Artificial sapphires were made in 1857 by M. Gaudin. Equal parts of alum and sulphate of potash were heated in a crucible.

SARACENS. A celebrated people from the deserts of Arabia. They were the first disciples of Mahomet, and within 40 years after his death (A. D. 632), they had conquered a great part of Asia, Africa, and Europe. They conquered Spain in 711, *et seq.*, and (under Abderahman) established the caliphate of Cordova in 755, which gave way to the

* It was remarkable, that captain Fremantle, the friend of Nelson, and his companion in most of his brilliant achievements, was also wounded in the arm immediately before Nelson had received his wound in the same limb. The following characteristic note, addressed to the lady of Captain Fremantle (who was on board with her husband at the time he wrote), has been preserved, as being the first letter written by the glorious hero with his left hand:—"MY DEAR MRS. FREMANTLE,—Tell me how Tom is I hope he has saved his arm. *Mine is off*; but, thank God! I am as well as I hope he is.

"Ever yours, HORATIO NELSON."

Moors in 1237. The empire of the Saracens closed by Bagdad being taken by the Tartars, 1258. *Blair*.

SARAGOSSA (N. E. Spain), anciently *Cæsarea Augusta*, was taken from the Arabs by Alfonso of Spain, in 1118. Here Philip V. was defeated by the archduke Charles, in 1710. On Dec. 17, 1778, four hundred of the inhabitants perished in a fire at the theatre. Saragossa was taken by the French, after a most heroic defence by general Palafox, Feb. 20, 1809. The inhabitants, of both sexes, resisted until worn out by fighting, famine, and pestilence.

SARAH SANDS. See *Wrecks*, 1857.

SARATOGA (New York State, N. America). Here general Burgoyne, commander of a body of the British army, after a severe engagement with the Americans (Oct. 7), being surrounded, surrendered with all his army to the American general Gates. Not less than 5791 men laid down their arms, Oct. 17, 1777. The American accounts stated the number to be much greater. This was the greatest check the British suffered in the war.

SARAWAK. See *Borneo*.

SARDINIA, an island in the Mediterranean, successively possessed by the Phœnicians, Greeks, Carthaginians (550 B.C.), Romans (subjugated 231), Saracens, Genoese, and Spaniards. From settlers belonging to these various nations the present inhabitants derive their origin. Victor Amadeus, duke of Savoy, acquired Sardinia in 1720, with the title of king. See *Savoy*. Population of the Sardinian dominions in 1858, 5,194,807. The king of Sardinia was recognised as king of Italy by his parliament, in Feb., and by the British government, March 31, 1861.

James of Arragon becomes master of a large part of Sardinia . . . A.D. 1324
 Conquered by the English naval forces, under sir John Leake and gen. Stanhope . . . 1708
 Given to the emperor Charles VI. . . . 1714
 Recovered by the Spaniards 1717
 Ceded to the duke of Savoy with the title of king, as an equivalent for Sicily . . . 1720
 Victor Amadeus abdicates in favour of his son . 1730
 Attempting to recover his throne, he is taken, and dies in prison 1732
 The court kept at Turin, till Piedmont is overrun by the French 1792
 The king resigns his crown to his brother, duke of Aosta June 4, 1802
 Piedmont annexed to Italy, and Napoleon crowned king of Italy Dec. 26, 1805
 The king resides in Sardinia 1798—1814
 Piedmont restored to its rightful sovereign, with Genoa added to it Dec. 1814
 King Charles-Albert promulgates a new code . 1837
 Cavour establishes the newspaper "Il Risorgimento" ("the Revival") 1847
 The king grants a constitution, and openly espouses the cause of Italian regeneration against Austria March 23, 1848
 Defeats the Austrians at Goito; and takes Peschiera May 30, —
 Sardinian army defeated by Radetzky, July 26, —
 Sardinians at Milan capitulate to Radetzky, Aug. 5, —
 Armistice between Sardinia and Austria, Sept. 21, —
 Hostilities resumed March 12, 1849
 Radetzky defeats a division of the Sardinians, and occupies Mortara March 21, —
 Complete defeat of the Sardinians by the Austrians at Novara March 23, —
 Charles-Albert abdicates in favour of his son, Victor-Emmanuel March 23, —
 The Austrians occupy Novara, &c. . . . March 23, —
 Another armistice March 26, —
 Death of Charles-Albert, the ex-king, at Oporto, July 28, —
 Treaty of Milan between Austria and Sardinia, signed Aug. 6, —
 Adoption of the Siccardi law, which abolishes ecclesiastical jurisdictions April 9, 1850
 Arrest of the bishop of Turin May 4, —
 He is released from the citadel June 2, —
 Cavour minister of foreign affairs 1851
 Bill for suppression of convents passed, March 2, 1853

Convention with England and France signed: a contingent of 15,000 troops to be supplied against Russia April 10, 1855
 10,000 troops under general La Marmora arrive in the Crimea May 8, —
 Who distinguish themselves in the battle of the Tchernaya Aug. 16, —
 The king visits London, &c. Nov. 30, &c. —

 Rupture with Austria; subsequent war, see *Austria*, 1857, *et seq.*
 Cavour declares in favour of free-trade, June, 1857
 Prince Napoleon marries princess Clotilde, Jan. 30, 1859
 Preliminaries of peace signed at Villa Franca, July 11; count Cavour resigns, July 13;
 Ratazzi administration formed July 19, —
 The emperor Napoleon's letter to Victor-Emmanuel, advocating the formation of an Italian confederation: the latter declares it to be impracticable, and maintains his engagements with the Italians Oct. 20, —
 Treaty of peace signed at Zurich Nov. —
 Garibaldi retires into private life Nov. 17, —
 Count Cavour returns to office Jan. 16, 1860
 The Sardinian government refers the question of annexation of Tuscany, &c., to the vote of the people Feb. 29, —
 Annexation of Savoy and Nice proposed by the French government; the Sardinian government refer it to the vote of the people, Feb. 25, —
 Annexation to Sardinia voted almost unanimously by Emilia, March 14; by Tuscany, March 16; accepted by Victor-Emmanuel, March 18—20, —
 Treaty ceding Savoy and Nice to France, signed, March 24, —
 Prussia protests against the Italian annexations March 27, —
 New Sardinian parliament opens April 2, —
 Annexation to France almost unanimously voted for by Nice, April 15; by Savoy, April 22, —
 The government professes disapproval of Garibaldi's expedition to Sicily (*which see*) May 18, —
 The chambers ratify treaty of cession of Savoy and Nice May 29, —
 The Sardinian troops enter the papal territories (see *Italy and Rome*) Sept. 11, —
 Victor-Emmanuel enters the kingdom of Naples, Oct. 15, —

SARDINIA, *continued.*

Naples and Sicily vote for annexation to Sardinia

Oct. 21, 1860

[For future history see *Italy*.][For the disputes, and war with Austria, and the events of 1859-61, see *Austria, France, Rome, Sicily, and Naples*.]KINGS OF SARDINIA. See *Savoy*.

1720. Victor-Amadeus I. king (as duke II.); resigned, in 1730, in favour of his son; died in 1732.

1730. Charles-Emmanuel I. his son.

1773. Victor-Amadeus II. his son.

1796. Charles-Emmanuel II., son of the preceding; resigned his crown in favour of his brother.

1802. Victor-Emmanuel I.

1805. [Sardinia merged in the kingdom of Italy, of which the emperor Napoleon was crowned king, May 26, 1805.]

1814. Victor-Emmanuel restored; resigned in March, 1821; and died in 1824.

1821. Charles-Felix; succeeded by his nephew.

1831. Charles-Albert; abdicated in favour of his son, March 23, 1849. Died at Oporto, July 28, 1849.

1849. Victor-Emmanuel II., March 23; born March 14, 1820; the PRESENT (1862) king of Italy.

Heir: Humbert, prince of Piedmont; born March 14, 1844.SARDIS. See *Seven Churches*.

SARMATIA, the ancient name of modern Russia and Poland.

SARUM, Old (Wiltshire), an ancient town, the origin of Salisbury, *which see*.

SATIRE. About a century after the introduction of comedy, satire made its appearance at Rome in the writings of Lucilius, who was so celebrated in this species of composition that he has been called the inventor of it, 116 B.C. *Livy*. The Satires of Horace (35 B.C.) Juvenal (about A.D. 100), and Persius (about A.D. 60), are the most celebrated in ancient times, and those of Churchill (1761), and Pope (1729), in modern times.

SATRAPIES, divisions of the Persian empire, formed by Darius Hystaspes about 516 B.C.

SATURDAY (the last, or seventh day of the week; the Jewish Sabbath. See *Sabbath*). It was so called from an idol worshipped on this day by the Saxons, and according to Verstegan, was named by them Saterne's day. *Pardon*. It is more properly from Saturn, *dies Saturni*. *Addison*.

SATURN, the planet, ascertained to be about 900 millions of miles distant from the sun, and its diameter to be about 77,230 miles. His satellites were discovered by Galileo and Simon Meyer, 1608-9-10; his belt, &c., by Huyghens, in 1634; his fifth satellite by the same, in 1655; and his sixth and seventh by Herschel, in 1789. Cassini was also a discoverer of the satellites of the planet. In heathen mythology, Saturn is the father of the gods.

SATURNALIA, festivals in honour of Saturn, were instituted long before the foundation of Rome, in commemoration of the freedom and equality which prevailed on the earth in the golden reign of Saturn. Some, however, suppose that the Saturnalia were first observed at Rome in the reign of Tullus Hostilius, after a victory obtained over the Sabines: whilst others suppose that Janus first instituted them in gratitude to Saturn, from whom he had learned agriculture. Others assert that they were first celebrated, after a victory obtained over the Latins by the dictator Posthumus. During these festivals no business was allowed, amusements were encouraged, and distinctions ceased. *Langlet*.

SAVINGS' BANKS.* The rev. Joseph Smith, of Wendover, began a Benevolent Institution in 1799; and in 1803-4 a Charitable Bank was instituted at Tottenham by Miss Priscilla Wakefield. Henry Dundas established a parish bank at Ruthwell in 1810. One was opened in Edinburgh in 1814. The benefit clubs, among artisans, having accumulated stocks of money for their progressive purposes, a plan was adopted to identify these funds with the public debt of the country, and an extra rate of interest was held out as an inducement; hence were formed savings' banks to receive small sums, returnable with interest on demand.

Sir Geo. Rose developed the system and brought it under parliamentary control, 1816.

In 1840 there were 550 banks; 766,354 depositors; amount 22,060,904*l*.

Acts to consolidate and amend previous laws relating to savings' banks were passed in 1828 and 1847; and extended to Scotland in 1833.

On Nov. 20, 1851, the number of savings' banks in Great Britain and Ireland was 574, besides above twenty thousand Friendly Societies and charitable institutions. The depositors (in the banks) were 1,092,581, while the societies embraced a vast but

unknown number of persons: the amount of deposits was 32,893,511*l*.

Amount of stock held on account of savings' banks in 1853, 34,546,334*l*.; in 1857, 35,108,596*l*.; in 1859, 38,995,876*l*. In 1861 the savings' banks received 8,764,870*l*.; paid 9,621,539*l*.; estimated capital, 41,332,945*l*. (depositors, 1,479,723). The military savings' bank held 204,377*l*.; the seamen's savings' banks held 25,448*l*.

For Post-Office Savings' Banks, established in 1861, see under *Post Office*.

* The first of these was instituted at Berne, in Switzerland, in 1787, by the name of *caisse de domestiques*, being intended for servants only; another was set up in Basel, 1792, open to all depositors.

SAVINGS' BANKS, *continued.*

CLASSIFICATION OF THE FIRST TWENTY THOUSAND DEPOSITORS WHO OPENED ACCOUNTS.

Domestic servants	7245	Friendly and charitable societies	58
Persons in trade, mechanics, &c.	7473	Persons not classed, viz. widows, teachers, sailors, &c.	3098
Labourers and porters	672		
Miners	1454		

SAVOY, formerly *Sapaudia* or *Sabaudia*, formerly a province in N. Italy, East of Piedmont. It became a Roman province about 118 B.C. The Alemanni seized it in A.D. 395, and the Franks in 496. It shared the revolutions of Switzerland till about 1048, when Conrad, emperor of Germany, gave it to Humbert, with the title of count. Count Thomas acquired Piedmont in the thirteenth century. Amadeus, count of Savoy, having entered his dominions, solicited Sigismund to erect them into a duchy, which he did at Cambray, Feb. 19, 1417. Victor-Amadeus, duke of Savoy, obtained the kingdom of Sicily, by a treaty from Spain, in 1713, which he afterwards exchanged with the emperor for the island of Sardinia, with the title of king, 1720. See *Sardinia*. The French subdued Savoy in 1792, and made it a department of France, under the name of Mont Blanc, in 1800. It was restored to the king of Sardinia in 1814; but was once more annexed to France 1860,* in accordance with a vote by universal suffrage, April 23, 1860. Savoy was visited by the emperor and empress of the French in Aug. 1860.

DUKES OF SAVOY.

1391. Count Amadeus VIII. is made duke in 1416; he was named pope as Felix V. He abdicated as duke of Savoy, 1439; renounced the tiara, 1449; died in 1451.	1496. Philip II.
1439. Louis.	1497. Philibert II.
1465. Amadeus IX.	1504. Charles III.
1472. Philibert I.	1553. Emanuel-Philibert.
1482. Charles I.	1553. Charles-Emanuel I.
1489. Charles II.	1580. Victor-Amadeus I.
	1630. Francis Hyacinthe.
	1638. Charles-Emanuel II.
	1675. Victor-Amadeus II. became king of Sicily, 1713; exchanged for Sardinia in 1720.

SAVOY PALACE, London, was given to Peter of Savoy, uncle of Eleanor, queen of Henry III., in 1236. Here was held the CONFERENCE between the clergy and the non-conformists in 1661. It was taken down to make way for Waterloo Bridge.

SAW. Invented by Dædalus. *Pliny*. Invented by Talus. *Apollodorus*. Talus, it is said, having found the jaw-bone of a snake, employed it to cut through a piece of wood, and then formed an instrument of iron like it. Beecher says saw-mills were invented in the seventeenth century; but he errs. Saw-mills were erected in Madeira in 1420; at Breslau, in 1427. Norway had the first saw-mill in 1530. The bishop of Ely, ambassador from Mary of England to the court of Rome, describes a saw-mill there, 1555. The attempts to introduce saw-mills in England were violently opposed, and one erected by a Dutchman in 1663 was forced to be abandoned.

SAXE-WEIMAR (Central Germany). The grand dukes are descended from John Frederic, the Protestant elector of Saxony, who was deprived by the emperor in 1548. See *Saxony*. The houses of Saxe-Coburg-Gotha, Saxe-Gotha, Hilberghausen, and Saxe-Meiningen also spring from him. They are all termed the senior or *Ernestine* branch of the old family.—Saxe-Weimar became a grand duchy in 1815. The dukes have greatly favoured literature, and their capital Weimar has been called the Athens of Germany. Population of the duchy in 1858, 267,112.

GRAND-DUKES.

1815. Charles Augustus.	1853. Charles Alexander, July 8; born June 24,
1828. Charles Frederic.	1818, the PRESENT (1862) grand duke.
	<i>Heir</i> ; Charles Augustus, born July 31, 1844.

SAXONY, a kingdom in North Germany. The Saxons were a fierce warlike race, the terror of the inhabitants of the later western empire, frequently attacked France, and conquered Britain (*which see*). After a long series of sanguinary conflicts they were completely subdued by Charlemagne, who instituted many fiefs and bishoprics in their country. Witi-kind, their great leader, who claimed descent from Woden, professed Christianity about 785. From him descended the first and the present ruling family (the houses of Supplinburg, •Guelph, and Ascania intervened from 1106 to 1421). Saxony became a duchy A.D. 880, an electorate, 1180, and a kingdom, 1806. It was the seat of war, 1813; the king being on the side of Napoleon. Population in 1858, 2,122,148.

* This annexation was severely censured by the British government, March 22, 1860.

SAXONY, *continued.*

ELECTORS.

1423. Frederic I.
 1428. Frederic II.
 [His sons Ernest and Albert divide the states.]
 1464. Ernest.
 1486. Frederic III.
 1525. John.
 1532. John Frederic; deprived by the emperor Charles V.; succeeded by
 1548. Maurice (of the Albertine line).
 1553. Augustus.
 1586. Christian I.
 1591. Christian II.
 1611. John George I.
 1656. John George II.

1680. John George III.
 1691. John George IV.
 1694. Frederic Augustus I., king of Poland, 1697.
 1733. Frederic Augustus II., king of Poland.
 1763. Frederic Augustus III. becomes king, 1806.

KINGS.

1806. Frederic Augustus I.
 1827. Anthony Clement.
 1836. Frederic Augustus II. succeeded by his brother.
 1854. John, Aug. 9 (born Dec. 12, 1801), the PRESENT
 (1862) king.
Heir: His son, Frederic Augustus Albert, born
 April 23, 1828.

SCANDALUM MAGNATUM, a special statute relating to any wrong, by words or in writing, done to high personages of the land, such as peers, judges, ministers of the crown, officers in the state, and other great public functionaries, by the circulation of scandalous statements, false news, or horrible messages, by which any debate or discord between them and the commons, or any scandal to their persons might arise. *Chambers*. This law was first enacted 2 Rich. II. 1378.

SCANDINAVIA. The ancient name of Sweden, Norway, and great part of Denmark (*which see*), whence proceeded the Northmen or Normans, who conquered Normandy (about A. D. 900), and eventually England (1066). They were also called Sea-kings or Vikings. They settled Iceland and Greenland, and, it is thought, the northern regions of America, about the ninth century.

SCARLET, or kermes dye, was known in the East in the earliest ages; cochineal dye, A. D. 1518. Kepler, a Fleming, established the first dye-house for scarlet in England, at Bow, 1643. The art of dyeing red was improved by Brewer, 1667. *Beckmann*.

SCEPTICS. The sect of philosophers founded by Pyrrho, about 334 B. C. Pyrrho was in continual suspense of judgment; he doubted of everything; never made any conclusions, and when he had carefully examined the subject, and investigated all its parts, he concluded by still doubting of its evidence.

SCEPTRE, a more ancient emblem of royalty than the crown. In the earlier ages the sceptres of kings were long walking-staves; afterwards carved and made shorter. Tarquin the elder was the first who assumed the sceptre among the Romans, about 468 B. C. The French sceptre of the first race of kings was a golden rod, A. D. 481. *Le Gendre*.

SCHIEHALLIEN, a mountain in Perthshire, where Dr. Neville Maskelyne, the astronomer-royal, made his observation with a plumb-line in 1774, from which Hutton calculated that the density of the earth is five times greater than water.

SCHLESWIG. See *Holstein*. Schleswig-Holstein gives title to the prince Christian, heir to the throne of Denmark (*which see*). The royal assent to the marriage of his daughter princess Alexandra with the prince of Wales was announced Nov. 1, 1862.

SCHOOLS. Charity schools were introduced in London to prevent the seduction of the infant poor into Roman Catholic seminaries, 3 James II. 1687. *Rapin*. Charter schools were instituted in Ireland, 1733. *Scully*. In England there were, in 1847, 13,642 schools (exclusively of Sunday schools) for the education of the poor; and the number of children was 998,431. The parochial and endowed schools of Scotland were (exclusively of Sunday schools) 4836; and the number of children, 181,467. The schools in Wales were 841, and the number of children, 38,164: in Ireland, 13,327 schools, and 774,000 children. In 1851, there were 2310 schools in connection with the Education Committee actually inspected in England and Scotland. They included: 1713 Church of England schools in England and Wales; 282 Protestant Dissenting schools in England and Wales; 98 Roman Catholic schools in Great Britain; and 217 Presbyterian schools in Scotland, whereof 91 were of the Free Church; the whole affording accommodation for 299,425 scholars. In the same year (1851) the estimated sums voted for education were: for Great Britain, 150,000*l.*, for Ireland, 134,560*l.* See *Education, Design, &c.*

SCIENTIFIC FUND. In 1859, several Fellows of the Royal Society commenced the collection of subscriptions with the view of establishing a permanent fund to be expended in aiding necessitous men of science and their families. In the spring of 1860, 3365*l.* had been subscribed. See *Literary Fund*.

SCILLY ISLES (the Cassiterides or Tin-islands). They held commerce with the Phœnicians; and are mentioned by Strabo as being ten in number. A memorable shipwreck of the British squadron under Sir Cloudesley Shovel occurred here. This brave admiral, returning from an expedition against Toulon, mistook these rocks for land, and struck upon them. His ship the *Association*, in which were his lady, two sons, many persons of rank, and 800 brave men, went instantly to the bottom. The *Eagle*, captain Hancock, and the *Romney* and *Firebrand*, were also lost. The rest of the fleet escaped. Oct. 22, 1707. Sir Cloudesley's body, being found, was conveyed to London, and buried in Westminster abbey, where a monument was erected to his memory.

SCIO MASSACRE. See *Chios*.

SCONE, near Perth. The Scotch coronation chair was brought from Scone to Westminster Abbey, by Edward I. in 1296.

SCOTLAND. See *Caledonia*. This important member of the British empire was governed by a king before the Romans visited England, and continued an independent kingdom till the death of the English queen Elizabeth, when James VI. of Scotland, the most immediate heir, was called to the throne of England, and constantly resided in the latter kingdom; he and his successors calling themselves kings of England and Scotland. Each country had a separate parliament, till the year 1707, in the reign of queen Anne, when both kingdoms were united under the general name of Great Britain. See *England*.

 Dumbane (or Sheriffmuir) Nov. 13, —
 Captain Porteous is killed by a mob in Edin-
 burgh. (See *Porteous.*) Sept. 7, 1736

Prince Charles Edward proclaimed at Perth,
 Sept. 4; at Edinburgh, Sept. 16; with the
 Highlanders defeats sir John Cope at Pres-
 ton-Pans, Sept. 21; takes Carlisle, Nov. 15;
 arrives at Manchester, Nov. 28; at Derby,
 Dec. 4; retreats and arrives at Glasgow,
 Dec. 25, 1745
 Defeats general Hawley at Falkirk, Jan 17; is
 totally defeated at Culloden April 16, 1746
 Lords Kilmarnock and Balmerino are executed
 for high treason on Tower-hill Aug. 18, —
 The Highland dress prohibited by act of par-
 liament (But the act was afterwards repealed),
 Aug. 12, —
 Simon Fraser, Lord Lovat, executed at the age
 of 80 April 9, 1747
 Thomson, the poet, dies Aug. 27, 1748
 The Old Pretender, the "Chevalier de St.
 George," dies at Rome, in his 88th year,
 Dec. 30, 1765
 Prince Charles Edward Louis Casimir, the
 Young Pretender, dies at Rome Jan. 31, 1788
 Death of Robert Burns July, 1796
 Scott's "Lay of the Last Minstrel" published 1806
 Cardinal York (the last of the Stuarts) dies,
 Aug. 19, 1807
 The Court of Session is formed into two divisions
 "Waverley" published — 1814
 The establishment of a jury court under a lord
 chief commissioner 1815
 Visit of George IV. to Scotland October 1822
 Sir Walter Scott dies Sept. 21, 1832
 Seven ministers of the presbytery of Strath-
 bogie are deposed by the General Assembly
 of the Church of Scotland for obeying the
 civil in preference to the ecclesiastical law.
 (Their deposition was formally protested
 against by the minority of ministers, headed
 by Dr. Cook.) May 28, 1841
 The General Assembly condemn patronage as
 a grievance to the cause of true religion that
 ought to be abolished May 23, 1842
 Visit of the Queen, prince Albert, and the
 court; she lands at Granton pier, Sept. 1, —
 The Queen embarks Sept. 13, —
 Secession of the non-intransigent ministers of the
 Church of Scotland (about 400) at the General
 Assembly. (See *Free Church.*) May 18, 1843
 Death of Jeffrey Jan. 26, 1850
 National association for vindication of Scottish
 rights, formed Nov. 1853
 Act for better government of the universities
 passed Aug. 1858
 See *Edinburgh.*

KINGS OF SCOTLAND.

BEFORE CHRIST.

[The early accounts of the kings are, by many his-
 torians, deemed in a great measure fabulous. The
 series of kings is carried as far back as Alexander
 the Great.]

330. Fergus I.: ruled 25 years; lost in the Irish
 Sea.* * * * *

AFTER CHRIST.

357. Eugenius I. son of Fincornachus; slain in
 battle by Maximus, the Roman general, and
 the confederate Picts.

* * With this battle ended the kingdom of the
 Scots, after having existed from the coro-

nation of Fergus I., a period of 706 years
 the royal family fled to Denmark. *Bocce
 Buchanan.*

[Interregnum of 27 years.]

404. Fergus II. † (I.) great-grandson of Eugenius and
 40th king; slain in battle with the Romans.
 420. Eugenius II. or Evenus, son of Fergus; reigned
 37 years.
 451. Dongardus or Domangard, brother of Eugenius;
 defeated and drowned.
 457. Constantine I. brother of Dongardus: assassi-
 nated by Dugall, a noble whose daughter he
 had dishonoured.

* Fergus, a brave prince, came from Ireland with an army of Scots, and was chosen king. Having
 defeated the Britons and slain their king Coilus, the kingdom of the Scots was entailed upon his posterity
 for ever. He went to Ireland, and having settled his affairs there, was drowned on his return, launching
 from the shore, near the harbour, called *Carrick-Fergus* to this day, 3699 A.M. *Anderson.*

† Some call this Fergus the *first* king, and suppose that either the foregoing kings were fabulous, or
 that they were only chiefs or generals of armies, having no royal authority. The controversy thus arising,
 I leave to be decided by the antiquaries, and must follow the received histories of Scotland. *Anderson.*

SCOTLAND, *continued.*

479. Congallus I. nephew of the preceding: a just and prudent king.
501. Goranus, brother of Congallus: murdered. *Boece.* Died while Donald of Athol was conspiring to take his life. *Scott.*
535. Eugenius III. succeeded his uncle, Goranus: "none excelled him in justice."
558. Congallus II. brother of Eugenius III.
569. Kinnatellus, brother of the preceding: resigned in favour of Aidanus.
570. Aidanus or Aidan, son of Goranus.
605. Kenneth or Kennet I. son of Congallus II.: reigned one year.
606. Eugenius IV. son of Aidanus.
621. Ferchard or Ferquhard, son of the last: confined for misdeeds to his palace, where he laid violent hands upon himself. *Scott.*
632. Donald IV. brother of Ferchard: drowned in Loch Tay.
646. Ferchard II. son of Ferchard I.: "the most execrable of kings;" died from the bite of a mad wolf.
664. Malduinus, son of Donald IV.: strangled by his wife for his supposed infidelity, for which crime she was immediately afterwards burnt.
684. Eugenius V. brother of Malduinus.
688. Eugenius VI. son of Ferchard II.
698. Amberkeletus, his nephew: fell by an arrow from an unknown hand.
699. Eugenius VII. his brother: some ruffians designing the king's murder, entered his chamber, and, he being absent, stabbed his queen, Spontana, to death. *Scott.*
715. Mordachus, son of Amberkeletus.
730. Etfinus, son of Eugenius VII.
761. Eugenius VIII. son of Mordachus; sensual and tyrannous: put to death by his nobles, and his parasites strangled.
764. Fergus III. son of Etfinus: killed by his jealous queen, who afterwards stabbed herself to escape a death of torture.
767. Solvathius, son of Eugenius VIII.
787. Achaius: a just and wise prince.
819. Congallus III.: a peaceful reign.
824. Dougal or Dougal, son of Solvathius: drowned.
831. Alpine, son of Achaius: taken prisoner, and beheaded by the Picts.
834. Kenneth II. son of Alpine, and surnamed Mac Alpine: defeated the Picts, slew their king, and united them and the Scots under one sceptre, and became the first sole monarch of all Scotland, 843.
854. Donald V. brother of Kenneth: dethroned, and terminated an inglorious reign in prison, dying by his own hand.
858. Constantine II. son of Kenneth: taken in battle by the Danes, and beheaded.
874. Eth or Ethus, surnamed Lightfoot: died of grief in prison, having been thrown into confinement for his sensuality and crimes.
876. Gregory the Great; distinguished for bravery, moderation, and justice.
893. Donald VI. son of Constantine; an excellent prince.
904. Constantine III. son of Ethus; resigned in favour of Malcolm, after a long reign, and retired to a monastery.
944. Malcolm I. son of Donald VI.: murdered.
953. Indulfus or Gondulph: killed by the Danes in an ambushade.
961. Duff or Duffus, son of Malcolm: murdered by Donald, the governor of Forres castle.
965. Cullen or Culenus, son of Indulfus; avenged the murder of his predecessor: assassinated at Methven by a thane, whose daughter he had dishonoured.
970. Kenneth III. brother of Duffus: murdered by Fenolla, the lady of Fettercairn.
994. Constantine IV. son of Culenus, usurped the throne: slain.
995. Grimus, or the Grim, son of Duffus: routed and slain in battle by Malcolm, the rightful heir to the crown, who succeeded.
1003. Malcolm II. son of Kenneth III.: assassinated on his way to Glamis; the assassins in their flight crossing a frozen lake, were drowned by the ice giving way. Malcolm was succeeded by his grandson.
1033. Duncan I.: assassinated by his cousin.
1039. Macbeth, usurper; slain by Macduff, the thane of Fife.
- * * * Historians so differ, up to this reign, in the number of the kings, the dates of succession, and the circumstances narrated, that no account can be taken as precisely accurate.
1057. Malcolm III. (Canmore), son of Duncan: killed while besieging Alnwick castle.
1093. Donald VII. (Donald Bane), brother of Malcolm, usurped the throne: fled to the Hebrides.
1094. Duncan II. natural son of Malcolm; also an usurper: murdered.
1094. Donald Bane, again: deposed.
1098. Edgar, son of Malcolm; Henry I. of England married his sister Maud, who had taken the vows, but not the veil.
1107. Alexander the Pious, brother.
1124. David, brother: married Matilda, daughter of Waltheof, earl of Northumberland.
1153. Malcolm IV. grandson to David.
1165. William, surnamed the Lion: brother.
1214. Alexander II. son of William: married Jean, daughter of John, king of England.
1249. Alexander III.: married Margaret, daughter of Henry III. of England: dislocated his neck, when hunting, near Kinghorn.
1285. Margaret the "Maiden of Norway" grand-daughter of Alexander, "recognised by the states of Scotland, though a female, an infant, and a foreigner:" died on her passage to Scotland.
- A competition for the vacant throne, Edward I. of England decides in favour of
1292. John Balliol, who afterwards surrendered his crown, and died in exile.
- [Interregnum.]
1306. Robert (Bruce) I. a great prince.
1329. David (Bruce) II. son of Robert. Edward Balliol disputed the throne with him.
1332. Edward Balliol, son of John: resigned.
1342. David II. again: eleven years a prisoner in England; succeeded by his nephew,
1371. Robert (Stuart) II.: succeeded by his son,
1390. Robert III. whose proper name was John, changed on his accession.
1406. James I. second son of the preceding: imprisoned 18 years in England; set at liberty in 1423; conspired against and murdered at Perth, Feb. 20, 1437. *Banks.*
1437. James II. son of James I. whom he succeeded at seven years of age: killed at the siege of Roxburgh castle by a cannon bursting, Aug. 3, 1460.
1460. James III. a weak prince, succeeded his father: killed in a revolt of his subjects at Bannockburn-field, June 11, 1488.
1488. James IV.: married Margaret Tudor, daughter of Henry VII. of England: killed at the battle of Flodden.
1513. James V.: son of the last king: succeeded when little more than a year old; a sovereign possessing many virtues.
1542. Mary, daughter of James V.: born Dec. 8, 1542, succeeded in her infancy. See *Annals* above.
1567. James VI. son of Mary. In 1603, on the death of queen Elizabeth, he succeeded to the throne of England and the kingdoms became united.

See *England.*

SCREW. This instrument was known early to the Greeks. The pumping-screw of Archimedes, or screw-cylinder for raising water, invented 236 B.C. is still in use, and still bears that philosopher's name. It is stated that with the assistance of the screw, one man can press down or raise up as much as 150 men can do without it.

SCREW-PROPELLER consists of two or more twisted blades, like the vanes of a wind-mill, set on an axis, running parallel with the keel of a vessel, and revolving beneath the water at the stern. It is driven by a steam-engine. The principle is as old as the wind-mill. It was shown by Hooke in 1681, and since by Du Quet, Bernouilli, and others. Patents for propellers were taken out by Joseph Bramah in 1784; by Wm. Lyttelton in 1794; and by Edward Shorter in 1799. But these led to no useful result. However, in 1836 patents were obtained by F. P. Smith and captain John Ericsson, and to them the successful application of the screw-propeller must be attributed. The first vessels with the screw, the Archimedes and the Rattler, were constructed in the United States. The latter was tried in England in 1845. Since then the screw-propeller has been largely employed.

SCULLABOGUE. See *Massacres*, 1798.

SCULPTURE is said to have begun with the Egyptians and the Greeks. Pausanias refers the nearest approach to perfection in the art to 560 B.C. Bezaleel and Aholiab built the tabernacle in the wilderness, and made all the vessels and ornaments, 1491 B.C.; and their excellence is recorded as the gift of God, *Exodus xxxi. 3*. Dipcenus and Scyllis, statuarys at Crete, established a school at Sicyon. Phny speaks of them as being the first who sculptured marble and polished it; all statues before their time being of wood, 568 B.C. Alexander gave Lysippus the sole right of making his statues, 326 B.C. He left no less than 600 pieces, some of which were so highly valued in the age of Augustus, that they sold for their weight in gold. Sculpture did not flourish among the Romans; and in the middle ages had much degraded. With the revival of painting, it revived also; and Donato di Bardi, born at Florence, A.D. 1383, was the earliest professor among the moderns. An institute of sculptors was established in 1861.

EMINENT SCULPTORS,

Pheidon flourished	B.C. 869	Michael Angelo Buonarroti,	Flaxman	A.D. 1754-1806
Myron	480	Angelo	Chantrey	1781-1841

Chares	288	Bacon	J. Gibson	1791
		Canova	J. Thomas	1813-1862
				1757-1822

SCUTAGE or ESCUAGE. The service of the shield (scutum) is either uncertain or certain. Escuage uncertain is where the tenant by his tenure is bound to follow his lord; and is called Castleward, where the tenant is bound to defend a castle. Escuage certain is where the tenant is set at a certain sum of money to be paid in lieu of such uncertain services. The first tax levied in England to pay an army, 5 Hen. II. 1159. *Cowel*.

SCUTARI, a town of Asiatic Turkey, opposite Constantinople, of which it is a suburb. It was anciently called *Chrysopolis*, golden city, in consequence, it is said, of the Persians having established a treasury here when they attempted the conquest of Greece. Near here Constantine finally defeated Licinius, A.D. 324. The hospital was occupied by the sick and wounded of the Anglo-French army, in 1854-5, whose sufferings were much alleviated by the kind exertions of Miss Florence Nightingale and a band of nurses under her, aided by a large fund of money (£15,000*l.*) subscribed by the public and placed in the care of the proprietors of the *Times* newspaper. See *Times*.

SCYTHIA, situate in the most northern parts of Europe and Asia. The boundaries were unknown to the ancients. The Scythians made several irruptions upon the more southern provinces of Asia, especially 624 B.C. when they remained in possession of Asia Minor for twenty-eight years, and at different periods extended their conquests in Europe, penetrating as far as Egypt. They are thought to have at one time held the Crimea. See *Tartary*.

SEA FIGHTS. See *Naval Battles*.

SEAL. See *Great Seal* and *Privy Seal*. Seals were not much in use with the Saxons: but they signed parchments with the cross, impressions of lead being affixed. Sealing of deeds and writs was practised in England, A.D. 1043. There was a seal of king Edward's at Westminster, 1188. Until William I.'s time the name was written, adding the sign of the cross. Arms were then introduced in seals. The most ancient English seal with arms on it is that of Richard I. Arnulphus, earl of Flanders, used one about 940. Wax was first used,

hung at the bottom of the deed, wrapped in cloth, parchment, or tin, about 1213. Sealing-wax for letters was not brought into general use in England until 1556.

SEAS, SOVEREIGNTY OF THE. The claim of England to the British seas is of very ancient date. Arthur is said to have assumed it, and Alfred afterwards supported this right. It was maintained by Selden, and measures were taken by government in consequence, 8 Charles I. 1633. The Dutch after the death of Charles I., made some attempts to obtain it, but were roughly treated by Blake and other admirals. Russia and other powers of the north armed to avoid search, 1780; again 1800. See *Armed Neutrality and Flag*.

SEBASTIAN, ST. (N. Spain), was taken by the French under the duke of Berwick in 1719. It was besieged by the British and allied army under Wellington. After a most heavy bombardment, by which the whole town was laid nearly in ruins, it was stormed by general Graham (afterwards lord Lynedoch), and taken, Aug. 31, 1813. The loss sustained by the besiegers, though not considerable, was chiefly British.—On May 5, 1836, the fortified works, through the centre of which ran the high road to Hernani, were carried by the English auxiliary legion under general Evans, after very hard fighting. The British naval squadron, off St. Sebastian, under lord John Hay, lent very opportune aid to the victors in this contest.—A vigorous assault was made on the lines of general De Lacy Evans, at St. Sebastian, by the Carlists, Oct. 1, 1836. Both parties fought with bravery. The Carlists were repulsed, after suffering severely. The loss of the Anglo-Spanish force was 376 men, and 37 officers killed and wounded. General De Lacy Evans was slightly wounded.

SEBASTOPOL, or SEVASTOPOL, a town and once a naval arsenal, at S. W. point of the Crimea, formerly the little village of Aktiar. The buildings were commenced in 1784, by Catherine II. after the conquest of the country. The town is built in the shape of an amphitheatre on the rise of a large hill flattened on its summit, according to a plan laid down before 1794, which has been since adhered to. The fortifications and harbour were constructed by an English engineer, colonel Upton, and his sons, since 1830. The population in 1834 was 15,000. This place will be memorable hereafter for its eleven months' SIEGE, by the English and French in 1854 and 1855. Immediately after the battle of the Alma, Sept. 20, 1854, the allied army marched to Sebastopol, and took up its position on the plateau between it and Balaklava, and the grand attack and bombardment commenced Oct. 17, 1854, without success.* After many sanguinary encounters by day and night, and repeated bombardments, a grand assault was made on Sept. 8, 1855, upon the Malakhoff tower and the Redans, the most important fortifications to the south of the town. The French succeeded in capturing and retaining the Malakhoff. The attacks of the English on the great Redan and of the French upon the little Redan were successful, but the assailants were compelled to retire after a desperate struggle with great loss of life. The French lost 1646 killed, of whom five were generals, 24 superior, and 116 inferior officers; 4500 wounded, and 1400 missing. The English lost 385 killed (29 being commissioned and 42 non-commissioned officers); 1886 wounded; and 176 missing. In the night the Russians abandoned the southern and principal part of the town and fortifications, after destroying as much as possible, and crossed to the northern forts. They also sank or burnt the remainder of their fleet. The allies found a very great amount of stores when they entered the place. The works were utterly destroyed in April 1856, and the town was restored to the Russians. See *Russo-Turkish War*.

SECRETARIES OF STATE. The earliest authentic record of a secretary of state is in the reign of Henry III. when John Maunsell is described as "*Secretarius Noster*," 1253. *Rymer*. Towards the close of Henry VIII.'s reign, two secretaries were appointed; and upon the union with Scotland, Anne added a third as secretary for Scotch affairs; this appointment was afterwards laid aside; but in the reign of George III. the number was again increased to three, one for the American department. In 1782 this last was abolished by act of parliament; and the secretaries were appointed for home, foreign and colonial affairs. When there were but two secretaries, one held the *portefeuille* of the Northern department, comprising the Low Countries, Germany, Denmark, Sweden, Poland, Russia, &c.; the other, of the Southern department, including France, Switzerland, Italy, Spain, Portugal,

* In consequence of the sufferings and disasters of the army in the winter of 1854-5, the Sebastopol Inquiry Committee was appointed, and the Aberdeen administration resigned, Feb. 1855. The committee sat from March 1 to May 15, lord Aberdeen being the last person examined. Its report was presented June 18. Mr. Roebuck, the chairman, moved on July 17 that the house should pass a vote of severe reprobation on every member of the Aberdeen administration. On July 19 his motion was lost by a majority of 107 against it. In 1855 the government sent sir John McNeill and col. Tulloch to inquire into the state of the armies in the Crimea. Their report was presented to parliament in Feb. 1856. A commission was appointed to consider the statements in the report (which were very unfavourable to many officers), but the substance of the report was unshaken.

and Turkey; the affairs of Ireland belonging to the elder secretary; both secretaries then equally directed the home affairs. *Beatson*. There are now five secretaries—home, foreign, colonial, war, and India (appointed in 1858), all in the cabinet.

SECTS, RELIGIOUS. See under *Worship*, and their respective titles.

SEDAN CHAIRS, so called from Sedan, on the Meuse, in France. The first seen in England was in 1581. One was used in the reign of James I, by the duke of Buckingham, to the great indignation of the people, who exclaimed that he was employing his fellow creatures to do the service of beasts. Sedan chairs came into fashion in London in 1634, when sir Francis Duncomb obtained the sole privilege to use, let, and hire a number of such covered chairs for fourteen years. They came into very general use in 1649.

SEDMOOR (Somersetshire), where the duke of Monmouth (the natural son of Charles II. by Lucy Walters) who had risen in rebellion on the accession of James II., was completely defeated by the royal army, July 6, 1685. The duke was made a prisoner, in the disguise of a peasant, at the bottom of a ditch, overcome with hunger, fatigue, and anxiety. He was beheaded on July 15, following.

SEDITION. Sedition acts were passed in the reign of George III. The proclamation against seditious writings was published May, 1792. The celebrated Sedition bill passed Dec. 1795. Seditious societies were suppressed by act, June 1797. The seditious meetings and assemblies' bill passed March 31, 1817. In Ireland, during the Roman Catholic and Repeal agitation, acts or proclamations against sedition and seditious meetings were published from time to time until 1848.

SEICENTO. See *Italy*, p. 372, note.

SEIDLICE (Poland), where a battle was fought April 10, 1831, between the Poles and Russians. The Poles obtained the victory after a bloody conflict, taking 4000 prisoners and several pieces of cannon. The killed and wounded on both sides amounted to many thousands. This success was soon followed by fatal reverses.

SEISMOMETRY, from *seismos*, Greek for earthquake, an apparatus for measuring the violence of the shocks. One is described by Mr. Robert Mallet in his work on earthquakes, published in 1858.

SELENIUM, a rare greyish-white metal discovered in the stone riolite by Berzelius, in 1817.

SELEUCIA, a part of Syria, was made the capital of the Syrian monarchy by its builder, Seleucus Nicator, 312 B.C. On the fall of the Seleucidae, it became a republic, 65 B.C. It was taken by Trajan, A.D. 116; was several times given up and retaken; was subjugated by the Saracens, and united with Ctesiphon, 636.

SELEUCIDES, ERA OF THE. It dates from the reign of Seleucus Nicator, 311 years and four months B.C. It was used in Syria for many years and frequently by the Jews until the fifteenth century, and by some Arabians. Opinions are very much at variance as to the precise commencement of this era. To reduce it to our era (supposing it to begin Sept. 1, 312 B.C.) subtract 311 years and four months.

SELF-DENYING ORDINANCE, which ordained that no member of parliament should in future hold any office or command, civil or military, granted or conferred by either or both of the houses or by any authority derived from them, was passed April 3, 1645, by the influence of Cromwell, who thus removed the earl of Essex, and other Presbyterians, out of the way of his obtaining the supremacy. A somewhat similar ordinance was adopted by the parliament at Melbourne in Australia, in 1858.

SELLASIA, Laconia. Here the Spartans under Cleomenes were defeated by Antigonus Doson and the Achæans, 222 B.C.

SEMINCAS, Castile, Spain. Here, in 938, the Moors were totally defeated by Ramirez II. king of Leon and Asturias. It is said that more than 80,000 of the infidels were slain.

SEMPACH (Switzerland). Here was fought a battle between the Swiss and Leopold, duke of Austria, July 9, 1386. The Swiss, after prodigies of valour, gained a great victory; the duke was slain. They thereby established the liberty of their country; and the day is still annually commemorated at Sempach.

SEMPER EADEM ("Always the same"), one of the mottoes of queen Elizabeth, was adopted by queen Anne as the motto for the royal arms of England, Dec. 13, 1702. It was suspected by many of the politicians of the day that this motto was meant to denote her Jacobitism. It ceased to be used after her reign.

SENESCHAL, a high officer of the royal household, held by military commanders under the kings of France, particularly of the second and third races. In the reign of Philip I. 1059, the office was esteemed the highest place of trust.

SENONES, a Celtic tribe, invaded lower Italy, and were defeated by Camillus, 367 B.C. They defeated Metellus the consul at Arretium, 284, but were almost exterminated by Dolabella, 283.

SEPOYS (a corruption of *Sipáhi*, Hindostanee for a soldier), the term applied to the native troops in India. Under able generals they greatly aided in establishing British rule in India. For their mutinies, see *Madras*, 1807, and *India*, 1857.

SEPTEMBER, the seventh Roman month reckoned from March (from *septimus*, seventh). It became the ninth month when January and February were added to the year by Numa, 713 B.C. The Roman senate would have given this month the name of Tiberius, but the emperor opposed it; the emperor Domitian gave it his own name, Germanicus; the senate under Antoninus Pius gave it that of Antoninus; Commodus gave it his surname, Hercules; and the emperor Tacitus his own name, Tacitus.

SEPTEMBRIZERS. In the French revolution a dreadful massacre took place in Paris, Sept. 2-5, 1792. The prisons were broken open, and the prisoners butchered; among them an ex-bishop, and nearly 100 non-juring priests. Some accounts state the number of persons slain at 1200, others at 4000. The agents in this slaughter were named Septembrizers.

SEPTENNIAL PARLIAMENTS. Edward I. held but one parliament every two years. In the 4th Edward III. it was enacted, "that a parliament should be holden every year once." This continued to be the statute-law till 16 Charles II., when an act was passed for holding parliaments once in three years at least; but parliaments for a longer period than a year were held after Henry VIII. ascended the throne. The Triennial act was confirmed soon after the revolution of 1688 by 6 Will. and Mary, c. 2. Triennial parliaments thence continued till the second year of George I.'s reign, May 1716, when, in consequence of the allegation that "a popish faction were designing to renew the rebellion in this kingdom, and the report of an invasion from abroad, it was enacted that the then parliament should continue for seven years." This *Septennial act* has ever since been in force. See *Parliaments*. Several unsuccessful motions have been made for its repeal.

SEPTUAGESIMA SUNDAY. See *Quadragesima Sunday*, and *Week*.

SEPTUAGINT VERSION OF THE BIBLE, made from Hebrew into Greek, 277 B.C. Seventy-two translators were shut up in thirty-six cells; each pair translated the whole; and on subsequent comparison the thirty-six copies did not vary by a word or letter. *Justin Martyr*. St. Jerome affirms that they translated only the Pentateuch; but St. Justin and others say they translated the whole. Ptolemy Philadelphus gave the Jews about a million sterling for a copy of the Testament, and seventy translators half a million more for the translation. *Josephus*. Finished in seventy-two days. *Hewlett*. The above statements are merely *traditional*. See *Bible*.

SERFDOM. See *Slavery*, and *Russia*, 1861.

SERINGAPATAM (S. India). See *Mysore*. The battle of Seringapatam, called also the battle of Arikera, in which the British defeated Tippoo Saib, was fought May 15, 1791. The redoubts were stormed, and Tippoo was reduced by lord Cornwallis, Feb. 6, 1792. After this capture, preliminaries of peace were signed, and Tippoo agreed to cede one half of Mysore, and to pay 33,000,000 of rupees (about 3,300,000*l.* sterling) to England, and to give up to lord Cornwallis his two eldest sons as hostages.—In a new war the Madras army, under gen. Harris, arrived before Seringapatam, April 5, 1799; it was joined by the Bombay army, April 14; and the place was stormed and carried by major-general Baird, May 4, same year. In this engagement Tippoo was killed.

SERJEANTS-AT-LAW. These are pleaders from among whom the judges are ordinarily chosen, and who by way of eminence are called serjeants of the coif. The judges, when speaking to them, call them brothers. The serjeant's coif was originally a skull cap, worn by knights under their helmets. The coif was introduced before 1259, and was used to hide the tonsure of such renegade clergymen as chose to remain advocates in the secular courts, notwithstanding their prohibition by canon. *Blackstone*.

SERVANTS. An act laying a duty on male servants was passed in 1775. This tax was augmented in 1781 *et seq.* A tax on female servants was imposed in 1785; but this latter act was repealed in 1792. The tax on servants yielded in 1830 about 250,000*l.* per annum; in 1840 the revenue from it had fallen to 201,482*l.*; in 1850 it produced about the same sum.

SERVIA, a hereditary principality nominally subject to Turkey, south of Hungary. The Servians are of Slavonic origin. They embraced Christianity about A.D. 640. The emperor Manuel subjected them in 1150; but they recovered their independence in 1180, and were ruled by princes, generally named Stephen, till their country was finally subdued by the sultan Mahomet II. in 1459. Population in 1854, 985,000.

The Servians rebel but are thoroughly quelled,	Alexander becoming unpopular, is compelled to abdicate, and Alexander Milosch is elected prince
Assist Austria by free companies	Dec. 23, 1858
Again rebel, and capture Belgrade	Plot against Milosch frustrated, July 11; the Servian assembly meets
Kara George, aided by the Russians, establishes a government	July 13, 1860
The Turks break a treaty and Kara George flees	Milosch dies; succeeded by his son Michael Obrenovitch III.
They appoint Milosch as governor; who rebels, March, 1815	Sept. 26, —
Kara George returning, is executed	Rising movement to render Servia independent of Turkey
Milosch recognised as hereditary prince by the sultan	March, 1861
Milosch becoming despotic is compelled to abdicate	Disputes between the Servians and the Turkish garrison at Belgrade, which leads to bloodshed; June 15 the city bombarded; submits, June 17; the Turkish Pasha dismissed, June 19, 1862
His son Michael also retires; Alexander, son of Kara George, chosen prince	A conference of the representatives of the great powers at Constantinople, Aug.; the Porte agrees to liberal concessions to the Servians, which their prince accepts
	Oct. 7, —

SESSION COURTS. The sessions in England were appointed to be held quarterly, 2 Hen. V. 1413. The times for holding these courts were regulated by statute 1 Will. IV. 1831. See *Quarter Sessions* and *Court of Session*. The kirk-session in Scotland consists of the minister and elders of each parish. They superintend the affairs of their own community in religious concerns, determine on matters of lesser scandal, dispense the money collected for the poor, and manage what relates to public worship.

SETTLEMENT, ACT OF, for securing the succession to the British throne, to the exclusion of Roman Catholics, was passed in 1689. This name is also given to the statutes by which the crown is limited to the present royal family, 1701. The Irish act of settlement, passed in 1662, was repealed in 1689. See *Hanover*.

SEVEN CHURCHES OF ASIA, to the angels (ministers) of which the Apostle John was commanded to write the epistles contained in the 2nd and 3rd chapters of his Revelation, viz., Ephesus, Smyrna, Pergamos, Thyatira, Sardis, Philadelphia, and Laodicea, A.D. 96.

1. *Ephesus* (*which see*). Paul founded the church here A.D. 57. In A.D. 59 he was in great danger from a tumult created by Demetrius: to the elders of this church he delivered his warning address, A.D. 60 (Acts xix. xx.). Ephesus was in a ruinous state even in the time of Justinian (A.D. 527), and still remains so.
2. *Smyrna*. Now an important commercial city and seaport of Ionia. Polycarp, its first bishop, suffered martyrdom, A.D. 175.
3. *Pergamos*. Capital of the kingdom of the same name, founded by Philetærus, 283 B.C., and part of Bithynia. It was renowned for its library. Attalus III. the last king, bequeathed his kingdom to the Roman people, 133 B.C. It is still an important place, called Bergamo. Parchment is said to have been invented here.
4. *Thyatira*. Now a mean town of 2000 houses, called Ak-hissar, "White Castle."
5. *Sardis*. Formerly the capital of Lydia, the kingdom of Croesus (560 B.C.), is now a miserable village, named Sart.
6. *Philadelphia*. Was built by Attalus Philadelphus, king of Pergamos (about 159-138 B.C.); was taken by Bajazet I. A.D. 1390. It is now called Allah Shehr, "The city of God," and is a miserable town of 3000 houses.
7. *Laodicea*. In Phrygia, near Lydia, has suffered much from earthquakes. It is now a deserted place called Eske-hissar, "The old castle."

SEVEN YEARS' WAR, a name given to the conflict maintained by Frederic II. of Prussia against Austria, Russia, and France from 1756 to 1763. He gained and lost several sanguinary battles, and enlarged his dominions. See *Battles*.

SEVENTH-DAY BAPTIST. See article *Sabbatarians, &c.*

SEVERUS'S WALL. See *Roman Walls*.

SEVILLE (S.W. Spain), was the capital until Philip II. finally established his court at Madrid, A.D. 1563. This city is the *Hispalis* of the Phœnicians, and the *Julia* of the Romans. It opened its gates to the Saracens in A.D. 712, soon after their invasion of the kingdom, and continued in their hands upwards of five centuries. It was taken from them by the Christians in 1247, after one of the most obstinate sieges in Spanish history. The peace of Seville between England, France, and Spain, and also a defensive alliance to which Holland acceded, signed Nov. 9, 1729. In the late peninsular war, Seville surrendered to the French, Feb. 1, 1810; and was taken by assault by the British and Spaniards, after the battle of Salamanca, Aug. 27, 1812: the French left it at the general evacuation of the south of Spain in consequence of their signal defeat in that battle.

SEVRES. See *Porcelain*.

SEWERS. See *Metropolitan Board*. The main drainage (the plan of Mr. J. W. Bazalgette) now in progress (1862) consists of the Northern High-level, Middle-level, and Low-level, and Southern High-level and Low-level. It is asserted that the disinfection and useful agricultural employment of sewage has been successful at Exeter and Carlisle. See *Carbolic Acid*.

SEWING-MACHINE. The first practical sewing-machine was the invention of Elias Howe, an American mechanic. It is now known under an improved form as Thomas's shuttle machine, by whom it was introduced into England in 1846. Two threads are wrought into the fabric to be sewn, by a needle and shuttle, which interlace the threads and form a strong seam. In some machines now in extensive use, two needles are employed to make with two threads a double chain stitch, and a more-simple machine makes by the aid of one needle and a hook, the common single chain stitch with one thread. These machines are all of American origin.

SEXAGESIMA SUNDAY. See *Quadragesima Sunday and Week*.

SEXTANT. This instrument is used in the manner of a quadrant, and contains sixty degrees, or the sixth part of a circle. It is for taking the altitude of the planets, &c. Invented by the celebrated Tycho Brahe, at Augsburg, in 1550. *Vine's Astron.* The Arabian astronomers under the caliphs are said to have had a sextant of fifty-nine feet nine inches radius, about A.D. 995. *Ashe*.

SHAKESPEARE'S PLAYS. William Shakspeare was born at Stratford-upon-Avon, Warwickshire, April 23, 1564, and died on his birthday, 1616. The first collected edition of his works is dated 1623 [a facsimile of a part of this edition was published in 1862]; the second, 1632; * the third 1664; the fourth, 1685; all in folio. A fine critical edition of the text, edited by Alexander Dyce, was published in 1857. *Boydell's* edition, with numerous plates, was published in nine vols. folio, in 1802. *Ayscough's Index* to Shakspeare was published in 1790; *Twiss's Index*, in 1805; *Mrs. Cowden Clarke's* invaluable Concordance, 1847. See *Ireland's Forgeries*.

SHAKESPEARE'S GLOBE THEATRE, London, was situated near the spot still called Bankside, at the commencement of the seventeenth century. Shakspeare was himself part-proprietor; here some of his plays were first produced, and he himself performed in them. It was of a horse-shoe form, partly covered with thatch. After it was licensed, the thatch took fire, through the negligent discharge of a piece of ordnance, and the whole building was consumed. The house was crowded to excess, to witness the play of *Henry VIII.*, but the audience escaped unhurt. This was the end of Shakspeare's connection with this theatre: it was rebuilt the following year, much in the same style, about A.D. 1603.

SHAKESPEARE'S JUBILEE. That projected by David Garrick was celebrated at Stratford-on-Avon, Sept. 6-8, 1769; a similar festival was kept April 23, 1836.

SHAKESPEARE'S NATIVE PLACE. In 1847, a number of

persons of distinction interested themselves for the preservation of the house in which Shakspeare was born, then actually set up for sale: they held a meeting at the Thatched-House Tavern, London, Aug. 26, in that year, and took measures for promoting a subscription set on foot by the Shakspearian Club at Stratford-upon-Avon; and a committee was appointed to carry out their object. In the end Shakspeare's house was sold at the Auction Mart in the city of London, where it was "knocked down" to the United Committee of London and Stratford for the large sum of 3000*l.* Sept. 26, 1847. In 1856, a learned oriental scholar, John Shakspeare, no relation of the poet, gave 2500*l.* to purchase the adjoining house, that it might be pulled down, in order to ensure the poet's house from the risk of fire.

SHAKESPEARE'S GARDEN was bought by subscription got up by Mr. J. O. Halliwell, in Oct. and Nov. 1864.

SHAMROCK. It is said that the shamrock used by the Irish was introduced by Patrick M'Alpine, since called St. Patrick, as a simile of the Trinity, A.D. 432. When he could not make them understand him by his words, he showed the Irish a stem of clover or trefoil, thereby exhibiting an ocular demonstration of the possibility of three uniting into one, and one into three.

SHARPSBURG (Maryland). In Sept. after the severe battle at Bull Run on Aug. 30, 1862, gen. McClellan marched in pursuit of the confederate army under gen. Lee which had invaded Maryland, and came up with it on the 13th. The latter was compelled to retire after an action on the 14th; on the 16th he was joined by Stonewall Jackson; and on the 17th a desperate and sanguinary contest took place near Antietam creek and the Sharpsburg road. The confederates, said doubtfully to have been defeated, retired in good order, and crossed the Potomac on the 20th. The loss was very heavy on both sides.

* In 1849, Mr. J. P. Collier, editor of an edition of Shakspeare, purchased a copy of the second folio, on which was written in pencil, a number of corrections, supposed to have been made soon after the time of publication. At first he thought little of these marks; but in 1853 he was induced to publish "Notes and Emendations" derived from this volume. Much controversy ensued as to the authenticity of these corrections; and in 1859 it was generally agreed that they were of modern date, and consequently became comparatively speaking valueless.

SHAWLS are of Indian origin. The manufacture was introduced into this country by Barrow and Watson, in 1784, at Norwich. It began at Paisley and Edinburgh about 1805. *Ure*.

SHEEP were exported from England to Spain, and, the breed being thereby improved, produced the fine Spanish wool, which proved detrimental to our woollen manufacture, 8 Edw. IV. 1467. *Anderson*. Their exportation was prohibited on pain of fine and imprisonment, 1522. The number of sheep in the United Kingdom has been variously stated—by some at 43,000,000, by others at 49,000,000, and by more at 60,000,000, in 1840. The number must have progressively increased to the present time, particularly as the unrestricted importation since 1846 vastly swells the amount. In 1851 there were imported into England 201,859 sheep and lambs; in 1858, 184,482. In Aug. and Sept. 1862, many sheep in Wiltshire died of small-pox; and on Sept. 11, government declared its intention of enforcing the act for the prevention of contagion. The evil soon abated.

SHEEPSHANKS' DONATIONS. On Feb. 2, 1857, Mr. John Sheepshanks, by a deed of gift, presented to the nation his valuable collection of paintings and drawings, valued at 60,000*l*. In accordance with the donor's directions, the pictures were placed at the South Kensington Museum. The collection is rich in the works of Mulready, Landseer, and Leslie.—On Dec. 2, 1858, the trustees of the late Rev. Richard Sheepshanks presented 10,000*l*. to Trinity College, Cambridge, for the promotion of the study of astronomy, meteorology, and magnetism.

SHEERNESS (N. Kent), a royal dockyard, planned and fortified by Charles II. in 1667, was taken by the Dutch, under admiral De Ruyter, June 11, same year. The dock has been greatly improved since 1815.

SHEFFIELD, on the river *Sheaf*, West Riding, Yorkshire; renowned for cutlery, plated goods, &c. Sheffield thwytles are mentioned by Chaucer in the time of Edward III. Sheffield in the time of the Conqueror was obtained by Roger de Buishi; and has since been held by the Lovetots, Nevils, Talbots, and Howards.

St. Peter's church built temp. Henry I.	Plate assay office established	1773
Hospital and almshouses erected by the earl of Malmesbury	Made a borough by the Reform act	1832
Cutlery company incorporated	Wesley college opened	1838
The castle (built in the 13th century) was taken and demolished by the parliamentarians	Sheffield and Manchester railway opened	1845
Cutlery's hall built	Athenaeum and Mechanics' Institution opened	1849
	John A. Roebuck (grandson of Dr. Roebuck of Sheffield), M.P. for Sheffield	May, 1849-62

SHELBURNE ADMINISTRATION, formed at the death of the marquis of Rockingham, July, 1782; terminated April, 1783; and was succeeded by the "Coalition" administration.

The earl of Shelburne (afterwards marquess of Lansdowne), <i>first lord of the treasury</i> .	Thomas, lord Grantham, and Thomas Townshend (afterwards lord Sydney), <i>secretaries</i> .
William Pitt, <i>chancellor of the exchequer</i> .	Viscount Keppel, <i>admiralty</i> .
Lord (afterwards earl) Camden, <i>president of the council</i> .	Duke of Richmond, <i>ordnance</i> .
Duke of Grafton, <i>privy seal</i> .	Lord Thurlow, <i>lord chancellor</i> .
	Henry Dundas, Isaac Barré, sir George Yonge, &c.

SHELLS. See *Bombs*.

SHERIFF. The office of sheriff is from *shire-reeve*, governor of a shire or county. London had its sheriffs prior to William I.'s reign; but some say that sheriffs were first nominated for every county in England by William in 1079. According to other historians, Henry Cornhill and Richard Reynere were the first sheriffs of London, 1. Rich. I. 1189. The nomination of sheriffs according to the present mode took place in 1461. *Stow*.—Anciently sheriffs were hereditary in Scotland, and in some English counties, as Westmoreland. The sheriffs of Dublin (first called bailiffs) were appointed in 1308; and obtained the name of sheriff by an incorporation of Edward VI. 1548. Thirty-five sheriffs were fined, and eleven excused in one year, rather than serve the office for London, 1734. See *Bailiffs*.

SHERIFFMUIR. See *Dumblane*.

SHETLAND ISLES (Scotland), were taken by Magnus III. of Norway; but annexed to Scotland, 1469.

SHIBBOLETH. The word by which the followers of Jephthah tested their opponents the Ephraimites, on passing the Jordan, about 1143 B.C. *Judges* xii. The term is now applied to any party watchword or dogma.

SHITES, a Mahometan sect, predominant in Persia. See *Mahometanism*.

SHILLING. The value of the ancient Saxon coin of this name was five pence, but it was reduced to fourpence about a century before the conquest. After the conquest the French *solidus* of twelve pence, in use among the Normans, was called *shilling*. The true English shilling was first coined, but in small quantity, 18 Hen. VII. 1503. *Dr. Kelly*. In 1505. *Bishop Fleetwood*. A peculiar shilling, value nine pence, but to be current at twelve, was struck in Ireland, 1560; and a large but very base coinage in England for the service of Ireland, 1598. Milled shillings were coined 13 Chas. II. 1662. See *Coins*.

SHIP-BUILDING. The art is attributed to the Egyptians, as the first inventors; the first ship (probably a galley) being brought from Egypt to Greece, by Danaus, 1485 B.C. *Blair*. The first double-decked ship was built by the Tyrians, 786 B.C. *Lenglet*. The first double-decked one built in England was of 1000 tons burthen, by order of Henry VIII. 1509; it was called the *Great Harry*, and cost 14,000*l*. *Stow*. Before this time, 24-gun ships were the largest in our navy, and these had no port-holes, the guns being on the upper decks only. Port-holes and other improvements were invented by Descharges, a French builder at Brest, in the reign of Louis XII., about 1500. Ship-building was first treated as a science by Hoste, 1696. A 74-gun ship was put upon the stocks at Van Diemen's Land, to be sheathed with India-rubber, 1829. Iron is now greatly used in ship-building. See *Navy* and *Steam Vessels*.

SHIP-MONEY was first levied about A.D. 1007, to form a navy, and caused great commotions. This impost being illegally levied by Charles I. in 1634, led to the revolution. He assessed London in seven ships, of 4000 tons, and 1560 men; Yorkshire in two ships, of 600 tons, or 12,000*l*.; Bristol in one ship, of 100 tons; Lancashire in one ship, of 400 tons. John Hampden refused to pay the tax, and was tried in the Exchequer in 1636. Ship-money was included in a redress of grievances in 1641. The five judges, who had given an opinion in its favour, were imprisoned. Hampden received a wound in a skirmish with prince Rupert, and died June 24, 1643.

SHIPPING, BRITISH. Shipping was first registered in the river Thames in 1786; and throughout the empire in 1787. In the middle of the eighteenth century, the shipping of England was but half a million of tons—less than London now. In 1830, the number of ships in the British empire was 22,785. See *Navy* and *Navigation Acts*.

NUMBER OF VESSELS REGISTERED IN THE BRITISH EMPIRE ON JAN. 1, 1840.

Country.	Vessels.	Tonnage.	Seamen.
England	15,830	1,983,522	114,593
Scotland	3,318	378,194	25,999
Ireland	1,889	160,289	11,283
Guernsey, Jersey, and Man	633	39,630	4,473
British Plantations	6,075	497,798	35,020
Total	27,745	3,068,433	181,283

The following are the numbers of the Registered Sailing and Steam Vessels (exclusive of River Steamers) of the United Kingdom, engaged in the home and foreign trade:—

	1849.			1856.			1861.	
	Vessels.	Tonnage.	Men employed.	Vessels.	Tonnage.	Men employed.	Vessels.*	Tonnage.
Sailing	17,807	2,988,021	144,165	18,419	3,825,022	151,080	19,288	3,918,511
Steamers	414	108,321	8,446	851	331,055	22,838	997	441,184
Total	18,221	3,096,342	152,611	19,270	4,156,077	173,918	20,285	4,359,695

* Men employed—sailing vessels, 144,949; steamers, 27,008; total, 171,957.

SHIPWRECKS. See *Wrecks*.

SHIRES. See *Counties*.

SHIRTS are said to have been first generally worn in the west of Europe early in the eighth century. *Du Fresnoy*. Woollen shirts were commonly worn in England until about 1253, when linen, but of a coarse kind (fine coming at this period from abroad), was first manufactured in England by Flemish artisans. *Stow*.

SHOEBURYNESSE (Essex). Some ground here, purchased in 1842 and 1855, and by an act of parliament in 1862 was set apart as "ranges for the use and practice of artillery." See *Canon*, note. Experiments with Mr. Whitworth's projectiles on Nov. 12, 1862, showed their great improvement in form and material. Shells were sent through 5½ inch plate and the wood-work behind it. It was objected, that they might not do this with ships in motion.

SHOES, among the Jews were made of leather, linen, rush, or wood. Moons were worn as ornaments in their shoes by the Jewish women. *Isaiah* iii. 18. Among the Greeks shoes were of various kinds. Pythagoras would have his disciples wear shoes made of the bark of trees; probably, that they might not wear what were made of the skins of animals, as they refrained from the use of everything that had life. Sandals (at first merely soles, afterwards highly ornamented) were worn by women of distinction. The Romans wore an ivory crescent on their shoes; and Caligula wore his enriched with precious stones. The Indians, like the Egyptians, wore shoes made of the bark of the papyrus. In England, about 1462, the people wore the beaks or points of their shoes so long, that they encumbered themselves in walking, and were forced to tie them up to their knees; the fine gentlemen fastened theirs with chains of silver or silver gilt, and others with laces. This was prohibited, on the forfeiture of 20s. and on pain of being cursed by the clergy, 7 Edw. IV. 1467. See *Dress*. Shoes, as at present worn, were introduced about 1633. The buckle was not used till 1668. *Stow*; *Mortimer*. The buckle-makers petitioned against the use of *shoe-strings* in 1791.

SHOEBLACK BRIGADES (Blue, Red, and Yellow) were established at various times by the Ragged School Union (*which see*), founded 1844. In 1855, 108 boys had cleaned 544,800 pairs of boots and shoes, and thus earned 2270*l.*; of which 1235*l.* had been paid to the boys, 527*l.* to their bank, and 516*l.* to the society. The brigades earned 4548*l.* in 1859.

SHOP-TAX. The act by which a tax was levied upon retail shops was passed in 1785; but it caused so great a commotion, particularly in London, that it was deemed expedient to repeal it in 1789. The statute whereby shoplifting was made a felony, without benefit of clergy, was passed 10 & 11 Will. III. 1699. This statute has been some time repealed.

SHORE, JANE, the mistress of Edward IV. and afterwards of lord Hastings. She did public penance in 1483, and was afterwards confined in Ludgate; but upon the petition of Thomas Hymore, who agreed to marry her, king Richard III., in 1484, restored her to liberty; and sir Thomas Moore mentions having seen her, which contradicts the story of her having perished by hunger. *Harleian MSS.*

SHORT-HAND. See *Stenography*.

"SHORT-LIVED" ADMINISTRATION—that of William Pulteney, earl of Bath, lord Carlisle, lord Winchelsea, and lord Granville, existed from Feb. 10 to Feb. 12, 1746.

SHOT. In early times various missiles were shot from cannon. Bolts are mentioned in 1413; and in 1418 Henry V. ordered his clerk of the ordnance to get 7000 stones made at the quarries at Maidstone. Since then, chain, grape, and canister shot have been invented, as well as shells; all which are described in Scofield's work on "Projectile Weapons of War, and Explosive Compounds," 1858. See *Bombs* and *Cannon*.

SHREWSBURY ADMINISTRATION. Charles duke of Shrewsbury was made lord treasurer, July 30, 1714, two days before the death of queen Anne; his patent was revoked soon after the accession of George I., Oct. 13 following, when the earl of Halifax became first lord of the treasury. See *Halifax*. The office of lord treasurer has been executed by commissioners ever since.

SHREWSBURY (Shropshire), arose on the ruin of the Roman town Uriconium (see *Wroxeter*), and became one of the chief cities of the kingdom, having a mint till the reign of Henry III. Here Richard II. held a parliament in 1397. On July 21 or 23, 1403, was fought the sanguinary battle of Shrewsbury between the army of Henry IV. and that of the nobles, led by Percy (surnamed Hotspur), son of the earl of Northumberland, who had conspired to dethrone Henry. Henry was seen in the thickest of the fight, with his son, afterwards Henry V. The death of Hotspur by an unknown hand gave the victory to the king. *Hume*. Shrewsbury grammar school was founded by Edward VI. in 1553, and endowed by Elizabeth.

SHROPSHIRE, BATTLE OF, in which the Britons were completely subjugated, and Caractacus, the renowned king of the Silures, became, through the treachery of the queen of the Brigantes, a prisoner to the Romans, A.D. 50.*

SHROVE TUESDAY, the day before Ash-Wednesday, the first day of the Lent Fast. See *Carnival*.†

* It is asserted that while Caractacus was being led through Rome, his eyes were dazzled by the splendours that surrounded him. "Alas!" he cried, "how is it possible that a people possessed of such magnificence at home, could envy me an humble cottage in Britain?" The emperor was affected with the British hero's misfortunes, and won by his address. He ordered him to be unchained upon the spot, and set at liberty with the rest of the captives.

† After the people had made confession, according to the discipline of the ancient Church, they were permitted to indulge in festive amusements, although not allowed to partake of any repast beyond the usual substitutes for flesh; and hence arose the custom yet preserved of eating pancakes and fritters at

SIAM,* a kingdom in India, bordering on the Burmese empire. Siam was re-discovered by the Portuguese in 1511, and a trade established, in which the Dutch joined about 1604. A British ship arrived about 1613. In 1683, a Cephalonian Greek, Constantine Phaulcon, became foreign minister of Siam, and opened a communication with France; Louis XIV. sent an embassy in 1685 with a view of converting the king, without effect. After several ineffectual attempts, sir John Bowring succeeded in obtaining a treaty of friendship and commerce between England and Siam, which was signed April 30, 1855, and ratified April 5, 1856; and one with France in August following. Two ambassadors from Siam arrived in Oct. 1857, and had an audience with the queen; they brought with them magnificent presents, which they delivered crawling, on Nov. 16. They were at Paris in June 1861.

SIBERIA (N. Asia). In 1580 the conquest was begun by the Cossacks under Jermak Timofejew. In 1710 Peter the Great began to send prisoners thither.

SIBYLS. The Sibyllæ were women believed to be inspired by heaven, who flourished in different parts of the world. Their number is unknown. Plato speaks of one, others of two, Pliny of three, Ælian of four, and Varro of ten. An Erythrean sibyl is said to have offered to Tarquin II. nine books containing the Roman destinies, demanding for them 300 pieces of gold. He denied her; whereupon the sibyl threw three of them into the fire, and asked the same price for the other six, which being still denied, she burned three more, and again demanded the same sum for those that remained; when Tarquin conferring with the pontiffs, was advised to buy them. Two magistrates were created to consult them on all occasions, 531 B. C.

SICILIAN VESPERS, the term given to the massacre of the French in Sicily, commenced at Palermo, March 30, 1282. The French had become hateful to the Sicilians, and a conspiracy against Charles of Anjou was already ripe, when the following occurrence led to its development and accomplishment. On Easter Monday, the chief conspirators had assembled at Palermo; and while the French were engaged in festivities, a Sicilian bride happened to pass by with her train. She was observed by one Drochet, a Frenchman, who, advancing towards her, began to use her rudely, under pretence of searching for arms. A young Sicilian, exasperated at this affront, stabbed him with his own sword; and a tumult ensuing, 200 French were instantly murdered. The enraged populace now ran through the city, crying out, "Let the French die!" and, without distinction of rank, age, or sex, they slaughtered all of that nation they could find, to the number of 8000. Even the churches proved no sanctuary; and the massacre became general throughout the island.

SICILY (*Trinacria*, three-cornered). The ancient inhabitants of this island were the Sicani, a people of Spain, and Etruscans, who came hither from Italy about 1294 B. C. A second colony, under Siculus, arrived 80 years before the destruction of Troy, 1284 B. C. The Phenicians and Greeks settled some colonies here (735-582), and at last the Carthaginians were masters of nearly the whole island (404 B. C.); they were dispossessed of it by the Romans in the Punic wars. Some authors suppose that Sicily was originally joined to the continent, that it was separated from Italy by an earthquake, and that the straits of the (harybdis were thus formed. Its government has frequently been united with and separated from that of Naples (*which see*); the two now form part of the kingdom of Italy. Population of Sicily in 1856, 2,231,020.

Shrovetide, the Greek Christians eating eggs, milk, &c., during the first week of Lent. On Shrove Tuesday the people in every parish throughout England formerly confessed their sins; and the parish bell for the purpose was rung at ten o'clock. In several ancient parishes the custom yet prevails of ringing the bell, and obtains in London the name of pancake-bell.

* **SIAMSE TWINS**. Two persons born about 1811, enjoying all the faculties and powers usually possessed by separate and distinct individuals, although united together by a short cartilaginous band at the pit of the stomach. They are named Chang and Eng, and were first discovered on the banks of the Siam river by an American, Mr. Robert Hunter, by whom they were taken to New York, where they were exhibited. Captain Coffin brought them to England. After having been exhibited for several years in Britain, they went to America, where they settled on a farm, and married sisters. In 1860 they were said to be still living.

SICILY, *continued.*

Agrirentum taken by the Romans	B.C. 262	the Two Sicilies re-established; Ferdinand returns to Naples	1815
Palermo besieged by the Romans	254	He abolishes the new constitution	—
Archimedes flourishes	about 236	Revolution at Palermo suppressed	1820
Hiero II. defeated by the Romans, 263; becomes their ally, and reigns till	216	The great towns in Sicily rise and demand the constitution; a provisional government proclaimed	Jan. 12, 1848
The Romans take Syracuse, and make all Sicily a province; Archimedes slain	212	The king nominates his brother, the count of Aquila, viceroy, Jan. 17; promises a new constitution	Jan. 29, —
The Carthaginians lose half their possessions, 241; all the remainder	—	The Sicilian parliament decrees the exclusion of the Bourbon family, April 13; and invites the duke of Genoa to the throne	July 11, —
The Servile wars	135, 134, and 132	Messina bombarded and taken by the Neapolitans	Sept. 7, —
Tyrannical government of Verres (for which he was accused by Cicero)	73-71	Catania taken by assault, April 8; Syracuse surrenders, April 23; and Palermo	May 15, 1849
Sicily held by Sextus Pompeius, son of the great Pompey	42-36	Insurrections suppressed at Palermo, Messina, and Catania, April 4 <i>et seq.</i> ; the rebels retire into the interior	April 21 <i>et seq.</i> 1860
Invaded by the Vandals, A.D. 440; by the Goths, 493; taken for the Greek emperors by Belisarius	A.D. 535	Garibaldi and his followers (2200 men) embark at Genoa, May 5; and land at Marsala, May 11; he abandons his ships; and assumes the dictatorship in the name of the king of Sardinia	May 14, —
Conquered by the Saracens	832	He defeats the royal troops at Calatafimi, May 15; storms Palermo, May 27; which is bombarded by the royal fleet, May 28; an armistice agreed to	May 31, —
The Greeks and Arabs driven out by a Norman prince, Roger I. son of Tancred, 1058; who takes the title of count of Sicily	1061-1090	A provisional government formed at Palermo, June 3; which is evacuated by the Neapolitans	June 6, —
Roger II. son of the above-named, unites Sicily with Naples, and is crowned king of the Two Sicilies	1131	Garibaldi defeats the Neapolitans at Melazzo, July 20, 21, —	—
Charles of Anjou, brother to St. Louis, king of France, conquers Naples and Sicily, deposes the Norman princes, and makes himself king	1266	Convention signed, by which the Neapolitans agree to evacuate Sicily (retaining the citadel of Messina)	July 30, —
The French becoming hated by the Sicilians, a general massacre of the invaders takes place. See <i>Sicilian Vespers</i>	1282	The Sicilian constitution proclaimed	Aug. 3, —
Sicily is seized by a fleet sent by the kings of Aragon; but Naples remains to the house of Anjou	—	Garibaldi embarks for Calabria: see <i>Naples</i> , Aug. 19, —	—
Alphonso, king of Aragon, takes possession of Naples	1435	Professor Saffi (late of Oxford) a short time dictator	Sept. —
The kingdom of Naples and Sicily united to the Spanish monarchy under Ferdinand the Catholic	1501	The Sicilians by universal suffrage vote for annexation to Sardinia (432,054 against 667), Oct. 21, —	—
Victor, duke of Savoy, made king of Sicily, by the treaty of Utrecht	1713	Victor-Emmanuel visits Sicily	Dec. 1, —
Which he gives up to the emperor Charles VI., and becomes king of Sardinia	1720	Citadel of Messina blockaded, Feb. 28; surrenders to general Cialdini	March 13, 1861
Charles, son of the king of Spain, becomes king of the Two Sicilies	1735	King Victor-Emmanuel warmly received at Messina	May, 1862
The throne of Spain, becoming vacant, Charles, who is heir, vacates the throne of the Two Sicilies in favour of his third son Ferdinand, agreeably to treaty	1759	Imprudent speeches of Garibaldi at Marsala, July 19; he enters Catania, and establishes a provisional government, Aug. 19; embarks for Italy	Aug. 24, —
Dreadful earthquake at Messina, in Sicily, which destroys 40,000 persons	1783	Sicily placed under blockade; removed in Sept., tranquil. (See <i>Italy</i> , 1862.)	Oct. —
The French conquer Naples (<i>which see</i>); Ferdinand IV. retires to Sicily	1806		
Political disturbances	1810		
New constitution granted, under British auspices	1812		
The French expelled from Naples; kingdom of			

SICYON, an ancient Grecian kingdom in the Peloponnesus, founded it is said about 2080 B.C. In 252 it became a republic and joined the Achaean league formed by Aratus. It was the country of the sculptors Polycletes (436) and Lysippus (238 B.C.).

SIDON (Syria), a city of Phœnicia, to the north of Tyre. It was conquered by Cyrus about 537; and surrendered to Alexander, 332. See *Phœnicia*. The town was taken from the pacha of Egypt by the troops of the sultan and of his allies, assisted by some ships of the British squadron, under admiral the hon. sir Robert Stopford and Commodore Charles Napier, Sept. 27, 1840. See *Syria* and *Turkey*.

SIEGES, MEMORABLE. Azoth, which was besieged by Psammetichus the Powerful, held out for nineteen years. *Usher*. It held out for twenty-nine years. *Herodotus*. This was the longest siege recorded in the annals of antiquity. The siege of Troy was the most celebrated, and occupied ten years, 1184 B.C. The following are the most memorable sieges since the twelfth century; for details see separate articles.

SIERRA LEONE (West Africa), discovered in 1460. In 1786, London swarmed with free negroes living in idleness and want; and 400 of them, with 60 whites, mostly women of bad character and in ill-health, were sent out to Sierra Leone, at the charge of government to form a settlement, Dec. 9, 1786. The settlement was attacked by the French, Sept. 1794; by the natives, Feb., 1802. Sir Charles Macarthy, the governor of the colony, murdered by the Ashantee chief, Jan. 21, 1824.—16 & 17 Vict. c. 86, relates to the government, &c. of this colony. It is now a bishopric. See *Ashantees*.

SIGN MANUAL, ROYAL. When the sovereign was so ill as to be unable to write, a stamp was employed; in the case of Henry VIII. 1547; James I. 1628; and George IV., May 29, 1830. *Rosse*.

SIGNALS are alluded to by Polybius. Elizabeth had instructions drawn up for the admiral and general of the expedition to Cadiz, to be announced to the fleet in a certain

latitude: this is said to have been the first set of signals given to the commanders of the English fleet. A system for the navy was invented by the duke of York, afterwards James II. 1665. *Guthrie*.

SIKHS, a people of North India, invaded the Mogul's empire, 1703-8. See *Punjab and India*.

SILESIA, formerly a province of Poland, was invaded by John of Bohemia, 1325, and ceded to him, 1355. It was conquered and lost several times during the seven years' war by Frederick of Prussia, but was retained by him at the peace in 1763.

SILICIUM (from *silex*, flint), a metal, next to oxygen, the most abundant substance in the earth, as it enters into the constitution of many earths, metallic oxides, and a great number of minerals. The mode of procuring pure silicium was discovered by Berzelius in 1823. *Gmelin*. See *Water-glass* and *Ransome's Stone*.

SILISTRIA, a strong military town in Bulgaria, European Turkey. It was taken by the Russians, Sept. 26, 1829, after nine months' siege, and held some years by them as a pledge for the payment of a large sum by the Porte; but was eventually returned. In 1854, it was again besieged by the Russians, 30,000 strong, under prince Paskiewitch, and many assaults were made. The Russian general was compelled to return in consequence of a dangerous confusion. On June 2, Mussa Pacha, the brave and skilful commander of the garrison, was killed. On June 9, the Russians stormed two forts, which were retaken. A grand assault took place on June 13, under prince Gortschakoff and general Schilders, which was vigorously repelled. On the 15th, the garrison assumed the offensive, crossed the river, defeated the Russians, and destroyed the siege works. The siege was thus raised, and the Russians commenced their retreat, as Omar Pacha was drawing near. The garrison was ably assisted by two British officers, captain Butler and lieutenant Nasmyth, the former of whom, after being wounded, died of exhaustion. To them, in fact, the successful defence is attributed. They were highly praised by Omar Pacha and lord Hardinge; and lieutenant Nasmyth was made a major.

SILK. Wrought silk was brought from Persia to Greece, 325 B.C. Known at Rome in Tiberius's time, when a law passed in the senate prohibiting the use of plate of massy gold, and also forbidding men to debase themselves by wearing silk, fit only for women. Heliogabalus first wore a garment of silk, A.D. 220. Silk was at first of the same value with gold, weight for weight, and was thought to grow in the same manner as cotton on trees. Silk-worms were brought from India to Europe in the sixth century. Charlemagne sent Offa, king of Mercia, a present of two silken vests, A.D. 780. The manufacture was encouraged by Roger, king of Sicily at Palermo, 1146, when the Sicilians not only bred the silk-worms, but spun and weaved the silk. The manufacture spread into Italy and Spain, and also into the south of France, a little before the reign of Francis I. about 1510; and Henry IV. propagated mulberry-trees and silk-worms throughout the kingdom, about 1600. In England, silk mantles were worn by some noblemen's ladies at a ball at Kenilworth castle, 1286. Silk was worn by the English clergy in 1534. Manufactured in England in 1604; and broad silk wove from raw silk in 1620. Brought to perfection by the French refugees in London at Spitalfields, 1688. A silk throwing-mill was made in England, and fixed up at Derby, by sir Thomas Lombe, merchant of London, modelled from the original mill then in the king of Sardinia's dominions, about 1714. Six new species of silk-worm rearing in France: 1861.*

SILURES, a British tribe, occupying the counties of Monmouth and Hereford, was subdued by the Roman general Ostorius Scapula, A.D. 50. The chief, Caractacus, was taken to Rome.—From this tribe is derived the geological term "Silurian strata," among the lowest of the palæozoic or primary series, from their occurrence in the above mentioned counties. *Murchison's "Siluria."*

SILVER exists in most parts of the world, and is found mixed with other ores in various mines in Great Britain. The silver mines of South America are far the richest. A mine was discovered in the district of La Paz in 1660, which was so rich that the silver of it was often cut out with a chisel. In 1749, one mass of silver weighing 370 lbs. was sent to Spain. From a mine in Norway, a piece of silver was dug, and sent to the Royal Museum at Copenhagen, weighing 560 lbs. and worth 1680*l*. In England silver-plate and vessels were first used by Wilfrid, a Northumbrian bishop, a lofty and ambitious man, A.D. 709. *Tyrrrell*. Silver knives, spoons, and cups, were great luxuries in 1300. See *Mirrors*. In 1855, 561,906 oz. and in 1857, 532,866 oz. were obtained from mines in Britain.

* In 1858, M. Guérin-Mèneville introduced into France a Chinese worm termed the *Cynthia Bombyx*, which feeds on the *Ailanthus glandulosa*, a hardy tree of the oak kind. The *Cynthia* yields a silk-like substance termed *Ailantine*, which promises to become valuable.

SILVER COIN. Silver was first coined by the Lydians, some say at Ægina, in Greece, 783; others, by Pheidon of Argos, 869 B.C. At Rome it was first coined by Fabius Pictor, 269 B.C. Used in Britain 25 B.C. The Saxons coined silver pennies which were 22½ grains weight. In 1302, the penny was yet the largest silver coin in England. See *Skillings*, &c. New silver coinage, 1816. From 1816 to 1840, inclusive, were coined at our mint in London, 11,108,265½ 15s. in silver, being a yearly average of 444,330*l.* The total amount of the seniorage received on this coin was 616,747*l.* 8s. 2*d.* *Parl. Ret.* In the ten first years of Victoria, from 1837 to 1847, the amount of silver coined was 2,440,614*l.* See *Coin of England*.

SIMONIANS, a sect named after the founder, Simon Magus, the first heretic, about A.D. 41. A sect of social reformers called St. Simonians sprang up in France in 1819, and attracted considerable attention; the doctrines were advocated in England, particularly by Dr. Prati, who lectured upon them in London, Jan. 24, 1834. St. Simon died in 1826.

SIMPLON, a mountain road, leading from Switzerland into Italy, constructed by Napoleon in 1801-7. It winds up passes, crosses cataracts, and passes by galleries through solid rock, and has eight principal bridges. The number of workmen employed at one time varied from thirty to forty thousand.

SINGING. See *Music* and *Hymns*.

SINGAPORE. See *Straits Settlements*.

SINKING FUND. First projected by sir Robert Walpole, whose act was passed in 1716. The act establishing the sinking fund of Mr. Pitt was passed in March, 1786. A then estimated surplus of 900,000*l.* in the revenue was augmented by new taxes to make up the sum of one million, which was to be invariably applied to the reduction of the national debt. The fallacy of the scheme was shown by Dr. Hamilton in 1813. In July, 1828, the sinking fund was limited to the actual surplus of revenue.

SINOPE (Sinoub), an ancient sea-port of Asia Minor, formerly capital of the kingdom of Pontus, said to have been the birth-place of Diogenes, the cynic philosopher. On Nov. 30, 1853, a Turkish fleet of 7 frigates, 3 corvettes, and 2 smaller vessels, was attacked by a Russian fleet of 6 sail of the line, 2 sailing vessels, and 3 steamers, under admiral Nachimoff, and totally destroyed, except one vessel, which conveyed the tidings to Constantinople. Four thousand lives were lost by fire or drowning, and Osman Pacha, the Turkish admiral, died at Sebastopol of his wounds. In consequence of this event, the Anglo-French fleet entered the Black sea, Jan. 3, 1854.

SION COLLEGE AND HOSPITAL situated on the site of a nunnery, which, having fallen to decay, was purchased by William Elsyng, a citizen and mercer, and converted into a college and hospital, called from his name Elsyng Spital. In 1340 he changed it to an Austin priory, which was afterwards granted by Henry VIII. to sir John Williams, master of the jewel-office, who, with sir Roland Hayward, inhabited it till its destruction by fire. In 1623, Dr. Thomas White having bequeathed 3000*l.* towards purchasing and building a college and alms-house on the ancient site, his executors erected the present college. It is held by two charters of incorporation, 6 Charles I. 1630 and 16 Charles II. 1664. It contains a valuable library (easily accessible by the public) maintained by a treasury grant.

SIRENE, an instrument for determining the velocity of aerial vibrations corresponding to the different pitches of musical sounds, was invented by Baron Cagniard de la Tour of Paris in 1819.

SIX ARTICLES. See *Articles*.

SIX CLERKS, officers of the court of chancery, who were anciently *clerici* or *clergy*. They were to conform to the laws of celibacy, and forfeit their places if they married; but when the constitution of the court began to alter, a law was made to permit them to marry; statute 24 & 25 Hen. VIII. 1533. The six clerks continued for many ages officers of the chancery court, and held their offices in Chancery-lane, London, where proceedings by bill and answer were transacted and filed, and certain patents issued. *Law Dict.* The Six Clerks were discontinued by 5 & 6 Vict. c. 103, 1841.

SKINS. The raw skins of cattle were usually suspended on stakes and made use of instead of kettles to boil meat, in the north of England, and in Scotland, 1 Edw. III. 1327. *Iceland.* In 1857, 4,489,163 skins of oxen, lambs, kid, &c. dressed and undressed, were imported into Great Britain.

SLAVERY has existed from the earliest ages. The traffic in men came from Chaldaea into Egypt, Arabia, and all over the East. In Greece, in the time of Homer, all prisoners of war

were treated as slaves. The Lacedæmonian youths, trained up in the practice of deceiving and butchering slaves, were from time to time let loose upon them to show their proficiency; and once, for amusement only, murdered, it is said, 3000 in one night.—Alexander, when he razed Thebes, sold the whole people for slaves 335 B.C. See *Helots*. There were 400,000 slaves in Attica, 317 B.C. In Rome slaves were often chained to the gate of a great man's house, to give admittance to the guests invited to the feast. By one of the laws of the XII. Tables, creditors could seize their insolvent debtors, and keep them in their houses, till by their services or labour they had discharged the sum they owed. C. Pollio threw such slaves as gave him the slightest offence into his fish-ponds, to fatten his lampreys, 42 B.C. Cæcilius Isidorus left to his heir 4116 slaves, 12 B.C. The first Janissaries were Christian slaves, 1329.—*Serfdom*, a modified form of slavery, was abolished by Frederic I. of Prussia in 1702; by Christian VII. of Denmark in 1766, by the emperor Joseph II. in his hereditary states in 1781; and by Nicholas I. of Russia, on the imperial domains in 1842: his successor, Alexander II., on March 3, 1861, decreed its total abolition throughout his empire. Slavery is to cease in the Dutch West Indies on July 1, 1863.

SLAVERY IN ENGLAND. Laws respecting the sale of slaves were made by Alfred. The English peasantry were so commonly sold for slaves in Saxon and Norman times, that children were sold in Bristol market like cattle for exportation. Many were sent to Ireland and others to Scotland. Under the Normans the vassals were termed villains (of and pertaining to the *vill*). They were devisable as chattels during feudal times. Severe statutes were passed in the reign of Richard II. 1377 and 1385; the rebellion of Wat Tyler, 1381, arose partly out of the evils of serfdom.* In 1574 queen Elizabeth gave a severe blow to serfdom by ordering her bondsmen in the western counties to be made free at easy rates. *Slouv*. Serfdom was finally extinguished in 1660, when tenures in capite, knight's service, &c. were abolished; and in 1772 it was decided that slavery could not exist in England.†

SLAVERY IN UNITED STATES. Before the war of independence all the states contained slaves. In 1783 the statement in the Massachusetts Bill of Rights, "All men are born free and equal," was declared in the supreme court at Boston to bar slave-holding in that state.

Congress passes unanimously the celebrated ordinance "for the government of the territory to the N.W. of the Ohio," which contained an "unalterable" article, forbidding slavery or involuntary servitude in the said state, July 13, 1787; after 1800 several of the states prayed, without effect, to be relieved from this prohibition.
Louisiana purchased, which is considered by many as fatal to the constitution 1803
The enormous increase in the growth of cotton in the Southern States (see *Cotton*) led to a corresponding increase in the demand for slave labour. The *Missouri Compromise*, drawn up by Henry Clay, by which slavery was permitted in that state, but was prohibited in all that part of it to the north of 36° 30' N. Lat. carried Feb. 1820
Contest between the slave-holders and their opponents at the annexation of Texas; a similar division to that of Missouri obtained, Dec. 25, 1845

Another compromise effected; California admitted as a free state; but the Fugitive Slave act passed (*which see*) 1850
The Missouri Compromise was abrogated by the admission of Nebraska and Kansas as slave-holding states; civil war ensued. See *Kansas*: 1854
Dred Scott's case (see *United States*) 1857
John Brown's attempt to create a slave rebellion in Virginia failed (see *United States*), Nov. 1859
Abraham Lincoln, the anti-slavery candidate, elected president of the United States, Nov. 4, 1860
Secession of South Carolina Dec. —
Slavery abolished in the district of Colombia, April 16, 1862
President Lincoln proclaims the abolition of slavery in the Southern states if they have not returned to the Union on Jan. 1, 1863, Sept. 22, —
See *United States*, 1862.

SLAVES IN THE UNITED STATES OF AMERICA.

In 1790 . 697,897 | In 1810 . 1,191,364 | In 1820 . 2,009,031 | In 1850 . 3,294,313 | In 1860 . 4,002,996

* A statute was enacted by Edward VI. that a runaway, or any one who lived idly for three days, should be brought before two justices of the peace, and marked V with a hot iron on the breast, and adjudged the slave of him who bought him for two years. He was to take the slave and give him bread, water, or small drink, and refuse meat, and cause him to work by beating, chaining, or otherwise; and if, within that space, he absented himself fourteen days, was to be marked on the forehead or cheek, by a hot iron, with an S, and be his master's slave for ever: second desertion was made felony. It was lawful to put a ring of iron round his neck, arm, or leg. A child might be put apprentice, and, on running away, become a slave to his master, 1547.

† Determined by the judgment of the court of king's bench, at the instance of Mr. Granville Sharpe. A poor slave named Somerset, brought to England, was, because of his ill state, turned adrift by his master. By the charity of Mr. G. Sharpe, he was restored to health, when his unfeeling and avaricious master again claimed him. This was resisted, and a suit was the consequence, which established, by its result in favour of the black, the great point, that slavery could not exist in Great Britain, June 22, 1772.

In 1853 John Anderson, a runaway slave, killed Septimus Digges, a planter of Missouri, who attempted to arrest him, and escaped to Canada. The American government claimed him as a murderer. The Canadian judges deciding that the law required his surrender, Mr. Edwin James, Q.C. (Jan. 15, 1861), obtained a writ of habeas corpus for his appearance before the court of queen's bench. Anderson was, however, discharged on Feb. 16 following, on technical grounds.

In elections five slaves are reckoned as three free men.—The following are the

FREE STATES.		SLAVE STATES.	
Maine.	Pennsylvania.	Delaware.	* Mississippi.

New York.	Iowa and Kansas.	* Florida.	Missouri.
New Jersey.	California.	* Alabama.	* Have seceded from the Union.

SLAVE TRADE. The slave trade from Congou and Angola was begun by the Portuguese in 1481. The commerce in man has brutalised a tract fifteen degrees on each side the equator, and forty degrees wide, or of four millions of square miles; and men and women have been bred for sale to the Christian nations during the last 250 years, and war carried on to make prisoners for the Christian market. The Abbé Raynal computed (1777) that, at the time of his writing, 9,000,000 of slaves had been consumed by the Europeans.

In 1768 the slaves taken from their own continent amounted to 104,100. In 1786 the annual number was about 100,000.

In 1807 it was shown by documents, produced by government, that since 1792 upwards of 3,500,000 Africans had been torn from their country, and had either perished on the passage or been sold in the West Indies.

SLAVE TRADE OF ENGLAND: begun by sir John Hawkins. His first expedition with the object of procuring negroes on the coast of Africa, and conveying them for sale at the West Indies, took place in Oct. 1562. See *Guinea*.

England employed 130 ships and carried off 42,000 slaves, 1786.

Slave-trade question debated in parliament, 1787.

The debate for its abolition lasted two days, April, 1791.

Mr. Wilberforce's motion lost by a majority of 88 to 83, April 3, 1798.

The question introduced under the auspices of lord Grenville and Mr. Fox, then ministers, March 31, 1806.

The trade abolished by parliament, March 25, 1807.

Thomas Clarkson, whose whole life may be said to have been passed in labouring to effect the extinction of the slave trade, died, aged 85, Sept. 1846.

FOREIGN COUNTRIES:—The trade was abolished by Austria in 1782; by the French convention in 1794. The Allies, at Vienna, declared against it, Feb. 1815. Napoleon, in the hundred days, abolished the trade, March 29, 1815.

Treaty for its repression with Spain, 1817; with the Netherlands, May, 1818; with Brazil, Nov. 1826.

Its revival was proposed in the Congress of the United States of America, Dec. 14, 1856, and negatived by 183 votes to 58.

In June, 1857, the French government gave permission to M. Regis to convey *free* negroes from Africa to Guadaloupe and Martinico, French colonies. This having led to abuses and consequent troubles (see *Charles et Georges*), was eventually given up in Jan. 1859.

It is said that about 40,000 slaves were landed at Cuba in 1860.

A treaty between Great Britain and the United States for the abolition of the slave trade, was signed, April 7: ratified, May 20, 1862.

SLAVES, EMANCIPATION OF. Act for the abolition of slavery throughout the British colonies, and for the promotion of industry among the manumitted slaves, and for compensation to the persons hitherto entitled to the services of such slaves by the grant from parliament of 20,000,000*l.* sterling, passed Aug. 28, 1833. Slavery terminated in the British possessions on Aug. 1, 1834, and 770,280 slaves became free. Slavery was abolished in the East Indies, Aug. 1, 1838.

SLIDING-SCALE. See *Corn Laws*.

SLING, an ancient missive weapon. In *Judges* xx. 16, is mentioned the skill of the Benjamite slingers (about 1406 B.C.), and with a sling David slew Goliath 1063 B.C. (1. *Sam.* xvii.). The natives of the Balearic isles (Majorca, Minorca, and Iviça) were celebrated slingers, and served as mercenaries in the Carthaginian and Roman armies. Slings are said to have been used by the Huguenots at the siege of Sancerre, in 1672, to economise their powder.

SLUYS (Holland), near which Edward III. gained a signal naval victory over the French. The English had the wind of the enemy, and the sun at their backs, and began the action, which was fierce and bloody, the English archers galling the French on their approach. Two hundred and thirty French ships were taken: thirty thousand Frenchmen were killed, with two of their admirals; the loss of the English was inconceivable: June 24, 1340.

SMALCALD (Hesse), **TREATY OF,** entered into between the elector of Brandenburg and the other princes of Germany in favour of Protestantism, 1529-30. See *Protestants*. The emperor, apprehensive that the kings of France and England would enter into this league, was induced to sign the treaty at Nuremberg, in July 1532, allowing liberty of conscience to the Lutherans.

SMALL POX, *Variola* (the diminutive of *varus*, a pimple), a highly contagious disease supposed to have been introduced into Europe from the East by the Saracens. Rhazes, an Arabian, was the first who accurately described it, about A.D. 900. From Europe it was carried to America, soon after its discovery, and raged there with great severity, destroying

the Indians by thousands. In 1694, queen Mary of England died of small pox, as did in 1711 and 1712 the emperor of Germany, dauphin and dauphiness of France and their son, in 1730 the emperor of Russia, in 1741 the queen of Sweden, and in 1774 Louis XV. of France. It is stated that in the middle of the last century two millions perished by it in Russia. In London in 1723 one out of fourteen deaths was caused by small pox, and in France in 1754 the rate was one in ten. For the attempts to alleviate this scourge, see *Inoculation*, introduced into England in 1722, and *Vaccination*, announced by Dr. Jenner in 1798. In Sept. and Oct. 1862 a great many sheep died of small pox in the West of England, till successful preventive measures were resorted to.

SMITHFIELD, WEST, in the heart of London, was once a favourite walk of the London citizens, outside the city walls. Sir W. Wallace is said to have been put to death here in 1305. On June 15, 1381, Wat Tyler was met by king Richard II. at this place, and was stabbed by Walworth the mayor. Many tournaments were also held here. In the reign of Mary, 277 persons perished by fire; the last sufferer being Bartholomew Leggatt, in 1555.—Bartholomew fair was held here till 1853.—This place is mentioned as the site of a cattle-market as far back as 1150. The space devoted to this purpose was enlarged from about three acres to four and a half, and in 1834 to six and a quarter. The ancient regulations were called the "statutes of Smithfield." In one day there were sometimes assembled 4000 beasts, and 30,000 sheep. The annual amount of the sales was about 7,000,000*l.* In 1846 there were sold here 226,132 beasts, 1,593,270 sheep and lambs, 26,356 calves, 33,531 pigs. There were about 160 salesmen. The contracted space of the market, the slaughtering places adjoining, and many other nuisances, gave ground to much dissatisfaction, and after parliamentary investigation, an act was passed on Aug. 1, 1851, appointing metropolitan market commissioners with powers to provide a new market, slaughtering places, &c.; and to close the market at Smithfield. Smithfield was used as a cattle-market for the last time on June 11, 1855; and the new market in Copenhagen-fields was opened on June 13. See *Metropolitan Market*. By an act passed in 1861 a dead-meat and poultry market is to be erected in Smithfield, and Newgate market is to cease.*

SMITHSONIAN INSTITUTION, "for the increase and diffusion of knowledge among men," a handsome building at Washington, U.S., was founded in 1846, by means of a legacy of above 100,000*l.* bequeathed for the purpose to the United States government by James Smithson, illegitimate son of sir Hugh Smithson, who became duke of Northumberland in 1766. It publishes and freely distributes scientific memoirs and reports.

SMOKE NUISANCE. After much opposition, an act was passed in 1853 to abate this nuisance, proceeding from chimney shafts and steamers above London bridge. In 1856 another act, obtained for its further application to steamers below London bridge, and to potteries and glass-houses previously exempted, came into operation, Jan. 1. 1858; similar enactments have been made for all the kingdom.

SMOLENSKO (Russia). The French in a most sanguinary engagement here were three times repulsed, but ultimately succeeded in entering Smolenskó, and found the city, which had been bombarded, burning and partly in ruins, Aug. 16-19, 1812. Barclay de Tolly, the Russian commander-in-chief, incurred the displeasure of the emperor Alexander because he retreated after the battle, and Kutusoff succeeded to the command.

SMUGGLERS. The customs duties were instituted originally to enable the king to afford protection to trade against pirates; and they afterwards became a branch of public revenue. The act so well known as the Smugglers' Act was passed in 1736. Its severity was mitigated in 1781 and 1784. A revision of these statutes took place, 1826 and 1835.

SMYRNA. See *Seven Churches*.

SNEEZING. The custom of saying "God bless you" to the sneezer, originated, according to Strada, among the ancients, who, through an opinion of the danger attending it, after sneezing made a short prayer to the gods, as "Jupiter help me." Polydore Vergil says it took its rise at the time of the plague A.D. 558, when the infected fell down dead sneezing, though seemingly in good health.

SNUFF-TAKING took its rise in England from the captures made of vast quantities of snuff by sir George Rooke's expedition to Vigo in 1702. It soon became general, from which the revenue now draws, with tobacco, considerably more than 5,000,000*l.* per annum. In 1839 there were imported 1,622,493 lbs. of snuff, of which 196,305 lbs. were entered for home

* The Smithfield Club, to promote improvements in the breed of cattle, was established in 1798. For many years the members supported a cattle show in December in Goswell-street, which was removed to Baker-street in 1840, and to the New Agricultural Hall, Liverpool-road, Islington, in 1862.

consumption; the duty was 88,263*l*. See *Tobacco*. In 1858, 2,573,925 lbs. of snuff and cigars, in 1861, 2,110,429 lbs. were imported.

SOANE MUSEUM, No. 13, Lincoln's Inn Fields, was gradually formed by sir John Soane, the architect, who died in 1837, after making arrangements for its being open to the public. It contains Egyptian and other antiquities, valuable paintings, rare books, &c.

SOAP. This article was imperfectly known to the ancients. The first express mention of it occurs in Pliny and Galen; and the former declares it to be an invention of the Gauls, though he prefers the German to the Gallic soap. In remote periods clothes were cleaned by being rubbed or stamped upon in water. Nausicaa and her attendants, Homer tells us, washed theirs by treading upon them with their feet in pits of water. *Odyssey*, book vi. The manufacture of soap began in London in 1524, before which time it was supplied by Bristol at one penny per pound. The duty upon soap imposed in 1711, was totally repealed in 1853 (then set down by the chancellor of the exchequer (Mr. Gladstone) as yielding a yearly revenue of 1,126,000*l*.)

SOBRAON (N. W. India). The British army, 35,000 strong, under sir Hugh (afterwards viscount) Gough, attacked the Sikh force on the Sutlej, Feb. 10, 1846. The enemy was dislodged after a dreadful contest, and all their batteries taken; and in attempting the passage of the river by a floating-bridge in their rear, the weight of the masses that crowded upon it caused it to break down, and more than 13,000 Sikhs were killed, wounded, or drowned. The British loss was 2338 men.

SOCIALISM was advocated in London, Jan. 24, 1834, by the celebrated Robert Owen. He laboured indefatigably to propagate his doctrines, and established a settlement at New Harmony in America in 1824. He died Nov. 17, 1858, aged 90. The French socialists, termed *Communists*, became a powerful political body in that country, and were much implicated in the revolution in 1848.

SOCIAL SCIENCE. The National Association for the Promotion of Social Science originated in a meeting at lord Brougham's in May, 1857. Its object is to promote improvements in the administration of law, in education, in public health, and in social economy. It holds annual meetings, and publishes its proceedings. The first meeting was at Birmingham, Oct. 12-16, 1857; 2nd at Liverpool, Oct. 11-16, 1858; 3rd at Bradford, Oct. 11-15, 1859; 4th at Glasgow, Sept. 24-29, 1860; 5th at Dublin, Aug. 14-22, 1861; 6th in London, June, 1862.

SOCIAL WARS. See *Athens* and *Marsi*.

SOCIETIES AND INSTITUTIONS, LITERARY AND SCIENTIFIC, in Great Britain. Further details of many of these will be found under their respective heads. All in the list below are in London, except otherwise stated. An act was passed, Aug. 11, 1854, "to afford facilities for the establishment of institutions for the promotion of Literature and Science," by grants of land, &c.: and for their regulation. The Royal and London Institutions are exempted from the operation of the act.

SOEINIAN. Persons who accept the opinions of Faustus Socinus (died 1562), and his nephew Lælius (died 1604), Siennese noblemen. They held—1. That the Eternal Father was the one only God, and that Jesus Christ was no otherwise God than by his superiority to all other creatures; 2. That Christ was not a mediator; 3. That hell will endure for a time, after which the soul and body will be destroyed; and 4. That it is unlawful for princes to make war. *Hook.* They established a church in Poland, and made proselytes in Transylvania, 1563.

SODIUM, a remarkable metal, first obtained in 1807 by sir Humphry Davy from soda (which was formerly confounded with potash, but proved to be a distinct substance by Duhamel in 1736). This metal, like potassium, was obtained by the agency of the electric battery. Common salt (chloride of sodium) is a compound of sodium and chlorine.

SODOM AND GOMORRAH (Palestine). These cities, with all their inhabitants, were destroyed by fire from heaven, 1898 B.C., *Gen.* xix.

SODOR is a village of Icolmkill. Dr. Johnson calls it "the luminary of the Caledonian regions, whence," he adds, "savage clans and roving barbarians derived the benefits of knowledge, and the blessings of religion." The bishop's seat was at Rushin, or Castletown, in the Isle of Man, and in Latin is entitled *Sodorensis*. But when that island became dependent upon the kingdom of England the western islands withdrew themselves from the obedience of their bishop, and had a bishop of their own, whom they entitled also *Sodorensis*, but commonly bishop of the Isles. See *Isles*. Germanus was settled here by St. Patrick in 447. The bishop of Sodor and Man is not a lord of parliament. See *Man*.

SOLAR SYSTEM. The system nearly as now accepted, after the investigations and discoveries of many enlightened centuries and ages, was taught by Pythagoras of Samos, about 529 B.C. In his system of the universe he placed the sun in the centre, and all the planets moving in elliptical orbits round it—a doctrine superseded by the Ptolemaic system (*which see*). The system of Pythagoras was revived by Copernicus, and it is hence called the Copernican system. Its truth was fully demonstrated by sir Isaac Newton, in 1695.

SOISSONS (France), capital of the Gallic Suessiones, was subdued by Julius Cæsar, 57 B.C. It was held by Syagrius, after his father Ægidius, till his defeat by Clovis, A.D. 486. Several councils have been held at Soissons (in 744, 1092, 1122).

SOLDIERS' DAUGHTERS' HOME was established at Hampstead, near London, in Aug. 1857, by the surplus of the money collected by the Central Association in aid of the wives and families of soldiers in active service during the Crimean war.

SOLEBAY, or **SOUTHWOLD BAY** (Suffolk), where a fierce naval battle was fought between the fleets of England and France on one side, and the Dutch on the other, the former commanded by the duke of York, afterwards James II., May 28, 1672. The English lost four ships, and the Dutch three; but the enemy fled, and were pursued by the British to their own coasts. In this obstinate and bloody engagement the earl of Sandwich was blown up, and some thousand men were killed and wounded.

SOLFÉRINO (in Lombardy), the site of the chief struggle on the great battle of June 24, 1859, between the allied French and Sardinian army commanded by their respective sovereigns, and the Austrians under general Hesse; the emperor being present. The Austrians, after their defeat at Magenta, gradually retreated across the Mincio, and took up a position in the celebrated quadrilateral, and were expected there to await the attack. But the advance of Garibaldi on one side, and of prince Napoleon and the Tuscans on the other, induced them to recross the Mincio and take the offensive, on June 23. The conflict began

early on the 24th, and lasted fifteen hours. At first the Austrians had the advantage; but the successful attack of the French on Cavriana and Solferino changed the fortune of the day, and the Austrians were after desperate encounters compelled to retreat. The French attribute the victory to the skill and bravery of their emperor and the generals M'Mahon and Niel; the Austrians, to the destruction of their reserve by the rifled cannon of their adversaries. The Sardinians maintained a fearful contest of fifteen hours at San Martino, it is said against double their number. Loss of the Austrians 630 officers, and 19,311 soldiers; of the allies, 8 generals, 936 officers, and 17,305 soldiers killed and wounded. This battle closed the war; preliminaries of peace being signed at Villa Franca, July 12.

SOLICITOR-GENERAL, the legal officer next in rank to the attorney-general, to whom he is deputy. Those below with a * became attorney-general.

SOLIFIDIANS (from *solus*, only, and *fides*, faith), a name given to the Antinomians (*which see*).

SOLOMON'S TEMPLE was founded at Jerusalem 480 years after the deliverance from Egypt, 1012 B.C., and solemnly dedicated to the Lord Jehovah, on Friday, Oct. 30, 1004 B.C., being 1000 years before the birth of the Redeemer. *Usher, Lenglet*. Solomon was the author of many books, of which we have still preserved in the Bible, his *Proverbs*, the *Book of Ecclesiastes*, the *Canticles* or *Song of Songs*, and the 71st and 126th *Psalms*.

SOLWAY MOSS, bordering on Scotland. On Nov. 13, 1771, it swelled, owing to heavy rains. Upwards of 400 acres rose to such a height above the level of the ground, that at last it rolled forward like a torrent above a mile, sweeping along with it houses, trees &c. It covered 600 acres at Netherby, and destroyed about 30 small villages. Near Solway Moss the Scots were defeated by the duke of Norfolk, Nov. 25, 1542.

SOMBRERO (West Indies). On this desert isle, Robert Jeffery, a British man-of-war's man, was put ashore by his commander, the hon. captain W. Lake, for having tapped a barrel of beer when the ship was on short allowance. After sustaining life for eight days on a few limpets and rain-water, he was saved by an American vessel, Dec. 13, 1807; and returned to England. Sir Francis Burdett advocated his cause in parliament, and he received 600*l.* as a compensation from captain Lake, who was tried by a court-martial, and dismissed the service, Feb. 20, 1810.

SOMERSET THE BLACK. See *Slavery in England*.

SOMERSET-HOUSE (London), formerly a palace, founded on the site of several churches and other buildings levelled in 1549, by the protector Somerset, whose residence fell to the crown after his execution. Here resided at times queen Elizabeth, Anne of Denmark, and Catherine, queen of Charles II. Old Somerset-house, a mixture of Grecian and Gothic, was demolished in 1775, and the present edifice, from a design by sir William Chambers, was erected for public offices. The Royal Academy of Arts first assembled in the apartments given to the members by the king, Jan. 17, 1771, and the Royal Society met here in 1780. Large suits of government buildings were erected in 1774. The Navy-office, Pipe-office, Victualling and other offices, were removed here in 1788, and various government departments since. The east wing, forming the King's College (*see King's College*), was completed in 1833. By an act passed in 1854, the offices of the duchy of Cornwall were ordered to be transferred to Pimlico.

SOMNATH GATES, the gates of an ancient Hindoo temple at Guzerat which was destroyed by Mahmood of Ghuznee in 1025. The priests wished to preserve the idol; but Mahmood broke it to pieces and found it filled with diamonds, &c. He carried the gates to Ghuznee. When that city was taken by gen. Nott in 1842, lord Ellenborough ordered the gates to be restored after an exile of 800 years. They are made of sandal wood, and are figured in the *Archæologia* of the Society of Antiquaries, vol. xxx.

SONNET, a poem in fourteen lines, the rhymes being adjusted by rules. The most celebrated sonnets were written by Petrarch, said to be the inventor (about 1327); Shakespeare (1609); Milton (born 1608); and Wordsworth (1820).

SONNITES. The orthodox Mahometans who now possess the Turkish empire. See *Mahometanism*.

SONTHALS, a tribe of Northern India, brought to Bengal about 1830, where they prospered; till, partly from the instigations of a fanatic, and partly from the exactions of money-lenders, they broke out into rebellion in July 1855, and committed fearful outrages. They were quite subdued early in 1856, and many were removed to the newly-conquered province of Pegu.

SOPHIA, ST. (in Constantinople). The first church was dedicated to St. Sophia (wisdom) by Constantius II. 360; the second, the present edifice, a short distance from the Sublime Porte, was built by Justinian, 532. Since the Mahometan conquest, in 1453, it has been used as an imperial mosque. Its length is 269 feet, and its breadth 243 feet. It abounds in curiosities. Six of its pillars are of green jasper, from the Temple of Diana, at Ephesus; and of porphyry, from the temple of the Sun, at Rome. Four minarets were added by Selim II., who reigned in 1566. The interior of the dome is beautifully ornamented with mosaic work.

SORBONNE, a society of ecclesiastics at Paris, founded by Robert de Sorbon in 1252. The members lived in common, and devoted themselves to study and gratuitous teaching. They attained a European reputation as a faculty of theology, their judgment being frequently appealed to, from the fourteenth to the seventeenth centuries. The influence of the Sorbonne was declining when the society was broken up in 1789.

SORCERERS AND MAGICIANS. A law was enacted against their seductions, 33 Hen. VIII. 1541; and another statute equally severe was passed 5 Eliz. 1563. The pretension to sorcery was made capital, 1 James I. 1603. See *Witchcraft*.

SUDAN, or **SOTJAH**, the title of the lieutenant-generals of the caliphs, which they bore in their provinces and armies. These officers afterwards made themselves sovereigns. Saladin, general of the forces of Nouredin, king of Damascus, was the first that took upon him this title in Egypt, A.D. 1165, after having killed the caliph Cayn.

SOULAGES COLLECTION. About 1827, M. Soulages of Thoulouse, collected 790 specimens of Italian art and workmanship, &c. These were bought for 11,000*l.* by 73 English gentlemen, with the view of first exhibiting them to the public, and afterwards selling them to the government. They formed part of the "Art Treasures" exhibited at Manchester in 1857.

SOUND. Fewer than thirty vibrations in a second give no sound; and when the vibrations exceed 7520 in a second, the tones cease to be discriminated. Roberval states the velocity of sound at the rate of 560 feet in a second; Gassendi at 1473; Derham, at 1142 feet. At Paris, where cannon were fired under many varieties of weather, in 1738, it was found to be 1107. The fire of the British on landing in Egypt was distinctly heard 130 miles on the sea. See *Acoustics*.

SOUND DUTIES. Till the year 1857 no merchant ship was allowed to pass the Sound (a narrow channel separating Zealand from Sweden) without clearing at Elsinore and paying toll. These duties had their origin in an agreement between the king of Denmark and the Hanse towns (A.D. 1348), by which the former undertook to maintain lighthouses, &c., along the Cattegat, and the latter to pay duty for the same. The first treaty with England in relation to this was in 1450; other countries followed. In 1855 the United States determined to pay the dues no more; and in the same year the Danish government proposed that these dues should be capitalised; which was eventually agreed to, the sum agreed on being 30,476,325 rix-dollars. In Aug. 1857, the British government paid 10,126,855 rix-dollars (1,125,206*l.*) to the Danes as their proportion.—The passage of the Sound was effected, in defiance of strong fortresses, by sir Hyde Parker and lord Nelson, April 2, 1801. See *Baltic Expedition*.

SOUNDINGS AT SEA. Captain Ross, of H.M.S. *Ædipus*, in 1840, took extraordinary soundings at sea. One of them was taken 900 miles west of St. Helena, where it extended to the depth of 5000 fathoms. Another sounding was made in the latitude of 33 degrees S. and longitude 9 degrees W. about 300 miles from the Cape of Good Hope, when 2266 fathoms were sounded; the weight employed amounted to 450 lbs.

SOUTHAMPTON, a seaport (S. England), a county of itself, near the Roman Clausentum and the Saxon Hantune. It frequently suffered by Danish incursions; Canute when king occasionally resided here. The charter was granted by Henry I. and confirmed by Richard I. and John; and the free grammar school was founded by Edward VI. On July 17, 1861, a monument to Dr. Isaac Watts was inaugurated, and on Oct. 15, 1862 the Hartley institution was opened by lord Palmerston.

SOUTH AUSTRALIA was discovered by capt. Sturt in 1830, and explored shortly after by capt. Parker and Mr. Kent, the former of whom was killed by the natives. The boundaries of the province were fixed by 4 & 5 Will. IV. c. 95 (1834); and it was occupied Dec. 26, 1836, by capt. Hindmarsh, the first governor. It was colonised according to Mr. E. Gibbon Wakefield's scheme, which was carried out by the South Australian Colonisation Association. The colony for several years underwent severe trials through the great influx of emigrants, land-jobbing, building speculations, &c., which produced almost universal bankruptcy in 1839. In five years after, the energy of the colonists had overcome their difficulties, and the prosperity of the colony appeared fully established. In 1842 the highly productive Burra Burra copper mines were discovered, and large fortunes were suddenly realised; but in 1851 the discovery of gold in New South Wales and Victoria almost paralysed this province by drawing off a large part of the labouring population. Very little gold was found in South Australia; but a reaction took place in favour of the copper mines and agriculture, &c. Before the discovery of gold, little trade existed between Adelaide (the capital of South Australia) and Melbourne; but in 1852 gold was transmitted from the latter to the former to the amount of 2,215,167*l.* principally for bread-stuffs, farm produce, &c. The bishopric of Adelaide was founded in 1847. Sir Dominic Daly was appointed governor in Nov. 1861. Population in 1855, 85,821; in 1857, 185,698.

SOUTHCOTT, JOANNA, a fanatic, born in 1750, came from Exeter to London, where her followers at one period amounted to many thousands, and among whom were military officers, although the low and ignorant were her principal dupes. In 1792 she announced herself as the woman spoken of in the book of Revelation, chap. xii.; and a disorder gave her the appearance of pregnancy after she had passed her grand climacteric, favouring the delusion that she would be the mother of the promised Shiloh. She died Dec. 27, 1814. In 1851 there existed in England four congregations, professing to expect her return.

SOUTHERN CONFEDERATE STATES of North America. The possibility of the dissolution of the Union was spoken of in congress in 1811, and in 1812, during the war with Great Britain, in the Northern States, who suffered much by it, secession was much discussed and advocated. Afterwards agitation in the Southern States for the extension of slavery and in the Northern States for its abolition, led to the dissensions which eventually led to the great secession of 1860-1. On Nov. 4, 1860, Abraham Lincoln, the Republican or Abolitionist candidate, was elected president of the United States. This led to the formal secession of South Carolina, on Dec. 20, 1860; and of Alabama, Florida, Mississippi, Georgia, Louisiana, Texas, Virginia (except West Virginia), Arkansas, Tennessee, North Carolina, in 1861. Jefferson Davis was inaugurated president of the Southern Confederacy at Montgomery in Alabama, Feb. 18, 1861. For the events of the war which ensued, see *United States*, 1861-2.

SOUTHERN CONTINENT. The Southern Ocean was first traversed by Magellan in 1520; and explored by Wallis and Carteret in 1766. Of the southern continent little more is known than that it is ice-bound, and contains active volcanoes. It was discovered in the first instance by capt. John Biscoe, on Feb. 27, 1831, in lat. 65° 57' S., long. 47° 20' E. extending east and west 200 miles,—this he named Enderby Land, after the gentlemen who had equipped him for the voyage. Capt. Biscoe also discovered Graham's Land on Feb. 15, 1832, situated in lat. 67° 1' S., long. 71° 48' W. The Messrs. Enderby equipped three other expeditions in search of the southern continent, the last (in connection with some other gentlemen) in 1838, when capt. Balleny had command, who, in Feb. 1839, discovered the Balleny Islands, in lat. 67° S., long. 165° E., and in March, 1839, Salvia Land, in lat. 65° 10' S., long. 118° 30' E. In 1840, a French expedition, under the command of admiral D'Urville, and an American expedition, under the command of commodore Wilkes, greatly added to our knowledge in respect to the existence of a southern continent, and this was again added to by the expedition which sailed from England in 1839, under the command of capt. sir James Clark Ross, who discovered much land in the years 1841 and 1842, and penetrated as far south as 78° 11'.

SOUTH KENSINGTON MUSEUM, near Brompton old church (containing the pictures presented by Mr. Vernon, Mr. Sheepshanks, Mrs. Ellison, and those bequeathed by Turner, the great painter, as well as specimens of sculpture and art, educational collections, products of the animal, vegetable, and mineral kingdoms, &c.), was opened on June 24, 1857. A special Exhibition of Works of Art, of immense value, lent for the occasion, was opened here in the summer of 1862, and closed in November.

SOUTH-SEA BUBBLE commenced with the establishment of the South-sea company in 1710, which was at first unwisely and afterwards dishonestly managed. It exploded in 1720, ruining thousands of families, and the directors' estates, to the value of 2,014,000*l.* were seized in 1721 and sold. Mr. Knight, the cashier, absconded with 100,000*l.*; but he com-

pounded the fraud for 10,000*l.* and returned to England in 1743. Almost all the wealthy persons in the kingdom had become speculators; the artifices of the directors having raised the shares, originally of 100*l.* to the price of 1000*l.* A parliamentary inquiry took place in Nov. 1720, and Aislable, chancellor of the exchequer, and several members of parliament were expelled the house in 1721. See *Law's Bubble*.

SOUTHWARK. This part of London was governed by its own bailiffs till 1327. The city, however, found great inconvenience from the number of malefactors who escaped thither, in order to be out of the reach and cognisance of the city magistrates; and a grant was made of Southwark to the city of London by the crown, for a small annuity. In Edward VI.'s reign it was formed into a city ward, and was named Bridge Ward Without, 1550.—*Southwark-bridge* was begun Sept. 23, 1814, and was completed March 26, 1819, at an expense of 800,000*l.* It consists of three great cast-iron arches, resting on massive stone piers and abutments; the distance between the abutments is 708 feet; the centre arch is 240 feet span, the two others 210 feet each; and the total weight of iron 5308 tons.

SOUTHWOLD. See *Solebay*.

SOVEREIGN, an ancient and modern British gold coin. In 1489 22½ pieces, in value 20*s.* "to be called the sovereign," were ordered to be coined out of a pound of gold. *Ruding*. In 1542 sovereigns were coined in value 20*s.*, which afterwards, in 1550 and 1552 (4 & 6 Edw. VI.), passed for 24*s.* and 30*s.* By 56 Geo. III. sovereigns of the new coinage were directed to pass for 20*s.* and were issued from the Mint, July 1, 1817. See *Coin and Gold*.

SPA-FIELDS (N. London). Here upwards of 30,000 persons assembled to vote an address from the distressed manufacturers to the prince regent, Nov. 15, 1816. A second meeting, Dec. 2 following, terminated in an alarming riot; the shops of several gunsmiths were attacked for arms by the rioters; and in the shop of Mr. Beckwith, on Snowhill, Mr. Platt was wounded, and much injury was done before the tumult was suppressed. For this riot, Cashman the seaman was hanged, March 12, 1817.

SPAIN (the ancient Iberia and Hispania). The first settlers are supposed to have been the progeny of Tubal, fifth son of Japhet. The Phœnicians and Carthaginians (360 B.C.) successively planted colonies on the coasts; and the Romans conquered the whole country, 207 B.C. Population of Spain in 1857, 15,464,078; of the colonies, 4,528,633. Estimated revenue in 1861, 19,324,743*l.*; expenditure, 19,386,800*l.*

The Carthaginians enriched by the mines of Spain (B.C. 480 *et seq.*), form settlements B.C. 360
Hamilcar extends their dominions in Spain 238-233
New Carthage (Carthagena) founded by Hasdrubal 229
At his death, Hannibal, his son, takes the command, 221; and prepares for war, 220; he takes Saguntum, 219; crosses the Alps and enters Italy 218
The Romans carry the war into Spain; two Scipios defeated and slain by Hasdrubal 212
Pub. Cornelius Scipio Africanus takes New Carthage, 210; and drives the Carthaginians out of Spain 207
Numantine war 153-133
Virginius, general of the Celtiberians and Lusitanians, subdued all West Spain, 145; makes peace with the consul Fabius Servilius, 142; assassinated by order of the Romans 140
Insurrection of Sertorius, 78; subdued by Pompey, and assassinated 72
Julius Cæsar quells an insurrection in Spain 67
Pompey governs Spain 60-50
Revolt through the rapacity of Crassus 48-47
The Vandals, Alani, and Suevi wrest Spain from the Romans A.D. 409
Adolphus founds the kingdom of the Visigoths 414
The Vandals pass over to Africa 427
Theodoric I. vanquishes the Suevi 452
Assassinated by his brother Euric, who becomes master of all Spain 466
Recared I. expels the Franks 587
He abjures Arianism, and rules ably till Wamba's wise administration; he prepared a fleet for defence against the Saracens 672-677
The Arabs invited into Spain against king Roderic 709
His defeat and death at Xeres 711

Establishment of the Saracens at Cordova A.D. 711
Victorious progress of Musa and Tarik 712-13
Emirs rule at Cordova; Pelayo, of Gothic blood, rules in Asturias and Leon 718
The Saracens defeated at Tours by Charles Martel 732 or 733
Abderrahman the first king at Cordova 755
Unsuccessful invasion of Charlemagne 777-78
Sancho Iñigo, count of Navarre, &c. 873
Sancho of Navarre becomes king of Castile 1026
The kingdom of Aragon commenced under Ramirez I. 1035
Leon and Asturias united to Castile 1037
Portugal taken from the Saracens by Henry of Besançon 1095
The Saracens, beset on all sides by the Christians, call in the aid of the Moors from Africa, who seize the dominions they came to protect, and subdue the Saracens 1091 *et seq.*
Exploits of the Cid Rodrigo about 1100
Dynasty of the Almoravides at Cordova 1094-1144
The Moors defeated in several battles by Alphonsus of Leon 1144
Dynasty of the Almohades at Cordova 1144-1225
Cordova, Toledo, Seville, &c., taken by Ferdinand of Castile and Leon 1233-1248
The kingdom of Granada begun by the Moors, last refuge from the power of the Christians 1238
The crown of Navarre passes to the royal family of France 1274
200,000 Moors arrive to assist the king of Granada 1327
They are defeated at Tarifa, by Alphonsus XI. of Castile, with great slaughter 1340
Reign of Pedro the Cruel 1350
His alliance with Edward the Black prince 1363
Defeated at Montiel and treacherously slain 1369
Ferdinand II. of Aragon marries Isabella of

SPAIN, *continued.*

- Castile; and nearly the whole Christian dominions of Spain are united in one monarchy. 1474
- Establishment of the Inquisition. 1480-4
- Persecution of the Jews. 1492-8
- Granada taken after a two years' siege; and the power of the Moors is finally extirpated by Ferdinand. 1492
- Columbus is sent from Spain to explore the western world. —
- Mahometans persecuted and expelled. 1499-1502
- Ferdinand conquers great part of Navarre. 1512
- Accession of the house of Austria to the throne of Spain; Charles I. of Spain. 1516
- Able administration of Ximenes; ungratefully used, 1516; his death. 1517
- Charles elected emperor of Germany. —
- Dreadful insurrection in Castile. 1520-21
- Philip of Spain marries Mary of England. 1554
- Charles retires from the world. 1556
- Philip II. commences his bloody persecution of the Protestants. 1561
- The Escorial begun building. 1562
- Revolt of the Moriscos, 1567; suppressed. 1570
- Portugal united to Spain by conquest. 1580
- The Spanish Armada destroyed. See *Armada*. 1588
- Philip III. banishes the Moors (900,000). 1598-1610
- Philip IV. loses Portugal. 1640
- Death of Charles II., last of the house of Austria; accession of Philip V. of the house of Bourbon. 1700
- War of the Succession. 1702-13
- Gibraltar taken by the English. 1704
- Siege of Barcelona. 1713
- Able government of cardinal Alberoni; he re-established the authority of the king, reformed many abuses, and raised Spain to the rank of a first power, 1715-1720; ordered to quit Spain. 1720
- Charles, son of Philip V. conquers Naples. 1735
- Charles III. king of the Two Sicilies, succeeds to the crown of Spain. 1759
- War with England. 1756
- Battle of Cape St. Vincent. Feb. 14, 1797
- Spanish treasure-ships, valued at 3,000,000 dollars, seized by the English. Oct. 29, 1804
- Battle of Trafalgar. See *Trafalgar*. Oct. 21, 1805
- Sway of Godoy, prince of Peace. 1806
- The French enter Spain; a Spanish army sent to the Baltic. 1807
- Conspiracy of the prince of Asturias against his father. July 25, —
- Treaty of Fontainebleau. Oct. 27, —
- The French take Madrid. March, 1808
- The prince of Peace dismissed. March 18, —
- Abdication of Charles IV. in favour of Ferdinand. March 19, —
- And at Bayonne, in favour of his "friend and ally" Napoleon, when Ferdinand relinquished the crown. May 1, —
- The French massacred at Madrid. May 2, —
- The province Asturias rises *en masse*. May 3, —
- Napoleon assembles the notables at Bayonne. May 25, —
- Joseph Bonaparte enters Madrid as king of Spain, July 12; retires. July 29, —
- Battle of Vitoria. Aug. 21, —
- Supreme Junta installed. Sept. —
- Madrid retaken by the French, and Joseph restored. Dec. 2, —
- Napoleon enters Madrid. Dec. 4, —
- The royal family of Spain imprisoned in the palace of Chambery in Savoy. Dec. 5, —
- The French take Ferrol, Jan. 27; Saragossa, Feb. 21; Oporto, Feb. 29; Cordova and Seville. Nov. 1809
- Ney takes Ciudad Rodrigo. July 10, 1810
- The Spanish cortes meet. Sept. 24, —
- Wellington defeats Massena at Fuentes d'Onore, May 6, 1811
- Soult defeated at Albuera. May 16, 1811
- Constitution of the cortes. May 8, 1812
- Wellington takes Ciudad Rodrigo, Jan. 19; storms Badajoz, April 6; defeats Marmont at Salamanca. July 22, —
- He occupies Madrid, and totally defeats the French at Vittoria, June 21; defeats Soult in the Pyrenees, July 28; takes St. Sebastian, Aug. 31; and enters France. Oct. 8, 1813
- Ferdinand VII. (infamously ungrateful) restored. May 14, 1814
- Slave trade abolished for a compensation. 1817
- Insurrection at Valencia repressed. 1819
- Spanish revolution begun. Jan. 1820
- Ferdinand swears to the constitution of the cortes. March 8, —
- The Cortes remove the king to Seville, and thence to Cadiz. March 1823
- The French enter Spain, April 7; and invest Cadiz. June 25, —
- Battle of the Trocadero. Aug. 21, —
- Despotism resumed; the cortes dissolved; executions of liberals. Oct. —
- Riego put to death. Nov. 27, —
- The French evacuate Cadiz. Sept. 21, 1828
- Cadiz made a free port. Feb. 24, 1829
- Salique law abolished. March, 1830
- Queen of Spain appointed regent during the king's indisposition, and a complete change made in the ministry. Oct. 25, 1832
- Don Carlos declares himself legitimate successor to his brother's throne should the king die, April 29, 1833
- Death of Ferdinand VII., and his queen assumes the title of governing queen, until Isabella II. her infant daughter, attains her majority. Sept. 29, —
- The royalist volunteers disarmed with some bloodshed at Madrid. Oct. 27, —
- The quadruple treaty establishes the right of Isabella to the throne. April 22, 1834
- Don Carlos suddenly appears in Spain, July 10, —
- The peers vote his exclusion from the throne, Aug. 30, —
- Mendizabal, prime minister; Mina and Espartero commanded the royalists; the rebel leader, Zumalacarregui killed near Bilbao. 1835
- Sir De Eacy Evans, lord John Hay, and others, raised a British legion for the queen of Spain, —
- They defeat the Carlists at St. Sebastian, Oct. 1, 1836
- Espartero gains the battle of Bilbao. Dec. 25, —
- General Evans takes Irun. May 17, 1837
- The Carlists under Maroto desert Don Carlos and conclude a treaty of peace. Aug. 29, 1839
- Don Carlos seeks refuge in France. Sept. 13, —
- Surrender of Morello. May 28, 1840
- Cabrera, the Carlist general, unable to maintain the war, enters France with a body of his troops. July 7, —
- The British auxiliaries evacuate St. Sebastian and Passages. Aug. 25, —
- Revolutionary movement at Madrid; the authorities triumphant. Sept. 1, —
- Dismissal of the ministry, and dissolution of the cortes. Sept. 9, —
- Espartero makes his triumphal entry into Madrid. Oct. 5, —
- The queen regent appoints a new ministry, who are nominated by Espartero, Oct. 5; she abdicates and leaves the kingdom; visits France; next Sicily; but returns to France, Oct. 12, —
- Espartero, duke of Victory, expels the papal nuncio. Dec. 29, —
- The Spanish cortes declare Espartero regent during the minority of the young queen, April 12, 1841
- Queen Christina's protest to the Spanish nation, July 19, —
- Insurrection in favour of Christina is com-

KINGS OF SPAIN.

REIGN OF THE GOTHS.

411. Ataulfo, murdered by his soldiers.
 415. Sigorio: reigned a few days only.
 — Valia, or Wallia.
 420. Theodoric I.: killed in a battle, which he gained, against Attila.
 451. Thorismund, or Forismund: assassinated by his favourite.
 452. Theodoric II.: assassinated by
 466. Euric, the first monarch of all Spain.
 483. Alaric II.: killed in battle.
 506. Gesalric: his bastard son.
 511. Amalaric, or Amalaric: legitimate son of Alaric
 531. Theudis, or Theodat: assassinated by a madman.
 543. Theudisela, or Theodisela: murdered.
 549. Agila, taken prisoner, and put to death.
 554. Atanagildo.
 567. Liuva, or Levua I.
 568. Leuvigildo: associated on the throne with Liuva, in 568; and sole king in 572.
 586. Recaredo I.
 601. Liuva II.: assassinated.
 603. Vitoricus: also murdered.
 610. Gundemar.
 612. Sisibut, or Sisobuth, or Sisobert.
 621. Recaredo II.
 — Suintila: dethroned.
 631. Sisenando.
 636. Chintilla.
 640. Tulga, or Fulca.
 642. Cindasuinto: died in 652.
 649. Recesuinto: associated on the throne this year, and in 653 became sole king.
 672. Wamba, or Wamba: dethroned, and died in a monastery.
 680. Ervigius, or Ervigio.
 687. Egica, or Egiza.
 698. Vitiza, or Witiza; associated on the throne; in 701 sole king.
 711. Rodrigo, or Roderic: slain in battle.
 [Six independent Suevic kings reigned 409-469; and Two VANDALIC kings: Gunderic 409-423; his successor Genseric with his whole nation passed over to Africa.]

MAHOMETAN SPAIN.

CORDOVA.

- I. *Emirs*. The first, Abdolasis; the last, Yussuf-el-Tebri: A.D. 714-755.
 Kings. The first, Abderahman I.; the last, Abul Ali: 755-1238.

GRANADA.

- Kings. The first, Mohammed I.; the last, Abdalla: 1238-1492.

CHRISTIAN SPAIN.

KINGS OF ASTURIAS AND LEON.

713. Pelagius, or Pelayo: overthrew the Moors, and checked their conquests.
 737. Favila: killed in hunting.
 739. Alfonso the Catholic.
 757. Froila: murdered his brother Samaran, in revenge for which he was murdered by his brother and successor,
 768. Aurelius or Aurelio.
 774. Mauregato, the Usurper.
 788. Veremundo (Bermuda) I.
 799. Alfonso II. the Chaste.
 842. Ramiro I.: he put 70,000 Saracens to the sword in one battle. *Rabbe*.
 850. Ordoño I.
 866. Alfonso III. surnamed the Great: relinquished his crown to his son.
 910. Garcias.
 914. Ordoño II.
 923. Froila II.
 925. Alfonso IV. the Monk: abdicated.
 930. Ramiro II.: killed in battle.
 950. Ordoño III.
 953. Ordoño IV.
 956. Sanecho I. the Fat; poisoned with an apple.
 967. Ramiro III.
 983. Veremundo II. (Bermuda) the Gouty.
 993. Alfonso V.: killed in a siege.
 1027. Veremundo III. (Bermuda): killed.

KINGS OF NAVARRE.

873. Sancho Iago, Count.
 885. Garcia I., king.
 905. Sanecho Garcias: a renowned warrior.
 924. Garcias II. surnamed the Trembler.
 970. Sanecho III. surnamed the Great (king of Castile through his wife).
 1035. Garcias III.
 1054. Sanecho III.
 1076. Sancho IV. Ramirez, king of Aragon.
 1094. Peter of Aragon.
 1104. Alfonso I. of Aragon.
 1134. Garcias IV. Ramirez.
 1150. Sancho V. surnamed the Wise.
 1194. Sancho VI. surnamed the Infirm.
 1234. Theobald I. count of Champagne.

SPAIN, *continued.*

1253. Theobald II.
 1270. Henry Crassus.
 1274. Joanna : married to Philip the Fair of France, 1285.
 1305. Louis Hutin of France.
 1316. John : lived but a few days.
 — Philip V. the Long, of France.
 1322. Charles I. the IV. of France.
 1328. Joanna II. and Philip, count d'Evreux.
 1343. Joanna alone
 1349. Charles II. or the Bad.
 1387. Charles III. or the Noble.
 1425. Blanche and her husband John I. afterwards king of Aragon.
 1479. Eleanor.
 — Francis Phœbus de Foix.
 1483. Catherine and John d'Albret.
 1512. Navarre conquered by Ferdinand the Catholic, and united with Castile.

KINGS OF LEON AND CASTILE.

1035. Ferdinand the Great.
 1065. Sancho II., the Strong, son of Ferdinand. Alfonso in Leon and Asturias, and Garcias in Galicia.
 1072. Alfonso VI. the Valiant, king of Leon.
 1099. Urraca and Alfonso VII.
 1126. Alfonso VIII. Raymond.
 1157. Sancho III. surnamed the Beloved.
 1158. Alfonso IX. the Noble.
 [Leon is separated from Castile under Ferdinand II., 1157-1188.]
 1214. Henry I.
 1217. Ferdinand III. the Saint and the Holy. In him Leon and Castile were perpetually annexed.
 1252. Alfonso X. the Wise, (the Alphonsine Tables were drawn up under his direction).
 1284. Sancho IV. the Great and the Brave.
 1295. Ferdinand IV.
 1312. Alfonso XI.
 1350. Peter the Cruel : deposed ; reinstated by Edward the Black Prince of England : slain by his natural brother and successor.
 1369. Henry II. the Gracious ; poisoned by a monk.
 1379. John I. : he united Biscay to Castile.
 1390. Henry III. the Sickly.
 1406. John II. son of Henry.
 1454. Henry IV. the Impotent.
 1474. Isabella, now queen of Castile ; her marriage with Ferdinand of Aragon led to the union of the kingdoms of Castile and Aragon.
 1504. Joanna, daughter of Ferdinand and Isabella, and Philip I. of Austria. On her mother's death Joanna succeeded, jointly with her husband Philip ; but Philip dying in 1506, and Joanna becoming an imbecile, her father Ferdinand continued the reign ; and thus perpetuated the union of Castile with Aragon.

KINGS OF ARAGON.

1035. Ramiro I.
 1062. Sancho Ramirez (IV. of Navarre).
 1094. Peter of Navarre.
 1104. Alfonso the Warrior, king of Navarre.
 1134. Ramiro II. the Monk.

SPANISH ARMADA. See *Armada*.

SPANISH LANGUAGE (*Lengua Castellana*) is a dialect of Latin largely intermingled with Arabic, which was the legal language till the 14th century. Spanish did not become general till the 16th century.

EMINENT SPANISH AUTHORS.

<i>Born.</i>	<i>Died.</i>	<i>Born.</i>	<i>Died.</i>	<i>Born.</i>	<i>Died.</i>

Cervantes (author of Don Quixote)	1547	Quevedo	1647	Condé	1765
		Calderon	1601		1820

1137. Petronilla, and Raymond, count of Barcelona.
 1163. Alfonso II.
 1196. Peter II.
 1213. James I. ; succeeded by his son.
 1276. Peter III. conquered Sicily (*which see*) in 1282.
 1285. Alfonso III. the Beneficent.
 1291. James II. surnamed the Just.
 1327. Alfonso IV.
 1336. Peter IV. the Ceremonious.
 1387. John I.
 1395. Martin I.
 1410. [Interregnum.]
 1412. Ferdinand the Just, king of Sicily.
 1416. Alfonso V. the Wise.
 1458. John II. king of Navarre, brother of Alfonso : died 1479.
 1479. Ferdinand II. the Catholic, the next heir ; in consequence of his marriage with Isabella of Castile (1574), the kingdoms were united.

SPAIN.

1512. Ferdinand V. (of Castile), the Catholic. This prince having conquered Granada and Navarre, became king of all Spain ; succeeded by his grandson.
 1516. Charles I. son of Joan of Castile and Philip of Austria : became emperor of Germany, as Charles V. in 1519 : resigned both crowns and retired to a monastery.
 1556. Philip II. his son, king of Naples and Sicily ; a merciless bigot : married Mary, queen-regnant of England : died a most dreadful death, being covered with ulcers.
 1598. Philip III. his son drove the Moors from Granada and the adjacent provinces.
 1621. Philip IV. his son : a reign of unfortunate war with the Dutch and French : he lost Portugal in 1640.
 1665. Charles II. his son ; last of the Austrian line : he nominated, by will, as his successor,
 1700. Philip V. duke of Anjou, grandson of Louis XIV. of France : hence arose the war of the Succession, terminated by the treaty of Utrecht in 1713.
 1724. Louis I. who reigned only a few months.
 1724. Philip V. : again.
 1745. Ferdinand VI. the Wise : liberal and beneficent.
 1759. Charles III. brother-king of the Two Sicilies, which he gave to his third son Ferdinand.
 1788. Charles IV. son of Charles III. ; the influence of Godoy, prince of Peace, reached to almost royal authority in this reign : Charles abdicated in favour of his son and successor, in 1808, and died in 1819.
 1808. Ferdinand VII. whom Napoleon of France also forced to resign.
 — Joseph Bonaparte, brother of Napoleon : forced to abdicate.
 1814. Ferdinand VII. restored : succeeded by
 1833. Isabella II., daughter, (born Oct. 10, 1830) : ascended the throne, Sept. 29, 1833 ; married her cousin, Don Francis d'Assisi, October 10, 1846. The PRESENT (1862) queen of Spain.
 [Heir ; Alfonso, prince of Asturias, born Nov. 28, 1857.]

SPANISH ERA. See *Eras*.

SPANISH MARRIAGES. See *Spain*, Oct. 10, 1846.

SPARTA, the capital of Laconia, one of the most considerable republics of the Peloponnesus, and the formidable rival of Athens. Though without walls, it resisted the attacks of its enemies by the valour of its citizens, for eight centuries. The epoch of its foundation is much disputed. Lelex is supposed to have been the first king. From Lacedæmon the fourth king, and his wife Sparta, who are also spoken of as the founders of the city, it obtained the names by which it is most known. The Lacedæmonians were a nation of soldiers. They cultivated neither the arts, sciences, commerce, nor agriculture. All their laws, all their institutions, all their education, in a word, the very constitution of their republic, were calculated to make them warriors.

Sparta founded. <i>Pausanias</i>	B.C. 1490	defeated at Cyzicum, and Mindarus slain in the battle	B.C. 410
Tyndarus marries Leda: Helen born	***	The Spartans, defeated by land and at sea, sue for peace, which is denied by the Athenians.	409
Helen stolen by Theseus, king of Athens, but recovered by her brothers	1213	Reign of Pausanias.	408
The princes of Greece demand Helen in marriage; she makes choice of Menelaus of Mycenæ	1201	The Athenians defeated at Egospotamos by Lysander	405
Paris, son of Priam, king of Troy, carries off Helen	1198; which leads to	Athens taken by him, which ends the Peloponnesian war	404
The Trojan war	1193	Agésilas (king 308) enters Lydia	396
After a war of ten years, and a disastrous voyage of nearly eight, Menelaus and Helen return to Sparta	1176	The Athonians, Thebans, Argives, and Corinthians enter into a league against the Spartans which begins the Corinthian war	395
Reign of Orestes, the son of Agamemnon. <i>Pausanias</i>	1175	Agésilas defeats the Allies at Coronea	394
The kingdom is seized by the Heraclidae. <i>Leaglet</i>	1104	The Lacedæmonian fleet, under Lysander, defeated by Conon, the Athenian commander, near Cnidus; Lysander killed in an engagement	—
Establishment of two kings, Eurysthenes and Procles, by their father, Aristodemus	1102	The Thebans drive the Spartans from Cadmea. <i>Leaglet</i>	378
Rule of Lycurgus, who establishes the senate, and enacts a code of laws. <i>Eusebius</i>	881-384	The Spartans lose the dominion of the seas; their fleet totally destroyed by Timotheus	376
Charilaus declares war against Polymnestor, king of Arcadia	848	The Spartans defeated at Leuctra	371
Alcemenes, known by his apophthegms, makes war upon the Messenians	813	Epaminondas, heading 50,000 Thebans, appears before Sparta	369
Niander succeeds his father, Charilaus; war with the Argives	800	Battle of Mantinea: the Thebans obtain the victory. See <i>Mantineia</i> .	362
Theopompus introduces the Ephori into the government	about 760	Pyrrhus invades Sparta; is defeated before the walls	294
War declared against the Messenians, and Amphip taken	743	Agis endeavours to revive the laws of Lycurgus	244
War with the Argives, and celebrated battle*	735	Leonidas vacates the throne, and dies from Sparta	243
The Progeny of the Parthenie, the sons of Virgins	733	He is recalled, and becomes sole sovereign; Agis put to death	241
Battle of Ithome	730	Reign of Cleomenes III. the son of Leonidas	236
Ithome taken; the Messenians become vassals to Sparta, and the war ends, which had lasted nineteen years	724	He re-establishes most of the laws of Lycurgus.	225
Conspiracy of the Parthenii with the Helots to take Sparta	707	Antigonus meets Cleomenes on the plains of Sellasia, routs his army, and enters Sparta as conqueror	222
The Parthenii colonise Tarentum	706	Cleomenes retires to Egypt	—
The Messenians revolt, and league with Elis, Argos, and Arcadia, against the Lacedæmonians. [This war lasts fourteen years.]	685	The Spartans murder the Ephori	221
Carnian festivals instituted	675	Maechanidas ascends the throne, and abolishes the Ephori	210
The Messenians settle in Sicily	669	He is defeated and slain by Philipæmen, prætor of the Achean league	206
The states of Greece unite against the Persians	482	Government of Nabis, execrable for his cruelties	—
Leonidas, at the head of 300 Spartans, withstands the Persian arms at the defile of Thermopylae. (See <i>Thermopylae, Battle of</i>)	480	The Romans besiege Sparta, and the tyrant sues for peace	197
Persians defeated by Pausanias	479	The Ætolians obtain Sparta by treachery: Nabis is assassinated	192
He is put to death for treason; the Grecian armies choose an Athenian general	472	The laws of Lycurgus abolished	188
An earthquake at Sparta destroys thirty thousand persons; rebellion of the Helots	466	Sparta, under the protection or rather subjugation of Rome, retains its authority for a short time	147
Plataea taken by the Spartans	428		
The Spartans, under Agis, enter Attica, and lay waste the country	426	Taken by Mahomet II.	A.D. 1460
Agis (king 427) gains a great victory over the Argives and Mantineaans	418	Burnt by Sigismund Malatesta	1463
The Lacedæmonian fleet, under Mindarus,		Rebuilt as Misitra; it is now called Sparta, and is part of the kingdom of Greece (1862).	

* This celebrated battle was fought between 300 select heroes of each nation, and all perished except two Argives and one Spartan. The latter remained on the field, whilst the two former repaired to Argos to announce their victory. Each party claimed the advantage; the Argives because they had lost the fewest men; the Lacedæmonians, because they remained masters of the field. A second battle was fought, in which the Argives were beaten. *Pausanias*.

SPARTACUS'S INSURRECTION. He was a noble Thracian, who served in an auxiliary corps of the Roman army. Having deserted and been apprehended, he was reduced to slavery and made a gladiator. With some companions he made his escape, collected a body of slaves and gladiators, 73 B.C.; ravaged Southern Italy; and defeated the Roman forces under the consuls sent against him. Knowing the impossibility of successfully resisting the republic, he endeavoured to conduct his forces into Sicily, but on the way was defeated and slain by Crassus, 72 B.C.

SPEAKERS OF THE HOUSE OF COMMONS. Peter de Montfort, afterwards killed at the battle of Evesham, was the first speaker, 45 Hen. III. 1260; but sir Petre de la Mare is supposed to have been the first regular speaker, 50 Edw. III. 1376. The king refused his assent to the choice of sir Edward Seymour, as speaker, March 6, 1678; when serjeant William Gregory was chosen in his room. Sir John Trevor was expelled the chair and the house for taking a gratuity after the act for the benefit of orphans had passed, March 20, 1694.

RECENT SPEAKERS.

1801. Henry Addington (aft. visct. Sidmouth) Jan. 22.
— Sir John Mitford (aft. baron Redesdale) Feb. 11.
1802. Charles Abbot (aft. lord Colchester), Feb. 10.
1817. Charles Manners Sutton (aft. visct. Canterbury), June 2.

1835. James Abercromby (aft. baron Dunfermline), Feb. 19.
1839. Charles Shaw Lefevre (aft. visct. Eversley), May 27.
1857. John Evelyn Denison April 30 (PRESENT speaker, 1862).

SPEAKING-TRUMPET, used by ships at sea. One is said to have been used by Alexander, 335 B.C. One was constructed from Kircher's description by Saland, 1652. Philosophically explained and brought into notice by Moreland, 1671.

SPECIES. Much controversy amongst naturalists arose in consequence of the publication, in 1859, of Mr. Charles Darwin's "Origin of Species," in which he suggests that all the various species of animals were not created at one time, but have been gradually developed by what he terms "natural selection," and the struggle for life of the strong against the weak. In accordance with his theory, man himself may have been derived from a monad or primordial germ.

SPECTACLES, unknown to the ancients, are generally supposed to have been invented by Alexander de Spina, a monk of Florence, in Italy, about A.D. 1285. According to Dr. Plott, they were invented by Roger Bacon, about 1280. Mr. Manni gives proof in favour of Salvino being the inventor, in his Treatise.

SPECTATOR. The first number of this periodical appeared on March 1, 1711; the last Aug. 2, 1715. The papers by Addison have one of the letters CLIO at the end. The most of the other papers are by sir Richard Steele; a few by Hughes, Budgell, Eusden, Miss Shephard, and others.—The Spectator newspaper began in 1828.

SPECTRUM, the term given to the image of the sun or any other luminous body formed on a wall or screen, by a beam of light received through a small hole or slit and refracted by a prism. The colours thus produced are red, orange, yellow, green, blue, indigo, and violet. The discovery was made by Newton, whose "Optics" were published in 1704. Several of these colours are considered to be compounds of three primary ones, according to Mayer (1775), red, yellow, and blue; according to Young (1801), red, green, and violet; according to Clerk Maxwell (1860), red, green, and blue.* The colour of a flame varies according to the substance producing it or introduced into it; so the spectrum is found to vary also. This has led to the invention of a method of chemical analysis by professors Bunsen and Kirchhoff (1860), by which they have discovered two new metals, and have even drawn some conclusions as to the nature of the sun's atmosphere, by comparing the solar spectrum with that produced by flames into which iron, sodium, and other substances have been introduced.

SPHERES. The celestial and terrestrial globes, and also sun-dials, are said to have been invented by Anaximander, 552 B.C.; and the armillary sphere by Eratosthenes, about 225 B.C. The planetarium was constructed by Archimedes before 212 B.C. Pythagoras maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortals, which he called the music of the spheres.

SPINNING. The art was ascribed by the ancients to Minerva, the goddess of wisdom, such was their veneration for it. Arcas, king of Arcadia, taught his subjects the art of spinning about 1500 B.C. Lucretia with her maids was found spinning, when her husband Collatinus paid a visit to her from the camp. The wife of Tarquin was an excellent spinner; and a garment made by her, worn by Servius Tullius, was preserved in the temple of Fortune.

* *Fraunhofer's Lines.* In 1802 Dr. Wollaston observed several dark lines in the solar spectrum; 1815 Joseph Fraunhofer not only observed them but constructed a map of them, giving 590 lines or dark bands. By the researches of Brewster and others the number observed has reached above 2000.

Augustus Cæsar usually wore no garments but such as were made by his wife, sister, or daughter. The spinning-wheel was invented at Brunswick, about A.D. 1530. Till 1767, the spinning of cotton was performed by the hand spinning-wheel, when Hargreaves, an ingenious mechanic, near Blackburn, made a spinning jenny, with eight spindles. Hargreaves also erected the first carding-machine, with cylinders. Arkwright's machine for spinning by water was an extension of the principle of Hargreaves; but he also applied a large and small roller to expand the thread, and, for this ingenious contrivance, took out a patent in 1769. At first he worked his machinery by horses; but in 1771 he built a mill on the stream of the Derwent, at Cromford. In 1774-9, Crompton invented the mule (*which see*), a wonderful improvement in this art. *Phillips.*

SPIRES (in Bavaria). The emperors held many diets at Spire since 1309, and it was the seat of the Imperial chamber till 1688, when the city was burnt by the French, and not rebuilt till after the peace of Ryswick, in 1697. The diet to condemn the reformers was held at Spire, called there by the emperor Charles V. 1529. See *Protestants*.

SPIRIT-RAPPING, &c. Spiritual manifestations (so called) began it is said in America, about 1848, and attracted attention in this country about 1851, in the shape of table-turning, &c. Many inquisitive or credulous persons visited Mr. Hume and Mr. Forster, noted "spiritual mediums."

SPIRITS. See *Distillation*. In all nations spirituous liquors have been considered as a proper subject of heavy taxation for the support of the state.

In 1840 England made about ten millions of gallons of spirits, Scotland about seven millions of gallons, and Ireland about nine millions of gallons.

In 1851 the number of gallons on which duty was paid for home consumption was 23,976,596. The total amount paid was £6,177,218*l.*, of which 3,758,186*l.* were paid by England, 1,252,297*l.* by Scotland, and 1,006,735*l.* by Ireland. The total duty on home consumption paid in 1853 was £6,760,422*l.*

In 1858, 9,195,154*l.* was paid as duty on 27,370,934 gallons.

In 1855, *methylated spirits* of wine, for use in the arts and sciences, were made duty free.

In 1850, 27,657,721 gallons of spirits were distilled in the United Kingdom. The uniform duty of 8*s.* per gallon was paid on 24,254,403 gallons for home consumption, producing 9,701,764*l.*

In 1861 an act was passed repealing wholly or in part 26 previous acts, and embodying all regulations for the guidance of manufacturers and dealers in spirits.

SPIITALFIELDS (East London). Here the French protestant refugees settled and established the silk manufacture in 1685. In consequence of commercial changes the weavers endured much distress about 1829.

SPITZBERGEN, an archipelago in the Arctic ocean, discovered in 1553, by sir Hugh Willoughby, who called it Greenland, supposing it to be a part of the western continent. In 1595 it was visited by Barentz and Cornelius, two Dutchmen, who pretended to be the original discoverers, and called it Spitzbergen, or sharp mountains, from the many sharp pointed and rocky mountains with which it abounds. See *Phippa*.

SPORTS, BOOK OF. The first "Book of Sports," under the title of "The King's Majesty's Declaration to his Subjects concerning Lawful Sports to be used" (viz. on Sundays after evening prayers) was published by king James I. May 24, 1618. The second "Book of Sports," with a ratification by his majesty Charles I. is dated Oct. 18, 1633. On the publication of the first "Book of Sports," there arose a long and violent controversy among English divines on certain points. See *Sabbatarians*, *Sunday*, &c. The book was ordered to be burnt by the hangman and the sports were suppressed by the parliament.

SPRINGFIELD (Missouri), near which was fought the desperate battle of Wilson's Creek, in which the federals had the advantage over the confederates, but lost their brave general Nathaniel Lyon, Aug. 10, 1861.

SPURS. Anciently the difference between the knight and esquire was, that the knight wore gilt spurs (*equus auratus*) and the esquire silver ones. Two sorts of spurs seem to have been in use at the time of the conquest, one called a pryck, having only a single point, the other a number of points of considerable size. Spurs nearly of the present kind came into use about A.D. 1400. See *Plating*.

***SPURS, BATTLE OF**. Henry VIII. of England, the emperor Maximilian, and the Swiss, in 1513, entered into an offensive alliance against France. Henry VIII. landed at Calais in the month of July, and soon formed an army of 30,000 men, counting his own troops. He was joined by the emperor with a good corps of horse and some foot. The emperor was so mean as to act as a *mercenary* to the king of England, who allowed him a hundred ducats a day for his table! They invested Terouëne with an army of 50,000 men; and the duc de Longueville, marching to its relief, was signally defeated on the 16th of August, at Guinegate. This battle was called the battle of *Spurs*, because the French used their spurs more

than they did their *swords*. The English king laid siege to Tournay, which submitted in a few days. *Hénault*. See *Courtrai*, for another "battle of spurs."

STADE DUES. At a castle near the town of Stade, in Hanover, certain dues are charged by the Hanoverian government on all goods imported into Hamburg. The British government settled these dues in 1844; and they were resisted by the Americans in 1855. Negotiations on the subject began in 1860, and the dues were abolished in June, 1861. Great Britain paid 160,000*l.* as her share of the compensation.

STADTHOLDER. See *Holland*.

STAFF COLLEGE (Sandhurst), for providing an education to qualify military officers for the duties of the staff. The foundation stone was laid by the duke of Cambridge, on Dec. 14, 1859.

STAGE-COACHES. So called from the stages or inns at which the coaches stopped to refresh and change horses. *Bailey*. The stage-coach duty act passed in 1785. These coaches were made subject to salutary provisions for the safety of passengers, in 1809; to mileage duties, 1814. See *Mail Coaches*, &c.

STAMP-DUTIES, first instituted in 1671. They were re-enacted 1694, when a duty was imposed upon paper, vellum, and parchment. The stamp-duty on newspapers was commenced in 1713, and every year added to the list of articles upon which stamp-duty was made payable.

The American Stamp Act, a memorable statute, one of those imposts levied by the Parliament of Great Britain, which led to the American war, and the independence of that country, passed March 22, 1765. It was repealed in 1766. Stamp duties in Ireland commenced in 1774. Stamps on notes and bills of exchange in 1782. The stamp-duties produced in England, in 1800, a revenue of 3,126,531*l.* Many alterations made in 1853 and 1857. In June, 1855, the stamp-duty on newspapers as

such was totally abolished: the stamp on them being henceforth for postal purposes only.

In July and Aug. 1854, 29,175,000 newspaper stamps were issued; in the same months, 1855, only 6,875,000. Drafts on bankers to be stamped. 1858. Additional stamp duties were enacted in 1860 (on leases, bills of exchange, dock warrants, extracts from registers of births, &c.); in 1861 (on leases, licences to house agents, &c.).

AMOUNT OF STAMP DUTIES RECEIVED IN THE UNITED KINGDOM:

1840	£6,726,817	1850	£6,558,332	1859	£7,752,592
1845	7,720,683	1855	6,805,605	1861	8,307,287

STANDARD. First fixed by the law for gold and silver in England, A.D. 1300. Standard gold is 22 parts out of 24 of pure gold, the other two parts or carats being silver or copper. The standard of silver is 11 oz. 2 dwts. of fine silver alloyed with 18 dwts. of copper, or 37 parts out of 40 pure silver, and 3 parts copper. In 1300 these 12 oz. of silver were coined into 20 shillings; in 1412 they were coined into 30 shillings; and in 1527, into 45 shillings. In 1545, Henry VIII. coined 6 oz. of silver and 6 oz. of alloy into 48 shillings; and the next year he coined 4 oz. of silver and 8 oz. of alloy into the same sum. Elizabeth, in 1560, restored the old standard in 60 shillings; and in 1601 in 62 shillings. It is now 66 shillings. The average proportions of silver to gold at the royal mint are 154 to 1. The standard of plate and silver manufactures was affirmed, 6 George I. 1719 *et seq.* See *Gold and Coinage*. **BATTLE OF THE STANDARD.** See *Northallerton*.

STANDARD MEASURES. In the reign of Edgar a law was made to prevent frauds arising from the diversity of measures, and for the establishment of a legal standard measure to be used in every part of his dominions. The standard vessels made by order of the king were deposited in the city of Winchester, and hence originated the well-known term of "Winchester measure." The bushel so made is still preserved in the guildhall of that city. Henry I. also, to prevent frauds in the measurement of cloth, ordered a standard yard of the length of his own arm to be made and deposited at Winchester, with the standard measures of king Edgar. The Guildhall contains the standard measures of succeeding sovereigns. *Camden*.—The standard weights and measures were settled by parliament in 1824. The pound troy was to be 5760 grains, and the pound avoirdupois 7000 grains. The "Standard yard of 1760," in the custody of the clerk of the house of commons, was declared to be the Imperial Standard yard, and the unit of measures of extension. This standard having been destroyed by the fire in 1834, a new commission was appointed to reconstruct it, and researches for this purpose, in conformity with the act, which directed the comparison of the standard with a pendulum vibrating seconds of time in the latitude of London, were begun by Francis Bailey (died in 1844), continued by the rev. R. Sheepshanks till his death in 1855, and completed by G. B. Airy, astronomer royal. In 1855 was passed "an act for legalising and preserving the lost standards of weights and measures."

STANDARDS. See *Banners, Flags, &c.* The practice in the army of using a cross on standards and shields arose in the asserted miraculous appearance of a cross to Constantine, previously to his battle with Maxentius; Eusebius says that he received this statement from the emperor himself, A.D. 312. For the celebrated French standard, see *Auriflamme*.—**STANDARD OF MAHOMET**; on this ensign no infidel dared look. It was carried in procession about 1768, when several hundred Christians, who ignorantly looked upon it, were massacred by the Turkish populace.—The British IMPERIAL STANDARD was first hoisted on the Tower of London, and on Bedford Tower, Dublin, and displayed by the Foot Guards, on the union of the kingdoms, Jan. 1, 1801.

STANNARY COURTS of Devon and Cornwall for the administration of justice among the tin miners, whose privileges were confirmed by 33 Edw. I. 1305. They were regulated by parliament in 1641 and 1855.

STAR-CHAMBER, COURT OF. So called haply from its roof being garnished with stars. *Coke*. This court of justice, so tremendous in the Tudor, and part of the Stuart reigns, was called Star-Chamber, not from the stars on its roof (which were obliterated even before the reign of queen Elizabeth), but from the *Starra*, or Jewish covenants, deposited there by order of Richard I. No star was allowed to be valid except found in those repositories, and here they remained till the banishment of the Jews by Edward I. The court was instituted 2 Hen. VII. 1486, for trials by a committee of the privy council, which was in violation of Magna Charta; as it dealt with civil and criminal causes unfettered by the rules of law. In Charles I.'s reign (1634-37), it exercised its power upon several bold innovators in liberty, who only gloried in their sufferings, and contributed to render government odious and contemptible. It was abolished in 1641. There were in this court from 26 to 42 judges, the lord chancellor having the casting voice.

STARCH is a sediment produced at the bottom of vessels wherein wheat has been steeped in water; it is soft and friable, easily broken into powder, and is used to stiffen and clear linen, with blue; its powder is employed to powder the hair. The art of starching linen was brought into England by Mrs. Dingheim, a Flemish woman, 1 Mary, 1553. *Stow*. Patents for obtaining starch from other substances have been taken out: from potatoes by Samuel Newton and others in 1707; from the horse-chestnut by Wm. Murray in 1796; from rice by Thomas Wickham in 1823; from various matters by Orlando Jones in 1839-40.

STAR OF INDIA, a new order of knighthood for India, established in 1861 and gazetted June 25.*

STARS, THE FIXED. They were classed into constellations, it is supposed, about 1200 B.C. Hicetas, of Syracuse, taught that the sun and the stars were motionless, and that the earth moved round them, about 344 B.C. (this is mentioned by Cicero, and perhaps gave the first hint of this system to Copernicus). Job, Hesiod, and Homer mention several of the constellations. The Royal Library at Paris contains a Chinese chart of the heavens, made about 600 B.C. in which 1460 stars are correctly inserted. The aberration of the stars were discovered by Dr. Bradley, 1727. See *Astronomy* and *Solar System*. Maps of the stars were published by the Society for the Diffusion of Knowledge in 1839, and a set of Celestial Maps, issued under the superintendence of the Royal Prussian Academy, was completed in 1859.

STATE PAPER OFFICE was founded in 1578. In 1857 began the publication of Calendars of State Papers, which will be invaluable to future historians.

STATES-GENERAL OF FRANCE. An ancient assembly of France, first met, it is said, in 1302 to consider the exactions of the pope. Previously to the Revolution, it had not met since A.D. 1614. The states consisted of three orders, the nobility, clergy, and commons. They were convened by Louis XVI. and assembled at Versailles, May 5, 1789. Here a contest arose, whether the three orders should make three distinct houses, or but one assembly. The commons insisted upon the latter, and, assuming the title of the National Assembly, declared that they were competent to proceed to business, without the concurrence of the two other orders, if they refused to join them. The nobility and clergy found it expedient to concede the point, and they all met in one hall. See *National Assembly*.

STATES OF THE CHURCH. See *Pope* and *Rome*.

STATIONERS. Books and papers were formerly sold only at stalls, hence the dealers were called stationers. The company of stationers of London is of great antiquity, and

* It comprises the sovereign, the grand master, 25 knights (Europeans and natives), and extra or honorary knights, such as the prince consort, the prince of Wales, &c. The queen invested several knights on Nov. 1, 1861.

existed long before printing was invented, yet it was not incorporated until 3 Philip & Mary, 1555. Their old dwelling was in Paternoster-row. *Mortimer*.

STATISTICS, defined as the science of figures applied to life, is stated to have been founded by sir Wm. Petty, who died in 1687. The term is said to have been invented by professor Achenwall of Göttingen in 1749. A statistical society began at Manchester in 1833; and the Statistical Society of London, which publishes a quarterly journal, was established in 1834; similar societies have been established on the continent. International Statistical Congresses are now held occasionally. The 1st at Brussels, in 1853; 2nd at Paris, 1855; 3rd at Vienna, 1857; 4th at London, under the presidency of the prince consort, July 16-21, 1860.

STATUES. See *Sculpture*, &c. Phidias, whose statue of Jupiter passed for one of the wonders of the world, was the greatest statuary among the ancients, 440 B.C. He had previously made a statue of Minerva at the request of Pericles, which was placed in the Parthenon. It was made of ivory and gold, and measured 39 feet in height. Acilius raised a golden statue to his father, the first that appeared in Italy. Lysippus invented the art of taking likenesses in plaster moulds, from which he afterwards cast models in wax, 326 B.C. Michael Angelo was the greatest artist among the moderns. The first equestrian statue erected in Great Britain was that of Charles I. in 1678.* By 17 & 18 Vict. c. 10 (July 10, 1854), public statues are placed under the control and protection of the Board of Works. Among the public statues erected in the London squares and other public places are the following:—

Achilles, Hyde-park, in honour of the duke of Wellington, by the ladies of Great Britain, June 18, 1822	Mavelock, sir H., Trafalgar-square	1861
Anne, queen, St. Paul's Church-yard	Howard, John; first erected in St. Paul's	1796
Bedford, duke of, Russell-square	Jenner, Edward, Trafalgar-square, 1858; removed to Kensington-gardens	1862
Canning, George, New Palace-yard	James II. Whitehall	1687
Cartwright, major, Burton Crescent	Myddelton, sir Hugh, Islington	1862
Charles I. Charing Cross	Napier, gen. sir Charles J., Trafalgar-square	1856
Charles II. Soho-square	Nelson, Trafalgar-square	1843
Cumberland, duke of, Cavendish-square	Pitt, William, Hanover-square	1831
Elizabeth, queen, St. Dunstan's, Fleet-street	Peel, sir Robert, Cheapside	1855
Fox, Charles James, Bloomsbury-square	Richard Cœur de Lion, near Westminster abbey	1860
George I. Grosvenor-square	Wellington, duke of, Royal Exchange	1844
George I. Leicester-square	Wellington, duke of, arch, Hyde-park corner	1846
George III. Somerset-house	William III. St. James's-square	1717
George III. Cockspur-street	William IV. King William-street	1845
	York, duke of, Waterloo-place	1834

STATUTES. See *Acts of Parliament*, *Clarendon*, *Merton*, &c.

STEAM CARRIAGE (for ordinary roads), invented by the earl of Caithness, was said to be successful in 1860. It travels over rough roads at the rate of 8 miles an hour, at a cost of less than 1d. per mile. His lordship made a journey of 140 miles in two days.

STEAM-ENGINE AND NAVIGATION. The steam-engine is noticed by the marquess of Worcester, in his *Century of Inventions*, as "a way to drive up water by fire," A.D. 1663. See *Railways*.

Solomon de Caus, a French protestant, publishes a work which Arago (it is thought from insufficient grounds) considers to have contained the germs of the steam-engine	Watt's expansion engine	1778
Papin's digester invented	Double-action engines proposed by Dr. Falek on Newcomen's principle	1779
Captain Savery's engine constructed for raising water	Watt's double-engine, and his first patent for it granted	1781
Papin's engine exhibited to the Royal Society about	The marquess Jouffroy constructed an engine on the Saône	1785
Atmospheric engine by Savery and Newcomen	Two Americans published a work upon the steam-engine	1785
First idea of steam navigation set forth in a patent obtained by Jonathan Hulls	W. Symington made a passage on the Forth and Clyde canal	1789
Watt's invention of performing condensation in a separate vessel from the cylinder	First steam-engine erected in Dublin by Henry Jackson	1791
His first patent	First experiment with steam navigation on the Thames	1801
His engines upon a large scale erected in manufactories, and his patent renewed by act of parliament	The experiment of Mr. Symington repeated with success	1802
Thomas Paine proposes the application of steam in America	Trevethick's high-pressure engine	—
Engines made to give a rotary motion	Woolf's double cylinder expansion engine constructed	1804
	Manufactories warmed by steam	1806

* This statue is of brass, cast by Le Sueurs, in 1633, at the expense of the Howard-Arundel family. During the civil war, the parliament sold it to John River, a brazier, in Holborn, with strict orders to break it to pieces; but he concealed it underground till the Restoration, when it was erected, in 1678, on a pedestal executed by Grinlin Gibbons. The first equestrian statue of bronze, founded at one cast, was that of Louis XIV. of France, A.D. 1699; it was elevated on Oct. 1724.

STEAM-ENGINE, *continued.*

Fulton's steam-boat on the Seine, Aug. 9, 1803; at New York 1806
 Fulton started a steam-boat on the river Hudson, America. 1807
 Steam power to convey coals on a railway, employed by Blenkinsop. 1811
 The *Comet* built by H. Bell, plies on the Clyde, Jan. 1812
 Steam applied to printing in the *Times* office. See *Press* 1814
 There were five steam-vessels in Scotland (*Parl. Returns*) —
 First steam-vessel on the Thames brought by Mr. Dodd from Glasgow 1815
 First steamer built in England (*Parl. Returns*). —
 The *Savannah* steamer, of 350 tons, came from New York to Liverpool in 26 days July 15, 1819
 First steamer in Ireland 1820
 Steam-gun invented by Perkins. 1824
 Steam-jet applied 1825
 Captain Johnson obtained 10,000*l.* for making the first steam voyage to India, in the *Enterprize*, which sailed from Falmouth. Aug. 16, —
 The locomotive steam-carriages on railways, at Liverpool. Oct. 1829

The railway opened. See *Liverpool*. 1830
 Peninsular and Oriental Steam Company formed 1836
 The *Great Western* arrives from Bristol at New York, being her first voyage in 18 days, June 17, 1838
 War-steainers built in England —
 War-steainers built at Birkenhead, named the *Nemesis* and *Phlegethon*, carrying each two thirty-two pounders, sent by government to China May 20, 1840
 The Cunard steamers began to sail 1840
 The Collins steamers began 1850
 The *Pacific* crosses the Atlantic in 9 days, 19 hours, 25 minutes, arriving at Holyhead, Dec. 29, —
 Steam packets leave Galway for America 1853
 The merits of an attacking vessel termed a *steam ram* advocated by sir G. Sartorius, were discussed in 1859-60
 An iron-plated frigate, *La Gloire*, completed in France. See *Navy, French*. 1860
 The *Warrior*, an iron-plated vessel, launched, Dec. 29, —

See *Navy and Shipping*.

STEAM VESSELS BELONGING TO THE BRITISH EMPIRE AT THE FOLLOWING PERIODS.

Year.	England.	Scotland.	Ireland.	Dependencies.	Total.
1814	0	3	0	1	6
1815	3	5	0	2	10
1820	17	14	3	9	43
1825	112	36	3	17	168
1830	203	61	31	20	315
1835	344	85	68	48	545
1845	694	139	79	89	1001
1850	Belonging to the United Kingdom				1181

	Long.	Broad.		Long.	Broad.
Great Western	236 feet	35 feet	Persia	390 feet	45 feet
Duke of Wellington.	240 feet	60 feet	Great Eastern*	692 feet	85 feet
British Queen	275 feet	61 feet	<i>Horse Power</i> :—Paddles 1000; Screw, 1600;		
Great Britain	322 feet	51 feet	<i>Weight</i> of ship, &c., 12,000 tons; ordinary		
Himalaya	370 feet	43 feet	light draught 12,000 tons.		

STEAM HAMMER. This highly useful machine was invented by Mr. James Nasmyth in 1838, and patented by him in 1842. The main feature in the construction of the steam-hammer is, the absolutely direct manner by which the elastic power of steam is employed to lift up and let fall the mass of iron which constitutes the hammer, which mass or block of iron is attached direct to the end of a piston-rod passing through the bottom of an inverted steam cylinder placed immediately over the anvil. The vast range and perfect control over the power of the blows enable the largest or smallest forge-work to be executed by the same steam-hammer.† In 1842, Mr. Nasmyth applied his steam-hammer to driving piles, which

* The *Great Eastern*—for a short time only (in 1857-8) called *Leviathan*—was designed by Mr. I. K. Brunel (who died Sept. 15, 1859), and built by Messrs. Scott Russell and Co., at Millwall. Its launching lasted from Nov. 3, 1857, to Jan. 31, 1858. The capital subscribed having been all expended, a new company was formed to fit her for sea. On Sept. 7, 1859, she left her moorings at Deptford for Portland-roads. On the voyage an explosion took place (off Hastings), through some neglect in regard to the casing of one of the chimneys, when ten firemen were killed, and many persons were seriously injured. After repairs she sailed to Holyhead, arriving there Oct. 10; she endured the storm of Oct. 25-26 well; and proceeded to Southampton for the winter, Nov. 4.—She was constructed to convey 5000 persons from London to Australia, a distance of 22,500 miles; with accommodation for 800 1st class passengers; 2000 and class; and 1200 3rd class. Her able captain (Harrison) was drowned in the Solent, Jan. 22, 1860, deeply regretted. She sailed for New York, June 17, under command of Captain Vine Hall, and arrived there June 28th. After being exhibited she left New York Aug. 16, and returned to England Aug. 26. Owing to a lawsuit in April, the ship came into the hands of sheriff's officers, but was released and sailed for New York on May 1, 1861. On Sept. 12, 1861, she suffered much loss through a violent gale. In 1862 she performed several voyages to and from New York; but on Aug. 1862, ran on a rock near Long Island, and injured her bottom.

† It is now employed in every country where the working of malleable iron is carried on. Owing to the vast range of power possessed by the steam-hammer, forged iron-work can now by its means be executed on a scale, and for a variety of purposes, with such ease and perfection as could not have been possible by the means previously existing. Parts of the most gigantic marine steam-engines, anchors, and Armstrong guns, as well as the most minute details of machinery, as in Enfield rifles, are now executed by the steam-hammer.

invention has importantly assisted in the execution of every great public work in which pile-driving has been required.

STEAM-RAM (to be used in naval warfare), was invented by Mr. James Nasmyth in 1836, and communicated to the Admiralty in 1845.

STEARINE (from *stear*, suet), that part of oils and fats which is solid at common temperatures. The nature of these substances was first made known by Chevreul, in 1823, who showed that they were compounds of peculiar acids, with a base termed *glycerine*; of these compounds the chief are stearine, margarine, and elaine (from *elaion*, oil).

STEEL, metal, a compound of iron and carbon, exists in nature, and has been largely fabricated from the earliest times. A manufactory for cast steel is said to have been set up by Benjamin Huntsman at Handsworth, near Sheffield, in 1740. The manufacture of shear steel began at Sheffield about 1800. German steel was made at Newcastle previously by Mr. Crawley. The invention of Mushat (1800) and Lucas (1804) were important steps in this manufacture. See *Engraving*. In 1856, Mr. H. Bessemer made steel by passing cold air through liquid iron; in 1859, tungsten steel was made in Germany; and in 1861, M. Freny made steel by bringing red-hot iron in contact with carbonate of ammonia. He considers steel to be a compound of iron and nitrogen. In 1860, much attention was excited by cutlery made from a metallic sand, brought from Taranaki or New Plymouth, in New Zealand.

STEEL PENS. "Iron pens" are mentioned by Chamberlayne in 1685. Steel pens came into use about 1820, when the first gross of three-slit pens was sold wholesale for 7½ *ds*. In 1830, the price was 8*s*., and in 1832, 6*s*. A better pen is now sold for 6*d*. a gross; the cheapest sort at 2*d*.; Birmingham produces about 1000 million pens per annum (1858). Women and children are principally employed in the manufacture.

STEEL-YARD. An ancient instrument, the same that is translated *balance* in the Pen tateuch. The *Statera Romana*, or Roman steel-yard, is mentioned in 315 B.C.—The **STEEL-YARD COMPANY**, London merchants, who had the steel-yard assigned to them by Henry III. A.D. 1232, were Flemings and Germans, and the only exporters, for many years after, of the staple commodities of England. *Anderson*. The company lost its privileges in 1551.

STEENKIRK. See *Enghein*.

STENOGRAPHY (from *stenos*, narrow), the art of writing in short-hand, said to have been practised by most of the ancient nations, and to have followed from the hieroglyphics of the Egyptians. Its improvement is also attributed to the poet Ennius, to Tyro, Cicero's freed-man, and still more to Seneca. The *Ars Scribendi Characteris*, written about A.D. 1412, is the oldest system extant. Peter Bales, the famous penman, published on stenography in 1590; and John Willis published his "*Stenographie*" in 1602. There are now numerous systems. Byrom's (1750), Gurney's (1753), Taylor's (1786), Pitman's (phonographic, 1857).

STEPHEN'S CHAPEL, ST., Westminster. The commons of England held their assemblies in this chapel, which was built by king Stephen, and dedicated about 1135. It was rebuilt by Edward III. in 1347, and by him made a collegiate church, to which a dean and twelve secular priests were appointed. Soon after its surrender to Edward VI., about 1548, it was applied to the use of parliament. See *Parliament*. It was destroyed by fire, Oct. 16, 1834. The Society of Antiquaries published memorials of it about 1810; and Mr. Mackenzie's work appeared in 1844.

STEREOCHROMY, a mode of painting in which water-glass (an alkaline solution of flint, silic) serves as the connecting medium between the colour and the substratum. Its invention is ascribed to Von Fuchs, who died at Munich on March 5, 1856. Fine specimens of this art by Kaubach and Echter exist in the Museum at Berlin, and also at Munich.

STEREOMETER. The instrument by which is compassed the art of taking the contents of vessels of liquids by guaging, invented about A.D. 1350. *Anderson*. M. Say's stereometer, for determining the specific gravity of liquids, porous bodies, and powders as well as solids, was described in 1797.

STEREOSCOPE (from *stereos*, solid, and *skopein*, to see), an optical instrument for representing in apparent relief natural objects, &c., by uniting into one image two plane representations of these objects as seen by each eye separately. The first stereoscope by reflection was constructed and exhibited by professor Charles Wheatstone in 1838, who announced its principle in 1833. Since 1854, stereoscopes have been greatly improved.

STEREOTYPE (a cast from a page of moveable printing-types). It is said that stereotyping was known in 1711. It was practised by Wm. Ged of Edinburgh, about 1730. Some

of Ged's plates are in the Royal Institution, London. A Mr. James attempted to introduce Ged's process in London, but failed, about 1735. *Nichols*. Stereotype printing was in use in Holland, in the last century; and a quarto Bible and Dutch folio Bible were printed there. *Phillips*. It was revived in London by Wilson, in 1804. Since 1850 the durability of stereotypes has been greatly increased by electrotyping them with copper.

STEWARD OF ENGLAND, LORD HIGH. The first great officer of the crown. This office was established prior to the reign of Edward the Confessor, and was formerly annexed to the lordship of Hinckley, Leicestershire, belonging to the family of Montfort, earls of Leicester, who were, in right thereof, lord high stewards of England; but Simon de Montfort, the last earl of this family, having raised a rebellion against his sovereign Henry III., was attainted, and his estate forfeited to the king. That prince in a great measure abolished the office A.D. 1265. It is now revived only *pro hac vice*, at a coronation, or the trial of a peer. The first afterwards appointed was Thomas, second son of Henry IV. The first for the trial of a peer was Edward, earl of Devon, on the arraignment of the earl of Huntingdon, in 1400. The last, lord Denman at the trial of the earl of Cardigan, Feb. 16, 1841. The duke of Hamilton was lord high steward at the coronations of Will. IV. and Victoria.

STEWARD OF THE HOUSEHOLD, LORD (an ancient office), has the sole direction of the king's house below-stairs; he has no formal grant of his office, but receives his charge from the sovereign in person, who, delivering to him a white wand, the symbol of his office, says, "*Seneschal, tenez le baton de notre maison.*" This officer has been called lord steward since A.D. 1540; previously to the 31st of Henry VIII., he was styled grand master of the household. His function as a judge was abolished in 1849.

STIRRUPS were unknown to the ancients. Gracchus fitted the highways with stones to enable the horsemen to mount. Warriors had projections on their spears for the same purpose. Stirrups were used in the fifth century, but were not common even in the twelfth.

STOCKHOLM, capital of Sweden, was fortified by Berger Jarl in 1254. Here the Swedish nobility was massacred by Christian II. in 1528.

Peace of Stockholm, between the King of Great Britain and the queen of Sweden, by which the former acquired the duchies of Bremen and Verden as elector of Brunswick, Nov. 20, 1719

Treaty of Stockholm, between Sweden and Russia, in favour of the duke of Holstein-Gottorp March 24, 1724
Another between England and Sweden, Mar. 3, 1813

STOCKINGS of silk were first worn by Henry II. of France, 1547. In 1560 queen Elizabeth was presented with a pair of knit black silk stockings, by her silk-woman, Mrs. Montague, and she never wore cloth ones any more. *Howell*. He adds, "Henry VIII. wore ordinary cloth hose, except there came from Spain, by great chance, a pair of silk stockings; for Spain very early abounded with silk." Edward VI. was presented with a pair of Spanish silk stockings by his merchant, sir Thomas Gresham; and the present was then much taken notice of. *Idem*. Others relate that William Rider, a London apprentice, seeing at the house of an Italian merchant a pair of knit worsted stockings from Mantua, made a pair like them, the first made in England, which he presented to the earl of Pembroke, 1564. *Stow*. The art of weaving stockings in a frame was invented in England by the rev. Mr. Lee, of Cambridge, in 1589, twenty-five years after he had learnt to knit them with wires or needles. Cotton stockings were first made in 1730. See *Cotton*.

STOCKPORT, in Cheshire, has become eminent on account of the cotton trade. Heaton Norris, in Lancashire, is united to it by a bridge over the river. Here the Manchester blanketeers were dispersed, March 11, 1817; and here was a serious religious riot, when two Roman Catholic chapels were destroyed, and the houses of many Roman Catholics were gutted, and their furniture and other contents smashed or burnt, June 29, 1852.

STOCKS, in which drunkards were placed. The last in London were removed from St. Clement's Danes, Strand, Aug. 4, 1826.

STOCKS. The public funding system originated in Venice, and was introduced into Florence in 1340. The English funding system may be said to have had its rise in 1694. The act to prevent stock-jobbing passed March 1734. The foundation of the Stock Exchange, in Capel-court, was laid in May 1800. The memorable Stock Exchange hoax, for which lord Cochrane, the celebrated admiral Johnstone, and others were convicted, Feb. 22, 1814. Lord Cochrane was in consequence expelled the house of commons. His innocence was afterwards proved, and he was restored to his rank by king William IV., and to the honours belonging to it by queen Victoria. Stock-exchange coffee-house destroyed by fire, Feb. 11, 1816. The number of stock-holders in 1840 amounted to 337,481. By a return of the average price of

the public funds by the commissioners for the reduction of the national debt, it appears that *Consols* averaged in the year—

1749 . . . £100 0 0	1798 . . . £59 10 0	1820 . . . £68 12 0	1845 . . . £93 2 6
1780 . . . 62 13 6	1800 . . . 66 3 3	1825 . . . 90 0 8	1848 . . . 86 15 0
1785 . . . 68 6 6	1805 . . . 58 14 0	1830 . . . 89 15 7	1850 . . . 96 10 9
1790 . . . 71 2 6	1810 . . . 67 16 3	1840 . . . 89 17 6	1852 . . . 99 12 6
1795 . . . 74 8 6	1815 . . . 58 13 9		

The price of £100 stock varied in

1853, from £101 to £90 $\frac{1}{2}$	1855, from £93 $\frac{1}{2}$ to £86 $\frac{1}{2}$	1857, from £95 $\frac{1}{2}$ to £86 $\frac{1}{2}$	1859, from £97 $\frac{1}{2}$ to £89
1854, " 96 " 85 $\frac{1}{2}$	1856, " 96 $\frac{1}{2}$ " 87 $\frac{1}{2}$	1858, " 98 $\frac{1}{2}$ " 94	1861, " 94 $\frac{1}{2}$ " 89 $\frac{1}{2}$

STOICS, disciples of Zeno the philosopher; about 290 B.C. They obtained the name because they listened to his instructions in a porch or portico at Athens, called in Greek *Stoa*. Zeno taught, that man's supreme happiness consisted in living agreeably to nature and reason, and that God was the soul of the world. *Stanley*.

STONE OPERATION. Extracting stone from the bladder was first performed by Ammonius of Alexandria, about A.D. 240. Cutting for the stone was first performed on a criminal, at Paris, in 1474, with success. A remedy discovered by Mrs. Stevens, for which she was rewarded by government, 1739. See *Lithotomy*.

STONE BUILDINGS, &c. Stone buildings were introduced into England, A.D. 670. A stone bridge was built at Bow, in 1087, and is accounted the first; but a bridge exists at Crowland, which is said to have been built in 860. See *Bridges*. The first stone building in Ireland was a castle, 1161. See *Building*. Stone china-ware was made by Wedgwood in 1762. Artificial stone for statues was manufactured by a Neapolitan, and introduced into England, 1776. Stone paper was made in 1776. See *Ransom's Artificial Stone*.

STONEHENGE, on Salisbury-plain, Wiltshire, among the most celebrated monuments of British antiquity; said to have been erected on the counsel of Merlin by Aurelius Ambrosius, in memory of 460 Britons who were murdered by Hengist the Saxon, about A.D. 450. *Geoffrey of Monmouth*. Erected as a sepulchral monument of Ambrosius, A.D. 500. *Polydore Vergil*. An ancient temple of the Britons, in which the Druids officiated. *Dr. Stukeley*. The Britons had annual meetings at Abury and Stonehenge, where laws were made, justice administered, and heinous crimes punished.

STORMS. The following are among the best authenticated and most memorable. In London a storm raged which destroyed 1500 houses, A.D. 944. One in several parts of England, the sky being very dark, the wind coming from the S. W.; many churches were destroyed; and in London 500 houses fell, Oct. 5, 1091. One on the coast of Calais, when Hugh de Beauvais and several thousand foreigners, on their voyage to assist king John against the barons, perished, 1215. *Holinshed*. See *Meteorology*.

It thundered 15 days successively, with tempests of rain and wind, A.D. 1233.

Storm with violent lightnings; one flash passed through a chamber where Edward I. and his queen were conversing, did them no damage, but killed two of their attendants, 1285. *Hoveden*.

Violent storm of hail near Chartres, in France, which fell on the army of Edward III. then on its march. The hail was so large that the army and horses suffered very much, and Edward was obliged to conclude a peace, 1339. *Matt. Paris*.

When Richard II.'s queen came from Bohemia, on her setting foot on shore an awful storm arose, and her ship and a number of others were dashed to pieces in the harbour, Jan. 1382. *Holinshed*.

Richard's second queen also brought a storm with her to the English coasts, in which the king's baggage was lost, and many ships cast away, 1396. *Idea*.

Hurricane throughout Europe, which did very con-

siderable damage, on Sept. 3, 1658, the day that Cromwell died. *Mortimer*.

Storm on east coast of England: 200 colliers and coasters lost, with most of their crews, 1696.

The "Great Storm," one of the most terrible that ever raged in England. The devastation on land was immense; and in the harbours and on the coasts, the loss in shipping and in lives was still greater, Nov. 26-27, 1703.*

Snow-storm in Sweden, when 7000 Swedes, it is said, perished upon the mountains, in their march to attack Drontheim, 1719.

One in India, when many hundreds of vessels were cast away, a fleet of Indiamen greatly damaged, and some ships lost, and 30,000 persons perished, Oct. 11, 1737.

Dreadful hurricane at the Havanah: many public edifices and 4048 houses were destroyed, and 1000 inhabitants perished, Oct. 25, 1763.

Awful storm in the North of England, in which many

* The loss sustained in London alone was calculated at 2,000,000*l.* sterling. The number of persons drowned in the floods of the Severn and Thames, and lost on the coast of Holland, and in ships blown from their anchors and never heard of afterwards, is thought to have been 8000. Twelve men-of-war, with more than 1800 men on board, were lost within sight of their own shore. Trees were torn up by the roots, 17,000 of them in Kent alone. The Eddystone light-house was destroyed, and in it the ingenious contriver of it, Winstanley, and the persons who were with him. The bishop of Bath and Wells and his lady were killed in bed in their palace in Somersetshire. Multitudes of cattle were also lost: in one level 15,000 sheep were drowned.

STORMS, *continued.*

vessels were destroyed, and four Dublin packets foundered, Oct. 29, 1775.
 One at Surat, in the East Indies; destroyed 7000 of the inhabitants, April 22, 1782.
 One hundred and thirty-one villages and farms laid waste in France, 1785.
 One general throughout Great Britain: several hundred sail of shipping destroyed or damaged, Oct. 6, 1794.
 One which did vast damage in London, and throughout almost the whole of England, Nov. 8, 1800.
 A tremendous storm throughout Great Britain and Ireland, by which immense damage was done, and many ships wrecked, Dec. 16-17, 1814.
 An awful gale, by which a great number of vessels were lost, and much damage was done to the shipping in general on the English coast, Aug. 31, 1816.
 Dreadful hurricane, ravaged the Leeward Islands, from the 20th to 22nd Sept. 1819. At the island of St. Thomas alone, 104 vessels were lost.
 Great storm along the coast from Durham to Cornwall; many vessels lost, Nov. 1821.
 In Ireland, particularly in the vicinity of Dublin, many houses were thrown down, and vast numbers unroofed, Dec. 12, 1822.
 Awful storm on the coast of England: many vessels lost, and 13 driven ashore and wrecked in Plymouth alone, Jan. 12-13, 1828.
 At Gibraltar, where more than 100 vessels were destroyed, Feb. 18, 1828.
 Dreadful storm at the Cape of Good Hope, where immense property was lost, July 16, 1831.
 A hurricane visited London and its neighbourhood, which did great damage to the buildings, but without the destruction of human life, though many serious accidents occurred, Oct. 28, 1838.
 Awful hurricane on west coast of England, and in

Ireland. The storm raged through Cheshire, Staffordshire, and Warwickshire: 20 persons were killed in Liverpool, by the falling of buildings, and 100 were drowned in the neighbourhood; the coast and harbours were covered with wrecks; the value of two of the vessels lost being nearly half-a-million sterling. In Limerick, Galway, Athlone, and other places, more than 200 houses were blown down, and as many more were burnt, the winds spreading the fires. Dublin suffered dreadfully; London and its neighbourhood scarcely sustained any damage, Jan. 6-7, 1839.
 [The winter of 1852-3 (Dec. and Jan.) was one of storms, many of which were very destructive, particularly to shipping.]
 Great storm in the Black Sea, Nov. 13-16, 1854, causing much loss of life, shipping, and stores sent for the allied armies in the Crimea.
 Great storm on N. coast of Europe, &c., Dec. 31, 1854.
 Great storm on N.E. coast of Scotland; 42 fishermen lost, Nov. 23, 1857.
 Dreadful storm on the night Oct. 25-26: the Royal Charter totally lost, and many other vessels; another storm Oct. 31, and Nov. 1, 1859.
 Great storm in the channel causing much loss of life and property, Jan. 1, 1860.
 Dreadful gales, doing much mischief, Feb. 26, 27, 28; May 28; and June 2, 1860.
 Great storm: part of the Crystal palace blown down; Chichester cathedral steeple fell, Feb. 20, 21, 1861.
 Great storm on British coasts, 143 wrecks, May 28, 1861.
 Storm on the north-east; 50 wrecks, Nov. 13, 14, 1861.
 At Market Laverton, &c.; hail six and seven feet deep; much damage to crops; Sept. 2, 1862.
 Storm on British coasts; very many wrecks; Oct. 19, 20, 1862.

STORTHING, the Norwegian parliament, said to have been first held at Bergen by Hacho V. in 1223.

STOVES. The ancients used stoves which concealed the fire, as the German stoves yet do. They lighted the fire also in a large tube in the middle of the room, the roof being open. Apartments were warmed by portable braziers. Stoves on this old principle, improved, continue in use in many houses and public establishments in England, and still generally on the continent. See *Chimneys* and *Collager's Stove*.

STRAITS SETTLEMENTS, including Malacca, Penang or Prince of Wales island, and Singapore, were made a separate dependency of the British crown in 1853, and placed under the governor-general of India. Singapore is the seat of government.

STRAND (London). Houses were first built upon the Strand about A.D. 1353, at which period it was the court end of the town, or formed the communication between the two cities of London and Westminster, being then open to the Thames and to the fields. Somerset and other palaces were erected in 1549. *Stow.* The Strand bridge was commenced Oct. 11, 1811. See *Waterloo Bridge*. The Strand improvements were commenced in 1829.

STRASBURG, the Roman *Argentoratum*, the capital of Alsace. Here Julian defeated the Allemanni, A.D. 357. This town, formerly imperial, was taken by Louis XIV. in 1681. The citadel and fortifications, which he constructed, have been so much augmented, that Strasburg may be considered one of the strongest places in Europe. It was confirmed to France by the peace of Ryswick in 1697. Strasburg is remarkable for its magnificent cathedral and tower, the latter, the loftiest in the world. An attempt at insurrection in the city was made, Oct. 29, 1836, by prince Louis Napoleon (afterwards president of the French republic, and now emperor), aided by two officers and some private. It was instantly suppressed by their arrest. The prince was then shipped off to America by the French government. See *France*.

STRATHCLEYD, a kingdom formed by the Britons, who retired northward after the Saxon conquest, about A.D. 560. It extended from the Clyde to Cumberland. The Britons in it submitted to Edward the Elder, in 924.

STRATHMORE, COUNTESS OF. Miss Bowes of Durham, the then richest heiress in Europe, whose fortune was 1,040,000*l.* with vast additions on her mother's death, and im-

mense estates on the demise of her uncle, married the earl of Strathmore, Feb. 25, 1766. Having, after the earl's death, married Mr. Stoney, she was forcibly carried off by him and other armed men, Nov. 10, 1786. She was brought up to the King's Bench by *habeas corpus* and released, and he committed to prison, Nov. 23. The lady recovered her estates, which she had assigned to her husband under the influence of terror, in May, 1788.

STRATTON-HILL, BATTLE OF, in Cornwall, May 16, 1643, between the royal army under sir Ralph Hopton, and the forces of the parliament under the earl of Stamford. The victory was gained over the parliamentarians, who lost numbers in killed and wounded.

STREET RAILWAYS, previously established by Mr. Train in New York, were opened by him at Birkenhead, Cheshire, Aug. 30, 1860, and at Bayswater, London, March 23, 1861. A street railway bill was rejected by the house of commons in April, 1861. Nevertheless, several of these railways existed for a time in various parts of the metropolis in 1861, but were all taken up in 1862.

STRELITZ, the imperial guard of Russia, established in 1568. Becoming frequently seditious, they were suppressed by Peter the Great; great numbers were put to death, many by the czar's own hand, 1697-1704.

STRIKES. See *Preston and London*, 1859-1861. The tailors of London struck for increase of wages in April, 1834. The strike of the calico-printers of Glasgow, lasted nine months in 1834. The strike of the amalgamated engineers took place in 1852; and of the London Cabmen, July 27-30, 1853. A strike amongst the silk-workers at Coventry came to an end, Aug. 30, 1860. An unsuccessful attempt to get up a strike in the building trade began March 23, 1861.

STRYCHNIA, a poisonous vegetable alkaloid, discovered in 1818 by Pelletier and Caventou in the seeds of the *strychnus ignatia*, and *nux vomica*, and also in the *upas* poison. It is so virulent that half a grain blown into the throat of a rabbit occasions death in four minutes; its operation is accompanied by lock-jaw. Much attention was given to strychnia in 1856, during the trial of Palmer for the murder of Cook.

STUCCO-WORK was known to the ancients, and was much prized by them, particularly by the Romans, who excelled in it. *Abbé Lenglet*. It was revived by D'Udine, about A.D. 1550; and in Italy, France, and England in the eighteenth century.

STYLE. The style was altered by Augustus Cæsar's ordering leap-year to be once in four years, and the month Sextilis to be called Augustus, 8 B.C. Again at Rome, by taking twelve days off the calendar, 1582. See *Calendar*. Introduced into most of the other states of Europe, 1710. Act passed to change the style in England from the Julian to the Gregorian, 1751. It took effect Sept. 3, 1752. See *New Style and Year*.

STYLE ROYAL. See *Majesty and Titles*. The styles of the English sovereigns is given in the later editions of Nicolas's "Chronology of History."

SUBMARINE TELEGRAPH. See (under *Electricity*) *Telegraph*.

SUBSIDIES. Subsidies to the kings of England formerly granted in kind, particularly in wool; 30,000 sacks were voted to Edward III. on account of the war with France, 1340. *Anderson*. Subsidies were raised upon the subjects of England by James I. 1624; but they were contained in a bill for the redress of grievances, 1639. Four subsidies were granted to Charles II. in 1663. England granted subsidies to foreign powers in several wars, particularly in the war against the revolutionists of France, and the war against Bonaparte. One of the most remarkable of these latter was June 20, 1800, when a treaty of subsidies was ratified at Vienna between Austria and England, stipulating that the war should be vigorously prosecuted against France, and that neither of the contracting powers should enter into a separate peace. Subsidies to Austria, Prussia, Russia, the Porte, and other powers, were afterwards given by England to the amount of many millions sterling. *Phillips*.

SUCCESSION ACTS, to exclude Roman Catholics from ascending the throne of these realms, were passed in 1689, and on June 12, 1701. By this latter act the succession of the crown of England, after the demise of William III. and of queen Anne, without issue, was limited to Sophia, electress of Hanover, and to her heirs being Protestants, she being the grand-daughter of James I. See *Hanoverian Succession*.

SUCCESSION, WAR OF (1702-1713), distinguished by the achievements of the duke of Marlborough and the earl of Peterborough, and their unprofitable results, arose on the question whether an Austrian prince or a French prince, grandson of Louis XIV., should succeed

to the throne of Spain. The British court opposed Louis, and Marlborough was victorious; but the allies withdrew one after another, and the French prince succeeded. See *Spain, Utrecht*.

SUCCESSION DUTY ACT (16 & 17 Vict. c. 51), after much discussion, was passed Aug. 4, 1853. By this act the legacy duty was extended to real estate, and was made payable on succession to both landed and personal property.

SUDBURY, in Suffolk, was disfranchised for bribery in 1848.

SUEVI, a warlike Gothic tribe, which with the Alani and the Visigoths entered Spain about 408, were overcome by the latter, and absorbed into their kingdom about 584.

SUEZ CANAL. A plan for a canal between the head of the Red Sea and the bay of Pelusium was brought forward by M. de Lesseps in 1852. The consent of the Egyptian, Turkish, Russian, French, and Austrian governments were gradually obtained, but not that of the British. A company has been formed for the purpose, and the work commenced. The cost is estimated at 8,000,000*l*.*

SUFFRAGAN BISHOPS. Power to appoint them was given by parliament in 1534 to Henry VIII. as head of the church. See *Supremacy*.

SUGAR, † *Saccharum officinarum*, is supposed to have been known to the ancient Jews. Found in the East Indies by Neærehus, admiral of Alexander, 325 B.C. *Strabo*. An oriental nation in alliance with Pompey used the juice of the cane as a common beverage. *Lucan*. The best sugar was produced in India. † *Pliny*. It was prescribed as a medicine by Galen. Brought into Europe from Asia, A.D. 625. In large quantities 1150. It was attempted to be cultivated in Italy; but not succeeding, the Portuguese and Spaniards carried it to America about 1510. † Our chief importations of sugar are from the British West Indies, the East Indies, Mauritius, and Brazil. Sugar was first taxed by hane, † James II. 1685. The previous customs duties upon sugar were repealed, and moderated duties substituted, by the act 9 & 10 Vict. c. 63, passed Aug. 18, 1846, by which act the same duties were levied upon the sugar of foreign countries as levied upon sugar the produce of British colonies: annually reduced until July 5, 1851. The importations of sugar have in consequence considerably increased, and amounted in 1852 to upwards of eight millions of cwts., paying a duty exceeding four millions of pounds sterling. Sugar imported in 1854, 9,615,802 cwts.; in 1861, 12,165,139 cwts. In 1855, the duty was again increased. † Sugar was extracted from beet-root in France by Achard, in 1799, and has been since largely manufactured.

SUGAR-REFINING was made known to Europeans by a Venetian, 1503, and was first practised in England in 1659, though some say that we had the art a few years sooner. Dr. Scoffern's improved processes were patented in 1848-50.

SUICIDE (from *sui*, self, *cœdere*, to kill), the slayer of himself. The first instance (passing that of Samson) recorded in Jewish history, is that of Saul, 1055 B.C. *Apollodorus*. The Greek and Roman philosophers deemed it a crime, and burned the offending hand apart from the rest of the body. In the early part of the Roman history, the only instance recorded occurs in the reign of Tarquin I., when the soldiers, thinking themselves disgraced by being ordered to make common sewers, destroyed themselves, 606 B.C. Instances after-

* Writing on Nov. 7, 1862, M. Delacour, a French engineer, after viewing the works which were "employing 25,000 men in the desert," expresses his conviction that this important work will be completed in four or five years. *Cosmos*. The waters of the Mediterranean have been admitted into a narrow channel communicating with Lake Timsah. This, however, is a very insignificant part of the work (Dec. 1862).

† Sugar, long considered a neutral substance, without congeners, has of late years become the head of a numerous family, daily increasing, viz.: Cane-sugar (*sucrose*, from the sugar-cane; boiled with dilute acids it yields *glucose*); fruit-sugar (from many recent fruits); grape-sugar (*glucose*; from dried fruits and altered starch); sugar of milk; *Meliose* (from Eucalyptus, by Berthelot in 1850); *sorbin* (from the berries of the mountain ash, by Pelouze); *inosite* (from muscular tissue, Scherer); *dulcose* (by Laurent); *mannite* (from manna, obtained from the *Fraxinus Ornus*, a kind of ash); *quercite* (from acorns); to these have been lately added *xylose*, by M. Mitscherlich, and *malicose* and *trehalose*, by M. Berthelot.

‡ About the year 1228 the sugar-cane was transported from Tripoli and Syria to Sicily, thence to Madeira, and finally to the West Indies and America. It is not known at what date sugar was introduced into England, but it seems to have been prior to the reign of Henry VIII. Mr. Whittaker, in the History of Whalley, p. 100, quotes an earlier instance in 1497. A manuscript letter from sir Edward Wotton to lord Cobham, dated Calais, 6th March, 1546, advertises him that sir Edward had taken up for his lordship twenty-five sugar-loaves at six shillings a loaf, "whiche is eighte pence a pounde."

§ In 1840, the imports of sugar into the United Kingdom were nearly 5,000,000 cwts., of which nearly four millions were for home consumption; and the duty amounted to about five millions and a half sterling. In 1850, the imports were 8,285,734 cwts. and the reduced duty, amounted to 4,138,051*l*.; in 1853, 7,272,833 cwts. were retained for home consumption; duty, 4,083,836*l*.; in 1859, 8,641,920 cwts. were retained for home consumption; duty, 5,935,909*l*.

wards occurred, however, of illustrious men committing suicide, as Cato, 46 B.C.* In the Roman Catholic church, in the sixth century, it was ordained that no commemoration should be made in the Eucharist for such as committed self-murder. This ecclesiastical law continued till the Reformation, when it was admitted into the statute law of England by the authority of parliament, with the confiscation of land and goods. Till 1823 the body of the suicide was directed to be buried in a cross-road, and a stake to be driven through it.

A FEW OF THE MOST MEMORABLE LATE CASES OF SUICIDE IN ENGLAND, ETC.

Gen. Pichegru	April 7, 1804	Rev. T. Robinson (threw himself off Shakspeare's Cliff, Dover)	Aug. 16, 1854
Miss Champante	Aug. 15, —	Dr. Franks, late editor of the <i>Allgemeine Zeitung</i> , after killing his son	Nov. 3, 1855
Sellis, valet of the duke of Cumberland, May 31, 1810	—	John Sadleir, M.P. (in 1852, a lord of the treasury), by prussic acid; on Hampstead Heath. (He was found to have been guilty of enormous frauds upon the Tipperary bank, &c.).	Feb. 16, 1856
Abraham Goldsmid, an eminent merchant	—	A. Smart, a watchmaker, threw himself from the whispering gallery in St. Paul's, March 14, —	—
Williams, murderer of the Marr family, Dec. 15, 1811	1811	Charles Russell, Esq., late chairman of Great Western Railway	May 15, —
Lord French	Dec. 9, 1814	Hugh Miller, geologist, author of <i>The Old Red Sandstone</i> (insane, through overwork)	Dec. 23, —
Marshal Berthier	June 1, 1815	Major-gen. Stalker, C. B. of Indian army (March 14), and commodore Ethersey, of the Indian navy. (Both through physical and mental depression while on the expedition against Persia; see <i>Bushire</i>).	March 17, 1857
Samuel Whitbread, Esq.	Sept. 6, —	Major Warburton, M.P. for Harwich, brother of Eliot, lost in the <i>Amazon</i>	Oct. 23, —
Sir Samuel Romilly	Nov. 2, 1818	Henry M. Witt, a promising young chemist, at the Government School of Mines	June 19, 1858
Sir Richard Croft	Nov. 6, —	Dr. Sadleir, Senior Fellow of Trinity College, Dublin	July, —
Christophe, king of Hayti	Oct. 8, 1820	Rev. G. Martin, chancellor of the diocese of Exeter	Aug. 27, 1860
Adm. sir George Campbell	Jan. 23, 1821	Lord Forth, son of earl of Perth	Oct. 8, 1861
Marquess of Londonderry	Aug. 12, 1822	INQUESTS ON SUICIDES IN ENGLAND AND WALES.	
Hon. colonel Stanhope	Jan. 26, 1825		
Mr. Montgomery in Newgate (see <i>Prussic Acid</i>), ...	July 4, 1828		
Miss Charlotte Both	Jan. 3, 1830		
Lord Greaves	Feb. 7, —		
Colonel Brereton	Jan. 13, 1832		
Major Thompson	June 13, —	1856	919 males 395 females 1314
Mr. Simpson, the traveller	July 24, 1840	1858	909 " 366 " 1275
Lord James Beresford	April 27, 1841	1860	961 " 396 " 1357
Gen. sir Rufane Shaw Donkin	May 1, —	1861	961 " 363 " 1324
The earl of Munster	March 20, 1842		
Lord Conington	June 8, —		
Laman Blanchard	Feb. 15, 1845		
Colonel Gurwood	Dec. 29, —		
Rear-admiral Collard	March 18, 1846		
Haydon, the eminent painter	June 22, —		
Count Bresson	Nov. 2, 1847		
Colonel King, in India	July 12, 1850		
Walter Watts, lessee of the Olympic theatre, ...	July 13, —		
Rev. Dr. Rice	Jan. 20, 1853		
Lieut.-col. Layard	Dec. 27, —		

SUITORS' FUND (in the Court of Chancery) in 1862 amounted to 1,290,000*l*. As this money had no specific owner, a proposal was made by government to apply it to the building of new law-courts, payment of all legal claims being guaranteed. The scheme was deferred by parliament.

SULPHUR has been known from the earliest times. Basil Valentine mentions its production from green vitriol. Sulphuric acid (vitriol), produced from the burning of sulphur, was introduced into England about 1720. Sulphur has been the object of research of many eminent chemists during the present century, and many discoveries have been made, such as its allotropic condition, &c. It is the inflammable constituent in gunpowder.—The sulphur mines of Sicily have been wrought since the sixteenth century, but the exportation was inconsiderable till about 1820; in 1838 the trade increased so much that Great Britain alone imported 38,654 tons. In that year the Neapolitan government was induced to grant a monopoly of the trade to a French company; but a firm remonstrance from the British government led to a discontinuance of this impolitic restriction in 1841, which, however, gave a great and a lasting impetus to the British sulphur manufacture.

SULTAN. A Turkish title, from the Arabic, signifying *king of kings*, and given to the grand signior or emperor of Turkey. It properly signifies king, lord, or ruler, and is particularly applied to the grand signior. *Pardon.* It was first given to the Turkish princes Angrolipez and Musgal, about A.D. 1055. *Vattier.* It was first given, according to others, to the emperor Mahmoud, in the fourth century of the Hegira.

* There have been three instances of self-destruction by fire; that of the philosopher Empedocles, who threw himself into the crater of Mount Etna; of a Frenchman, who, in imitation of him, threw himself, in 1820, into the crater of Vesuvius; and of an Englishman, who jumped into the furnace of a forge about the year 1811. Plutarch relates that an unaccountable passion for suicide seized the Milesian virgins, from which they could not be prevented by the tears and prayers of their friends; but a decree being issued that the body of every young maid who did self-murder should be drawn naked through the streets, a stop was soon put to the extraordinary frenzy.

SUMPTUARY LAWS. Laws to restrain excess in dress, furniture, eating, &c. Those of Zaleucus ordained that no woman should go attended by more than one maid in the street, unless she were drunk; and that she should not wear gold or embroidered apparel, unless she designed to act unchastely, 450 B.C. *Diog. Laert.* The *Lex Orchia* among the Romans, (181 B.C.), limited the guests at feasts, and the number and quality of the dishes at an entertainment; and it also enforced that during supper, which was the chief meal among the Romans, the doors of every house should be left open. The English sumptuary laws, chiefly of the reigns of Edward III. and Henry VIII., were repealed in 1856. See *Dress, Luxury, &c.*

SUN. Pythagoras taught that the sun was one of the twelve spheres, about 529 B.C. The relative distances of the sun and moon were first calculated geometrically by Aristarchus, who also maintained the stability of the sun, about 280 B.C. Numerous theories were ventured during fifteen centuries, and astronomy lay neglected until about A.D. 1200, when it was brought into Europe by the Moors of Barbary and Spain. The Copernican system was made known in 1530. See *Copernican System* and *Solar System*. Galileo and Newton maintained that the sun was an igneous globe. The transit of Mercury was observed by Gassendi. By the observations of Dr. Halley on the spot which darkened the sun's disc in July and August, 1676, he established the certainty of its motion round its own axis. Parallax of the sun, Dr. Halley, 1702. Solar spots were first observed by Fabricius and Harriot in 1610. A macula three times the size of the earth passed the sun's centre, April 21, 1766, and frequently since. Herschel measured two spots, whose length taken together exceeded 50,000 miles, April 19, 1779. Since 1851 much attention has been given to the luminous protuberances observed on the edge of the sun's disc during a total eclipse. At the total eclipse, July 18, 1860, Mr. Warren De la Rue took two photographs at the time of total obscuration. See *Spectrum*.

SUNCION, TREATY OF, between general Urquiza, director of the Argentine confederation, and C. A. Lopez, president of the republic of Paraguay, recognising the independence of Paraguay, July 15, 1852.

SUNDAY, or LORD'S DAY. Most nations have counted one day in seven holy. Sunday was the day on which, anciently, divine adoration was paid to the Sun. Among Christians it is commonly called *Dies Dominica*, or Lord's day, on account of our Saviour's appearance on that day, after his resurrection. The first civil law that was issued for the observance of this day, combined it with that of the seventh-day Sabbath and other festivals. *Eusebius, Life of Constantine*: and it was followed by several imperial edicts in favour of this day, which are extant in the body of Roman law, the earliest being that of Constantine the Great, dated March 7, 321. *Corpus Juris Civilis*. See *Sabbath*; *Sabbatarians*; *Sports, Book of, &c.*

The council of Orleans prohibited country labour, which that decree had allowed. A.D. James I. and Charles I. authorised certain sports after divine service on Sundays. See *Sports*.

The Sabbath-day was ordained to be kept holy in England, from Saturday at three in the afternoon to Monday at break-of-day, 4 Canon, Edgar.

Act of parliament, levying one shilling on every person absent from church on Sundays, 3 James I.

Act restraining amusements, 1 Charles I. 1625

Act restraining the performance of servile works, and the sale of goods except milk at certain hours and meat in public-houses, and works of necessity and charity, on forfeiture of five shillings, 29 Charles II. 1677

The Sunday act was passed in 1781. In March 1855, lord Robert Grosvenor (since lord Ebury), introduced a bill to suppress Sunday trading. It met with much opposition and was withdrawn.

SUNDAY SCHOOLS were first established in England in or about the year 1781, by Robert Raikes, an eminent printer of Gloucester, conjointly with Dr. Stock. See *Education* and *Sabbath Schools*.

SUN-DIALS were invented by Anaximander, 550 B.C. *Pliny*, i. 2. The first put up at Rome was by Papirius Cursor, at the temple of Quirinus, when time was divided into hours, 293 B.C. Sun-dials were first set up in churches, A.D. 613. *Langlet*.

SUPERANNUATION ACT for the Civil Service was passed in April, 1859.

SUPREMACY over the church was claimed by pope Gelasius I. as bishop of Rome, 494. On Jan. 15, 1535, Henry VIII. by virtue of the act 26 Hen. VIII. c. 1, formally assumed the style of "on earth Supreme Head of the Church of England," which has been retained by all succeeding sovereigns. The bishop of Rochester (Fisher) and the ex-lord chancellor (sir Thomas More), and many others were beheaded for denying the king's supremacy in 1535; and in 1578, John Nelson, a priest, and Thomas Sherwood, a young layman, were executed at Tyburn for the same offence.

SURAT (East Indies). Before the English East India Company obtained possession of Bombay, the presidency of their affairs on the coast of Malabar was at Surat; and they had a factory here established under captain Best in 1611. The Great Mogul had then an officer who was styled his admiral. An attack of the Mahratta chief Sivajee, on the British factory, was defeated by sir George Oxenden, 1664. The English were again attacked in 1670, and 1702, and often subsequently. The East India Company, in 1759, fitted out an armament, which dispossessed the admiral of the castle; and, soon after, the possession of this castle was confirmed to them by the court of Delhi. Surat was vested in the British by treaty in 1800 and 1803.

SURGEONS, ROYAL COLLEGE OF. The first charter was granted by Henry VIII. 1540. Formerly barbers and surgeons were united, until it was enacted that "no person using any shaving or barbery in London shall occupy any surgery, letting of blood, or other matter excepting only the drawing of teeth." The surgeons obtained a new charter in 1745, 1800, and 1844. Since that period, various legislative and other important regulations have been adopted to promote their utility and respectability; and no person is legally entitled to practise as a surgeon in the cities of London and Westminster, or within seven miles of the former, who has not been examined at this college. The college in Lincoln's-inn-Fields was re-modelled in 1836, and the interior completed in 1837. The premises were enlarged in 1852-3. See *Medical Council*.

SURGERY. It was not until the age of Hippocrates that diseases were made a separate study from philosophy, &c., about 410 B.C. Hippocrates mentions the *ambe*, the ancient instrument with which they reduced dislocated bones. Celsus flourished about A.D. 17; Galen, 170; Aëtius, 500; Paulus Aegineta, in 640. The Arabians revived surgery about 900; and in the sixteenth century a new era in the science began: between these periods surgery was confined to ignorant priests or barbers. Anatomy was cultivated under the illustrious Vesalius, the father of modern surgery, in 1538. Surgeons and doctors were exempted from bearing arms or serving on juries, 1513, at which period there were only thirteen in London. See *Physic*.

SURINAM (Dutch Guiana). The factories established by the English in 1640 were occupied by the Portuguese, 1643; by the Dutch, 1654; taken by the British, 1804; and restored to the Dutch, 1814.

SURNAMES first began in Greece and Egypt, as *Soter*, Saviour; *Nicator*, conqueror; *Euergetes*, benefactor; *Philopator*, lover of his father; *Philometor*, lover of his mother, &c. Strato was surnamed *Physicus*, from his deep study of nature; Aristides was called the *Just*; Phocion, the *Good*; Plato, the *Athenian Bee*; Xenophon, the *Attic Muse*; Aristotle, the *Stagyrite*; Pythagoras, the *Samian Sage*; Menedemus, the *Eretrian Bull*; Democritus, the *Laughing Philosopher*; Virgil, the *Mantuan Swan*, &c. Surnames were introduced into England by the Normans, and were adopted by the nobility, A.D. 1100. The old Normans used *Fitz*, which signifies son, as Fitz-herbert. The Irish used *O*, for grandson, as O'Neal, O'Donnell. The Scottish Highlanders employed Mac, as Macdonald, son of Donald. The Saxons added the word son to the father's name, as Williamson. Many of the most common surnames, such as Johnson, Wilson, Dyson, Nicholson, &c., were taken by Brabanter and other Flemings, who were naturalised in the reign of Henry VI. 1435. M. A. Lower's "Dictionary of English Surnames" was published in 1860.

SURPLICES. First worn by the Jewish priests, and said to have been first used in churches, A.D. 316, and encouraged by pope Adrian, 786. Every minister saying public prayers shall wear a comely surplice with sleeves, *Canon* 38. The garb prescribed by stat. 2 Edw. VI. 1547; again, 1 Eliz. 1558; and 13 & 14 Chas. II. 1662.

SURREY ZOOLOGICAL GARDENS (near London), were established in 1831, by Mr. Edward Cross, who brought hither the menagerie formerly at Exeter change. Various picture models have been exhibited here since 1837, viz. Vesuvius, Iceland, &c., accompanied by fireworks. In 1856, a company which had taken the gardens, erected a large yet elegant building for concerts; the architect being Mr. Horace Jones. On Oct. 19, 1856, when the hall contained about 9000 persons, attending to hear the rev. C. H. Spurgeon, seven were killed and thirty seriously injured, by a false alarm of fire. In 1862 the hall was temporarily taken for the reception of the patients of St. Thomas's hospital.

SURVEY. See *Ordnance*.

SUSPENSION BRIDGES. The greatest and oldest in the world is in China, near Kingtung; it is formed of chains. Rope suspension bridges, from rocks to rocks, are also of Chinese origin. In these realms chain suspension bridges are of recent construction. The bridge over the Menai Strait is the most surprising work, every way considered, of modern

times. The Hungerford (or Charing Cross) suspension bridge was opened May 1, 1845. Parliament empowered the commissioners of woods to erect (among other improvements there) a suspension bridge at Battersea, Sept. 1846; and many bridges of similar construction have been erected in various parts of the kingdom. Lambeth and Westminster suspension bridge was opened Nov. 10, 1862. See *Menai Strait, Hungerford Bridge, &c.*

SUSSEX, KINGDOM OF. See *Britain*.

SUTLEJ, a river in N.-W. India, on the banks of which were fought the desperate battles of Aliwal and Sobraon (*which see*).

SUTTEES, the burning of widows. This custom began in India from one of the wives of "Bramah, the son of God," sacrificing herself at his death, that she might attend him in heaven. So many as seventeen widows have burnt themselves on the funeral pile of a rajah; and in Bengal alone, 700 have thus perished, until lately, in each year. Mr. Holwell was present at many of these sacrifices. On Feb. 4, 1743, he saw a young and beautiful creature, only seventeen years of age, the mother of two children, thus sacrifice herself, with a fortitude and courage that astonished every witness of the scene. The English government, after long discouraging suttees, formally abolished them, Dec. 7, 1829. They have since occasionally taken place.

SWABIA, a province in S. Germany; was conquered by Clovis, and incorporated into the kingdom of the Franks, A.D. 496. After various changes of rulers, it was made a duchy by the emperor Conrad I. in 912, for Erchanger; according to some, in 916, for Burckhardt. The duchy became hereditary in the house of Hohenstaufen in 1080. Duke Frederic III. became emperor of Germany as Frederic I. (usually styled Barbarossa, red beard), in 1152. Conradin, his descendant, was defeated at the battle of Tagliacozzo (*which see*), in 1268, and beheaded shortly after. The breaking up of the duchy gave rise to many of the small German states; part of Swabia is included in Wurtemberg and Switzerland. Swabia was made a circle of the empire in 1387 and 1500.

SWAN RIVER SETTLEMENT. See *Western Australia*.

SWEABORG, a strong fortress in Finland, $3\frac{1}{2}$ miles south of Helsingfors: it is situated on seven rocky islands. The fortifications were commenced by the Swedes in 1748, and were not completed in 1789, when Finland was united to Russia, by whose government the works were zealously continued. It is termed the Gibraltar of the north. On Aug. 6, 1855, the English and a part of the French fleet anchored off Sweaborg, and bombarded it by mortar and gun-boats from the 9th to the 11th, causing the destruction of nearly all the principal buildings, including the dockyard and arsenal. But few casualties and no loss of life ensued in the allied squadron. Success could not be pursued for want of mortars.

SWEARING ON THE GOSPEL. First used A.D. 528. Introduced in judicial proceedings about 600. *Rapin*. PROFANE SWEARING made punishable by fine; a labourer or servant forfeiting 1s. others 2s. for the first offence; for the second offence, 4s.; the third offence, 6s.; 6 Wm. III. 1695. See *Oaths*.

SWEATING SICKNESS. See *Plague*.

SWEDEN (N. Europe). The ancient inhabitants were the Fins, now the modern inhabitants of Finland, a diminutive race, who retired to their present territory on the appearance of the Scandinavians or Goths, who have ever since been masters of Sweden. See *Scandinavia*. The internal state of this kingdom is little known previously to the eleventh century. By the union of Calmar in 1397, Sweden became a province of Denmark, and was not rescued from this subjection until 1521, when Gustavus Vasa recovered the kingdom from the Danish yoke. He became king in 1523, and his descendants ruled till 1809. The government of Sweden is a limited monarchy. The diet, which, however different in its formation, bears in its object a great resemblance to the British parliament, consists of four orders, the nobles, the clergy, the peasants, and the burghers. The king is, as in Britain, the head of the executive. There are two universities, Upsal and Lund; and Sweden can boast, among its great men, Linneus, Celsus, Scheele, Bergman, Berzelius, Thorwaldsen, and Andersen. Population in 1855, of Sweden, 3,639,332; of Norway, 1,433,488.

Odin arrives in the north and dies	B. C.	70	Magnus Ladellus establishes a regular form of government	1279
His son Skjold reigns		40		
The Skjoldungs reign till Olaf the Infant is baptised, and introduces Christianity among his people	about A.D.	1000	The crown of Sweden, which had been hereditary, is made elective; and Steenchel Magnus, surnamed Smeek or the Foolish, king of Norway, is elected	1319
Waldemar I. of Denmark, subdues Rugen, and destroys the pagan temples		1168	Waldemar lays Gothland waste	1361
Stockholm founded		1260	Albert of Mecklenburg reigns	1363

SWEDEN, *continued.*

Treaty or union of Calmar (*which see*), by which Sweden is united to Denmark and Norway, under Margaret . . . 1397

 The king visits England and France . . . Aug. 1861
 The king warmly received in Denmark, July 17, 1862

KINGS OF SWEDEN (*previously Kings of Upsal*).

1001. Olaf Schotkonung, or Olaf Schœtikonung the Infant, is styled king, 1015. Christianity introduced in this reign.
 1026. Edmund Colbrenner.
 1051. Edmund Slemme.
 1056. Stenkil.
 1066. Halstan.
 1090. Ingo I. styled the Good.
 1112. Philip.
 1118. Ingo II.
 1129. Swerker or Suercher I.
 1155. St. Eric I.
 1161. Charles VII.: made prisoner by his successor.
 1167. Canute son of Eric I.
 1199. Swerker or Suercher II.: killed in battle.
 1210. Eric II.
 1216. John I.
 1222. Eric III. the Stammerer.
 1250. Birger Jarl, regent.
 1266. Waldemar I.
 1275. Magnus I.
 1290. Birger II.
 1319. Magnus II.; dethroned.
 1350. Eric IV.
 1359. Magnus restored.
 1363. Albert of Mecklenburg: his tyranny causes a revolt of his subjects, who invite Margaret of Denmark to the throne.
 1389. Margaret, queen of Sweden and Norway, now also Denmark, and Eric XIII.
 1397. [Union of Calmar, by which the three kingdoms are united under one sovereign.]
 1412. Eric XIII. governs alone: deposed.
 1440. Christopher III.
 1448. Charles VIII. surnamed Canutesson.
 1471. [Interregnum.] Sten Sture, *Protector*.
 1483. John II. (I. of Denmark.)

1502. [Interregnum.]
 1503. Swante Sture, *Protector*.
 1512. Sten Sture, *Protector*.
 1520. Christiern, or Christian II., of Denmark, styled the "Nero of the North;": deposed for his cruelties.
 1523. Gustavus Vasa: by whose valour the Swedes are delivered from the Danish yoke.
 1560. Eric XIV., son of Gustavus: dethroned and slain by
 1568. John III. his brother.
 1592. Sigismund, king of Poland, son of John III.: disputes for the succession continued the whole of this reign.
 1604. Charles IX. brother of John III.
 1611. Gustavus (Adolphus) II. the Great: fell on the plains of Lutzen: supposed to have been treacherously slain.
 1633. [Interregnum.]
 — Christina daughter of Gustavus Adolphus. Resigned the crown to her cousin; died at Rome in 1689.
 1654. Charles X. (Gustavus), son of John Casimir, count palatine of the Rhine.
 1660. Charles XI. son of the preceding; the arts and sciences flourished in this reign.
 1697. Charles XII. styled the "Alexander," the "Quixote," and the "Madman of the North:": killed at Frederickshald.
 1719. Ulrica Eleanora, his sister, and her consort Frederick I. landgrave of Hesse Cassel. Ulrica relinquishes the crown, and in
 1741. Frederick reigned alone.
 1751. Adolphus-Frederick, of Holstein-Gottorp, descended from the family of Vasa.
 1772. Gustavus (Adolphus) III.: assassinated by count Ankerström at a masked ball.

SWEDEN, *continued.*

1792. Gustavus (Adolphus) IV. : dethroned and the government assumed by his uncle the duke of Sudermania.
 1809. Charles XIII. duke of Sudermania.
 1814. Treaty of Kiel, by which Norway falls under the sovereignty of Sweden.
1818. Charles (John) XIV. *Bernadotte* the French prince of Ponte Corvo; succeeded by his son,
 1844. Oscar, March 8.
 1859. Charles XV. July 8; (born May 3, 1826), the PRESENT (1862) king of Sweden and Norway.
Daughter. Princess Louisa, born Oct. 31, 1851.
Brother. Prince Oscar, born Jan. 27, 1829.

SWEDENBORGIANS. A sect (calling themselves "the New Church" or "the New Jerusalem Church") which holds the opinions of baron Emanuel Swedenborg (born at Stockholm, 1688; died at London, 1772). He stated that he began to receive spiritual manifestations, correspondences, &c., in 1745, of which an account is given in his numerous works.* The sect arose about 1760, and began to spread in 1783 in England, where there were 50 congregations in 1851. The "New Church" maintains that to it is revealed a spiritual sense of the words of Scripture, not revealed to other churches. It considers the last judgment to have been accomplished in 1757; it does not receive the usual doctrine of the Trinity, believing that the three persons are one in Christ; it rejects the doctrine of justification by faith alone, and the imputed righteousness of Christ, and holds that salvation cannot be obtained except by faith and good works. It accepts the ordinances of baptism and the Lord's Supper, and makes use of a liturgy and hymns in public worship.

SWEET-BAY, *Laurus nobilis*, was brought to these realms from Italy before 1548. *Laurus Indica*, or Royal Bay, was brought from Madeira in 1665. The Sweet-Fern bush, *Comptonia asplenifolia*, came from America, 1714. *Laurus aggregata*, or the Glaucous Laurel, came from China in 1806.

SWITHIN, ST., lived in the ninth century, and, having been preceptor to king Ethelwulf, was by that prince made bishop of Winchester in 852. The silly tradition, that if it rain upon St. Swithin's day, July 15, it will rain forty days following, is supposed to have a shadow of reason only from the circumstance of some constellations, which have the character of portending rain, rising cosmically about the time of St. Swithin's festival.

SWITZERLAND, the ancient Helvetia, was conquered by the Romans, 15 B.C.; and afterwards was successively subject to the Burgundians and Germans. Franks also settled here in the early ages. The canton of Schweitz was peopled by the Cimbrians, who, leaving their original habitation in Scandinavia, invaded Italy, and were defeated by the Roman general Marius; after which they fled into Helvetia, about 100 B.C. This canton has given name to the whole confederacy.—The present national council is elected every third year, at the rate of one member for 2000 persons.

The Helvetians converted to Christianity by Irish missionaries	A.D. 672	(1600 Swiss resist 30,000 French, and are all killed, the enemy losing 10,000)	Aug. 26, 1444
Helvetia ravaged by the Huns	909	The Swiss defeat Charles the Bold at Granson, April 5; and at Morat	June 20, 1476
Becomes subject to Germany	1032	And aid the duke of Lorraine at Nancy, where Charles is slain	Jan. 5, 1477
Fribourg built by Berthold IV.	1179	Swiss soldiers first enter into the pay of France, under Louis XI.	1480
Berne built	1191	Union of Fribourg and Soleure	1481
Tyranny of Gessler, which occasions the memorable revolt under the patriot William Tell	1306	Maximilian I. emperor acknowledges Swiss independence	1499
Confederation against Austria; declaration of Swiss independence	Nov. 7, 1307	Schaffhausen joins the union	1501
A malignant fever carries off, in the canton of Basle, 1100 souls	1314	The Swiss invade Milan and defeat the French at Novara	June 6, 1513
Form of government made perpetual	1315	Defeated by them at Marignano, Sept. 13, 14, 1515	
Leopold I. of Austria defeated at Morgarten, Nov. 16, 1315	1335	The Swiss confederacy acknowledged by France and other powers	1516
Lucerne joins the confederacy	1335	The Reformation begins at Basle; the bishop compelled to retire	1519
The canton of Zurich joins, and becomes head of the league	1350	The Grison leagues join the Swiss confederacy as allies	1544
Berne, Glaris, and Zug join	1351	Appenzel joins the other cantons	1597
Leopold II. of Austria defeated and slain at Sempach	July 9, 1386	Charles Emmanuel of Savoy attempts Geneva by surprise, scales the walls, and penetrates the town, but in the end is defeated	1602
The Austrians defeated at Nâfels; make peace, April 9, 1389	1400	[This circumstance gives rise to an annual festival commemorative of their escape from tyranny.]	
The Grisons league (see <i>Caddie</i>)	1400		
Second league of the Grisons	1424		
The third league of the Grisons	1436		
Battle of St. Jacobs on the Birs, near Basle			

* He considered the New Jerusalem, foretold in the Apocalypse, to be a church now about to be established, in which will be known the true nature of God and of man, of the Word, of heaven and of hell—concerning all which subjects error and ignorance now prevail, and in which church this knowledge will bear its proper fruits—love to the Lord and to one's neighbour, and purity of life.

SWITZERLAND, *continued.*

Independence of Switzerland recognised by the treaty of Westphalia (see <i>Westphalia, Peace of</i>)	1648	Dispute about the convents of Aargau; seven Catholic cantons form a separate league	1844
[From this period until the French revolution the cantons enjoyed tranquillity, disturbed only by the changes arising out of their various constitutions.]		Revolution at Geneva *	Oct. 7, 1846
Alliance with France	May 25, 1777	The league of Catholic cantons dissolved and the Jesuits expelled	1847
Domestic strife in Geneva, between the aristocratic and democratic parties: France interferes	1781	New federal constitution	Sept. 12, 1848
1000 fugitive Genevese seek an asylum in Ireland (see <i>Geneva</i>)	1782	Dispute about Neuchâtel, <i>which see.</i>	1857
Swiss guards ordered to quit France	1792	Declaration of neutrality in the coming Italian war	March 14, 1859
Helvetic confederation dissolved; its subjugation by France	1798	Mutiny and punishment of the Swiss mercenary troops at Naples; the confederation forbid foreign enlistment	July and Aug. —
Helvetic republic formed	—	Swiss government protests against the annexation of Savoy to France	March 15, 1860
Switzerland, the seat of war	1799-1802	150 Swiss, attempting to enter Savoy, are stopped by the Genevese government,	March 30, —
The number of cantons increased to 19; the federal government restored; and a landamman appointed by France	May 12, 1802	M. Thorel, a Swiss, obtains a prize at the national shooting match at Wimbledon, July	—
Uri, Schwytz, and Unterwald separate from the republic	July 13, —	The government forbid the Swiss to enlist in foreign service without permission, July 30,	—
Switzerland joins France with 6000 men, Aug. 24,	1811	Proposed European congress to preserve Swiss neutrality, put off	July, —
The allies entered Switzerland in the spring of	1814	Glarus destroyed by fire	May 3, 1861
The number of cantons increased to 22, and the independence of Switzerland secured by the treaty of Vienna	1815	French troops occupy Vallée des Dappes, Oct. 28; the Swiss announce the violation of their territory, Nov. 5; amicable solution, Nov. 7,	—

SWISS CONFEDERATION OF 1815.

Uri	{ first confederation.	Schaffhausen	Solothurn	Pays de Vaud.
Schwytz		Appenzel	Basel	Vaud
Unterwalden		St. Gall	Grisons	Neuchâtel
Zurich		Glarus	Aargau	Geneva.
Berne		Zug	Thurgau	
Lucerne		Fribourg	Tessins	

SWORDS were formed of iron taken from a mountain by the Chinese, 1879 B.C. *Univ. Hist.* The Roman swords were from 20 to 30 inches long. The broadsword and scimitar are of modern adoption. The sword of state carried at an English king's coronation by a king of Scotland, 1104. Damascus steel swords are the most prized; the next the sword of Ferrara steel. The Scotch Highlanders were accustomed to procure the latter from the celebrated artificer named Andrea di Ferrara, and used to call them their *Andrew Ferraras*. The broad-sword was forbidden to be worn in Edinburgh in 1724.

SYBARIS, a Greek colony in S. Italy, founded about 720 B.C.; destroyed by the Crotonians about 510 B.C. The people were greatly addicted to luxury, hence the term Sybarite.

SYCAMORE TREE, called by some the Egyptian fig-tree. The date of its being planted in England is not known, but it is very early. In Mrs. Jameson's "Memoirs of Female Sovereigns," we are told that Mary queen of Scots brought over from France a little sycamore tree, which she planted in the gardens of Holyrood, and that from this have sprung all the beautiful groves of sycamore now to be seen in Scotland.

SYDNEY, capital of the province of New South Wales; founded by governor Phillip, on a cove on Port Jackson, in 1788, as a British settlement for the colony of convicts originally intended for Botany Bay; now the principal seat of the government of Australasia. It was denominated Sydney in compliment to lord Sydney. It is now considerable in extent and population; both increased by vast immigrations from Great Britain and other countries of Europe, in consequence of the late discoveries of the gold fields of Australia. It has banks, various other institutions, and a legislative council, which was first held July 13, 1829; the university was opened Oct. 11, 1852. Sydney was erected into a bishopric in 1836, afterwards into an archbishopric. It was lit with gas in May 1841, the first place so lit in Australia. See *Australia, New South Wales, Convicts, &c.*

SYNAGOGUE. This word is applied to an assembly or congregation of the Jews, and sometimes the place where such assembly is collected for religious purposes. *Pardon.*

* Lucerne and the other Roman Catholic cantons had joined in a league to carry out their own views, one of which was to place the education of their youth in the hands of the Jesuits. The Protestant cantons took steps to oppose the league as an illegal encroachment on the general confederation, and the question came in due course before the grand council of Geneva. The council condemned the league, but declared that public order ought to be maintained. For this decree the Protestants of the city rebelled, deposed the council, and established a provisional government. The city was the scene of some severe fighting, and many lives were lost. Eventually tranquillity was restored, the leagued cantons having sent in their submission to the diet.

Authors are not agreed as to the time when the Jews first had synagogues. Some refer it to the time of the ceremonial law, and others to the times after the Babylonish captivity. In Jerusalem were 480 synagogues. There are in London to synagogues, in England and Wales, 53.

SYNOD. The first general synods were called by emperors, and afterwards by Christian princes; but the pope ultimately usurped this power, one of his legates usually presiding (see *Councils*). National synods were those of one nation only. The first of this kind held in England was at Hertford, A.D. 673; the last was held by cardinal Pole in 1555. Made unlawful to hold synods but by royal authority, 25 Hen. VIII. 1533. See *Dort* and *Thurles*.

SYRACUSE, S. E. Sicily, founded by Archias, 734 B.C.; 732 B.C. *Eusebius*; 749 B.C. *Univ. Hist.* See *Sicily*.

Gelon becomes supreme	B.C.	485	banished to Corinth by Timoleon, 343; who

assassinated by Callippus		353	In the insurrection, Syracuse surrendered to	
Dionysius recovers his authority, 347; but is			the Neapolitan troops	April 8, 1849

SYRIA. Of the early history of ancient Syria, a few particulars are gleaned from Scripture; and it otherwise affords nothing peculiar, being involved in the histories of the Assyrian, Babylonian, and Persian empires (*which see*). The capital of Syria was originally Damascus; but after the battle of Ipsus, Seleucus (the chief of the Seleucidae) founded the celebrated city of Antioch.

Alliance of king David and Hiram king of			Seleucus Philopator king	B.C. 187

SYRIA, *continued.*

Syria invaded by the Parthians	A.D. 162	The Five Powers propose to the Porte to negotiate with Mehemet Ali	July 16, 1839
By the Persians	256	The Egyptians expelled from Syria	1840
Violent earthquakes	341	Death of lady Hester Stanhope	June 23, —
Invaded by the Saracens, 497, 502, 529; by the Persians	607	Treaty of London (not signed by offended France)	July 15, —
Conquered by the Saracens	638	Capture of Sidon (see <i>Sidon</i>)	Sept. 27, —
Conquest of Syria by the Fatimite caliphs	970	Fall of Beyrout (see <i>Beyrout</i>)	Oct. 10, —
Revolt of the emirs of Damascus	1067	Fall of Acre (see <i>Acre</i>)	Nov. 3, —
The emirs of Aleppo revolt	1068	[After much expostulation with the sultan, the four powers, England, Austria, Russia, and Prussia, prevail upon him to make the pachalic of Egypt hereditary in the family of Mehemet Ali. This result conciliates France. See <i>Egypt</i> .]	
The crusades from Europe commence (see <i>Crusades</i>)	1095	The Druses said to have destroyed 151 Christian villages and killed 1000 persons (see <i>Druses</i>)	May 29 to July 1, 1860
Desolated by the Crusades (<i>which see</i>)	1095-1272	The Mahometans massacre Christians at Damascus; about 3300 slain; many saved by Abd-el-Kader	July 9, &c. —
Noureddin conquers Syria	1166	The English and French government intervene; a convention signed at Paris; 12,000 men to be sent by France	Aug. 3, —
Saladin dethrones the Fatimite dynasty	1171	Vigorous conduct of Fuad Pacha; he punishes the Mahometans implicated in the massacres at Damascus very severely; 167 of all ranks, including the governor, executed.	Aug. 20 <i>et seq.</i> —
The Tartars overrun all Syria	1259	4000 French soldiers, under general Hautpoul, lands at Beyrout	Aug. 22, —
The sultans of Egypt expel the Crusaders	1291	Lord Dufferin, the British commissioner in Syria, arrives at Damascus	Sept. 6, —
Syria overrun by Tamerlane	1400	The French and Turks advance against Lebanon; 14 emirs surrendered	Oct. —
Syria and Egypt conquered by the Turks under Selim	1517	Pacification of the country effected	Nov. —
Syria continued in possession of the Turks till the invasion of Egypt by the French	1798	The French occupation ceases	June 5, 1861
Bonaparte defeats the Mamelukes with great loss, Aug. 6; overruns the country, and takes Gaza and Jaffa	—	Prince of Wales visits Syria	April, 1862
Siege of Acre	March 6 to May 27, 1799		
Bonaparte returns to France from Egypt, Aug. 23, Egypt and Syria evacuated by the French army, Sept. 10, 1801	—		
Mehemet Ali attacks and captures Acre, and overruns the whole of Syria	1831-32		
Ibrahim Pacha, his son, defeats the army of the grand signior at Konieh	Dec. 21, 1832		
[Numerous battles and conflicts follow with various success.]			
And again at Nezeb, making 10,000 prisoners, June 24, 1839	1839		
The Turkish fleet arrives at Alexandria, and places itself at the disposal of Mehemet Ali, July 14, —	—		

T.

TABERNACLE, the Holy Place of the Israelites, till the erection of Solomon's temple, was constructed by Divine direction, 1491 B.C. When the Jews were settled in Canaan, the tabernacle was set up at Shiloh by Joshua 1444 B.C. It was replaced by the temple erected by Solomon, 1004 B.C.—The chapel erected for George Whitfield in Moorfields in 1741, being of a temporary nature, received the name of Tabernacle, which was afterwards given to their chapels by the Calvinistic Methodists. Whitfield's Tabernacle in Tottenham-court-road was erected in 1756, and enlarged in 1760. His lease expired in 1828; and the chapel was opened by the Independents in 1830. A large Metropolitan Tabernacle, erected for the ministrations of Mr. C. H. Spurgeon, a Baptist, near the Elephant and Castle, Kennington-road, Surrey, was opened on March 31, 1861.

TABOR, in Bohemia, was founded by Ziska in 1419, and became the chief seat of the Hussites, or Taborites. Casimir of Poland, invited to be their king, was defeated here by Albert of Austria in 1438. Tabor itself was taken by the emperor in 1544.

TADMOR. See *Palmyra*.

TAEPIINGS. See *China*, note.

TAFFETY, an early species of silken manufacture, more prized formerly than now, woven very smooth and glossy. It was worn by our elder queens, and was first made in England by John Tyce, of Shoreditch, London, 41 Eliz. 1598. *Stow's Chron.*

TAGLIACOZZO, in the Abruzzi mountains, S. Italy, where, on Aug. 23, 1268, Charles of Anjou, the usurping king of Naples, defeated and made prisoner the rightful monarch, young Conradin, the last of the Hohenstaufens, and grandson of the emperor Frederic II. Conradin had been invited into Italy by the Ghibelline or Imperial party; their opponents, the Guelfs or papal party, supporting Charles. The latter basely caused his prisoner to be beheaded, Oct. 29, following.

TAHITI. The French or abbreviated name for Otaheite. See *Otaheite*.

TALavera de la Reyna, Central Spain, was taken from the Mahometans by Ordoño, king of Leon, 913. Here a battle was fought July 27, 28, 1809, between the united British and Spanish armies under sir Arthur Wellesley (19,000 British and 30,000 Spaniards), and the French army (47,000) commanded by marshals Victor and Sebastiani. After a battle on the 27th, both armies remained on the field during the night, and the French at break of day renewed the attack, but were again repulsed by the British with great slaughter. At noon Victor charged the whole British line, but was repulsed at all points, and sir Arthur Wellesley secured the victory, the enemy retreating with the loss of 10,000 men and 20 pieces of cannon. The British lost 800 killed, and 4000 wounded or missing. Soult, Ney, and Mortier, being in the rear, obliged the British to retire after the battle.

TALBotype. See *Photography*.

TALLY OFFICE. The Tally Court in the Exchequer took its name from the French word *tallier*, to cut. A tally is a piece of wood written upon both sides, containing an acquittance for money received; which being cloven asunder by an officer of the Exchequer, one part, called the stock, was delivered to the person who paid, or lent, money to the government; and the other part, called the counter-stock, or counter-foil, remained in the office, to be kept till called for, and joined with the stock. This manner of striking tallies is very ancient. *Beaton*. The practice was ordered to be discontinued in 1782. See *Exchequer*.

TALMUDS two books of the doctrine of the religion and morality of the Jews,—the Talmud of Jerusalem, and the Talmud of Babylon. The one composed by the Rabbi Juda Hakkadosh, about the close of the second century; the second being commentaries, &c., by succeeding rabbis, were collected by Ben Eliezer, about the sixth century. Abridged by Maimonides in the twelfth century.

TANAGARA (Bœotia). Here the Spartans defeated the Athenians 457 B.C.; but were defeated by them in 426. In the latter contest Agis II. headed the Spartans, and Nicias the others.

TANDY, JAMES NAPPER, HIS ARREST. He proposed his plan of reform in 1791. In the French expedition against Ireland, he acted as a general of brigade, Aug. 1798. He failed, and fled to Hamburg, and was there delivered up to the English, Nov. 24; for which Bonaparte declared war upon Hamburg, Oct. 15, 1799. Napper Tandy was liberated after the peace of Amiens in 1802.

TANGIERS (N.W. Africa). Besieged by prince Ferdinand of Portugal, who was beaten and taken prisoner, 1437. It was conquered by Alfonso V. of Portugal in 1471, and given as a dowry to princess Catherine, on her marriage with Charles II. of England, 1662; but he did not think it worth keeping, and in 1683, caused the works to be blown up, and the place abandoned. Tangiers afterwards became a piratical station: but the discontinuance of piracy has greatly diminished its importance.

TANISTRY. In Ireland, upon the death of any one, his land was divided among all the males of his family, legitimate or not; and if any of them afterwards died, his portion was not shared out among his sons, but the chieftain or tanist made a new partition at his discretion among the surviving brothers. Abolished 1604. *Davies on Ireland*.

TANNING leather with the bark of trees was early practised. It was introduced into these countries from Holland by William III. for raising orange-trees about 1789. It was discontinued until about 1719, when ananas were first brought into England. Great improvements have been made in tanning in consequence of the increase of chemical knowledge.

TANTALUM, a rare metal, discovered in an American mineral by Hatchett in 1801, and named by him Columbium; and in a Swedish mineral by Ekeberg, who gave it its present name. Wollaston pointed out the identity of the two metals in 1809; and Berzelius prepared pure metallic tantalum in 1824. In 1846 Rose discovered that tantalum was really a mixture of three metals, which he named tantalum, niobium, and pelopium. *Gmelin*.

TAPESTRY. An art of weaving borrowed from the Saracens, and hence its original workers in France were called *Sarrazinois*. The invention of tapestry hangings belongs [the date is not mentioned] to the Netherlands. *Guicciardini*. Manufactured in France under Henry IV. by artists invited from Flanders, 1606. The art was brought into England by William Sheldon; and the first manufactory of it was established at Mortlake by sir Francis Crane, 17 James I. 1619. *Salmon*. Under Louis XIV. the art of tapestry was much improved in France. See *Gobelin Tapestry*. Very early instances of making tapestry are mentioned by the ancient poets, and also in Scripture; so that the Saracens' manufacture is a revival of the art. For the tapestry wrought by Matilda of England, see *Bayeux Tapestry*.

TAR. Liquid pitch; the turpentine of the pine or fir drained out by fire, *Spencer*. The chemist Becher first proposed to make tar from pit-coal—the earl of Dundonald's patent, 1781. The mineral tar was discovered at Colebrook-dale, Shropshire, 1779; and in Scotland, Oct. 1792. Tar-water was first recommended for its medicinal virtues by the good Dr. Berkeley, bishop of Cloyne, about 1744. From coal-tar brilliant dyes are now produced. See *Aniline*.

TARA, a hill in Meath, Ireland, where it is said a conference was held between the English and Irish in 1173. Near here was fought one of the earliest battles in the rebellion of 1798 between the royalist troops, only 400 strong, and the insurgent Irish, May 26. The rebels amounted to 4000 men, yet were completely defeated, losing 500 killed. On Aug. 15, 1843, Daniel O'Connell held a monster meeting here (250,000 persons said to have been assembled).

TARANTULA. See *Dance*.

TARBES (S. France, near the Pyrenees). The French army under marshal Soult, in great strength, was forced from its position at Tarbes, with considerable loss, by the British army commanded by the duke of Wellington, March 20, 1814. This engagement shortly preceded the battle of Toulouse, the final battle of the Peninsular army. See *Toulouse*.

TARENTUM (now *Taranto*, S. Italy), was founded by the Greek Phalantus, B.C. 708. The people of Tarentum, assisted by Pyrrhus, king of Epirus, supported a war against the Romans, which had been undertaken B.C. 281, by the Romans, to avenge the insults the Tarentines had offered to their ships when near their harbours; it was terminated after ten years; 300,000 prisoners were taken, and Tarentum became subject to Rome. Tarentum has shared in all the revolutions of Southern Italy.

TARIFF, a book of rates or duties charged on goods exported or imported. The tariff of this country in 1840 comprised 1042 articles, the number was reduced (by sir Robert Peel) in 1845 and 1847. It comprised 439 articles in 1857; the number was greatly reduced in 1860.

TARRAGONA (N.E. Spain), occupied as a naval station by the British before their capture of Gibraltar, in 1704. It was stormed and sacked by the French, Jan. 28, 1811, and the inhabitants, man, woman, and child, put to the sword. The military achievement was creditable to the talents, but the cruelty most dishonourable to the character, of marshal Suchet. Tarragona was besieged by general sir James Murray, in May 1813; but the siege was soon raised.

TARTAN, or **HIGHLAND PLAID**. This dress of the Scottish Highlanders is said to have been derived from the ancient Gauls, or Celtæ, the *Galli non-braccati*.

TARTARIC ACID is said to have been the first discovery of the eminent chemist, Scheele, who procured it in a separate state by boiling tar with lime, and in decomposing the tartrate of lime thus formed, by means of sulphuric acid about 1770. In 1859 Baron Liebig formed tartaric acid from other sources.

TARTARY (Asia). The Tartars or Mongols were known in antiquity as Scythians. During the decline of the Roman empire, these tribes began to seek more fertile regions; and the first who reached the frontier of Italy, were the Huns, the ancestors of the modern Mongols. The first acknowledged sovereign of this vast country was the famous Genghis Khan, A.D. 1206. His empire, by the conquest of China, Persia, and all Central Asia, became one of the most formidable ever established; but it was split into parts in a few reigns. Timur, or Tamerlane, again conquered Persia, broke the power of the Turks in Asia Minor, 1402, and founded a dynasty in India, which formed the most splendid court in Asia, till the close of the eighteenth century. See *Golden Horde*.

TASMANIA, a settlement in Van Diemen's Land (*which see*).

TAVERNS, in this country were places of entertainment, under various names, in ancient times. Taverns, as so called, may be traced to the thirteenth century. "In the reign of king Edward the Third *only three taverns* were allowed in London: one in Chepe, one in Walbrook, and the other in Lombard-street." * *Sir Henry Spelman*. The *Boar's Head*, in Eastcheap, existed in the reign of Henry IV. and was the rendezvous of prince Henry, and his dissolute companions. Shakspeare mentions it as the residence of Mrs.

* Taverns were restricted by an act of Edward VI. 1552, to 40 in London, 8 in York, 4 in Norwich, 3 in Westminster, 6 in Bristol, 3 in Lincoln, 4 in Hull, 3 in Shrewsbury, 4 in Exeter, 3 in Salisbury, 4 in Gloucester, 4 in Chester, 4 in Hereford, 3 in Worcester, 3 in Southampton, 4 in Canterbury, 3 in Ipswich, 3 in Winchester, 3 in Oxford, 4 in Cambridge, 3 in Colchester, 4 in Newcastle-upon-Tyne.

Quickly, and the scene of Sir John Falstaff's merriment. *Shakespeare, Henry IV.* Of little less antiquity is the *White Hart*, Bishopsgate, established in 1480; this house was rebuilt in 1829. Taverns were licensed in 1752.

TAXES. The first levied on the people were by Solon, the first Athenian legislator, 540 B.C. The first class of citizens paid an Attic talent of silver, about 55*l.* of our money. The next was by Darius, the son of Hystaspes, which was a land-tax by assessment, and deemed so odious that his subjects styled him by way of derision, Darius the Trader, 480 B.C. *D'Eon's Histoire des Finances.* Taxes in specie were first introduced into England by William I. 1067, and he raised them arbitrarily; yet subsidies in kind, as in wool, leather, and other products of the country, continued till the accession of Richard II. 1377. *Camden.* See *Revenue and Income Tax.**

ASSESSED TAXES.		LAND TAX.		PROPERTY TAX.	
1800	£3,468,131	1800	£1,307,941	1801	£5,716,572
1805	4,508,782	1805	1,596,481	1804	4,650,000

TCHERNAYA, a river in the Crimea. On Aug. 16, 1855, the lines of the allied army at this place were attacked by 50,000 Russians under prince Gortschakoff without success, being repulsed with the loss of 3329 slain, 1658 wounded, and 600 prisoners. The brunt of the attack was borne by two French regiments under general D'Herbillion. The loss of the allies was about 1200; 200 of these were from the Sardinian contingent, which behaved with great gallantry under the command of general La Marmora. The Russian general Read, and the Sardinian general Montevecchio, were killed. The object of the attack was the relief of Sebastopol, then hotly besieged by the English and French.

TEA.† First known in Europe, being brought from India by the Dutch, 1610. It is mentioned as having been used in England on very rare occasions prior to 1657, and sold for 6*l.* and even 10*l.* the pound.

Samuel Pepys records his first "cup of tea."

Sept. 25, 1660
A duty of 8*s.* was charged upon every gallon of tea made for sale (12 Ch. II. c. 13), 1660; the East India company first imported it. 1669

It was brought into England in 1666, by lord Ossory and lord Arlington, from Holland; and being admired by persons of rank, it was imported from thence, and generally sold for 60 shillings per pound, till our East India Company took up the trade. *Anderson.*

Green tea began to be used. 1715
Price of black tea per lb. 13*s.* to 20*s.*, of green, 12*s.* to 30*s.* 1728

The duty imposed on tea in America, 1767; this tax occasioned the destruction of 17 chests at New York, and 340 at Boston, Nov. 1773, and ultimately led to the American war (see *Boston*).

Tea-dealers obliged to have sign-boards fixed up, announcing their sale of tea. Aug. 1779

Commutation act for reducing the duty on tea

from 50 to 12½ per cent. and taxing windows in lieu. June, 1784

"Millions of pounds' weight of sloe, liquorice, and ash-tree leaves, are every year mixed with Chinese teas in England." *Report of the House of Commons* 1818

"The consumption of the whole civilized world, exclusively of England, is about 22,000,000 of pounds, while the annual consumption in Great Britain is 30,000,000." *Evidence in House of Commons* 1830

The first tea-sale in London on the abolition of the exclusive privilege of the East India Company took place in Mincing-lane, Aug. 19, 1834

New duties were charged, 1795; the duty was 6*s.* and 10*s.* per cent., made 2*s.* 1*d.* per pound 1836

The duty derived from the import of tea in 1850 amounted to 5,471,461*l.*; and the amount was 5,902,433*l.* in 1852

Various charges made in 1854, 1855, and 1856

Duty of 1*s.* 5*d.* per pound begun April, 1857

The duty upon tea had been gradually reduced from 2*s.* 2*d.* to 1*s.* only per pound 1858

* The assessed taxes in Ireland, being very unproductive, were repealed in 1823. Mr. Gladstone, chancellor of the exchequer, in his budget of 1853, modified and extended the Income-tax (which was made to embrace Ireland). This tax was to be gradually reduced every two years, and to be altogether abolished at the end of seven years. Many of the assessed taxes, and various of the excise and custom duties were reduced or abolished, affording relief from direct and indirect taxation to the amount of 5,384,000*l.* The expenditure consequent on the war with Russia prevented Mr. Gladstone's plans from being carried into effect.

† *Thea Bohea*, black tea; *Thea Viridica*, green tea. Brought to these realms from China, about 1768. The finest tea-plant known in England was raised in Kew-gardens; but the first that ever flourished in Europe was one belonging to the duke of Northumberland at Sion. The attempts to cultivate the tea-plant, however, in England—indeed in Europe—have altogether failed. *Ashe.*

TEA, *continued.*

TEAS IMPORTED INTO ENGLAND, OR CHARGED WITH DUTY, IN THE FOLLOWING YEARS:—

1726	lb. 700,000	1815	lb. 26,368,000	1845	lb. 44,193,433
1766	7,000,000	1820	25,662,474	1850	govt. returns 50,512,364
1792	13,185,000	1825	24,803,668	1856	86,200,414
1800	23,723,000	1830	39,544,494	1858	75,432,333
1805	24,133,000	1835	44,364,550	1859	75,977,451
1810	25,414,000	1840	38,068,555	1861	96,577,382

TE-DEUM. A kind of hymn or song of thanksgiving used in the Romish and English Church, beginning with the words *Te Deum laudamus*—We praise thee, O God. It is generally supposed to be the composition of Augustin and Ambrose, about A.D. 390; and is still sung in the Romish Church with extraordinary pomp and solemnity on a national thanksgiving for a great victory, a bounteous harvest, or an averted evil.

TEETOTALER. Richard Turner, an artisan of Preston, Lancashire, in addressing temperance meetings acknowledged that he had been a hard drinker, and being an illiterate man, and in want of a word to express how much he then abstained from malt and spirits, exclaimed "I am now a Teetotaler;" about 1831. See *Temperance*.

TELEGRAPHS. Polybius calls the different instruments used by the ancients for communicating information, *pyrsiæ*, because the signals were always made by fire. In 1663, a plan was suggested by the marquess of Worcester, and a modern telegraph was suggested by Dr. Hooke, 1684. M. Amontons is also said to have been the inventor of telegraphs about this period. It was not till 1793 that the instrument was applied to useful purposes: M. Chappe then invented the telegraph first used by the French. Two were erected over the Admiralty-office, London, 1796. The Semaphore was erected there 1816. The naval signals by telegraph enabled 400 previously concerted sentences to be transmitted from ship to ship, by varying the combinations of two revolving crosses, and also to spell any particular words, letter by letter. See *Electric Telegraph*, under *Electricity*.

TELESCOPES. This invention is noticed by Leonard Digges, about 1571. Roger Bacon, about A.D. 1250, described telescopes and microscopes exactly, and yet neither were made till one Metius, at Alkmaar, and Jansen, of Middleburg, made them about the same time, 1590-1609; the latter from an accidental discovery made by his children. Galileo imitated their invention by its description, and made three in succession, one of which magnified a thousand times, 1630. With these he discovered Jupiter's moons and the phases of Venus. Telescopes became very popular, and were improved by Zuechi, Huyghens, Gregory, and Newton, and afterwards by Martin, Hall, Dollond, and Herschel.

The reflecting telescope invented by Newton 1668
Achromatic telescopes made by More Hall about 1723
A telescope made in London for the observatory of Madrid, which cost 11,000*l.* in 1802; but the Herschel telescope, made 1789-1795, was superior; it had the great speculum 48 inches diameter, 34 inches thick, weighed 2118 lbs., and magnified 6400 times. See *Herschel*.
The earl of Rosse erected on his estate at Parsonstown, in Ireland, the largest telescope ever constructed, at a cost exceeding 20,000*l.* This wonderful instrument is 7 feet in diameter, and 52 feet in length; the machinery is supported on massive walls, and notwith-

standing its great weight and size, is moved with the utmost ease, and can be lowered to any angle, while it sweeps the horizon by means of wheels running on a graduated circle 1828-1845
One of gigantic size, 85 feet in length (very imperfect), completed at Wandsworth by the rev. John Craig 1852
Magnificent equatorial telescopes set up at the national observatories at Greenwich and Paris 1860
M. Foucault exhibits at Paris a reflecting telescope the mirror 314 inches in diameter; the focal length 174 feet 1862

TELLURIUM, a rare metal, in its natural state containing small quantities of iron and gold, was discovered by Reichenstein in 1782.

TEMPERANCE SOCIETIES. They originated with Mr. Calhoun, who, while he was secretary of war in America, in order to counteract the habitual use of ardent spirits among the people, had them prohibited altogether to the United States' army, 1818. The first public temperance society in America was projected in 1825, and formed Feb. 13, 1826. Temperance societies immediately afterwards spread in England and Scotland, and in 1831 there were 1000 such societies in the United States, and several hundreds in the latter countries. In Ireland, the rev. Dr. Edgar, of Belfast, published upon temperance in 1829-31; and the rev. Father Mathew, a Roman Catholic clergyman, affirmed that, in 1839, 1840, and 1841, he had made more than a million of converts to temperance.* See *Teetotaler*.

* This success was probably owing to the general poverty, as the majority of the converts are stated to have relapsed on the return of prosperity. Father Mathew arrived in America in July, 1849, but was not so successful there. He died Dec. 8, 1856, aged 66.

TEMPLARS. The first military order of Knights Templars was founded in A.D. 1118, by Baldwin II., king of Jerusalem. The Templars were numerous in several countries, and came to England 1185. Their wealth having excited the cupidity of the French kings, the order was suppressed by the council of Vienna, and part of its revenues were bestowed upon other orders in 1312. Numbers of the order were burned alive and hanged in 1310, and it suffered great persecutions throughout Europe. The grand-master Molay was burnt alive at Paris in 1314.

TEMPLE (London), thus called as having been the dwelling of the Knights Templars. At the suppression of that order, it was purchased by the professors of the common law, and converted into inns, 1340. They are called the Inner and Middle Temple, in relation to Essex-house, which was also a part of the house of the Templars, built in 1185, and called the Outer Temple, because it was situated without Temple Bar.—St. Mary's or the Temple Church, situated in the Inner Temple, is an ancient Gothic stone building, erected by the Templars in 1240, and is remarkable for its circular vestibule, and for the tombs of the Crusaders, who were buried here. The church was recased with stone by Mr. Smirke in 1828.—The *Temple-Hall* was built in 1572, and *Temple Bar* in 1672. The new Middle Temple library was opened by the prince of Wales, Oct. 31, 1861.

TEMPLES originated in the sepulchres built for the dead. *Eusebius*. The Egyptians were the first who erected temples to the gods. *Herodotus*. The first erected in Greece is ascribed to Deucalion. *Apollonius*.

The temple of Jerusalem built by Solomon, 1012 B.C.; consecrated 1004; fired by Nebuchadnezzar 587; rebuilt, 536; pillaged by Antiochus, 170; rebuilt by Herod, 18; destroyed by Titus, A.D. 70.

The temple of Apollo, at Delphi, first a cottage with boughs, built of stone by Trophonius, about 1200 B.C.; burnt by the Pisistratidae, 548; a new temple raised by the family of the Alcmaeonidae, about 573.

Temple of Diana at Ephesus, built seven times; planned by Ctesiphon, 544 B.C.; fired by Herostatus, to perpetuate his name, 356 B.C.; torebuild

it employed 220 years; destroyed by the Goths, A.D. 260.

The temple of Piety was built by Acilius, on the spot where once a woman had fed with her milk her aged father, whom the senate had imprisoned, and excluded from all aliments. *Val. Max.*

Temple of Theseus, built 480 B.C., is at this day the most perfect ancient edifice in the world.

Most of the heathen temples were destroyed throughout the Roman empire by Constantine the Great, A.D. 331. See *separate articles*.

TENERIFFE (Canaries, N.W. coast of Africa). The celebrated Peak of Teneriffe is 15,396 feet above the level of the sea. It was ascended in 1856 by professor C. Piazzi Smyth for astronomical observations. An earthquake in this island destroyed several towns and many thousands of people in 1704. In an unsuccessful attack made at Santa Cruz, admiral (afterwards lord) Nelson lost his right arm, and 141 officers and men were killed, July 24, 1797. For the particulars of this heroic affair, see *Santa Cruz*.

TENTHS. See *Tithes*.

TERMS OF LAW AND VACATIONS. They were instituted in England from the Norman usage, the long vacation being suited to the time of the vintage in France, 14 Will. I. 1079. *Glanville de Leg. Anglie*. They were gradually formed. *Spelman*. The terms were fixed by statute 11 Geo. IV. and 1 Will. IV. July 22, 1830: *Hilary Term* to begin Jan. 11, and end Jan. 31; *Easter*, April 15, to end May 8; *Trinity*, May 22, to end June 12; *Michaelmas*, Nov. 2, to end Nov. 25. This act was amended 1 Will. IV. Nov. 15, 1830.

TERROR. See *Reign of*.

TEST ACT, a statute of Charles II. directing all officers, civil and military, under government, to receive the sacrament according to the forms of the Church of England, and to take the oaths against transubstantiation, &c: enacted March, 1673. The Test and Corporation acts were repealed by statute in 1828.

TESTER. *Testone*. A silver coin struck in France by Louis XII. 1513; and also in Scotland in the time of Francis II. and of Mary, queen of Scots, 1559. It was so called from the head of the king, stamped upon it. In England the tester was of 12d. value in the reign of Henry VIII., and afterwards of 6d. (still called a tester).

TETUAN, Morocco, was entered by the Spaniards, Feb. 6, 1860, after gaining a decisive victory, on Feb. 4. The general, O'Donnell, was made a grandee of the first class.

TEUTONES (hence *Deutsche*, German), a people of Germany, who with the Cimbri made incursions upon Gaul, and cut to pieces two Roman armies, 113 and 105 B.C. They were at last defeated by the consul Marius at Aix, and an infinite number made prisoners, 102 B.C. See *Cimbri*, with whom authors commonly join the Teutones. The appellation came to be applied to the German nation in general.

TEUTONIC ORDER, military knights established in the Holy Land about 1191, through the humanity of the Germans (Teutones) to the sick and wounded of the Christian army in the Holy Land, under the celebrated Guy of Lusignan, when before Acre. The order was confirmed by a bull of pope Celestine III. On their return to Germany, they were invited to subdue and christianise the country now called Prussia and its neighbourhood, which they gradually accomplished. A large part of their possessions was incorporated into Poland in 1466, and into Brandenburg about 1521. In 1525, the grand-master was made a prince of the empire. The order was dissolved, and its remaining possessions seized, by Napoleon I. in 1809. See *Prussia*, &c.

TEWKESBURY (Gloucestershire), where Edward IV. gained a decisive victory over the Lancastrians, May 4, 1471. Queen Margaret, the consort of Henry VI. and her son were taken prisoners. The queen was conveyed to the Tower of London, where king Henry expired a few days after this fatal engagement; being, as is generally supposed, murdered by the duke of Gloucester, afterwards Richard III. The queen was ransomed in 1475 by the French king, Louis XI., for 50,000 crowns. This was the last battle between the houses of York and Lancaster. See *Roses*.

TEXAS (N. America). Separated from Mexico in 1836. Its independence was acknowledged in 1840. Its proposed annexation led to war between Mexico and the United States. It was admitted into the union by the latter in 1846, and seceded from it in 1861.

TEXEL (at the mouth of the Zuyder Zee, Holland). Its vicinity has been the scene of memorable naval achievements. An engagement of three days' continuance, between the English under Blake, Dean, and Monk, and the Dutch under Van Tromp and De Ruyter, in which the latter were worsted, and admiral Van Tromp was killed, 1653. Again, in the mouth of the Texel, when D'Estrees and Ruyter were signally defeated, Aug. 11, 1673. The Dutch fleet vanquished by lord Duncan, on Oct. 11, 1797. See *Camperdown*. The Dutch fleet of twelve ships of war, and thirteen Indiamen, surrendered to admiral Mitchell, who, entering the Texel, possessed himself of them without firing a shot, Aug. 28, 1799.

THALLIUM, a metal, occurring in the sulphuric acid manufacture, discovered by Mr. Wm. Crookes, by means of the spectrum analysis in March 1861.

THAMES (London). The richest river in the world. It has been erroneously said that its name is Isis till it arrives at Dorchester, when being joined by the Thame or Tame, it assumes the name of Thames. What was the origin of this vulgar error cannot now be traced: poetical fiction, however, had perpetuated the error, and invested it with a kind of classical sanctity. It was called Thames or Tems before it came near the Thames. *Comden*.

The river rose so high at Westminster that the lawyers were brought out of the hall in boats 1235
It rose to a great height, 1736, 1747, 1762 . . . 1791

The conservation of the Thames was given to the mayors of London . . . 1489

The Thames was made navigable to Oxford . . . 1624

It ebbed and flowed twice in three hours, 1658; again, three times in four hours, March 22, 1682; again, twice in three hours Nov. 24, 1777

An act of parliament gave the conservation of the Thames to the corporation of London: twelve conservators were to be appointed—three by the government . . . 1857

In consequence of the great contamination of the river by the influx of the sewage of London, and the bad odours emanating from it in the summer of 1666, an act was passed empowering the Metropolitan Board of Works (*which see*) to undertake its purification by constructing new drainage. The works are now in progress . . . 1862

THAMES EMBANKMENT: sir Christopher Wren recommended it in 1666. The Corporation embanked a mile in 1767. It was further recommended by sir F. French, in 1824; by the duke of Newcastle in 1844; and by John Martin the painter in 1858. In 1860, the Metropolitan Board of Works recommended that the north bank of the Thames should be embanked; whereby the bed of the river would be improved; a low-level sewer could be easily constructed beneath a broad roadway; docks to be constructed within

the embankment wall; the expense to be defrayed by the city duties on coal, and by means provided by government. The principle of this recommendation was approved by parliament, and a committee was appointed, which sat for the first time April 30, 1861
An act for "embanking the north side of the Thames from Westminster bridge to Blackfriars bridge, and for making new streets in and near thereto," passed Aug. 7; the work begun in . . . Nov., 1862

Mr. J. W. Bazalgette presented a report, with a plan for embanking the south side of the Thames . . . Nov. 6, —

THAMES TUNNEL.—Projected by Mr. I. K. Brunel, to form a communication between Rotherhithe and Wapping. The bill received the royal assent, June 24, 1824. The shaft was begun in 1825; the first brick was laid by Mr. Smith, March 2; the excavation commenced, April 1; and the first horizontal excavation . . . In Dec. 1825

At a distance of 544 feet from the shaft, the first interruption took place . . . May 18, 1827

The second interruption, by which six workmen perished . . . Jan. 12, 1828

The tunnel was opened throughout for foot-passengers, March 25, 1843. The length of the tunnel is 1300 feet; its width is 35 feet; height, 20 feet; clear width of each archway, including foot-path, about 14 feet; thickness of earth between the crown of the tunnel and the bed of the river, about 15 feet.

THANE. A title much in use anciently, and which sometimes signifies a nobleman, sometimes a freeman, and sometimes a magistrate, but most properly an officer under the king. The Saxons had a nobility called thanes, and the Scots also, among whom the title was more general, particularly in the time of Malcolm. The title was abolished in England at the conquest, upon the introduction of the feudal system. Abolished in Scotland by king Malcolm III., when the title of earl was adopted, 1057.

THANET, Kent, was the first permanent settlement of the Saxons, A.D. 428. The Danes held a part of it 853-865, and ravaged it 980.

THEATINES. An order of religious, the first who assumed the title of regular clerks, founded by Caraffa, bishop of Theate, in Naples (afterwards pope Paul IV.), 1524, to repress heresy. They first established themselves in France, according to the historian Hénault, in Paris, 1644. The Theatines endeavoured, but vainly, to revive among the clergy the poverty of the apostles. *Ashæ.*

THEATRES. That of Bacchus, at Athens, built by Philos, 420, B.C., was the first erected. Marcellus' theatre at Rome was built about 80 B.C. Theatres were afterwards numerous, and were erected in most cities of Italy. There was a theatre at Pompeii, where most of the inhabitants of the town were assembled on the night of Aug. 24, A.D. 79, when an eruption of Vesuvius covered Pompeii. Scenes were introduced into theatres, painted by Balthazar Sienna, A.D. 1533. See *Drama, Plays, &c.*

THEATRES IN ENGLAND. The first royal licence for a theatre in England was in 1574, to master Burbage and four others, servants of the earl of Leicester, to act plays at the Globe, Bankside. See *Globe*. But, long before that time, miracle plays were represented in the fields. The prices of admission in the reign of queen Elizabeth were—gallery, 2d.; lords' rooms, 1s. The first play-bill was dated April 8, 1663, and issued from Drury-lane; it runs thus: "By his Majestie his company of Comedians at the New Theatre in Drury-lane, will be acted a comedy called the *Humorous Lieutenant*." After detailing the characters, it concludes thus: "The play will begin at three o'clock exactly." Lincoln's-inn theatre was opened in 1695. The licensing act (10 Geo. II. c. 28, 1735) was passed in consequence of the performance of Fielding's *Pasquin* at the Haymarket, satirising Walpole's administration. Marionettes or Puppets were produced at the Adelaide Gallery in 1852. See *Covent Garden, Drury Lane, Opera House, Drama, &c.* In Jan. 1860 several of the theatres were first opened on Sunday evenings for religious worship, and were filled.

Subscription testimonial (value 2000 <i>l.</i>) presented to C. J. Kean: Mr. Gladstone in the chair	Feb. 1862
	March 22, —

THEATRICAL FUNDS. The Theatrical fund of Covent Garden was established in 1765; that of Drury Lane in 1776. They grant pensions to their members and their families. The General Theatrical fund was established in 1839.

THEBES or **LUXOR**, in Egypt, called also *Hecatompylos* on account of its hundred gates, and *Diospolis*, as being sacred to Jupiter. In the time of its splendour, it extended above thirty-three miles, and upon any emergency could send into the field, by each of its hundred gates, 20,000 fighting men and 200 chariots. Thebes was ruined by Cambyses, king of Persia, 521 B.C., and few traces of it were seen in the age of Juvenal. *Plutarch*. **THEBES** (the capital of the country successively called Aonia, Messapia, Ogygia, Hyantis, and Beotia) was called Cadmeis, from Cadmus, its founder, 1493 B.C. It became a republic about 1120 B.C., and flourished under Epaminondas 378—362 B.C. It was taken by the Romans, 98. See *Beotia* and *Greece*.

THEFT. This offence was punished by heavy fines among the Jews. By death at Athens, by the laws of Draco. See *Draco*. The Anglo-Saxons nominally punished theft with death, if above 12*d.* value; but the criminal could redeem his life by a ransom. In the 9th of Henry I. this power of redemption was taken away, 1108. The punishment of theft, was very severe in England, till mitigated by Peel's acts, 9 & 10 Geo. IV. 1829. The laws respecting theft were consolidated in 1862.

THEISTS (*Theos*, God). A kind of deists about 1660. *Dean Martin*.

THEOPHILANTHROPISTS (lovers of God and man), a sect formed in France in 1796; was headed by one of the five directors, Lepaux, in 1797, and broke up in 1802.

THELLUSSON'S WILL. One of the most singular testamentary documents ever executed. Mr. Peter Isaac Thellusson, an affluent London merchant, left 100,000*l.*, to his widow and children; and the remainder, amounting to more than 600,000*l.*, he left to trustees, to accumulate during the lives of his three sons, and the lives of their sons; then the estates, directed to be purchased with the produce of the accumulating fund, were to be conveyed to the eldest lineal male descendant of his three sons, with the benefit of survivorship. Should no heir then exist, the whole was to be applied, by the agency of the sinking-fund, to the discharge of the national debt. Mr. Thellusson died on July 21, 1797. His will incurred much public censure,* and was contested by the heirs-at-law, but finally established by a decision of the house of lords, June 25, 1805. The last surviving grandson died

* In 1800 an act of parliament was passed, preventing testators devising their property for purposes of accumulation for longer than 20 years after their death.

in Feb. 1856. A dispute then arose whether the eldest male descendants or the descendants of the eldest son should inherit the property. The question was decided on appeal to the house of lords (June 9, 1859), in favour of the latter, lord Rendlesham, and Charles S. Thellusson, confirming the decision of the Master of the Rolls in 1858. In consequence of legal expenses the property is said not to exceed greatly its value in the testator's lifetime.

THEOLOGY (from the Greek *Theos*, God), the science which treats of the nature and attributes of God, of his relations to man, and of the manner in which they may be discovered. It is generally divided into two heads. 1. *Inspired* (including the Holy Scriptures, their interpretation, &c.). 2. *Natural*; which latter lord Bacon calls the first part of Philosophy.—Butler's Analogy of Religion (1736) and Paley's Natural Theology (1802), are eminent books on the latter subject.—The "Summa Totius Theologiæ" by Thomas Aquinas (born about 1224), a standard Roman Catholic work, was printed with commentaries, &c., in 1596.

THERMOMETER. The invention of this instrument is ascribed to several scientific persons, all about the same time. To Galileo, 1597. *Libri*. Invented by Drebbel of Alcmæar A.D. 1609. *Boerhaave*. Invented by Paulo Sarpi, 1609. *Fulgencio*. Invented by Sanctorio in 1610. *Borelli*. Fahrenheit's thermometer was invented about 1726; Reaumur's and Celsius's (the latter now termed Centigrade) soon after. Fahrenheit's scale is usually employed in England and Reaumur's and the Centigrade on the continent. Freezing point: *Fah.* 32°; *R.* 0°; *C.* 0°. Boiling point: *Fah.* 212°, *R.* 80, *C.* 100. The mode of construction by substituting quicksilver for spirits was invented some years subsequently. Halley proposed it in 1697. Mr. L. M. Casella issued a minimum thermometer in Sept. 1861. It registers degrees of cold by means of mercury; hitherto deemed impossible.

THERMOPYLÆ, in Doris N. Greece. Leonidas at the head of 300 Spartans, and 700 Thespians, at the defile of Thermopylæ, withstood the whole force of the Persians during three days, Aug. 7, 8, 9, 480 B.C., when Ephialtes, a Trachinian, perfidiously leading the enemy by a secret path up the mountains, brought them to the rear of the Greeks, who, thus placed between two assailants, devoted themselves to the good of their country, and perished gloriously on heaps of their slaughtered foes. Of the 300 heroes who engaged in this conflict with hundreds of thousands of the Persians, one man only returned home, and he was received with reproaches and insults for having fled from a battle in which his brave companions with their royal leader had fallen. Twenty thousand Persians perished by the hands of the Spartans.—Here Antiochus the Great, king of Syria, was defeated by the Romans, 191 B.C.

THESSALONICA (now Salonica), a city in Macedonia. Here Paul preached, A.D. 53; and to the church here he addressed two epistles in 54. In consequence of seditions, a frightful massacre of the inhabitants took place in 390, by order of the emperor Theodosius. Thessalonica partook of the changes of the Eastern empire. It was sold to the Venetians by the emperor Andronicus in 1425; taken by the Turks in 1430; burnt, July 11, 1856.

THESSALY (N. Greece). A country much celebrated in classical history, as being the seat of many of the adventures described by the poets. The first king of whom we have any certain knowledge was Hellen, son of Deucalion, from whom his subjects were called Hellenists, a name afterwards extended to all Greece. From Thessaly the most powerful tribes of Greece derived their origin, as the Achæans, the Ætolians, the Dorians, the Hellenists, &c. The two most remarkable events in the early history of this country are the deluge of Deucalion, 1548 B.C. and the expedition of the Argonauts, 1263 B.C. *See them severally*. Thessaly was conquered by the great Philip, 352 B.C. and partook of the fortunes of Macedon. It is now part of the kingdom of Greece.

TETTFORD (Norfolk), the Roman Sitomagus, was a bishopric from 1070 to 1091, when the see was removed to Norwich.

• **THIMBLES** are said to have been found at Herculaneum.—The art of making them was brought to England by John Lofting, a mechanic, from Holland, who set up a workshop at Islington, near London, and practised the manufacture in various metals with profit and success, about 1695. *Anderson*.

THIRTY-NINE ARTICLES. *See Articles.*

THIRTY TYRANTS. A term applied to the governors of Athens, in 404, who were expelled by Thrasybulus, 403 B.C.; and also to the aspirants to the imperial throne of Rome during the reigns of Gallienus and Aurelian, A.D. 259—274.

THIRTY YEARS' WAR, in Germany, between the Catholics and Protestants. It began with the latter in Bohemia in 1618, and ended with the peace of Westphalia in 1648. It is renowned for the victories of Wallenstein and Gustavus Adolphus, of Sweden.

THISTLE,* ORDER OF THE, SCOTLAND, founded by James V. 1540. It consisted originally of himself, as sovereign, and twelve knights, in imitation of Christ and his twelve apostles. In 1542, James died, and the order was discontinued. This was about the time of the Reformation, when religious disputes ran to a great height, and it was deemed impious to imitate Christ and his apostles in an order of knighthood. The order was renewed by James VII. of Scotland and II. of England, by making eight knights, May 29, 1687; increased to twelve by queen Anne in 1703; to sixteen by George IV. in 1827.

THE ORIGINAL KNIGHTS OF 1687.

George, duke of Gordon.
John, marquess of Athol.
James, earl of Arran, afterwards duke of Hamilton;
killed in a duel, 1712.
Alexander, earl of Moray.

James, earl of Perth; attained.
Kenneth, earl of Seaforth; attained.
George, earl of Dumbarton.
John, earl of Melford; attained.

THISTLEWOOD'S CONSPIRACY. See *Cato-street Conspiracy*.

THOMAS'S HOSPITAL, St. (Southwark), was founded by Richard, prior of Bermondsey, in 1213, and surrendered to Henry VIII. in 1538. In 1551 the mayor and citizens of London, having purchased of Edward VI. the manor of Southwark, including this hospital, repaired and enlarged it, and admitted into it 260 poor, sick, and helpless objects; upon which the king, in 1553, incorporated it, together with Bethlehem, St. Bartholomew's, &c. It was rebuilt in 1693. Much excitement arose in 1862, on account of a proposal to remove the hospital to Wandsworth, the old site having been sold to a railway company.

THOMITES (or **TOMITES**), a name given to a body of enthusiasts who assembled at Boughton, near Canterbury, May 31, 1838. A Cornish publican named Thom, or Tom (religiously insane), assumed the name of sir W. Courtenay, knight of Malta and king of Jerusalem; and having been released from confinement, incited the rabble against the Poor Law Act. On this day, a farmer of the neighbourhood, whose servant had joined the crowd which attended Thom, sent a constable to fetch him back; but on his arrival on the ground he was shot dead by Thom. The military were then called out, and lieutenant Bennett proceeded to take the murderer into custody; but Thom advanced, and, firing a pistol, killed the lieutenant on the spot. One of the soldiers fired at Thom, and laid him dead by the side of lieutenant Bennett. The people then attacked the military, who were compelled to fire; and several persons were killed before the mob dispersed. Many considered Thom a saint.

THORACIC DUCT, discovered first in a horse by Eustachius, about A.D. 1563; in the human body, by Ol. Rudbec, a Swedish anatomist. Thomas Bartholine, of Copenhagen, and Dr. Joliffe, of England, also discovered it about 1654. See *Lacteals*.

THORINUM, a very rare metal (a grey heavy powder), discovered by Berzelius in 1828.

THORN (on the Vistula, Poland), was founded by the Teutonic Knights in 1231. Many Protestants were slain here (after a religious riot) at the instigation of the Jesuits in 1724.

THRACE (now *Roumelia*, in Turkey), derived its name from Thrax, the son of Mars. *Aspin*. Thraces, the people, were descendants of Tiras, son of Japhet, and hence their name. They were a warlike people, and therefore Mars was said to have been born, and to have his residence among them. *Euripides*. Thrace was conquered by Philip and Alexander, and annexed to the Macedonian empire about 335 B.C.; and it so remained till the conquest of Macedonia by the Romans, 168 B.C. On the ruins of Byzantium, the capital of Thrace, Constantinople was built. The Turks under Mahomet II. took the country A.D. 1453. *Priestley*.

THRASHING-MACHINES. The flail was the only instrument formerly in use for thrashing corn. The Romans used a machine called the *tribulum*, a sledge loaded with stones or iron, drawn over the corn-sheaves by horses. The first machine attempted in modern times was invented by Michael Menzies, at Edinburgh, about 1732; Andrew Meikle invented a machine in 1776. Many improvements have been since made.

THRASYMENE (N. Italy). A most bloody engagement took place here between the Carthaginians under Hannibal and the Romans under Flaminius, 217 B.C. No less than

* Some Scottish historians make the origin of this order very ancient. The abbot Justinian says it was instituted by Achatus I. of Scotland, A.D. 809, when that monarch made an alliance with Charlemagne, and then took for his device the thistle. It is stated that king Hungus, the Fict, had a dream, in which St. Andrew made a midnight visit, and promised him a sure victory over his foes, the Northumbrians; and that the next day, St. Andrew's cross appeared in the air and the Northumbrians were defeated. On this story, it is said, Achatus framed the order more than 700 years before James V. revived it.

15,000 Romans were left dead on the field of battle, and 10,000 taken prisoners; or, according to Livy, 6000; or Polybius, 15,000. The loss of Hannibal was about 1500 men. About 10,000 Romans made their escape, all covered with wounds. *Livy; Polybius.* On the same day an earthquake occurred which desolated several cities in Italy.

THREATENING LETTERS. Sending letters, whether anonymously written, or with a fictitious name, demanding money, or threatening to kill a person or fire his house, was made punishable as a felony without benefit of clergy, 1730. Persons extorting money by threatening to accuse others of such offences as are subjected to death, or other infamous punishments, were to be adjudged imprisonment, whipping, or transportation, by 30 Geo. II. 1756; and other acts, the latest 10 & 11 Vict. c. 66, 1847.

THUMB-SCREW, an inhuman instrument, commonly used in the first stages of torture by the Spanish inquisition. It was in use in England also. The rev. Wm. Carstairs was the last who suffered by it before the privy council, to make him divulge secrets intrusted to him, which he firmly resisted. After the revolution in 1688, the thumb-screw was given him as a present by the council. King William expressed a desire to see it, and tried it on, bidding the doctor to turn the screw; but at the third turn he cried out, "Hold; hold! doctor; another turn would make me confess anything."

THUNDERING LEGION. During a contest with the invading Marcomanni, the prayers of some Christians in a Roman legion are said to have been followed by a storm of thunder, lightning, and rain, which tended greatly to discomfit the enemy. Hence the legion received the name above, A.D. 179.

THURINGIA, an early Gothic kingdom in central Germany, was overrun by Attila and the Huns, A.D. 451; the last king, Hermanfried, was defeated and slain by Thierry, king of the Franks, who annexed it to his dominions. It was made an independent duchy, 674; a landgraviate, 880; given to Otho of Saxony 909, when the landgrave Burchard was slain; it was separated from Saxony, 1180; but reunited to it in 1548.

THUROT'S INVASION. An enterprising Irish commodore in the French service, named Thurot, had so signalled himself by his courage and daring, that his name became a terror to all the merchant-ships of this kingdom. He had the command of a small armament, and landed a 1000 men at Carrickfergus in Ireland, which place he soon quitted, after having plundered the town. On leaving Ireland, he reached the Isle of Man, but was overtaken by captain Elliot, with three frigates, who engaged his little squadron, which was taken and the commodore killed. Thurot's true name was O'Farrell; his grandfather had followed the fortunes of James II.; but his mother being of a family of some dignity in France, he assumed her name. The engagement was fought Feb. 28, 1760. *Burns.*

THURSDAY. The fifth day of the week, derived from Thor, a deified hero worshipped by the northern nations, particularly by the Scandinavians and Celts. The authority of this deity extended over the winds and seasons, and especially over thunder and lightning. He is said to have been the most valiant of the sons of Odin. This day, which was consecrated to Thor, still retains his name in the Danish, Swedish, and Low-Dutch languages, as well as in the English. Thursday, or Thor's-day, is in Latin *dies Jovis*, or Jupiter's day.

THURLES (S. Ireland). Here was held a synod of the Roman Catholic archbishops, bishops, inferior clergy, and religious orders, under the direction of archbishop Cullen, the Roman Catholic primate, Aug. 22, 1850. It closed its deliberations, having condemned the Queen's Colleges, and recommended the foundation of a Roman Catholic university, Sept. 10, following. The acts of this synod were forwarded to Rome for approval of the pope, Pius IX.

TIARA, the triple crown of the pope, indicative of his civil rank, as the keys are of his ecclesiastical jurisdiction. On the death of a pope, his arms are represented with the tiara alone, without the keys. The ancient tiara was a high round cap. Pope Damasus II. first caused himself to be crowned with a tiara A.D. 1048. John XX. encompassed the tiara with a crown, 1276. Boniface VIII. added a second, 1295; and Benedict XII. formed the tiara about 1334.

TICKETS OF LEAVE. See *Transportation and Crime.*

TICONDERAGO (N. America). The French fortress here was unsuccessfully besieged by Abercromby in July 1758; taken July 26, 1759. The Americans took it in 1775, but retired from it in July 1777. The British retired from it shortly after.

TIDES. Homer is the earliest profane author who speaks of the tides. Posidonius of Apamea accounted for the tides from the motion of the moon, about 79 B.C.; and Cæsar

speaks of them in his fourth book of the Gallic war. The theory of the tides was first satisfactorily explained by Kepler, 1598; but the honour of a complete explanation of them, was reserved for sir Isaac Newton, about 1683.

TIEN-TSIN. See *China*, 1858.

TIERRA DEL FUEGO. See *Missions*, note.

TIGRIS, a river forming the eastern boundary of Mesopotamia, celebrated for the cities founded on its banks :—Nineveh, Seleucia, Ctesiphon, and Bagdad. It was explored by English steamers in 1838.

TILBURY (Essex). The camp formed here in 1588 to resist the Spanish invasion, was visited by queen Elizabeth.

TILES were originally flat and square, and afterwards parallelogramic, &c. First made in England about A.D. 1246. They were taxed in 1784. The number of tiles taxed in England in 1820 was 81,924,626; and in 1830, 97,318,264. The tax was discontinued as discouraging house-building and interfering with the comfort of the people, in 1833.

TILSIT (on the river Niemen), where a treaty was concluded between France and Russia. Napoleon restored to the Prussian monarch one-half of his territories, and Russia recognised the Confederation of the Rhine, and the elevation of Napoleon's three brothers, Joseph, Louis, and Jerome, to the thrones of Naples, Holland, and Westphalia. Signed July 7, 1807, and ratified July 19 following.

TILTS. See *Tournaments*.

TIMBER. The annual demand of timber for the royal navy, in war, was 60,000 loads, or 40,000 full-grown trees, a ton each, of which thirty-five will stand on an acre; in peace, 32,000 tons, or 48,000 loads. A seventy-four gun ship consumed 3,000 loads, or 2,000 tons of trees, the produce of fifty-seven acres in a century. Hence the whole navy consumed 102,600 acres, and 1026 per annum. *Alumet*. Iron is now much used in preference to timber. In 1843 we imported 1,317,645 loads of timber (cut and uncut); in 1857, 2,495,964 loads; in 1861, 3,061,138 loads. The duties on timber were modified in 1851.

TIMBER BENDING. Apparatus was invented for this purpose by Mr. T. Blanchard, of Boston, U.S., for which a medal was awarded at the Paris Exhibition of 1855. A company was formed for its application in this country in 1856.

TIME. Our ideas in regard to time have been of late greatly extended. The distant planet Neptune, discovered by Le Verrier and Adams in 1846, requires above 900 of our years for a single revolution; and the coal measures in Wales, a thickness of strata of more than twelve miles, would require for its deposition hundreds of thousands of years; while other formations could only be estimated in millions of years. *Phillips*.

TIME-MEASURER. That of Scipio Nasica was invented 159 B.C. Early authors inform us that Alfred's time-keeper was six large wax tapers, each twelve inches long: but as they burnt unequally, owing to the wind, he invented a lantern made of wood, and thin plates of ox-horns, glass being a great rarity, A.D. 887. The ancients had three time-measures, hour-glasses, sun-dials, and a vessel full of water with a hole in its bottom. See *Sun-dials*, *Clocks*, *Watches*, &c.

TIMES NEWSPAPER. On Jan. 13, 1785, Mr. John Walter published the first number of the *Daily Universal Register*, price 2½d., printed on the logographic system (invented by Henry Johnson, a compositor), in which types containing syllables and words were employed instead of single letters.

On Jan. 1, 1788, the paper was named the *Times*. In 1803, when Mr. Walter gave up the paper to his son, the circulation was about 1000; that of the *Morning Post* being 4500.

Dr. Stoddart (satirised as Dr. Slop, by Moore the poet), became editor in 1812, but five years after retired and set up in opposition the *New Times*, an unprofitable speculation. Thomas Barnes became next editor, 1820.

On Nov. 28, 1814, the *Times* was first printed by steam power (1200 per hour, afterwards increased to 2000 and 4000).

The powerful articles contributed by Edward Sterling gained the paper the name of the *Thunderer*. On Jan. 19, 1829, the first double number appeared. In July 1834 an attack of Mr. O'Connell in the house of commons on the correctness of the reports of

the debates in the *Times* was signally defeated. Shortly after began the convenient summary of the debates, written in the first instance by Mr. Horace Twiss.

In 1841 the *Times* was instrumental in detecting and exposing a scheme organised by a company, to defraud by forgery all the influential bankers of Europe. This brought on the proprietors an action for libel (in the case *Bogle v. Lawson*). The jury found the charge to be true, giving a verdict of one farthing damages, but the judge refused costs. Subscriptions were set on foot in all parts of Europe to reimburse the proprietors for their immense outlay in defending the action. This they firmly declined; and the money was expended in establishing *Times Scholarships* at Oxford and Cambridge, and at Christ's Hospital, and other

TIMES NEWSPAPER, *continued.*

schools; marble tablets also, commemorating the event, were set up in the Royal Exchange and in other places. These were the greatest honours ever conceded to a newspaper.

In Oct. 1845, the *Times* express was for the first time conveyed to India overland, by the agency of lieut. Waghorn.

Of the number of the *Times* containing the life of the duke of Wellington for Nov. 19, 1852, 70,000 were sold—the ordinary number being then 36,000; the present circulation is stated to vary from 54,000 to 55,000 (1861).

In 1854 the proprietors sent Mr. W. H. Russell as their special correspondent to the seat of war in the Crimea; in 1857 to India, and in 1861 to the southern states of North America.

Times Fund.—On the 12th of October, 1854, sir Robert Peel originated by a letter in the *Times* a subscrip-

tion for the sick and wounded in the Crimean war, and in less than a fortnight, 15,000*l.* were sent to the *Times* office to be thus appropriated. Mr. Macdonald (the present manager) was sent out by the proprietors as special commissioner to administer the fund, from which large quantities of food and clothing were supplied to the sufferers, with inestimable advantage. See *Scutari* and *Nightingale*.

In Dec. 1858, the *Times* drew attention to the state of the houseless poor of London; and in a few days, 800*l.* were subscribed for their relief.

In 1851, 13,000,000 copies were sold; in 1857, 16,100,000; in 1859, 16,900,000; in 1860, 16,670,000.

In 1860, 16,400 copies per hour were printed. On June 21, 1861, the *Times* consisted of 24 pages, containing 4076 advertisements (about 1810 it contained 150 advertisements).

TIN. The Phœnicians traded with England for this article for more than 1100 years before the Christian era. It is said that this trade first gave them commercial importance in the ancient world. Under the Saxons, our tin mines appear to have been neglected; but after the coming in of the Normans, they produced considerable revenues to the earls of Cornwall, particularly to Richard, brother of Henry III. A charter and various immunities were granted by Edmund, earl Richard's brother, who also framed the Stannary laws (*which see*), laying a duty on the tin, payable to the earls of Cornwall. Edward III. confirmed the tinners in their privileges, and erected Cornwall into a dukedom, with which he invested his son, Edward the Black Prince, 1337. Since that time, the heirs-apparent to the crown of England, if eldest sons, have enjoyed it successively. Tin-mines were discovered in Germany, which lessened the value of those in England, till then the only tin-mines in Europe, A.D. 1240. *Anderson.* Discovered in Barbary, 1640; in India, 1740; in New Spain, 1782. We export at present, on an average, 1500 tons of unwrought tin, besides manufactured tin and tin-plates, of the value of about 400,000*l.* In 1857, 9783 tons of tin, in 1860, 10,462 tons were procured from British mines. Of tin plates and tin and pewter ware, we exported in value, in 1847, 484,184*l.*; in 1854, 1,075,531*l.*; in 1860, 1,500,812*l.*; in 1861, 907,590*l.*

TINCHEBRAY (N.W. France), where a battle was fought between Henry I. of England, and Robert duke of Normandy. England and Normandy were re-united under Henry, on the decease of William Rufus, who had already possessed himself of Normandy, though he had no other right to that province than by a mortgage from his brother Robert, at his setting out for Palestine. Robert, on his return, recovered Normandy by an accommodation with Henry; but the two brothers having afterwards quarrelled, the former was defeated by the latter in the battle of Tinchebray, Sept. 28, 1106, and Normandy was annexed to the crown of England. *Hénault.*

TITANIUM, a rare metal, discovered by Gregor in menakite, a Cornish mineral, in 1791, and in 1794 by Klaproth.

TITHES, or **TENTHS**, were commanded to be given to the tribe of Levi, 1490 B.C. *Lev. xxvii. 30.* Abraham returning from his victory over the kings (*Gen. xiv.*), gave tithes of the spoil to Melchisedek, king of Salem, priest of the most high God (1913 B.C.). For the first 800 years of the Christian church they were given purely as alms, and were voluntary. *Wickliffe.* "I will not put the title of the clergy to tithes upon any divine right, though such a right certainly commenced, and I believe as certainly ceased, with the Jewish theocracy." *Blackstone.* They were established in France by Charlemagne, about 800. *Hénault.* Tenths were confirmed in the Lateran councils, 1215. *Rainaldi.*—The payment of tithes appears to have been claimed by Augustine, the first archbishop of Canterbury, and to have been allowed by Ethelbert, king of Kent, under the term "God's fee," about A.D. 600.

TITHES IN ENGLAND.

The first mention of them in any English written law, is a constitutional decree made in a synod strongly enjoining tithes, A.D. 786.

Offa, king of Mercia, gave unto the church the tithes of all his kingdom, to expiate the death of Ethelbert, king of the East Angles, whom he had caused to be basely murdered, A.D. 794. *Burn.*

Tithes were first granted to the English clergy in a general assembly held by Ethelwold, A.D. 844. *Henry.*

In 1545 tithes were fixed at the rate of 2*s.* 9*d.* in the

pound on rent: since then many acts have been passed respecting them.

The Tithes Commutation act passed Aug. 13, 1836. It was amended in 1837, 1843, and 1846.

A rector is entitled to all the tithes; a vicar to a small part only, frequently to none.

TITHES IN IRELAND.

Several acts relating to tithes have been passed in 1832, 1838, 1839, 1840, and 1841, altering and improving the tithe system.

TITHING. The number or company of ten men with their families knit together in a society, all of them being bound to the king for the peaceable and good behaviour of each of their society; of these companies there was one chief person, who, from his office, was called (toothingman) tithingman; but now he is nothing but a constable, formerly called the headborough. *Cowel.*

TITLES ROYAL. The following is the succession in which the royal titles swelled in England. Henry IV. had the title of "Grace" and "My liege," conferred upon him, 1399. The title of "Excellent Grace" was conferred upon Henry VI. 1422. Edward IV. had that of "Most High and Mighty Prince," 1461. Henry VII. had the title "Highness," 1485; and Henry VIII. had the same title, and sometimes "Grace," 1509 *et seq.* But these two last were absorbed in the title of "Majesty," being that with which Francis I. of France addressed Henry at their memorable interview in 1520. See *Field of the Cloth of Gold.* Henry VIII. was the first and last king who was styled "Dread Sovereign." James I. coupled to "Majesty" the present "Sacred," or "Most Excellent Majesty." "Majesty" was the style of the emperors of Germany; the first king to whom it was given was Louis XI. of France, about 1463.

TOBACCO. *Nicotiana tabacum.* This plant received its name from Tabacco, a province of Yucatan, New Spain; some say from the island of Tobago, one of the Caribbees; others from Tobasco, in the gulf of Florida. It is said to have been first observed at St. Domingo, A.D. 1492; and to have been used freely by the Spaniards in Yucatan in 1520. Tobacco was first brought to England in 1565, by sir John Hawkins; but sir Walter Raleigh and sir Francis Drake are also mentioned as having first introduced it here, 1586. It was manufactured only for exportation for some years. *Stow's Chron.* The Pied Bull inn, at Islington, was the first house in England where tobacco was smoked. In 1584 a proclamation was issued against it. The star-chamber ordered the duties to be 6s. 10d. per pound, 1614. Its cultivation was prohibited in England by Charles II. Act laying a duty on the importation was passed 1684. The cultivation was forbidden in England in 1684, and allowed in Ireland, 1779. The tax was increased and put under the excise, 1789. *Anderson; Ashe.* Various statutes have passed relative to tobacco. Act to revive the act prohibiting the culture of tobacco in Ireland passed 2 Will. IV. Aug. 1831. Act directing that tobacco grown in Ireland be purchased in order to its being destroyed, March 24, 1832. The quantity consumed in England in 1791 was nine millions and a half of pounds, and in 1829 about fifteen millions of pounds. *Chanc. of the Exch.* In 1840 the quantity had reached to forty millions of pounds. In 1857 were imported 43,747,961 lbs., of which 1,699,131 lbs. were manufactured (cigars and snuff). In 1861, 52,854,392 lbs. of tobacco were imported.

TOBAGO (West Indies). Discovered by Columbus in 1492; settled by the Dutch, 1642. Taken by the English, 1672; retaken, 1674. In 1748, it was declared a neutral island; but in 1763 it was ceded to the English. Tobago was taken by the French under De Grasse in 1781, and confirmed to them in 1783. Again taken by the English, April 14, 1793, but restored at the peace of Amiens, Oct. 6, 1802. The island was once more taken by the British under general Grinfield, July 1, 1803, and was confirmed to them by the peace of Paris, in 1814.

TOKENS, BANK. These were silver pieces issued by the Bank of England, of the value of 5s., Jan. 1, 1798. The Spanish dollar was at first impressed with a small profile of George III.; it was stamped on the neck of the Spanish king. They were raised to the value of 5s. 6d. Nov. 14, 1811. Bank tokens were also current in Ireland, where those issued by the bank passed for 6s. and lesser sums until 1817. They were called in on the revision of the coinage.

TOLBIAC (now ZULPICH), near the Rhine, where Clovis totally defeated the Allemanni, A.D. 496.

TOLEDO (Central Spain), was the capital of the Visigothic kingdom, A.D. 554, which was subdued by the Saracens, 711. Toledo was taken by Alfonso VI. of Castile, 1084. The university was founded in 1499. Toledo sword-blades have been famed since the fifteenth century.

TOLENTINO (in the Papal States), where a treaty was made between the pope and the French, Feb. 19, 1797. Here Joachim Murat having resumed arms against the allies, was defeated by the Austrians, May 3, 1815.

TOLERATION ACT, passed in 1689* to relieve Protestant dissenters from the church of England. Their liberties were, however, greatly endangered in the latter end of queen

* The toleration granted was somewhat limited. It exempted persons who took the new oath of allegiance and supremacy and made also a declaration against popery, from the penalties incurred by

Anne's reign. She died on the very day that the memorable Schism bill was to become a law, Aug. 1, 1714. See *Test Act*.

TOLLS were first paid by vessels passing the Stade on the Elbe, A.D. 1109. They were first demanded by the Danes of vessels passing the Sound, 1341. See *Stade and Sound*. Toll-bars in England originated in 1267, on the grant of a penny for every waggon that passed through a certain manor; and the first regular toll was collected a few years after for mending the road in London between St. Giles's and Temple-bar. Gathered for repairing the highways of Holborn-inn-lane and Martin's-lane, 1346. Toll-gates or turnpikes were used in 1663. A few toll-gates still remain in the neighbourhood of London, against which an agitation arose in 1857.

TONNAGE. See *Tunnage*.

TONOMETER, a delicate apparatus for tuning musical instruments, by marking the number of vibrations, was invented by H. Scheibler, of Crefeld, about 1834. It received little notice till M. Koenig removed some of the difficulties opposed to its successful use, and exhibited it at the International Exhibition of 1862.

TONQUIN, South Asia, part of the kingdom of Anam. Here a French missionary bishop, Melchior, was murdered with great barbarity July 27, 1858: the abbé Neron was also murdered, Nov. 3, 1860. See *Anam*.

TONTINES. Loans given for life annuities with benefit of survivorship, so called from the inventor, Laurence Tonti, a Neapolitan. They were first set on foot at Paris to reconcile the people to cardinal Mazarin's government, by amusing them with the hope of becoming suddenly rich, A.D. 1653. *Voltaire*. Tonti died in the Bastille after seven years' imprisonment. A Mr. Jennings was an original subscriber for a 100*l.* share in a tontine company; and being the last survivor of the shareholders, his share produced him 3000*l.* per annum. He died worth 2,115,244*l.*, aged 103 years, June 19, 1798.

TORBANEHILL MINERAL. Mr. Gillespie, of Torbanehill, granted a lease of all the coal in the estate to Messrs. Russell. In the course of working, the lessees extracted a combustible mineral of considerable value as a source of coal-gas, and realised a large profit in the sale of it as gas-coal. The lessor then denied that the mineral was coal, and disputed the right of the lessees to work it. At the trial in 1853 there was a great array of scientific men and practical gas engineers. The evidence was most conflicting. One side maintained the mineral to be coal, the other that it was bituminous schist. The judge set aside the scientific evidence, and the jury pronounced it to be coal. The authorities in Prussia have since pronounced it *not* to be coal. *Perey*.

TORGAU (N. Germany), the site of a battle between Frederick II. of Prussia and the Austrians, in which the former obtained a signal victory; the Austrian general, count Daun, being wounded, Nov. 3, 1760. Count Daun, a renowned warrior, had, in 1757, obtained a great victory over the Prussian king, and had been distinguished by his zeal and glory in the Austrian service. Torgau was taken by the allies in 1814.

TORIES. Various authors have differently described this term. It is said to be derived from an Irish word, originally signifying a savage, or rather a collector of tithes and taxes. *Encyclop.* The names of Cavaliers and Roundheads, which existed in the time of Charles I., were changed, some tell us, into those of Tories and Whigs. The Tories were those who vindicated the divine right of kings, and held high notions of their prerogatives; while the Whigs denoted friends to civil and religious liberty. *Ashe*. The name of Tory was given by the Country party to the Court party, comparing them to popish robbers; and arose out of the Meal-tub plot (*which see*), in 1679. The terms are defined by extreme politicians as of two parties in the aristocracy: the Whigs, who would curb the power of the crown; and the Tories, who would curb the power of the people. *Phillips*. See *Whigs*. The recent Tory administrations have been those of Pitt, Perceval, Liverpool, Peel, and Derby (*all which see*). The party now takes the name of Conservatives (*which see*).

TORONTO, the capital of Canada West, founded in 1794 as York; it received its present name in 1834.

TORRES VEDRAS (a city of Portugal). Near here Wellington, retreating from the French, took up a strong position, called the *Lines of Torres Vedras*, Oct. 10, 1810.

TORTURE. It has disgraced humanity in the earliest ages in every country. It was only permitted by the Romans in the examination of slaves. It was used early in the

absenting themselves from church and holding unlawful conventicles; and it allowed the Quakers to substitute an affirmation for an oath, but did not relax the provisions of the Test act (*which see*). The party spirit of the times checked the king in his liberal measures.

Roman Catholic Church against heretics. Occasionally used in England so late as the 1st Eliz. 1558; and in Scotland until 1690. The trial by torture was abolished in Portugal, 1776; in France, by order of Louis XVI., in 1789, although it had not been practised there for some time before. Ordered to be discontinued in Sweden by Gustavus III., 1786. It still continues in some countries.

TOULON (S. France), an important military and naval port. It was taken by Charles V., in 1536. In 1707 it was bombarded by the allies, both by land and sea, by which almost the whole town was reduced to a heap of ruins, and several ships burned; but the allies were at last obliged to raise the siege. It surrendered Aug. 27, 1793, to the British admiral lord Hood, who took possession both of the town and shipping, in the name of Louis XVII., under a stipulation to assist in restoring the French constitution of 1789. A conflict took place between the English and French forces, when the latter were repulsed, Nov. 15, 1793. Toulon was evacuated by the British, Dec. 17, same year, when great cruelties were exercised towards such of the inhabitants as were supposed to be favourable to the British.—A naval battle off this port was fought Feb. 10, 1744, between the English under Mathews and Lestock, against the fleets of France and Spain: in this engagement the brave captain Cornwall fell. The victory was lost by a misunderstanding between the English admirals. Mathews was afterwards dismissed for misconduct by the sentence of a court-martial.

TOULOUSE (S. France). Founded about 615 B.C. It was the capital of the Visigothic kings in 419; but was taken by Clovis in 507. A dreadful tribunal was established here to extirpate heretics, A.D. 1229. The troubadours, or rhetoricians of Toulouse, had their origin about A.D. 850, and consisted of a fraternity of poets, whose art was extended throughout Europe, and gave rise to the Italian and French poetry. See *Troubadours*. The allied British and Spanish army entered this city on April 12, 1814, immediately after the **BATTLE OF TOULOUSE**, fought between the British Peninsular army under lord Wellington and the French, April 10, 1814: one of the most bloody that had been fought from the time lord Wellington had received the command of the troops in Portugal. The French were led by marshal Soult, whom the victorious British here forced to retreat, after twelve hours' fighting, from seven o'clock in the morning until seven at night, the British forcing the French intrenched position before Toulouse. The loss of the allies in killed and wounded was between 4000 and 5000 men; that of the French exceeded 10,000. At the period of this battle Napoleon had abdicated the throne of France; but neither of the commanders was aware of that fact, or of the close of the war at Paris.

TOULOUSE: the county was created out of the kingdom of Aquitaine by Charlemagne, in 778. It enjoyed great prosperity till the dreadful war of the Albigenes (*which see*), when the count Raymond VI. was expelled, and Simon de Montfort became count. At his death, in 1218, Raymond VII. obtained his inheritance. His daughter Jane and her husband, Alphonse (brother of Louis IX. of France), dying without issue, the county of Toulouse was united to the French monarchy in 1271.

TOURNAMENTS, or JOURS. Some authors refer them to Trojan origin, such as Ascanius instituted among the Romans. The tournament is a martial sport or exercise which the ancient cavaliers used to perform to show their bravery and address. It is derived from the French word *tourner*, "to turn round," because, to be expert in these exercises, much agility was necessary, both of horse and man. Tournaments were very frequent, A.D. 890; and were regulated by the emperor Henry I., about 919. The Lateran council published an article against their continuance in 1136. One was held in Smithfield so late as the twelfth century, when the taste for them declined in England. Henry II. of France, in a tilt with the count of Montgomery, had his eye struck out, an accident which caused the king's death in a few days, June 29, 1559. Tournaments were from this event abolished in France.—A magnificent and costly feast, and splendid tournament, under the auspices of Archibald, earl of Eglintoun, took place at Eglintoun castle, Aug. 29, 1839, and the following week: many of the visitors assumed the characters of ancient knights, lady Seymour being the "Queen of Beauty," as fairest of the female throng. But this festivity did not lead to a revival of the old tournament.

TOURNAY (S. Belgium) was very flourishing till it was ravaged by the barbarians in the fifth century. It has sustained many sieges. Taken by the allies in 1709, and ceded to the house of Austria by the treaty of Utrecht; but the Dutch were allowed to place a garrison in it, as one of the barrier towns. It was taken by the French under general Labourdonnaye, Nov. 11, 1792. Battle near Tournay, between the Austrians and British on one side, and the French on the other; the former victorious, May 8, 1793.

TOURNIQUET (from *tourner*, to turn). An instrument for stopping the flow of blood into a limb, by tightening the bandage, employed in amputations. It is said to have been invented by Morelli at the siege of Besançon, A.D. 1674. J. L. Petit, in France, invented the screw tourniquet in 1718.

TOURS, an ancient city, central France, near which Charles Martel gained a great victory over the Saracens, and from which he acquired the name of *Martel*, signifying *hammer*. But for this timely victory of Charles Martel, all Europe, as well as Asia and Africa, would probably have become Mahometan. Fought Oct. 10, 732.

TOWERS. That of Babel, the first of which we read, built in the plains of Shinar (*Genesis* xi.) 2247 B.C. See *Babel*. The Tower of the Winds at Athens, built 550 B.C. The Tower of Pharos (see *Pharos*), 280 B.C. Towers were built early in England; and the round towers in Ireland may be reckoned among most ancient curiosities. They were the only structures of stone found in Ireland before the first arrival of the English, except some buildings in the maritime towns founded by the Danes. These towers were tall hollow pillars, nearly cylindrical, but narrowing towards the top, pierced with lateral holes to admit the light, high above the ground, and covered with conical roofs of the same material. Fifty-six of them still remain, from 50 to 130 feet high. See *Pisa*.

TOWER OF LONDON. The tradition that Julius Cæsar founded a citadel here is very doubtful. A royal palace, consisting of no more than what is now called the White Tower, which appears to have been first marked out by William the Conqueror, A.D. 1076, was commenced in 1078, and completed by his son, William Rufus, who, in 1098, surrounded it with walls, and a broad deep ditch. Several succeeding princes made additions to it, and king Edward III. built the church. In 1638, the White Tower was rebuilt; and since the restoration of king Charles II. it has been thoroughly repaired, and a great number of additional buildings made to it. Here are the Armoury, Jewel-office, and various other divisions and buildings of peculiar interest; and here took place many executions of illustrious persons, and many murders (king Henry IV. 1471; king Edward V. and his brother, 1485; sir Thomas Overbury, 1613). See *England*. The armoury and 280,000 stand of arms, &c., were destroyed by fire, Oct. 30, 1841. The "New Buildings" in the Tower were completed in 1850.

TOWNLEY MARBLES, in the British Museum, were purchased in 1812.

TOWTON (Yorkshire), where a battle was fought—supposed to be the most fierce and bloody that ever happened in any domestic war—between the houses of York (Edward IV.) and Lancaster (Henry VI.), to the latter of whom it was fatal, and on whose side more than 37,000 fell. Edward issued orders to give no quarter, and the most merciless slaughter ensued. Henry was made prisoner, and confined in the Tower; his queen, Margaret, fled to Flanders. Fought March 29, 1461.

TOXOPHILITES (from *toxon*, a bow, and *philos*, a lover), a society established by sir Aston Lever in 1781. In 1834 they took grounds in the inner circle of Regent's-park, and built the archery lodge. They possess a very curious piece of plate, given by Catherine, queen of Charles II., to be shot for by the Finsbury archers, of whom the Toxophilites are the representatives.

TRACTARIANISM. This term is applied to certain opinions on church matters propounded in the "Tracts for the Times," of which ninety numbers were published, 1833-41. The principal writers were the revs. Dr. E. Pusey, J. H. Newman, J. Keble, J. Froude, and I. Williams—all of the university of Oxford. See *Puseyism*.

TRACTION-ENGINES were used on common roads in London in 1860, but afterwards restricted. In Aug. 1862 one of Bray's traction-engines conveyed through the city a mass of iron, which would have required 29 horses.

TRADE. See *Board of Trade*.

TRADES' MUSEUM. Its formation was undertaken in 1853, jointly by the commissioners of the Great Exhibition of 1851, and the Society of Arts. The animal department was opened May 17, 1855, when a paper on the mutual Relations of Trade and Manufactures was read by professor E. Solly. The contents of this museum were removed to the South Kensington Museum, which was opened June 24, 1857.

TRAFALGAR (Cape, S. Spain), off which a great naval victory was gained by the British, under Nelson, against the combined fleets of France and Spain, commanded by admiral Villeneuve and two Spanish admirals, Oct. 21, 1805. The enemy's force was eighteen French and fifteen Spanish vessels, all of the line; that of the British, twenty-

seven ships. After a bloody and protracted fight, admiral Villeneuve and the other admirals were taken, and nineteen of their ships captured, sunk, or destroyed. Nelson was killed, and admiral Collingwood succeeded to the command. Nelson's ship was the *Victory*; and his last signal on going into the engagement was, "England expects every man to do his duty." See *Nelson's Funeral*.

TRAGEDY. See *Drama*.

TRAINING SCHOOLS. The first of these useful establishments was founded at Battersea, in 1840, by sir J. Kay Shuttleworth, and Mr. E. C. Tufnell; the latter who was then in the Poor Law Commission, devoting a year's salary towards the expenses. Mr. Mann stated in 1855 that there were about 40 of these schools in different parts of the country.

TRAJAN'S PILLAR (in Rome), erected A.D. 114, by his directions, and executed by Apollodorus. The column which still exists, was built in the large square called the *Forum Romanum*; it is 140 feet high, of the Tuscan order, and commemorates the victories of the emperor. This is one of the most valuable monuments that have descended from ancient to modern times.

TRANQUEBAR (East Indies), the Danish settlement here, founded in 1618, was purchased by the English in 1845.

TRANSFIGURATION, THE. The miraculous change of Our Saviour's appearance on Mount Tabor, in the presence of Peter, James, and John, when He appeared in his glory, in company with Moses and Elias, A.D. 32 (*Matt.* xvii.). The word is applied to a feast held in the Romish Church on the 6th of August, in commemoration of the event.

TRANSFUSION OF BLOOD. See *Blood*.

TRANSIT. See *Venus*.

TRANSLATION TO HEAVEN. The translation of Enoch to heaven for his piety at the age of 365 years, took place 3017 B.C. The prophet Elijah was translated to heaven in a chariot of fire, 896 B.C.—The possibility of translation to the abode of eternal life has been maintained by some extravagant enthusiasts. The Irish house of commons expelled Mr. Asgill from his seat, for his book asserting the possibility of translation to the other world without death, 1703.

TRANSPORTATION. The first criminals were ordered for transportation instead of execution, A.D. 1590; but banishment for lighter offences than those adjudged death was much earlier. England was reproached abroad for transporting persons whose offences are comparatively venial. John Eyre, esq., a man of fortune, was sentenced to transportation for stealing a few quires of paper, Nov. 1, 1771. *Phillips*. More recently, the reverend Dr. Halloran, tutor to the earl of Chesterfield, was transported for forging a frank (10d. postage), Sept. 9, 1818. The first transportation of felons to Botany Bay was in May 1787; where governor Phillip arrived with about 800 on Jan. 20, 1788; convicts were afterwards sent to Van Diemen's land, Norfolk Island, &c. Returning from transportation was punishable with death until 5 Will. IV. c. 67, Aug. 1834, when an act passed making the offence punishable by transportation for life. The *discontinuance* of transportation to Australia was announced by lord John Russell, in the house of commons, as determined upon by government, Feb. 10, 1853.—In consequence of the recent difficulty experienced in transporting felons, 16 & 17 Vict. c. 99 was passed to provide other punishment, namely penal servitude, empowering her majesty to grant pardon to offenders under certain conditions, and licences to others to be at large: such licences being liable to be revoked if necessary; and many have been. These licences are termed "tickets of leave." The system was much assailed in Oct. and Nov. 1862 on account of many violent crimes being traced to *ticket-of-leavers*. See *Crime*. By an act passed in 1857, transportation to Western Australia was renewed. See *Cape*.

TRANSUBSTANTIATION. The pretended miraculous change of the bread and wine in the Eucharist into the very flesh and blood of Christ by the consecration. The doctrine was broached in the days of Gregory III. (A.D. 731), and accepted by Amalarius and Radbertus (about 840), but rejected by Rabanus Maurus, Johannes Scotus Erigena, Berengarius, and others. In the Lateran council, held at Rome by Innocent III., the word "transubstantiation" was used to express this doctrine, which was decreed to be incontrovertible; and all who opposed it were condemned as heretics. This was confirmed by the Council of Trent, Jan. 18, 1562. John Huss, Jerome of Prague, and other martyrs of the reformation suffered for denying this dogma, which is renounced by the Church of England (28th Article) and by all protestant dissenters.

TRANSYLVANIA, an Austrian province, was part of the ancient Dacia (*which see*). In 1526, John Zapoly rendered himself independent of the emperor Ferdinand I. by the aid of

the Turks. His successors ruled with much difficulty till 1699, when the emperor Leopold I. finally incorporated Transylvania into the Austrian dominions.

PRINCES OF TRANSYLVANIA.

1526-40. John Zápoly.	1613. Gabriel I. Bathori.
1571. John Sigismund.	1629. Gabriel II. Bethlem (Bethlem Gabor).
— Stephen Zápoly I. Bathori.	1648. George I. Ragotzski.
1581. Christopher Bathori.	1661. George II. Ragotzski.
1602. Sigismund Bathori.	1690. Michael I. Abaffi.
1606. Stephen II. Bottskai.	1699. Michael II. Abaffi.

TRAPPISTS. The first abbey of La Trappe in Normandy was founded, in 1140, by Retrou, count de Perche. The present order of Trappists owes its origin to the learned Bouthillier de la Rancé (editor of *Anacreon* when aged 14), who, from some cause not certainly known, renounced the world, and sold all his property, giving the proceeds to the abbey of La Trappe, to which he retired in 1662, to live there in great austerity. After several efforts he succeeded in reforming the monks, and in establishing a new rule, which commands silence, prayer, reading, and manual labour, and which forbids study, wine, fish, &c. Rancé was born in 1620, and died in 1709.*

TRAVELLING IN ENGLAND. In 1707, it took in summer one day, in winter nearly two days, to travel from London to Oxford (46 miles). In 1817, the journey was accomplished in six or seven hours. By the Great Western Railway express (63 miles) it is done 1½ hour. In 1828, a gentleman travelled from Newcastle to London (273 miles) inside the best coach in 35 hours, at an expense of 6*l.* 15*s.* 3*d.* or 6*d.* per mile (including dinner, &c.). In 1857, the charge of the Great Northern Railway (275½ miles) first class express (6 hrs.) was 50*s.* 9*d.*

TREAD-MILL. An invention of the Chinese, to raise water for the irrigation of the fields. The tread-mill introduced into the prisons of Great Britain, and of a more complicated construction, is the invention of Mr. (afterwards sir William) Cubitt, of Ipswich. The tread-mill was erected at Brixton gaol, 1817, and soon afterwards in other large prisons.

TREASON. See *High Treason*. It was punished in England only by banishment till after Henry I. *Baker's Chronicle*. Ascertained by law, 25 Edw. III. 1352. Trials regulated, and two witnesses required to convict, 1695. The laws relating to treason are numerous, and formerly the punishment was dreadful—hanging, quartering, beheading, &c., and even burning alive. Mr. Martin brought in a bill for the abolition of burning alive for treason, which passed both houses in 1788. **PETTY TREASON** (a distinction abolished in 1828) might happen three ways: a wife's murder of her husband; a servant's murder of his master; and an ecclesiastical person's murder of his prelate or other superior—so declared by statute 1352.

TREASURER OF ENGLAND, LORD HIGH. The third great officer of the crown, a lord by virtue of his office, having the custody of the king's treasure, governing the upper court of exchequer, and formerly sitting judicially among the barons. The first lord high treasurer in England was Odo, earl of Kent in the reign of William I. This great trust is now confided to a commission, and is vested in five persons, called Lords Commissioners for executing the office of Lord High Treasurer, and of these the chancellor of the exchequer is usually one; the first lord being usually the premier. See *Administrations*, for a succession of these officers.) The first of this rank in IRELAND was John de St. John, Henry III. 1217; the last, William, duke of Devonshire, 1766; vice-treasurers were appointed till 1789; then commissioners till 1816, when the revenues of Great Britain and Ireland were united. The first lord high treasurer of SCOTLAND was sir Walter Ogilvie, appointed by James I. in 1420; the last, in 1641, John, earl of Traquair, when commissioners were appointed.

TREASURER OF THE CHAMBER, formerly an officer of great consideration, and always a member of the privy council. He discharged the bills of all the king's tradesmen, and had his office in Cleveland-row, in the vicinity of the royal palace. His duties were transferred, and the office suppressed at the same time with the offices of master of the great wardrobe and cofferer of the household, in 1782. *Beatson*.

TREATIES. The first formal and written treaty made in England with any foreign nation was entered into A.D. 1217. The first commercial treaty was with the Flemings, 1 Edw. 1272; the second with Portugal and Spain, 1308. *Anderson*. The chief treaties of

* A number of these monks driven from France in the revolution of 1790, were received by Mr. Weld, of Lulworth, Dorsetshire, who gave them some land to cultivate, and a habitation, where they remained till 1815. This order was charged with rebellion and conspiracy in France, and sixty-four English and Irish Trappists were shipped by the French government at Paimbœuf, Nov. 19, and were landed from the *Hebe* French frigate at Cork, Nov. 30, 1831. They have established themselves at Mount Melleray, county of Waterford; but do not maintain there the extreme rigour of their order.

the principal civilised nations of Europe will be found described in their respective places : the following forms an index. See *Conventions ; Coalitions ; Leagues, &c.*

TREBIA, now *Trebbia*, a river in North Italy, where Hannibal defeated the Roman consul Sempronius, B.C. 218; and Suvarrow defeated the French marshal Macdonald and compelled him to retreat, June 17-19, 1799.

TREBIZOND, an ancient port of Asia Minor in the Black Sea, was colonised by the Greeks, and became subject to the kings of Pontus. It enjoyed self-government under the Roman empire, and when the Latins took Constantinople in 1204, it became the seat of an empire which endured till 1461, when it was conquered by the Turks under Mahomet I.

EMPERORS OF TREBIZOND.

1204. Alexis I. Comnenus.
1222. Andronicus I.
1235. John I.
1238. Manuel I.
1263. Andrew.
1266. George I.
1280. John II.

1298. Alexis II.
1330. Andronicus II.
1332. Manuel II.
— Basil I.
1340. Irene.
1341. Anna.
1341-50. Michael.

1344. John III.
1350. Alexis III.
1390. Manuel III.
1412. Alexis IV.
1447. John IV.
1458-61. David.

TRECENTO. See *Italy*, note.

TRENT, COUNCIL OF, reckoned in the Roman Catholic church as the eighteenth or last general council. Its decisions are implicitly received as the standard of faith, morals, and discipline in that church. It first sat Dec. 13, 1545, and continued (but with interruptions) under pope Paul III. Julius III. and Pius IV. to Dec. 4, 1563,* its last sitting (the 25th).—Trent (the ancient Tridentum) is in the Tyrol, and belongs to Austria.

TRÈVES, the Roman Treviri, in Rhenish Prussia, was a prosperous city of the Gauls 12 B.C. The emperor Gallienus held his court here A.D. 255. Trèves was made an electorate in the 14th century; and became subject to the archbishop in 1585. The archbishopric is said to have been founded before the 7th century and to be the oldest in Germany. After various changes, Trèves was acquired by Prussia in 1815. In 1844 much excitement was occasioned by miracles said to have been wrought by a "Holy Coat."

"**TRIA JUNCTA IN UNO.**" Three joined in one. The motto of the knights of the military order of the Bath, signifying the three theological virtues, "faith, hope, and charity." It is supposed to have been first used by Richard II. and adopted by Henry IV. in 1399, as the motto of this order; it was continued when the order was revived by his majesty George I. on May 18, 1725. See *Bath*.

TRIALS. Regulations for conducting trials were made by Lothaire and Edric kings of Kent about A.D. 673 to 680. Alfred the Great is said to have been the contriver of trial by jury; but there is good evidence of such trials long before his time. In a cause tried at Hawarden, nearly a hundred years before the reign of Alfred, we have a list of the twelve jurors; confirmed too by the fact that the descendants of one of them, of the name of Corbyn of the Gate, still preserve their name and residence at a spot in the parish yet called the Gate. *Phillips*.

REMARKABLE TRIALS.

King Charles I. : trial begins Jan. 20; convicted, Jan. 29, 1649	Mary Hamilton, for marrying with her own sex, 14 wives Oct. 7, 1746

The Stackpole family, four in number: two	—		

* This long-contested case created much sensation at the time. The bishop had refused to institute the rev. Mr. Gorham in the living of Brampton-Speke, in Devonshire, to which he had been presented. The cause of the bishop's refusal was alleged want of orthodoxy in the plaintiff; the court held that the charge against the plaintiff of holding false doctrine was proved, and that the bishop was justified in his refusal. Mr. Gorham appealed to the Judicial Committee of the Privy Council, which pronounced its opinion (March 8, 1850) that "the doctrine held by Mr. Gorham was not contrary or repugnant to the declared doctrine of the Church of England, and that Mr. Gorham ought not, by reason of the doctrine held by him, to have been refused admission to the vicarage of Brampton-Speke." This decision led to subsequent proceedings in the three courts of law, successively, for a rule to show cause why a prohibition should not issue directed to the judge of the Arches Court, and to the archbishop of Canterbury, against giving effect to the judgment of her majesty in council. The rule was refused in each court, and in the end Mr. Gorham was instituted into the vicarage in question, Aug. 7, 1850.

† Decided again by privy council, partly by both parties: each to pay his own costs; March 21, 1857.

‡ He was executed at Stafford on June 14, in the presence of 50,000 persons. If he had been acquitted, he would have been tried for the murder of his wife and brother. The trial in every respect was the most remarkable one for many years.

TRIALS, continued.

Wm. Dove, for murder of his wife (executed Aug. 9)	July 10, 1856	Lieut.-col. Dickson v. earl of Wilton, for libel; verdict for the plaintiff	Feb. 14, 1859

Marchmont v. Marchmont; a disgraceful divorce-case, began	Nov. 30, —		
W. H. Guernsey, for stealing Ionian despatches from the Colonial Office; acquitted, Dec. 15	—		
Evans v. Evans and Rose; divorce case	Dec. —		

* He was acquitted on a charge of murdering two children in May 13, 14, same year. His wife confessed the murder, but appeared to be insane.

† The plaintiff was Patience Swynfen, widow of Henry John Swynfen, son of the testator Samuel Swynfen. Her husband died June 15, 1854, and her father on July 16 following, having made a will 19 days before his death, devising the Swynfen estate (worth above 60,000l.) to his son's wife; but leaving a large amount of personal estates undisposed of. The defendant, F. H. Swynfen, son of the testator's eldest half-brother, claimed the estate as heir-at-law on the ground of the testator's insanity. The issue was brought to trial in March, 1856; but proceedings were stayed by Mrs. Swynfen's counsel, sir F. R. Thesiger, entering into an agreement with the opposite counsel, sir Alexander Cockburn, without her consent, and in defiance of her instructions. After various proceedings the Court of Chancery directed a new trial. She gained her cause, mainly through the energy of her counsel, Mr. Chas. R. Kennedy, to whom she had promised to pay 20,000l. for his extraordinary services. Mrs. Swynfen, however, married a Mr. Broun and repudiated Mr. Kennedy's claim. The latter in an action against her obtained a verdict in his favour on March 29, 1862. Mrs. Swynfen appealed, and the matter is still unsettled, Dec. 1862.—Mrs. Swynfen was non-suited in an action brought against her counsel (since become lord Chelmsford and now ex-lord chancellor), in July, 1859, and June, 1860.

‡ He was reprieved on the ground of insufficient evidence; but was tried and found guilty of bigamy, Nov. 16, 1859. On Nov. 11, 1862, he proved Miss Bankes's will and obtained her property.

§ On appeal, the Scotch court annulled the marriage, July, 1862.

TRIALS, *continued.*

Emperor of Austria *v.* Day; verdict for plaintiff. The defendant had printed 100 millions florin notes on the bank of Hungary, for Louis Kossuth. The notes were ordered to be destroyed within one month, May 6; judgment affirmed

Gurdross case. John MacMillan, a free-church minister, was expelled for drunkenness and misconduct, May, 1858. The Glasgow synod and the general assembly of the free church affirmed the sentence. He appealed to the court of session, which set aside the decree (which involved temporalities), asserting that the assembly had only spiritual authority, July, —
W. B. Turnbull *v.* Bird, secretary of Protestant alliance; libel; verdict for defendant, July 8-10 —
J. C. Charlesworth, M.P., convicted of bribery at the Wakefield election July 20, —
Baron de Vidil; convicted of wounding his son; the latter refused to give evidence against his father Aug. 23, —
Vincent Collucci; convicted of obtaining money on false pretences, from Miss F. Johnstone Oct. 23, —

John Curran, a Dublin cabman; convicted of a violent assault on Miss Jolly, who heroically defended herself Oct. 25-30, —

Inquiry into sanity of Wm. Fred. Windham (on behalf of his relatives), with a view of annulling an injudicious marriage; trial lasted 34 days; 140 witnesses examined; verdict, sane mind (see *Lunacy*), Dec. 16, 1861-Jan. 30, 1862

[Each party adjudged to pay its own costs, March, 1862.]

Capt. Robertson, by court-martial; convicted of submitting to ungentlemanly conduct from his brother officers:—30 days' inquiry; ended March 24, 1862

[The court was much blamed by the public and the sentence was annulled.]

Mrs. A. C. Vyse for poisoning her two children, acquitted as insane July 9, —

Roupell *v.* Waite; during the trial, W. Roupell, M.P., a witness, confessed himself guilty of forging a will, and other frauds Aug. 18, 19, —

Jessie McLachlan; convicted for the murder of Jessie Macpherson, at Glasgow; she confessed to being accessory after the murder, which she imputed to Mr. Fleming; a gentleman 80 or 90 years old Sept. 17-20, —

[She was respited, Oct. 27, 1862.]

Wm. Roupell, M.P., for forgery; convicted on his own confession Sept. 24, —

Catherine Wilson; convicted of poisoning Mrs. Soames in 1856 Sept. 25-27, —

27 indictments and 24 convictions for savage personal outrages in the streets of the metropolis during the month Nov. —

Wm. Digby Seymour, M.P., *v.* Butterworth; libel; verdict for plaintiff, damages 40s., Dec. 3, —

Hall *v.* Semple; verdict for plaintiff, who had been consigned to a lunatic asylum through his wife's getting the defendant to sign a certificate of lunacy with culpable negligence; damages 150l. Dec. 10, —

(See *Executions*.)

TRIBUNES OF THE PEOPLE (*Tribuni Plebis*), magistrates of Rome, first chosen from among the commons to represent the people, 493 B.C., at the time the people, after a quarrel with the Senators, had retired to Mons Sacer. The first two were C. Licinius and L. Albinus; but their number was soon after raised to five, and 37 years after to ten, which number remained fixed. Their office was annual, and as the first had been created on the 4th of the ides of December, that day was chosen for the election. In A.D. 1347, Nicolo di Rienzi assumed absolute power in Rome as tribune of the people, and reformed many abuses; but committing many extravagances, he lost his popularity and was compelled to abdicate. He was assassinated in 1354.

TRIMMER; a term applied to Charles Montague, earl of Halifax and others who held similar political opinions, midway between those of the extreme Whigs and Tories, about the latter part of the 17th century. He assumed the title as an honour, asserting that it could be rightly given to the British constitution and church. Macaulay says that Halifax was a Trimmer on principle, and not a renegade. He died in 1715.

TRIENNIAL PARLIAMENTS. See *Parliaments* and *Septennial Parliaments*.

TRIESTE, an Austrian port on the Adriatic, declared a free port in 1750. It was held by the French in 1717; 1797, and 1805. Since the establishment of the overland mail to India, it has risen to great commercial importance.

TRICOTEUSES (knitters), a name given to a number of French republican females, who zealously attended executions in 1792, knitting at intervals.

TRINCOMALEE. Reckoned the finest harbour in the East Indies. Trincomalee was taken from the Dutch, by the English, in 1782; it was retaken by the French the same year; but was restored to the Dutch by the peace of 1783. It surrendered to the British, under colonel Stewart, Aug. 26, 1795, and was confirmed to England by the peace of Amiens, in 1802. See *Ceylon*. Of a series of actions off Trincomalee between sir Edward Hughes and the French admiral Suffrein, one was fought Feb. 18, 1782, the enemy having eleven ships to nine: on April 12, following, they had eighteen ships to eleven, and on July 6, same year, they had fifteen ships to twelve. In all these conflicts the French were defeated.

TRINIDAD, an island in the West Indies, was discovered by Columbus in 1498, and was taken from the Spaniards by sir Walter Raleigh in 1595; but the French took it from the English in 1676. Taken by the British, with four ships of the line, and a military force under command of sir Ralph Abercromby, to whom the island capitulated, Feb. 21, 1797; they captured two, and burnt three Spanish ships of war in the harbour. This possession

was confirmed to England by the peace of Amiens in 1802. The insurrection of the negroes occurred Jan. 4, 1832. See *Colonies*.

TRINITY AND TRINITARIANS. The doctrine of the Trinity is generally received by all Christians. Theophilus, bishop of Antioch, who flourished in the second century, was the first who used the term Trinity, to express the three sacred persons in the Godhead. His *Defence of Christianity* was edited by Gesner, at Zurich, in 1546. *Watkins*. An order of the Trinity was founded, A.D. 1198, by John de Matha and Felix de Valois. The Trinity fraternity, originally of fifteen persons, was instituted at Rome by St. Philip Neri, in 1548. The act to exempt from penalties persons denying the doctrine of the Trinity passed in 1813.

TRINITY COLLEGES. See *Cambridge and Oxford*. Trinity College, Dublin, called the University : grant of the Augustine monastery of All Saints within the suburbs for erecting this college, conferred by queen Elizabeth, 1591. First stone laid by Thomas Smith, mayor of Dublin, Jan. 1, 1593. New charter, 1637. Made a barrack for soldiers, 1689. *Burns*. The principal or west front erected, 1759. Library erected, 1732.

TRINITY HOUSE, LONDON. Founded by sir Thomas Spert, A.D. 1512, as an "association for piloting ships." It was incorporated in 1514, and re-incorporated in 1647 and 1685. The present Trinity House was erected in 1795. Trinity Houses were founded at Deptford, at Hull, and at Newcastle : these three societies were instituted and incorporated by Henry VIII. the first in 1512, the other two in 1537. By their charter they had the power of examining, licensing, and regulating pilots, and of erecting beacons and lighthouses, and of placing buoys in the channels and rivers : their powers and privileges have been greatly augmented by succeeding kings. *Gibson's Camden*.

TRINITY SUNDAY. The festival of the Holy Trinity was instituted by pope Gregory IV. in 828, on his ascending the papal chair, and is observed by the Latin and Protestant churches on the Sunday next following Pentecost or Whitsuntide, of which, originally, it was merely an Octave. The observance of the festival was first enjoined in the council of Arles, 1260. It was appointed to be held on the present day by pope John XX. in 1334.

TRIPLE ALLIANCE was ratified between the States-General and England, against France, for the protection of the Spanish Netherlands ; Sweden afterwards joining the league, it was known as the Triple Alliance, Jan. 23, 1668. Another Triple Alliance was that between England, Holland, and France against Spain, 1717.

TRIPOLITZA, Greece, was stormed by the Greeks, who committed dreadful cruelties, Oct. 5, 1821 ; retaken by the Egyptians 1825 ; given up to the Greeks, 1828.

TRIREMES, galleys with three banks of oars, are said to have been invented by the Corinthians 784 B.C.

TRIUMPHS. The triumph was a solemn honour awarded to generals of armies after they had won great victories, by receiving them into the town with great magnificence and public acclamations. Among the Romans there were two sorts—the great, called the Triumph ; and the little, styled the Ovation. They also distinguished triumphs into land and sea triumphs. See *Ovation*.

TRIUMVIRATES, ROMAN. The first 60 B.C., consisted of Julius Cæsar, Pompey, and Crassus, who formed a coalition to rule the state. Their union lasted ten years, and the civil war ensued. The second triumvirate 43 B.C., was formed by Octavius Cæsar, Mark Antony, and Lepidus, through whom the Romans totally lost their liberty. Octavius disagreed with his colleagues : Lepidus was expelled in 36 ; Antony was subdued in 31, and Octavius made himself absolute in Rome. This triumvirate continued for about twelve years. See *Rome*. On March 29, 1839, a triumvirate was appointed at Rome, consisting of Joseph Mazzini, Armellini, and Saffi, which resigned on July 1, 1849, when the city was taken by the French.

TROPPAU, CONGRESS OF, in Austrian Silesia. The emperors Francis of Austria and Alexander of Russia met at Troppau, Oct. 20, 1820. The conference between them and the king of Prussia, against Naples, took place Nov. 10 ; and the congress was transferred to Laybach, as nearer to Italy, Dec. 17, 1820. See *Laybach*.

TROUBADOURS AND TROUVÈRES (from *troubar, trouver, to find or invent*), the poets of the middle ages (from the eleventh to the fifteenth century). The former flourished in the south of France and north of Spain, and used the Langue d'oc (that is *oc for oui* yes) ; the latter flourished in the north of France, and used the Langue d'oïl (that is *oil for oui*). The Troubadours produced romances, yet excelled chiefly in lyric poetry ; the Trouvères excelled in romances, several of which are extant : as, the *Brut d'Angleterre*, and the *Roi*, by Wace ; the romance of the "Rose," by Guillaume de Lorris, and Jean de Meung ; the Troubadours were usually accompanied by *Jongleurs*, who sang their masters' verses, with the accompani-

ment of the guitar. Histories of these French poets, and specimens of their works, have been published in France. These poets, although frequently very licentious, undoubtedly tended to promote civilisation during those warlike times.

TROY (Asia Minor). Its obscure and traditional history is immortalised by Homer.

Arrival of Scamander in Phrygia Minor.	Blair
Teucer succeeds his father	B.C. 1546
Dardanus succeeds Teucer, and builds the city of Dardania	1502
Reign of Erichthonius	1480
Reign of Tros, from whom the people are called Trojans, and the city Troy	1449
Ilus, son of Tros, reigns, and the city is called Ilium	1374
Reign of Laomedon	1314
Arrival of Hercules in Phrygia; Hesiöne delivered from the sea-monster.	1260
War of Hercules and Laomedon	Blair; Usher. 1225
Reign of Priam, or Podarces	1224
Rape of Helen, by Alexander Paris, son of Priam, 20 years before the sacking of Troy.	—

Homer's <i>Iliad</i> , book xxiv. line 964, Pope's edit.	B.C. 1204
Commencement of the invasion of the Greeks to recover Helen	1193
Troy taken and burned in the night of the 11th of June, i.e. 23rd of the month Thargelion. <i>Parian Marbles</i> . 408 years before the first Olympiad. <i>Apollodorus, Hales, and Clinton</i> , 1183; others	1184
Eneas arrives in Italy. <i>Lenglet</i>	1183
[Some time after the destruction of Troy, a new city was built with the same name, about thirty stadia distant from the old site. It was favoured by Alexander the Great in his Asiatic expedition, but never rose to much importance, and in the age of Strabo was nearly in ruins. <i>Priestley</i> .]	

TROY WEIGHT. The Romans left their ounce, now our avoirdupois ounce, in Britain. The present ounce of this weight was brought from Grand Cairo into Europe, about the time of the Crusades, A.D. 1095. It was first adopted at Troyes, a city of France, whence the name; and is used to weigh gold, silver, and precious stones. The Troy weight, Scots, was established by James VI. (our James I.) in 1618. See *Standard*.

TROYES, Central France, where a treaty was concluded between England, France, and Burgundy, whereby it was stipulated that Henry V. should marry Catherine, daughter of Charles VI., be appointed regent of France, and after the death of Charles should inherit the crown, May 21, 1420. Troyes was taken by the allied armies, Feb. 7; retaken by Napoleon, Feb. 23; and again taken by the allies, March 4, 1814.

TRUCE OF GOD (*Treuga Dei*), a term given to a cessation of the private feuds and conflicts so general, during the middle ages, all over Europe. The clergy strenuously exerted their influence for the purpose. A synod at Roussillon, A.D. 1027, decreed that none should attack his enemy between Saturday evening (at none) and Monday morning (at the hour of prime). Similar regulations were adopted in England, 1042 (sometimes Friday and Wednesday being chosen for the time). The truce of God was confirmed by many councils of the church, especially the Lateran Council, in 1179.

TRUMPET. Some of the Greek historians ascribe the invention of the trumpet to the Tyrrhenians, and others to the Egyptians. It was in use in the time of Homer, but not at the time of the Trojan war. First torches, then shells of fish sounded like trumpets, were the signals in primitive wars. *Potter*. The speaking-trumpet is said to have been used by Alexander the Great in 335 B.C. Trumpets were first sounded before the king in the time of Offa, king of Mercia, A.D. 790. Speaking-trumpets were improved by Kircher in 1652. Made by Salland, 1654. Philosophically explained by Moreland, 1671.

TRUMPET-FLOWER, *Bignonia radicans*, was brought hither from North America, about 1640. The Trumpet Honeysuckle, *Lonicera sempervirens*, came from North America in 1656. The *Bignonia capensis* was brought to England, from the Cape, in 1823. The Large-flowered Trumpet flower, or *Bignonia grandiflora*, was brought from China in 1800.

TUAM (W. Ireland). St. Jarlath, the son of Loga, who lived about 501, is looked upon as the first founder of the cathedral of Tuam, though the abbey is said to have been founded in 487. The church was anciently called *Tuaim-da-Gualand*. In 1151, Edan O'Hoisin was the first archbishop, at least the first who had the use of the pall, for some of his predecessors are sometimes called bishops of Connaught, and sometimes archbishops, by Irish historians. The see of Mayo was annexed to Tuam in 1559. Tuam is valued in the king's books, by an extent returned anno 28 Eliz. at 50*l.* sterling per annum. *Beatson*. It ceased to be archiepiscopal, conformably with the statute 3 & 4 Will. IV. 1833, and is now a bishopric only, to which Killala and Achonry, a joint see, has been added. See *Archbishops*.

TUBULAR BRIDGES. The Britannia Tubular Suspension Bridge, then the most wonderful enterprise in engineering in the world, was constructed about a mile southward of the Menai Strait Suspension Bridge.* At this spot is a rock called the Britannia rock,

* The Britannia tubular bridge was intended to supply the place of—we may also say supersede—one of the finest bridges in the kingdom; and the railway of which the tubular bridge forms a part, is in like

near the centre of the Menai Strait, the surface of which is about ten feet above low water level, on which is built a tower two hundred feet above high water (commenced building, May 1846), and on which rest two lines of tubes or hollow girders strong enough to bear their weight and laden trains in addition, the ends resting on the abutments on each shore; each tube being more than a quarter of a mile in length. The height of the tube within is thirty feet at the Britannia tower, diminishing to twenty-three feet at the abutments. The lifting of these tubes to their places is regarded as the most gigantic operation ever successfully performed, June 27, 1849. The first locomotive passed through, March 1850. The Conway Tubular Bridge (1846-8) is a miniature copy of the Britannia, and therefore requires no description. The principal engineers were Mr. Robert Stephenson and Mr. Fairbairn. At Chepstow is a railway tubular bridge, erected in 1852. A bridge or viaduct on the tubular principle (called the Albert viaduct) over the river Tamar at Plymouth was opened by the prince consort, May 2, 1859. The most stupendous tubular bridge in the world is that over the St. Lawrence, Canada. See *Victoria Bridge*.

TUESDAY, in Latin *Dies Martis*, the third day of the week, so called, as is supposed, from *Tuisto Tiv*, or *Tuesco*, a Saxon deity, particularly worshipped on this day. *Tuisto* is mentioned by Tacitus. See *Week Days*.

TUILERIES (Paris), the imperial palace of France, commenced by Catherine de' Medici, after the plans of Philibert de l'Orme, A.D. 1564; continued by Henry IV.; and finished by Louis XIV. This palace was stormed by the mob, Aug. 10, 1792; and ransacked in the revolutions of 1830 and 1848.

TULIPS came to England from Vienna, 1578. It is recorded in the register of Alkmaar, in Holland, that in 1639, 120 tulips, with the offsets, sold for 90,000 florins; and that one called the *Viceroy*, sold for 4203 guilders! The States at last put a stop to this ruinous traffic. The tulip-tree, *Liriodendron tulipifera*, was brought to England from America, about 1663.

TUNBRIDGE WELLS (Kent). The springs here were discovered, it is stated, by Dudley, lord North, who, in the reign of James I., had retired into the neighbourhood in the last stage of consumption, and became perfectly restored to health by the use of its waters, 1606. The wells being visited by the queens of Charles I. and II., the place soon became a fashionable resort.

TUNGSTEN (also called Wolfram and Scheelium), a hard whitish brittle metal. From tungstate of lead, Scheele in 1781 obtained tungstic acid, whence the brothers De Luyart in 1786 obtained the metal. In 1859 it was employed in making a new kind of steel.

TUNIS AND TRIPOLI (N. Africa). The former stands near where Carthage was built. The territories of both formed part of the Carthaginian state, and were entirely destroyed by the Romans after the third Punic war, 148 B.C. Tunis was besieged by Louis IX. of France, 1270. It remained under African kings till taken by Barbarossa, for Solymán the Magnificent. Barbarossa was expelled by Charles V.; but the country was recovered by the Turks under Selim II. Taken with great slaughter by the emperor Charles V. when 10,000 Christian slaves were set at liberty, 1535. The bey of Tunis was first appointed in 1570. Tunis was reduced by admiral Blake, on the bey refusing to deliver up the British captives, 1655. In July 1856, the bey agreed to make certain constitutional reforms. The bey died Sept. 22, 1859; and his successor Sidi Sadok took the oath of fidelity to the constitution.

TUNNAGE AND POUNDAGE were ancient duties levied on every tun of wine and pound of other goods, imported or exported, and were the origin of our "customs." They commenced in England about 21 Edw. III. 1346. They were granted to the kings of England for life, beginning with Edward IV. At the beginning of his reign Charles I. gave great offence by levying them on his own authority. They ceased in 1689.

TUNNELS. The earliest tunnel for internal navigation was executed by M. Rignet, in the reign of Louis XIV. at Bezières in France. The first in England was by Mr. Brindley, on the duke of Bridgewater's navigation, near Manchester, about 1760. Era of the Gravesend tunnel, 1800—the report upon it, 1801. The Thames Tunnel was projected by Mr. Brunel

manner a substitute for one of the finest mail-coach roads ever constructed. The road from London to Holyhead has been long regarded as the highway from the British metropolis to Dublin; and the late Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting a beautiful suspension bridge over the river Conway and over the Menai Strait; commenced in July 1818, and finished in July 1825. When Chester became a centre of railway communication, a few years since, it was considered that a through route to Holyhead would be more conveniently established from that point than from Shrewsbury, which lies in the route of Telford's road. Accordingly the Chester and Holyhead Railway was constructed; and in its course, both the Conway and the Menai had to be crossed; and hence were formed the present tubular bridges.

in 1823, and opened for foot passengers, March 25, 1843. See *Thames Tunnel*. In 1857 M. Thomé de Gamond proposed the making a submarine tunnel from France to England! Innumerable tunnels have been made for railways. The tunnel at Liverpool was completed in the middle of 1829, lit up with gas, and exhibited once a week. On the London and Birmingham railway there are eight tunnels (the Primrose-hill, Watford, Kilsby, &c.), their total length being 7336 yards. *Smiles*.

TURIN, an ancient Roman city in Piedmont, now capital of the Sardinian States. Its importance dates from the permanent union of Savoy and Piedmont in 1416. The French besieged this city in 1706; but prince Eugène defeated their army, and compelled them to raise the siege. In 1798, the French republican army took possession of Turin, seized all the strong places and arsenals of Piedmont, and obliged the king and his family to remove to the island of Sardinia. In 1799, the French were driven out by the Austrians and Russians; but shortly afterwards the city and all Piedmont surrendered to the French. In 1814, it was delivered up to the allies, who restored it to the king of Sardinia. See *Sardinia*.

TURKEY. The Turks themselves were originally a tribe of Tartars; but by reason of the number of people whom they conquered, and with whom they became incorporated, the modern Turks must be regarded as a mixture of many races of men. The first notice of them in history is about the year A.D. 760, when they obtained possession of a part of Armenia, called from them *Turcomania*. They afterwards gradually extended their power; but in the thirteenth century, being harassed in their new possessions by other Tartar tribes, they retreated to Asia Minor, which they had previously conquered. Their dominions, divided for some time into petty states, were united under Othman, who assumed the title of sultan, and established his empire at Prusa, in Bithynia, in 1298. The population of European Turkey in 1845, 16,443,000 (of which 10,435,079 were Christians). Population of the whole Turkish empire in 1844, 36,600,000. The Turkish empire comprehends the almost independent principalities of Moldavia and Wallachia, Servia, and Montenegro; and the hereditary vice-royalty of Egypt.

The Oghusian Tartars, the ancestors of the present Turks, settle in Asia Minor . . . A.D. 1231
The Turkish empire first formed under Othman at Bithynia (hence called *Ottoman*) . . . 1298
The Turks penetrate into Thrace, and take Adrianople . . . 1361

- The Porte acknowledges the independence of Greece . . . April 25, —
- Treaty with America . . . May 7, —
- St. Jean d'Acre taken by Ibrahim Pacha, son of Mehemet Ali . . . July 2, 1832
- He defeats the army of the sultan at Konieh with great loss . . . Dec. 21, —
- Ibrahim Pacha marches within eighty leagues of Constantinople, and the sultan has recourse to the aid of Russia . . . Jan. 1833
- The Russians enter Constantinople . . . April 3, —
- Treaty with Russia, offensive and defensive, . . . July 8, —
- Office of grand vizier abolished . . . March 30, 1838
- Treaty of commerce with England, concluded by Lord Ponsonby, ratified . . . Aug. 16, —
- [For the events of 1839 and 1840 in relation to Syria, see *Syria*.]
- Christians admitted to office in Turkey . . . June, 1840
- The Turkish government refuses to surrender the Hungarian and Polish refugees on the joint demand of Russia and Austria, Sept. 16, —
- [The Porte (countenanced by England) firmly resists this demand.]
- Russia suspends intercourse with the Porte, . . . Nov. 12, —
- The British fleet, under sir W. Parker, anchors in Besica bay . . . Nov. 13, —
- Diplomatic relations between Russia and the Porte resumed, the latter sending the refugees to Konieh . . . Jan. 1850
- Turkish Croatia in a state of rebellion . . . Jan. 1851
- Treaty with France respecting the Holy Places (*which see*) . . . Feb. 13, 1852
- Prince Menschikoff repairs to Constantinople as Russian negotiator, Feb. 28; his peremptory demands rejected . . . April 19, 1853
- Reschid Pacha becomes foreign minister; the ultimatum being rejected, Menschikoff quits Constantinople . . . May 21, —
- Hatti-sherif issued, confirming the rights of the Greek Christians . . . June 6, —
- Russian manifesto against Turkey . . . June 26, —
- Russian army crosses the Pruth . . . July 2, —
- Grand national council—war to be declared if the principalities are not evacuated . . . Sept. 26, —
- War declared against Russia (see *Russo-Turkish War*) . . . Oct. 5, —
- Insurrection in Epirus and Albania, favoured by the Greek government at Athens—Hellenic empire proclaimed . . . Jan. 27, 1854
- Volunteers from Athens join insurgents, . . . March 14 *et seq.* —
- Rupture between Greece and Turkey, March 28, [several conflicts ensue with varied success.] —
- Osman Pacha storms Peta, the central point of the insurrection . . . April 25, —
- English and French governments, after many remonstrances, send troops, which arrive at the Pireus; the king of Greece submits, and promises strict neutrality: the Greek volunteers are recalled . . . May 25, 26, —
- Abdi Pacha and Fuad Effendi take the entrenched camp at Kolampaka, and the insurrection shortly after ceases . . . June 18, —
- Reschid Pacha, having retired (June 3), resumes his office . . . July 1, —
- Convention between Turkey and Austria, . . . June 24, —
- The Russians retire from the principalities, which are thereupon occupied by the Austrians . . . Sept. 1854 till March, 1857
- Misunderstanding among the allied powers respecting Moldavian elections, which are annulled . . . July, —
- Death of Reschid Pacha . . . Jan. 7, 1858
- Lord Stratford de Redcliffe, many years English ambassador at Constantinople, returned to England, Jan.; he is succeeded by sir H. Lytton Bulwer; accredited . . . July 12, —
- Indecisive conflicts in Montenegro, between the natives and the Turks . . . July, —
- Massacre of Christians at Jeddo (*which see*), . . . July 25, —
- Turkish financial reforms begun . . . Aug. —
- The first Turkish railway opened (from Aden to Smyrna) . . . Sept. 10, —
- Base coinage called in; a fictitious Turkish coinage begun at Birmingham, and is suppressed . . . Oct. —
- The allied powers determine the Montegrino boundaries . . . Nov. 8, —
- Prince Alexander Cousa elected hospodar of both Moldavia and Wallachia . . . Feb. 5 and 7, 1859
- [The Porte at first objects, but afterwards accedes to the double election.]
- Electric telegraph completed between Aden and Suez . . . May, —
- Great fire at Constantinople; 1000 houses destroyed . . . Sept. 10-14, —
- Great conspiracy against the sultan detected, Sept. 17; his brother implicated; several persons condemned to die are reprieved, . . . Sept. and Oct. —
- Great agitation for financial reform . . . Oct. —
- Alleged ill-treatment of Christians in Turkey; proposed intervention of the great powers, . . . —

TURKEY, *continued.*

May 5; the Turkish government promise investigation and redress; all the powers satisfied except Russia . . . May 30, 1860
 War between the Druses and Maronites in Lebanon; massacres. *See Druses* . . . June, —
 Massacre of Christians at Damascus. *See Damascus and Syria* . . . July 9-11, —
 Convention on behalf of the Great Powers at Paris; armed intervention of the French agreed to . . . Aug. 2, —
 Inundations at Galatz; loss about 175,000*l.*, Feb. 24, 1861.
 Christians revolt in the Herzegovina, aided by the Montenegrins . . . March, —
 Great need of financial reform; the British ambassador, sir H. Lytton, proposes a scheme, April, —
 Discussion respecting the French occupation of Syria; it ceases . . . June 5, —

Death of the sultan, Abdul-Medjid; accession of Abdul-Aziz, his brother . . . June 25, 1861
 Economical reforms begun; Fuad Pacha made president of the council . . . July, —
 The late sultan's jewels sold in London . . . Aug. —
 New order of knighthood (Nisban Osmanieh) to include civil as well as military persons, Sept. —
 Imperial guard re-organised . . . Oct. —
 Fuad Pacha made grand vizier . . . Nov. 22, —
 He puts forth a budget . . . March, 1862
 A Turkish loan (8,000,000*l.*) taken up in London, May, —
 Secularisation of the property of the mosques (value about 3,000,000*l.*) said to be determined on . . . Oct. —
 Insurgents in the Herzegovina submit; peace made with Montenegro . . . Sept. 23, —
 Dispute with Servia (*which see*) settled . . . Oct. 7, —

TURKISH EMPERORS.

1299. Othman, Osman, or Ottoman, who assumed the title of Grand Seignior.
 1326. Orchan, son of Othman.
 1360. Amurath or Murad I.: stabbed by a soldier, of which wound he died.
 1389. Bajazet I. his son: defeated by Tamerlane, and died imprisoned.
 1402. Solymán I., son of Bajazet: dethroned by his brother and successor.
 1410. Musa-Chelebi: strangled.
 1413. Mahomet I., also son of Bajazet.
 1421. Amurath II., succeeded by his son,
 1451. Mahomet II., by whom Constantinople was taken in 1453.
 1481. Bajazet II.: deposed by his son,
 1512. Selim I., who succeeded him.
 1520. Solymán II. the Magnificent, son of the preceding.
 1566. Selim II., son of the last.
 1574. Amurath III., his son: on his accession he caused his five brothers to be murdered, and their mother, in grief, stabbed herself.
 1595. Mahomet III., son of Amurath: commenced his reign by strangling all his brothers, and drowning all his father's wives.
 1603. Ahmed, or Achmet, his son: succeeded by his brother,
 1617. Mustapha I.: deposed by the Janissaries, and imprisoned; succeeded by his nephew,

1618. Osman II.: strangled by the Janissaries, and his uncle restored,
 1622. Mustapha I. again: again deposed, sent to the Seven Towers, and strangled.
 1623. Amurath IV.: succeeded by his brother,
 1640. Ibrahim: strangled by the Janissaries.
 1649. Mahomet IV., son of Ibrahim: deposed, and died in prison.
 1687. Solymán III., his brother.
 1691. Ahmed or Achmet II.: succeeded by his nephew,
 1695. Mustapha II., eldest son of Mahomet IV.: deposed; succeeded by his brother,
 1703. Ahmed or Achmet III.: deposed; and died in prison in 1736.
 1730. Mahmud I., or Mahomet V., succeeded his uncle, the preceding sultan.
 1754. Osman II., brother of Mahmud.
 1757. Mustapha III., brother of Osman.
 1774. Abdul-Ahmed.
 1789. Selim III.: deposed by the Janissaries, and his nephew raised to the throne.
 1807. Mustapha IV.: deposed, and, with the late sultan Selim, murdered.
 1808. Mahmud II. or Mahomet VI.: succeeded by his son,
 1839. Abdul-Medjid, July 2 (born April 23, 1823); died June 25, 1861.
 1861. Abdul-Aziz, June 25 (born Feb. 9, 1830), the PRESENT (1862) sultan of Turkey.

TURKEY TRADE, most lucrative at the time and long afterwards, commenced in the year 1550. The Turkey or Levant Company of London was instituted by charter of Elizabeth, in 1579.

TURKEYS AND GUINEA FOWLS. First brought to England A.D. 1523, and to France in 1570. Turkeys are natives of America, and were consequently unknown to the ancients. Mr. Pennant has established this fact by various particulars in the history of these birds; evincing that they are natives neither of Europe, Asia, nor Africa; a circumstance since placed beyond controversy, by the researches of Mr. Beckmann.

TURKOMANS. *See White Sheep.*

TURNER'S LEGACIES. Joseph M. W. Turner, one of the greatest of landscape painters, was born in April 1775, and died Dec. 19, 1851. He bequeathed to the nation all the pictures and drawings collected by him and deposited at his residence, 47, Queen Anne-street, West, on condition that a suitable gallery be erected for them within ten years; and directed his funded property to be expended in founding an asylum at Twickenham for decayed artists. The will was disputed by his relatives, but a compromise was made. The oil-paintings (100 in number) and the drawings (1400) were obtained by the nation, and the engravings and some other property were transferred to the next of kin. The drawings were cleaned and mounted under the careful superintendence of Mr. Ruskin, and the pictures were sent to Marlborough House for exhibition. In 1861 the pictures were removed from the South Kensington Museum to the National Gallery.

TURNING. See *Lathe*. In our dockyards, blocks and other materials for our ships of war are now produced by an almost instantaneous process, from rough pieces of oak, by the machinery of Mr. (afterwards sir Mark Isambard) Brunel (who died in 1849).

TURNPIKE. See *Tolls*. Turnpike gates for exacting tolls, which were otherwise previously collected, were set up in the reign of Charles II. 1663. *Chambers*. 27 turnpikes in and near London were removed, by act of parliament in 1827; and many others since.

TURPENTINE TREE, *Pistacia Terebinthinus*, came from Barbary, before 1656. Turpentine is a sort of resinous gum, usually distilled out of the fir and other trees, and is of two kinds, common and Venetian. *Pardon*. Spirits of turpentine were first applied, with success, to the rot in sheep; one-third of the spirit diluted with two-thirds water, 1772. *Annual Register*.

TUSCAN ORDER OF ARCHITECTURE is a debased Doric, and is used in the erection of coarse and rude buildings, in which strength is principally intended, without regard to ornament or beauty. *Wotton*. The base and capital are usually seven modules in length, and the upper part of the pillar is one-fourth less than the diameter at the bottom. *Pardon*. It is called Tuscan because invented in Tuscany. *Bayley*.

TUSCANY, a grand-duchy in Central Italy, is the northern part of the ancient Etruria (*which see*). It formed part of the Lombard kingdom; at the conquest of which by Charlemagne, it was made a marquise for Boniface about A.D. 812 or 828. His descendant, the great countess Matilda, bequeathed the southern part of her domains to the pope. In the northern part (then called Tuscia), the cities, Florence, Pisa, Sienna, Lucca, &c., gradually became flourishing republics. Florence became the chief under the government of the Medici family (see *Florence*). The duchy in that family began in 1531; and the grand-duchy in 1569. After the extinction of the Medicis in 1737, Tuscany was given by the treaty of Vienna (1738) to Francis, duke of Lorraine (husband of Maria Theresa of Austria in 1736), who had ceded his hereditary states to France. Population in 1860, 1,826,830.

The French enter Florence . . . March 28, 1799
The grand-duke is dispossessed, and his dominions given to Louis duke of Parma (of the royal house of Spain), with the title of king of Etruria . . . 1801
Tuscany incorporated with the French empire . . . 1807
The grand-duchy given to Eliza, sister of Napoleon . . . 1808
Ferdinand III. restored . . . 1814
Lucca united to Tuscany . . . 1847
Leopold II. grants a free constitution . . . Feb. 1848
Insurrection at Florence; republic proclaimed; the duke flies . . . Feb. 11, 1849
He is restored by the Austrians . . . July, 1850
Prosecution of the *Madiai* * . . . May, 1852
The Tuscan army demand alliance with the Sardinians; the grand-duke refuses, and departs to Bologna; the king of Sardinia is proclaimed dictator, and a provisional government formed, April 27; the king assumes the command of the army, but declines the dictatorship . . . April 30, 1859

The Sardinian commissary Buoncompagni invested with the powers of government, May 11, 1859
Prince Napoleon arrives at Leghorn, addresses the Tuscans and erects his standard, May 23, —
The grand-duke Leopold II. abdicates in favour of his son Ferdinand . . . July 21, —
The Tuscan constituent assembly meets, Aug. 11, —
It declares against recalling the house of Lorraine, and votes for annexation to Sardinia, Sept. —
Prince Eugene of Savoy-Carignan, elected governor-general of Central Italy; he declines; but recommends Buoncompagni, Nov.; who is accepted by the Tuscans, Dec. 3, —
Annexation to Sardinia voted by universal suffrage . . . March 11, 12, 1860
Prince Eugene of Savoy-Carignan appointed governor . . . March 26, —
(See *Italy*.)

SOVEREIGNS OF TUSCANY.

GRAND-DUKES.
1569. Cosmo I., *Medici*.
1574. Francis I.
1587. Ferdinand I.
1609. Cosmo II.
1621. Ferdinand II.
1670. Cosmo III. (visited England, and wrote an account of his travels.)
1723. John Gaston (last of the *Medici*).
1737. Francis II. (duke of *Lorraine*), became emperor of Germany in 1745.

1765. Leopold I. (emperor in 1790).
1790. Ferdinand III. (second son of Leopold II.); expelled by the French in 1800.

KINGS OF ETRURIA.
1801. Louis I., duke of Parma.
1803. Louis II.
[In 1807, the states were incorporated into the kingdom of Italy.]

* Much interest and sympathy were excited in England, and other Protestant countries of Europe, by the imprisonment at Florence of the *Madiai* (husband and wife), who had embraced the English reformed religion, and read the Bible in due conformity with the teaching of their new faith. For this "crime" they were separately incarcerated in loathsome dungeons, and subjected to all the rigours of the Romish ecclesiastical law, May, 1852. A Protestant deputation from England, headed by the earls of Shaftesbury and Roden, proceeded to Florence in Oct. 1852, with the view to their release from confinement; but the grand-duke refused to receive them. The *Madiai* were set at liberty, by the interposition of the British government, in March 1853. An annuity of 100*l.* was provided for them by subscription.

TUSCANY, *continued.*

GRAND-DUCHESS
1808-14. Eliza Bonaparte (married to Bacciochi, made
"prince of Lucca).

GRAND-DUKES.
1814. Ferdinand III. restored.

1824. Leopold II., June 18 (born Oct. 3, 1797; abdicated, July 27, 1859).
1859. Ferdinand IV., July 21 (born June 10, 1835).
Heiress: Maria-Antoinette, born Jan. 10, 1838.
1860. Tuscany incorporated into the kingdom of Sardinia.

TWELFTH-DAY, the church festival called the Epiphany, or manifestation of Christ to the Gentiles. See *Epiphany*. The custom of drawing king and queen on this day is said to have been derived from the Greeks and Romans, who, on the tabernacle or Christmas festivals, drew lots for kings, by putting a piece of money in the middle of a cake: whoever found the money in his slice was saluted as king.

TYBURN (W. London), the place in London for the execution of malefactors till 1783. Formerly Oxford-road, now Oxford-street, had trees and hedges on both sides; and beyond all was country, both northward and westward: Tyburn turnpike stood at the west end of Oxford-road. Pennant (who died 1798) remembered Oxford-street as "a deep, hollow road, and full of sloughs, with here and there a ragged house, the lurking-place of cut-throats."

TYLER'S INSURRECTION. It arose in the opposition of the people to the poll-tax levied in 1379. One of the collectors acting with indecent rudeness to Wat Tyler's daughter, with a view to prove her of sufficient age (fifteen) to pay the tax, the father struck him dead. His neighbours took arms to defend him, and in a short time almost the whole of the population of the southern and eastern counties were in a state of insurrection, extorting freedom from their lords, and plundering. On June 12, 1381, they gathered upon Blackheath to the number of 100,000 men. The king, Richard II., invited Tyler to a parley, which took place on the 15th at Smithfield, where the latter addressed the king in a somewhat menacing manner, now and again lifting up his sword. His insolence raised the indignation of the mayor, Walworth, who stunned Tyler with a blow of his mace, and one of the king's knights dispatched him. Richard temporised with the multitude by promising them a charter, and thus led them out of the city, when sir R. Knollys and a band of knights suddenly attacked and dispersed them with much slaughter. The insurrection in Norfolk and Suffolk was subdued by the bishop of Norwich; and 1500 of the rebels were executed.

TYPE-COMPOSING MACHINES. See under *Printing*.

TYRANT. In early Greek history the term was applied to any man who governed with irresponsible power. Solon objected to the term, and chose the name Archon, 594 B.C. The earliest tyrants were those at Sicily, beginning with Clisthenes, in the 7th century B.C. Tyranny declined in Greece about 490 B.C., and revived after the close of the Peloponnesian war, 404 B.C. See *Thirty Tyrants*.

TYRE (Phœnicia). This great city was first built by Agenor. Another city was built 1257 (about 2267, *Hales*) B.C. It was besieged by the Assyrians, 719 B.C., and they retired from before it, after a siege of upwards of five years, 713 B.C. Taken by Nebuchadnezzar, 572 B.C., and the city demolished, when the Tyrians removed to an opposite island, and built a new and magnificent city. It was taken by Alexander with much difficulty, after a siege of seven months, Aug. 20, 332 B.C. He joined the island to the continent by a mole. *Strabo*. It was taken by the allied fleet in 1841.

TYRE, ERA OF, began on Oct. 19, 125 B.C. with the month of Hyperbeteus. The months were the same as those used in the Grecian era, and the year is similar to the Julian year. To reduce this era to ours, subtract 124; and if the given year be less than 125, deduct it from 125, and the remainder will be the year before Christ.

TYROL, the eastern part of ancient Rhetia, now a province of the Austrian empire (to the north of Bavaria). It was ceded to the house of Hapsburg in 1359, by Margaret, the heiress of the last count Tyrol. The province became an appanage of the younger (or Tyrol) branch of the imperial house, which branch came to the throne in the person of Maximilian II. in 1618. The French conquered the Tyrol in 1808 and united it to Bavaria; but in 1809 an insurrection broke out, headed by the courageous Andrew Hofer, an innkeeper. He drove the Bavarians out of the Tyrol, and thoroughly defeated some French detachments: but laid down his arms at the treaty of Vienna. He was subsequently accused of corresponding with the Austrians, captured and sent to Mantua, and there shot by order of the French government (to its great disgrace) Feb. 20, 1810. The Austrian emperor ennobled his family in 1819, and erected his statue in Inspruck in 1834. The Tyrolese riflemen were very effective in the Italian war in 1859.

U.

UBIQUARIANS, or **UBIQUITARIANS** (from *ubique*, everywhere). A sect of Lutherans, which spread through Germany and other countries, and who believed the natural body of Christ to be everywhere present. This sect began under Brentius, about A.D. 1540, and was at no time very numerous. *Ashe*.

UKRAINE (a frontier). The country, a vast fertile plain in Russia, was ceded to the Cossacks by Poland in 1672, but was obtained by Russia in 1682: the country was divided; Poland having the west side of the Dnieper, and Russia the east. The whole country (the borders of Poland, Russia, and Little Tartary) was assigned to Russia by the treaty of Partition in 1795.

ULM, in Wurttemberg, S. Germany, where a **PEACE** was signed, July 3, 1620, by which Frederick V. lost Bohemia (having been driven from it previously). Ulm was taken by the French in 1796. Great battle between the French and Austrians, in which the latter, under general Mack, were defeated with dreadful loss, by marshal Ney, whose victory was consummated by the surrender of Ulm, and 28,000 men, the flower of the Austrian army, Oct. 17-20, 1805.

ULPHILAS'S BIBLE. See *Bible*.

UMBRELLA, described in early dictionaries as "a portable pent-house to carry in a person's hand to screen him from violent rain or heat." Umbrellas are very ancient, as they appear in the carvings at Persepolis. Niebuhr, who visited the southern part of Arabia, informs us that he saw a great prince of that country returning from a mosque, preceded by some hundreds of soldiers, and that he and each of the princes of his numerous family caused a large umbrella to be carried by his side. The old chinaware in our pantries and cupboards show the Chinese shaded by an umbrella. It is said that the first person who used an umbrella in the streets of London was the benevolent Jonas Hanway, who died in 1786.*

UNCTION, **EXTREME**. See *Anointing*.

UNIFORMITY, **ACT OF** (2 & 3 Edward VI.), 1549, ordained that the order of divine worship drawn up by Cranmer and others "with the aid of the Holy Ghost" should be the only one used after May 20. The penalties for refusing to use it were fine and imprisonment. This act was re-enacted by Elizabeth in 1559. The statute known as the act of Uniformity, 14 Charles II. c. 4, was passed in 1662. It enjoined uniformity in matters of religion, and obliged all clergy to subscribe to the thirty-nine articles, and use the same form of worship, and same book of common prayer. Its enforcement on Aug. 24, 1662, termed Black Bartholomew's day, caused upwards of 2000 ministers to quit the church of England, and laid the foundation of the dissenting interest. The day was celebrated by dissenters in 1862.

UNIFORMS. Military uniforms were first used in France, "in a regular manner," by Louis XIV. 1668. In England the uniform was soon afterwards adopted in the military service, but with little analogy to the modern dress. *Ashe*. See under *Navy*.

UNION OF CALMAR, 1397; of Utrecht, 1579.

UNION of the crowns and kingdoms of England and Scotland by the accession of James VI. of Scotland as James I. of England, March 24, 1603. The legislative union of the two kingdoms was attempted, but failed in 1604 and 1670; in the reign of Anne. Commissioners were appointed, the articles discussed, and, notwithstanding a great opposition made by the Tories, every article in the union was approved by a great majority, first

* For a long while it was not usual for men to carry them without incurring the brand of effeminacy. At first, a single umbrella seems to have been kept at a coffee-house for extraordinary occasions—lent as a coach or chair in a heavy shower, but not commonly carried by the walkers. The *Female Tatler* advertises: "The young gentleman belonging to the Custom-house who, in fear of rain, borrowed the umbrella from *Wilks's Coffee-house*, shall the next time be welcome to the maid's *pattens*." As late as 1778, one John Macdonald, a footman, who wrote his own life, informs us that he had "a fine silk umbrella, which he brought from Spain; but he could not with any comfort to himself use it, the people calling out, 'Frenchman! why don't you get a coach?'" The hackney-coachmen and chairmen, with true *esprit de corps*, were clamorous against their portentous rival. The footman, in 1778, gives us some farther information. "At this time there were no umbrellas worn in London, except in noblemen's and gentlemen's houses, where there was a large one hung in the hall to hold over a lady if it rained, between the door and her carriage." This man's sister was compelled to quit his arm one day from the abuse he drew down upon himself and his umbrella. But, he adds, that "he persisted for three months, till they took no further notice of this novelty. Foreigners began to use theirs, and then the English. Now it is become a great trade in London." *New Monthly Magazine*.

in the house of commons, and afterwards by the peers, July 22, 1706; was ratified by the Scottish parliament, Jan. 16, 1707, and became a law, May 1, same year.

UNION of GREAT BRITAIN and IRELAND, proposed in the Irish parliament, Jan. 22, 1799. Rejected by the commons of Ireland, Jan. 24, the votes being 105 for, to 106 against the union. The English house of commons on the same question divided, 140, 141, and 149 for the union; against it, 15, 25, and 28, respectively. Lord Castlereagh detailed his plan of the union, in the Irish house of lords, founded on the resolutions of the British parliament thereon, Feb. 5, 1800. Votes of the commons agreeing to it, 161 against 115, Feb. 17; and again, 152 against 108, Feb. 21. The houses of lords and commons wait on the lord-lieutenant with the articles of union, March 27. The act passed in the British parliament, July 2, 1800. The imperial united standard was first displayed at the Tower of London; and upon Bedford Tower, Dublin Castle, in consequence of the act of legislative union becoming an operative law, Jan. 1, 1801. For attempts to dissolve the union, see *Repeal*.

UNION JACK. The original flag of England was the banner of St. George, *i.e.*, white with a red cross, which, April 12, 1606 (three years after James I. ascended the throne), was incorporated with the banner of Scotland, *i.e.*, blue with a white diagonal cross. This combination obtained the name of "Union Jack," in allusion to the union with Scotland, and the word Jack may be considered a corruption of the word "Jaques," or James. This arrangement continued until the union with Ireland, Jan. 1, 1801, when the banner of St. Patrick, *i.e.*, white, with a diagonal red cross, was thus amalgamated with it, and forms the present Union flag.

UNION REPEAL ASSOCIATION, IRELAND. See *Repeal of the Union*.

UNITARIANS.* This sect began with Servetus, a learned man, who, excited by the discussions of the reformers, began to read the Scriptures, with so free a spirit, that he printed a tract in disparagement of the orthodox doctrine of the Trinity. In 1553, proceeding to Naples through Geneva, Calvin induced the magistrates to arrest him on a charge of blasphemy and heresy. Servetus, refusing to retract his opinions, was condemned to the flames, which sentence was carried into execution, Oct. 27, 1553. Servetus is numbered among those anatomists who made the nearest approach to the doctrine of the circulation of the blood, before Harvey established that doctrine. The Unitarians were numerous in Transylvania in the seventeenth century; they came to England about 1700, and many of the original English presbyterian churches became Unitarian about 1730. They were not included in the Toleration act till 1813. There were 229 congregations in England in 1851. The Unitarian marriage bill was passed, June 1827. In Dec. 1833, by a decision of the vice-chancellors the Unitarians (as such) lost the possession of Lady Hewley's charity; the decision was affirmed on appeal in 1842.

UNITED IRISHMEN, a political society which met secretly, was formed in 1795 to counteract the effect of the Orange clubs.

UNITED KINGDOM. England and Wales were united in 1283; Scotland to both in 1707; and the British realm was named the United Kingdom on the union with Ireland, Jan. 1, 1801. See *Union*.

UNITED PROVINCES (Holland, Zealand, Utrecht, Friesland, Groningen, Overysse, and Guelderland), the deputies of which met at Utrecht, Jan. 23, 1579, and signed a treaty for their mutual defence. See *Holland*.

UNITED STATES OF AMERICA. See *America, North*. A great part of North America was colonised by British subjects, and formed part of the British empire. The revolted provinces from the sway of Great Britain were first styled the United States by a resolution of congress, Sept. 9, 1776. Their flag was declared to be thirteen stripes, alternately red and white, and thirteen stars in a blue field, corresponding with the then number of states of the union,† June 20, 1777. The independence of the United States was

* Their tenets are different, but somewhat similar to those of the Arians and Socinians, *which see*. The Unitarians believe in and worship one only self-existent God, in opposition to those who worship the Trinity in unity. They consider Christ to have been a mere man; and do not admit the need of an atonement, or the complete inspiration of the Scriptures.

† The following thirteen states formed the union at the declaration of independence in 1776; the italics indicate the slaveholding states; those with a * prefixed seceded from the federal government in 1860 and 1861:—

New Hampshire.
Massachusetts.
Rhode Island.
Connecticut.

New York.
New Jersey.
Pennsylvania.

Delaware.
Maryland.
* Virginia.

* North Carolina.
* South Carolina.
* Georgia.

acknowledged by France, Feb. 6, 1778; recognised by Holland, April 19, 1782; and by Great Britain in the treaty of Paris, Nov. 30, same year. The government of the United States is a pure democracy. Each of the states has a separate and independent legislature for the administration of its local affairs, but all are ruled in matters of imperial policy by two houses of legislature, the senate, and the house of representatives, to which delegates are sent from the different members of the confederacy. The president is elected by the free voice of the people. The election of Abraham Lincoln as president on Nov. 4, 1860, was followed by the secession of eleven slaveholding states. See *Southern Confederacy*.

		Insurrection at Harper's Ferry†	Oct. 16, —
		Gen. Harney superseded by gen. Scott at San	—

* This expedition, notwithstanding, under a Spanish adventurer named Lopez, landed 600 men at Cuba. After a short but obstinate struggle they took the town of Cardenas; and shortly afterwards had a land engagement with some Spanish soldiers, in which many of them were killed or taken prisoners; the others then embarked with Lopez in the *Crole* steamer, and thus escaped from a Spanish war steamer, the *Pizarro*, May, 1850. The second expedition of Lopez, in Aug. 1851, was, however, fatal to him and his followers, as above related.

† John Brown, called captain Brown and old Brown, was a prominent leader in the violent conflicts in Kansas, during the agitation respecting the question of its becoming a slave state. He was a monomaniac

UNITED STATES OF AMERICA, *continued.*

Juan, who makes conciliatory overtures; accepted by governor Douglas	Nov. 1859	300,000 and afterwards a resident army [the letter became public in Oct. 1862]	March, 1861
Death of Washington Irving	Nov. 26, —	Great excitement at the operation of the new Morrill tariff, which begins	April 1, —

The national republican convention meet at Chicago: Abraham Lincoln chosen as candidate for the presidency	May 16, —	Massachusetts, New York, Pennsylvania, and other states zealously respond, with vigorous preparations for war: Kentucky, North Carolina, Virginia, Tennessee, and Missouri, decidedly refuse, asserting the proposed coercion to be wicked, illegal, and unconstitutional	April, —
Japanese embassy received by the president at Washington	May 17, —	The mob in Baltimore, Maryland, attack some Massachusetts regiments on their way to Washington; several persons killed in the conflict	April 19, —
Fresh disputes at San Juan, through general Harney, who is recalled	May, —	President Davis issues letters of marque, April 27; president Lincoln proclaims the blockade of the ports of seceding states	April 19, —
William Goodrich (Peter Parkey) dies	May, —	U. S. Arsenal at Harper's Ferry, Virginia, fired by command, and 15,000 stand of arms destroyed, April 18; 9 ships of war and naval stores in the navy yard, Norfolk, Va., burnt to prevent them falling into the hands of the southern confederates, who occupy the place,	April 21, —
The national democratic convention meet at Baltimore; a large number of delegates secede; the remainder nominate Stephen Douglas as president; the seceders nominate John Breckinridge	June 18, —	Virginia (except West Virginia) secedes by ordinance (the 8th)	April 25, —
The Great Eastern arrives at New York	June 23, —	Lincoln calls for 42,034 volunteers for three years, May 3, and informs foreign powers of his intention to maintain the union	May 4, —
The Prince of Wales arrives at Detroit in the United States, Sept. 20; visits Washington, Oct. 3; Philadelphia, Oct. 9; New York, Oct. 11; Boston, Oct. 17; embarks at Portland	Oct. 20, —	The confederates under Beauregard and Johnston, in Virginia, threaten Washington, defended by the federals under generals Winfield Scott and George McClellan	May, —
Abraham Lincoln, the republican candidate, elected president	Nov. 6, —	The British queen commands her subjects to be neutral in the ensuing war	May 13, —
Intense excitement at Charleston, South Carolina, and in other southern states	Nov. —	The federals enter Virginia; Beauregard calls on the Virginians to rise and expel them,	June 7, —
South Carolina secedes from the union, Dec. 20; Alabama, Florida, Mississippi follow,	Dec. 1860 and Jan. 1861	Formal secession of Arkansas, May 6; North Carolina, May 21; Tennessee (6th, 10th, and 11th)	June 8, —
Vacillating policy of president Buchanan; the secretaries Cass, Cobb, Floyd, and Thompson resign	Dec. 1860—Jan. 1861	Several British vessels seized while endeavouring to break the blockade; the southern privateer <i>Savannah</i> captured	June, —
Major Anderson, of United States army, occupies Fort Sumter in Carolina	Dec. 26, 1860	Neutrality announced by the French emperor,	June 10, —
Delegates from South Carolina not received by the president	Dec. 30, 1860	Fast-day in confederate states	June 13, —
New York and other northern states protest against the secession; a general fast proclaimed; observed on	Jan. 4, 1861	Missouri:—Gen. Lyon raises a federal army, and defeats the state troops, June 17; the federals repulsed at Carthage, July 4; Fremont takes command in W. Missouri, July 26; federals victorious at Athens, Aug. 5; at Wilson's Creek (gen. Lyon killed), Aug. 30; Fremont proclaims martial law, and freedom to slaves of rebels, Aug. 31; Lexington surrenders to confederates, Sept. 20; Fremont blamed, retires; succeeded by Hunter	Nov. 2, —
Kansas admitted a state	Jan. 21, —	Virginia:—Federalists defeated at Great Bethel,	
Secession of Georgia, Jan. 18; Louisiana, Jan. 26; Jefferson Davis, elected by the six seceding states, is inaugurated president of the "southern confederacy," at Montgomery, Alabama	Feb. 18, —		
New (Morrill) tariff bill passed (nearly prohibits commerce with England)	March 2, —		
President Davis prepares for war (100,000 men to be raised)	March, —		
Lincoln, inaugurated president at Washington, says, "the central idea of secession is the essence of anarchy"	March 4, —		
Texas (the 7th state) secedes	March 4, —		
Southern commissioners not received by the president at Washington	March 12, —		
Gen. Winfield Scott, in a letter to president Lincoln, sets before him four courses: either, I., to surrender to slavery half the territory acquired or to be acquired; II., to blockade all revolted ports; III., to say to seceding states, "Wayward sisters, go in peace!" or IV., to conquer the south, which would require			

on the slavery question; and contending that all means for annihilating slavery were justifiable, he gathered together a band of desperate characters, who so much annoyed Missouri and other slave states, that a reward was offered for his head. He had arranged for the successful issue of the insurrection above mentioned, so far as to devise a provisional government and a new constitution. On Oct. 16, he and his band, aided by a mob, seized the arsenal at Harper's Ferry, a town on the borders of Virginia and Baltimore, stopped the railway trains, and cut the telegraph wires; a conflict with the military ensued, when many of the insurgents were killed. Brown was captured, tried, and executed on Dec. 2; and several of his companions were executed in March, 1860. These events caused a panic for a while in the Southern States, and much valueless excitement in Boston and other northern towns.

* 303 electors are appointed to vote for a president: 152 to be a majority. The numbers were, for A. Lincoln, 180; John C. Breckinridge, 72; John Bell, 39; Stephen A. Douglas, 12.

† Very many skirmishes took place, with various results.

UNITED STATES OF AMERICA, *continued.*

June 10; occupy Harper's Ferry, evacuated by the confederates, June 16; col. Pegrim and 600 confederates surrender at Beverley,	Confederate gen. Zollicoffer defeated and slain at Mill Springs or Somerset, Kentucky, Jan. 19, 1862

	Halleck supersedes McClellan as commander-in-chief July 26, —
	Slow volunteering; many emigrations to Canada and Europe; habeas corpus suspended; the

* She was sailing from Calcutta to New Brunswick, and while attempting to inquire whether a blockade existed, was captured off Charleston bar by a federal ship of war. Her captain, William Wilson, and his cook and steward, were permitted to remain on board on her voyage to Philadelphia. On March 1, 1862, Wilson with his two associates succeeded, by stratagem and courage, in recovering the command of the vessel, overcoming two U. S. officers and 13 sailors, and brought her into Liverpool. The owners of the ship gave him 2000 guineas, and the Liverpool merchants presented him with a magnificent testimonial of their admiration of his gallantry. The British government refused to restore the vessel when claimed by the Americans.

UNITED STATES OF AMERICA, *continued.*

president ordains a draft if the volunteers are not ready by Aug. 15 July, 1862
 Pope's troops ravage Virginia; he is defeated at Cedar Mountain by gen. Thomas Jefferson "Stonewall" Jackson Aug. 9
 McClellan retreats to Harrison's Landing (said to have lost 70,000 men, killed, wounded, prisoners, and deserters) Aug. 16
 Jackson turns the flank of Pope's army, and defeats him at Groveton, Virginia, Aug. 29; and when reinforced by Lee defeats him and McDowell at Bull Run, Aug. 30; and at Centreville Sept. 1
 The remains of Pope's army flee behind the lines of Washington; he is removed to the north west to act against the Indian insurrection Sept. 2
 McDowell superseded; charged with treachery, he claims a trial Sept.
 McClellan appointed commander-in-chief, marches against the confederates under Lee, who have crossed the Potomac and entered Maryland Sept.
 Severe conflicts at South Mountain Gap (or Middletown), Sept. 14-16; confederates, after a great fight near Antietam Creek and Sharpsburg road, retreat Sept. 17
 Harper's Ferry surrendered to Jackson, Sept. 15; he crosses Potomac and joins Lee's army, Sept. 17
 Federal cause declining in the west; they lose Lexington and Munsfordville, Aug. and Sept.
 Thanksgiving-day in southern states, Sept. 18, Confederates re-enter Virginia laden with stores Sept. 22
 Lincoln proclaims freedom to the slaves in the confederate states, Jan. 1, 1863, if the states have not returned to the union Sept. 22
 Secret convention of 16 governors of states at Altoona, Pennsylvania, approve Lincoln's policy Sept. 24
 Draught of 40,000 men ordered in New York state by Oct. 15 Sept.
 Engagement near Julka, Mississippi; confederates retreat Sept. 19
 Lincoln suspends habeas corpus writ, and authorises severe measures against disloyal persons Sept. 25-27,

Desperate but indecisive conflicts near Corinth, Tennessee, Oct. 3; and at Perrysville, Kentucky Oct. 8, 1862
 Confederate gen. Stuart crosses Upper Potomac and enters Pennsylvania; enters Chambersburg and other places, carrying off horses, ammunition, &c.; rides round the federal army, and returns to his camp Oct. 9-13, —
 Gold at 29 premium at New York Oct. —
 Great Democratic meeting at New York, condemning the president's policy Oct. 12, —
 At New Orleans Butler compels all persons who refuse to take the oath of allegiance to send in their names and register their property to the provost marshal Oct. 12, —
 McClellan's head-quarters at Harper's Ferry, Oct. 17, —
 Raid of confederate gen. Morgan in Kentucky; he carries off 80 federal waggons of ammunition, &c. Oct. 18, —
 Ten confederate prisoners at Palmyra shot by order of gen. McNeil in consequence of the disappearance of Abraham Alesman Oct. 18, —
 M. Drogyn de Lhuys, on behalf of the French government, proposes joint mediation in the American conflict to Great Britain and Russia, Oct. 20; declined by Gertschakoff, Nov. 8; by earl Russell Nov. 13, —
 The confederate steamer *Alabama* captures several U. S. vessels, and excites much alarm at New York Oct. and Nov. —
 Elections for next congress; great majority for the democrat (opposition) candidates in New York and several other states Nov. 4, —
 McClellan, while advancing towards Richmond, is superseded by gen. Burnside, and retires from active service Nov. 10, —
 Burnside advances towards Richmond Nov. 10, —
 President Davis threatens reprisals if gen. McNeil is not surrendered Nov. 17, —
 Summons Fredericksburg to surrender: confederate gen. Lee, with about 80,000 men, near Nov. 22, —
 100,000 federal soldiers on the sick list Nov. —
 Great honour shown to McClellan; he is proposed as the next president Nov. —
 The federal government orders release of disaffected persons in prisons Nov. 25, —

PRESIDENTS OF THE UNITED STATES OF AMERICA.

1789. General George Washington, first president. Elected April 6.
 1793. General Washington again. March 4.
 1797. John Adams. March 4.
 1801 & 1805. Thomas Jefferson. March 4.
 1809 & 1813. James Madison. March 4.
 1817 & 1821. James Monroe. March 4.
 1825. John Quincy Adams. March 4.
 1829 & 1833. General Andrew Jackson. March 4.
 1837. Martin Van Buren. March 4.

1841. General William Henry Harrison. March 4. Died April 4, succeeded by — John Tyler (formerly vice-president).
 1845. James Knox Polk. March 4.
 1849. General Zachary Taylor. March 4. Died July 9, 1850, succeeded by the vice-president, Millard Fillmore.
 1850. Millard Fillmore.
 1853. General Franklin Pierce. March 4.
 1857. James Buchanan. March 4.
 1861. Abraham Lincoln. March 4.

UNIVERSALISTS, who believe in the final salvation of all men, have existed in various countries and ages. Dr. Tillotson appears from some of his sermons to have adopted the opinion of this universal salvation. *Johnson*. Certain it is, about 1691, he entertained a design for forming a new book of homilies; and a sermon which he preached before the queen (Mary) against the absolute eternity of hell torments, involved this doctrine. Universalists are numerous in America.

UNIVERSAL SUFFRAGE, one of the six points of the charter (see *Chartists*), was adopted by the French in the election of their president in 1851, and of their emperor in 1852, and by the Italian States in voting for annexation to Sardinia in 1860.

UNIVERSITIES. They sprang from the convents of the regular clergy, and from the chapters of cathedrals in the church of Rome. The most ancient universities in Europe are

* He obtained the name by promising Beauregard, at the battle of Bull Run, that his brigade should stand like a "stone wall."

those of Oxford, Cambridge, Paris, Salamanca, and Bologna. In old Aberdeen was a monastery, in which youths were instructed in theology, the canon law, and the school philosophy, at least 200 years before the University and King's College were founded. The British universities were vested with the lands of ex-Roman Catholics, and permitted to send members to parliament, by James I. The following are the principal universities, generally with the dates given by Bouillet. For other particulars, see them severally.

Aberdeen founded	A.D. 1494	Frankfort-on-the-Oder	A.D. 1506	Palenza, 1209; removed to	A.D. 1249
Abo, Finland	1640	Franker	1585	Salamanca	1294

		Padua, Italy	1228		

UNIVERSITY COLLEGE, London. See *London University College*.

UNIVERSITY COLLEGE, Oxford. The foundation of this college continues to be erroneously ascribed to Alfred; but it was founded in 1249, by William, archdeacon of Durham, by whom 300 marks per annum were left to the chancellor and university of Oxford, to purchase rents for the support of ten, twelve, or more masters, at the time the highest academical title, and the first purchase was made in 1253. The library, which contains a valuable collection of MSS. was completed in 1660.

UNIVERSITY OF LONDON was instituted by charter granted Nov. 28, 1836; but a second charter was bestowed Dec. 5, 1837, which revoked the former and modified several of its details. Its objects are, the advancement of religion, the promotion of knowledge, and giving encouragement for a regular course of education, by conferring academical degrees. The senate consists of a chancellor, a vice-chancellor, and thirty-six fellows; and examiners grant the several degrees in arts, law, and medicine, and (since 1859) in science. A new charter was granted April 21, 1858.

UNKNOWN TONGUE. A disturbance in the rev. Mr. Irving's chapel, in London, occasioned by a Miss Hall interrupting a discourse on prophecy, by holding forth in what was denominated the "*Unknown Tongue*." She was removed to the vestry. On the same evening a Mr. Taplin rose, and commenced, with the permission of Mr. Irving, a violent harangue in the same unknown language. A scene of most alarming confusion ensued, the whole congregation rising from their seats in affright, and the females screaming, while Mr. Irving listened with the most profound attention to the ravings of the *inspired teacher*,

Oct. 16, 1831. From this period much of the same mummery, followed by a translation into English rhapsody, was played off; and large crowds assembled, not on Sundays only, but as early as six o'clock on the mornings of week-days also. *Ann. Register*. See *Irvingites*.

URANIUM, a brittle grey metal, discovered by Klaproth in 1789, in the mineral pitch-blende. It has lately been employed in the manufacture of glass for certain philosophical purposes.

URANUS. This planet, with its satellites, was discovered by William Herschel, March 13, 1781, and called the Georgian Planet, in honour of his majesty George III. The name of Herschel was also given to it, by the astronomers of Great Britain. It is about twice as distant from the sun as the planet Saturn. Its perturbations led to the discovery of Neptune in 1846.

URICONIUM. See *Wroxceter*.

URIM AND THUMMIM, LIGHT and PERFECTION. *Exodus* xxviii. 30. It is conjectured that these words are in some way connected with the breastplate of the high priest, worn by him when he entered into the holy place, with the view of obtaining an answer from God upon extraordinary occurrences in which the welfare of the sovereign or the people was involved (1420 B.C.).

URSULINE NUNS, a sisterhood founded originally by St. Angela, of Brescia, in 1537; and so called from St. Ursula, to whom they were dedicated. *Ashc*. They governed themselves by the Augustine rules. *Monast. Hist*. Several communities of Ursuline nuns have existed in England, and some still exist in Ireland.

URUGUAY, a republic in South America, declared its independence Aug. 25, 1825; recognised, Oct. 4, 1828. The president of the executive, G. A. Pereyra, elected in 1856, was succeeded in 1860 by B. P. Berro. Population in 1861, about 304,000.

USHANT, an island near Brest, N.W. France, near which two naval battles were fought between the British and French fleets.

- | | |
|--|--|
| <p>(1.) On July 27, 1778, after an indecisive action of three hours, the latter, under cover of the night, withdrew into the harbour of Brest. The brave admiral Keppel commanded the English fleet; the count d'Orvilliers the French. The failure of a complete victory was by many attributed to sir Hugh Palliser's non-compliance with the admiral's signals. This gentleman who was vice-admiral of the blue, preferred articles of accusation against his commander, who was tried by a court-martial, but acquitted in the most honourable manner, and the charge against him declared by the court to be "malicious and ill-founded."</p> | <p>(2.) Lord Howe signally defeated the French fleet, taking six ships of the line, and sinking one of large force, and several others, June 1, 1794. While the two fleets were engaged in this action, a large fleet of merchantmen, on the safety of which the French nation depended for its means of prosecuting the war, got safely into Brest harbour, which gave occasion to the enemy to claim the laurels of the day, notwithstanding their loss in ships, and in killed and wounded, which was very great.</p> |
|--|--|

USURY. Forbidden by parliament, 1341. Two shillings per week were given for the loan of twenty, 1260. This was at the rate of 43*l.* 6*s.* 8*d.* per annum for 100*l.* which was restrained by an act, 1275, against the Jews. Until the fifteenth century, no Christians were allowed to receive interest of money, and Jews were the only usurers, and therefore often banished and persecuted (see *Jews*). By the 37th of Henry VIII. the rate of interest was fixed at 10 per cent. 1545. This statute was repealed by Edward VI. but re-enacted 13th Eliz. 1570. See *Interest* for later legislation.

UTAH. See *Mormonites*.

UTRECHT (the Roman *Trajectum ad Rhenum*), was the seat of an independent bishopric; founded about A.D. 695. The last prelate, Henry of Bavaria, weary of his turbulent subjects, sold his temporal government to the emperor Charles V. in 1528. The union of the Seven United Provinces began here (see *United Provinces*), A.D. 1579. The celebrated treaty of Utrecht, which terminated the wars of queen Anne, was signed by the ministers of Great Britain and France, as well as of all the other allies, except the ministers of the empire, April 11, 1713. The most important stipulations of this treaty were the security of the Protestant succession in England, the disuniting the French and Spanish crowns, the destruction of Dunkirk, the enlargement of the British colonies and plantations in America, and a full satisfaction for the claims of the allies. Utrecht surrendered to the Prussians, May 9, 1787; was possessed by the French, Jan. 18, 1795, and restored at the peace.

V.

VACCINATION (from *Variola Vaccina*, the cow-pox), discovered by Dr. Edward Jenner.* The idea of vaccination struck him about 1780. He made the first experiment by transferring to a healthy child, in May, 1796, the pus from the pustule of a milkmaid who had caught the cow-pox from the cows. Dr. Jenner announced his success in 1798, and vaccination became general in 1799, having been introduced Jan. 21 in that year. The genuine cow-pox appears in the form of vesicles on the teats of the cow. Dr. Jenner received 10,000*l.* from parliament for the discovery, June 2, 1802, and 20,000*l.* in 1807. The first national institution for the promotion of vaccination, called the Royal Jennerian Institution, was founded Jan. 19, 1803. The emperor Napoleon valued this service of Dr. Jenner to mankind so highly, that he liberated Dr. Wickham, when a prisoner of war, at Jenner's request, and subsequently whole families of English; making it a point to refuse him nothing that he asked. Vaccination, although much opposed on moral and religious grounds, was practised throughout all Europe previously to 1816. The important Vaccination Act, 3 & 4 Vict. passed July 23, 1840. Vaccination was made compulsory by 16 & 17 Vict. c. 100, passed Aug. 20, 1853. See *Small pox* and *Inoculation*. An important blue-book, entitled "Papers on the History and Practice of Vaccination," compiled and edited by Mr. John Simon, was published by the Board of Health in 1857.

VADIMONIAN LAKE; at a battle fought here, the Romans totally defeated the Etruscans, 283 B.C.

VAGRANTS. After being whipped, a vagrant was to take an oath to return to the place where he was born, or had last dwelt for three years, 22 Hen. VIII. 1530. A vagrant a second time convicted, to lose the upper part of the gristle of his right ear, 27 Hen. VIII. 1535; and a third time convicted, death. By 1 Edw. III. a vagabond to be marked with a V, and be a slave for two years. Vagrants were punished by whipping, gaoling, boring the ears, and death for a second offence, 14 Eliz. 1572. The milder statutes were those of 17 Geo. II.; 32, 35, and 59 Geo. III. The laws against vagrancy are still very severe in England. The present Vagrant act was passed in 1824.

VALENCAY, a château near Chateauroux, Central France, where Napoleon I. imprisoned Ferdinand of Spain from 1808 to 1813. Here the latter was put into full possession of the kingdom of Spain, on his agreeing to maintain its integrity; the treaty was signed Dec. 8, 1813.

VALENCIA (E. Spain), the *Valentia Edetanorum* of the Romans. Its university was founded, it is said, in the thirteenth century, and was revived in the fifteenth. Valencia was taken by the earl of Peterborough in 1705, but submitted to the Bourbons after the unfortunate battle of Almanza, in 1707.—It resisted the attempts made on it by marshal Moncey, but was taken from the Spaniards with a garrison of more than 16,000 men, and immense stores, by the French under Suchet, Jan. 9, 1812.

VALENCIENNES (N. France). This city (founded about 399 B.C.) was besieged from May 23 to July 26, 1793, when the French garrison surrendered to the allies under the duke of York. It was retaken, together with Condé, by the French, Aug. 27-30, 1794; on capitulation, the garrison and 1100 emigrants were made prisoners, with immense stores, viz.—200 pieces of cannon, one million pounds of gunpowder, eight millions of florins in specie, six millions of livres, 1000 head of cattle, and vast quantities of other provisions.

VALENTINE'S DAY (Feb. 14). The origin of the custom of "choosing a valentine" has been much controverted; it is indisputably of very ancient date. Valentine was a bishop of the Romish church, who suffered martyrdom under Claudius II. at Rome, A.D. 271. 618,000 letters passed through the post-office on Feb. 14, 1856. See *Post*.

VALENTINIANS, followers of Valentine, a priest, who, on being disappointed of a bishopric, forsook the Christian faith, and declaring there were thirty gods and goddesses, fifteen of each sex, which he called *Æones*, or *Ages*. He taught in the second century, and published a gospel and psalms: to these his followers added several other errors, declaring there was no obligation to suffer martyrdom; some declared against baptism, and others practised it in a peculiar manner, and all indulged in licentiousness.

* He was born in 1749, and died suddenly in 1823; his mind being occupied to the last on vaccination. A statue, subscribed for by all nations, was erected to his memory in Trafalgar-square, April 30, 1858, in the presence of the prince consort. It was removed to Kensington in 1862.

VALMY (N. E. France). Here the French, commanded by Kellerman, defeated the Prussians, commanded by the duke of Brunswick, Sept. 20, 1792. The victory was of immense moral advantage to the Republicans.

VALOIS, HOUSE OF. See *France*, 1328.

VALTELINE (Switzerland). Here took place a general and horrid massacre of the Protestants by the Roman Catholics, who revolted against the government, July 20, 1620. It began at Tirano, extended to all the towns of the district, and lasted three days, neither man, woman, nor child being spared in this slaughter, called in history the Massacre of Valteline. *Ashé.* It is now part of Austrian Italy.

VALVASOR. The first name of dignity next beneath a peer, was anciently that of *vidames*, *vicedomini*, or *valvasors*. Valvasors are mentioned by our ancient lawyers as *virī magna dignitatis*, and sir Edward Coke speaks highly of them. Yet the distinction is entirely out of use at present; and our legal antiquaries are not agreed upon even the original or ancient office of valvasors. Now, the first personal dignity after the nobility is a knight of the order of St. George or of the Garter, first instituted by Edward III. *Blackstone.*

VANADIUM (from Vanadis, the Scandinavian Venus), a metal discovered by Sefström, in 1840, combined with iron ore. A similar metal was discovered in lead ore by Del Rio in 1801, and named *Erythronium*; many, however, believed it to be Chromium.

VANCOUVER'S ISLAND, North Pacific ocean, near the main land. Settlements were made here by the English in 1781, which were seized by the Spaniards in 1789, but restored. By a treaty between the British government and that of the United States in 1846 this island was secured to the former. It has become of much greater importance since the discovery of gold in the neighbouring main land in 1858, and the consequent establishment of the colony of British Columbia (*which see*). Victoria, the capital, was founded in 1857.

VANCOUVER'S VOYAGE. Captain Vancouver served as a midshipman under captain Cook, and was appointed to command during a voyage of discovery, to ascertain the existence of any navigable communication between the North Pacific and North Atlantic oceans. He sailed in 1790, and returned Sept. 24, 1795. He compiled an account of this voyage of survey of the north-west coast of America, and died in 1798.

VANDALS, a Germanic race, attacked the Roman empire in the third century, and began their ravages in Germany and Gaul, A.D. 406-414; their kingdom in Spain was founded in 411; under Genseric they invaded and conquered the Roman territories in Africa, and took Carthage, Oct. 24, 439. They were subdued by Belisarius in 534. They were driven out by the Saracen Moors.

VANDAL KINGS IN AFRICA.

429. Genseric (see *Mecklenburg*).
477. Hunneric.

484. Gundamund.
496. Thorismund.

523. Hilderic.
531. Gelimer.

VAN DIEMEN'S LAND was discovered by Tasman in 1633. Hence a part is called **TASMANIA**. It was visited by Furneaux in 1773; by captain Cook in 1777; and was deemed the south extremity of New Holland (now Australia) until 1799, when Flinders explored Bass's Straits, and proved Van Diemen's Land to be an island. A British settlement was established on the south-east part, within the mouth of the Derwent, in 1804, and named Hobart Town, or Hobarton, now the seat of government. This island was made a convict colony of Great Britain, whither many of our remarkable transports have been sent. Population in 1857, 81,492; in 1859, 84,080.

VARENNES, a town in N. E. France, is celebrated by the arrest of Louis XVI. Here he, his queen, sister, and two children were arrested in their flight from the Tuilleries on the 21st June, and were taken on the 22nd, and conducted back to Paris, 1791. Drouet the post-master at an intermediate town, discovered the king. He immediately informed the municipality, who despatched messengers to Varennes. Drouet went first, and seeing a waggon laden with furniture upon the bridge, overset it; this obstructed the passage of the king and his suite, who were forthwith arrested.

VARNA, a fortified town and seaport in Bulgaria, European Turkey. A great battle was fought near this place, Nov. 10, 1444, between the Turks under Amurath II. and the Hungarians under their king, Ladislaus, and John Hunniades. The latter were defeated with great slaughter: the king was killed, and Hunniades made prisoner. The Christians had previously broken a recent truce.—The emperor Nicholas of Russia arrived before Varna, the head-quarters of his army, then besieging the place, Aug. 5, 1828. The Turkish garrison made a vigorous attack on the besiegers, Aug. 7; and another on the 21st, but were repulsed.

Varna surrendered, after a sanguinary conflict, to the Russian arms, Oct. 11, 1828. It was restored at the peace in 1829; its fortifications were dismantled, but have since been restored.—The allied armies disembarked at Varna, May 29, 1854, and remained there till they sailed for the Crimea, Sept. 3 following. While at Varna they suffered severely from cholera.

VASSALAGE. See *Feudal Laws* and *Slavery*.

VATICAN HILL, at Rome; became the seat of the papal government about A.D. 800. The magnificent palace of the pope at Rome is said to contain 7000 rooms. In this palace the library, founded by pope Nicholas V. A.D. 1448, is so beautiful a fabric, that it is said it will admit of no improvements; and it is also the richest in the world, both in printed books and manuscripts.—Pistolesi's description of the Vatican, with numerous plates, was published 1829-38.—The phrase "Thunders of the Vatican" was first used by Voltaire, 1748.—The ancient Vatican Collex of the Old and New Testament in Greek was published at Rome in 1857.

VAUDOIS. See *Waldenses*.

VAUXHALL BRIDGE was constructed under the direction of Mr. Walker, at an expense of about 150,000*l.* which is to be defrayed by a toll. The first stone was laid May 9, 1811, by prince Charles, the eldest son of the duke of Brunswick; and the bridge was completed and opened on June 4, 1816. It is of iron, of nine equal arches.

VAUXHALL GARDENS, London, were so denominated from the manor of Vauxhall, or Fawkeshall; but the tradition, that this house or any other adjacent was the property of Guy Fawkes, is erroneous. The premises were the property of Jane Vaux in 1615, and the mansion-house was then called Stockden's. From her it passed through various hands, till it became the property of Mr. Tyers in 1752. There is no certain account of the time when these premises were first opened for the entertainment of the public: but the Spring Gardens at Vauxhall are mentioned in the *Spectator* as a place of great resort (1711). Some writers of accounts of London suppose 1730 to be the first year of the opening of Vauxhall Gardens, which succeeded Ranelagh Gardens. The greatest season of Vauxhall was in 1823, when 133,279 persons visited the gardens, and the receipts were 29,590*l.* The greatest number of persons in one night was Aug. 2, 1833, when 20,137 persons paid for admission. The number on the then supposed last night, Sept. 5, 1839, was 1089 persons. Vauxhall was sold by auction, Sept. 9, 1841, for 20,200*l.* The last performances at Vauxhall took place on July 25, 1859. The ground has been sold for building purposes.

VEDAS, the sacred books of the Hindoos, in Sanskrit, were written about 1000 B.C.

VEGETABLES. Our chief table-vegetables were brought from Flanders in the reign of Henry VIII. about 1520 *et seq.* See *Botany*, *Gardening*, &c.

VEGETARIAN SOCIETY, whose members restrict themselves to a vegetable diet, held their fifteenth anniversary in London, on Sept. 4, 1862.

VEHMIC TRIBUNAL (*Vehmgerichte* or *Femgerichte*), secret tribunals established in Westphalia to maintain religion and the public peace. Their proceedings were enveloped in a profound mystery. They had their origin in the time of Charlemagne, and rose to importance about 1182, when Westphalia became subject to the archbishop of Cologne. These courts became very troublesome, persons of the most exalted rank being subjected to their decisions. The emperors endeavoured to suppress them, but did not succeed till the 16th century. Sir W. Scott has described them in "Anne of Geierstein." A remnant of this tribunal was abolished by Jerome Bonaparte king of Westphalia in 1811.

VEII, an independent Latin city near Rome. Between the citizens of Rome and Veii frequent wars occurred, till Veii was at last utterly destroyed and the materials employed in enlarging Rome, 388 B.C. The Roman family, the Fabii, who had seceded from Rome for political reasons, were surprised and destroyed at the river Cremer by the Veientes, 477 B.C. The siege of Veii by the Romans lasted from 405 to 396 B.C.

VELLORE (S.E. India), became the residence of the family of the dethroned sultan of Mysore, and was strongly garrisoned by English troops. The revolt of the Sepoys, in which the family of the late Tippoo took an active part, took place July 10, 1805. The insurgents were subdued by colonel Gillespie, and mostly put to the sword: 800 Sepoys were killed before the mutiny was suppressed. See *India*.

VELOCIPEDS. Vehicles of German construction. They first appeared in England in April, 1818, and obtained the name from being impelled by the feet with great celerity, the mover of the vehicle sitting astride upon it as upon a rocking-horse. Though at first a very fashionable amusement, they seem to have fallen into disuse.

VENDEE. See *La Vendée*.

VENEZUELA, the seat of a South American republic. When the Spaniards landed here in 1499, they observed some huts built upon piles, in an Indian village named Cora, in order to raise them above the stagnated water that covered the plain; and this induced them to give it the name of Venezuela, or Little Venice. This state in July, 1814, declared in congressional assembly the sovereignty of its people, which was recognised in 1818. It formed part of the republic of Columbia till 1831, when it separated from the federal union, and declared itself sole and independent. General D. T. Monagas was elected in 1855 president, and continued so till March, 1858, when a revolution broke out, and Don José Castro became president, who also was compelled to resign in Aug. 1859; and Dr. Pedro Gual assumed the government. A new constitution was promulgated in Dec. 1858. The present president, general José Paez, was elected Sept. 8, 1861. The population in 1859 was about one million and a half. See *Columbia*.

VENI, VIDI, VICI,—“I came, I saw, I conquered.” See *Zela*.

VENICE, so called from the Veneti who inhabited its site when it was made a kingdom by the Gauls, who conquered it about 356 B.C. Marcellus reconquered it for the Roman republic, and slew the Gaulish king, 221 B.C. Population of the city of Venice in 1857, 118,172.

The present city founded by families from Aquileia and Padua fleeing from Attila, about A.D. 452
First doge (or duke) chosen, Anafesto Paululio, 697
The Rialto made the seat of government . . . 811
Venice becomes independent of the eastern empire, and acquires the maritime cities of Dalmatia and Istria . . . 997
Its navy and commerce increases . . . 1000-1100
Bank of Venice established . . . 1157
Crete purchased . . . 1205
The Venetians defeat the Genoese near Negropont . . . 1263
War with Genoa, 1293; the Venetian fleet is destroyed, and peace concluded . . . 1299
The doge Andrea Dandolo defeats Louis of Hungary at Zara . . . 1346
Venice helps in the Latin conquest of Constantinople, and obtains power in the East, 1204; severe contest with Genoa . . . 1350-81
The doge Marino Faliero is accused of conspiracy, and beheaded . . . 1355
The Venetians lose Istria and Dalmatia . . . 1358
War with the Genoese, who defeat the Venetians at Pola, and advance against Venice, which is vigorously defended . . . 1377
The Genoese fleet is captured at Chiozza . . . 1380
And peace concluded . . . 1381
Venice takes an active part in the Italian war, 1425-54
The city suffers from the plague . . . 1447
War with the Turks; Venice loses many of its eastern possessions . . . 1461-77
The Venetians take Athens, 1466: and Cyprus 1475
Venice helps to overcome Charles VIII. of France . . . 1495

Injured by the discovery of America (1492), and the passage to the Indies . . . A.D. 1497
The Venetians excite the Turks against the emperor Charles V. . . 1504
And are nearly ruined by the league of Cambray 1508
They assist in defeating the Turks at Lepanto. 1571
The Turks retake Cyprus . . . —
Destructive fire at Venice . . . 1577
The Rialto bridge and the Piazzzo di San Marco erected . . . 1592
Paul V.'s interdict on Venice is contemptuously disregarded . . . 1607
Naval victories over the Turks; at Scio, 1651; and in the Dardanelles . . . 1655
The Turks take Candia . . . 1669
Venice recovers part of the Morea . . . 1683-99
But loses it again . . . 1715-39
Venice occupied by Bonaparte, who, by the treaty of Campo Formio, gives part of its territory to Austria, and annexes the rest to the Cisalpine republic . . . 1797
The whole of Venice annexed to the kingdom of Italy by the treaty of Presburg . . . 1806
All Venice transferred to the empire of Austria, 1814
Venice declared a free port . . . Jan. 24, 1830
Insurrection in 1848; the city surrenders to the Austrians after a long siege . . . Aug. 22, 1849
[In consequence of the Italian war in 1859, the country has been much disorganised, and large numbers of persons emigrated in 1860-1.]
Venetian deputies will not attend the Austrian parliament at Vienna . . . May, 1861
[Venice has had 122 doges: Anafesto, A.D. 697 to Luigi Manin, 1797.]

VENTILATORS. Invented by the rev. Dr. Hales, and his account of them read to the Royal Society of London, May 1741. The ventilator for the use of the king's men-of-war was announced in London by Mr. Triewald, in November, same year. The marquess of Chabanne's plan for warming and ventilating theatres and houses for audiences was applied to those of London in 1819. The systems of Dr. Reid (about 1830) and others followed. Dr. Arnott's work on this subject was published in 1838. A commission on warming and ventilation issued a report in 1859.

VENTRILOQUISM. Persons who had this art were by the Latins called Ventriloqui and by the Greeks, Engastrimythoi, *i.e.* people that speak out of their bellies, or who have the art of throwing out the voice in an extraordinary manner. Exhibitors of this kind have appeared in England in various ages, but some of extraordinary capabilities in their art exhibited in the last century. Mr. Thomas King is said to have been the first man whose experimental philosophy, shown in this line, excited great wonder, about 1716. Nearly all the fashionable world attended to hear him imitate the “killing a calf.” One of the most accomplished professors of ventriloquism that ever appeared in France or England, was M. Alexandre, about 1822.

VENUS. That this planet's transit over the sun would take place Nov. 24, 1639, was ascertained by Horrox in 1633. He was the first who predicted, or rather calculated, this passage, from which he deduced many useful observations. The astronomer-royal Maskelyne was sent to St. Helena, where he observed her transit, June 6, 1761. Capt. Cooke made his first voyage in the *Endeavour*, to Otaheite, to observe a transit of Venus, June 3, 1769. See NOTE to article *Cook's Voyages*. The diurnal rotation of Venus was discovered by Cassini in 1712.

VERA CRUZ (Mexico) was built about 1600. It was taken by the Americans in 1847, and by the allies in 1861 during the intervention.

VERNEUIL (N.W. France), the site of a battle fought Aug. 27, 1424, between the Burgundians and English under the regent duke of Bedford, and the French, assisted by the Scots, commanded by the count de Narbonne, the earls of Douglas and Buchan, &c. The French at first were successful; but some Lombard auxiliaries, who had taken the English camp, commenced pillaging, and left the field, as if the day was over. Two thousand English archers came then fresh to the attack; and the French and Scots, in spite of their utmost valour, were totally defeated, and their leaders killed.

VERNON GALLERY. The inadequate manner in which modern British art is represented in the National Gallery, has been long the subject of complaint. This was somewhat remedied in 1847 by the munificent present to the nation by Mr. Robert Vernon, of a collection of 157 pictures, all but two being by first-rate British artists. They were first exhibited at Mr. Vernon's house in Pall Mall, next in the vaults beneath the National Gallery, afterwards at Marlborough House, and are now (1862) at the South Kensington Museum. In 1857, Mr. John Sheepshanks followed the noble example of Mr. Vernon. See *Sheepshanks' Donations*.

VERONA (N. Italy) was founded by the Gauls or Etruscans. The amphitheatre was built by Titus, A.D. 82. Verona has been the site of many conflicts. On Sept. 27, 489, Theodoric defeated Odoacer king of Italy. Verona was conquered by the Venetians, 1405, and held by them with some intermissions till its capture by the French general Massena, June 19, 1796. Near to it Charles Albert of Sardinia defeated the Austrians, May 4, 1848. Verona is one of the four strong Austrian fortresses termed the Quadrangle, or Quadrilateral, and here the emperor Francis Joseph, on July 12, 1859, in an order of the day announced to his army that he must yield to circumstances unfavourable to his policy, and thanked his people and army for their support.

VERSAILLES, PALACE OF (near Paris). In the reign of Louis XIII. Versailles was only a small village, in a forest thirty miles in-circuit; and here this prince built a hunting-seat, about 1632. Louis XIV. between 1661 and 1687 enlarged it into a magnificent palace, which became the usual residence of the kings of France. Here was held the military festival of the royal guards, Oct. 1, 1789, which was immediately followed (on the 5th and 6th) by the attack of the mob, who massacred the guards and brought the king back to Paris. It was afterwards the residence of Louis-Philippe, and is still a royal palace. The historical gallery was opened in 1837.

VERSAILLES, PEACE OF. The definitive treaty of peace between Great Britain and British North America signed at Paris, when the latter power was admitted to be a sovereign and independent state, Sept. 3, 1783. On the same day the definitive treaty was signed at Versailles between Great Britain, France, and Spain. In pursuance of the treaty of Versailles, Pondicherry and Carical, with other possessions in Bengal, were restored to France. Trincomalee at the same time was restored to the Dutch.

VERSE. See *Poetry*. It is uncertain what species of poetry was first cultivated in Greece. Homer shone as the first epic, and Pindar was the prince of lyric poets. *Vossius*. The father of pastoral poetry was Theocritus, who flourished in the reign of Hiero, about 265 B.C. *Fabric. Bibl. Græc.* Ennius, one of the elder Roman poets, first produced satire, about 200 B.C. After the barbarous nations had conquered Rome, modern poetry or rhyme sprung from the Arabs or the Goths. Hilary bishop of Poitiers, and St. Ambrose, in the middle of the fourth century, were the first who composed hymns. Poetry was introduced into England by Aldhelme, first bishop of Sherborne, about A.D. 700. The minstrels of Provence first introduced metrical tales or ballads. Sir Thomas Wyatt was the first who introduced Italian numbers into English versification.

VERSE, BLANK. Blank verse and the heroic couplet, now used for grave or elevated themes, are both of comparatively modern date. Surrey translated part of *Virgil's Æneid* into blank verse, which is the first composition of the kind, omitting tragely, extant in the English language; and the other measure was but little affected till the reign of Charles II. The verse previously used in our grave compositions was the stanza of eight lines, the

ottava rima, as adopted with the addition of one line by Spencer (in his *Faëry Queen*), who probably borrowed it from Ariosto and Tasso, the Italian language being at that time in high repute. Boccaccio first introduced it into Italy in his heroic poem *La Teseide*, having copied it from the old French *chansons*. *Metropolitan Mag.* Trissino is said to have been the first introducer of blank verse among the moderns, about 1508. *Vossius*. The *Grave*, by Blair, is the finest specimen of blank verse in the English language, next to that of Milton. *Dr. Johnson*. The blank verse of Tennyson is now much admired.

VESPER. See *Sicilian Vespers*. In the house of the French ambassador at Blackfriars, in London, a Jesuit was preaching to upwards of three hundred persons in an upper room, the floor of which gave way with the weight, when the whole congregation was precipitated to the street, and the preacher and more than a hundred of his auditory, chiefly persons of rank, were killed. This catastrophe, termed the *Fatal Vespers*, occurred Oct. 26, 1623. *Stow*.

VESTA. The planet Vesta (the ninth) was discovered by Dr. Olbers, of Bremen, on March 29, 1807. She appears like a star of the sixth magnitude.

VESTALS. Priestesses of the goddess Vesta, who took care of the perpetual fire consecrated to her worship. This office was very ancient, as the mother of Romulus was one of the Vestals. Æneas is supposed to have first chosen the Vestals. Numa, in 710 B.C. first appointed four, to which number Tarquin added two. They were always chosen by the monarchs; but after the expulsion of the Tarquins, the high-priest was intrusted with the care of them. As they were to be virgins, they were chosen young, from the age of six to ten; and if there was not a sufficient number that presented themselves as candidates for the office, twenty virgins were selected, and they upon whom the lot fell were obliged to become priestesses. Minutia was buried alive for breaking her virgin vow, 337 B.C.; Sextilia, 274 B.C.; and Cornelia Maximiliana, A.D. 92.

VESUVIUS, MOUNT. The dreadful eruption of Mount Vesuvius, when it emitted such a quantity of flame and smoke that the air was darkened, and the cities of Pompeii and Herculaneum were overwhelmed by the burning lava, A.D. 79. More than 250,000 persons perished by the destruction of these cities; the sun's light was totally obscured for two days throughout Naples; great quantities of ashes and sulphureous smoke were carried not only to Rome, but also beyond the Mediterranean into Africa; birds were suffocated in the air and fell dead upon the ground, and the fishes perished in the neighbouring waters, which were made hot and infected by it. This eruption proved fatal to Pliny the naturalist. Herculaneum was discovered in 1737, and many curious articles have been dug from the ruins since that time; but everything combustible had the marks of having been burned by fire. Numerous eruptions have occurred, causing great devastation and loss of life. In 1631 the town of Torre del Greco, with 4000 persons, and a great part of the surrounding country, were destroyed. One of the most dreadful eruptions ever known took place suddenly, Nov. 24, 1759. The violent burst in 1767 was the 34th from the time of Titus, when Pompeii was buried. One in 1794 was most destructive: the lava flowed over 5000 acres of rich vineyards and cultivated land, and the town of Torre del Greco was a second time burned; the top of the mountain fell in, and the crater is now nearly two miles in circumference. Eruptions in May 1855, May and June 1858, and June 1859, caused great destruction, and in the spring and summer of 1860. A series of violent eruptions causing much damage occurred in Dec. 1861. Torre del Greco was again destroyed.

VICE, THE. An instrument of which Archytas of Tarentum, disciple of Pythagoras, is said to have been the inventor, along with the pulley and other implements, 420 B.C.

VICE-CHANCELLOR OF ENGLAND. An equity judge, appointed by act of parliament, who first took his seat in the court of chancery May 5, 1813. A handsome new court was erected about 1816, contiguous to Lincoln's-inn-hall; but in term-time this judge sat at a court erected in 1823 at Westminster-hall. Two additional judges, also styled vice-chancellors, with the addition of their surnames, were appointed under act 5 Vict. Oct. 1841. The office of vice-chancellor of England ceased in August, 1850, and a *third* vice-chancellor was appointed under act 14 Vict. c. 4, 1851; and by the act of 14 & 15 Vict. c. 83, same year, two equity judges, styled lords justices, were appointed. See *Lords Justices* and *Lord Chancellors*.

VICE-CHANCELLORS OF ENGLAND.

1813. Sir Thomas Plumer, April 13.
1818. Sir John Leach, Jan. 13.

1827. Sir Anthony Hart, May 4.
1827. Sir Lancelot Shadwell, Nov. 1, the LAST.

VICTORIA, formerly **PORT PHILLIP** (Australia), situated between New South Wales and South Australia, the most successful colony in that region. In 1798, Bass, in his

whale-boat expedition, visited Western Port, one of its harbours; and, in 1802, Flinders sailed into Port Phillip Bay.

Colonel Collins lands with a party of convicts with the intention of founding a settlement at Port Phillip, but afterwards removed to Van Diemen's Land. 1804

Messrs. Hume and Hovell, two stock-owners from New South Wales, explore part of the country, but do not discover its great advantages. 1824

Mr. Henty imports some sheep from Van Diemen's Land. 1834

Mr. John Batman enters between the heads of Port Phillip, and purchases a large tract of land from the aborigines for a few gewgaws and blankets. He shortly after, with fifteen associates from Hobarton, took possession of 600,000 acres in the present Geelong country, May, 1835

The Launceston Associates and Mr. John Pascoe Fawkener ascend the Yarra-Yarra (or ever-flowing) river, and encamp on the site of Melbourne. 1835

The colonists (450 in number) possess 140,000 sheep, 2500 cattle, and 150 horses: sir R. Bourke, governor of New South Wales, visits the colony, determines the sites of towns, and causes the land to be surveyed and re-sold setting aside many contending claims; he appoints Captain Lonsdale chief-magistrate. See *Melbourne*. 1837

The colony named Victoria. 1839
Its prosperity brings great numbers to it, and

induces much speculation and consequent embarrassment and insolvency. 1841-2
Mr. C. J. Latrobe appointed lieutenant-governor under sir G. Gipps. 1839

The province declared independent of New South Wales: a reward of 200*l.* offered for the discovery of gold in Victoria, which was soon after found near Melbourne, and was profitably worked. Aug. 1851

7000 persons were at Ballarat, Oct.; 10,000 round Mount Alexander. Nov. 1851

From Sept. 30 to Dec. 31, 1851, 30,311 ounces of gold were obtained from Ballarat; and from Oct. 29 to Dec. 31, 94,524 ounces from Mount Alexander—total, 124,835 ounces.

The production was still very great. 1859
Immense immigration to Melbourne. See *Melbourne*. 1852

A representative constitution granted. 1855

The present governor, sir Henry Barkly appointed. 1856

The parliament was opened. Nov. 26, 1857

Four administrations had been formed in 1837-1860
Exhibition of the products of the colony opened by the governor. Oct. 1, 1861

Population of the colony in 1836, 224; in 1841, 11,738; in 1846, 32,379; in 1851, 77,345; Dec. 31, 1852, about 200,000; in March 1857 there were 258,116 males and 445,403 females; in all 503,519. In 1859, the whole population 517,366; in 1861, 540,322.

VICTORIA. See *Hong Kong* and *Vancouver's Island*.

VICTORIA CROSS. A new order of merit, instituted to reward the gallantry of persons of all ranks in the army and navy, Feb. 5, 1856. It is a Maltese cross made of Russian cannon from Sebastopol. The queen conferred the honour on 62 persons (of both services) on Friday, June 26, 1857; and on many of the Indian army, Aug. 2, 1858.

VICTORIA PARK (E. London), was originated by an act passed in 1841, which enabled her majesty's commissioners of woods and forests to purchase certain lands for a royal park, with the sum of 72,000*l.* raised by the same act, by the sale of York-house to the duke of Sutherland. The act described the land to be so purchased, containing 290 acres, situate in the parishes of St. John, Hackney; St. Matthew, Bethnal-green; and St. Mary, Stratford-le-bow, at the east end of London. The park was completed, and opened to the public in 1845.

VICTORIA RAILWAY-BRIDGE, on the tubular principle, over the St. Lawrence, Montreal, erected by Mr. James Hodges, under the superintendence of Mr. Robert Stephenson and Mr. A. M. Ross, engineers, was completed and formally opened, Aug. 25, 1860. It is the greatest work of the kind in the world, and forms part of the Grand Trunk railway, which connects Canada and the seaboard states of North America. The length is about sixty yards less than two English miles, and about 7½ times longer than Waterloo bridge, and ten times longer than new Chelsea bridge; the height sixty feet between the summer level of the river and the under surface of the central tube. It is supported by 24 piers. The cost was 1,700,000*l.* On Jan. 5, 1855, the bridge was carried away by floating ice, but the stonework remained firm.

VICTORIA, STEAM-PACKET. Injured on the Thames on her first voyage by explosion of the boiler, April 1837. Sailed from Hull, for St. Petersburg, on Nov. 1, 1852, and having encountered a dreadful gale of wind, in which she damaged her machinery and rigging, was obliged to return to Hull, where her injuries were repaired, and whence she again sailed on the 7th of same month. She had scarcely put to sea when another storm arose, more violent than the first, whereby she was a second time severely crippled, and in that state, the tempest continuing to rage with unabated fury, she neared the Wingo Beacon, off Gottenburg, on the rocks round which she struck, and was instantly wrecked. Many of the crew and passengers were drowned; the remainder with difficulty saved their lives, Nov. 8-9, 1852. She was a splendid ship, and her disastrous fate excited the deepest sorrow in England, Gottenburg, and St. Petersburg. The storm in which this vessel was lost, was perhaps the most terrible of the many that made the winter of 1852-3 memorable.

VICTORIA REGIA, the magnificent water-lily, brought to this country from Guiana by sir Robert Schomburgk, in 1838, and named after the queen. Fine specimens are at the

Botanic Gardens at Kew, Regent's Park, &c. It was grown in the open air in 1855 by Messrs. Weeks, of Chelsea.

VICTORY, MAN-OF-WAR, of 100 guns, the finest first-rate ship in the navy of England, was lost in a violent tempest near the race of Alderney, and its admiral sir John Balchen, and 100 gentlemen's sons, and the whole crew, consisting of 1000 men, perished, October 8, 1744.—The flag-ship of the immortal Nelson at the battle of Trafalgar was also called the *Victory*, and is kept in fine preservation at Portsmouth, where it is the flag-ship in ordinary, and is visited daily by numbers of persons anxious to see the spot where the hero fell, Oct. 21, 1805.

VICTUALLERS, LICENSED. This trade in England is traced to very early times, but no date can be assigned to it; it was early under the regulation of statutes. The Vintners' company of London was founded 1437; their hall was rebuilt in 1823. It was enacted that none shall sell less than one full quart of the best beer or ale for 1*d.* and two quarts of the smaller sort for 1*d.* 1 James I. c. 9: 1603.—The power of licensing public-houses was granted to sir Giles Mompesson and sir Francis Mitchel in 1621.—The number in England then was about 13,000. In 1790, there were in Great Britain about 76,000.—There were in 1850: England, 59,335; Scotland, 15,081; Ireland, 14,080; total, 88,496. Of persons licensed to sell beer (England only) to be drunk on the premises, 34,800; not to be drunk on the premises, 3270. In 1858, 127,352 licences were issued for the sale of beer, cider, and perry in the United Kingdom, producing a revenue of 304,688*l.*; and 93,936 licences for the sale of spirits: revenue, 560,557*l.* *Official Returns.* See *Porter, Ale, &c.* Public-houses were allowed to be opened on Sundays from the hour of half-past twelve till half-past two in the day-time, and from six till ten in the evening by 11 & 12 Vict. c. 49, 1848; and 17 & 18 Vict. c. 7, 1854. In 1855, a committee was appointed to examine into the operation of these acts, and the above time prescribed by them was enlarged by an act passed in accordance with the report of the committee (18 & 19 Vict. c. 79). The Licensed Victuallers' School was established in 1803; and the Licensed Victuallers' Asylum, Feb. 22, 1827.

VICTUALLING OFFICE (London). The business of this office is to manage the victualling of the royal navy, and its first institution was in December, 1663. Originally the number of commissioners was five, afterwards seven, and then reduced to six. This office has undergone various modifications: its various departments on Tower-hill, St. Catherine's, and Rotherhithe were removed to Deptford in Aug. 1785, and the office to Somerset-house, 1783. In 1832, the office of commissioners was abolished, and the victualling office made one of five departments under the lords of the admiralty.

VIENNA (the Roman *Vindebona*), was capital of the margraviate of Austria, 984; capital of the German empire, 1278; and since 1806 the capital of the Austrian dominions only. Population in 1857, 476,222. See *Austria*.

Vienna made an imperial city in A.D. 1136	Congress of sovereigns at Vienna (see p. 716), Nov. 1814
Walled and enlarged with the ransom paid for Richard I. of England, 40,000 <i>l.</i> 1194	The revolt in Hungary induces an insurrection in Vienna March 13, 1848
Besieged by the Turks under Solymán the Magnificent, with an army of 300,000 men; but he was forced to raise the siege with the loss of 70,000 of his best troops 1529	The emperor retires, May 17: but returns, Aug. —
Besieged July—Sept. 1683	A second insurrection: count Labour, the war minister, is murdered Oct 6, —
The siege raised by John Sobieski, king of Poland, who totally defeats the Turkish army of 100,000 Sept. 12, 1683	The emperor again takes flight Oct. 7, —
Vienna taken by the French under prince Murat Nov. 14, 1805	Vienna is bombarded by Windischgrätz and Jellachich, Oct. 28; its capitulation Oct. 30, —
Evacuated Jan. 12, 1806	Conferences respecting the Russo-Turkish war (see p. 716) held at Vienna 1854
Again captured by the French May 13, 1809	The fortifications demolished, and the city enlarged and beautified 1857-8
Restored on the conclusion of peace Oct. 14, —	The imperial parliament assembles here May 31, 1860

TREATIES OF VIENNA.

The Treaty between the emperor of Germany and the king of Spain, by which they confirmed to each other such parts of the Spanish dominions as they were respectively possessed of; and by a private treaty the emperor engaged to employ a force to procure the restoration of Gibraltar to Spain, and to use means for placing the Pretender on the throne of Great Britain. Spain guaranteed the Pragmatic Sanction. April 30, 1723.
Treaty of Alliance between the emperor of Germany Charles VI., George II., king of Great Britain, and

the states of Holland, by which the Pragmatic Sanction was guaranteed, and the disputes as to the Spanish succession terminated. (Spain acceded to the treaty on the 22nd of July.) Signed, March 16, 1734.

Treaty of Peace between the emperor Charles VI. of Germany and the king of France, Louis XV., by which the latter power agreed to guarantee the Pragmatic Sanction, and Lorraine was ceded to France. Signed, Nov. 18, 1738. See *Pragmatic Sanction*.

VIENNA, *continued.*

Treaty between Napoleon I. of France and Francis (II. of Germany) I. of Austria, by which Austria ceded to France the Tyrol, Dalmatia, and other territories, which were shortly afterwards declared to be united to France under the title of the Illyrian Provinces, and engaged to adhere to the prohibitory system adopted towards England by France and Russia. Oct. 14, 1809.

Treaty between Great Britain, Austria, Russia, and Prussia, confirming the principles on which they had acted by the treaty of Chaumont, March 1, 1814. Signed March 23, 1815.

Treaty between the king of the Netherlands on the one part, and Great Britain, Russia, Austria, and Prussia on the other, agreeing to the enlargement of the Dutch territories, and vesting the sovereignty in the house of Orange. May 31, 1815.

Treaty by which Denmark ceded Swedish Pomerania and Rugen to Prussia, in exchange for Lauenburg. June 4, 1815.

Commercial treaty for twelve years between Austria and Prussia. Signed at Vienna, Feb. 19, 1833.

CONFERENCES AT VIENNA.

After the Russians had passed the Pruth, in July 1853, a conference of the four great powers, England, France, Austria, and Prussia, was held at Vienna, July 24, when a note was agreed on and transmitted for acceptance to St. Petersburg and Constantinople, July 31. This note was accepted by the czar, Aug. 10, but the sultan required modifications, which were rejected by Russia, Sept. 7.

On Dec. 5, the four powers transmitted a collective note to the Porte deploring the war, and requesting to know on what terms the sultan would treat for peace. The sultan replied in a note, dated Dec. 31, containing four points:

1. The promptest possible evacuation of the principalities.
2. Revision of the treaties.
3. Maintenance of religious privileges to the communities of all confessions.
4. A definite settlement of the convention respecting the holy places.

These points were approved by the four powers, Jan. 15, 1854, and the conferences closed on Jan. 16 following.

On April 9, 1854, a treaty was signed at Vienna by the representatives of England, France, Austria, and Prussia, for the maintenance of Turkey, evacuation of the principalities, &c.

A new conference was proposed in Jan. 1855, which met in March, consisting of plenipotentiaries from Great Britain (lord John Russell), France (M. Drouyn de L'Huys), Austria (count Buol), Turkey (Arif Effendi), and Russia (count Gortschakoff).

Two points, the protectorate of the principalities and the free navigation of the Danube, were agreed to; but the proposals of the powers as to the reduction of the Russian power in the Black sea were rejected by the czar, and the conference was again closed, June 5, 1855.

The English and French envoys' assent to the Austrian propositions was not approved of by their respective governments, and they both resigned their official positions.

VIGO (N.-W. Spain) was attacked and burnt by the English in 1589. Sir George Rooke, with the combined English and Dutch fleets, attacked the French fleet and the Spanish galleons in the port of Vigo, when several men-of-war and galleons were taken, and many destroyed, and abundance of plate and other valuable effects fell into the hands of the conquerors, Oct. 12, 1702. Vigo was taken by lord Cobham in 1719, but relinquished after raising contributions. It was again taken by the British, March 27, 1809.

VILLA FRANCA (in Portugal). An engagement took place here between the British cavalry, under sir Stapleton Cotton, and the French cavalry of marshal Soult, which ended in the defeat and flight of the latter, April 10, 1812. The next day the whole province of Estremadura was freed from the enemy. When Bonaparte heard of this battle he is said to have reproached Soult for the first time in his life.—VILLA FRANCA, a small port on the Mediterranean, near Genoa, was bought for a steam-packet station by a Russian company, about Aug. 1858. This transaction caused some political excitement at the time.—At VILLA FRANCA, in Lombardy, the emperors of France and Austria met on July 11, 1859 (after the great battle of Solferino); on the next day they signed the preliminaries of peace, the basis of the treaty of Zurich (*which see*).

VILLAIN. See *Slavery in England*.

VIMEIRA (in Portugal), the site of a battle between the British under sir Arthur Wellesley, and the whole of the French and Spanish forces in Portugal, under marshal Junot, duke of Abrantes, whom the British signally defeated, Aug. 21, 1808. The enemy's force was 14,000 men, of whom 1600 were cavalry; they attacked the English in the position of Vimeira early in the morning. The principal assault was upon the British centre and left, with a view, according to a favourite French expression in those times, of "driving the English into the sea," which was close in their rear. The attack was made with great bravery, but was as gallantly repulsed; it was repeated by Kellerman at the head of the French reserve, which was also repulsed; and the French being charged with the bayonet, withdrew on all points in confusion, leaving many prisoners, among them a general officer, and 14 cannon, with ammunition, &c., in the hands of the British. The loss of the French in killed and wounded was estimated at 1800: that of the British was 720. Only about one-half of the British force was actually engaged. *Sir W. F. Napier*.

VINCENT, CAPE ST. (S.-W. Portugal). Admiral Rooke, with twenty men-of-war, and the Turkey fleet under his convoy, was attacked by admiral Tourville, with a force vastly

superior to his own, off Cape St. Vincent, when twelve English and Dutch men-of-war, and eighty merchantmen, were taken or destroyed by the French, June 16, 1693. Near here admiral Rodney destroyed several Spanish ships, Jan. 16, 1780. (See *Rodney's Victories*.) The celebrated battle was fought Feb. 14, 1797, between the Spanish and British fleets off the Cape. The latter commanded by admiral sir John Jervis, who took (after a well-fought battle) four line-of-battle ships, and considerably damaged the rest of the Spanish fleet, Feb. 14, 1797. Two of the captured ships were of 100 guns each, and the other two each of 74. From this Cape the earl had his title.

VINCENT'S, Sr. (West Indies), long a neutral island; but at the peace of 1763, the French agreed that the right to it should be vested in the English. The latter soon after engaged in a war against the Caribs, on the windward side of the island, who were obliged to consent to a peace, by which they ceded a large tract of land to the British crown. In 1779 the Caribs greatly contributed to the reduction of this island by the French, who, however, restored it in 1783. In 1795 the French landed some troops, and again instigated the Caribs to an insurrection, which was not subdued for several months. The great eruption of the Scouffrier mountain, after the lapse of nearly a century, occurred in 1812.

VINCENT DE PAUL, St., CHARITABLE SOCIETY, founded in 1833, in France, by 12 young men. It extends its extremely beneficial operations even into Britain. Its power excited the jealousy of the French government, which suppressed its central committee at Paris, in Oct. 1861.

VINE. The vine was known to Noah 2347 B.C. A colony of vine-dressers from Phoea, in Ionia, settled at Marseilles, and instructed the South Gauls in tillage, vine-dressing, and commerce, about 600 B.C. Some think the vines are the aborigines of Languedoc, Provence, and Sicily, and that they grew spontaneously on the Mediterranean shores of Italy, France, and Spain. The vine was carried into Champagne, and part of Germany, by the emperor Probus, about A.D. 279. The vine and sugar-cane were planted in Madeira in 1420. The vine was planted in England in 1552; and in the gardens of Hampton-court-palace is an old and celebrated vine, said to surpass any known vine in Europe. See *Grapes* and *Wine*. The Tokay vines were planted in 1350.

VINE DISEASE. In the spring of 1845, Mr. E. Tucker, of Margate, observed a fungus (since named *Oidium Tuckeri*) on grapes in the hot-houses of Mr. Slater, of Margate. It is a whitish mildew, and totally destroys the fruit. The spores of this *oidium* were found in the vineries at Versailles in 1847. The disease soon reached the trellised vines, and in 1850 many lost all their produce. In 1852, it spread over France, Italy, Spain, Syria, and in Zante and Cephalonia attacked the currants, reducing the crop to one-twelfth of the usual amount. Through its ravages, the wine manufacture in Madeira ceased for several years. Many attempts have been made to arrest the progress of the disease, but without much effect. Sulphur dust is the most efficacious remedy. The disease has much abated in France, Portugal, and Madeira. In 1862 Californian vines were introduced into the two latter.

VINEGAR. Known nearly as early as wine. The ancients had several kinds of vinegar, which they used for drink. The Roman soldiers were accustomed to take it in their marches. The Bible represents Boaz, a rich citizen of Bethlehem, as providing vinegar for his reapers, into which they might dip their bread, and kindly inviting Ruth to share with them in their repast (1312 B.C.): hence we may infer that the harvesters, at that period, partook of this liquid for their refreshment; a custom still prevalent in Spain and Italy.

VINEGAR-HILL (near Enniscorthy, in Wexford, S.-E. Ireland). Here a sanguinary conflict took place between the British troops, commanded by Lake, and the Irish insurgent forces, June 21, 1798. The rebels suffered a severe defeat, though they claimed the victory from their having killed so many of the king's troops.

VIOL AND VIOLIN. As the lyre of the Greeks was the harp of the moderns, so the viol and vielle of the middle ages became the modern violin. The viol was of various sizes formerly, as it is at present, and was anciently very much in use for chamber airs and songs. That of three strings was introduced into Europe by the jugglers of the thirteenth century. The violin was invented towards the close of the same century. *Abbé Lenglet*. It is mentioned as early as 1200, in the legendary life of St. Christopher. It was introduced into England, some say, by Charles II. Straduaris (or Stradivarius) of Cremona was a renowned violin-maker from about 1700 to 1722.

VIRGIN, THE. The Assumption of the Virgin is a festival in the Greek and Latin churches, in honour of the miraculous ascent of Mary into heaven, according to their belief, Aug. 15, A.D. 45. The Presentation of the Virgin is a feast celebrated Nov. 21, said to have been instituted among the Greeks in the eleventh century; its institution in the West is

ascribed to Gregory XI. 1372. See *Conception, Immaculate*. "The Indian incarnate god Chrishna, the Hindoos believe, had a virgin-mother of the royal race, and was sought to be destroyed in his infancy, about 900 years B.C. It appears that he passed his life in working miracles and preaching, and was so humble as to wash his friends' feet: at length dying, but rising from the dead, he ascended into heaven in the presence of a multitude. The Cingalese relate nearly the same things of their Buddha." *Sir William Jones*.

VIRGINIA, daughter of the centurion L. Virginius. Appius Claudius, the decemvir, became enamoured of her, and attempted to remove her from the place where she resided. She was claimed by one of his favourites as the daughter of a slave, and Appius, in the capacity and with the authority of judge, had pronounced the sentence, and delivered her into the hands of his friend, when Virginius, informed of his violent proceedings, arrived from the camp. The father demanded to see his daughter, and when this request was granted, he snatched a knife and plunged it into her breast, exclaiming, "This is all, my daughter, I can give thee to preserve thee from the lust of a tyrant!" No sooner was the blow given, than Virginius ran to the camp with the bloody knife in his hand. The soldiers were astonished and incensed, not against the murderer, but the tyrant, and they immediately marched to Rome. Appius was seized, but he destroyed himself in prison, and prevented the execution of the law. Spurius Oppius, another of the decemvirs, who had not opposed the tyrant's views, killed himself also; and Marcus Claudius, the favourite of Appius, was put to death, and the decemviral power abolished, 449 B.C.

VIRGINIA, the first British settlement in North America. Discovered by John Cabot, in 1497. It was taken possession of and named by Raleigh, after the virgin-queen Elizabeth, July 13, 1584. Vain attempts were made to settle it in 1585. Two expeditions were formed by patent in 1606, and others in 1610. In 1626, it reverted to the crown; and a more permanent colony was established soon afterwards. George Washington was delegate for Virginia in the congress of 1774. Eastern Virginia seceded from the Union, April 25, 1861, but Western Virginia declared for the Union, Feb. 13, and elected a governor, Feb. 20, 1861. Virginia has been the chief seat of the war. See *United States* and *Richmond*.

VISCONTI, the name of a noble Italian family, which ruled in Milan from 1287 to 1447; the heiress of the family was married to Francesca Sforza, afterwards duke of Milan.

VISCOUNT, anciently the name of an office under an earl, *Vice Comes*, who being oftentimes required at court, was his deputy, to look after the affairs of the county; but in the reign of Henry VI. it became a degree of honour, and was made hereditary. The first viscount in England created by patent was John, lord Beaumont, whom Henry created viscount Beaumont, giving him precedence above all barons, Feb. 10, 1440. *Ashmole*. This title, however, is of older date in Ireland and France. John Barry, lord Barry, was made viscount Buttevant, in Ireland, 9 Rich. II. 1385. *Beatson*.

VISIER, ~~GRAND~~ an officer of the Ottoman Porte, first appointed in 1370. Formerly he governed the whole empire immediately under the grand seignior; he was sometimes called the grand seignior's lieutenant, or vicar of the empire; at his creation, the prince's seal was put into his hand, upon which was engraven the emperor's name, which he placed in his bosom and carried away with him. *Knolles*. The office was abolished in 1838.

VISIGOTHS. Separated from the Ostragoths about A.D. 330. See *Goths*. The emperor Valens, about 369, admitted them into the Roman territories upon the condition of their serving when wanted in the Roman armies; and Theodosius the Great permitted them to form distinct corps commanded by their own officers: an impolitic measure, which separated their interests from those of the state at large, and enabled them, upon every occasion of real or supposed offence to shake the empire to its centre. In 400, under Alaric, they invaded Italy, and in 410 took Rome. They began their kingdom of Toulouse, 414; conquered the Alani, and extended their rule into Spain, 414; expelled the Romans in 468; and finally were themselves conquered by the Saracens under Muza, in 711, when their last king Roderic, was defeated and slain in an obstinate engagement. See *Spain* for a list of the Visigothic kings. Their rule in France ended with their defeat by Clovis at Vouglé, in 507.

VITTORIA (N. Spain), the site of one of the most brilliant victories recorded in the annals of England, obtained by Wellington over the French army commanded by Joseph Bonaparte, king of Spain, and marshal Jourdan, June 21, 1813. The hostile armies were nearly equal, from 70,000 to 75,000 each. After a long and fearful battle, the French were driven, towards evening, through the town of Vittoria, and in their retreat were thrown into irretrievable confusion, being followed after dark by the allied British, Spanish, and Portuguese. The British loss was twenty-two officers and 479 men killed; 167 officers and 2640 men wounded. Marshal Jourdan lost 151 pieces of cannon, 451 waggons of ammuni-

tion, all his baggage, provisions, cattle, and treasure, with his bâton as a marshal of France. Continuing the pursuit on the 25th, Wellington took Jourdan's only remaining gun.

VIVARIUM. See *Aquavivarium*.

VIVISECTION, physiological experiments upon living animals, having much increased, the Societies for the Prevention of Cruelty to Animals in Dresden and Paris in 1859 requested the opinion of a committee of eminent scientific men on the merits of the knowledge thus acquired. Their judgment was not unanimous. The London Society took up the question in 1860; and printed a pamphlet by Mr. G. Macilwain against vivisection. In Aug. 1862 an international conference to discuss the question was held at the Crystal Palace, Sydenham.* The subject is still under discussion.

VOLCANOES. In different parts of the earth there are above 200 volcanoes, which have been active in modern times. The eruptions of Mount Etna are recorded as early as 734 B.C. and those of Vesuvius since A.D. 79 by authentic historians. See *Etna*, *Vesuvius*, and *Iceland*. In Mexico a plain was filled up into a mountain more than a thousand feet in height by the burning lava from a volcano, in 1759. A volcano in the isle of Ferro broke out Sept. 13, 1777, which threw out an immense quantity of red water, that discoloured the sea for several leagues. A new volcano appeared in one of the Azore islands, May 1, 1808.

VOLSCI, an ancient Latin people, frequently at war with the Romans. From their capital, Corioli, Caius Martius (who defeated them about 490 B.C.) derived his name Coriolanus. The story of his banishment by his ungrateful countrymen; of his revenge on them by bringing the Volsci to the gates of Rome, yet afterwards sparing the city at the entreaties of his mother, Volumnia (487 B.C.), is considered by many as a poetical legend. The Volsci were finally subdued and incorporated into the Roman people about 338 B.C.

VOLTAIC PILE, OR BATTERY, was constructed in consequence of the discoveries of Galvani (see *Galvanism* in article *Electricity*). The principle was discovered by Alessandro Volta, of Como (born 1745), for thirty years professor of natural philosophy at Pavia, and announced by him to the Royal Society of London in 1793. The battery was first set up in 1800. Volta was made an Italian count and senator by Napoleon Bonaparte, and was otherwise greatly honoured. While young he invented the electrophorus, electric pistol, and hydrogen lamp. He died in 1826, aged 81. The form of the Voltaic battery has been greatly improved by the researches of modern philosophers. The nitric acid battery of Mr. W. R. Grove was constructed in 1839; the carbon battery of Professor Robert Bunsen in 1842. The former is very much used in this country; that of Bunsen on the continent. See *Electricity*.

VOLTURNO, a river in S. Italy, near Capua, near to which Garibaldi and his followers held a strong position. This was furiously assailed by the royal troops on Oct. 1, 1860, who were finally repulsed after a desperate struggle, the fiercest in which Garibaldi had yet been engaged. He was aided greatly by a band of Piedmontese from Naples. On Oct. 2, general Bixio completed the victory by capturing 2500 fresh Neapolitan troops and dispersing others.

VOLUNTARY CONTRIBUTIONS. Public contributions for the support of the British government against the policy and designs of France amounted to two millions and a half sterling in 1798. About 200,000*l.* were transmitted to England from India in 1799. Sir Robert Peel, of Bury, among other contributions of equal amount, subscribed 10,000*l.* *Annual Register*. See *Patriotic Fund*. In 1862 nearly a million pounds were subscribed in the British empire for the relief of the Lancashire cotton spinners. See *Cotton*.

VOLUNTEERS. This species of force was formed in England in consequence of the threatened invasion of revolutionary France, 1794. Besides our large army, and 85,000 men voted for the sea, we subsidised 40,000 Germans, raised our militia to 100,000 men, and armed the citizens as volunteers. Between the years 1798 and 1804, when this force was of greatest amount, it numbered 410,000, of which 70,000 were Irish.† On Oct. 26, 1803, king

* Sir Charles Bell's opinion of vivisection was, that it either obscured the subject it was meant to illustrate, or misled men into practical errors of the most serious character. In this many eminent physiologists agree.

† The first regiment of Irish volunteers was formed at Dublin, under command of the duke of Leinster, Oct. 12, 1779. They armed generally to the amount of 20,000 men, and received the unanimous thanks of the houses of lords and commons in Ireland, for their patriotism and spirit, for coming forward and defending their country. At the period when the force appeared, Irish affairs bore a serious aspect; manufactures had decreased, and foreign trade had been hurt by a prohibition of the export of salted provisions and butter. No notice of the complaints of the people had been taken in the English parliament, when, owing to the alarm of an invasion, ministers allowed the nation to arm, and an immense force was soon raised. The Irish took this occasion to demand a free trade, and government saw there was no trifling with a country with arms in its hands. The Irish parliament unanimously addressed the king for a free trade, and it was granted, 1779.

George III. reviewed in Hyde Park 12,401 London volunteers, and on Oct. 28, 14,676 more. The English volunteers were, according to official accounts, 341,600 on Jan. 1, 1804. See *Naval Volunteers*. In May, 1859, in consequence of the prevalence of the fear of a French invasion, the formation of volunteer corps of riflemen commenced under the auspices of the government, and by the end of the year many thousands were enrolled in all parts of the kingdom.

[The first Middlesex volunteers were formed in 1803 as the duke of Cumberland's sharpshooters. They retained their organisation as a rifle club, when other volunteers were disbanded. In 1835 they were permitted by the duchess of Kent to take the name of the Royal Victoria Rifle Club.]

National Volunteer Association for promoting the practice of Rifle-shooting, was established in London, under the patronage of the queen and prince consort, Mr. Sidney (afterwards lord) Herbert, secretary at war, president, and the earl of Derby and other noblemen vice-presidents. (Annual subscription one guinea, or a composition for life of ten guineas.)

Nov. 16, 1859. 2500 Volunteer officers presented to the queen; a dinner followed, with the duke of Cambridge in the chair; and a ball. March 7, 1860

The queen reviews about 18,450 volunteers in Hyde-park. June 23, —

[Mr. Tower, of Wealdhall, Essex, aged 80, was present as a private; he had been present as an officer in a volunteer review in 1803.]

National rifle-shooting match was held at Wimbledon, capt. Edwd. Ross obtained the

queen's prize of 250*l.* and the gold medal of the association. July 2-7, 1860

[M. Thorel, a Swiss, obtained a prize.] Successful sham-fight at Bromley, Kent, July 14, —

Above 20,000 volunteers reviewed by the queen at Edinburgh. Aug. 7, —

Above 10,000 Lancashire volunteers reviewed by the earl of Derby at Knowsley. Sept. 1, —

Lord Herbert stated that the association had a capital of 3000*l.* and an annual income of 1500*l.* Feb. 16, 1861

Volunteers in Britain estimated at about 160,000 May —

Second rifle-match, Mr. Jopling gains the queen's prize and the association medal. July 4-10, —

Review of 11,504 volunteers, at Wimbledon, July 13; of 9000 at Warwick. July 24, —

Registered number of volunteers 162,681 April 1, 1862

20,000 volunteers reviewed by lord Clyde at Brighton. April 21, —

Third meeting of the national association: Mr. Pixley gains the queen's prize &c. July 1-14, —

A commission recommends that an annual grant of either 20*s.*, 30*s.*, or 34*s.* be given to each volunteer according to circumstances. Oct. —

VOSSEM, PEACE OF, entered into between the elector of Brandenburg and Louis XIV., king of France; the latter engaged not to assist the Dutch against the elector. It was signed June 6, 1673.

VOUGLÉ, or VOUILLE, S. W. France (near Poitiers), where Alaric II., king of the Visigoths, was defeated and slain by Clovis, king of France, A.D. 507. Clovis immediately after subdued the whole country from the Loire to the Pyrenees, and thus his kingdom became firmly established. A peace followed between the Franks and Visigoths, who had been settled above one hundred years in that part of Gaul called Septimania. Clovis soon afterwards made Paris the capital of his kingdom. *Henault*.

VOYAGES. The first great voyage, or voyage properly so called, was by order of Pharaoh-necho, of Egypt, when some Phœnician pilots sailed, from Egypt down the Arabian Gulf, round what is now called the Cape of Good Hope, entered the Mediterranean by the Straits of Gibraltar, coasted along the north of Africa, and at length arrived in Egypt, after a navigation of about three years, 604 B.C.—*Blair*; *Herodotus*. The first voyage round the world was made by a ship, part of a Spanish squadron which had been under the command of Magellan (who was killed at the Philippine Islands in a skirmish) in 1519-20. The era of modern voyages of discovery was the end of the eighteenth century. See *Circumnavigators*, and *North-West Passage*.

VULGATE (from *Vulgatus*, published), a term applied to the Latin version of the Scriptures, which is authorised by the council of Trent, and which is attributed to St. Jerome, about A.D. 384. The older version, called the Italic, is said to have been made in the beginning of the second century. Critical editions of the Vulgate were printed by order of pope Sixtus V. in 1590, and of pope Clement V. in 1592 and 1593. (The former was suppressed as imperfect.) The Latin Bible called the Mentz Bible was printed in 1460.

W.

WADHAM COLLEGE, OXFORD. Founded by Nicholas Wadham, esq. of Edge and Merrifield, in Somersetshire, and Dorothy, his wife, in 1613. It was in this college, in the chambers of Dr. Wilkins, that the Royal Society frequently met prior to 1658; their meetings were held in a chamber immediately over the gateway of the college. See *Royal Society*.

WAGER or BATTEL. The trial by combat anciently allowed by law, whereby the defendant in an appeal might fight with the appellant, and make proof thereby whether he

was guilty or innocent of the crime charged against him. Repealed by statute 59 Geo. III. 1819. For the remarkable case of Abraham Thornton, the murderer of Mary Ashford, which led to the repeal of this act, see *Appeal*.

WAGES IN ENGLAND. The wages of sundry workmen were first fixed by act of parliament 25 Edw. III. 1350. Haymakers had but one penny a day. Master carpenters, masons, tilers, and other coverers of houses, had not more than 3*d.* per day (about 9*d.* of our money); and their servants 1*d.* *Viner's Statutes.*

By the 23rd Hen. VI. the wages of a bailiff of husbandry was 23*s.* 4*d.* per annum, and clothing of the price of 5*s.* with meat and drink; chief hind, carter, or shepherd, 20*s.*, clothing 4*s.*; common servant of husbandry, 15*s.*, clothing, 40*d.*; woman-servant, 10*s.*, clothing 4*s.* . . . 1444

By the 11th Hen. VII. a like rate of wages with a little advance; as, for instance, a free mason,

master carpenter, rough mason, bricklayer, master tiler, plumber, glazier, carver, or joiner, was allowed from Easter to Michaelmas to take 6*d.* a day without meat and drink; or, with meat and drink, 4*d.*; from Michaelmas to Easter, to abate 1*d.* A master having under him six men was allowed 1*d.* a day extra . . . 1495

WAGES OF HARVEST-MEN IN ENGLAND AT DIFFERENT PERIODS:

Year.		s. d.	Year.		s. d.	Year.		s. d.
In 1350	per diem	0 1	In 1716	per diem	0 9	In 1800	per diem	2 0
In 1460	"	0 2	In 1740	"	0 10	In 1811	"	2 1½
In 1568	"	0 4	In 1760	"	1 0	In 1850	"	3 0
In 1632	"	0 6	In 1788	"	1 4	In 1857	"	5 0
In 1688	"	0 8	In 1794	"	1 6			

WAGGONS were rare in the last century.* They, with carts, &c., not excepting those used in agriculture, were taxed in 1783. The carriers' waggons are now nearly altogether superseded by the railways.

WAGHORN'S NEW OVERLAND ROUTE TO INDIA. Lieut. Waghorn devoted a large portion of his life to connect India with England. On Oct. 31, 1845, he arrived in London, by a new route, with the Bombay mail of the 1st of that month. His despatches reached Suez on the 19th, and Alexandria on the 20th, whence he proceeded by steamboat to a place twelve miles nearer London than Trieste. He hurried through Austria, Baden, Bavaria, Prussia, and Belgium, and reached London at half-past four on the morning of the first-mentioned day. The authorities of the different countries through which he passed eagerly facilitated his movements. The ordinary express, *viâ* Marseilles, reached London Nov. 2, following.† Mr. Waghorn subsequently addressed a letter to *The Times* newspaper, in which he stated that in a couple of years he would bring the Bombay mail to London in 21 days. He died January 8, 1850.

WAGRAM, a village near Vienna, the site of a battle fought July 5-6, 1809, between the Austrian and French armies, in which the latter was completely victorious. The slaughter on both sides was dreadful; 20,000 Austrians were taken by the French, and the defeated army retired to Moravia. An armistice was signed on the 12th; and on Oct. 24, by a treaty of peace, Austria ceded all her sea-coast to France; the kingdoms of Saxony and Bavaria were enlarged at her expense; part of Poland in Galicia was ceded to Russia; and Joseph Bonaparte was recognised as king of Spain.

WAHABEES, or WAHABITES, a warlike Mahometan reforming sect, arose in Arabia about 1750, under the rule of Abd-el-Wahab. His grandson, Saoud, in 1801, defeated an expedition, headed by the caliph of Bagdad. In 1803 this sect seized Mecca and Medina, and continued their conquests, although their chief was assassinated in the midst of his victories. His son Abdallah, long resisted Mahammed Ali, pacha of Egypt, but in 1818 he was defeated and taken prisoner by Ibrahim Pacha, who sent him to Constantinople, where he was put to death. The sect is now much depressed.

WAKEFIELD (W. Yorkshire), the site of a battle, between Margaret, the queen of Henry VI., and the duke of York, in which the latter was slain, and 3000 Yorkists fell upon the field, Dec. 31, 1460. The death of the duke, who aspired to the crown, seemed to fix the good fortune of Margaret; but the earl of Warwick espoused the cause of the duke's son, the earl of March, afterwards Edward IV., and the civil war was continued.

* Joseph Brasbridge, writing in 1824, says: "I recollect the first large broad-wheel waggon that was used in Oxfordshire, and a wondering crowd of spectators its vast size attracted. I believe at the time there was not a post-coach in England, except two-wheeled ones. Lamps to carriages are also a modern improvement. A shepherd, who was keeping sheep in the vicinity of a village in Oxfordshire, came running over to say, that a frightful monster, with saucer-eyes, and making a great blowing noise, was coming towards the village. This monster turned out to be a post-chaise with lamps."

† The Overland Mail, which had left Bombay on Dec. 1, 1845, arrived early on the 30th in London, by way of Marseilles and Paris. This speedy arrival was owing to the great exertions made by the French government to show that the route through France was shorter and better.

WALBROOK CHURCH (London), reputed the masterpiece of sir Christopher Wren. There was a church here in 1135. A new church was erected in 1429. The first stone of the present church was laid in 1672; and the edifice was completed in 1679.

WALCHEREN EXPEDITION. This unfortunate expedition of the British to the islands of Walcheren at the mouth of the Scheldt in Holland in 1809 consisted of 35 ships of the line, and 200 smaller vessels, principally transports, and 40,000 land forces, the latter under the command of the earl of Chatham, and the fleet under sir Richard Strachan. For a long time the destination of this expedition remained secret; but before July 28, 1809, when it set sail, the French journals had announced that Walcheren was the point of attack. Perhaps a more powerful and better appointed armament had never previously left the British ports, or ever more completely disappointed public expectation. Flushing was invested in August; a dreadful bombardment followed, and the place was taken Aug. 15; but no suggestion on the part of the naval commander, nor urging on the part of the officers, could induce the earl to vigorous action, until the period of probable success was gone, and necessity obliged him to return with as many of the troops as disease and an unhealthy climate had spared. The place was evacuated, Dec. 23, 1809. The house of commons instituted an inquiry, and lord Chatham resigned his post of master-general of the ordnance, to prevent greater disgrace; but the policy of ministers in planning the expedition was, nevertheless, approved. The following epigram appeared at the time:—

“Lord Chatham, with his sword undrawn, Stood waiting for sir Richard Strachan;
Sir Richard, longing to be at 'em, Stood waiting for the earl of Chatham.”

WALDECK, a German principality, established in 1682. The reigning family claim descent from the Saxon hero, Witikind, who flourished about A.D. 772. The reigning prince, George Victor (born Jan. 14, 1831), succeeded his father, George, on May 15, 1845. Population, in Dec. 1861, 58,604.

WALDENSES, a sect (also called Vaudois) which derives its name, according to some authors, from Peter de Waldo, of Lyons (1170). They had a translation of the Bible, and allied themselves to the Albigenses, and were much vilified and persecuted, which led to the establishment of the Holy Office or Inquisition. Pope Innocent III. commissioned some monks to preach against the heresies of the Waldenses in Narbonne and Provence; but the French bishops were at first jealous of this mission, armed as it was with great power, and the feudal chiefs refused to obey the orders of the legates, A.D. 1203-4. One of the monks, the first inquisitor, Peter Chateaufort, having been assassinated, the aspiring pontiff called on all the neighbouring powers to march into the heretical district. All obstinate heretics were placed at the disposal of Simon de Montfort, commander of this crusade, and the whole race of the Waldenses and Albigenses were ordered to be pursued with fire and sword. See *Albigenses*. They settled in the valleys of Piedmont about 1375, but were frequently dreadfully persecuted, especially in the 17th century, when Charles I. of England interceded for them, and in 1655, Oliver Cromwell by threats obtained them some degree of toleration. They were not permitted to have a church at Turin till Dec. 1853.

WALES, called by the Romans, *Britannia Secunda*. After the Roman emperor Honorius quitted Britain, Vortigern was elected king of South Britain. He invited over the Saxons, to defend his country against the Picts and Scots; but the Saxons perfidiously sent for reinforcements, consisting of Saxons, Danes, and Angles, by which they made themselves masters of South Britain. Most of the Britons retired to Wales, and defended themselves against the Saxons, in their inaccessible mountains, about A.D. 447. In this state Wales remained unconquered till Henry II. subdued South Wales in 1157; and in 1282 Edward I. entirely reduced the whole country, putting an end to its independence by the death of Llewelyn, the last prince.* The Welsh, however, were not entirely reconciled to this revolution, till the queen happening to be brought to bed of a son at Caernarvon in 1284, Edward with great policy styled him prince of Wales, which title the heir to the crown of Great Britain has borne almost ever since. Wales was united and incorporated with England by act of parliament, 1536. See *Britain*.

The supreme authority in *Britannia Secunda*
intrusted to Suetonius Paulinus . . . A.D. 58
Conquests by Julius Frontinus 70
The Silures totally defeated —

SOVEREIGNS OF WALES.

640. Dyrrnwal Moelmud, king of the Cymry.
 688. Idwallo.
 720. Rhodri, or Roderic.
 755. Conan.
 818. Mervyn.
 843. Roderic, surnamed the Great.

PRINCES OF NORTH WALES.

877. Anarawd.
 913. Edwal Voel.
 939. Howel Dha the Good, prince of all Wales.
 948. Jevaf, or Jevaf, and Iago.
 972. Howel ap Jevaf.
 984. Cadwallon ap Jevaf.
 985. Meredith ap Owen ap Howel Dha.
 992. Edwal ap Meyric ap Edwal Voel.
 998. Aodan, a usurper.
 1015. Llewelyn ap Sitsyllt.
 1021. Iago ap Edwal ap Meyric.
 1038. Griffith ap Llewelyn ap Sitsyllt.
 1061. Bleddyn and Rygwallon.
 1073. Trahaern ap Caradoc.
 1079. Griffith ap Conan.
 1127. Owain Gwynedd.
 1169. David ap Owain Gwynedd.
 1194. Llewelyn the Great.
 1240. David ap Llewelyn.
 1246. Llewelyn ap Griffith, last prince of the blood; slain after battle, in 1282.

PRINCES OF SOUTH WALES.

877. Cadeth, or Cadell.
 907. Howel Dha the Good.
 948. Owain ap Howel Dha, his son.
 987. Meredith ap Owain.
 993. Llewelyn ap Sitsyllt.
 1021. Rytherch ap Jestyn, a usurper.
 1042. Hywel and Meredith.
 1061. Rhychderch and Rhys, the sons of the usurper.
 1062. Meredith ap Owain ap Edwyn.
 1073. Rhys ap Owain, and Rhychderch ap Caradoc.
 1077. Rhys ap Tewdwr Mawr.
 1092. Cadwgan ap Bleddyn.
 1115. Griffith ap Rhys.

1137. Rhys ap Gruffydd, or Griffith.
 1196. Gruffydd ap Rhys.
 1202. Rhys ap Gruffydd.
 1222. Owain ap Gruffydd.
 1235. Meredith ap Owain; he died in 1267.

PRINCES AND LORDS OF POWYS-LAND.

 1087. Cadwgan ap Bleddyn.
 1132. Madoc ap Meredith.
 1160. Griffith ap Meredith.
 * * * * *
 1256. Gwenwynwyn, or Gwenwynwyn.
 * — Owain ap Gruffydd.

ENGLISH PRINCES OF WALES †

1301. Edward Plantagenet (afterwards king Edward II.), son of Edward I., born in Caernarvon Castle on the 25th April, 1284. It is asserted that immediately after his birth he was presented by his father to the Welsh chieftains as their future sovereign, the king holding up the royal infant in his arms, and saying, in the Welsh language, "*Eich Dyn*," literally in English, "This is your man," but signifying "This is your countryman and king." See however "*Ich Dien*."
 1343. Edward the Black Prince.
 1376. Richard, his son (Richard II.).
 1399. Henry (afterwards Henry V.), son of Henry IV.
 1454. Edward, son of Henry VI.; slain at Tewkesbury, May 4, 1471.
 1471. Edward (afterwards Edward V.), son of Edward IV.
 1483. Edward, son of Richard III.; died in 1484.
 1489. Arthur, son of Henry VII.; died in 1502.
 1503. Henry, his brother (afterwards Henry VIII.).

* At the commencement of the civil war of the seventeenth century, Pembroke castle was the only Welsh fortress in the possession of the parliament, and it was entrusted to the command of col. Langhorne. In 1647, this officer, and colonels Poyer and Poyer, embraced the cause of the king, and made Pembroke their head-quarters; and after their disastrous defeat at the battle of St. Fagan's, they retired to the castle, followed by an army led by Cromwell in person. Here they were besieged, and at length capitulated, the garrison having endured great sufferings from want of water. Langhorne, Poyer, and Poyer were tried by a court-martial, and condemned to death; but Cromwell having been induced to spare the lives of two of them, it was ordered that they should draw lots for the favour, and three papers were folded up, on two of which were written the words, "Life given by God," and the third was left blank. The latter was drawn by colonel Poyer, who was shot accordingly on the above day. *Pennant. Hist. of Pembroke.*

† WALES, PRINCESS OF. This title was held, some authors say, during the earlier period of her life, by the princess Mary of England, eldest daughter of Henry VIII. and afterwards queen Mary I. She was created, they state, by her father princess of Wales, in order to conciliate the Welsh people and keep alive the name, and was, they add, the first and only princess of Wales in her own right; a rank she enjoyed until the birth of a son to Henry, who was afterwards Edward VI., born in 1537. This is however denied, upon better authority, that of Banks.

WALES, *continued.*

1537. Edward, his son (afterwards Edward VI.), was duke of Cornwall, and not prince of Wales.
 1610. Henry Frederic, son of James I.; died Nov. 6, 1612.
 1616. Charles, his brother (afterwards Charles I.).
 1630. Charles, his son (afterwards Charles II.), never created prince of Wales.
 1714. George Augustus (afterwards George II.).
 1729. Frederic Lewis, his son; died March 20, 1751.
 1751. George, his son (afterwards George III.).
 1762. George, his son (afterwards George IV.).
 1841. Albert-Edward, son of queen Victoria. See *England*.
 Travelled on the continent, and studied at Oxford and Edinburgh in 1859.

Visited Canada, with the dignity of a viceroy, and the United States (*which see*), 1860.
 Entered the university of Cambridge in Jan. 1861.
 Attended the camp at Dublin, July to Sept. 1861.
 Opened New Middle Temple Library, Oct. 31, 1861.
 Ordered to be prayed for as Albert-Edward, instead of Albert, Jan. 8, 1862.
 Visits the continent, Syria, and Egypt, March — June, 1862.
 Visits Germany and Italy, Aug. — Dec. 1862.
 His marriage contract with the princess Alexandra of Denmark officially approved by the queen, Nov. 1, 1862.

WALTHALLA (the Hall of Glory), a temple near Ratisbon, erected in 1842 by Louis, king of Bavaria, to receive the statues and memorials of the great men of Germany. The name is derived from the fabled meeting-place of Scandinavian heroes after death.

WALKING, &c., FEATS IN. Captain Barclay, for a wager (on which many thousands of pounds depended), walked 1000 miles in 1000 successive hours; in forty-two days and nights (less 8 hours). His task was accomplished on July 10, 1803. In May, 1758, a young lady at Newmarket won a wager, having undertaken to *ride* 1000 miles in 1000 hours, which feat she performed in little more than two-thirds of the time. Richard Manks, a native of Warwickshire, undertook (in imitation of Captain Barclay) to walk 1000 miles in 1000 hours: the place chosen was the Barrack tavern cricket-ground, in Sheffield; he commenced on Monday, June 17, 1850, and completed the 1000 miles, July 29 following, winning a considerable sum.

WALLACHIA. See *Danubian Principalities*. On Dec. 23, 1861, the union of Wallachia and Moldavia, under the name of Roumania, was proclaimed at Jassy and Bucharest.

WALLIS'S VOYAGE. Captain Wallis set sail from England on his voyage round the world, July 26, 1766; and accomplishing his voyage, he returned to England, May 19, 1768, a period of less than two years. See *Circumnavigators*.

WALLOONS. The people who fled to England from the persecution of the cruel duke of Alva, the governor of the Low Countries for Philip II. of Spain. On account of the duke's religious proscriptions, these countries revolted from Philip, 1566. *Marian's Hist. of Spain*. The Walloons were well received in England. A large protestant church was given to them by queen Elizabeth, at Canterbury, and many of their posterity still remain in that part of England. *Pardon*.

WALLS. See *Roman Walls*.

WALNUT-TREE. This tree has existed a long time in England. Near Welwyn, in Hertfordshire, there was the largest walnut-tree on record; it was felled in 1627, and from it were cut nineteen loads of planks; and as much was sold to a gunsmith in London as cost 10*l.* carriage; besides which there were thirty loads of roots and branches. When standing, it covered 76 poles of ground; a space equal to 2299 square yards, statute measure. A sitting-room twelve feet in diameter was lately shown in London, hollowed from an American walnut-tree, 80 feet in the trunk, and 150 feet in the branches. The black walnut-tree (*Juglans nigra*) was brought to these countries from North America before 1629.

WALPOLE'S ADMINISTRATIONS. Mr. Walpole (afterwards sir Robert, and earl of Oxford), was born in 1676; became secretary at war in 1708; was expelled the house of commons on a charge of misappropriating the public money, 1711; committed to the Tower, Jan. 17, 1712; became first lord of the treasury and chancellor of the exchequer in 1715. He resigned, on a distinction of the cabinet, in 1717, bringing in the sinking-fund bill on the day of his resignation. On the earl of Sunderland retiring in 1721, he resumed his office and held it till 1742. He died March 18, 1745.

SECOND WALPOLE ADMINISTRATION (1721).
 Sir Robert Walpole, *first lord of the treasury*.
 Thomas, lord Parker, created earl of Macclesfield, *lord chancellor*.
 Henry lord Carleton (succeeded by William, duke of Devonshire), *lord president*.
 Evelyn, duke of Kingston (succeeded by lord Trevor), *privy seal*.
 James, earl of Berkeley, *first lord of the admiralty*.

Charles (viscount Townshend), and John, lord Cartaret (the latter succeeded by the duke of Newcastle), *secretaries of state*.
 Duke of Marlborough (succeeded by the earl of Cadogan), *ordnance*.
 George Treby (succeeded by Henry Pelham), *secretary-at-war*.
 Viscount Torrington, &c.

WALTZ, the popular German national dance, was introduced into England by baron Neuman and others in 1813. *Raikes*.

WANDERING JEW. The following is the strange account given of this personage :— His original name was Calaphilus, Pontius Pilate's porter. When they were dragging Jesus out of the door of the judgment-hall, he struck him on the back, saying, "Go faster, Jesus! go faster; why dost thou linger?" Upon which Jesus looked on him with a frown, and said, "I am indeed going; but thou shalt tarry till I come." Soon after he was converted, and took the name of Joseph. He lives for ever; but at the end of every hundred years falls into a fit or trance, upon which, when he recovers, he returns to the same state of youth he was in when our Saviour suffered, being about thirty years of age. He always preserves the utmost gravity of deportment. He was never seen to smile. He perfectly remembers the death and resurrection of Christ. *Calmet's Hist. of the Bible*.

WANDSWORTH, near London. In this village was established the first place of worship for dissenters in England, Nov. 20, 1572. It was called Wandsworth meeting-house. In Garrett-lane, near this place, a mock election of a mayor of Garratt was formerly held, after every general election of parliament, to which Foote's dramatic piece, *The Mayor of Garratt* (1763), gave no small celebrity.

WAR AFFAIRS. On account of the war with Russia, a secretary for war affairs was first appointed as a cabinet minister, June 9, 1854, in the person of the duke of Newcastle, previously colonial secretary; colonial and war affairs having been previously placed under one minister. See *Secretaries*.

WARBECK'S INSURRECTION. Perkin Warbeck, the son of a Florentine Jew, to whom Edward IV. had stood godfather, was persuaded by Margaret, duchess of Burgundy, sister to Richard III., to personate her nephew, Richard, Edward V.'s brother, which he did first in Ireland, where he landed, 1492. The imposture was discovered by Henry VII. 1493. Some writers consider that Warbeck was not an impostor.

Made an attempt to land at Kent, with 600 men, when 150 were taken prisoners, and executed, 1495.

Recommended by the king of France to James IV. of Scotland, who gave him his kinswoman, lord Huntley's daughter, in marriage, the same year. James IV. invaded England in his favour, 1496. Left Scotland, and went to Bodmin, in Cornwall,

where 3000 joined him, and he took the title of Richard IV., 1497.

Taken prisoner by Henry VII., 1498.

Set in the stocks at Westminster and Cheapside, and sent to the Tower, 1499.

Plotted with the earl of Warwick to escape out of the Tower, by murdering the lieutenant, for which he was hanged at Tyburn, Nov. 28, 1499.

WARDIAN CASES. In 1829 Mr. N. B. Ward observed a small fern and grass growing in a closed glass bottle in which he had placed a chrysalis covered with moist earth. From this circumstance he was led to construct his well-known *closely glazed* cases, which afford to plants light, heat, and moisture, and exclude deleterious gases, smoke, &c. They are particularly adapted for ferns. In 1833 they were first employed for the transmission of plants to Sydney, &c., with great success. Mr. Faraday lectured on this subject in 1838.

WARRANTS, GENERAL, warrants that do not specify the name of the accused. They were declared to be illegal and unconstitutional by lord chief justice Pratt, Dec. 6, 1763, the question having been raised upon the seizure and committal of Mr. Wilkes to the Tower for a libel on the king. The question also gave rise to some stormy debates in the house of commons. After the decision of the court of common pleas in favour of Wilkes, he brought an action against lord Halifax, then secretary of state, and recovered 4000*l.* damages for having been imprisoned upon an illegal warrant: Wilkes laid his damages at 20,000*l.*, Nov. 10, 1796. *Annual Register*.

WARRIOR. See under *Navy of England*.

WARS. War is called by Erasmus "the malady of princes." Scriptural writers date the first war as having been begun by the impious son of Cain, 3563 B.C. Osymandyas of Egypt was the first warlike king; he passed into Asia, and conquered Bactria, 2100 B.C. *Usher*. He is supposed by some to be the Osiris of the priests. It is computed that, to the present time, no less than 8,860,000,000 of men have perished in the field of battle, being more than five times as many of the human species as now inhabit our whole earth.

WARS, CIVIL, OF GREAT BRITAIN. See *Rebellions, &c.*

WARS, FOREIGN, OF GREAT BRITAIN. The wars in France, in which England was involved for nearly two centuries, arose from the dukes of Normandy being kings of England. They held Normandy as a fief of the crown of France; when William I. conquered England, it became an English province, but was lost in the reign of king John, 1204. The English princes gained memorable victories at Cressy, Poitiers, and Agincourt; but were

finally driven out of France in the reign of Henry VI., and lost Calais by surprise in the reign of Mary. See *Battles, Peloponnesian, Punic, Seven Years', Thirty Years', Roses, Barons', Russo-Turkish War*, and the various countries, &c.

FOREIGN WARS OF GREAT BRITAIN SINCE THE CONQUEST.

The general peace of Ryswick between England, Germany, Holland, France, and Spain, was signed by the ministers of these powers, at the palace of Ryswick, Sept. 20, 1697. It concluded this last war.

THE GREAT MODERN AND EXPENSIVE WARS OF GREAT BRITAIN.*

War of the <i>Succession</i> , commenced May 4, 1702. Peace of Utrecht, March 13, 1713.	War with Spain, April 17, 1780. Closed same time, Jan. 20, 1783.
War with Spain, Dec. 16, 1718. Peace concluded, 1721.	War with Holland, Dec. 21, 1780. Peace signed, Sept. 2, 1783.
War; <i>Spanish War</i> , Oct. 23, 1739. Peace of Aix-la- Chapelle, April 30, 1748.	War of the <i>Revolution</i> , Feb. 1, 1793. Peace of Amiens, March 27, 1802.
War with France, March 31, 1744. Closed also on April 30, 1748.	War against <i>Bonaparte</i> , April 29, 1803. Finally closed June 18, 1815.
War; the <i>Seven Years' War</i> , June 9, 1756. Peace of Paris, Feb. 10, 1763.	War with America, June 18, 1812. Peace of Ghent, Dec. 24, 1814.
War with Spain, Jan. 4, 1762. General peace, Feb. 10, 1763.	War with Russia, March 27, 1854. Peace of Paris, March 31, 1856.
War with America, July 14, 1774. Peace of Paris, Nov. 30, 1782.	For the wars with India, China, and Persia, see those countries respectively.
War with France, Feb. 6, 1778. Peace of Paris, Jan. 20, 1783.	

WARSAW, the metropolis of Poland. The diet was transferred to this city from Cracow in 1566, and it became the seat of government in 1689. Population in 1859, 162,777. See *Poland*, 1861, for recent events.

Alliance of Warsaw, between Austria and Poland, against Turkey, in pursuance of which John Sobieski assisted in raising the siege of Vienna (on the 18th of September following), signed	March 31, 1683	30,000 Poles, of all ages and conditions, in cold blood	Nov. 4 1794
Warsaw surrenders to Charles XII.	1703	Warsaw constituted a duchy and annexed to the house of Saxony	Aug. 1807
Treaty of Warsaw, between Russia and Poland, Feb. 24, ...	1768	The duchy overrun by the Russians; Warsaw made the residence of a Russian viceroy	1813
The Russian garrison placed here in 1794; expelled by the citizens with the loss of 2000 killed and 500 wounded, and 36 pieces of cannon	April 17, 1794	The last Polish revolution commences at Warsaw Nov. 29, ...	1830
The Poles defeated by the Russians	Oct. 4, —	Battle of Grochow, near Warsaw, in which the Russians were defeated, and forced to retreat with the loss of 7000 men	Feb. 25, 1831
The king of Prussia besieges Warsaw July; compelled to raise the siege, Sept.; it is taken by the Russians	Nov., —	Battle of Warsaw, when, after two days' hard fighting, the city capitulated, and was taken possession of by the Russians; and great part of the Polish army retired towards Plock and Modlin	Sept. 7-8, —
Suwarrow, the Russian general, after the siege and destruction of Warsaw, cruelly butchered	—	The czar meets the emperor of Austria and the regent of Prussia; no result	Oct. 20-25, 1860

WASHINGTON (in Columbia district, partly in Virginia and Maryland, on the bank of the Potomac, N.-E. of Virginia), the capital of the United States, founded in 1791, and made the seat of government in 1800. The house of representatives was opened for the first

* In the war against Bonaparte, the great powers of Europe leagued sometimes with, and sometimes against Great Britain. England spent 65 years in war, and 62 in peace, in the 127 years previous to the close of the war in 1815. In the war of 1688, we spent 36 millions sterling; in the war of the *Spanish Succession*, 62 millions; in the *Spanish War*, 54 millions; in the *Seven Years' War*, 112 millions; in the *American War*, 136 millions; in the war of the *French Revolution*, 464 millions; and in the war against Bonaparte, 1159 millions; thus forming a total expenditure of war in 127 years (from the Revolution in 1688 to the downfall of Napoleon in 1815), of 2023 millions of pounds sterling. M. De Pradt estimates the loss of life sustained by the French forces in the six campaigns of the Peninsular war, at 600,000 men. The loss sustained by the Spaniards and their allies was probably as great. During the war many districts of the Peninsula were from time to time laid waste by the contending armies, and the inhabitants were victims to all the calamities and horrors thus produced. The total destruction of human beings in this war must have amounted to one million two hundred thousand. See *Russo-Turkish War*, note.

time, May 30, 1808. Washington was taken in the late war by the British forces under general Ross, when all its superb national structures were consumed by a general conflagration, the troops not sparing even the national library, Aug. 24, 1814. General Ross was soon afterwards killed by some American riflemen, in a desperate engagement at Baltimore, Sept. 12, following.—Part of the capitol and the whole of the library of the United States' congress were destroyed by fire, Dec. 24, 1851. The prince of Wales was entertained by the president here in Sept. 1860. See *United States*. Washington was fortified in April 1861 against the Secessionists.

WASTE LANDS. The inclosure of waste lands and commons, in order to promote agriculture, first began in England about the year 1547, and gave rise to Ket's rebellion, 1549. Inclosures were again promoted by the authority of parliament, 1785. The waste lands in England were estimated in 1794 to amount to 14 millions of acres, of which there were taken into cultivation, 2,837,476 acres before June 1801. In 1841, there were about 6,700,000 acres of waste land, of which more than half was thought to be capable of improvement. See *Agriculture*.

WATCH OF LONDON. The nightly watch was first appointed 38 Hen. III. 1253. *Stow's Chron.* They proclaimed the hour of night with a bell before the introduction of public clocks. *Hardie.* The old watch was discontinued, and a new force of numbered policemen on duty day and night commenced, Sept. 29, 1829. See *Police*.

WATCHES are said to have been first invented at Nuremberg, A.D. 1477, although it is affirmed that Robert, king of Scotland, had a watch about 1310.

Watches first used in astronomical observations by Purbach . . . 1500

Authors assert that the emperor Charles V. was the first who had anything that might be called a watch, though some call it a small table-clock . . . 1530

Watches first brought to England from Germany in . . . 1577

A watch which belonged to queen Elizabeth is preserved in the library of the Royal Institution, London.

Spring pocket-watches (watches properly so-called) have had their invention ascribed to Dr. Hooke by the English, and to M. Huyghens by the Dutch. Dr. Derham, in his

Artificial Clock-maker, says that Dr. Hooke was the inventor; and he appears certainly to have produced what is called the pendulum watch. The time of this invention was about 1658; as is manifest, among other evidences, from an inscription on one of the double-balance watches presented to Charles II., viz., "Rob. Hooke, inven. 1658; T. Tompion fecit, 1675."

Repeating watches were invented by Barlowe. 1676 Harrison's first time-piece was produced in 1735. See *Harrison*.

Watches and clocks were taxed in . . . 1797 The tax was repealed in 1798. See *Clocks*.

WATER. Thales of Miletus, founder of the Ionic sect, looked upon water (as also did Homer, and several of the ancient philosophers) as being the original principle of everything besides; about 594 B.C. *Stanley.* In the Roman church, water was first mixed with the sacramental wine A.D. 122. *Lenglet.* That water is composed of 8 parts of oxygen and 1 part of hydrogen was demonstrated by Cavendish and Watt in 1781. In freezing, water contracts till it is reduced to 42° or 40° Fahr.; it then begins to expand till it becomes ice at 32°.

WATER IN LONDON. Water was first conveyed to London by leaden pipes, 21 Hen. III. 1237. *Stow.* It took nearly fifty years to complete it; the whole being finished and Cheap-side conduit erected, only in 1285. The New River water was brought to London from Amwell in Hertfordshire, at an immense expense, by sir Hugh Myddelton, in 1613. The city was supplied with its water by conveyances of wooden pipes in the streets and small leaden ones to the houses, and the New River Company incorporated, 1620. So late as queen Anne's time there were water-carriers at Aldgate pump. London is now supplied by eight companies:—The New River, East London, Chelsea, Grand Junction, Southwark and Vauxhall, Kent, Lambeth, and West Middlesex. The water-works at Chelsea were completed, and the company incorporated, 1722. London-bridge ancient water-works were destroyed by fire, Oct. 29, 1779. An act to supply the metropolis with water, 15 & 16 Vict. c. 84, was passed July 1, 1852. The supply is now considered to be much improved in quality and quantity. * See *Artesian Wells*.

WATER-CLOCKS. The first instruments used to measure the lapse of time, independently of the sunshine, were *clepsydræ*, or water-clocks, said to have been invented by Scipio Nasica, 159 B.C. They were, most probably, vessels of water, with a small hole through the bottom: through this hole the water ran out in a certain time, possibly an hour; after which the vessel was again filled, to be emptied as before. This invention was a manifest improvement

* In Jan. 1857, a company was formed to carry out Dr. Normandy's patent for converting salt water into fresh.

on the old sun-dials, whose perpendicular gnomon gave hours of different length at the various seasons of the year. Something similar to the hour-glass was occasionally used : and our Alfred, probably ignorant of these methods, is said to have adopted the burning of a taper as a measure of time.

WATER-COLOUR PAINTING has been raised from the hard dry style of the last century, to its present brilliancy, by the efforts of Nicholson, Copley, Fielding, Varley, and the great Turner ; by Pyne, Cattermole, Prout, &c., within the present century. The exhibition was founded in 1805.

WATER-GLASS, a name given to a liquid mixture of sand (silex) and one of the alkalies (potash or soda). Glauber (*De Lithiase*) mentions a similar mixture in 1644. Dr. Von Fuchs, the modern inventor, gave an account of his process in 1825 ; and Mr. Frederick Ransom of Ipswich, ignorant of Von Fuchs' discovery, patented a mode of preparing water-glass in 1845, which he has since greatly improved upon. In 1857 M. Kuhlmann of Lille published a pamphlet setting forth the advantageous employment of water-glass in hardening porous stone and in stereochromy (*which see*). It has been applied to the exterior of many buildings in France and England. The memoirs of Von Fuchs and Kuhlmann were translated and printed in England in 1859 by direction of the prince consort.

WATER-MILLS, used for grinding corn, are said to have been invented by Belisarius, the general of Justinian, while besieged in Rome by the Goths, A.D. 555. The ancients parched their corn, and pounded it in mortars. Afterwards mills were invented, which were turned by men and beasts with great labour ; yet Pliny mentions wheels turned by water.

WATER TOFANA. See *Poisoning*.

WATERFORD (S. Ireland), built A.D. 879, was totally destroyed by fire in 981. Rebuilt and considerably enlarged by Strongbow in 1171, and still further in the reign of Henry VII., who granted considerable privileges to the citizens. Richard II. landed and was crowned here in 1399 ; in 1690, James II. embarked from hence for France, after the battle of the Boyne ; and William III. resided here twice, and confirmed its privileges. Memorable storm here, April 18, 1792. The cathedral of Waterford, dedicated to the blessed Trinity, was first built by the Ostmen, and by Malchus, the first bishop of Waterford, after his return from England from his consecration, A.D. 1096. This see was united with that of Lismore in 1363. It was valued in the king's books, by an extent returned 29 Henry VIII., at 72*l.* 8*s.* 1*d.* Irish per annum. By stat. 3 & 4 Will. IV. the see of Waterford and Lismore was united by the Irish Church Temporalities act with the see of Cashel and Emly, Aug. 14, 1833. The interior of the cathedral, organ, &c., were destroyed by fire Oct. 25, 1815.

WATERLOO, in Belgium, the site of the great battle on the 18th of June, 1815, between the French army, of 71,947 men and 246 guns, under Napoleon, and the allies, commanded by the duke of Wellington ; the latter, with 67,661 men and 156 guns, resisted the various attacks of the enemy from nine in the morning until five in the afternoon. About that time, 16,000 Prussians reached the field of battle ; and by seven, the force under Blücher amounted to above 50,000 men, with 104 guns. Wellington then moved forward his whole army. A total rout ensued, and the carnage was immense. Of the British (23,991), 93 officers and 1916 men were killed and missing, and 363 officers and 4560 men wounded ; total 6932 ; and the total loss of the allied army amounted to 4206 killed, 14,539 wounded, and 4231 missing, making 22,976 *hors de combat*. Napoleon, quitting the wreck of his flying army, returned to Paris ; and finding it impossible to raise another, he abdicated the throne of France. *P. Nicholas.**

WATERLOO BRIDGE, LONDON. A bridge over this part of the Thames was repeatedly suggested during the last century, but no actual preparations to carry it into effect were made till 1806, when Mr. G. Dodd procured an act of parliament, and gave the present site, plan, and dimensions of the bridge ; but, in consequence of some disagreement with the committee, he was superseded by Mr. Rennie, who completed this noble structure. It was commenced Oct. 11, 1811, and finished June 18, 1817, on the anniversary of the battle of Waterloo, when the prince regent, the duke of Wellington, and other distinguished personages were present at the opening. Its length within the abutments is 1242 feet : its width within the balustrades is 42 feet ; and the span of each arch, of which there are nine, is 120 feet.†

* It is an historical fact, that the British forces have been twice signally successful over those of France on the same ground—Waterloo ; and that by the side of the very chapel of Waterloo, which was remarked for being uninjured by shot or shell on the memorable 18th of June, 1815, did Marlborough cut off a large division of the French forces opposed to him on the 17th of August, 1705. It is no less a fact, that the conquerors of each of those days, on the same field, are the only commanders in the British service whose military career brought them to the summit of the peerage—to dukedoms.

† On Oct. 9, 1857, two youths, named Kilsby, found on one of the abutments of the bridge a carpet

WATERSPOUT. Whirlwinds and waterspouts proceed from the same cause, the only difference being that waterspouts pass over the water, and whirlwinds over the land. *Dr. Franklin.* Two waterspouts fell on the Glatz mountains in Germany, and caused dreadful devastation to Hautenbach and many other villages; a prodigious number of houses were destroyed, and many persons perished, July 13, 1827. A waterspout at Glanflesk, near Killarney, in Ireland, passed over a farm of Mr. John Macarthy, and destroyed his cottage, two other farmhouses, and other buildings, of which not a vestige remained. In this catastrophe seventeen persons perished, Aug. 4, 1831.

WATLING STREET. See *Roman Roads*.

WAVE PRINCIPLE (in accordance with which the curves of the hull of a ship should be adapted to the curves of a wave of the sea) formed the subject of experiments begun by Mr. John Scott Russell in 1832, with the view of increasing the speed of ships. Colonel Beaufoy is said to have spent 30,000*l.* in researches upon this matter. It was also taken up by the British Association, who have published reports of the investigations. The principle has been adopted by naval architects.

WAWZ, or WAWER (Poland). The Poles under Skrzynecki attacked the Russians at Wawz, and after two days' hard fighting, all the Russians' positions were carried by storm, and they compelled to retreat with the loss of 12,000 men and 2000 prisoners. The Polish loss was comparatively small, March 31, 1831. But the triumph of the Poles in this battle was afterwards followed by defeat and ruin.

WAX came into use for candles in the twelfth century; and wax candles were esteemed a luxury in 1300, being but little used. In China, candles of vegetable wax have been in use for centuries. See *Candleberry*. Wax candles are made very cheap in America, from the berry of a particular species of myrtle, which yields excellent wax, of a green colour. See *Candles*. The wax tree, *Ligustrum lucidum*, was brought from China before 1794.—**SEALING-WAX** was not brought into use in England, until about 1536. Its use has been almost superseded since the general introduction of adhesive envelopes, about 1844.

WE. Sovereigns generally use *we* for *I*, which style began with King John, A.D. 1199. *Coke's Instit.* The German emperors and French kings used the plural about A.D. 1200. *Hénault*.

WEAVING. This art appears to have been practised in China from the earliest antiquity—more than a thousand years before it was known in Europe or Asia. Poets assign the art to the spider. Women originally spun, wove, and dyed; and the origin of these arts is ascribed, by ancient nations, to different women as women's arts. The Egyptians ascribed it to Isis; the Greeks to Minerva; and the Peruvians to the wife of Manco Capac. In most eastern countries the employment of weaving is still performed by the women. Our Saviour's vest, or coat, had not any seam, being woven from the top throughout, in one whole piece. Perhaps, says Dr. Doddridge, this curious garment might be the work and present of some pious women who attended him, and ministered unto him of their substance, *Luke viii. 3*. The print of a frame for weaving such a vest may be seen in *Calmet's Dictionary* under the word *Vestments*. Two weavers from Brabant settled at York, where they manufactured woollens, which, says King Edward, "may prove of great benefit to us and our subjects," 1331. Flemish dyers, cloth drapers, linen-makers, silk-throwsters, &c., settled at Canterbury, Norwich, Colchester, Southampton, and other places, on account of the duke of Alva's persecution, 1567. See *Loom* and *Electric Loom*.

WEDGWOOD WARE. A fine species of pottery and porcelain, produced by Mr. Josiah Wedgwood of Staffordshire, in 1762. The manufactories for this ware employ many thousands in this country. His potteries, termed Etruria, were founded in 1771. Previously to 1763, most of the superior kinds of earthenware were imported from France.

WEDNESDAY. The fourth day of the week, so called from the Saxon idol Woden or Odin, by some supposed to be Mars, worshipped on this day. "Woden was the reputed author of magic and the inventor of all the arts, and was thought to answer to the Mercury of the Greeks and Romans." *Buller*.

WEEDON INQUIRY (Northamptonshire). Commissioners were appointed to inquire into the accounts of Mr. Elliot, superintendent of the great military clothing establishment, at this place in July 1858, and commenced sitting in September. Many of the statements, afterwards disputed, caused much dissatisfaction.

bag containing human bones and flesh, which had been cut up, salted, and boiled, and some foreign clothes. After much investigation no clue could be found respecting the name of the individual, and the remains were interred in Woking cemetery.

WEEK. The space of seven days, supposed to be first used among the Jews, who observed the sabbath every seventh day. They had three sorts of weeks, the first the common one of seven days, the second of years, which was seven years, the third of seven times seven years, at the end of which was the jubilee. All the present English names are derived from the Saxon:—

<i>Latin.</i>	<i>English.</i>	<i>Saxon.</i>	<i>Presided over by</i>
Dies Saturni,	Saturday,	Saterne's day,	Saturn.
Dies Solis,	Sunday,	Sun's day,	The Sun.
Dies Lunæ,	Monday,	Moon's day,	The Moon.
Dies Martis,	Tuesday,	Tiw's day,	Mars.
Dies Mercurii,	Wednesday,	Woden's day,	Mercury.
Dies Jovis,	Thursday,	Thor's day,	Jupiter.
Dies Veneris,	Friday,	Friga's day,	Venus.

WEIGHTS AND MEASURES. These, and the stamping of gold and silver money, were invented by Pheidon, tyrant of Argos, 895 B.C. *et seq.* *Arundelian Marbles.* Weights were originally taken from grains of wheat, the lowest being still called a grain. *Chalmers.* The standard measure was originally kept at Winchester by the law of king Edgar, A.D. 972. Edward III., in 1353, ordered that there should be "one weight, measure and yard," throughout the kingdom. Standards of weights and measures were provided for the whole kingdom of England by the sheriffs of London, 9 Rich. I. 1197. A public weighing-machine was set up in London, and all commodities ordered to be weighed by the city-officer, called the weigh-master, who was to do justice between buyer and seller, stat. 3 Edw. II. 1309. *Stow.* The first statute, directing the use of avoirdupois weight, is that of 24 Hen. VIII. 1532. *Philosophical Transactions*, vol. 65, art. 3. Weights and measures, 1824, were ordered to be examined by the justices at quarter-sessions, 35 Geo. III. 1794. Again regulated, 1800. Statute for establishing a uniformity of weights and measures, 1824, took place throughout the United Kingdom, Jan. 1. 1826. The new acts relating thereto passed in 1834, 1835, 1855, and lastly in 1859. 16 & 17 Vict. c. 29 (1853), regulates the weights to be used in the sale of bullion, and adopts the use of the Troy ounce. * See *Standard*, and *Metrical System*.

WEIMAR, capital of the grand-duchy of Saxe Weimar, is celebrated as having been the residence of the German classic writers, Schiller, Goëthe, Herder, and Wieland: the grand-dukes having been eminent patrons of literature. The city became important in the 15th century, and suffered in the German war.

WELLINGTON ADMINISTRATION, Jan. 1828 to Nov. 16, 1830.

Duke of Wellington, *first lord of the treasury.*
Mr. Henry Goulburn, *chancellor of the exchequer.*
Earl Bathurst, *president of the council.*
Lord Ellenborough, *privy seal.*
Mr. (afterwards sir) Robert Peel, earl Dudley, and Mr. Wm. Huskisson, *home, foreign, and colonial secretaries.*
Viscount Melville, *board of control.*
Mr. Charles Grant, *board of trade.*
Lord Palmerston, *secretary-at-war.*
Mr. Herries, *master of the mint.*
Earl of Aberdeen, *duchy of Lancaster.*

Lord Lyndhurst, *lord chancellor*, Jan. 1828.
Mr. Huskisson, earl Dudley, viscount Palmerston, and Mr. Grant quitted the ministry, and various changes followed in May and June same year.
The earl of Aberdeen and sir George Murray became, respectively, *foreign and colonial secretaries.*
Sir Henry Hardinge, *secretary at war.*
Mr. Vesey Fitzgerald (afterwards lord Fitzgerald), *India board.*
Lord Lowther, *first commissioner of land revenues, &c.*, May and June, 1828.
Mr. Arbutnot, Mr. Vesey Fitzgerald, &c.

WELLINGTON COLLEGE (near Farnborough, Hampshire) was erected by subscription, in memory of the great duke of Wellington. It was instituted for the support and education of the orphan children of soldiers. The first stone was laid by the queen on June 2, 1856; and the building was opened by her majesty on June 29, 1859. Out of the 159,000*l.* subscribed, 55,000*l.* were expended on the building and the rest invested for the maintenance of the institution.

WELLINGTONIA GIGANTEA, the largest tree in the world, a native of California, was discovered by Mr. Lobb in 1853, and first described by Dr. John Lindley. When full grown it is about 450 feet high, and 116 feet in circumference.

WELLINGTON'S VICTORIES, &c. For details, see the articles respectively.

Arthur Wellesley was born (probably March) May (?), 1769
Appointed to command in the Mahratta war in India; takes Poonah and Ahmednuggur, Aug. 12; and gains his first victory at Assaye,

Sept. 23; defeats Scindiah at Argaum, Nov.; and at Gawalgur . . . Dec. 13, 1803
Becomes secretary for Ireland . . . 1807
Takes the command in Portugal, defeats Junot at Vimeira . . . Aug. 21, 1808

* A committee of the house of commons in 1862 recommended that the decimal system should be legalised, but not made compulsory until sanctioned by general approval.

WELLINGTON VICTORIES, &c., *continued*.

Defeats Victor at Talavera, July 28; created viscount Wellington . . . Sept. 4, 1809
 Repulses Massena at Busaco, Sept. 27; and occupies the lines at Torres Vedras . . . Oct. 10, 1810
 Defeats Massena at Fuentes d'Onore, May 5; takes Almeida . . . May 10, 1811
 Storms Ciudad Rodrigo, Jan. 19; and Badajoz, April 6; defeats Marmont at Salamanca, July 22; enters Madrid . . . Aug. 12, 1812
 Defeats Joseph Bonaparte and Jourdan at Vittoria, June 21; storms St. Sebastian, Aug. 31; enters France . . . Oct. 8, 1813
 Defeats Soult at Orthez, Feb. 27; and at Toulouse . . . April 10, 1814
 Created duke of Wellington, with an annuity of 13,000*l.* and a grant of 300,000*l.* . . . May, 1814
 Commands the army in the Netherlands; repulses an attack of Ney at Quatre Bras, June 16; defeats Napoleon at Waterloo, Jan. 18; invests Paris . . . July 3, 1815
 Appointed master general of the ordnance . . . 1819
 The Wellington shield and supporting columns

designed by Stothard, commemorating all the above-mentioned victories, presented to the duke by the merchants and bankers of London. (It was manufactured by Green and Ward, and cost 11,000*l.*) . . . Feb. 16, 1822
 The duke appointed commander-in-chief, Jan. 22; resigns . . . April 30, 1827
 Becomes first minister . . . Jan. 1828
 Aids in carrying the Catholic Emancipation bill, April, 1829
 Asserts that no reform in parliament is needed, Nov. 2; resigns . . . Nov. 16, 1830
 Transacts all the business of the country after the resignation of lord Melbourne, till the arrival of sir R. Peel from Italy, Nov. 1; and becomes foreign secretary under sir R. Peel, Dec. 1834; resigns . . . April, 1835
 Dies at Walmer castle . . . Sept. 14, 1852
 The body is removed to Chelsea hospital, where it lies in state . . . Nov. 10, —
 Removed to the Horse Guards . . . Nov. 17, —
 Public funeral at St. Paul's Cathedral* Nov. 18, —

WELLS (in Somerset), **BISHOPRIC OF**. The bishop's seat was at Wells, and the cathedral church was built by Ina, king of the West Saxons, A.D. 704, and by him dedicated to St. Andrew. Several other of the West Saxon kings endowed it, and it was erected into a bishopric in 909, during the reign of king Edward the Elder. The present church was begun by Robert, the 18th bishop of this see, and completed by his immediate successor. The first bishop of Wells was Æthelm or Adelmus (afterwards archbishop of Canterbury). *Beaton*. The see was united with Bath (*which see*) in 1088.

WESLEYAN METHODISTS, a large Christian sect founded by John Wesley (born 1703, died 1791) and his brother Charles, who in 1727 with a few other students formed themselves into a small society for the purpose of mutual edification in religious exercises. On account of their strictness of life they were called *Methodists*, in 1729 (as living according to the methods laid down in the Bible). John Wesley went to Georgia in America, in 1735, with a view of converting the Indians. On his return to England, in 1738, he commenced itinerant preaching, and gathered many followers. On finding the churches shut against him, he built spacious meeting-houses in London, Bristol, and other places. For some time he was united with George Whitefield; but differences arising on account of the doctrine of election, which Wesley rejected, they separated in 1741. (See *Whitefield*.) Wesley was indefatigable in his labours, and almost continually engaged in travelling through the United Kingdom. His society was well organised, and he preserved his influence over it to the last. "His genius for government was not inferior to that of Richelieu," *Macaulay*. In 1851 there were 428 circuits in Great Britain, with between 13,000 and 14,000 local or lay preachers, and about 920 itinerant preachers, and 6579 chapels.† The 117th annual conference met in London on July 26, 1860.

WESSEX. See *Britain*.

* A multitude of all ranks, estimated at a million and a half of persons, were congregated in the line of route, a distance of three miles, to witness and share in the imposing spectacle. The military consisted of the household regiments of horse and foot guards, the 2nd battalion of the Rifles, the 1st battalion of the Royal Marines, the 33rd regiment, the 17th Lancers, and the 18th Light Dragoons, with the regiment of Scots Greys. There were besides, a body of Chelsea pensioners, and men of different arms of the East India Company. The body was placed, early in the morning of the 18th, by means of machinery, upon a lofty and sumptuous funeral car (which science had contributed to complete), drawn by twelve horses richly caparisoned, and the coffin was thus seen by the whole of the crowd. The procession moved about seven o'clock, and it was three o'clock before the body was lowered into the vault beside the remains of Nelson, under the dome of St. Paul's Cathedral. In 1857 a number of models for the tomb were exhibited in Westminster Hall; none was chosen. The stone sarcophagus, completed in 1858, cost 1100*l.*

† The Conference, the highest Wesleyan court, is composed of 100 ministers, who meet annually. It was instituted by John Wesley in 1784. At the centenary of the existence of Methodism, 216,000*l.* were collected, to be expended in the objects of the society. Out of the original connection have seceded:—

Chapels in 1851.		Chapels in 1851.	
New Connection? (in 1796)	301	Wesleyan Methodist Association (1834)	329
Primitive Methodists (1810)	2871	Wesleyan Methodist Reformers (1849)	2000
Bible Christians, or Bryanites (1815)	403		

The last arose out of the publication of "Fly Sheets," advocating reform in the body. The suspected authors and their friends were expelled. By these disruptions the main body is thought to have lost 100,000 members.—This sect in America numbered about a million in 1844, when a division took place on the slavery question.

WEST AUSTRALIA, formerly called **SWAN RIVER SETTLEMENT**, which was projected by colonel Peel in 1828. Regulations issued from the colonial-office, and captain Stirling, appointed lieutenant-governor, Jan. 17, 1829, arrived at the appointed site in August following. The three towns of Perth, Freemantle, and Guildford were founded same year. In March 1830, fifty ships, with 2000 emigrants, with property amounting to 1,000,000*l.*, had arrived before hardly any dwellings had been erected or land surveyed. The more energetic settlers left for home or the neighbouring colonies, and the colony languished for twenty years for want of suitable inhabitants—the first settlers, from their previous habits and rank in life, proving unable for the rough work of colonisation. In 1848, the colonists requested that convicts might be sent out to them, and in 1849 a band arrived, who were kindly received and well treated. The best results ensued. By 1853, 2000 had arrived, and the inhabitants of Perth had requested that 1000 should be sent out annually.—The settlement at King George's Sound was founded in 1826 by the government of New South Wales. It was used as a military station for four years. In 1830, the home government ordered the settlement to be transferred to Swan River. Since the establishment of steam communication, the little town of Albany here, employed as a coaling station, has become a thriving seaport. It possesses an excellent harbour, used by whalers. A journal called the *Freemantle Gazette* was published here in March 1831. Population of West Australia in 1859, 14,837; Dec. 1861, 15,555.

WEST INDIES. Islands discovered by Columbus, St. Salvador being the first land he made in the New World, and first seen by him in the night between the 11th and 12th Oct. 1492. The largest are Cuba, Hayti (or St. Domingo), Jamaica, Porto Rico, Trinidad, and Guadeloupe. See *the Islands respectively*.

WEST SAXONS. See Wessex, in *Britain*.

WESTERN CHURCH (called also the **LATIN** or **ROMAN**) broke off communion with the Greek or Eastern Church A.D. 653. (See *Greek Church*.) The history of the Western Church is mainly comprised in that of the Popes and of the several European kingdoms. (See *Popes*.) This church was disturbed by the Arian heresy about 345 and 500; and by the Pelagian about 409; by the introduction of image-worship about 600; by the injunction of the celibacy of the clergy and the rise of the monastic orders about 649; by the contests between the emperors and the popes respecting ecclesiastical investitures between 1073 and 1173; by the rise and progress of the Reformation in the fifteenth and sixteenth centuries, and by the contests between the Jesuits and Jansenists in the seventeenth and eighteenth centuries. See *Roman Catholics*.

WESTERN EMPIRE. The Roman empire was first divided into Eastern and Western by Diocletian in A.D. 296; but was reunited under Constans in 340. It was again divided into Eastern and Western by Valentinian and Valens, of whom the former had the Western portion, or Rome, properly so called, A.D. 364. See *Eastern Empire, Italy and Rome*.

RULERS OF THE WESTERN EMPIRE.

- | | |
|--|---|
| 364. Valentinian, son of Gratian, takes the Western, and his brother Valens the Eastern empire. | invites the African Vandals into Italy, and Rome is sacked. Maximus stoned to death. |
| 367. Gratian, a youth, son of Valentinian, made a colleague in the government by his father. | 455. Marcus Macilius Avitus: forced to resign, and dies in his flight towards the Alps. |
| 375. Valentinian II., another son, also very young, is, on the death of his father, associated with his brother in the empire. Gratian is assassinated by his general, Andragathius, in 383. | 457. Julius Valerius Majorianus: murdered at the instance of his minister, Ricimer, who raises |
| Valentinian murdered by one of his officers, Arbogastes, in 392. | 461. Libius Severus to the throne, but holds the supreme power. Severus is poisoned by Ricimer. |
| 392. Eugenius, a usurper, assumes the imperial dignity: he and Arbogastes are defeated by Theodosius the Great, who becomes sole emperor. | 465. [Interregnum. Ricimer retains the authority, without assuming the title of emperor.] |
| [Andragathius throws himself into the sea, and Arbogastes dies by his own hand.] | 467. Anthemius, chosen by the joint suffrages of the senate and army: murdered by Ricimer, who dies soon after. |
| 395. Honorius, son of Theodosius, reigns, on his father's death, in the West, and his brother Arcadius in the East. Honorius dies in 423. | 472. Flavius-Ancius Olybrius: slain by the Goths soon after his accession. |
| [Usurpation of John, the Notary, who is defeated and slain near Ravenna.] | 473. Glycerius: forced to abdicate by his successor, |
| 425. Valentinian III., son of the empress Placidia, daughter of Theodosius the Great: murdered at the instance of his successor, | 474. Julius Nepos: deposed by his general, Orestes, and retires to Salona. |
| 445. Maximus: he marries Eudoxia, widow of Valentinian, who, to avenge the death of her first husband and the guilt of her second, | 475. Romulus (called Augustulus, or Little Augustus), son of Orestes. Orestes is slain, and the emperor deposed by |
| | 476. Odoacer, king of the Heruli: takes Rome, assumes the style of king of Italy, and completes the fall of the Western empire. |

See *Italy, Rome, and Germany*.

WESTMINSTER. This city is so called on account of its western situation in respect to St. Paul's cathedral in particular, or of London in general, there being in former days a monastery, named East Minster, on the hill now called Great Tower-hill. Where the bounds of this city eastwards end, these of London begin, viz. at Temple-bar. Formerly Westminster was called Thorney, or Thorney Island : and in ancient times Canute had a palace here, which was burnt in 1263. Westminster and London were one mile asunder so late as 1603, when the houses were thatched, and there were mud walls in the Strand. It is said that the great number of Scotsmen who came over after the accession of James I. occasioned the building of Westminster, and united it with London. *Howel's Londinopolis.* See *Palace of Westminster* and *Parliament*.

WESTMINSTER ABBEY. The miraculous stories concerning this pile of buildings were questioned by sir Christopher Wren, who was employed to survey the present edifice, and who, upon the nicest examination, found nothing to countenance the general belief that it was erected on the ruins of a pagan temple. Historians have fixed the era of the first abbey in the sixth century, and ascribed to Sebert the honour of erecting it.

The church becoming ruinous, was splendidly rebuilt by Edward the Confessor, and filled with monks from Exeter, between A.D. 1055 and 1065. Pope Nicholas II. about this time constituted it the place for the inauguration of the kings of England.

The church was once more built in a magnificent and beautiful style by Henry III. about 1220 in the reigns of Edward II. Edward III. and Richard II. the great cloisters, abbot's house, and the principal monastic buildings were erected.

The western parts of the nave and aisles were rebuilt by successive monarchs, between the years 1340 and 1483.

The west front and the great window were built by the rival princes Richard III. and Henry VII.; and it was the latter monarch who

commenced the beautiful chapel which bears his name, the first stone of which was laid,

Jan. 24, 1502-3

The abbey was dissolved, and made a bishopric, 1541; and was finally made a collegiate church by Elizabeth

1560

Made a barrack for soldiers, July, 1643. *Mercurius Rusticus.*

The great west window and the western towers rebuilt in the reigns of George I. and II.

The choir injured by fire July 9, 1803

Mr. Wyatt commenced restoring the dilapidated parts at an expense of 42,000*l.* in 1809

A fire, but without any serious injury being done, occurred April 27, 1829

The evening services for the working classes commenced on Jan. 3, 1858, when a sermon

was preached by the dean, Dr. Tronch.

WESTMINSTER BISHOPRIC AND DEANERY. At the dissolution of monasteries, Westminster abbey was valued at 3977*l.* per annum; king Henry VIII. in 1539, erected it into a deanery; and in 1541 he erected it into a bishopric, and appointed John Thirleby prelate. But he, having wasted the patrimony allotted by the king for the support of the see, was translated to Norwich in 1550, and with him ended the bishopric of Westminster; Middlesex, which was the diocese, being restored to London. The dean continued to preside until the accession of Mary, who restored the abbot; but Elizabeth displaced the abbot, and erected the abbey into a collegiate church of a dean and twelve prebendaries, as it still continues. On the revival of the order of the Bath, in 1725, the dean of Westminster was appointed dean of that order, which honour has been continued. Dr. N. Wiseman was created archbishop of Westminster by the pope Pius IX. in Sept. 30, 1850. See *Papal Aggression*.

WESTMINSTER BRIDGES. The old bridge was accounted, on its erection, one of the most beautiful structures of the kind in the world. It was begun (after a design of M. Labelye), Sept. 13, 1738; the first stone was laid Jan. 29, 1738-9; and it was opened for passengers Nov. 17, 1750; cost 426,650*l.* It was built of Portland stone, and crosses the river where the breadth is 1223 feet. Owing to the sinking of several of its piers, most of the balustrade on both sides was removed, to relieve the structure of its weight.—By 16 & 17 Vict. c. 46 (Aug. 4, 1853), the estates of its commissioners were transferred to her majesty's commissioners of works, who were empowered to remove the present bridge, and build a NEW BRIDGE (near the old one), which was shortly after begun. The contract required the completion of the works by June 1, 1857. The driving of the first elm pile commenced on July 3, and the driving of the iron piles and plates in September. The works were suspended for a time, in consequence of the failure of Messrs. Mare, the contractors. The government eventually undertook the building, which they entrusted to Mr. Thomas Page, the engineer. One half of the new bridge was opened for use early in 1860; the whole on May 24, 1862.

WESTMINSTER CONFESSION OF FAITH AND CATECHISMS were drawn up by the "Assembly of Divines," (partly consisting of laymen) who sat by authority of parliament in Henry VII.'s chapel, Westminster, from 1643 to 1647. These have ever since been the doctrinal standards of Scotch Presbyterians.

WESTMINSTER HALL, London. One of the most venerable remains of English architecture, first built by William Rufus in 1097, for a banqueting-hall; and here in 1099, on his return from Normandy, "he kept his feast of Whitsuntide very royally." The hall became ruinous before the reign of Richard II. who repaired it in 1397, raised the walls, altered the windows, and added a new roof, as well as a stately porch and other buildings. In 1236, Henry III. on New-year's day caused 6000 poor persons to be entertained in this hall, and in the other rooms of his palace, as a celebration of queen Eleanor's coronation; and here Richard II. held his Christmas festival in 1397, when the number of the guests each day the feast lasted was 10,000 *Stow*. The courts of law were established here by king John. *Idem*. Westminster hall is universally allowed to be the largest room in Europe unsupported by pillars: it is 270 feet in length, 74 feet broad. The hall underwent a general repair in 1802. Concurrently with the erection of the palace of Westminster, many improvements and alterations have lately been made in this magnificent hall. The Volunteer Rifle corps were drilled in the hall in the winter of 1859.

WESTMINSTER SCHOOL, London, was founded by queen Elizabeth in 1560, for the education of forty boys, denominated the Queen's Scholars, who are prepared for the university. It is situated within the walls of the abbey, and is separated into two schools or divisions, comprising seven forms or classes. Besides the scholars on the foundation, many of the nobility and gentry send their sons to Westminster for instruction. A proposal in 1860 to remove the school was disapproved of in 1861.

WESTMORELAND. This county and Cumberland were granted as a fief to Malcolm of Scotland by Edward the Elder in 945; and resumed by Henry III. in 1237. Neville, earl of Westmoreland, revolted against Elizabeth in 1569, and was attainted in 1570.

WESTPHALIA (Germany). This duchy belonged in former times to the dukes of Saxony, and afterwards became subject to the archbishop of Cologne. On the secularisation of 1802, it was made over to Hesse Darmstadt; and in 1814, was ceded for an equivalent to Prussia. The kingdom of Westphalia, one of the temporary kingdoms of Bonaparte, composed of conquests from Prussia, Hesse-Cassel, Hanover, and the smaller states to the west of Elbe, was created Dec. 1, 1807, and Jerome Bonaparte appointed king. Hanover was annexed March 1, 1810. The kingdom of Westphalia was overturned in 1813, and the country restored to its former rulers.

WESTPHALIA, or MUNSTER, PEACE OF, signed at Munster and at Osnaburg, between France, the emperor, and Sweden; Spain continuing the war against France. By this peace the principle of a balance of power in Europe was first recognised; Alsace given to France, and part of Pomerania and some other districts to Sweden; the Elector Palatine restored to the Lower Palatinate; the religious and political rights of the German States established; and the independence of the Swiss Confederation recognised by Germany, Oct. 24, 1648.

WHALE-FISHERY, it is said, was first carried on by the Norwegians so early as A.D. 837. *Lenglet*. Whales were killed at Newfoundland and Iceland for their oil only till 1578; the use of their fins and bones was not yet known, consequently (a writer quaintly adds) no stays were worn by the ladies. The English whale-fishing commenced at Spitzbergen in 1598; but the Dutch had been previously fishing there. The fishery was much promoted by an act of parliament passed in 1749. From 1800 to 2000 whales have been killed annually on the coast of Greenland, &c. The quantity of whale oil imported in 1814 was 33,567 tons. The quantity in 1826, when gas-light became general, was reduced to 25,000 tons; so that the consumption of oil had become, on this account, greatly diminished. In 1840 the quantity was about 22,000 tons; in 1850, 21,328 tons; in 1861, 19,176 tons.

WHEAT. The Chinese ascribe to their emperor, Ching-Noung, who succeeded Fohi, the art of husbandry, and method of making bread from wheat, about 2000 years before the Christian era. Wheat was introduced into Britain, in the sixth century, by Coll ap Coll Frewi. *Roberts' Hist. Anc. Brit.* Bread is mentioned in several passages of the Scriptures, as also the wheat-harvest. The first wheat imported into England of which we have a note was in 1347. Various statutes have regulated the sales of wheat, and restrained its importation, thereby to encourage its being raised at home. Imported into the united kingdom in 1854, 2,656,455 qrs. of wheat, and 6,329,038 cwts. of flour; in 1861, 6,912,815 qrs. of wheat, and 6,152,938 cwts. of flour. See *Corn Laws* and *Bread*.

WHEEL, BREAKING ON THE. This barbarous mode of death is of great antiquity. It was used for the punishment of great criminals, such as assassins and parricides, first in Germany; it was also used by the Inquisition, and rarely anywhere else, until Francis I. ordered it to be inflicted upon robbers, first breaking their bones by strokes with a heavy iron club, and then leaving them to expire upon the wheel, A.D. 1515. See *Ravaillac*, &c.

WHEEL-WORK. Cotton-spinning machinery, and manufacturing machinery in general, are merely varieties of the invention of androids by toy-makers; a central power, with axles, wheels, cogs, ketches, ratchets, straps, pins, levers, serews, &c. &c., variously combined, constitute the wonders of Lancashire, Yorkshire, and Warwickshire. See *Spinning Looms, Automations*.

WHIGS. See *Tory*. Numerous authors trace the origin of these designations to various occasions and various epochs. Referring to what is stated under the head *Tory*, it may here be added, that we are told the name *Whig* was a term of reproach given by the court party to their antagonists for resembling the principles of the whigs, or fanatical conventiclers in Scotland; and the other was given by the country party to that of the court, comparing them to the Tories, or Popish robbers in Ireland. *Baker*. This distinction of parties arose out of the discovery of the Meal-Tub plot (*which see*) in 1678. Upon bringing up the Meal-Tub plot before parliament, two parties were formed: the one, who called the truth of the whole plot in question: and this party styled those who believed in the plot, *Whigs*. The other party, crediting the truth of the plot, styled their adversaries, *Tories*. But in time these names, given upon this occasion as marks of opprobrium, became distinctions much boasted of by the parties bearing them. *Hume*. The Whig Club was established by Charles James Fox; and one of its original and most distinguished members was the great Francis, duke of Bedford, who died in 1802.

PRINCIPAL WHIG MINISTRIES.

Viscount Mordaunt's, 1689.

Lord Godolphin's, 1690 and 1702.

Earl of Halifax's, 1714.

Sir R. Walpole's, 1721 and 1722.

Marquess of Rockingham's, 1762.

Lord Grenville's ("All the Talents"), 1806.

Earl Grey's, 1830.

Viscount Melbourne's, 1834, 1835.

Lord John Russell's, 1846 and 1851.

Viscount Palmerston's, 1855 and 1859.

(See the respective articles under the name of the Premier, and Coalitions.)

WHISKY, the distilled spirit produced from malt and other corn in Scotland and Ireland, of which about eight millions of gallons are distilled annually in the former, and upwards of nine millions of gallons in the latter. The duty upon this article has produced an annual revenue of about three millions. The distillation of whisky in these countries is referred to the sixteenth century; but some authors state it to have been earlier. See *Distillation*. In 1855 the duties on spirits distilled in Scotland and Ireland were equalised with those distilled in England.

WHITE-BAIT DINNER, when the cabinet ministers meet at the end of each session, is said to have begun at the end of the last century, through sir Robert Preston and sir George Rose inviting Mr. Pitt and his colleagues to dine at Dagenham, and afterwards at Greenwich. Another account dates the origin in 1721.

WHITEBOYS, a body of ruffians in Ireland, so called on account of their wearing linen frocks over their coats. They committed dreadful outrages in 1761; but were suppressed by a military force and their ringleaders executed in 1762. They rose into insurrection again and were suppressed 1786-7. Whiteboys have appeared at various times since, committing the most frightful crimes. The insurrection act was passed on their account in 1822.

WHITEFIELD, GEORGE, the founder of the "*Calvinistic Methodists*," was the son of an innkeeper at Gloucester, where he received his first education. He was admitted a servitor at Oxford in 1732, and became a companion of the Wesleys there, and aided them in establishing Methodism. He parted from them in 1741, on account of their rejection of the doctrine of election. He was the most eloquent preacher of his day. His first sermon was preached in 1736; and he commenced field preaching in 1739. He is said to have delivered 18,000 sermons during his career of 34 years. His followers are termed "the countess of Huntington's Connection," from his having become her chaplain in 1748. There were 209 chapels of this connection in 1851; but many of his followers have joined the Independents. He was born in 1714, and died in 1770. See *Tabernacle*.

WHITE FRIARS. See *Carmelites*. They had numerous monasteries throughout England; and a precinct in London without the Temple, and west of Blackfriars, is called *Whitefriars* to this day, after a community of their order, founded there in 1245.

WHITE HATS, a political party in the Low Countries formed about 1377, against Louis count of Flanders. The struggle lasted till 1384, when it was settled by the intervention of Philip duke of Burgundy.

WHITE SHEEP, a name given to the Turcomans who conquered Persia about 1468; and persecuted the Shiites, but were expelled by Ismail, who founded the Sophi dynasty in 1501.

WHITEHALL (London), built by Hubert de Burgh, earl of Kent, before the middle of the thirteenth century. It afterwards devolved, by bequest, to the Black Friars of Holborn, who sold it to the archbishop of York, whence it received the name of York-place, and continued to be the town residence of the archbishops till purchased by Henry VIII. of Cardinal Wolsey, in 1530. At this period it became the residence of the court. Queen Elizabeth, who died at Richmond, in 1603, was brought from thence to Whitehall, by water, in a grand procession. It was on this occasion, Camden informs us, that the following quaint panegyric on her majesty was written :

"The queen was brought by water to Whitehall, At every stroke the oars did *tears* let fall.
More clung about the barge : fish under water Wept out their *eyes of pearl*, and swam blind after.
I think the bargemen might, with easier thighs, Have rowed her thither in her people's eyes ;
For howsoever thus much my thoughts have scann'd, She had come by *water*, had she come by *land*."

In 1697, Whitehall was destroyed by an accidental fire, except the banqueting-house, which had been added to the palace of Whitehall by James I., according to a design of Inigo Jones, in 1619. In the front of Whitehall, Charles I. was beheaded, Jan. 30, 1649. George I. converted the hall into a chapel 1723-4. The exterior of this edifice underwent repair between 1829 and 1833.

WHITE HOUSE (Washington), built of freestone, gives name to the United States government, as St. James's palace does to that of Great Britain.

WHITE PLAINS (N. America), where a battle was fought Oct. 28, 1776, between the revolted Americans and the British forces under sir William Howe. It terminated in the defeat of the Americans, who suffered considerable loss in killed, wounded, and prisoners.

WHITE TOWER, the keep or citadel in the Tower of London, a large square, irregular building, erected in 1070, by Gandulph, bishop of Rochester. It measures 116 feet by 96, and is 92 feet in height ; the walls, which are 11 feet thick, having a winding staircase continued along two of the sides, like that in Dover castle. It contains the sea armoury, and the volunteer armoury—the latter for 30,000 men. Within this tower is the ancient chapel of St. John, originally used by the English monarchs. The turret at the N.E. angle, the highest of the four by which the White tower is surmounted, was used for astronomical purposes by Flamsted previously to the erection of the Royal Observatory at Greenwich.

WHITSUNTIDE. This festival is appointed by the church to commemorate the descent of the Holy Ghost upon the apostles : in the primitive church, the newly baptized persons or catechumens, used to wear white garments on Whitsunday. This feast is moveable, and sometimes falls in May and sometimes in June ; but is always exactly seven weeks after Easter. Rogation week (*which see*) is the week before Whitsunday.

WHITTINGTON'S CHARITIES. Sir Richard Whittington, a citizen and mercer of London, served the office of lord mayor three times, the last time in 1419. The stories connected with his name are destitute of truth. His munificent charities are little known and seldom praised. He founded his college, dedicated to the Holy Ghost and the Virgin Mary, in 1424 ; and his almshouses in 1429 ; the latter stand on Highgate hill, and near them was the famous stone which commemorated his supposed return to London, after leaving it in despair, the church bells chiming him back by the promise of his future greatness.

WICKLIFFITES, the followers of John Wickliffe (born 1324), a professor of divinity in the university of Oxford and rector of Lutterworth in Leicestershire. He was the father of the Reformation of the English church from popery, being among the first who opposed the authority of the pope, transubstantiation, celibacy of the clergy, &c. Wickliffe was protected by John of Gaunt, Edward's son and Richard's uncle, yet virulently persecuted by the church, and rescued from martyrdom by a paralytic attack, which caused his death, December 31, 1384, in his 60th year. The council of Constance, in 1428, decreed his bones to be disinterred and burnt, which was done by the bishop of Lincoln, and his dust was cast into the river Swift. Wickliffe's English version of the Bible was commenced in 1380 : an edition of it was printed at Oxford in 1850.

WIDOWS. The Jewish law required a man's brother to marry his widow (1490). For the burning of widows in India, see *Suttees*. In numerous countries widows are devoted to great privations from the time their husbands die : and at the isthmus of Darien, when a widow dies, such of her children as, from tender age, cannot provide for their own subsistence were buried in the same grave with her. *Abbé Raynal*. Among the numerous associations in London for the relief of widows, are, one for the widows of musicians, instituted in 1738 ; one for widows of naval men, founded in 1739 ; one for widows of medical men, 1788 ; a law society, for widows of professional gentlemen, 1817 ; and a society for

artists' widows, 1827. There are various other similar institutions.—WIDOWERS were taxed in England as follows : a duke, 12*l.* 10*s.* ; lower peers, smaller sums ; a common person, 1*s.* 7 Will. III. 1695.

WIG. See *Peruke*.

WIGAN (Lancashire). In the civil war the king's troops, commanded by the earl of Derby, were defeated and driven out of the town in 1643 by the parliamentary forces under sir John Smeaton. The earl was again defeated by colonel Ashton, who razed the fortifications of Wigan to the ground, same year ; and once more here by a greatly superior force commanded by colonel Lilburne, 1651. In this last engagement, sir Thomas Tildesley, an ardent royalist, was slain ; a pillar was erected to his memory in 1679.

WIGHT, ISLE OF, is called *Vecta*, or *Vectis*, in the writings of the Roman historians, who inform us that it was conquered by Vespasian in the reign of the emperor Claudius. The island was conquered by the Saxons under Cerdic about 530. It was captured in 787 by the Danes, and again in 1001, when they held it for several years. It was taken by the French, July 13, 1377, and has several times suffered from invasions by that people. In the year 1442, Henry VI. alienated the Isle of Wight to Henry de Beauchamp, first premier earl of England, and then duke of Warwick, with a precedency of all other dukes but Norfolk, and lastly crowned him king of the Isle of Wight, with his own hands ; but this earl dying without heirs male, his regal title died with him, and the lordship of the isle returned to the crown. Charles I., after his flight from Hampton-court, was a prisoner in Carisbrook castle, in 1647. In the time of Charles II. timber was so plentiful, that it is said, a squirrel might have travelled on the tops of the trees for many leagues together ; but it is now much reduced, through supplying the dockyards for the British navy. The queen has a marine residence here called Osborne-house.

WILKES' NUMBER, the designation given to the 45th number of a paper styled the *North Briton*, published by Mr. Wilkes, an alderman of London. He commenced a paper warfare against the earl of Bute and his administration, and in this particular copy, printed April 23, 1763, made so free a use of royalty itself, that a general warrant was issued against him by the earl of Halifax, then secretary of state, and he was committed to the Tower, April 30. His warfare not only deprived him of liberty, but exposed him to two duels ; yet he obtained 4000*l.* damages and full costs of suit for the illegal seizure of his papers. He further experienced the judgment of the court of King's Bench, and both houses of parliament, for the libel, and for his obscene poem, "An Essay on Woman ;" and was expelled the commons and outlawed : he was, however, elected a fifth time for Middlesex in Oct. 1774, and the same year served the office of lord mayor ; and was elected chamberlain of London in 1779 ; but was overlooked in a subsequent general election, and died in 1797. See *North Briton*, and also *Warrants, General*.

WILLIAM AND MARY PACKET. This packet, regularly plying between Bristol and Waterford, struck on the rocks called the Willeys, or Wolver's, about three miles N.W. of the Holmes lighthouse, on the English coast, and sank in about fifteen minutes. Nearly sixty persons unhappily perished. Many ladies of fortune, beauty, and accomplishments lost their lives : the misses Barron, four young ladies, sisters, were among the drowned, and sank in a group in each other's arms. Nine persons (being most of the crew, and two passengers) were saved, Oct. 24, 1817.

WILLS, LAST, AND TESTAMENTS. Wills are of very high antiquity. See *Genesis* xlviii. Solon introduced them at Athens, 578 B.C. There are many regulations respecting wills in the Koran. The Romans had this custom, and also the native Mexicans ; so that it prevailed at least in three parts of the globe. Trebatius Testa, the civilian, was the first person who introduced codicils to wills at Rome, 31 B.C. The power of bequeathing lands, by the last will and testament of the owner, was confirmed to English subjects 1 Henry I. 1100 ; but with great restrictions and limitations respecting the feudal system : which were taken off by the statute of 32 Henry VIII. 1541. *Blackstone's Commentaries*. The first will of a sovereign on record is stated (but in error) to be that of Richard II. 1399 ; Edward the Confessor made a will, 1066. Various laws have regulated the wills and testaments of British subjects. All previous statutes were repealed by 1 Vict. c. 26, 1837, and the laws with relation to wills thereby amended.* The present PROBATE COURT (*which see*)

* By this act the testator must be above 21, not a lunatic or idiot, not deaf and dumb, not drunk at the time of signing, not an outlawed or unpardoned felon. All kinds of property may be devised. The will must be written legibly and intelligibly, and signed by the testator, or by his direction, in the presence of two or more witnesses, who also must sign. A married woman may bequeath only her pin-money or separate maintenance, without the consent of her husband.

was established in 1857. An office for the reception of the wills of living persons was opened in Jan. 1861.

EXTRACTS FROM THE LAST WILL OF NAPOLEON I., EMPEROR OF FRANCE.*

[He died May 5, 1821, eleven days after he had signed these documents. The original in French occupies about twenty-six pages in Feignot's "Testaments Remarquables," 1829.]

"This day, April 24, 1821, at Longwood, in the Island of St. Helena. This is my testament, or act of my last will:

"I leave to the comte de Montholon 2,000,000 francs, as a proof of my satisfaction for the attentions he has paid to me for these six years, and to indemnify him for the losses which my residence in St. Helena has occasioned him. I leave to the comte Bertrand 500,000 francs. I leave to Marchand, my first valet-de-chambre, 400,000 francs; the services he has performed for me are those of a friend. I desire that he may marry a widow, sister, or daughter of an officer or soldier of my old guard. To St. Denis, 100,000 francs. To Novarre, 100,000 francs. To Pijeron, 100,000 francs. To Archambaud, 50,000 francs. To Cuvier, 50,000 francs. To Chandellet, *idem*.

"To the abbé Vignali, 100,000 francs. I desire that he may build his house near Ponte Novo de Rossino. To the comte Las Casas, 100,000 francs. To comte Lavalette, 100,000 francs. To the surgeon in chief, Larrey, 100,000 francs. He is the most virtuous man I have known. To general Brayer, 100,000 francs.

"To general Lefevre Desnouettes, 100,000 francs. To general Drouet, 100,000 francs. To general Cambonne, 100,000 francs. To the children of general Muton Duvernaix, 100,000 francs. To the children of the brave Labédoyère, 100,000 francs. To the children of general Girard, killed at Ligny,

100,000 francs. To the children of General Chartrand, 100,000 francs. To the children of the virtuous general Travost, 100,000 francs. To general Lallemand, the elder, 100,000 francs. To general Clausel, 100,000 francs. To Costa Bastilica, also 100,000 francs. To the baron de Meneville, 100,000 francs. To Arnault, author of *Marius*, 100,000 francs.

"To colonel Marbot, 100,000 francs: I request him to continue to write for the defence and glory of the French armies, and to confound the calumniators and the apostates. To the baron Bignon, 100,000 francs: I request him to write the history of French Diplomacy from 1792 to 1815. To Poggi de Talaro, 100,000 francs. To the surgeon Emmery, 100,000 francs.

"These sums shall be taken from the six millions which I deposited on leaving Paris in 1815, and from the interest at the rate of 5 per cent. since July 1815; the account of which shall be adjusted with the bankers by the counts Montholon and Bertrand, and by Marchand.

"These legacies, in case of death, shall be paid to the widows and children, and in their default, shall revert to the capital. I institute the counts Montholon, Bertrand, and Marchand my testamentary executors. This present testament, written entirely by my own hand, is signed and sealed with my arms.

"NAPOLEON.

"April 24, 1821, Longwood."

The following are part of the eight *Codécils* to the preceding will of the emperor:—

"On the liquidation of my civil list of Italy—such as money, jewels, plate, linen, coffers, caskets, of which the viceroy is the depositary, and which belong to me, I dispose of two millions, which I leave to my most faithful servants. I hope that without their showing any cause, my son Eugene Napoleon will discharge them faithfully. He cannot forget the forty millions which I have given him in Italy, or by the right (*parage*) of his mother's inheritance

"From the funds remitted in gold to the empress Maria Louisa, my very dear and well-beloved spouse, at Orleans, in 1814, there remain due to me two millions, which I dispose of by the present codicil, in order to recompense my most faithful servants, whom I beside recommend to the protection of my dear Maria Louisa. I leave 200,000 francs to count Montholon, 100,000 francs of which he shall pay into the chest of the treasurer (Las Casas) for the same purpose as the above, to be employed according to my dispositions in legacies of conscience.

"10,000 francs to the sub-officer Cantillon, who has undergone a prosecution, being accused of a desire to assassinate lord Wellington, of which he has been declared innocent. Cantillon had as much

right to assassinate that oligarch, as the latter had to send me to perish on the rock of St. Helena," &c., &c., &c.

LETTER TO M. LAFITTE.

"MONSIEUR LAFITTE.—I remitted to you in 1815, at the moment of my departure from Paris, a sum of nearly six millions, for which you gave me a double receipt. I have cancelled one of these receipts, and I have charged comte de Montholon to present to you the other receipt, in order that you may, after my death, deliver to him the said sum with interest, at the rate of five per cent., from the 1st of July, 1815, deducting the payments with which you have been charged in virtue of my order. I have also remitted to you a box containing my medalion. I beg you will deliver it to comte Montholon.

"This letter having no other object, I pray God, Monsieur Lafitte, that He may have you in His holy and worthy keeping.

"NAPOLEON.

"Longwood, in the island of St. Helena, April 25, 1821."

WILMINGTON ADMINISTRATION. Feb. 1742.

Earl of Wilmington, *first lord of the treasury*.

Lord Hardwicke, *lord chancellor*.

Earl of Harrington, *president of the council*.

Earl Gower, *lord privy seal*.

Mr. Sandys, *chancellor of the exchequer*.

Lord Carteret and the duke of Newcastle, *secretaries of state*.

Earl of Winchelsea, *first lord of the admiralty*.

Duke of Argyll, *commander of the forces and master general of the ordnance*.

Mr. Henry Pelham, *paymaster of the forces*.

With several of the household lords.†

[On lord Wilmington's death, July 26, 1743, Mr. Pelham became prime minister; and in Nov. 1744, he formed the "Broad-bottom" administration, *which see*.]

* These documents, dated from April 15-24, which had been deposited since 1821 in England, have been, at the request of the French government, given up to the authorities at Paris, to be deposited among the archives of that capital.

† The great household officers were at this period always in what was called the cabinet: these were,

WINCHESTER (Hampshire). A most ancient city, whose erection may reasonably be ascribed to the Celtic Britons, though the alleged date of its foundation, 892 B.C. is manifestly unworthy of attention. It became the capital of the West Saxon kingdom under Cerdic, A.D. 530; it was the residence of Alfred 879-901; and under the rule of Egbert, it was the metropolis of England. In the reign of William I., though Winchester was still a royal residence, London began to rival it, and acquire the pre-eminence; and the destruction of religious houses by Henry VIII. almost ruined it. Several kings resided at Winchester, and many parliaments were held there. Memorials of its ancient superiority exists in the national denomination of measures of quantity, as Winchester ell, Winchester bushel, &c., the use of which has but recently been replaced by imperial measures. The **BISHOPRIC** is of great antiquity. The cathedral church was first founded and endowed by Kingil or Kenegilsus, the first Christian king of the West Saxons. The church first built becoming ruinous, the present fabric was begun by Walkin, the 34th bishop, 1073; but not finished till the time of William of Wykeham, who founded the college about 1373. The church was first dedicated to St. Amphibalus, then to St. Peter, and afterwards to St. Swithin, once bishop here. St. Birine was the first bishop of the West Saxons A.D. 635. The see is valued in the king's books at 2,793*l.* 4*s.* 2*d.* annually. Present income, 10,500*l.*

RECENT BISHOPS OF WINCHESTER,

Prelates of the Order of the Garter.

1781. Brownlow North, died July 12, 1820.

1820. George Pretyman Tomline, died 1827.

1827. Charles Richard Sumner (PRESENT bishop, 1862).

WINDING-UP ACTS (to facilitate the winding up the affairs of joint-stock companies who are unable to meet their engagements) were passed in 1848, 1857, and a most important one in 1862.

WINDMILLS. They are of great antiquity, and some writers state them to be of Roman invention; but certainly we are indebted for the windmill to the Saracens. They are said to have been originally introduced into Europe by the knights of St. John, who took the hint from what they had seen in the crusades. *Baker.* Windmills were first known in Spain, France, and Germany, in 1299. *Anderson.* Wind saw-mills were invented by a Dutchman, in 1633, when one was erected near the Strand, in London.

WINDOWS. See *Glass.* There were windows in Pompeii, A.D. 79, as is evident from its ruins. It is certain that windows of some kind were glazed so early as the third century, if not before, though the fashion was not introduced until it was done by Bennet, A.D. 633. Windows of glass were used in private houses, but the glass was imported, 1177. *Anderson.* In England in 1851 about 6000 houses had fifty windows and upwards in each; about 275,000 had ten windows and upwards; and 725,000 had seven windows, or less than seven. The window-tax was first enacted in order to defray the expense of and deficiency in the re-coinage of gold, 7 Will. III. 1695. The tax was increased Feb. 5, 1746-7; again in 1778; and again, on the commutation-tax for tea, Oct. 1, 1784. The tax was again increased in 1797, 1802, and (48 Geo. III. c. 55) 1808; and was reduced in 1823. The revenue derived from windows was, in 1840, about a million and a quarter sterling; and in 1850 (to April 5) 1,832,684*l.* The tax upon windows was repealed by act 14 & 15 Vict. c. 36, July 24, 1851, which act imposed a duty upon inhabited houses in lieu thereof.

WINDS. When the wind blows strong or flies swift, it is called a high wind, and moves about fifty miles an hour. In one of Dr. Lind's experiments he found that the velocity of the wind was ninety-three miles an hour; a swiftness of motion which, since M. Garnerin's aerial voyage to Colchester, must be considered within the limits of probability.

WINDSOR CASTLE (Berkshire),* a royal residence of the British sovereigns, originally built by William the Conqueror, but enlarged by Henry I. about 1110. The monarchs who succeeded him likewise resided in it, till Edward III., who was born here,

usually, the lord chamberlain, the lord steward, the master of the horse, and the keeper of the great wardrobe. The cofferer, and sometimes others, if of the council, were also cabinet ministers, or of the administration. *Lord Hervey's Memoirs.*

* *Windsor Forest*, situated to the south and west of the town of Windsor, was formerly 120 miles in circumference; in 1607, it was 77½ miles round, but it has since been reduced in its bounds to about 56 miles. It was surveyed in 1789, and found to contain 59,600 acres. Virginia water, and the plantations about it, were taken out of the forest. The marshes were drained and the trees planted for William duke of Cumberland, about 1746; but much was done by George IV., who often resided at the lodge. On the south side is Windsor Great Park, which was fourteen miles in circumference, but it has been much enlarged by the Inclosure act; it contains about 3,800 acres. The Little Park on the north and east sides of the castle, contains about 500 acres. The gardens are elegant, and have been considerably improved by the addition of the house and gardens of the duke of St. Alban's, purchased by the crown.

caused the old building, with the exception of three towers at the west end, to be taken down, and re-erected the whole castle, under the direction of William of Wykeham, 1356. He likewise built St. George's chapel. Instead of alluring workmen by contracts and wages, Edward assessed every county in England to send him so many masons, tilers, and carpenters, as if he had been levying an army. James I. of Scotland was imprisoned here 1406-23. Several additions were made to this pile of building by Henry VIII. The Cottage, Windsor, first built 1543. Queen Elizabeth made the grand terrace on the north side; and Charles II. thoroughly repaired and beautified it, 1680. *Camden*; *Mortimer*. The chapel was repaired and opened, Oct. 1790. The castle was repaired and enlarged, 1824-8; and his majesty George IV. took possession of it, Dec. 8, in the latter year. It continues to be the chief royal residence of our sovereigns, who have here entertained many royal personages: as the emperor and empress of the French, in April 1855. Extensive improvements have been made from time to time. A serious fire occurred at the castle, in the prince of Wales's tower, owing to some defect in the heating apparatus, March 19, 1853.

WINES. See *Vine*. The art of making wine from rice is ascribed by the Chinese to their king, Ching-Noung, about 1998 B.C. *Univ. Hist.* The art of making wine was brought from India by Bacchus, as other authorities have it.—Hosea speaks of the wine of Lebanon as being very fragrant. *Hosea* xiv. 7. Our Saviour changed water into wine at the marriage of Cana in Galilee. *John* ii. 3, 19. No wine was produced in France in the time of the Romans. *Bossuet*. Spirits of wine was known to the alchemists. *Idem*. It has been conjectured that the Phœnicians introduced a small quantity of wine into Britain; but it was little known in our island before it was conquered by the Romans. Wine was sold in England by apothecaries as a 'cordial in A.D. 1300, and so continued for some time after, although there is mention of "wine for the king" so early as 1249. In 1400 the price was twelve shillings the pipe. A hundred and fifty butts and pipes condemned, for being adulterated, to be staved and emptied into the channels of the streets, by Rainwell, mayor of London, 6 Hen. VI. 1427. *Stow's Chron.* The first importation of claret wine into Ireland was on June 17, 1490. The first act for licensing sellers of wine in England passed April 25, 1661. Wine duties to be 2s. 9d. per gallon on Cape Wine, and 5s. 6d. on all other wines, 2 Will. IV. 1831. In 1856, the customs duties on wines produced 2,073,694*l.*; in 1858, 1,721,742*l.*; in 1859, 1,982,302*l.* Wine Licences are granted to refreshment houses by an act passed in 1860.

IMPORTATION OF WINE OF ALL KINDS INTO THE UNITED KINGDOM.

1800	3,307,460 gallons.	1850	9,304,312 gallons.
1815	4,306,528 "	1854	10,875,855 "
1830	6,879,558 "	1857	10,336,485 "
1839	9,909,056 "	1859	8,195,513 "
1845	8,469,776 "	1861	11,052,436 "

WINIFRED'S WELL (Holywell, Flintshire). At this place is a well mentioned as early as A.D. 660. It is an extraordinary natural spring, of which popish superstition has availed itself. The rock from which it flows discharges 20 tons a minute; and the water, in two miles, falls into the Dee, and in the intermediate space turns many water-wheels connected with some large manufactories. The well is the drainage of three stupendous hills which lie above it. It now drives cotton, corn, copper, and other mills. St. Winifred was niece to St. Bruno, who flourished in the seventh century: her martyrdom is commemorated on June 22; her "translation to heaven" on Nov. 3. St. Bruno is said to have re-united her head to her body, from which it had been struck off by a sword.

WINTER. See *Frosts*.

WIRE. The invention of drawing wire* is ascribed to Rodolph of Nuremberg, A.D. 1410. Mills for this purpose were first set up at Nuremberg in 1563. The first wire-mill in England was erected at Mortlake in 1663. *Mortimer*.

WIRTEMBERG. See *Wurtemberg*.

WITCHCRAFT. The punishment of witchcraft was commanded in the Jewish law (*Exodus* xxii. 18) 1491 B.C., "Thou shalt not suffer a witch to live." Saul, after banishing

* The astonishing ductility which is one of the distinguishing qualities of gold, is no way more conspicuous than in gilt wire. A cylinder of 48 ounces of silver, covered with a coat of gold weighing only one ounce, is usually drawn into a wire, two yards of which only weigh one grain; so that 98 yards of the wire weigh no more than 49 grains, and one single grain of gold covers the whole 98 yards; and the thousandth part of a grain is above one-eighth of an inch long. *Halley*. Eight grains of gold, covering a cylinder of silver, are commonly drawn into a wire 13,000 feet long; yet so perfectly does it cover the silver, that even a microscope does not discover any appearance of the silver underneath. *Boyle*.

or condemning witchcraft, incurred the wrath of God by consulting the witch of Endor, 1056 B.C. (1 Sam. xxviii.) But it must be recollected that God was then the real king of Israel, and manifested his will to his people visibly. Bishop Hutchinson's important historical "Essay on Witchcraft" was published in 1718. The church of Rome subjected persons suspected of the crime to the most cruel torments. Pope Innocent VIII. issued a superstitious bull against witchcraft in 1484. In tens of thousands of cases, the victims, often innocent, were burned alive, while others were drowned by the test applied; for if, on being thrown into a pond, they did not sink, they were presumed to be witches, and either killed on the spot, or reserved for burning at the stake.

Joan of Arc was burnt at Rheims as a witch, May 30, 1431.
About five hundred witches were burnt in Geneva, in three months, 1515.
One thousand were burnt in the diocese of Como in a year, about 1524.
An incredible number in France, about 1520, when one sorcerer confessed to having 1200 associates.
Nine hundred were burnt in Lorraine, between 1380 and 1505.
One hundred and fifty-seven were burnt at Wurtzburg, between 1627 and 1629, old and young, clerical, learned, and ignorant.
At Lindheim, thirty were burnt in four years, out of a population of 600; and more than 100,000 perished, mostly by the flames, in Germany.
Grandier, the parish priest at Loudon, was burnt on a charge of having bewitched a whole convent of nuns, 1634.
In Brotagne, twenty poor women were put to death as witches, 1654.
Disturbances commenced on charges of witchcraft in America, at Massachusetts, 1648-9; and persecutions raged dreadfully in Pennsylvania in 1683.
At Salem, in New England, nineteen persons were hanged (by the Puritans) for witchcraft, eight more were condemned, and fifty confessed themselves to be witches and were pardoned, 1692.
Maria Renata was burnt at Wurtzburg in 1749.
At Kalisk, in Poland, nine old women were charged with having bewitched and rendered unfruitful the lands belonging to that palatinate, and were burnt, Jan. 17, 1775.
Five women were condemned to death by the Brahmans, at Patna, for sorcery, and executed, Dec. 15, 1802.

WITCHCRAFT IN ENGLAND.

Absurd and wicked laws were in force against them in these countries in former times, by which death was the punishment, and thousands of persons

suffered both by the public executioner and the hands of the people.

A statute was enacted declaring all witchcraft and sorcery to be felony without benefit of clergy, 33 Hen. VIII. 1541. Again 5 Eliz. 1562, and 1 James, 1603.

The 73rd canon of the church prohibits the clergy from casting out devils, 1603.

Barrington estimates the judicial murders for witchcraft in England in 200 years at 30,000.

Matthew Hopkins, the "witch finder," causes the judicial murder of about 100 persons in Essex, Norfolk, and Suffolk, 1645-7.

Sir Matthew Hale burnt two persons for witchcraft in 1664.

Northamptonshire and Huntingdon preserved the superstition about witchcraft later than any other counties.

Seventeen or eighteen persons burnt at St. Osyth's, in Essex, about 1676.

Two pretended witches were executed at Northampton in 1705, and five others seven years afterwards.

In 1716, Mrs. Hicks, and her daughter, aged nine, were hanged at Huntingdon.

In Scotland, thousands of persons were burnt in the period of about a hundred years. Among the victims were persons of the highest rank, while all orders in the state occurred. James I. even caused a whole assize to be prosecuted for an acquittal. The king published his *Dialogue of Demonologie* first in Edinburgh, 1597, and in London, 1603.*

The last sufferer in Scotland was at Dornach in 1722. The laws against witchcraft had lain dormant for many years, when an ignorant person attempting to revive them, by finding a bill against a poor old woman in Surrey for the practice of witchcraft, they were repealed, 10 Geo. II. 1736.

Credulity in witchcraft still abounds in the country districts of England, 1860.

WITENA-MOT, or WITENA-GE MOT. Among our Saxon ancestors, this was the term which was applied to their deliberations, and which literally signified the assembling of the wise men in the great council of the nation. A witena-mot was called in Winchester by Egbert A.D. 800, and in London, 833, to consult on the proper means to repel the Danes. This name was dropped about the period of the Norman Conquest, and that of parliament adopted. See *Parliament*.

WITEPSK (in Russia), where a battle was fought between the French under marshal Victor, duke of Belluno, and the Russians commanded by general Wittgenstein. The French were defeated after a desperate engagement, with the loss of 3000 men, Nov. 14, 1812.

* All persons at court who sought the favour of James, praised his *Demonologie*; and parliament, to flatter him, made its twelfth law against witchcraft in 1603. By this statute death was inflicted on sorcerers in these words: "If any person shall use any invocation or conjuration of any evil or wicked spirit,—shall entertain, employ, feed, or reward any evil or cursed spirit,—take up any dead body to employ in witchcraft, sorcery, or enchantment,—or shall practise, or shall exercise, any sort of witchcraft, sorcery, &c., whereby any person shall be killed, wasted, consumed, pined, or lamed." This being the law of the land, no person presumed to doubt the existence of witchcraft; hence Shakespeare gave countenance to the error, and the learned bishop Hall mentions a place where, he said, there were more witches than houses. Allaying of ghosts, driving out evil spirits, and abjuring witches, became in consequence, for a century a profitable employment to the clergy of all denominations. Witch-finders existed, too, as public officers; and besides the public executions which disgraced every assizes, multitudes of accused were destroyed by popular resentment. *Phillips*.

WITNESSES. The evidence of two witnesses required to attain for high treason, 25 Edw. III. 1352. In civil actions between party and party, if a man be subpoenaed as a witness on a trial, he must appear in court on pain of 100*l.* to be forfeited to the king, and 10*l.*, together with damages equivalent to the loss sustained by the want of his evidence to the party aggrieved. Lord Ellenborough ruled that no witness is obliged to answer questions which may tend to degrade himself, Dec. 10, 1802. New act relating to the examination of witnesses passed 13 Geo. III. 1773. Act to enable courts of law to order the examination of witnesses upon interrogations and otherwise, 1 Will. IV. March 30, 1831.

WIVES. See *Marriage*. By the Divorce and Matrimonial Causes act, passed in 1857, the condition of married women has been much benefited. When ill-used they can obtain a divorce or judicial separation; and while in the latter state any property they may acquire is secured to them personally, as if unmarried. By another act passed in 1857, they are enabled to dispose of reversionary interests in personal property or estates.

WIVES' POISON, or WATER TOFANO. See *Poisoning*.

WOLVES were once very numerous in England. Their heads were demanded as a tribute, particularly 300 yearly from Wales, by king Edgar, A.D. 961, by which step they were said to be totally destroyed. *Carte*. This statement is now doubted. Edward I. issued his mandate for the destruction of wolves in several counties of England, A.D. 1289. Ireland was infested by wolves for many centuries after their extirpation in England; for there are accounts of some being found there so late as 1710, when the last presentment for killing wolves was made in the county of Cork. Wolves still infest France, in which kingdom 834 wolves and cubs were killed in 1828-9. When wolves cross a river, they follow one another directly in a line, the second holding the tail of the first in its mouth, the third that of the second, and so of the rest. This figure was, on this account, chosen by the Greeks to denote the year, composed of twelve months following one another, which they denoted *Lycabas*, that is, the march of the wolves. *Abbé Pluche*.

WONDERS OF THE WORLD, THE SEVEN. 1. The pyramids of Egypt. 2. The mausoleum or tomb built for Mausolus, king of Caria, by Artemisia, his queen. 3. The temple of Diana at Ephesus. 4. The walls and hanging-gardens of the city of Babylon. 5. The vast brazen image of the sun at Rhodes, called the Colossus. 6. The rich statue of Jupiter Olympus. 7. The pharos or watch-tower, built by Ptolemy Philadelphus, king of Egypt. See them severally.

WOOD-CUTS. See *Engraving on Wood*.

WOOD'S HALF-PENCE. Wood's celebrated patent for coining half-pence for circulation in Ireland and America, passed 9 Geo. I. 1722-3. Against this project, Dr. Jonathan Swift appeared in the character of the *Drapier*, and his letters raised such a spirit against Wood, that he was effectually banished the kingdom. *Burns*. The half-pence were assayed in England by sir Isaac Newton, and proved to be genuine, in 1724.

WOODEN PAVEMENT, notwithstanding its expensiveness, and perishable nature, seemed at one time likely to supersede every other species of pavement in the principal streets and great thoroughfares of London. A wooden pavement was laid down at Whitehall in 1839; and it was followed by similar paving in Oxford-street, part of the Strand, Cheapside, High-street, Holborn, the Old Bailey, Coventry-street, Lincoln's-inn, the Admiralty, and various other streets and places. This pavement did not answer the expectations of its advocates, and has been nearly all taken up.

WOODSTOCK (Oxfordshire). In Woodstock, now Blenheim-park, originally stood a royal palace, the favourite retreat of our kings of England, from the Saxon times till the reign of Charles I., when it was almost wholly in ruins. King Ethelred held a parliament at Woodstock palace; and there Alfred the Great translated *Boetius de Consolatione Philosophiæ*, 888. Henry I. beautified the palace; and here resided Rosamond, mistress of Henry II. 1191. Edmund, second son of Edward I., was born at this palace; also Edward, eldest son of Edward III. 1330; and here the princess Elizabeth was confined by her sister Mary, 1554. A splendid mansion, built at the expense of the nation, for the duke of Marlborough, was erected here to commemorate the victory he obtained at Blenheim, in 1704. At that time every trace of the ancient edifice was removed, and two elms were planted on its site. See *Rosamond*.

WOOL. From the earliest times down to the reign of queen Elizabeth the wool of Great Britain was not only superior to that of Spain, but accounted the finest in the universe; and even in the times of the Romans a manufacture of woollen cloths was established at Winchester for the use of the emperors. *Anderson*. In later times, wool was manufactured

in England, and is mentioned A.D. 1185, but not in any quantity until 1331, when the weaving of it was introduced by John Kempe and other artisans from Flanders. This was the real origin of our now unrivalled manufacture, 6 Edw. III. 1331. *Rymer's Federa.*

Duties on exported wool were levied by Edw. I. 1275
The exportation prohibited 1337
Staples of wool established in Ireland, at Dublin, Waterford, Cork, and Drogheda, 18 Edw. III. 1343
Sheep were first permitted to be sent to Spain, which has since injured our manufacture. *Stora* 1467
First legislative prohibition of the export of wool from Ireland 1521
The exportation of English wool, and the importation of Irish wool into England, prohibited 1696
The export forbidden by act passed 1718

Bill to prevent the running of wool from Ireland to France 1738
The duty on wool imported from Ireland taken off 1739
Wool-combers' act, 35 Geo. III. 1794
The non-exportation law was repealed, 5 Geo. IV. 1824
In 1851 we imported 83,311,975 lbs. of wool and alpaca; in 1856, 116,211,392 lbs.; in 1859, 133,284,634 lbs.; in 1861, 147,172,841 lbs.
We imported from Australia, in 1842, 12,979,856 lbs.; in 1856, 56,052,139 lbs.; in 1859, 53,700,542 lbs.; in 1861, 68,566,222 lbs.

WOOLLEN CLOTH. This manufacture was known, it is supposed, in all civilized countries, in very remote ages. Woollen cloths were made an article of commerce in the time of Julius Cæsar, and are familiarly alluded to by him. They were made in England before A.D. 1200, and the manufacture became extensive in the reign of Edward III., 1331. They were then called Kendal cloth, and Halifax cloth. See *preceding article.*

A kind of blankets were first made in England: *Camden* about A.D. 1340
No cloth but of Wales or Ireland to be imported into England 1463
The art of dyeing brought to England. See *Dyeing* 1608
Medleys, or mixed broad-cloth, first made 1614
Manufacture of fine cloth began at Sedan, in France, under the patronage of cardinal Mazarine 1646
British and Irish woollens prohibited in France 1677
All persons obliged to be buried in woollen, and the persons directing the burial otherwise to

forfeit 5*l.*, 29 Chas. II. 1678
The manufacture of cloth greatly improved in England by Flemish settlers 1688
Injudiciously restrained in Ireland, 11 Will. III. 1698
The exportation from Ireland wholly prohibited, except to certain ports of England 1701
English manufacture encouraged by 10 Anne, 1712, and 2 Geo. I. 1715
Greater in Yorkshire in 1785 than in all England at the revolution. *Chalmers.*

WOOL-COMBERS. The journeymen wool-combers, in several parts of England, have a grand procession, in commemoration of the renowned bishop Blaize. This bishop is reported to have discovered the art of combing wool. He is said to have visited England; and St. Blazy, a village in Cornwall, is celebrated for having been his landing-place, and from him it derives its name. He was bishop of Sebastia, in Armenia, adjacent to the south-east part of the Black Sea, and suffered martyrdom by decapitation in the Diocletian persecution, in the year 289. The processions take place on Feb. 3, every year.

WOOLSACK, the seat of the lord high chancellor of England in the house of lords, is so called from its being a large square bag of wool, without back or arms, covered with red cloth. Wool was the staple commodity of England in the reign of Edward III., when the woolsack first came into use.

WOOLWICH (Kent), the most ancient military and naval arsenal in England, and celebrated for its royal dockyard, where men-of-war have been built as early as the reign of Henry VIII. 1512, when the Harry Grace de Dieu was constructed. Here she also was burnt in 1552. The royal arsenal was formed about 1720, on the site of a rabbit-warren; it contains vast magazines of great guns, mortars, bombs, powder, and other warlike stores; a foundry, with several furnaces, for casting ordnance; and a laboratory, where fireworks, cartridges, grenades, &c. are made for the public service. The Royal Military Academy was erected in the royal arsenal, but the institution was not completely formed until 19th Geo. II. 1745. The arsenal, storehouses, &c. burnt, to the value of 200,000*l.* May 20, 1802. Another great fire occurred June 30, 1805. Fatal explosion of gunpowder, Jan. 20, 1813. The hemp-store burnt down, July 8, 1813. Another explosion by gunpowder, June 16, 1814. About 10,000 persons are now employed in Woolwich arsenal.

WORCESTER was successively an important Welsh, Roman, and Saxon town. It was burnt by the Danes 1041, for resisting the tribute called Danegelt. William I. built a castle 1090. The city was frequently taken and retaken during the civil wars of the middle ages. —The **BISHOPRIC** was founded by Ethelred, king of the Mercians, A.D. 680, and taken from the see of Lichfield, of which it composed a part. The married priests of the cathedral were displaced, and monks settled in their stead, 964. The church was rebuilt by Wolstan, 25th bishop, 1030. The see has yielded to the church of Rome four saints, and to the English nation five lord chancellors and three lord treasurers. It is valued in the king's books at 1049*l.* 16*s.* 3*d.* per annum. Present income, 5000*l.*

RECENT BISHOPS OF WORCESTER.

1781. Richard Hurd, died May 28, 1808.
1808. Folliott H. Cornwall, died Sept. 5, 1831.
1831. Robert James Carr, died April 24, 1841.

1841. Henry Pepys, died Nov. 13, 1860.
1860. Henry Philpott (PRESENT bishop, 1862).

WORCESTER, BATTLE OF, Sept. 3, 1651. A large body of Scots had marched into England, to reinstate Charles II., but Cromwell signally defeated them; the streets of the city were strewn with the dead, the whole Scots army having been either killed or taken prisoners. This famous battle afforded Cromwell what he called his *crowning mercy*. Charles with difficulty escaped to France. More than 2000 of the royalists were slain, and of 8000 prisoners most were sold as slaves to the American colonists.

WORKING MEN'S COLLEGES. The first was established in Sheffield, by workmen. The second, in London, by the rev. professor Frederic D. Maurice, as principal, in Oct. 1854; a third in Cambridge, and, in 1855, a fourth in Oxford; all, wholly for the working classes, and undertaking to impart such knowledge as each man feels he is most in want of. The colleges engage to find a teacher, wherever 10 or 12 members agree to form a class; and also to have lectures given. There were eleven classes in 1856; Mr. Ruskin gave lessons in drawing. These colleges have been found to be self-supporting.

WORLD. See *Creation* and *Globe*.

WORMS, a city on the Rhine, in Hesse Darmstadt. Here Charlemagne resided in 806 B.C. Several imperial diets have been held at Worms, where was held the imperial diet before which Martin Luther was summoned, April 4, 1521, and by which he was proscribed. Luther was met by 2000 persons on foot and on horseback, at the distance of a league from Worms. Such was his conviction of the justice of his cause, that when Spalatin sent a messenger to warn him of his danger, he answered, "If there were as many devils in Worms as there are tiles upon the roofs of its houses, I would go on." Before the emperor, the archduke Ferdinand, six electors, twenty-four dukes, seven margraves, thirty bishops and prelates, and many princes, counts, lords, and ambassadors, Luther appeared, April 17th, in the imperial diet, acknowledged all his writings and opinions, and left Worms in fact a conqueror. Yet to save his life, he remained in seclusion under the protection of the elector of Saxony for about a year.

WORSHIP. The first worship mentioned is that of Abel, 3872 B.C. *Gen.* iv. "Men began to call on the name of the Lord," 3769 B.C. *Gen.* iv. The Jewish order of worship was set up by Moses, 1490 B.C. Solomon consecrated the temple, 1004 B.C. To the corruptions of the simple worship of the patriarchs all the Egyptian and Greek idolatries owed their origin.—Athotes, son of Menes, king of Upper Egypt, is supposed to be the *Copt* of the Egyptians, and the *Toth*, or *Hermes*, of the Greeks, the *Mercury* of the Latins, and the *Teutates* of the Celts or Gauls, 2112 B.C. *Usher*.

WORSHIP IN ENGLAND. The Druids were the priests here, at the invasion of the Romans (55 B.C.), who eventually introduced Christianity. This latter were almost extirpated by the victorious Saxons (455-820), who were pagans. The Roman Catholic form of Christianity was introduced by Augustine, 596, and continued till the Reformation, *which see*.

PLACES OF WORSHIP IN ENGLAND AND WALES IN 1851.

	Places of Worship. Sittings.			Places of Worship. Sittings.	
Church of England	14,077	5,317,915	New Church (Swedenborgians)	50	12,107

See *Wesleyan Methodists*: note.

WORSTED. A species of woollen fabric, being spun wool, which obtained its name from having been first spun at a town called Worsted, in Norfolk, in which the inventor lived, and where manufactures of worsted are still extensively carried on, 14 Edw. III. 1340. *Anderson*. "A Worsted-stocking Knave" is a term of reproach or contempt used by Shakspeare.

WORTHIES, NINE, a term long ago given to the following eminent men :

<i>Jews.</i>	<i>Died.</i>	<i>Heathens.</i>	<i>Died.</i>	<i>Christians.</i>	<i>Died.</i>
Joshua	B.C. 1426	Hector of Troy	B.C. 1184	King Arthur of Britain	A.D. 542
David	1015	Alexander the Great	323	Charlemagne of France	814
Judas Maccabæus	161	Julius Cæsar	44	Godfrey of Bouillon	1100

In Shakspeare's *Love's Labour's Lost*, act v. sc. 2, Hercules and Pompey appear as worthies.

WOUNDING. Malicious wounding of another was adjudged death by the English statutes. The Coventry act was passed in 1671. See *Coventry Act*. By the statute, usually called lord Ellenborough's act, persons who stab or cut with intent to murder, maim, or disfigure another are declared guilty of felony without benefit of clergy. Those guilty of maliciously shooting at another in any dwelling-house, or other place, are also punishable under the same statute in the same degree, 43 Geo. III. 1802. This offence is met by some later statutes, particularly the act for consolidating and amending the acts relating to offences against the person, 9 Geo. IV. June, 1828. This last act is extended to Ireland by 10 Geo. IV. 1829. An act for the prevention of maliciously shooting, stabbing, &c. in Scotland, 6 Geo. IV. 1825; amended by 10 Geo. IV. June 4, 1829. 16 & 17 Vict. c. 30, 1853, was passed for the prevention and punishment of assaults on women and children.

WRECKS OF SHIPPING. The loss of merchant and other ships by wreck upon lee-shores, coasts, and disasters in the open sea, was estimated at Lloyd's, in 1800, to be about an average of 365 ships a year. In 1830, it appeared by *Lloyd's Lists*, that 677 British vessels were totally lost, under various circumstances, in that year. The number of British vessels wrecked in 1848, was, sailing vessels, 501; steamers, 13; tonnage, 96,920. In 1851 there were wrecked 611 vessels, of which number eleven were steamers; the tonnage of the whole being 111,976 tons. The year 1852-3, particularly the winter months (Dec. and Jan.), was very remarkable for the number of dreadful shipwrecks and fires at sea; but a few of them are recorded. Many vessels were lost in the great storms Oct. 25, 26, 1859, May 28, 1861, Oct. 19, 20, 1861, and Nov. 13, 14, 1862.

souls perished March 13, —
Menai ferry-boat, in passing the Strait: 60
drowned Dec. 5, 1785
Halsewell East Indiaman; 100 persons perished
Jan. 6, 1786
Hartwell East Indiaman, with immense wealth
on board May 24, 1787
Charlont Packet, from Holyhead to Dublin;
104 drowned Dec. 22, 1790
Pandora frigate, on a reef of rocks; 100 souls
perished Aug. 28, 1791
Union packet of Dover, lost off the port of
Calais; a similar occurrence had not hap-
pened for 105 years before Jan. 28, 1792
Winterton East Indiaman; many perished,
Aug. 20, —
Impétueux, 74 guns, burnt at Portsmouth Aug. 24, —
Scorpion, 44 guns, burnt at Leghorn Nov. 20, 1793
Ardent, 64 guns, burnt off Corsica April, 1794
Boyne, by fire, at Spithead (see *Boyne*) May 4, 1795
Courageux, 74 guns, capt. B. Hallowell, near
Gibraltar; crew, except 124, perished Dec. 18, 1796
La Tribune, 36 guns, off Halifax; 300 souls
perished Nov. 16, 1797
Resistance, blown up in the Straits of Banca
July 24, 1798
Royal Charlotte East Indiaman, blown up at
Culpee Aug. 1, —
Colossus, 74 guns, wrecked off coast of Sicily;
crew saved Dec. 10, —
Proserpine frigate, in the river Elbe; 15 lives
lost Feb. 1, —
Lutine, 36 guns, wrecked off the Vliet island,
coast of Holland; only two men saved, Oct. 9, 1799
Impregnable, 98 guns, wrecked between Lang-
stone and Chichester Oct. 19, —
Sceptre, 64 guns, wrecked in Table Bay, Cape of
Good Hope; 291 of the crew perished —
Nassau, 64 guns, on the Haak Bank; 100
perished Oct. 25, —
Blithion frigate, 38 guns, on the Penmarks
Dec. 24, —
Queen transport, on Trefusis Point; 369 souls
perished Jan. 14, 1800
Mustiff gunbrig, lost on the Cockle Sands
Jan. 19, —
Repulse, 64 guns, off Ushant March 10, —
Queen East Indiaman, by fire, on coast of Brazil
July 9, —
Marlborough, 74 guns, near Belle-isle; crew
saved Nov. 4, —
Invincible, 74 guns, near Yarmouth; capt. John
Rennie and the crew, except 126 souls,
perished March 16, 1801
Margate, Margate-boat, near Reculver; 23 per-
sons perished Feb. 10, 1802
Assistance 50 guns, off Dunkirk; crew saved,
March 29, —
Bangalore East Indiaman, in the Indian Sea,
April 12, —
Melville Dutch East Indiaman, off Dover, Nov. 23,
Active West Indiaman, in Margate Roads, Jan. 10,
Hindustan East Indiaman, went to pieces on the
Calfivers Jan. 11, —
La Déterminée, 24 guns, in Jersey Roads: many
drowned March 26, —
Resistance, 36 guns, off Cape St. Vincent, May 31,
Lady Hobart packet, on an island of ice, June 28, —
Saine frigate, 44 guns, off Schelling, in Holland,
July 31, —
Antelope, captain Wilson, off the Pelew Islands,
Aug. 9, —
Victory Liverpoolship, at Liverpool; 27 drowned,
Sept. 30, —
Circé frigate, 32 guns, on the coast near Yar-
mouth Nov. 16, —
Nautilus East Indiaman, on the Ladrões,
Nov. 18, —
Fanny, in the Chinese Sea: 46 souls perished,
Nov. 29, —
Suffisante sloop-of-war, 16 guns, off Cork harbour,
Dec. 25, —
Apollo frigate, on coast of Portugal April 1, 1804
Cumberland Packet, on the coast of Antigua,
Sept. 4, —
Romney, 50 guns, on Haak Bank, Texel, Nov. 18,
Venerable, 74 guns, at Torbay; lost 8 men, Nov. 24,
Severn, on a rock, near Grouville Dec. 21, —
Doris frigate, on the Diamond Rock, Quiberon
Bay Jan. 12, 1805
Abergavenny East Indiaman, on the Bill of Port-
land: the captain and more than 300 persons,
passengers and crew, perished Feb. 6, —
Naias transport, on the coast of Newfoundland,
Oct. 23, —
Xenias transport, off Newfoundland; 340 per-
ished Oct. 23, —
Aurora transport, on the Goodwin Sands; 300
perished Dec. 21, —
King George packet, from Park-gate to Dublin,
lost on the Hoyle bank; 125 persons, pas-
sengers and crew, drowned Sept. 21, 1806
Athenien, 64 guns, near Tunis; 347 souls
perished Oct. 27, —
Glasgow packet, off Farm Island; several
drowned Nov. 17, —
Felice, 12 guns, near Santander; 79 souls lost,
Jan. 22, 1807
Blenheim, 74 guns, admiral sir T. Troubridge,
and *Juwa*, 32 guns, foundered near isle of
Rodriguez, East Indies Feb. 1, —
Ajax, 74 guns, by fire, off the island of Tene-
dos; 250 perished Feb. 14, —
Blanche frigate, on the French coast; 45 men
perished March 4, —
Gianges East Indiaman, off the Cape of Good
Hope May 20, —
Prince of Wales Park-gate packet, and *Rochdale*
transport, on Danleary point, near
Dublin; nearly 300 souls perished Nov. 19, —
Boreas man-of-war, upon the Hannois
Rock in the Channel Nov. 28, —
Anson, 44 guns, wrecked in Mount's Bay; 60
lives lost Dec. 29, —
Agatha, near Menel; lord Rorston and others
drowned April 7, 1808
Astrea frigate, 32 guns, on the Anagada coast,
May 23, —
Frith passage-boat, in the Frith of Dornoch;
40 persons drowned Aug. 13, 1809
Foxhound, 18 guns, foundered on passage from
Halifax; crew perished Aug. 31, —

<i>Reliance</i> East Indianman, from China to London, off Merlemont, near Boulogne: of 116 persons on board, seven only were saved . . . Nov. 13, —	—
<i>Hamilton</i> , on the Gunfleet sands, near Harwich; 11 of the crew perished . . . Nov. 15, —	—

WRECKS OF SHIPPING, *continued.*

- Conqueror* East Indiaman, homeward bound; near Boulogne; crew and passengers lost, Jan. 13, 1843
- Jessie Logan* East Indiaman, on the Cornish coast; many lives lost Jan. 16, —
- Solway*, royal mail steamer, near Corunna; 28 lives lost, and the mail April 7, —
- Queen Victoria* East Indiaman, from Bombay to Liverpool, off the Rodrigues April 7, —
- Catharine* trader, blown up off the Isle of Pines: most of the crew were massacred by the natives, or afterwards drowned April 12, —
- Amelia Thompson*, near Madras, part of crew saved May 23, —
- H.M.S. Fantome* of 16 guns, off Montevideo, June 25, —
- Albert* troop ship, from Halifax, with the 64th regiment on board, which was miraculously saved July 13, —
- Pegasus* steam-packet, from Leith; off the Fern Islands; of 59 persons, 7 only were saved, July 19, —
- [Mr. Elton, a favourite actor, was among the sufferers.]
- Missouri*, United States steam-frigate, by fire Aug. 27, —
- Queen* steamer from Bristol, with many passengers on board; nearly the whole saved, Sept. 1, —
- Phoenix*, in a terrific snow-storm, off the coast of Newfoundland; many lives were lost, Nov. 26, —
- H.M. frigate Wilberforce*, on the coast of Africa, Feb. 2, 1844
- Elberfeldt* iron steam-ship, from Brielle, Feb. 22, —
- Manchester* steamer, from Hull to Hamburg, off the Vogel Sands, near Cuxhaven; about 30 lives lost June 16, —
- Margaret*, Hull and Hamburg steamer; many lives lost Oct. 22, 1845
- Osprey*, H.M. sloop of war, off New Zealand, March 11, 1846
- Great Britain*, iron steam-ship, grounded in Dundrum bay. (See *Great Britain*.) Sept. 22, —
- [Recovered by Brunel, &c., Aug. 27, 1847.]
- John Lloyd*, by collision, in the Irish sea; several lives lost Sept. 25, —
- Tweed* West India mail packet; about 90 souls perished Feb. 19, 1847
- Exmouth*, emigrant ship, from Londonderry to Quebec; of 240 persons on board, nearly all were drowned April 28, —
- Ocean Monarch*, by fire. (See *Ocean Monarch*.) Aug. 24, 1848
- Caleb Grimshaw*, emigrant ship, by fire; 400 persons miraculously escaped Nov. 12, 1849
- Royal Adelaide* steamer, wrecked on the Tongue Sands, off Margate, above 400 lives lost March 30, 1850
- Mary Florence*, from London to Aden June 3, —
- Orion* steam-ship, off Fortpatrick. (See *Orion*.) June 18, —
- Manchester*, *Ariadne*, and *Neriad*, three Indiamen, July or August; date unknown —
- Rosalind*, from Quebec; a number of the crew drowned Sept. 9, —
- La Polka* steamer, off St. Helier's, Jersey; crew and passengers saved Sept. 16, —
- Edmund*, emigrant ship, with nearly 200 passengers from Limerick to New York (of whom more than one-half perished), wrecked off the Western coast of Ireland Nov. 12, —
- Amazon* West India mail steamer. (See *Amazon*.) Jan. 4, 1852
- Birkenhead* troop-ship. (See *Birkenhead*.) Feb. 26, —
- Marianna* Austrian ship, from Venice to Trieste, escorting the *Volta*, the latter having the emperor of Austria on board. A violent bore separated the vessels; the *Volta* succeeded with great difficulty in reaching Rovigno; but the *Marianna* was wrecked, and every soul perished March 4, 1852
- Victoria* steam-packet. (See *Victoria* steam-packet.) Nov. 8 and 9, —
- Lily*, stranded and blown up by gunpowder, on the Calf-of-Man; by which more than 30 persons lost their lives Dec. 24, —
- St. George* steam-ship, bound from Liverpool to New York, with 121 emigrant passengers (chiefly labouring Irish), and a crew consisting of twenty-nine seamen (the captain inclusive), was destroyed by fire at sea. The crew and seventy of the passengers were saved by the American ship *Orlando*, and conveyed to Havre, in France; but the remainder, fifty-one souls, are supposed to have perished, Dec. 24, —
- Queen Victoria* steam-ship, bound from Liverpool, was wrecked off the Bailey lighthouse, near Dublin; she mistook her course in a snow-storm; 67 lives were lost out of 120, Feb. 15, 1853
- Independence*, with a host of passengers on the coast of Lower California, and which afterwards took fire; 140 persons were drowned or burnt to death, a few escaping, who underwent the most dreadful additional sufferings on a barren shore Feb. 16, —
- Duke of Sutherland* steamer from London to Aberdeen; wrecked on the back of the pier at Aberdeen, and the captain (Hoskins) and many of the crew and passengers perished, April 2, —
- Rebecca*, on the west coast of Van Diemen's Land; the captain (Shepherd) and many lives lost April 29, —
- William and Mary*, an American emigrant ship, near the Bahamas. She struck on a sunken rock; about 170 persons perished May 3, —
- Aurora*, of Hull; sailed for New York, April 26, and foundered; about 25 lives lost May 20, —
- Bourneuf*, Australian emigrant vessel. Struck on a reef near Torres Straits. The captain (Bibby) and six lives lost Aug. 3, —
- Annie Jane*, of Liverpool, an emigrant vessel, driven on shore on the Barra Islands on west coast of Scotland; about 348 lives lost Sept. 29, —
- Harewood*, brig, by collision with the *Trident* steamer, near the Mouse light near the Nore; foundered with six of the crew, who perished, Oct. 5, —
- Dalhousie*, foundered off Beachey Head. The captain (Butterworth), the passengers, and all the crew (excepting one), about 60 persons in all, perished. The cargo was valued at above 100,000. Oct. 19, —
- Marshall*, screw steamer, in the North Sea, ran into the barque *Woodhouse*; about 48 persons supposed to have perished Nov. 28, —
- Taylor*, emigrant ship, driven on the rocks off Lambay island, north of Howth; about 380 lives lost Jan. 20, 1854
- Arctic*, U. S. mail-steamer, by collision in a fog with the *Vesta* French steamer off Newfoundland; above 300 lives lost Sept. 27, —
- Favourite*, in the channel, on her way from Bremen to Baltimore, came into violent contact with the American barque *Hesper*; off the Start, and immediately went down; 201 persons were drowned April 29, —
- Lady Nugent*, troop ship, sailed from Madras, May 10, 1854; foundered in a hurricane; 350 rank and file of the Madras light infantry, officers and crew, in all 400 souls, perished, May, —
- Forerunner*, African mail-steamer, struck on a sunken rock off St. Lorenzo, Madeira, and went down directly afterwards, with the

WRECKS OF SHIPPING, continued.

total loss of ship and mails, and 14 lives,	Oct. 25, 1854	less, after a fearful struggle, the vessel arrived at the Mauritius, Nov. 21, without losing a single life	Nov. 11-21, 1857
<i>Nile</i> , iron screw-steamer, struck on the Godevry rock, St. Ives' Bay, and all on board perished	Nov. 30, —	<i>Windsor</i> , emigrant ship, struck on a reef near the Cape de Verde Islands	Dec. 1, —
<i>City of Glasgow</i> , a Glasgow steamer, with 480 persons on board, disappeared in	Nov. 30, —	<i>Ava</i> , Indian mail steamer, with ladies and others from Lucknow on board; wrecked near Ceylon	Feb. 16, 1858
In the storm which raged in the Black Sea, Nov. 13-16, 1854, eleven transports were wrecked and six disabled. The new steamship <i>Prince</i> was lost with 144 lives, and a cargo worth 500,000 <i>l.</i> indispensable to the army in the Crimea. The loss of life in the other vessels is estimated at 340.	—	<i>Eastern City</i> , burnt about the equator on her way to Melbourne; by great exertions all on board were saved	Aug. 23, 24, —
<i>George Canning</i> , Hamburg and New York packet, near the mouth of the Elbe; 96 lives lost, and <i>Sately</i> , English schooner, near Newwreck, in a great storm	Jan. 1, 1855	<i>Austria</i> , steam emigrant ship, burnt in the middle of the Atlantic. Of 538 persons on board, only sixty-seven were saved. This disaster was due to great carelessness (see <i>Austria</i>)	Sept. 13, —
<i>Mercury</i> , screw-steamer, by collision with a French ship; passengers saved	Jan. 11, —	<i>St. Paul</i> , captain Pennard, from Hong Kong to Sydney, with 327 Chinese emigrants, wrecked on the island of Rossel, Sept. 30, 1858. The captain and 8 of the crew left the island in search of assistance, and were picked up by the <i>Prince of Denmark</i> schooner. The French steamer <i>Stydz</i> was despatched to the island, and brought away one Chinese, Jan. 25, 1859. All the rest were massacred and devoured by the natives	—
<i>Janet Boyd</i> , bark, in a storm off Margate Sands; 28 lives lost	Jan. 20, —	<i>Czar</i> , steamer, wrecked off the Lizard, fourteen lives lost	Jan. 23, 1859†
<i>Will o' the Wisp</i> , screw-steamer, on the Burn Rock, off Lambay; all on board, 18 lives, lost	Feb. 9, —	<i>Eastern Monarch</i> , burnt at Spithead; out of 500, eight lives lost. The vessel contained invalid soldiers from India, who, with the crew, behaved admirably	June 2, —
<i>Morna</i> , steamer, on rocks near the Isle of Man; 21 lives lost	Feb. 25, —	<i>Alma</i> , steamer, grounded on a reef near Aden, Red Sea, about 35 miles from Mocha; all persons saved; after 34 days' exposure to the sun, without water, they were rescued by H. M. S. <i>Cyclops</i> : sir John Bowring, who was on board, lost valuable papers	June 12, —
<i>John</i> , emigrant vessel, on the Manacles rocks off Falmouth; 200 lives lost	May 1, —	<i>Argo</i> , Galway mail steamer, wrecked off the coast of Newfoundland; no lives lost, June 30, —	—
<i>Josephine Willis</i> , packet ship, lost by collision with the screw steamer <i>Mangerton</i> in the channel; about 70 lives lost	Feb. 3, 1856	<i>Paramatta</i> , fine new mail steamer, wrecked near St. Thomas's, West Indies; no lives lost, June 30, —	—
<i>John Rutledge</i> , from Liverpool to New York, ran on an iceberg and was wrecked; many lives lost	Feb. 20, —	<i>Admella</i> , steamer, running between Melbourne and Adelaide, struck on a reef; of about 72 persons, only 23 were saved; many perished through exposure to cold	Aug. 6, —
Many vessels and their crews totally lost*	Jan. 1-8, 1857	<i>Royal Charter</i> , screw steamer, captain Taylor, totally wrecked off Moelfre, on the Anglesea coast; 446 lives lost. The vessel contained gold amounting in value to between 700,000 <i>l.</i> and 800,000 <i>l.</i> ; much of this has been recovered	night of Oct. 25-26, —
<i>Violet</i> , royal mail-steamer, lost on the Goodwin; many persons perished	Jan. 5, —	<i>Indian</i> mail steamer, wrecked off coast of Newfoundland; out of 116, 27 lives lost	Nov. 21, —
<i>Tyne</i> , royal mail steamer, stranded on her way to Southampton from the Brazils	Jan. 13, —	<i>Blervie Castle</i> , sailed from London Docks for Adelaide; lost in the channel and all on board, 57 persons; last seen on	Dec. 25, —
<i>St. Andre</i> , screw steamer, totally wrecked near Latakia; loss about 145,000 <i>l.</i>	Jan. 29, —	<i>Northerner</i> steamer, wrecked on a rock near Cape Mendocino, between San Francisco and Oregon; 38 lives lost	Jan. 6, 1860
<i>Charlemagne</i> , iron clipper, wrecked by the coast of Canton; passengers saved; loss, about 110,000 <i>l.</i>	March 20, —	<i>Endymion</i> sailing-vessel, burnt in the Mersey; loss above 20,000 <i>l.</i>	Jan. 31, —
H. M. S. <i>Raleigh</i> , 50 guns, wrecked on south-east coast of Macao	April 14, —	Dreadful gales; and many wrecks on the coast,†	Feb. 15-19, —
<i>Catherine Adamson</i> , Australian vessel, wrecked, twenty-five miles from Sydney twenty lives lost	about June 3, —	<i>Ondine</i> steamer; lost through collision with the <i>Heroine</i> of Bideford, abreast of Beachy Head, the captain and about 50 persons perished	Feb. 19, —
H. M. S. <i>Transit</i> , wrecked on a reef in the Straits of Banca	July 10, —	<i>Hungarian</i> , new mail steamer, wrecked off	—
<i>Dunbar</i> clipper, wrecked on the rocks near Sydney; 121 persons, and cargo valued at 22,000 <i>l.</i> , lost; one person only saved, who was on the rocks thirty hours	Aug. 20, —		
<i>Sarah Sands</i> , an iron screw steamer, sailed from Port-mouth for Calcutta, in August, 1857; 300 soldiers on board. On Nov. 11, the cargo (government stores) took fire. By the exertions of colonel Moffat and captain Castle, the master of the vessel, who directed the soldiers and the crew, the flames were subdued, although a barrel of gunpowder exploded during the conflagration. A new danger then arose—the prevalence of a strong gale—water was shipped heavily where the port quarter had been blown out. Neverthe-			

* A large American vessel, *Northern Belle*, was wrecked near Broadstairs. The American Government sent 21 silver medals and 27*l.* to be distributed among the heroic boatmen of the place, who saved the crew. Jan. 5-6, 1857. †

† *Pomona*, an American ship, captain Merrihew; 419 persons on board, from Liverpool to New York, was wrecked on Blackwater Bank, through the master mistaking the Blackwater for the Tuskar light, only 24 persons saved, night of April 27-28, 1859.

† American barque *Lima*, with emigrants, wrecked off Barfleur; above 100 lives lost, Feb. 17, 1860. On the same rock, on Nov. 25, 1820, was wrecked the *Blanche Neff*, containing the children of Henry I. and a large number of attendants: in all 363 persons perished.

WRECKS OF SHIPPING, *continued.*

coast of Nova Scotia; all on board (205) lost, on the night of Feb. 19-20, 1860*	<i>Juanita</i> , wrecked through collision with an American vessel, <i>Joseph Fish</i> , 13 lives lost, March 15, 1861
<i>Nimrod</i> , steamer, wrecked on rocks near St. David's head; 40 lives lost Feb. 28, —	<i>Canadian</i> , steamer, struck on a field of ice in the straits of Belle-isle, and foundered in half an hour; 35 lives lost June 4, —
<i>Malabar</i> , iron ship, on her way to China, with lord Elgin and Baron Gros: wrecked off Point de Galle, Ceylon. The ambassadors displayed much heroism: no lives lost. Of much specie sunk, a good deal was recovered. May 22, —	H. M. S. <i>Conqueror</i> , stranded on Rum Cay, near Bahamas, and lost (the captain and master were censured for neglect of duty) Dec. 28, —
<i>Arctic</i> , Hull steamer, wrecked off Jutland; many persons saved by Mr. Earle, who lost his own life while endeavouring to save others, Oct. 5, —	<i>Harmony</i> , lost with all hands off Plymouth, Feb. 27, 1862
<i>Connaught</i> , steamer, burnt; crew saved through the gallantry of the crew of an American brig, Oct. 7, —	<i>Lotus</i> merchantman, off Chale Bay, in the great storm; crew all lost except two Oct. 19, —

WRITING. Pictures were undoubtedly the first essay towards writing. The most ancient remains of writing which have been transmitted to us, are upon hard substances, such as stones and metals, used by the ancients for edicts, and matters of public notoriety. *Athotes*, or *Hermes*, is said to have written a history of the Egyptians, and to have been the author of the hieroglyphics, 2112 B.C. *Usher*. Writing is said to have been taught to the Latins by Europa, daughter of Agenor, king of Phœnicia, 1494 B.C. *Thucydides*. Cadmus, the founder of Cadmea, 1493 B.C. brought the Phœnician letters into Greece. *Vossius*. The commandments were written on two tables of stone, 1491 B.C. *Usher*. The Greeks and Romans used waxed table-books, and continued the use of them long after papyrus was known.† See *Papyrus*, *Parchment*, *Paper*. Astle's "History of Writing" was first published in 1784.

WROXETER, in Shropshire, the Roman city *Uriconium*. Roman inscriptions, ruins, seals, and coins were found here in 1752. Some new discoveries having been made, a committee for further investigation met at Shrewsbury on Nov. 11, 1858. Excavations were commenced in Feb. 1859, which were continued till May. Large portions of the old town were discovered; also specimens of glass and pottery, personal ornaments and toys, household utensils and implements of trade, cinerary urns, and bones of man and of the smaller animals. A committee was formed in London in Aug. 1859 with the view of continuing these investigations, which were resumed in 1861, through the liberality of B. Botfield, M.P.

WURTEMBERG, originally part of Swabia, was made a county in 1297, and a duchy in 1495. The dukes were Protestants until 1772, when the reigning prince became a Roman Catholic. Wurtemberg has been repeatedly traversed by hostile armies, particularly since the revolution of France. Moreau made his celebrated retreat, Oct. 23, 1796. The political constitution is dated Sept. 25, 1819. Population of Wurtemberg in Dec. 1861, 1,720,708; of Stuttgart, the capital, 51,655.

DUKES.

1495. Eberhard I.	1795. Frederic Eugene makes peace with France, 1796.
1496. Eberhard II.	1797. Frederic II. marries the princess royal of England, May 18; made elector of Germany, 1803; acquired additional territories, and the title of king in 1805.
1498. Ulrich; deprived of his states by the emperor Charles V.; recovers them in 1534.	
1550. Christopher the Pacific.	
1568. Louis.	
1593. Frederic I.	
1608. John Frederic; joined the Protestants in the thirty years' war.	
1628. Eberhard III.	
1674. William Louis.	
1677. Eberhard Louis; served under William III. in Ireland; and with the English armies on the continent.	
1733. Charles Alexander.	
1737. Charles Eugene.	
1793. Louis Eugene (joins in the war against France).	

KINGS.

1805. Frederic I. supplies a contingent to Napoleon's Russian army; yet joined the allies at Leipsic in 1813. Died in 1816.	
1816. William I., Oct. 30 (born Sept. 27, 1781). He abolished serfdom in 1818; instituted representative government in 1819; entered into a concordat with Rome in 1857 (the oldest living sovereign, 1862).	
<i>Heir</i> : Prince Charles, his son, born March 6, 1823.	

WURZBURG, in Bavaria. This territory was formerly a bishopric, and its sovereign was one of the greatest ecclesiastic princes of the empire; but it was given as a principality

* *Luna*, American emigrant vessel, wrecked on rocks off Bardfleur; about 100 lives lost, Feb. 19, 1860. *Lady Elgin*, an American steamer, sunk through collision with schooner *Augusta* on Lake Michigan; of 385 persons on board, 287 were lost, including Mr. Herbert Ingram, M.P., founder of the "Illustrated London News," and his son: morning of Sept. 8, 1860.

† "I would check the petty vanity of those who slight good penmanship, as below the notice of a scholar, by reminding them that Mr. Fox was distinguished by the clearness and firmness, Mr. Professor Porson by the correctness and elegance, and sir William Jones by the ease and beauty of the characters they respectively employed."—*Dr. Parr*.

to the elector of Bavaria in 1803; and by the treaty of Presburg, in 1805, it was ceded to the archduke Ferdinand of Tuscany, whose electoral title was transferred from Salzburg to this place. In 1814, however, this duchy was again transferred to Bavaria, in exchange for the Tyrol, and the archduke Ferdinand was reinstated in his Tuscan dominions. Ministers from the second-rate German states met at Wurtzburg to promote union amongst them, Nov. 21—27, 1859.

WURTZCHEN. See *Bautzen*.

X.

XACCA, the mythological founder of idolatry in the Indies and eastern countries: the history of his life reports, that when his mother was *enceinte* with him, she dreamt that she brought forth a white elephant, which is the reason the kings of Siam, Tonquin, and China have so great a value for them. The Brahmins affirm that Xacca has gone through a metempsychosis 80,000 times, and that his soul has passed into so many different kinds of beasts, whereof the last was a white elephant: they add that, after all these changes, he was received into the company of the gods.

XANTHICA, a festival observed by the Macedonians in the month called Xanthicus (our April). It was then usual to make a lustration of the army with great solemnity and pomp; the soldiery were freed from restraint, and had mimic battles, and the people indulged in great excesses and licentiousness; instituted 392 B.C.

XANTHUS, in Lycia, Asia Minor, was besieged by the Romans under Brutus, 42 B.C. After a great struggle, and the endurance of many privations, the inhabitants resolved not to survive the loss of their liberty, set fire to their city, destroyed their wives and children, and perished in the conflagration. The conqueror wished to spare them; but though he offered rewards to his soldiers if they brought any of the Xanthians into his presence, only 150 were saved, much against their will. *Plutarch*.

XENOPHON. See *Retreat of the Greeks*.

XERES DE LA FRONTERA (S.W. Spain), the *Asta Regia* of the Romans, and the seat of the wine-trade in Spain, of which the principal wine is that so well known in England as Sherry, an English corruption of Xeres. The British importations of this wine are now immense; in the year 1850 they reached to 3,826,785 gallons; and in the year ending Jan. 5, 1852, they amounted to 3,904,978 gallons; exceeding the quantity imported from any other country, not excepting the wines of Portugal. Xeres is a handsome and large town, of great antiquity, and very populous. At the battle of Xeres, July 19-26, 711, Roderic, the last Gothic sovereign of Spain, was defeated and slain by the Saracens, commanded by Tarik and Muza.

XERXES' CAMPAIGN. Xerxes having crossed the Hellespont (the strait which joins the Archipelago and the Sea of Marmora) by a bridge,* entered Greece in the spring of 480 B.C., with an army which, together with the numerous retinue of servants, eunuchs, and women that attended it, amounted (according to some historians) to 5,283,220 souls. Herodotus states the armament to have consisted of 3000 sail, conveying 1,700,000 foot, besides cavalry and the mariners and attendants of the camp. This multitude was stopped at Thermopylae (*which see*) by the valour of 300 Spartans under Leonidas, Aug. 7-9, 480 B.C. The fleet of Xerxes was defeated at Artemisium and Salamis, Oct. 20, 480 B.C.; and he hastened back to Persia, leaving behind Mardonius, the best of his generals, with an army of 300,000 men, who was defeated and slain at Plataea, Sept. 22, 479 B.C. The survivor of the war, famine, and pestilence, followed Xerxes home. He was assassinated by Artabanus, 465 B.C.

XIMENA (S. Spain), the site of a battle between the Spanish army under the command of general Ballasteros, and the French corps commanded by general Regnier, Sept. 10, 1811. The Spaniards, after a hard struggle, defeated their adversaries, but the loss was very great on both sides in killed and wounded.

* It was formed by connecting together ships of different kinds, some long vessels of fifty oars, others three-banked galleys, (the number of 350 on the side towards the sea, and 318 on that of the Archipelago; the former were placed transversely, but the latter, to diminish the strain of their cables, in the direction of the current, all secured by anchors and cables of great strength. On extended cables between the lines of shipping were laid fast-bound rafters, over these a layer of unwrought wood, and over the latter was thrown earth; on each side was a fence, to prevent the horses and beasts of burthen from being terrified by the sea, in the passage from shore to shore. This wonderful work was completed, it is said, in one week, 480 B.C.

Y.

YARD. The precise origin of our yard is uncertain. It is, however, likely that the word is derived from the Saxon *gyrd*, a rod or shoot, or *gyrdan* to enclose; being anciently the circumference of the body, until Henry I. decreed that it should be the length of his arm. See *Standard Measures*.

YARMOUTH, GREAT (Norfolk), was a royal demesne in the reign of William I., as appears from Domesday Book. It obtained a charter from John, and one from Henry III. In 1348, a plague here carried off 7000 persons; and that terrible disease did much havoc, again in 1579 and 1664. The theatre was built in 1778; and Nelson's pillar, a fluted column, 140 feet in height, was erected in 1817. The suspension chain-bridge over the river Bure was built by Mr. R. Cory, at an expense of about 4000*l*. Owing to the weight of a vast number of persons who assembled on this bridge to witness an exhibition on the water, it suddenly gave way, and seventy-nine lives, mostly those of children, were lost, May 2, 1845. The railway from London to Norwich was opened in 1844.

YEAR. The Egyptians, it is said, were the first who fixed the length of the year.

The Roman year was introduced by Romulus, 753 B.C.; and it was corrected by Numa, 713 B.C., and again by Julius Cæsar, 45 B.C. See *Calendar*. The solar or astronomical year was found to comprise 365 days, 5 hours, 48 minutes, 57 seconds, and 6 decimals, 265 B.C. The sidereal year, or return to the same star, is 365 days, 6 hours, 9 minutes, 11 seconds. The Jews dated the beginning of the sacred year in March; the Athenians in June; the Macedonians

on Sept. 24; the Christians of Egypt and Ethiopia on Aug. 29 or 30; and the Persians and Armenians on Aug. 11. Nearly all Christian nations now commence the year on January 1. Charles IX. of France, in 1564, published an arrêt, the last article of which ordered the year for the time to come to be constantly and universally begun, and written on and from January 1. See *New Style*, *Platonic Year*, *Sabbatical Year*, *French Revolutionary Calendar*. *

YEAR IN ENGLAND. The English began their year on the 25th of December, until the time of William the Conqueror. This prince having been crowned on Jan. 1, gave occasion to the English to begin their year at that time, to make it agree with the then most remarkable period of their history. *Stow*. But though the historical year began on the day of the Circumcision, yet the civil or legal year did not commence till the day of the Annunciation, namely, the 25th of March. Until the act for altering the style, as late as 1752 (see *Style*), the year did not legally and generally commence in England until the last mentioned day. In Scotland, at that period, the year began on the 1st of January. This difference caused great practical inconveniences; and January, February, and part of March sometimes bore two dates, as we often find in old records, 1745-1746, or 1745-6, or 1745. Such a reckoning often led to chronological mistakes; for instance, we popularly say "the revolution of 1688," as that great event happened in February of the year 1688, according to the then mode of computation: but if the year were held to begin, as it does now, on the first of January, it would be the revolution of 1689.

YEAR, LUNAR, the space of time which comprehends twelve lunar months, or 354 days, 8 hours, 48 minutes, was in use among the Chaldeans, Persians, and ancient Jews. Once in every three years was added another lunar month, so as to make the solar and the lunar year nearly agree. But though the months were lunar, the year was solar; that is, the first month was of thirty days, and the second of twenty-nine, and so alternately: and the month added triennially was called the second Adar. The Jews afterwards followed the Roman manner of computation.

YEAR OF OUR LORD. See *Anno Domini*.

YEAR OF THE REIGN. From the time of William the Conqueror, A.D. 1066, the year of the sovereign's reign has been given to all public instruments. The king's patents, charters, proclamations, and all acts of parliament have since then been generally so dated. The same manner of dating is used in most of the European states for all similar documents and records. See *List of Kings under England*, p. 257.

YEAR AND A DAY. A space of time in law, that in many cases establishes and fixes a right, as in an estray, on proclamation being made, if the owner does not claim it within the

* The year in the northern regions of Siberia and Lapland is described in the following calendar, given by a traveller: *June 23*. Snow melts. *July 1*. Snow gone. *July 9*. Fields quite green. *July 17*. Plants at full growth. *July 25*. Plants in flower. *Aug. 2*. Fruits ripe. *Aug. 10*. Plants shed their seed. *Aug. 18*. Snow. The snow then continues upon the ground for about ten months, from Aug. 18th of one year to June 23rd of the year following, being 309 days out of 365; so that while the three seasons of spring, summer, and autumn are together only fifty-six days, or eight weeks, the winter is of forty-four weeks' duration in these countries.

time it is forfeited. The term arose in the Norman law, which enacted that a beast found on another's land, if unclaimed for a year and a day, belonged to the lord of the soil. It is otherwise a legal space of time.

YELLOW FEVER. This dreadful pestilence made its appearance at Philadelphia, where it committed great ravages, A.D. 1699. It appeared in several islands of the West Indies in 1732, 1739, and 1745. It raged with unparalleled violence at Philadelphia, in Oct. 1762; and most awfully at New York, in the beginning of August 1791. This fever again spread great devastation at Philadelphia in July, 1793; carrying off several thousand persons. *Hardie's Ann.* It again appeared in Oct. 1797; and spread its ravages over the northern coast of America, Sept. 1798. It re-appeared at Philadelphia in the summer of 1802; and broke out in Spain, in Sept. 1803. The yellow fever was very violent at Gibraltar in 1804 and 1814; in the Mauritius, July 1815; at Antigua, in Sept. 1816; and it raged with dreadful consequences at Cadiz, and the Isle of St. Leon, in Sept. 1819. A malignant fever raged at Gibraltar in Sept. 1828, and did not terminate until the following year.

YEOMEN OF THE GUARD, a peculiar body of foot-guards to the king's person, instituted at the coronation of Henry VII. Oct. 30, 1485, which originally consisted of fifty men under a captain. They were of a larger stature than other guards, being required to be over six feet in height, and were armed with arquebuses and other arms. The band was increased by Henry's successors to one hundred men, and seventy supernumeraries; and when one of the hundred died, it was ordered that his place should be supplied out of the seventy. They were clad after the manner of king Henry VIII. *Ashmole's Instit.* This is said to have been the first permanent military band instituted in England. John, earl of Oxford, was the first captain in 1486. *Beaton's Pol. Index.*

YEW-TREE (*Taxus*). The origin of planting yew-trees in churchyards was (these latter being fenced) to secure the trees from cattle, and in this manner preserve them for the encouragement of archery. A general plantation of them for the use of archers was ordered by Richard III. 1483. *Stow's Chron.* Near Fountains abbey, Yorkshire, were lately seven yew-trees called the Seven Sisters, supposed to have been planted before A.D. 1088; the circumference of the largest was thirty-four feet seven inches round the trunk. In 1851, a yew-tree was said to be growing in the churchyard of Gresford, North Wales, whose circumference was nine yards nine inches, being the largest and oldest yew-tree in the British dominions; but it is affirmed on traditionary evidence that there are some of these trees in England older than the introduction of Christianity. The old yew-tree mentioned in the survey taken of Richmond palace in 1649, is said to be still existing.

YEZDEGIRD, or PERSIAN ERA. It was formerly universally adopted in Persia, and is still used by the Parsees in India, and by the Arabs, in certain computations. This era began on the 26th of June A.D. 632, when Yezdegird was elected king of Persia. The year consisted of 365 days only, and therefore its commencement, like that of the old Egyptian and Armenian year, anticipated the Julian year by one day in every four years. This difference amounted to nearly 112 days in the year 1075, when it was reformed by Jelaledin, who ordered that in future the Persian year should receive an additional day whenever it should appear necessary to postpone the commencement of the following year, that it might occur on the day of the sun's passing the same degree of the ecliptic.

YOKE. The yoke is spoken of as a type of servitude throughout Scripture. The ceremony of making prisoners pass under it was practised by the Samnites towards the Romans, 321 B.C. See *Caudine Forks*. This disgrace was afterwards inflicted by the Romans upon their vanquished enemies. *Dufresnoy.*

YORK. The *Eboracum* of the Romans, and one of the most ancient cities of England.

Here Severus (A.D. 207), and here also Constantine kept courts, and his son Constantine the Great was born, in 274, and proclaimed emperor		The castle was built by Richard III., 1484, and was rebuilt	1701
Abbey of St. Mary's, founded by Seward the Dane	306	The corporation built a mansion-house for the lord mayor	1728
York was burnt by the Danes, and all the Normans slain	1050	The famous York petition to parliament to reduce the expensiture and redress grievances was gotten up	Dec. 1779
The city and many churches were destroyed by fire	1069	Yorkshire Philosophical Society established	1822
York received its charter from Richard II. and the mayor was made a lord	June 3, 1137	First meeting of the British Association held here	Sept. 27, 1831

	1446		

YORK, *continued.*

DUKES OF YORK.

1385. Edmund Plantagenet (fifth son of king Edward III.); created duke Aug. 6.; died 1402.
 1406. Edward (his son), was degraded by Henry IV. in 1399, but restored in 1414; killed at Agincourt, 1415; succeeded by his nephew.
 1415. Richard (son of Richard, earl of Cambridge), who was beheaded for treason in 1415; became regent of France in 1435; quelled the rebellion in Ireland in 1449; claimed the throne, and was appointed protector in 1454: his office was annulled, and he began the civil war in 1455, and was slain after his defeat at Wakefield in 1460.
 1460. Edward (his son) afterwards king Edward IV.
 1474. Richard (his second son), said to have been murdered in the Tower, 1483.
 1494. Henry Tudor, afterwards king Henry VIII.
1605. Charles Stuart, afterwards Charles I.
 1643. James Stuart (his second son), afterwards James II.
 1716. Ernest (brother of George I.); died 1728.
 1760. Edward (brother of George III.); died 1767.
 1784. Frederic (son of George III.), born, Aug. 16, 1762; marries princess Frederica of Prussia, Sept. 29, 1791; commands the British forces at Antwerp, April 8, 1793; present at the siege of Valenciennes, May 23; defeated at Dunkirk, Sept. 7; at Bois-le-Duc, Sept. 14; and at Bostel, Sept. 17; appointed commander-in-chief, 1798: defeated near Alkmaar, Sept. 19 and Oct. 6, 1799; accused by colonel Wardle of abuse of his patronage; he resigns, Jan. 27, 1809; becomes again commander-in-chief, 1811; strongly opposes the Catholic claims, 1825; dies Jan. 3, 1827.

YORK, ARCHBISHOPRIC OF. The most ancient metropolitan see in England, being, it is said, so made by king Lucius, about A.D. 180, when Christianity was first, although partially, established in England. The bishop, Eborius, was present at the council of Arles, A.D. 314. The see was overturned by the Saxons, was revived by pope Gregory on their conversion, and Paulinus was made archbishop about A.D. 625. York and Durham were long the only two sees in the north of England, until Henry I. erected a bishopric at Carlisle and Henry VIII. another at Chester. York was the metropolitan see of the Scottish bishops; but during the time of archbishop Nevil, 1464, they withdrew their obedience, and had archbishops of their own. Much dispute arose between the two English metropolitans about precedence, as by pope Gregory's institutions it was thought he meant, that whichever of them was first confirmed, should be superior: appeal was made to the court of Rome by both parties, and it was determined in favour of Canterbury. The archbishop of York was allowed to style himself primate of England, while the archbishop of Canterbury styles himself primate of *all* England. The province of York now contains the dioceses of York, Carlisle, Chester, Durham, Sodor and Man, Manchester, and Ripon (*which see*). York has yielded to the church of Rome eight saints, and three cardinals, and to England twelve lord chancellors, two lord treasurers, and two lord presidents of the north. It is rated in the king's books, 39 Henry VIII. 1546, at 1609l. 19s. 2d. per annum. *Beaton.* Present income 10,000l.

ARCHBISHOPS OF YORK SINCE 1500.

1501. Thomas Savage, died Sept. 3, 1507.
 1508. Christopher Bainbrigg, poisoned at Rome, July 14, 1514.
 1514. Thomas Wolsey, died Nov. 29, 1530.
 1531. Edward Lee, died Sept. 13, 1544.
 1545. Robert Holgate, deprived March 23, 1554.
 1555. Nicholas Heath, deprived.
 1564. Thomas Young, died June 26, 1568.
 1570. Edmund Grindal, translated to Canterbury, Jan. 10, 1576.
 1577. Edwin Sands or Sandys, died July 10, 1588.
 1589. John Piers, died Sept. 28, 1594.
 1595. Matthew Hutton, died Jan. 16, 1606.
 1606. Tobias Matthew, died March 29, 1628.
 1628. George Mountaigne, died Oct. 24, 1628.
 — Samuel Harsnet, died May 25, 1631.
 1632. Richard Neyle, died Oct. 31, 1640.
 1641. John Williams, died March 25, 1650.
 [See vacant ten years.]
 1660. Accepted Frewen, died March 28, 1664.
1664. Richard Sterne, died June 18, 1683.
 1683. John Dolben, died April 11, 1686.
 [See vacant two years.]
 1688. Thomas Lamplugh, died May 5, 1691.
 1691. John Sharp, died Feb. 2, 1714.
 1714. Sir William Dawes, died April 30, 1724.
 1724. Laurence Blackburn, died March 23, 1743.
 1743. Thomas Herring, translated to Canterbury, Oct. 1747.
 1747. Matthew Hutton, translated to Canterbury, March, 1757.
 1757. John Gilbert, died 1761.
 1761. Robert Hay Drummond, died Dec. 10, 1776.
 1777. William Markham, died Nov. 3, 1807.
 1808. Edward Venables Vernon, died Nov. 5, 1847.
 1847. Thomas Musgrave, died May 4, 1860.
 1860. Charles F. Longley, translated to Canterbury (from Durham), 1862.
 1862. William Thomson, translated from Gloucester, PRESENT archbishop, 1862.

YORK MINSTER. This majestic fabric was erected at different periods, and on the site of former buildings, which have again and again been destroyed by fire. The first Christian church erected here, which appears to have been preceded by a Roman temple, was built by Edwin, king of Northumbria, of wood, in A.D. 625, and of stone about the year 635. It was damaged by fire in 741, and was rebuilt by archbishop Albert, about 780. It was again destroyed by fire in the year 1069, and rebuilt by archbishop Thomas. It was once more burnt down in 1137, along with St. Mary's Abbey, and 39 parish churches in York. Archbishop Roger began to build the choir, in 1171; Walter Gray added the south transept in 1227; John de Bomaine, the treasurer of the cathedral, built the north transept in 1260. His son, the archbishop, laid the foundation of the nave in 1291. In 1330, William de

Melton built the two western towers, which were finished by John de Birmingham in 1342. Archbishop Thoresby, in 1361, began to rebuild the choir, in accordance with the magnificence of the nave, and he also rebuilt the lantern tower. And thus by many hands, and many contributions of multitudes on the promise of indulgences, this magnificent fabric was completed. It was first set on fire by Jonathan Martin, a lunatic, and the roof of the choir and its internal fittings destroyed, Feb. 2, 1829; the damage, estimated at 60,000*l.*, was repaired in 1832. An accidental fire broke out, which in one hour reduced the belfry to a shell, destroyed the roof of the nave, and much damaged the edifice, May, 20. 1840.

YORK AND LANCASTER, WARS OF. See *Roses*.

YORK (Upper Canada), founded in 1794; since 1834 named Toronto. In the war between America and Great Britain, the United States' forces made several attacks upon the province of Upper Canada, and succeeded in taking York, the seat of the government, April 27, 1813; but it was soon afterwards again retaken by the British.

YORK TOWN (Virginia, United States). Lord Cornwallis had taken possession of York town in Aug. 1781; but after sustaining a disastrous siege, he was obliged to surrender his whole army, consisting of about 7000 men, to the allied armies of France and America, under the command of general Washington and count Rochambeau, Oct. 19, 1781. This mischance was attributed to sir Henry Clinton, who had not given the garrison the necessary succour they expected; and it mainly led to the close of the war. It was strongly fortified by the Confederates in the American civil war, but surrendered to M'Clellan, May, 1862.

YTTTRIUM, a rare metal. The earth yttria was discovered by professor Gadolin in a mineral at Ytterby, in Sweden, 1794. The metal was first obtained by Wöhler in 1828. It is of a dark grey colour, and brittle.

YVRES (now IVRY, N.-W. France), where a battle was fought, March 2, 1590, between Henry IV. of France, aided by his chief nobility, and the generals of the Catholic league, over whom the king obtained a complete victory. This success enabled Henry to blockade Paris, and reduce that capital to the last extremity by famine: but the duke of Parma, by orders from Philip of Spain, marched to the relief of the league, and obliged the king to raise the blockade.

Z.

ZAMA (near Carthage, N. Africa), the scene of the battle between the two greatest commanders in the world at the time, Hannibal and Scipio Africanus. The victory was won by Scipio, and was decisive of the fate of Carthage; it led to an ignominious peace the year after, which closed the second Punic war. The Romans lost about 2000 killed and wounded, while the Carthaginians lost in killed and prisoners more than 40,000; some historians make the loss greater; 202 B.C.

ZANTE. One of the Ionian islands, *which see*.

ZANZALEENS. This sect rose in Syria, under Zanzalee, A.D. 535; he taught that water baptism was of no efficacy, and that it was necessary to be baptized with fire, by the application of a red-hot iron. The sect was at one time very numerous.

ZE, ZOW, ZIERES. For *ye, you, and yours*. The letter *z* was retained in Scotland, and was commonly written for the letter *y* so late as the reign of queen Mary, up to which period many books in the Scottish language were printed in Edinburgh with these words, A.D. 1543.

ZELA (N.-E. Asia Minor). Where Julius Cæsar defeated Pharnaces, king of Pontus, son of Mithridates. Cæsar in announcing this victory, sent his famous despatch to the senate of Rome, in these words: "*Veni, vidi, vici*"—"I came, I saw, I conquered" (said, by Tacitus, to be the shortest despatch on record), so rapidly and easily was his triumph obtained. This battle ended the war; Pharnaces escaped into Bosphorus, where he was slain by his lieutenant Asander; Pontus was made a Roman province, and Bosphorus given to Mithridates of Pergamus, 47 B.C.

ZELL, CASTLE , in Hanover. The prison of the queen Matilda of Denmark, sister to George III. of England. A new ministry in Denmark, headed by the dowager queen, were opposed in their policy by the reigning queen Matilda, and counts Brandt and Struensee, now favourites at court. The king had displaced several of the queen dowager's friends, and in revenge upon Matilda, to whom these ministers paid great attention, she insinuated that the queen had condescended to have an intrigue with Struensee. This unfounded charge

was steadily persisted in, and in the end the unfortunate Matilda was doomed to be imprisoned for life.* His Britannic Majesty so far interfered as to send a small squadron of ships to convey the unhappy princess to Germany. The castle of Zell was appointed for her residence, and here she died at four-and-twenty years of age, denying in her last moment that she had ever been unfaithful to the king. She embarked at Elsinore, May 10, 1772, and died in 1775.

ZEND-AVESTA, ancient sacred books of the Parsees; of which 3 out of 21 are extant. The age of these books is much disputed. Professor Max Müller says that the MSS. had been preserved by the Parsee priests at Bombay, where a colony of fire-worshippers had fled in the 10th century. Anquetil Duperron's French translation, from a modern Persian version, was published in 1771.

ZENO, SECT. OF. See *Stoics*.

ZENOBIA, Queen of the East. See *Palmyra*.

ZENTA, in Hungary, the scene of a battle fought between the Germans under prince Eugene against the Turks, and memorable for the prodigious overthrow of the latter, Sept. 11, 1697. This victory of the Austrian arms led to the peace of Carlowitz, negotiated in 1698, and ratified in January 1699.

ZINC. The ore of zinc, calamine, was known to the Greeks, who used it in the manufacture of brass. It is said to have been known in China, however, and is noticed by European writers as early as A.D. 1231; though the method of extracting it from the ore was unknown for nearly five hundred years after. The metal zinc is first mentioned by Paracelsus (who died in 1541). A mine of zinc was discovered on lord Ribblesdale's estate, Craven, Yorkshire, in 1809. Zincography was introduced in London shortly after the invention of lithography became known in England, in 1817. See *Lithography*. Zinc is much used in voltaic batteries; and its application in manufactures has greatly increased of late years. It is often called Spelter. See *Photozincography*.

ZIRCONIUM, the metallic base of the earth Zirconia, which was discovered by Klaproth in 1789; from this Berzelius obtained the metal in 1824. Zirconia is found in the sand of the rivers of Ceylon. The metal exists in the form of a black powder.

ZIZYPHUS VULGARIS. This shrub was brought to these countries from the south of Europe, about A.D. 1640. The *Zizyphus Paliurus* shrub, better known as the *Christ's Thorn*, was first brought from Africa before 1596. See *Flowers*.

ZODIAC. The obliquity of the zodiac was discovered, its twelve signs named, and their situations assigned them in the heavens, by Anaximander, about 560 B.C.. The Greeks and Arabians borrowed the zodiac from the Hindoos, to whom it has been known from time immemorial. *Sir William Jones*.

ZOLLVEREIN (*Customs' Union*), the name given to the German Commercial union, of which Prussia is the head. It began in 1818, and was gradually joined by nearly all the German states, except Austria. On Feb. 19, 1853, an important treaty of commerce and

* It was resolved to surprise the king in the middle of the night, and force him to sign an order for committing the ministers to separate prisons, and to accuse them of a design to dethrone and poison the king, and to report a criminal correspondence of the queen with her favourite. This design was executed on the night of Jan. 16, 1772, when a masked ball was given at the palace. The queen had danced most of the evening with Struensee, and had retired to her chamber about two in the morning. About four, the queen-dowager and her party entered the king's chamber, and informed him that the queen, with Struensee, his brother, and Brandt, were at that moment busy in drawing up an act of renunciation of the crown, which they would immediately after compel him to sign, and they therefore demanded their arrest. Christian, through importunities and threats, consented, after some remonstrance to this scandalous requisition, and count Rantzau was despatched to the queen's apartments, at this untimely hour, to execute the king's orders. She was conveyed to the castle of Cronenburg, and Brandt and Struensee were also seized in their beds, imprisoned, and put in irons. The queen-dowager and her adherents now assumed the government. Struensee was threatened with torture; and to avoid it, after repeated examinations, confessed that he had conducted a criminal intrigue with Matilda, and at length he and Brandt were beheaded, April 28, 1772. The evidence against the queen consisted in a number of circumstances, all of them susceptible of an innocent explanation, sworn to by her attendants who were employed as spies. It is true that her own signature affixed to a confession was alleged against her; but this signature proves nothing but the baseness of her enemies, and their malice. Schack, who was sent to interrogate her at Cronenburg, was received by Matilda with indignation, when he spoke of her connection with Struensee. When he showed Struensee's confession to her, he artfully intimated that the fallen minister would be subjected to a cruel death if he was found to have falsely criminated the queen. "What!" exclaimed Matilda, "do you think if I were to confirm his declaration, I should save the life of that unfortunate man?" Schack answered with a low bow. The queen took a pen, wrote the first syllable of her name, and fainted away. Schack completed the signature, and bore away the fatal document in triumph. Struensee's confession was obtained by threats of torture, facilitated by some hope of life, and influenced by a knowledge that the proceedings against the queen could not be carried beyond a divorce.

navigation, between Austria and Prussia, to last from Jan. 1854 till Dec. 1865, was signed, to which the other states of the Zollverein gave in their adhesion on April 5, 1853. In Nov. 1861, Prussia threatened to withdraw unless certain changes were made.

ZOOLOGY. The animal kingdom was divided by Linnaeus into six classes; viz.—*Mammalia*, which includes all animals that suckle their young; *Aves*, birds; *Amphibia*, or amphibious animals; *Pisces*, fishes; *Insecta*, insects; *Vermes*, worms; A.D. 1741. From this period the science of zoology has had many distinguished professors, the most illustrious of whom was the baron Cuvier, who died in Paris, May 13, 1832. His great work, *Règne Animale*, was published in 1816. He distributed the animals into four great divisions, the *Vertebrata* (ribbed); the *Mollusca* (soft-bodied); the *Articulata* (jointed); and the *Radiata* (the organs disposed round a centre). In 1859, professor Owen made known his system of arranging the class *Mammalia* according to the nature of their brains. The Zoological Society of London (originally the Zoological Club) was founded in 1826, and its gardens in the Regent's Park were opened in April 1827; the society was chartered March 27, 1829. See *Aquarium*, *Hippopotamus*, *Giraffe*, and *Acclimatisation*. On the demolition of Exeter Change, in 1829, the menagerie of Mr. Cross was temporarily lodged in the King's Mews, whence it was removed to the Surrey Zoological Gardens, 1832 (*which see*). The Zoological Gardens of Dublin were opened in the same year.

ZORNDORFF, in Prussia, where a battle was fought between the Prussian and Russian armies; the former, commanded by the king of Prussia, obtained a victory over the forces of the czarina, whose loss amounted to 21,529 men, while that of the Prussians did not exceed 11,000, Aug. 25 and 26, 1758.

ZOUAVES AND FOOT CHASSEURS. When the French established a regency at Algiers, in 1830, they hoped to find the employment of native troops advantageous, and selected the *Zouavias*, a congregation of Arab tribes, famous for daring and skilful courage. In time numbers of red republicans, and other enthusiastic Frenchmen, joined the regiments, adopting the costume, &c.: eventually the Africans disappeared from the ranks, and no more were added, they having been frequently guilty of treachery. The French Zouaves formed an important part of the army in the Crimean war, 1854-5.*

ZUINGLIANS, the followers of the reformer Ulrich Zuinglius, who at Zurich, declaimed against the church of Rome, and effected the same separation for Switzerland from the papal dominion, which Luther did for Saxony. He procured two assemblies to be called; by the first he was authorised to proceed, by the second, the ceremonies of the Romish church were abolished, 1519. Zuinglius, died in arms as a soldier; being slain in a skirmish against his popish opponents in 1531. The Zuinglians were also called Sacramentarians.

ZULPICH. See *Tolbiae*.

ZURICH was admitted to be a member and made head of the Swiss confederacy, A.D. 1351. Zurich was the first town in Switzerland that separated from the church of Rome. See *Zuinglians*. A grave-digger of Zurich poisoned the sacramental wine, by which eight persons lost their lives, and many others were grievously injured, Sept. 4, 1776. The French were defeated here, losing 4000 men, June 5, 1799. The Imperialists were defeated by Massena, the former losing 20,000 men killed and wounded, Sept. 25, 1799. See *Switzerland*. On June 24, 1859, the Austrians were defeated by the allied French and Sardinian army at Solferino. Preliminaries of peace were signed at Villa Franca by the emperors of Austria and France on July 12 following. A conference between the representatives of the powers concerned having been appointed, the first meeting took place on August 8. After many delays a treaty was signed on Nov. 11, and ratified Nov. 12. Lombardy was ceded to Sardinia; the formation of an Italian Confederation, under the presidency of the pope, was determined on, and the rights of the ex-sovereigns of Tuscany, Modena, and Parma were reserved. The formation of the new kingdom of Italy in 1861 virtually annulled the treaty of Zurich.

ZUTPHEN, in Holland. At a battle here Sept. 22, 1586, between the Spaniards and the Dutch, the amiable sir Philip Sidney, author of the "Arcadia," was killed. He was serving with the English auxiliaries, commanded by the earl of Leicester.

* The Zouave organisation and drill were introduced into the federal army in the great civil war in America, by Ephraim E. Ellsworth, early in 1862. He was assassinated on May 24, same year, at Alexandria, just after taking down a secession flag.

INDEX.

[The references are to *articles* in the body of the work; the *italics* refer to articles in this Index. The year given is A.D. when B.C. is not mentioned; two dates, thus, 1508-82, signify the year of the person's birth and death; *b.*, born; *d.*, died; *f.*, flourished; *m.*, murdered; *k.*, killed by accident.]

ANBAS, Persia, 1582
 Abbot, abp.; Canterbury, 1611
 Abbot, Charles, speaker, 1802
 Abd-el-Kader; Algiers, 1835
